250 पूर्वराजानः पोतपात्रेष्वन्यदेशादेशान्तरभृत्तेषु दुर्वातेन समापतितेषु भग्नेष्वस्तीर्थसंगतेषु च संभृतानि करितुरगरत्नादीनि वस्तूनि सकलानि बलाद्गृहरन्ति । वयमपि प्राणेभ्योऽपि गरीयो धनमिति समुद्रयानकृतमहासाहसेभ्यस्तेभ्यः कलशुल्कादृते कृपया कीर्त्यै धर्माय च सर्वं वितराम इति । तच्छुल्कपरिमाणं; then a Telugu passage about the dues Vide E I vol. XII p 195

1244–45 A. D.) issues (E. I. vol. XII p. 195) a charter of security (abhaya-śāsana) to the sailors who ply between towns in different countries, islands and continents: 'when ships that made voyages from one country to another were driven or were shattered or touched at a place that was not meant as a place of call, owing to unfavourable winds, former kings forcibly took away all commodities therein such as gold, elephants, horses &c.; but we, considering that wealth is dearer than life itself, have with kindness decided to give everything except the fixed *śulka* to those sailors who undertake the great venture of crossing the sea, so that thereby we shall secure fame and righteousness; the śulka fixed is as follows'. About *śulka* to be levied on goods brought by the sea the Baud. Dh. S. (I. 10. 15–16) prescribes that it is 10 per cent of the cargo except one best article (which is totally exempted). In the Kharepatan grant of the Śilāra king Rattarāja dated sake 930 it is provided that one golden *gadiyāna* was levied as duty on each vessel that came from another country (dvīpāntarāyāta-vahitrāt) and one golden *dharana* had to be paid on each vessel coming from the district of Kandalamūlīya excepting Cemulya (modern Cheul) and Candrapura. Vide E I. vol. III. p. 292 at p. 301 Śukra (IV. 2 109–111) lays down some very reasonable rules viz on the same commodity śulka is to be taken in the same country by the king only once and never more than once; the king may take either 1/16, 1/20 or 1/32 from the vendee or vendor; no śulka is to be taken from the vendor when he has to sell his goods at the same price at which he bought them or for less than the cost price; the king should always take from the buyer the proper śulka after seeing what profit he is going to make Nār (sambhūya-samutthāna verses 14–15) lays down that whatever is to be used by śrotriyas (brāhmanas learned in the Vedas) for domestic purposes is exempt, but not what they may employ in trade; the gifts received by brāhmanas, the property of stage-players, whatever is carried on a man's shoulders—on all these no śulka must be levied. The exemption of brāhmanas and others from taxation has already been dealt with in H. Dh. vol. II pp 143–145. Gaut. X. 9–12, Āp Dh. S II. 10. 26 10–16, Vas I 42–46 and 19 23–24, Manu. VIII. 394 exempt a learned brāhmana, the women of all varnas, all boys before the signs of puberty appear, all those who stay with a teacher for study, ascetics who are intent on dharma, śūdras that do menial work such as washing the feet of higher varnas, the blind, the deaf and dumb, the diseased, the cripple, an old man of 70 years or

more. Though these really required more protection than most people, humanity and higher feelings made them exempt from taxes from very ancient times The claims to exemption were probably exaggerated and not respected in practice. For example, Nārada (VI. 14) states that the king is not to levy tolls or customs duties on articles required by śrotriyas for domestic use but if they engaged in trade they had to pay taxes on merchandise.[251] The Mit. on Yāj. II. 4 states that the six exemptions mentioned in Gaut. (VIII. 12–13) apply only to a very learned brāhmana and not to all brāhmanas. Manu. VII. 133 provides that a king even when he has lost everything should not levy a tax on śrotriyas and relying on this the Vaijayanti explains Visnu Dh S III 26 as referring only to learned brāhmanas. The Rāmāyana (III. 6. 14)[251a] states, differing from other authorities, that the king shares one-fourth of the merit of *munis* (ascetics) dwelling in his kingdom There was a corresponding liability on the king; viz. he shared half and half in the demerit due to the sins committed by the subjects that are not properly restrained by him (Yāj. I 337) Manu and Visnu. Dh S. III. 28 and Visnudharmottara II. 61 25 say that he reaps the sixth part of the sin of his subjects.

Kaut in II. 15 mentions numerous kinds of taxes or dues that were levied by the king It is not possible to explain many of the terms used by him. In the ancient inscriptions, when making grants of a village and the like, it is usual for the kings to specify the exemptions from taxes and dues that went with the grant. Such exemptions were called *parihāra*, which word occurs in Kautilya and also in the Hāthigumphā Inscription of Khāravela (in the 2nd century B C., E I. vol. xx at p. 9) where we read '*bamhanānam jātim parihāram dadāti*'. In certain early records even, these exemptions are said to be eighteen, e g. in the Hirahadagalli plate of Śivaskandavarman (E. I. vol I. p. 6) and[252] the Omgudu plate of Vijayaskandavarman

(E I 15 p. 250) Vide H Dh vol II pp 864-865 and notes thereon for grants containing names of numerous taxes that were remitted to the grantees and 'Pandyan kingdom' by Prof Nilkanta Śāstri p 217 on the same subject

Fines as a source of revenue will be discussed in the next section about 'law and justice' The king had numerous other sources of income Kaut (II. 12) describes the duties of the superintendent of mines Every thing dug up from mines belonged to the king (Visnudharmasūtra III 55) According to Manu VIII 39 and Medhātithi thereon the king is entitled to a half (or some share $\frac{1}{6}$, $\frac{1}{8}$ &c) of the ore dug out of mines, as he is the lord of the earth and gives protection In modern times under sec 69 of the Bombay Land Revenue Code, Government have a right to all mines and minerals The 'Paraśurāmapratāpa[252a] quotes a verse · 'Brahmā arranged that the king was (to be) the owner of all wealth and specially (wealth) that is inside the earth,' while Kāt (16-17) says (vide note 243) 'the king is declared to be the lord of the land, but never of other kinds of wealth; therefore he should secure the sixth part of the fruits of land, but not otherwise at all Since human beings reside on it (land) their (qualified) ownership thereof has been declared' For further discussion of the theory of the king's ownership of all land, vide H of Dh. vol II, pp 865-869 The State itself manufactured salt, took its share in salt manufactured by private persons and levied $\frac{1}{6}$ as State dues on imported salt. Kautilya mentions ten kinds of revenue from mines The

salt and sugar (alonagulacchobham=alavana—guda—ksobham), free from taxes, forced labour, free from the taking of the oxen in succession, free from the taking of grass and wood, free from the taking of vegetables and flowers, with these and other immunities of eighteen kinds it must be exempted &c' (*evamādikeh atthārasajātiparihārehi*). Vide Vilavatti grant of Pallava king Simhavarman for a long enumeration of taxes collected from villages in South India in E I vol 24 p 296 and a copperplate grant of the Śilāhāra king Aparājita dated *śake* 915, where in granting a gardeo to a brāhmana occur the following words 'साद्वङ्गः सदण्डदशापराध प्रधाननिधानैकदोषवाह्य इतरसमस्तापुत्रालीयक-कुमारीसाहसप्रभृतिदण्डदोषसमन्वितः पूर्वदत्तदेवदायब्रह्मदेयवर्जितः समस्तायस्थानसहितः ..... दत्तः in 'Important Inscriptions from Baroda' vol. I edited by Mr A. S. Gadre (p 55 at p. 61). कुमारीसाहस appears to mean the 'fine levied for violating a virgin or her modesty'.

252 a धनानामीश्वरा राजा ब्रह्मणा परिकल्पित. । भूगताना विशेषेण भर्तासौ विबुधाधिपः ॥ q. in परशुरामप्रताप folio 27a.

Mānasollāsa (II. 3 verses 332 and 361) asks the king to guard mines of gems, gold and silver and declares that the Creator made the king the ruler over all wealth and especially over what is inside the earth. Rudradāman (150 A. D) boasts that he filled his treasury by means of *bali*, *śulka* and *bhāga* levied according to the śāstras and that his treasury overflowed with heaps of gold, silver, diamonds, *lapis lazuli* and other gems (E I vol VIII. p. 36 at p 44) Kaut (IV 1) says that those who sweep the dust (near mines &c) should get one-third of the valuable things found and the king should get two-thirds and all jewels The king had also monopolies in certain matters He alone could catch elephants. Kaut (II 31-32) and Mānasollāsa (II. 3, pp 44-58) deal with this matter, the latter describing several methods of catching elephants. Medhātithi[253] on Manu VIII 400 says that kings have a monopoly as to elephants because it is well-known that they are most useful to them and he specifies certain monopolies such as those in saffron, silken cloth and wool, horses, pearls and jewels. Megasthenes (Fragment XXXVI p. 90) states that a private person was not allowed to keep an elephant or a horse and that those animals were held to be the special property of the king

The king recovered a sort of road cess through officers called *antapāla* (guardians of borders or boundaries) viz $1\frac{1}{4}$ pana on each cart loaded with merchandise, half a pana on each head of cattle, $\frac{1}{4}$th pana on minor quadrupeds, and one *māsa* on a load carried on a man's shoulders (Kaut. II. 21 p 111). Śukra IV. 2. 129 permits for the repairs to the roads a tax on those who use roads Revenues were raised in numerous other ways such as by charging for stamping weights and measures, by fees levied from keepers of gambling halls, from players, singers and musicians, from prostitutes, from forests and pastures &c. Bṛhat-Parāsara X p 282 allows the king in a financial crisis to use even temple funds and make them good when freed from his difficult position Similarly it allows the king (in difficulty) to take the wealth of usurers, of low people,

253. यानि भाण्डानि राजोपयोगितया यथा हस्तिनः काश्मीरेषु कुङ्कुमप्राच्येषु पट्टोर्णादीनि प्रतीच्येष्वश्वा दाक्षिणात्येषु मणिमुक्तादीनि। मेधा. on मनु VIII 400 The passage as printed by Mandlik and Gharpure is corrupt. We should rather read यथा हस्तिनः । काश्मीरेषु कुङ्कुमं प्राच्येषु पट्टोर्णादीनि. Saffron is still a monopoly in Kashmir ' सरकपांसुधावकाः सारत्रिभाग लभेरन् । द्वौ राजा रत्नं च । अर्थशास्त्र IV. 1

of heretics and prostitutes, as the continuance and prosperity of temples and the others depend upon the king [254]

The Rājatarangiṇī (VII. 1008) notices that a tax was levied on Kashmirians performing śrāddha at Gayā An inscription of Vikramāditya V found near Gadag dated *śake* 934 (1012–13 A. D.) refers to taxes levied on upanayana, marriages, vedic sacrifices &c. (E I. vol 20 p. 64). It appears that the king of Anahilavād, Siddharāja (1094–1143 A. D), levied a tax on pilgrims going to Somanātha at the frontier town Bāhuloda and it is said that the tax yielded 72 lakhs of rupees a year, which Siddharāja remitted for the sake of and at the intervention of his mother; vide Bom G. vol I. part 1 p. 172 and Prabandha-cintāmaṇi (p. 84, Tawney) The amount is probably very highly exaggerated in order to glorify Siddharāja, but this shows that the yield of the pilgrim tax must have been substantial The Mānasollāsa in its great desire to help the king with the accumulation of wealth advises the king even to resort to alchemy [255]

A question may be asked. what were the means of preventing a king from being over-exacting and tyrannical in his taxes? Kaut. (VII. 5 pp 276–277) cites at great length the causes that lead to the impoverishment of the subjects, to their being greedy and disaffected Among these he mentions [256] 'not paying what ought to be paid and exacting what ought not to be exacted, not punishing the guilty and severely punishing the guilty, not protecting the people against thieves and robbing them of their wealth' He then states that when the subjects become impoverished they become greedy and when greedy they become disaffected and voluntarily go over to the side of the king's enemy or destroy their own king In another

place Kautilya (XIII. 1) suggests[257] that a conqueror may employ spies who should encourage the subjects of his enemy suffering from famine, depredations of thieves and wild tribes to tell their king, 'we shall beg the king for favoure (remission of taxes or help in the way of seeds &c.) but if he does not agree to bestow favours we shall go to another country'. So the threat of disaffection and migrating to another country were the deterrents against the tyranny of heavy taxation according to Kautilya. Śānti 87. 36 says[257a] that if the vaiśyas (*gominah*, who bore the brunt of taxation) were neglected, they may disappear from the country and dwell in forests. Manu (VII. 111-112) warns kings who through folly rashly oppress their kingdoms that they may ere long lose their own lives and those of their relativee and also their kingdoms. Yāj. (I. 340-341) is even more emphatic and says that the king who seeks to increase his treasury with wealth extracted by unjust means from his realm loses his wealth in no time and meets destruction along with his relatives. 'The fire springing from the wrath caused by the harassment of the subjects does not cease without burning the family, the wealth and the life of the king.' Kātyāyana (v. 19) harps on the spiritual consequences: 'the king who unjustly takes from his kingdom taxes, fines, share of crops and tolls, incurs[258] sin.' Śukra[259] (II. 319-321 and 370) emphasizes the keeping of daily, monthly and yearly accounts and the entering of the several items of income on the left side of the account and of those of expenditure on the right. The Nītivākyāmṛta[259a] refers to the appointment of auditors when there is discrepancy in the items of income and expenditure.

CHAPTER VIII

BALA (THE ARMY).

Bala is also called *danda* in Kaut and elsewhere According to Sumantu danda means 'punishment, corporal or monetary' and the army with its four arms is included by Sumantu under kośa (acc to S V p 46)[260] In the Rgveda we have frequent references to armies, weapons, battles &c The word *senānī* occurs in Rg X 84 2 where *Manyu* (martial Fury) is invoked to be the Commander[261] Rg VI 75 is full of references to bows, arrows, armour, bow-strings, quiver, charioteer, horses, chariots &c. Kām (XIII 34-37) states that the king possessed of a sound financial position increases his depleted army, supports his own subjects and is depended upon even by his enemies All the following result from the possession of a (powerful) army viz increase of the wealth of one's friends and enemies and of the (king's) territories, prompt attainment of objects that seemed distant, protection of what is already secured, destruction of the armies of the enemy, the keeping together of one's army Most authorities agree in saying that troops are of six kinds viz *maula* (hereditary), *bhṛta* or *bhṛtaka* or *bhṛtya* (hired troops), *śreṇi* (guild troops), *mitra* (troops of an ally or friendly power or feudatories), *amitra* (troops that once belonged to the enemy), *atavī* or *āṭavika* (wild tribes as troops) Vide Kaut[262] IX. 2 (first sentence), Kām. XVIII 4, Agnipurāna 242 1-2, Mānasollāsa (II 6, verse 556 p 76) The first three works say that each earlier variety of troops is superior to each later one *Maula* troops corresponded to the modern standing army, since Kaut (IX 2) prefers them on the ground that they depend on the king for maintenance and are being constantly drilled They most probably consisted of persons who and whose ancestors got tax-free lands in lieu of military service The Sabhāparva 5. 63 appears to refer to four kinds (omitting śreṇi and amitra) and Yuddhakānda 17 24 refers to five (omitting śreṇi)

262. मौलभृतकश्रेणीमित्रामित्राटवीबलानां समुदानकालः । ... पूर्वः पूर्वः चैषां श्रेयः संनाहयितुम् । कौटिल्य IX 2.

The Āśramavāsikaparva[263] (7 7-8) names five kinds (except *amitra*) and states that maula and mitra armies are superior to the rest and hired troops and śreni troops are each other's equals. This division of armies into various kinds is mentioned in the grant of Dhruvasena I of Valabhi in Gupta-Valabhi year 206 (E I. vol. XI p 106, where the king is said to have acquired the kingdom with the help of maula, bhṛta, mitra and śreni armies). Mānasollāsa defines the ātavika[264] army as consisting of *niṣūdas*, *mlecchas* and similar castes dwelling in the vicinity of mountains and *amitra* troops as soldiers who once belonged to an enemy king but being defeated were taken captive and made slaves. According to the Rājanītiratnākara (p 38) 'aribala' means 'troops that come to a king after leaving the king's enemy'. Kām. XVIII 7 says that the ātavika troops are, by nature, irreligious, greedy, *anāryas* and non-observers of truth. They correspond to the *pendharis* and freebooters of later times The reasons why hereditary and other troops are superior to amitra and ātavika varieties are explained at great length by Kaut. IX. 2 and Kām. XVIII. 5-9. Kaut. (IX. 2) states that an *amitra* army led by an ārya is superior to wild tribe troops Both of them are out for plunder and in case no plunder can be had or when there is a disaster they may prove as dangerous as snakes. By śreni-bala he has in mind the organized bands of soldiers to whom he refers elsewhere as 'vārtāśastropajīvinah' (vide p. 89 above). As it is not unlikely that members of trade-guilds either themselves learnt the profession of arms or engaged soldiers for the protection of their merchandise and property, these could be pressed into his service by a king in case of need and were distinguished from the hereditary army and hired troops as 'śreni-bala'. Differing from the *ācāryas* that troops composed of brāhmaṇas, ksatriyas, vaiśyas and śūdras are superior for enlistment in the order of the castes, Kaut holds that an army of ksatriyas well-trained in the wielding of arms or an army of

263. आदद्यात् बलं राजा मौल मित्रबलं तथा । अटवीबलं भृतं चैव तथा श्रेणीबलं प्रभो । तत्र मित्रबलं राजन् मौलं चैव विशिष्यते । श्रेणीबलं भृतं चैव तुल्ये एवेति मे मतिः ॥ आश्रमवासिक 7. 7-8.

264. पर्वतोपान्तसंवासिनिषादम्लेच्छजातिकम् । अधमं तत्समाख्यातं बलमाटविकं बुधैः ॥ शात्रवास्तु समाक्रान्ता दासभावमुपस्थिताः । तेषां बलं तु विज्ञेयममित्रजबलं बुधैः ॥ मानसोल्लास II. 6. verses 559-560 p. 79.

vaisyas and sūdras having greater numerical strength is better than an army composed of brāhmana soldiers, since an enemy may win over the latter army by prostrating himself before them [265] Vide H Dh vol II pp 122–123 for discussion on the question whether brāhmanas could become soldiers In Udyogaparva 96 7 (cr ed chap 94) it is said that king Dambhodbhava every day asked in the morning whether there was any śūdra, vaiśya, ksatriya or brāhmana equal or superior to him in armed conflict That shows that soldiers of castes other than ksatriyas were not unheard of in the Epic age Kām IV. (63, 65, 67) says that the hereditary army (pitr-paitāmaha) should consist mostly of ksatriyas In the Malıya copperplate of Mahārāja Dharasena II (252 Valabhi samvat i. e. 571–72 A. D.) Bhatārka, the founder of the Valabhi dynasty, is said to have secured the kingdom with the help of maula, bhrta, mitra and śreni troops (Gupta Inscriptions p. 165). Śukra (II. 137–139) says that the soldiers may be śūdras, ksatriyas, vaiśyas, mlecchas or of mixed castes, provided they are brave, restrained, well-built, devoted to their master and their dharma, and hate the enemy. Śānti (101 3–5) describes in what respects soldiers from Gāndhāra, Sindhu and other countries and Yavana and Deccan soldiers excel, remarks that brave and strong men are to be found everywhere (verse 6) and that men from the border (i e. *bhillas* and *kaivartas* according to Nilakantha) are desperate fighters, would never run away from battle and so should be preferred for enlistment in the army (verse 19). The Yasastilaka III (pp 461–467) describes the characteristics of Northern Indian (auttarāpatha), Deccan (dāksinātya), Dramila (South Indian), Tirhut (Tairabhukta) and Gurjara soldiers. An army was said to be composed of four parts, viz. elephants, horses, chariots and foot-soldiers (caturanga bala). Kām. XVIII. 24 says that *bala* is sixfold, viz the four sections of infantry, cavalry, chariots and elephants together with *mantra* (line of policy) and kośa (treasury) In Śānti. 103. 38 the army is said to have six angas (the well-known four plus kośa and roads for traffic) According to Kautilya (II. 2, VII. 11) and Kām. XIX. 62 the destruction of

265. ब्राह्मणक्षत्रियवैश्यशूद्रसैन्यानां तेजःप्राधान्यात्- पूर्वं पूर्वं श्रेयः संनाहयितुमित्याचार्याः । नेति कौटिल्यः । प्रणिपातेन ब्राह्मबलं परोभिहारयेत् । प्रहरणविद्याविनीतं तु क्षत्रियबलं श्रेयो बहुलसारं वैश्यशूद्रबलानीति । कौटिल्य IX. 2.

the enemy's forces and victory depended on elephants [266] Śāntiparva (100 24) says that an army in which the infantry predominates remains firm and that cavalry and chariots are all right when there is no rain. Śānti (59. 41–42) enumerates eight elements of the army viz. the well-known four (elephants etc), visti (labourers or porters who gave free labour and were only fed but were paid no wages), boats, spies, and guides (deśika) [267] Vide Śānti 121. 44 also In the Mahābhārata elephants do not, except in rare cases, play any role in the fighting that went on, while chariots and the other arms of an army are described everywhere. In the Virāṭaparva (65. 6) Vikarna was seated on an elephant when he attacked Arjuna; Bhīsmaparva 20. 7 refers to Duryodhana as riding an elephant and (95. 32–33) Bhagadatta is described as seated on an elephant when he attacked Bhīma In this respect the Epic carries on the vedic tradition Megasthenes (Fragment 1 p. 30) notes that in ancient India elephants were trained for war and turned the scale of victory. Vast armies were kept by ancient kings and emperors. When Śatrughna started against the demon Lavana he had an army of 4000 horses, 2000 chariots and 100 elephants with him (Rāmāyana VII. 64 2–4). In the Daśakumāracarita VIII the cynical jester Vihārabhadra reminds his master that the latter had 10000 elephants, three lakhs of horse and numberless foot-soldiers (B S. S p. 133, of ed. of 1919)

266. हस्तिप्रधानो विजयो राज्ञाम्। कौटिल्य II. 2; हस्तिप्रधानो हि परानीकवध॰। कौटिल्य VII. 11, नागेषु हि क्षितिभुजां विजयो निबद्धस्तस्माद्भूयाधिकबलो नृपतिः सदा स्यात्। कामन्दक XIX 62; मुख्यं दन्तिबलं राज्ञां समरे विजयैषिणाम्। तस्माज्जिजबले कार्या बहवो द्विरदा नृपैः॥ मानसोल्लास II 8 verse 678 p. 90; यतो नागास्ततो जयः। बुधभू p 42; बलेषु हस्तिन प्रधानमङ्गं स्वैरवयवैरष्टायुधा हस्तिनो भवन्ति। नीतिवा॰ (चलसमुद्देश) p. 207. The four feet, the two tusks, the trunk and the tail are the eight weapons of an elephant Though the Budhabhūṣana (p. 42) contains a glowing eulogy of elephants, the नीतिवाक्यामृत holds that elephants, if not properly trained, cause loss of wealth (because they eat vast quantities of fodder and grains) and of lives (they trample down their own soldiers through fright) 'अशिक्षिता हस्तिनः केवलमर्थप्राणहराः' 22 5 p. 208 The यशस्तिलक III p 491 notes 'न विनीता गजा येषां तेषां ते नृप केवलम्। क्लेशायापि विनाशाय रणे चात्मवधाय च॥. This has often been illustrated in battles against early Moslem and other invaders e g vide Elphinstone's History of India (5th ed. of 1866) p 309 (the fate of Dahir king of Sindh against Mohammed bin Casim, when the former's elephant was struck with a fireball) and p 329 (Anangpal against Mahmnd of Gazni) and also Cambridge History of India, vol III. (1928) pp. 5 and 16 for the same.

267 रथा नागा हयाश्चैव पादाताश्चैव पाण्डव। विदिर्नावश्चराश्चैव देशिका इति चाष्टमम्॥ अङ्गान्येतानि कौरव्य प्रकाशानि बलस्य तु। शान्ति 59. 41–42.

Megasthenes (in Fragment XXVII p 68) speaks of the camp of Sandrakottos (Candragupta Maurya) that had 400000 men, notes (in Fragment LVI) that the king of Palibothra had in his pay a standing army of six lakhs of foot-soldiers, 30000 cavalry and 9000 elephants (p 141, McCrindle), that the king of Horatae (Surāstra) had 150000 foot-soldiers, 5000 cavalry and 1600 elephants (*ibid* p. 150) and that even the Pāndyan kingdom ruled by women had 150000 foot and 500 elephants (*ibid*. p. 147). Vide Beal's 'Buddhist Records &c.' vol. I p 213 for the armies collected by Harsa in his march against the murderer of his elder brother (viz 5000 elephants, 2000 horse and 50000 foot-soldiers) and the vast armies that he had after six years of conquest viz. 60000 elephants and 100000 cavalry In the Āsvamedhikarparva (60. 14–20) it is narrated that when Drona assumed the post of commander-in-chief the Kaurava army had been reduced to 9 *akṣauhiṇīs* from eleven, that only five were left when Karna became *Senāpati* and the Pāndavas had then only three left and under Śalya's command there were only three aksauhinīs and the Pāndavas could oppose to him only one. In reply to a question from Dhṛtarāstra Yudhisthira states that in the great war the total number of warriors killed in battle came to the colossal figure of 1660020006 (Strīparva 26. 9).[268] The Udyogaparva gives (155. 24–26) the following table for an aksauhinī: 500 elephants, 500 chariots, 1500 cavalry and 2500 foot-soldiers constituted an army called *senā*, 10 *senās*=*pṛtanā*, 10 *pṛtanās*=*vāhinī*, 10 *vāhinīs*=*dhvajinī*, 10 *dhvajinīs*=*camū* and 10 *camūs*=aksauhinī. The Kauravas had eleven aksauhinīs and the Pāndavas had 7. If we take the table in Ādi 2. 19–22 one aksauhinī contained 21870 elephants, the same number of chariots, 65610 horses and 109350 foot-soldiers.[269] But if the other tables be followed then the numbers may be much larger still. Another table furnished by Udyogaparva 155. 28–29 is: 55 men constituted patti, 3 pattis=senāmukha or gulma, 3 gulmas=gaṇa and there were ayutas (10 thousands) of gaṇas in the army of the Kauravas The Ādiparva (2 19–22)

---

268 दशायुतानामयुतं सहस्राणि च विंशति। कोट्यः षट्चैव हास्मिन्राजन् मृधे हताः॥ स्त्रीपर्व 26 9.

differs from both tables in some respects The Udyogaparva 155 22 further notes that each horseman was surrounded by ten men as attendants (narā daśa hayaścāsan pādaraksāh samantatah). Though throughout the centuries the infantry was theoretically and in practice more numerous than cavalry, not much importance seems to have been attached to them as compared with chariots or horsemen. The lexicon called Vaijayanti says that patti consists of three horses, five foot-soldiers, one chariot and one elephant, that three pattis are equal to senāmukha and that senāmukha, gulma, gana, vāhinī, prtanā, camū, anīkinī represent each three times as many as the preceding one and that 10 anīkinīs are equal to an aksauhinī The Nitiprakāśikā[270] gives a table of groups from *patti* to *aksauhinī* and remarks that each of these groups had in turn numerous supporting men e g each elephant was followed by a hundred horsemen and a thousand foot-soldiers and each horseman was supported by a thousand foot-soldiers (VII. 3–10) Manu VII. 192 refers to battles on water also. From references in the Mahābhārata it appears that chariots had only two wheels Vide Bhīsma 98 47, Dronaparva 154 3, Salya 16 24 (Śaineyo daksinam cakram Dhrstadyumnas-tathottaram) Two noted warriors were told off to guard the two wheels of the chariot of the principal commanders and are called 'cakra-raksau' (vide Bhīsma 54. 76, 108 5, Drona 91, 36, Karna 11. 31, 34. 44). Chariots of great warriors were drawn by four horses e g Ādi. 198 15, Udyoga 48. 50, Drona 145 81 Udyoga 83. 15–21 describe the chariot of Krsna and Udyoga 140. 21 states that chariots had small tinkling bells attached to them and also screens of tiger-skin The Rg contains very graphic descriptions of chariots. Chariots were generally drawn by two horses in the vedic age (Rg V 30 1, V 36 5, VI 23 1) and had two wheels, but the chariot of the Aśvins is described as having three wheels (Rg. I. 118. 2, I. 157. 3, X. 41 1) Ghatotkaca, however, had eight wheels to his chariot (Drona 156. 61, 175 13). The Śukranītisāra (II. 140–148) mentions another method of grouping the army. Five or six foot-soldiers made a *patti* over which there

270. पत्तिः सेनामुखं गुल्मं गणो वै वाहिनी ततः । पृतना चम्वनीकिन्यौ ततश्चाक्षौहिणी स्मृता ॥ . पत्त्यंगैस्त्रिगुणैः सर्वैः क्रमाद्वाह्या यथोत्तरम् । अनीकिनीं दक्षगुणामाहुरक्षौहिणीं बुधाः ॥ नीतिप्रकाशिका VII 3 and 10 ; compare त्रिहयं पञ्चपादातं पत्तेरेकरथकुञ्जरम् । सैन्यं सा पत्तिरेतस्यास्त्रैगुण्यात्सुर्यथाक्रमम् । सेनामुखं गुल्मगणौ वाहिनी पृतना चमूः । अनीकिनीत्यनीकिन्यः पुनरक्षौहिणी दश ॥ verses 57–58 of the क्षत्रियाध्याय in the भूमिकाण्ड of वैजयन्ती

was an officer called *pattipa*, over 30 pattipālas there was the gaulmika, over 100 gaulmikas was the officer called śatānika, who had as his assistants an officer called anuśatika, a senānī and a lekhaka (scribe), the officer over twenty elephants or horses was called *nāyaka* (compare modern "naik") Each of these officers should have a distinctive badge indicative of their position Ayodhyā 100. 32 (=Sabhā 5. 48) asks 'I hope you give at the proper time pay and rations to your soldiers according to their deserts and do not delay payment' Both Nār (sambhūya-22) and Br state that among persons who work for hire the best is the soldier. The Mānasollāsa (II 6. 566-569 p 80) describes that the chiefs of the hereditary army should always be honoured by the king with presents of jewels, ornaments, costly clothes and sweet words and sumptuous provision for their maintenance should be made by bestowing on them a village, or two or more villages and heaps of gold, while hired soldiers should be paid every day or every month or once in three, four or six months or once in a year according to the needs of the king Megasthenes (Fragment XXXIV p. 88) describes the organization of the Indian army: 'A third governing body directs military affairs, of which there were six divisions with five members to each One co-operates with the admiral of the fleet, another with the superintendent of bullock trains, the third division has charge of foot-soldiers, the fourth of horses, the fifth of war chariots and the sixth of elephants' In medieval times chariots appear to have become obsolete In the graphic descriptions of armies contained in the Harsacarita (particularly in the 7th ucchvāsa) war chariots are conspicuous by their absence The Mahābhārata often speaks of horses from the countries to the north-west of India as the best; vide Sabhā 53 5 (for Kāmboja and Gāndhāra horses), Udyoga 86 6 (horses from Bālhi), Drona 125 25 and Sauptika 13 2 (Kāmboja horses) The Harsacarita II speaks of the best horses as coming from Vanāyu, Āratta, Kāmboja, Sindhudeśa and Pārasīka Śukra lays down certain practical rules about the army (IV 7. 379-390) He says that the soldiers should be encamped outside the town or village but not far from it, that no money-lending should be allowed between the soldiers and the village people, that the king should open separate shops for goods required by soldiers, that no army should be encamped at one place for more than a year, that soldiers should not enter the village without the king's permission, that receipts should be taken from soldiers

for payments made to them and they should be furnished with a writing about their pay. Some of these rules are very old. The Udyogaparva[271] 37. 30 mentions among persons with whom no contractual transactions should be entered into, the king, the king's servants and soldiers

The Arthaśāstra contains an elaborate discussion (in IX. 1–7 and X. 1–6) about the organization of the king's army, the proper time and place for starting on an invasion, internal and external troubles and calamities and measures against them, means of dealing with traitors and enemies, religious remedies (worshipping gods and falling at the feet of brāhmanas, magical rites based upon the Atharvaveda) against misfortunes like fire and flood, epidemics, famine &c., encampment (skandhāvāra) of armies, treacherous and strategic fighting, proper battle grounds, encouragement to one's own army, free labourers and their work, different arrangements or formations (*vyūhas*) of armies. Considerations of space prevent any treatment of these matters. But a few notable points will be set out here. A king may invade his enemy's country either in Mārgaśirsa (when the crops sown in the rains are ready) or in Caitra or when the enemy is suffering from some calamity. Śānti (100. 10–11) says the same thing. Internal trouble arises when any minister, *purohita*, *senāpati* or the crown prince is angry or dissatisfied with the king, who should get rid of such trouble by giving up his own fault or by pointing out the danger arising from an enemy. If the crown prince causes trouble he should be kept in confinement or killed, if there is another son of good character. The trouble caused by a provincial Governor or the officer in charge of boundaries (antapāla), the chief of wild tribes or a conquered king is termed external. The king should meet it by setting up one against the other. The encampment of an army is to be made on a site declared to be the best according to the science of buildings and measured by the *nāyaka* (the chief of the army), carpenter and astrologer, the encampment being circular, square or rectangular and having four gates, six roads and nine divisions Disputes, drinking, holding merry gatherings (*samāja*) and gambling should be prohibited in the camp and the system of passes should be enforced (X. 1). Vanaparva (15. 14, 19) also refers to the system of passes and the fact that

271. घृणी राजा पुंश्चली राजभृत्याः पुत्रो भ्राता विधवा बालपुत्रा । सेनाजीवी श्रोत्रिय-तभूतिरेव व्यवहारेषु वर्जनीयाः स्मृरेते ॥ उद्योग 37. 30 (cr. ed. 37. 28).

dancers and musicians were driven away, when Dvārakā was besieged by Śālva From Udyoga 151 58 (cr ed. 149. 53), 195. 12-19 (cr ed 196 12-19) it appears that markets, prostitutes, conveyances, oxen, machines, arms and physicians accompanied an army and that the camp (senāniveśa or skandhāvāra) of Duryodhana looked like the capital itself and was five *yojanas* in extent Physicians with surgical instruments, blunt instruments (like tweezers), medicines, curative oils and bandages in their hands and women (nurses) looking after the food and drink of the army should stand behind the soldiers uttering encouraging words[272] (Kaut X. 3) The Bhīsmaparva 120 55 also states that doctors well-versed in extracting splinters or arrow-heads (from the body) approached with their surgical instruments to extract the darts from Bhīsma's body The duties of the labourers (*vrsti*) were to examine the camp, roads, bridges, wells, and river *ghats*, to carry machines, weapons, armour, utensils, fodder, to remove from the battle-field wounded men along with their weapons and armour.[273] Each commander had some distinguishing device as his banner e. g Bhīsma had a golden tāla tree as his standard (Bhīsmaparva VI 17 18, tālena mahatā Bhīsmah pañcatārena ketunā). In X 6 Kautilya speaks of several formations (vyūhas) called danda, bhoga, mandala, asanihata and the subdivisions such as gomūtrikā, makara &c In Kām. XVIII. 48-49, XIX 40 ff., Manu VII. 187-191, Nītiprakāśikā, chap 6 and in the Mahābhārata many vyūhas are described Vanaparva (285 6-7) *refers to* Rāvana's arrangement of his army according to the rules of Usanas and of Rāma's army according to Bārhaspatya rules The Āśramavāsikaparva 7 15 refers to the formations called Śakata, Padma and Vajra described in the work of Usanas Kautilya X. 6 also refers to Ausanasa and Bārhaspatya arrangements of armies. Drona 75 27, 87 22-24, Karnaparva 11 14 and 28 mention certain vyūhas like Makara, Śakata &c Vide also Mānasollāsa II. 20 verses 1170-1181 pp 134-135, Agnipurāna 242 7-8 and 42-73 for vyūhas Though Kautilya recommends all sorts of tricks and treachery for securing a victory, the

Mahābhārata holds up a high ideal. The Bhīsmaparva[274] 21. 10 remarks that conquerors do not secure victory so much by their armies and prowess as by truthfulness, freedom from cruelty, the observance of dharma and energetic actions. The Śāntiparva (95. 17–18) states that it is better to die while fighting according to the rules of dharma rather than obtain a victory by wicked actions.

In the Bhīsmaparva (I. 27–32) certain rules of war agreed upon between the Kauravas and the Pāndavas are set out, such as one should fight only with one similarly equipped (i e. a foot-soldier with a foot-soldier and so on), one should not kill a soldier who is already in combat with another, or who has turned back from fight or is without armour. Āp Dh. S. II. 5. 10. 12, Gaut. X. 17–18, Yāj I. 326, Manu VII. 90–93, Śānti 95. 7–14, 96.3, Śānti 98 48–49, 297. 4, Dronaparva 143. 8, Karna 90. 111–113, Sauptika 5. 11–12, 6. 21–23, Śankha (quoted by the Mit on Yāj I 326), Baud. Dh. S.I. 10. 10–12, Vrddha-Hārita VII. 226, Brhat-Parāśara X p. 281, Śukra IV. 7. 354–362, Yuddha-kānda 18. 27–28 contain rules of war dictated by noble sentiments of humanity and chivalry. Some of these (that will bear comparison with the conventions of the Geneva and Hague Conferences) are set out here Gaut. (X 17–18)[275] states: 'no sin is committed by injuring or slaying men in battle excepting him who has lost his horse, charioteer or weapons, him who joins his hands (in supplication for life), whose hair are dishevelled (in flying), who turns away from the field, who sits down, who climbs an eminence or a tree (in flight), except envoys or messengers, except him who declares himself to be a cow or a brāhmana'. Vrddha-Hārīta VII 216 exempts spectators. Manu (VII 90–93) declares "one should not fight with treacherous

(or concealed) weapons, or with barbed or poisoned weapons or with weapons the points of which are blazing with fire. Let a fighter not strike one who has climbed on an eminence, nor a eunuch, nor one who joins the palms of his hand (in supplication), nor one with flying hair (in flight), nor one who sits down or says 'I am thine', nor one who is asleep, nor one who has lost armour, nor one who is naked or disarmed, nor one who is merely looking on without taking part in the fight, nor one who is fighting with another foe, nor one whose weapons are broken, nor one who is afflicted with sorrow, nor one seriously wounded, nor one who is in fear, nor one who has turned to flee'[276] Śankha adds that a soldier should not kill another while the latter is drinking water or taking his meals or is taking off his shoes, nor should one kill a woman, a female elephant, nor a charioteer, nor a bard nor a brāhmana nor should one who is not a king (or noble) kill one who is a king Baud. Dh S I. 10 10 forbids the use of poisoned or barbed arrows (*karnin*) Śānti 95. 11 also does the same. Śānti (95 13–14) enjoins that even an enemy soldier, when wounded, should be treated with medicine and allowed to go when his wounds are healed.[276] Śānti adds that a soldier should not kill boys or old men nor from behind nor one who holds a blade of grass in his mouth (as a mark of submission) These rules, though probably ideal and not strictly followed in every case, are far more humane as compared with the practice in modern warfare when non-combatants are killed from the air even at night without warning. In ancient times non-combatants went generally unmolested, to which Megasthenes bears testimony when he says (Frag I. p 32) 'Tillers of the soil even when battle is raging in the neighbourhood are undisturbed by any sense of danger, for the combatants allow those engaged in husbandry to remain quite unmolested.' Manu VII. 32 allows a king to harass his enemy's country, but Medhātithi on VII. 32 asks the invader to save his enemy's people if possible (particularly brāhmanas) The rule in *gadāyuddha* (fight with maces or clubs) was that no blow was to be struck below the navel (Salyaparva 60 6) But this rule was violated by Bhīma when he struck Duryodhana on the thigh with his mace. Duryodhana recounts (in Śalya 61) all the bad deeds of Krsna and the Pāndavas and the only reply that Krsna makes is that he too was guilty of

276 भग्नशस्त्रो विषक्तश्च कृतज्यो हतवाहनः। चिकित्स्यः स्याद् स्वविषये प्राप्यो वा स्वगृहे भवेत्॥ निर्व्रणश्च स मोक्तव्य एष धर्मः सनातनः। शान्ति 95 13–14.

numerous breaches of morality and the chivalrous rules of war (such as the slaying of Abhimanyu by many engaging him at one time). The general rule was that fighting ceased when the sun went down (Bhīsma 49. 52–53). But in Dronaparva 154 and 163. 16 ff we have a description of night battles and it is provided that chariots, elephants and horses should carry lamps.

It has already been shown how it was the duty of a ksatriya and of every soldier to fight and die in battle rather than run away. A fighting spirit was inculcated by holding out several rewards. One was the acquisition of booty and territory (Gaut. X. 41, Manu VII. 206, Bhagavadgītā II. 37); others were the satisfaction of having done one's duty as a ksatriya (Gītā II. 31–33), honour and fame (Gītā II. 34–35), heaven and other-worldly rewards (Yāj. I. 324, Manu VII. 88–89), protection of brāhmanas (Āp. Dh S. II 10. 26. 2–3). Visnu Dh S III. 44–46 have already been quoted above (p 58). The Śānti (98. 40–41) states that a soldier who runs away from the field falls into Hell. Yāj (I 324–325) declares that those who, while fighting with weapons that are not treacherous (poisoned &c.) for the sake of the land (of their master or of the enemy) die in battle without turning back from it go to heaven like *yogins*, that each step of those who do not flee even when their comrades have been killed is equal to a solemn sacrifice (like the Asvamedha), the king (the master) takes away all the merit of those who run away from the battlefield and are then killed. Manu VII. 95 contains the same idea These remarks were applicable not only to ksatriya soldiers, but to soldiers of all castes who maintained themselves by following the profession of arms Vide Rājanītiprakāśa p. 407. Parāśara (III. 31) and Brhat-Parāśara X. p 281 remark that a valiant soldier who does not seek mercy though surrounded by many enemies and falls fighting attains imperishable worlds and that when he reaches heaven divine damsels run after him to choose him as their Lord (III. 34–35) Parāśara III. 36 is a [277] verse which is

277. यं यज्ञसंघैस्तपसा च विप्राः स्वर्गेषिणोत्र यथैव यान्ति। क्षणेन यान्त्येव हि तत्र वीराः प्राणान् सुयुद्धेषु परित्यजन्तः ॥ पराशर III. 36; कौटिल्य X 3 presents some different readings The second verse in कौटिल्य is नव शरावं सलिलस्य पूर्णं सुसंस्कृतं दर्भकृतोत्तरीयम्। तत्तस्य मा भूत्नरक च गच्छेद्यो भर्तुपिण्डस्य कृते न युध्येत्॥; it occurs also in the याज्ञवल्क्यधर्मशास्त्र (IV 2) attributed to भरद्वाज, where also it appears to be a quotation being introduced with the words शृण्वन्तु भवन्तः. पराङ्मुखीकृते सैन्ये यो युद्धान्न निवर्तते। तत्पदानि।ह तुल्यानि भूत्यर्थमेकचेतसः ॥ शिरोहतस्य ये वक्त्रे विशन्ति रक्तबिन्दवः। सोमपानेन ते तुल्या इति वसिष्ठजोब्रवीत् ॥ युध्यन्ते भूमृतो ये च भूत्यर्थमेकचेतसः। इष्टैस्तैर्बहुभिर्यागैरेव यान्ति त्रिविष्टपम् । बृहत्पराशर X. p 281. वसिष्ठज means पराशर.

one of the two quoted by Kaut (X 3) when soldiers are to be urged on to fight Kautilya (in X 3) advises that the king himself and his *mantrin* and *purohita* should urge on his soldiers by quoting Vedic and classical Sanskrit passages about the rewards waiting for those who fall fighting for their master and the religious punishments for those who run away Astrologers should infuse spirit into their side by asserting that the heavenly aspects favour their side The day before the battle the king should observe a fast, offer oblations into fire to the accompaniment of Atharvaveda *mantras* and cause benedictory texts to be repeated that refer to victory Bards should recite lays describing heaven as the reward for the brave and hell for the timid and extol the caste, guild, family, deeds and character of the soldiers The assistants of the purohita should declare that they have practised witchcraft against the enemy. The commander-in-chief and the officers under him should address the army as follows —'a hundred thousand (panas) will be the reward for him who kills the enemy king, fifty thousand for him who kills the commander-in-chief or the crown prince, . a hundred for slaying the officer of the patti (a battalion), twenty for bringing the head (of a common soldier) and twice the pay and the booty seized by each to all soldiers' Kām (*XIX* 18–21) says that the king should give the rewards (promised as in Kaut) to the soldiers after they succeed in the exploits mentioned Vide also Mānasollāsa II 20 verses 1163–1167 (pp 133-134) for similar promises Gaut (X 20–23) prescribes that whatever wealth is acquired by a soldier by his individual effort should be given to him by the king, but the horse or elephant caught by a soldier goes to the king, that if many soldiers by a joint effort obtain some valuable plunder the king should choose and retain the best for himself and the rest should be divided among the soldiers according to their services in the battle Vide Manu VII. 96–97 (which allow even a chariot, horse or elephant to be retained as booty by the soldier and everything else including female slaves, except jewels, gold and silver), Kām XIX [278] 21–22, Śukra IV. 7. 372

A treatise will be required to deal with the weapons of war from ancient times. Even in the Ṛgveda several weapons are mentioned e g ṛsti (Ṛg V 52 6, V 57 2 and 6 on the shoulders

278 रूप्य हेम च कुप्य च यो यज्जयति तस्य तत् । दद्याद् वस्त्वनुरूपं हि हतो योधान्नराधिप. ॥ काम XIX. 21–22 and शुक्र IV 7 372 (reads दद्यात्कार्षापणरूपं च ... प्रहर्षयन्).

of the Maruts), arrows (V. 57. 2, VI. 75. 17), quivers (V. 57. 2), the ankuśa (of Indra in VIII. 17. 10, X 44. 9), paraśu (X. 28. 8), krpāna (probably a dagger, in X 22 10), vajra made of *ayas* (X. 48.3, X. 113 5). Atharvaveda IV. 6. 6. refers to poisoned arrows In the Atharvaveda[279] I. 16. 2 and 4 reference is made to lead as destroying sorcerers and it is said 'if you kill our cow or horse or man we shall pierce you with lead so that you will cease to kill our strong men'. In Tai S. I. 5 7. 6 it is said[280] that when a *samidh* is offered into fire with the mantra 'indhānās-tvā śatam himāh' the sacrificer discharges against his enemy the śataghni (weapon killing a hundred) which acts like vajra itself'. Dr. Oppert in his Introduction to the Nītiprakāśikā pp 10–13 relies on these and other passages for holding that the ancient Indians knew fire-arms and that Atharvaveda I 16.4 refers to *leaden balls* discharged from cylinders. Vide Dr. Oppert's work on the 'weapons, army organisation and political maxims of the ancient Hindus' (1880), where he describes several weapons and holds that gunpowder was known in India long before the 13th century A. D. Mr. G. T. Date's 'Art of war in Ancient India' (London 1929), Dr. P. C. Chakravarti's work (1941, Dacca) and Prof. Dikshitar's book on the same subject may be consulted for details. The numerous weapons mentioned in the Mahābhārata (e. g Udyoga 155. 3–9) also are passed over here. Vide Hopkins' paper in J. A. O. S. Vol XIII pp. 269–303 for detailed descriptions. The Allahabad Stone Pillar Inscription of Samudragupta (middle of 4th century A. D) contains a long list of weapons (C I I. III pp. 6–7).[280a] One important question is whether gunpowder and fire-arms were known to our ancient and medieval works Śukra refers to gunpowder called *agnicūrna* in II 93,196, IV. 7. 203, guns (IV. 7. 209–211) and gives the formula of gunpowder in IV. 7. 201 (viz the mixing of five *palas* of saltpetre, one *pala* of sulphur and one *pala* of coal powder). The Śukranitisāra is comparatively a late work and was probably

279. सीसायाध्याह वरुणः सीसायाग्निरुपावति । सीसं म इन्द्रः प्रायच्छत्तदङ्ग यातुचातनत् ॥ यदि नो गां हंसि यद्यश्वं यदि पूरुषम् । तं त्वा सीसेन विध्यामो यथा नोऽसो अवीरहा ॥ अथर्ववेद I 16 2 and 4.

280. एषा वै सूर्मी कर्णकावत्येतया ह स्म वै देवा असुराणां शततर्हा° स्तृण्वन्ति यदेतया समिधमादधाति वज्रमेवैतच्छतघ्नीं यजमानो भ्रातृव्याय प्रहरति। तै. सं I 5 7 6 सायण explains 'ज्वलन्ती लोहमयी स्थूणा सूर्मी। सा च कर्णकावती छिद्रवती । अन्तरपि ज्वलन्तीत्यर्थ । तत्समानेयमृक् । ... अनया समिधाधानेन शतघ्नीमेनामुच्चं वज्रं कृत्वा'.

written in the 13th or 14th century when cannon came to be used in Europe for the first time Both in the Rāmāyana and the Mahābhārata the word *śataghnī* (killing a hundred people) occurs frequently. In the Yuddhakānda[281] 3 13 it is stated that at the gates of Lankā hundreds of iron śataghnīs, looking burnished, sharp and terrible, had been arranged by the demons. In a poetic description of Lankā in the Sundarakānda chap 2, it is said that śataghnīs and śūlas were like the hair on the head of I ankā (verse 21). In the Vanaparva 15 there is a fine description of Dvāravatī (Dvārkā) besieged by Śālva, in which it is said that the capital had numerous towers and turrets, machines, tomaras, ankuśas, śataghnīs &c In Ādi. 207. 34, Vanaparva 169. 16, 284. 5, 290 24, Drona 156 70, Karna 11. 8, Śalya 45 110 the śataghnī is mentioned, but it is impossible to find from these what exactly it was like From Vanaparva 284 31 it appears that the śataghnīs were discharged with force by the hands and had wheels and round balls or stones in it. In Drona 179. 46 it is said that the śataghnī employed by Ghatotkaca had wheels and killed four horses at once In Drona 199 19 śataghnīs are said to have two or four wheels. In Vanaparva[282] 284 4 it is said that the powder of *sarjarasa* (resin from Sal tree) had been collected In the Harivaṁśa (Bhavisyaparva 44 20), among the weapons hurled at Narasimha by Hiranyakaśipu were blazing śataghnīs (sataghnībhiśca dīptābhir-dandairapi sudārunaih) In Rāmāyana VII. 32 44 we are told that at the tip of the weapon called musala (club) blazed forth fire like a bunch of Aśoka flowers. The Sundarakānda couples together *śataghnī* and *musala* (4. 18). It looks probable that resinous powder was used in some cylindrical contrivance (or rockets) mounted on wheels and capable of throwing stones. But gunpowder appears not to have been used There is no description of smoke due to śataghnīs. Hopkins (J. A. O. S XIII pp 299–303) holds that gunpowder and fire-arms were unknown to the great Epic and in the present state of our knowledge this view seems to be correct.

The Nītiprakāśikā (chapters 2–5) names and describes numerous weapons divided into four classes viz *mukta* (thrown

281. द्वारेषु संस्कृता भीमाः कालायसमया शिताः । शतघ्नो रचिता वीरै शतघ्नो रक्षसां गणैः ॥ युद्धकाण्ड 3 13; यन्त्रप्राकारजघनां विपुलाम्बुवनाम्बराम् । शतघ्रीशूलकेशान्ता-महालकवतंसकाम् ॥ तसेव कृतां लङ्का निर्मितां विश्वकर्मणा । सुन्दरकाण्ड 2. 21–22

282 कपाटयन्त्रदुर्धर्षा बभूवु रघुपेढाः । साशीविषघटा घोराः ससर्जरसपांसवः । मुसलालातनाराचतोमरासिपरश्वधैः । अन्विताश्च शतघ्नीभिः समधूम्रैश्छदुद्गराः ॥ वनपर्व 284. 4–5.

or discharged such as arrows), *amukta* (not thrown such as swords), *muktāmukta* (thrown and not thrown, such as *astras* which after discharge can be taken back) and *mantramukta* (astras which cannot be taken back). The Agnipurāna (249–252) and the Visnudharmottara (II 178–182) give a summary of the Dhanurveda (both agreeing almost word for word, but the latter containing more verses than the former) and speak of five kinds of weapons viz yantramukta (discharged from a machine, a sling, bow &c.), pānimukta (thrown with the hand such as a stone or *tomara*), muktāmukta (like a prāsa), amukta (sword) and niyuddha or bāhuyuddha (wrestling). The science of astras was of a supernatural kind. In the epics and purāṇas, the great heroes are said to have learnt *astravidyā* either from a teacher or from their father or by practising austerities and sometimes (as in the case of Kuśa and Lava) certain astras pass to the son by the mere fact of his birth and the wish of his father. Whether the Dhanurveda often referred to in the epics had consigned this science of astras to writing and could have enabled a reader to possess the miraculous powers attributed to astras is more than a modern can say. The Agnipurāna (chap. 134–135) contains magical incantations for victory in war and conquest of the worlds. The Paraśurāmapratāpa (Rājavallabhakānda folios 9–12) contains numerous mantras and yantras and incantations derived from Tantra works like the Brahmayāmala.

The Mahābhārata is careful to point out that an army constitutes the most inferior kind of *bala* (power). Udyogaparva (37 52–55) states that *bala* is of five kinds viz. brute force (*bāhubala*), that due to the acquisition of ministers (amātyalābha), that derived from wealth (dhanalābha), that from noble descent (*abhijātabala*) and the power of wisdom (prajñābala), which last is the best of all. These are quoted by the Budhabhūsana p. 79. In Śānti. 134 8 it is said[283] that there is nothing that the strong cannot accomplish and that whatever the strong do is pure. In another place it is said 'everything is wholesome to the powerful' (Āśramavāsi 30. 24). In Ādi 175. 45 a warrior's power is scorned and the power of the spiritual merit of brāhmanas is extolled as the real power.

283 यद्बलानां बलं श्रेष्ठं तत्प्रज्ञाबलमुच्यते । उद्योग 37. 55 ; नास्त्यसाध्यं बलवता सर्वं बलवतां शुचि । शान्ति 134. 8, सर्वं बलवतां पथ्यं सर्वं बलवतां शुचि । सर्वं बलवता धर्मः सर्वं बलवतां स्वकम् ॥ आश्रमवासि 30 24 : चित्रबलं क्षत्रियबलं ब्रह्मतेजोबलं बलम् । बलाबलं विनिश्चित्य तप एव परं बलम् ॥ आदि 175 45–46 These dicta about the strong remind us of the words of Nietzsche in 'Beyond Good and Evil', section 29 'It is the business of the very few to be independent, it is a privilege of the strong' (tr by H. Zimmern)

CHAPTER IX

SUHRT OR MITRA (ALLY OR FRIEND).

Manu inculcates the necessity of making friends in VII. 208 and cites the qualities of a good friend (for a king) 'a king does not prosper by the acquisition of gold and land so much as by securing a firm friend who would be powerful in future, though he may be of depleted resources at the time, That friend, though a weak one, is commended, who is righteous, grateful, whose subjects (or ministers) are contented, who is attached and who pursues (to the end) work undertaken' According to Manu VII. 206 land, gold and ally are the three fruits of royal endeavour or policy. Yāj I 352 is similar to Manu VII. 208. In VII. 9 Kautilya in opposition to the above holds that the acquisition of land is better than that of gold and friend and the acquisition of gold is superior to that of a friend[284]. The Mahābhārata (Sānti 138.110) states 'no one is the friend or enemy of any one else; friends or enemies are made by wealth (or objects pursued by a person)'.[285] Kām. VIII. 52 says the same. Śukra. (IV. 1. 8–10) opines 'in the case of a brave, energetic, strong and politic king all others, though outwardly friendly, secretly cherish enmity to him and only wait for (the proper) time (to strike) There is no wonder in this. Are they not themselves greedy of conquering territories? A king has no friend and he is the friend of none'. Śānti (80. 3) says[286] that a friend is of four kinds, one who has the same goal, one who comes for protection or security, one who is naturally so and one who is acquired. Karnaparva 88. 28 gives the four kinds somewhat differently viz. natural (*sahaja*), acquired by conciliatory words,

286 सहार्थी भजमानश्च सहजः क्षात्रिमस्तथा । शान्ति 80 3 भजमान may mean 'पितृपैतामहक्रमागत' and सहज friends are one's mother's sister's son and the like.

won by wealth and one drawn by one's prowess. Kām. (IV. 74) says that a mitra is of four kinds viz. by birth (such as one's father's father, mother &c.), made by relationship (i. e. marriage), hereditary (one's father's friend), one who is saved from calamities.[287] According to Kām. (IV. 75–76) the qualities of a friendly king are purity (of heart), liberality, bravery, sharing happiness and sorrow, affection, vigilance (to carry out one's friend's object), truth; and briefly the characteristic of a true friend is devotion to the objects desired by his friend The purpose for which a friend is made is to secure one of the three purusārthas, dharma, artha and kāma (Kām. IV. 72).

This subject of making friends leads on to the well-known theory of mandala i. e. of inter-state relationship. Kaut. VI. 2 and VII, Manu VII. 154–211, Āśramvāsiparva 6–7, Yāj. I 345–348, Kām. VIII–XI, Agnipurāna 233 and 240, Viṣnudharmottara II. 145–150, Nītivākyāmrta pp. 317–343, Rājanītiprakāśa pp. 316–330, Nītimayūkha pp. 44–46 deal with this theory of mandala and the six *guṇas* at great length. As the Kautilīya is probably the earliest of these and contains the most elaborate treatment of the subject, a brief outline from it is presented here. The Nītivākyāmrta (pp. 311–313) copies the very words of Kautilya.

The *yogakṣema* (welfare) of a State springs from peace (sama) and exertion (vyāyāma). The latter achieves the completion of works undertaken, while *śama* brings about the undisturbed enjoyment of the fruits of undertakings. The (proper) employment of the six *guṇas* (*sandhi* &c.) is the source of śama and vyāyāma What results (*udaya*) from these six gunas is either deterioration, stagnation or progress. *Udaya* depends upon human and divine causes which together govern the world. The human ones are *naya* and *apanaya* Human causes are seen (anticipated) and can be operated (by men). Naya (good policy) is that out of the human causes from which results *yogakṣema* (welfare); *apanaya* (impolitic way) is that which produces loss (or an unfavourable state). In VI. 1 (last verse) Kautilya says that a king who understands *naya* and is endowed with the *ātmaguṇas* and all the elements of the State will conquer the whole world, though originally he may have a small kingdom. The mandala theory is set out in relation to a king who

287. औरसं कृतसम्बन्धं तथा वंशक्रमागतम् । रक्षितं व्यसनेभ्यश्च मित्रं ज्ञेयं चतुर्विधम् ॥ काम. IV. 74.

is called *vijigīsu* (the ambitious ruler or conqueror). Kām. VIII 6 defines[288] vijigīsu as a king who aspires to extend his territories, who is possessed of all the seven elements of sovereignty, who has great energy and who makes great efforts. In verses 7–11 he mentions at length his qualities. All our works place before kings this ideal of conquest, domination or self-aggrandizement at the expense of one's weak neighbours. A vijigīsu is a king who is endowed with good qualities (called ātmasampat on p. 45 above) and with the several elements of the State and who is the fountain of policy (naya), i.e. who has a definite good policy to pursue. An *ari* (actual or potential enemy) is a king or kings who are the immediate neighbours on the circumference of the kingdom of the vijigīsu. From this it follows that *ari* may comprehend one king, two kings or more who are the immediate neighbours of the vijigīsu. But it should be remembered as insisted upon by the Nītivākyāmṛta[289] (p. 321 that there is no inflexible rule that the immediate neighbour is an enemy and that the king whose dominion is beyond the immediate neighbour will be a friend. Contiguity or distance is not necessarily the cause of friendship or enmity, but rather it is the purpose (or object) that makes friends or enemies. All that is meant is that the immediate neighbour is most likely to be an *ari* (a real or potential enemy). A mitra (friend of the vijigīsu) is he who is separated (from the vijigīsu) by the intervention of the kingdom of the *ari*. A *śatru* is a neighbouring ruler possessed of the characteristics of an enemy[290] (detailed in Kaut. VI 1). The *yātavya* (to be attacked or invaded by the vijigīsu) is an *ari* who is involved in difficulties. From this it is clear that in the terminology of Kautilya *ari* is a generic expression including actual and potential enemies who will generally be on the borders of the kingdom of the vijigīsu. A *śatru* is an *ari* who invites attack or destruction or harassment or reduction. That enemy who is plunged in vices or calamities may be

attacked and is then called *yātavya*[291]; one who has no support or has only a weak support is to be extirpated; an enemy who is the opposite of this last (i.e. who has a support or strong support) is to be either harassed or to be reduced. Support (āśraya) means a strong fort or a good friend (Kām. VIII. 60). So that a *śatru* is of four sorts (yātavya, ucchedya, pīḍanīya, karśanīya). Harassment is caused to him who is without *mantra* and a strong army, while one who is strong in mantra and army is to be rendered weak in these respects. Both a *śatru* or a *mitra* are of three kinds, *sahaja*, *kṛtrima* and *prākṛta*. A sahaja (natural) friend is one who is related through one's parents (such as maternal or paternal aunt's son); one who is resorted to for wealth or safety is krtrima (acquired) i. e. one who has obliged the vijigīsu or has been under his obligations; and the king who is next to the neighbour (i. e. who is separated from the vijigīsu by the intervention of the neighbour king) is prākṛta (i. e. because he is a prakrti, an element in the maṇḍala theory). A *sahaja* enemy is one who is born of the same family (such as a step-brother), a *kṛtrima* is one who is antagonistic or incites antagonists (i. e. one who has caused harm to or who has been harmed by the vijigīsu), while the immediate neighbour is a *prākṛta* enemy. The Mit. on Yāj. I. 345 very concisely but lucidly explains all these and the four kinds of śatru. The Visnudharmottara (II. 145. 15–16) and the Agnipurāna (233. 21–22) say that in their opinion the prākṛta is really krtrima. Kām. VIII. 56 also speaks of only two, *sahaja* and *kṛtrima*. Although it is possible that the vijigīṣu's realm is surrounded by many kings, the one who is taken for discussion is the enemy and is to be regarded as in front (*purastāt*) of the vijigīsu. Therefore in front of the vijigīsu come in order the ari (immediate neighbour), then the mitra (whose domain is next after that of the ari), then the arimitra (the friend of the enemy who will be immediately after the mitra of the vijigīsu and so will be the enemy of the mitra), then comes the *mitra-mitra* (friend of the friend of the vijigīsu) and then arimitra-mitra (ally of the enemy's friend). When the *ari* is said

291. अरिसम्पद्युक्तः सामन्तः शत्रुः । व्यसनी यातव्य अनपाश्रयो दुर्बलाश्रयो वोच्छेद्-नीयः । विपर्यये पीडनीयः कर्शनीयो वा । कौटिल्य VI. 2, अरिः पुनश्चतुर्विधः । 'यातव्योच्छे-त्तव्यपीडनीयकर्शनीयभेदेन । तत्र यातव्योऽनन्तरभूमिपतिः व्यसनी हीनबलो विरक्तप्रकृतिः । विदुर्गो मित्रहीनो दुर्बलाश्रोच्छेत्तव्यः । पीडनीयो मन्त्रबलहीनः । प्रबलमन्त्रबलयुक्तः कर्श-नीयः । निर्मूलनात्समुच्छेदं पीडनं बलनिग्रहम् । कर्शनं तु पुनः प्राहुः कोशदण्डापकर्शनात् ॥ इति । मिताक्षरा on याज्ञ. 1. 345 These very words are quoted in the सरस्वती-विलास p 36.

to be in front of the vijigīsu, the ruler of the territory in the opposite direction is said to be in the rear of the vijigīsu (*paścāt*) and is called *pārsnigrāha*[292] (lit one who may seize or attack the heels) He is really an enemy but this special term is applied to him and he causes trouble in the realm of the vijigīsu when the latter has started on an invasion or is about to start on one. The king who is the ruler of the country beyond the pārsnigrāha is called *ākranda* (lit one for whose help a cry is or may be raised by the vijigīsu). He would ordinarily be a friend being separated from the vijigīsu by the realm of the pārsnigrāha. The friend of the pārsnigrāha (who would be immediately next after the ākranda) is called pārsnigrāhāsāra and the friend of the ākranda who would be beyond the pārsnigrāhāsāra is called ākrandāsāra A *madhyama*[293] king is one whose realm is close to (is on the border of) that of the vijigīsu and that of the *ari* (the immediate enemy in front) and who is capable of helping (or favouring) both of them whether both are combined in alliance or not and who is capable of resisting either of them individually when the two are not in combination. An *udāsīna* king is generally defined as one whose territory is beyond or outside of the sphere of the realms of the vijigīsu, his enemy in front and the madhyama, who is very strong on account of his elements of sovereignty, is capable of helping the above three kings whether they be in combination or not and who is capable of resisting any of the three when they are not in combination Kullūka on Manu. VII 153 differs from this explanation i.e the udāsīna is a powerful king whose realm may be situated in front or in the rear or even at a distance from that of the vijigīsu, but he is indifferent for some reason or other to the activities of the vijigīsu. The Mit on Yāj I. 345 observes that the udāsīna also is of three kinds and the prākrta udāsīna is the overlord of the State that is separated from the central state (vijigīsu) by two intervening States; the

292 यो विजिगीषौ प्रस्थितेपि प्रतिष्ठमाने वा पश्चात्कोपं जनयति स पार्ष्णिग्राहः। पार्ष्णिग्राहाद्यः पश्चिमः स आक्रन्दः पार्ष्णिग्राहमित्रमासार आक्रन्दमित्रं च। नीतिवाक्यामृत p 319.

293 अरिविजिगीष्वोर्भूम्यन्तर संहतासंहतयोरनुग्रहसमर्थो निग्रहे चासंहतयोर्मध्यमः। अरिविजिगीषुमध्यानां बहिः प्रकृतिभ्यो बलवत्तरः संहतासंहतानामरिविजिगीषु मध्यमानामनुग्रहे समर्थो निग्रहे चासंहतानामुदासीनः। कौटिल्य VI. 2 p 261; vide अग्नि 240 3–5 and विष्णुधर्मोत्तर II, 145. 11–12 for almost the same words in verse मण्डलाद्बहिरेतेषामुदासीनो बलाधिकः। अनुग्रहे संहतानां व्यस्तानां च वधे प्रभुः अग्निपुराण 240 4–5 This is quoted by the सरस्वतीविलास p 39 without naming the source.

madhyama (or *madhyastha* acc. to Nītivākyāmṛta p. 318) is the immediate neighbour of both the vijigīsu and his enemy, but wants to remain neutral in the conflict of the two for some reason It will have been noticed that the vijigīsu, the enemy, the madhyama and the udāsīna are independent catagories, while four out of the remaining eight others viz. mitra, mitramitra, ākranda, ākrandāsāra can be grouped under vijigīsu, while the other four viz arimitra, arimitramitra, pārsnigrāha and pārsnigrāhāsāra may be grouped under ari. It is therefore that Manu (VII. 155-156) speaks of the four prakṛtis (vijigīsu, śatru, madhyama and udāsīna) as the *mūla* (basis) of the maṇḍala theory and Kām. VIII 20 informs us that Maya declared that a maṇḍala was constituted by these four. Kām VIII. 86 gives it as his own opinion that maṇḍala is constituted by *mitra, udāsīna* and *ripu* (enemy) only[294] Kautilya says that the maṇḍala is constituted as explained above by twelve *prakṛtis* Uśanas was of the same opinion (Kām. VIII. 22) and Kām. (VIII. 41) states that there were numerous views about the number of the elements of the maṇḍala, but a maṇḍala of twelve kings is quite clear and well-known among all people[295] Kām. (VIII 20-41) explains how by various combinations of the elements of the maṇḍala with some elements of sovereignty (viz ministers, rāstra, durga, kośa, bala) different writers held that the maṇḍala comprised 18, 26, 54, 72, 108 and other numbers of prakṛtis The Sarasvatīvilāsa (pp 37-41) shows how from different standpoints Uśanas himself argued that the maṇḍala was constituted by one prakṛti, two, three, 10, 21, 108 and that other writers speak also of 4, 5, 6, 14, 18, 30, 36, 44, 60, 72 prakṛtis All these figures are due to the inveterate habit of scholastic minds to run an idea to the earth and to indulge in divisions and sub-divisions. Even Manu (VII. 157) states that combining each of the twelve members of maṇḍala with the five elements of sovereignty from amātya onwards we get 60 which with the twelve[296] come to 72. It is to this that the

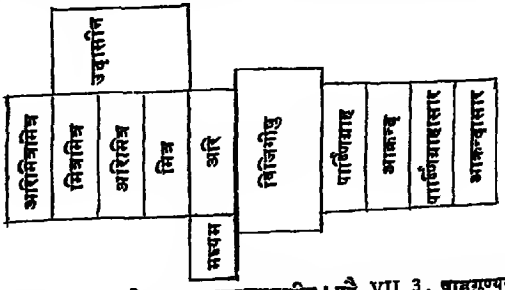
295. इतिप्रकारं बहुधा मण्डलं परिचक्षते । सर्वलोकप्रतीतं तु सकृद द्वादशराजकम् ॥ काम VIII 41. This is quoted as a verse of Uśanas in the सरस्वतीविलास p.41.

296. एवं चतुर्मण्डलसङ्क्षेपः । द्वादश राजप्रकृतयः षष्टिर्द्रव्यप्रकृतयः सङ्क्षेपेण द्विसप्ततिः । तासां यथास्वं सम्पदः शक्तिः सिद्धिश्च । बलं शक्तिः सुखं सिद्धिः । शक्तिस्त्रिविधा । कौटिल्य VI. 2. p. 261; मण्डलस्था च या चिन्ता राजन् द्वादशराजिका । द्विसप्ततिश्चैव भोक्ता या च स्वयम्भुवा ॥ शान्ति 59 70-71. नीलकण्ठ connects this half with medicine, while some read द्विसप्ततिविधा चैव शरीरस्य प्रतिक्रिया

Daśakumāracarita (VIII p 144) refers when speaking of the tree of *naya* that it has 72 prakrtis as its leaves (dvisaptatiprakrtipatrah nayavanaspatih). The central idea of the mandala was to keep a balance of power among a circle of States, some being friendly among themselves owing to their position and surroundings, while others would form an antagonistic group Kaut (VI 2) also refers to this number 72, out of which twelve are constituted by kings (*rājaprakrtis*) and 60 (five sovereignty elements of each of the twelve) are styled (*dravyaprakrtis*) The Śāntiparva (59 70–71) also refers to a mandala of 12 kings and to the number 72 Vide N. N Law's 'Studies in Ancient Hindu Polity' pp 195–208 for elucidation of the theory of mandala The theory of mandala has this element of truth in it that on a calculation of probabilities the kings who are the immediate neighbours of a ruler are likely to be his enemies (at least potential) and the kings that are beyond the immediate neighbours may make common cause with the central State taken for discourse in order to crush between them a hostile intermediate State It suggests that diplomacy may take the lines indicated by position and probabilities The diagram below will[297] illustrate the idea Manu (VII 177 and 180) declares that (state) policy consists briefly in this that a king must so arrange all things or means that the ally, the udāsīna and the satru cannot harm him or become superior to him Medhātithi (on Manu VII 177) remarks that even an ally may become an enemy if his interest so requires (*svārthagauravāccā mitramapyarir bhavati*)

Kautilya[298] relates the theory of mandala to the theory of *śaktis* (already referred to on p 171) and the six-fold policy (sādguṇya)

297



298 विजिगीषुः शक्त्यपेक्षः षाड्गुण्यमुपयुञ्जीत। कौ VII 3. षाड्गुण्यस्य प्रकृतिमण्डलं योनिः। सन्धिविग्रहासनयानसंश्रयद्वैधीभावाः षाड्गुण्यमित्याचार्याः। कौ. VII 1: मण्डलानि समाचक्ष्व विजिगीषोर्यथाविधि। यान्यामित्र्य द्वयेः कार्यं सन्धिविग्रहचिन्तनम्॥ विष्णुधर्मोत्तर II. 145. 6.

Everything secures success (i.e. his and his kingdom's happiness) according as the king is able to put forth each of the śaktis to their utmost. The aspiring king taking into account his three saktis may employ the six guṇas (methods of policy). The circle of the twelve States gives rise to the employment of the six methods. Differing from Vātavyādhi (who said that there were only two methods, sandhi and vigraha) and for once agreeing with the ācāryas, Kautilya accepts the position that there are six gunas and briefly defines them The Sarasvatīvilāsa (p. 42) quotes a sūtra of Gautama about the six gunas, which is not found in the printed text.[299] Kautilya defines the six as follows: *Sandhi*[300] means making an arrangement or agreement; *vigraha* means taking up a hostile attitude; *āsana* means an attitude of indifference; *yāna* means preparing (for attacking one's enemy); *saṁśraya* means taking shelter (with another powerful king); *dvaidhībhāva* means making peace with one king and adopting a hostile attitude to another He then states that a king who is less strong than his neighbour may make an agreement with him, one who is rising in power may take up a hostile attitude, whoever thinks 'the hostile king cannot hurt me nor can I hurt him' may remain indifferent (or neutral) in his own State, one who is endowed with all advantages may march against the enemy, whoever is devoid of strength should seek the protection (of a powerful ruler), and one should resort to a two-fold attitude when one's object can be accomplished by a friend. Some other works give more exact definitions and also define dvaidhībhāva somewhat differently, viz. dvaidhībhāva is dividing one's army into two parts. Vide Viṣnudharmottara[301] II. 150. 3–5 and Mit. on Yāj. I. 346. Some say that saṁśraya means seeking the protection of the udāsīna or madhyama king. Kauṭilya (book VII) gives the most elaborate treatment of these six gunas and so do

Manu VII. 160 ff, Kām. IX–XVI, Visnudharmottara II. 145–150, Agnipurāna 240, Mānasollāsa pp 94–116, Rājanītiprakāśa pp. 324–413. Only a few remarks are all that considerations of space allow. Manu (VII 162–168) states that each of the gunas is of two sorts. Kām. IX. 2–18 and Agni 240 enumerate sixteen kinds of sandhis and Kām defines them. His treatment is based on Kaut. VII 3 Kaut (VII. 3) says that when a weak king is attacked by a powerful king who is the leader in a circle of States, the former should at once submit and sue for peace on condition of offering his army, treasury, himself and his territory. Then he says that sandhis made on condition of offering the army are of three kinds viz *ātmāmisa* (lit. offering himself as the prey, which involves the condition that the king himself with a fixed number of troops or with the flower of his army would present himself when called), *ātmaraksana* (saving himself, where the condition is that the commander-in-chief or the crown prince would present himself with an army), *adrsta-purusa* (lit in which no person is definitely prescribed, where the agreement is that some one on the king's behalf or the king himself should march with the army to some place as required by the invader) These sandhis are called *dandopanata* (lit in which submission is made with the army) Sandhis made on condition of offering the treasury (*kośopanata*) are *parikraya* (lit. price, where by offering the treasury the other elements of rājya are kept free), *upagraha* (where as much money is offered as can be carried on a man's shoulder), *kapāla* (lit. broken half of a pot, where an immense amount of money has to be paid) Sandhis called *desopanata* (submission with offer of territory) are *ādista* (where a part of the realm is ceded and the rest saved from the invader), *ucchinna* (where all the realm except the capital which has been deprived of all its wealth is offered), *apakraya* where by offering the produce of the land the kingdom is freed, *paribhūsana* where the agreement is to pay more than the produce of the land Kām adds some varieties and remarks (IX. 21–22) that *upahāra* (offering a present) is the only *sandhi* (of which all the rest are varieties) in his opinion, that only the *maitra* sandhi (alliance of friendship without the offer of land, money or anything else) does not come under upahāra[302] Kām IX. 20 and Mānasollāsa (II. 11

302 एक एवोपहारस्तु सन्धिरेतन्मतं हि नः। उपहारस्य भेदास्तु सर्वेऽन्ये मैत्रवर्जिता॥ अभियोक्ता बली यस्मादलब्ध्वा न निवर्तते। उपहाराद्ऋते तस्मात् सन्धिरन्यो न विद्यते॥ कामन्दक IX. 21–22

pp. 94–95) speak of four sandhis, *maitra*, *parasparopakāra* (agreement to help each other), *sambandhaja* (by offer of a princess in marriage) and *upahāra*. An interesting example of a sandhi is furnished by the Lekhapañcāśikā which gives a form of treaty dated Monday, Full Moon of Vaiśākha in *saṃvat* 1288 (1232 A. D.) between Yādava king Singhana of Devagiri who is styled *mahārājādhirāja* and Lāvanyaprasāda (Lavanaprasāda) a Vāghela king who is styled *rāṇaka* and *mahāmaṇḍaleśvara*, whereby the high contracting parties agreed not to invade each other's possessions, to combine and oppose anyone else who invaded one of them. Vide Bom. G. Vol I part 1 p. 200 based on Bhandarkar's Report on the search for Mss. 1882–83 pp 38–40. Kām IX. 23–26 and Agnipurāna 240. 10–13 mention twenty kinds of persons with whom *sandhi* should not be made, Kām. (IX. 27–41) states the reasons why it should be so and in IX. 42–52 seven persons are enumerated with whom he recommends *sandhi* and gives reasons. A king should make sandhi even with one equal in strength (not only with one who is more powerful), since victory in battle is doubtful (Kām. IX. 59) [303] Kaut uses a striking simile when he says that if one king comes in conflict with an equal they both will be destroyed in the same way as two unbaked earthen pots striking against one another. If a more powerful king rejects the proposal of a weaker king for sandhi, the latter should take up the attitude of offering his army or follow the course prescribed in book XII (*ā balīyasaṃ*) In VII. 12 when dealing with agreements between kings, about undertakings to build forts or irrigational works or forests &c. Kaut makes very interesting remarks about land routes being superior to water routes and about the route to the Deccan and the south being more profitable than the one leading to the Himālayas.[304] Kām X. 15 (= Agni 240. 19) says that *vaira* (hostile attitude) is of five kinds viz that of step-brothers, that due to land (seizure of or encroachment on lands or houses), due to woman (carrying away one's wife or loving the same woman), due to words (cutting speech) and due to wrongs. Kām. X. 2–5

303. सन्धिनिच्छेत्समेनापि सन्दिग्धो विजयो युधि। न हि संशयितं कुर्पाद्रिपुवाच्च बृहस्पतिः॥ काम. IX. 59.

304. स्थलपथेभ्यो हैमवतो दक्षिणापथाच्छ्रेयान् हस्त्यश्वमन्धदन्ताजिनरूप्यसुवर्णपण्याः सारवत्तरा इत्याचार्याः। नेति कौटिल्यः। कम्बलाजिनाश्वपण्यवर्जाः शङ्खवज्रमणिमुक्ताः सुवर्णपण्याश्च प्रभूततरा दक्षिणापथे। कौटिल्य VII. 12

(= Agni. 240. 20-24) enlarges upon the 16 ways in which *vigraha* (hostility) springs, such as seizing the kingdom, wife, districts, vehicles (horses, elephants) and wealth of another, pride, harassment of subjects &c. When a king feels that his own army is well-nourished and pleased, that his subjects are prosperous and contented and that the army and subjects of another are the opposite of this, then he may adopt a hostile attitude and when he feels sure that he will secure one of the three fruits of hostility (viz. land, ally and wealth—Kām. X. 26-28). Kaut. VII. 15 deals with the attitude and conduct of a conquered king who has offered to the conqueror his army (*daṇḍopanata-vṛtta*), while VII. 16 speaks of the conduct of the *daṇḍopanāyī* (an aspiring king who wants to make by means of his army another king submit to him) *Yāna* means marching for invasion on the part of a *vijigīsu* whose army and prowess are of the highest and whose subjects are contented on account of his good qualities (Kām. XI. 1) The Matsya 240 2 and the Agnipurāna (228. 1-2) add that when the enemy in the rear is overwhelmed by an *ākranda*, then the vijigīsu should start on an invasion or when the enemy is plunged in calamities But before actually invading the enemy who is *yātavya* (chosen for attack) an ambassador (dūta) should be sent (Kām. XII. 1) to see whether the enemy will submit without fighting That is, there was to be no war without negotiations and an ultimatum In the Mahābhārata (Udyoga 83 5-7) it is said that Krsna started as an envoy from the Pāndavas to the Kauravas at the end of *sarad* (autumn) on the Revatī naksatra in the month of Kārtika (verse 7, *Kaumude māsi revatyām saradante himāgame*) In the Purānas and the medieval digests elaborate rules are laid down about the religious and propitiatory ceremonies before starting on an invasion. The Visnudharmottara II. 176 and Agnipurāna 236. 1-18 require that for seven days before starting on an invasion the king is to engage in the worship of and make offerings to various gods, first to Ganapati, then to all the guardians of the quarters, the planets, Asvins, Visnu and Siva and the images in the temples of his capital Then he is to note what good and bad dreams he sees on those days in his sleep and judge accordingly Vide Matsya 242, Agnipurāna 229 for dreams portending good and evil This prognostication of good fortune from dreams is very ancient The Chāndogya Up (V 2 8-9) quotes a verse to the effect that when a man is engaged in the performance of solemn sacrifices for securing some object and sees a woman in a dream he should feel that his rite will be

crowned with reward. Similarly the Ait.[305] Ār. III. 2. 4 mentions the signs of approaching death, one of which is to see in a dream a dark person with black teeth. Both these passages are quoted by Śaṅkara in his bhāsya on Vedāntasūtra II. 1. 14. The Visnudharmottara II. 132–144 (based on Garga), II. 164, Matsya 228–241, Agni 230–232 are concerned with the portents and omens in the heavens, in the sky and on the earth and rites (*śāntis*) meant to avert the evil prognostications from them. The Mānasollāsa II. 13 pp. 97–112 and Rājanītiprakāśa pp 331–351 also deal with these and other astrological matters, which are passed over here, though some of them are very interesting e. g. Visnudharmottara II. 135. 1 refers to the weeping and dancing of images. On the 6th day from the time the rites begin which is the day previous to the starting of the invasion the king undergoes a ceremonial bath for victory called *jayābhiseka*. This is described at great length in the Rājanītiprakāśa pp. 351–395 quoting extensive passages from the Lingapurāna. The ceremony of *Jayasnāna* resembles the coronation ceremony in many respects. The Matsyapurāna 243 15–16 and the Visnudharmottara II. 163. 18–31 contain the same long list (with very slight variations) of articles, persons and animals the sight of which is auspicious when the king starts on an invasion and Matsya (243. 2–14) contains another long list of inauspicious sights. A few of the auspicious ones are white flowers, jars full of water, cows, horses, elephants, fire in flames, a courtesan, dūrvā grass, gold, silver, copper, all gems, sword, umbrella, banner, corpse not accompanied by crying persons, fruits, the *svastika* sign. Among the inauspicious things and sights are dark grains, cotton, dried cowdung, fuel, jaggery, tonsured or naked man or man with dishevelled hair or wearing reddish robes, a lunatic, a cāndala, a pregnant woman, broken pot, chaff, ashes, bones. The Mānasollāsa II. 13 verses 811–823 (pp. 102–103), Nītimayūkha pp 58–59 also give long lists of inauspicious and auspicious sights or events. Matsya 243. 27 and Visnudharmottara II. 163. 32 are both careful to add that all evil signs are counterbalanced by the confident (or joyous) frame of the mind, which is the highest sign of victory.[306] Gaut.

306. मनसस्तुष्टिरेवात्र परमं जयलक्षणम् । एकतः सर्वलिङ्गानि मनसस्तुष्टिरेकतः ॥ मत्स्य 243. 27 = विष्णुधर्मोत्तर II. 163. 32.

(XI. 15-17) prescribes that the king should heed the advice of astrologers and of those who are adepts in averting the effects of portents and perform the rites indicated by them such as grahaśānti, rites on auspicious days and of *svastyayana*, rites of black magic against his enemy &c. Kaut. IX. 7 (at the end) says that the removal of divine calamities is brought about by the worship of deities and by honour to brāhmanas and by performing rites prescribed in the Atharvaveda. Manu VII. 82 and Yāj. I. 315 state that gifts made to learned brāhmaṇas are an inexhaustible treasure for the king The Rājadharmakānda (p 109) quotes the Brahmapurāna requiring the king to perform two Laksahomas every year and also a Kotihoma. The Rājadharmakāṇḍa (p 113) and Rājanītiprakāśa (p 144) quote Udyogaparva 33. 93–95 which set out eight indications of a man's approaching fall, viz hating brāhmanas, opposing brāhmanas, depriving them of their wealth, desire to kill or harm them, taking pleasure in calumniating them, not liking their praise, not remembering them in religious acts and getting angry when they make requests

It may be useful and interesting to see how in very ancient times the king was made ready for battle The Āsv. Gr. S. (III. 12) says: when a battle is impending (the purohita) should make the king put on his armour (in the following way). The purohita should stand to the west of the chariot (of the king) muttering the hymn (Rg X 173) 'I have brought thee &c.'. He should hand over to the king his armour with Rg VI. 75. 1 'when the man with armour advances it is like the appearance of the cloud &c '. He hands over the bow with the next verse (Rg. VI. 75. 2 'dhanvanā gā). The purohita should make the king recite the next verse (Rg. VI. 75. 3) and should himself mutter the 4th verse (Rg VI. 75. 4) He should hand over the quiver to the king with the 5th verse (Rg. VI. 75. 5) When the chariot turns in the direction intended the purohita should mutter the sixth verse (Rg. VI. 75 6) He should recite over the horses the 7th (Rg. VI. 75. 7) He makes the king recite the 8th (Rg. VI. 75. 8) when the latter looks at the arrows and makes the king recite Rg. VI. 75. 14 ('he envelopes his arm' &c.) when the latter fastens to his arm the leather (that protects his arm against the bow-string) When the king is being taken forward in the chariot by the charioteer the purohita ascends the chariot near the king and makes him recite the hymn called Abhīvarta (Rg. X. 174) and the two verses (Rg. VIII. 101. 3-4). Then the priest looks at the king with

the Apratiratha hymn (Rg. X. 103 'āśuḥ śiśāno'), the Śāsa hymn (Rg. X. 152 'śāsa itthā') and the Sauparna hymn 'pra dhārayantu madhuno ghṛtasya'.[307] Then the king should traverse in order all directions in which the Sun (by day) or Venus (by night) shines and give fight from that direction The king should pass his hand over the drum with the three verses (Rg. VI. 47. 29–31 'fill with breath (or roar) the heaven and the earth'). The king should discharge arrows with Rg. VI. 75. 16 and the purohita should mutter Rg. VI. 75. 17 ('where the arrows fall together &c.) when soldiers are fighting, or the purohita may direct or teach (the king to recite from the above such verses as are appropriate to his actions).[308] In the Harsacarita (7th Ucchvāsa first paragraph) Bāna favours us with a realistic and graphic description of the preparations made when Harsa marched out from his palace on his *digvijaya*. The astrologers found out an auspicious day and *lagna* (sign of zodiac

---

307 This hymn is found in no *saṃhitā* Sāyana in his comment on Ait Br. 29. 9 (where the sauparna hymn is mentioned) gives an alternative explanation saying that the sauparna hymn referred to is the one declared in the gṛhyasūtra viz 'pra dhārā yantu &c ', i e he does not read 'pradhārayantu' as in the printed Aśv Gr , on Ait Br 37. 7 (where the Abhīvarta, Śāsa, Apratiratha and Sauparna hymns are mentioned) the comment of Sāyana as printed reads 'pradhārayantu'.

308. संग्रामे सङ्घर्षोद्दे राजानं संनाहयेत् । आ त्वा हार्वमन्तरेधीति पश्चान्मुखस्थाय-स्थाय । जीमूतस्येव भवति प्रतीकमिति कवचं प्रयच्छेत् । उत्तरया धनुः । उत्तरां वाचयेत् । स्वयं चतुर्थीं जपेत् । पञ्चम्येषुधिं प्रयच्छेत् । अभिप्रवर्तमाने षष्ठीम् । ससम्पाश्वात् । अष्टमी-मिथुनवेक्षमाणं वाचयति । अहिरिव भोगैः पर्येति बाहुमिति तलं नह्यमानम् । अधैनं सारथ-मानमुपारुह्याभीवर्तं वाचयति प्र यो वां मित्रावरुणेति च द्वे । अथेनमन्वीक्षेतामतिरथशास-सौपर्णैः । प्र धारयन्तु मधुनो घृतस्येति सौपर्णम् । सर्वां दिशोऽनुपरियायात् । आदित्यमौशनसं वाचयित्वा प्रयोधयेत् । जयश्चास्य पृथिवीमुत यामेति तूष्णीं दुन्दुभिमभिमृशेत् । अवसृष्टा परापतेतीषून्विसर्जयेत् । यत्र बाणाः संपतन्तीति युध्यमानेषु जपेत् । संक्षिप्याहृत । आश्व. गृ. III. 12. With आदित्यमौशनसं वा compare शान्तिपर्व 100. 20 'यतो वायुर्यतः सूर्यो यतः शुक्रस्ततो जयः । पूर्वं पूर्वं जयार्थं एषां संनिपाते युधिष्ठिर ॥'. This shows that the king desiring victory should not face the Sun or Venus (औशनस) but should have them behind him and that he should not have the wind blowing in his face but blowing behind him कालिदास in the कुमारसंभव III. 43 'दृष्टिप्रपातं परिहृत्य तस्य कामः पुरः शुक्रमिव प्रयाणे' refers to this, on which मल्लिनाथ quotes a verse 'प्रतिशुक्रं प्रतिबुधं प्रत्यङ्गारकमेव च । अपि शक्रसमो राजा हतसैन्यो निवर्तते ॥.' The शुक्रिकल्पतरु (ed. by N. N. Law) p. 176 says 'शस्तस्तु वेदलसतेऽध्वनि पृष्ठतोऽर्कः' (verse 79) Oldenberg's translation (in S B. E vol 29 p. 234) 'he should commence the battle in the line of battle invented by Āditya or Uśanas' is wrong, as will be seen from the above quotations Hopkins in J. A O. S XIII p. 193n simply follows Oldenberg's translation holding Āditya and Auśanasa to be vyūhas.

rising on the eastern horizon) indicative of his conquest of all the four quarters, Harsa was bathed in water poured from silver and golden jars, performed worship of Śiva, offered oblations into fire that sent up flames turning from left to right, made gifts of jars full of sesame grains and of cows whose hoofs and horns were tipped with gold, sat on a throne on which tiger-skin was spread &c

When starting on an invasion the king was required to perform a rite called *nīrājanāvidhi* which consisted in waving lights before horses, elephants, banners, armies &c.[309] In II. 30 Kautilya[310] prescribes that on the 9th day of Āśvina lights should be waved before horses and at the beginning and close of invasions and in times of diseases In II 32 Kautilya speaks of the waving of lights before elephants thrice in the cāturmāsya (from about July to October) and at the time when two seasons meet Kālidāsa in the Raghuvamsa 4·25 refers[311] to the performance of this ceremony when Raghu started on his digvijaya and states (in 17·13) that dūrvā grass, barley sprouts and the bark of the palāśa tree were required in the Nīrājanāvidhi. Kām IV. 66 speaks of waving lights before horses and elephants (nīrājita-hayadvipah). The Brhatsamhitā, chap. 44 (verses 16–28) deals with the ceremony of waving lamps before horses, elephants and men. This ceremony had to be performed every year in the month of Āsvina from the first to the 9th day of the bright half or on the 8th, 12th, or 15th of the bright half of Kārtika (acc. to the Brhatsamhitā 44·2) by those who owned horses and also elephants It is also described in the Śaunakiya II 8, Agnipurāna 268, Visnudharmottara II 159 (quoted at length in the Rājanīti-prakāśa pp 434–438), Kālikāpurāna 88 15 ff, Nirnayasindhu II. p 169, Yuktikalpataru p 178. The Brhatsamhitā describes it as follows :—In the north-east of the capital an ornamental arch of some holy tree was to be erected 10 cubits wide and 16 high Round the necks of horses threads smeared

309. राज्ञां यात्राविधिं वक्ष्ये जिगीषूणां परावनीम् । नीराजनाविधिं कृत्वा सैनिकांश्चानयेत्तत । गजानन्यान्मृगानन्यानिति यात्राक्रमो मतः ॥ युक्तिकल्पतरु p 178

310. नीराजनामाश्वयुजे कारयेन्नवमेऽहनि । यात्रादावथवा स्याधौ वा शान्तिके सतः ॥ अर्थशास्त्र II. 30 last verse, तिस्रो नीराजना. कार्याश्चातुर्मास्यर्तुसन्धिषु । अर्थशास्त्र II 32, last verse but one उत्पल explains नीराजन as नीरेण जलेन अजन स्पर्शनम् (on बृहत्संहिता 43 1) It is possible to derive the word from निर् + राजन (from राज्).

311. तस्मै सम्यग्धुतो वह्निर्वाजिनीराजनाविधौ । प्रदक्षिणार्चिर्वर्त्मजेन हस्तेनेव जयं ददौ ॥ रघु 4. 25.

with saffron paste and marking nut, with rice grains and white mustard and *kustha* plants tied on them were to be suspended. For seven days mantras addressed to the Sun, Varuna, Viśve-Devas, Prajāpati, Indra and Visnu were to be recited over the horses, during those days the horses were not to be harshly addressed nor struck with a whip and auspicious words were to be addressed to them, conches were to be blown, drums beaten and singing indulged in before them. On the 8th day, to the south of the arch a shed with its face to the north and covered with kuśa grass and barks was to be erected and in front of it on a *vedi* fire was to be lighted and various materials and plants such as sandal-wood were to be collected and thrown into jars full of water, various foods were to be offered as *bali*, fuel sticks of *khadira* and other holy trees were to be brought. The king seated on a tiger-skin and facing the east should sit near the fire together with an astrologer and horse doctor and should follow at the direction of the purohita the procedure laid down for Grahayajña (sacrifice to planets) and the raising of Indra's banner. A horse and an elephant possessing the most auspicious signs should be bathed and honoured with new white cloth, sandal-wood paste, garlands and incense and should be brought to the foot of the arch near the shed with sweet words to the accompaniment of music and conch-blowing. The movements of the horse and elephant should be watched and prognostications made therefrom about victory &c. A ball of food over which mantras have been recited should be offered to the horse and if the latter smells it or eats it that is a sign of coming victory. Dipping an *udumbara* twig in the jars filled with water and plants the purohita should touch therewith the horse, the elephant, the king and his soldiers to the accompaniment of mantras. Then making an effigy of the enemy the purohita should pierce it with a sharp and pointed stave in the region of the heart with incantations from the Atharvaveda and break it The purohita should pronounce over the bridle vedic mantras and insert it in the mouth of the horse, which the king should ride and proceed in the north-east together with his army, with drums beaten, conches blown and banners displayed This is a propitiatory rite (śānti) as said by Varāhamihira (Brhatsamhitā 44 2) and the Agnipurāna 26 8 and 31 and must have been in vogue centuries before Kautilya flourished.

The duty of the conqueror, after vanquishing his opponent, to place on the throne of the late king his son or a kinsman and to respect the customs and usages of the territory conquered has

already been set forth above (p. 71) Conquests resulted in either loss of territory or more generally in the offering of tribute of various kinds to the conqueror viz. wealth (gold and silver), horses, elephants, pearls and gems, fine cloth &c Particularly horses from Kāmboja, Bālhika, Gāndhāra and other countries in the north and west were highly prized Vide Sabhā 51.10, 53 5, Udyoga 86. 6, Drona 156. 47, Sauptika 13. 2; and Sabhā 27 27, 28 6 for horses as tribute. In Sabhā 30, 28-30 all the above kinds of tribute are said to have been levied from the Mleccha kings by Bhīma [312]

Kautilya devotes one book (VIII) to the discussion of *vyasana*. Vyasana [313] means 'what deprives a man of great good' (from the root 'as' to throw with 'vi') According to Kaut vyasana may be either the absence of qualities (such as noble birth) or the opposite of such qualities, faults (such as hot temper), excessive attachment (to women &c), harassment (by invasion or calamities like famines) So vyasanas may broadly be divided into two classes viz calamities and faults due to *kāma* (passion) and *krodha* (hot temper) The view of many *ācāryas* is that of the vyasanas of the king, ministers, the people of the realm, fort, treasury, army and ally, the vyasanas of each preceding one are more serious than those of each succeeding one From the discussion in VIII 1 it appears that Kautilya in this case agrees with the ācāryas Differing from Bhārdvāja Kaut holds that the calamities befalling a king or his vices are more serious in their consequences than those of the ministers, since it is the king who appoints the ministers, the purohita, other servants and superintendents of departments and he can employ others in their places and since the rise or fall of the people depends upon him Disagreeing with Viśālākṣa Kauṭilya holds that the vyasanas of ministers have more serious consequences than those of the people, as all (national) undertakings proceed from the ministers, as the security of person and property from internal and external enemies, adoption of remedies to resist calamities, recruiting of army, collection of taxes are all in their hands. Differing from the school of

312. स सर्वान् म्लेच्छनृपतीन् सागरानूपवासिन । करमाहारयामास रत्नानि विविधानि च ॥ चन्दनागुरुवस्त्राणि मणिमौक्तिककम्बलम् । काञ्चनं रजतं चैव विद्रुमं च महाधनम् ॥ ते कोटिशतसंख्येन कौन्तेयं महता तदा । अभ्यवर्षन्महाराज धनवर्षेण पाण्डवम् ॥ सभा 30. 28-30.

313. सुखमातिलोम्यमभावः प्रदोष प्रसक्तः पीडा वा व्यसनं व्यस्यत्येनं श्रेयस इति व्यसनम् । कौटिल्य VIII 1 Vide काम. XIII. 19 and नीतिवा p 177 for a similar derivation व्यस्यत्यावर्तयत्येनं दुष्कर्म श्रेयस इति व्यसनम् । नीतिवा.

Parāśara, Kautilya is of opinion that the vyasana of the people has graver consequences than that of the fort (or capital), for forts, treasury and army, all irrigation and agricultural work, stability, bravery and abundance (of things) spring from the people. Against Piśuna, Kautilya states that the calamities befalling the fort (or capital) give rise to graver consequences than those of the army for the reason that it is in the fort that the treasury and army are kept safe. Kaut. (VIII. 2) holds that internal troubles are more serious than external ones and troubles due to ministers are the most serious of all internal troubles. Kaut. prefers an ignorant ruler (who has not studied śāstras) to a king who is bent on swerving from the dictates of sāstras which he knows; he prefers a king suffering from illness to a new king (a conqueror), a weak but a high-born king to a strong but low-born one. In VIII 3 he enumerates the several faults and vices which have already been stated above (p. 54). After remarking that ignorance and lack of training are the causes of vices or faults, Kaut discourses on the relative seriousness of the several faults or vices and holds that gambling is worse than hunting, that sexual passion is worse than gambling, that drinking is worse than sexual vice and that gambling is the special cause of dissension among *sanghas* (corporate assemblies) and among families of nobles that have the characteristics of sanghas. In VIII. 4 he states that among divine visitations like fire, flood, epidemics and famine, floods are more devastating than fire, diseases and epidemics are less destructive than famine, that the loss of outstanding[314] men is more serious than that of common men even in large numbers, since there can hardly be one eminent man among a thousand ordinary or inferior men. He holds that the trouble caused by the Crown Prince is a lesser evil than that caused by a favourite queen In VIII. 5 Kautilya holds a discussion on the troubles arising from the army and allies. He first enumerates thirty-three matters that may cause trouble with the army, such as not giving due respect to it, or showing contempt to it, not dispensing the pay at the proper time, not preventing diseases from attacking it, having soldiers who are very fond of their wives He then takes pairs of troubles out of these and states which is the lesser evil of the two. Then he deals with causes that lead to the loss or defection of allies

In the Rājadharmakānda, the Rājanītiprakāśa and other works the king is advised to celebrate several rites and festivals, which may be briefly referred to here They were meant as propitiatory rites to avert national calamities and also to keep the populace in good humour and to afford enjoyment to people The Rājadharmakānda (pp 115–117) and the Rājanītiprakāśa (pp 416–419) quote about 35 verses from the Brahmapurāna to the effect that the king is to celebrate in one or more of the six months from Vaiśākha festivals (devayātrā) in honour of various deities such as Brahmā, the gods, the Ganges, Vināyaka, Nāgas, Skanda, the Ādityas, Indra and Rudra, the Mātrs (Durgā and others), the Earth, Viśvakarman, Visnu, Kāmadeva, Śiva, the Moon respectively on the *tithis* from the 1st to the 15th The same two works quote a passage of 18 verses from the Skandapurāna about the festival of moonlight and also the rite of raising the banner of Indra and the latter quotes (pp 425–433) a long passage from the Visnudharmottarapurāna also Vide H of Dh. vol. II pp 825–26 for description of the festival of Indra's banner They describe the worship of Devī on the 8th and 9th days of Āśvina (from the Devīpurāna) when animals were sacrificed, the gifts of cows on the Amāvāsyā of Kārtika, the rite called Vasordhārā (stream of wealth) The details of all these are passed over here for want of space

CHAPTER X

PURPOSE OF THE STUDY OF RĀJADHARMA AND THE ENDS OF THE STATE

In the preceding pages an attempt has been made to present a picture of the theory and practice of Government and statecraft as delineated by ancient and medieval Indian writers on dharmaśāstra and arthaśāstra One feature that would strike any reader is the religious colouring with which all theories and ideals are suffused. Another is that the ideal set before rulers and their officers is a highly moral one. Several faults have been found in the theory and practice inculcated by the writers. Except for some centuries before and after the Christian era, monarchy has been the only form of government known in India and monarchy alone is generally envisaged by Indian writers. The result has been that the king came in practice to be almost synonymous with government and the State, though a very lofty sense of his duties and responsibilities was impressed on the king. Another defect lies in the almost total absence of discussion on the form and working of oligarchical or republican States Besides, once the main outlines of the theory of the State were established by the first writers on polity, for about two thousand years succeeding generations of authors were content to follow in the old grooves and hardly ever made any fresh approach to the problems of government or started any rival conceptions or theories Ancient authors were content to induce the kings and the people to support as far as possible the *status quo*. They thus provided for a more or less static society and did not encourage any dynamic thoughts or movements There was no strong or assertive middle class nor was there any organized Church. Though the brāhmanas were a sacred class, they were not organized as a body and had to depend only on exhortations and texts to exert influence on the monarchs It may no doubt be pointed out that similar conditions prevailed almost all the world over. Small States, constant wars and invasions were the commonest phenomena in Europe till the 15th or 16th century and no reproach should be levelled at the Indian writers alone It cannot, however, be gainsaid that even after experiencing the constant plundering expeditions and religious persecutions of Scythian, Hun and Moslem invaders from the

1st to the 11th and the following centuries the able thinkers, warriors and statesmen of India did not enlarge their limited horizon and find means to consolidate and weld together into a united block the numerous small States that were scattered all over India. They could have put forward a common idea and ideal before all the provinces and peoples of India viz. meeting the onslaught of plundering and fanatical invaders, which, if properly handled, would have acted as a unifying force. It was to some extent only in Vijayānagara and Mahārāstra that in medieval times means were adopted to weaken the power of the invader, to present a solid front and establish powerful Hindu kingdoms. The old writers spun the same old webs of theories that had been there for centuries, they did not formulate new theories nor did they take steps to infuse into the common people a sense of solidarity and unity as Indians and did not inculcate deep and abiding sentiments of patriotism similar to those we find in Western countries for the last two or three hundred years. In spite of such drawbacks it will have to be conceded that ancient Indian writers made substantial and independent contributions to the theory and practice of Government and that their handiwork can stand comparison with the ancient and medieval thought of most countries of the world.

It may be asked: What in these days is the use of the study of the theory and practice of Government in ancient India? It may be argued that the world is now hoping, as promised by the great leaders of the United Nations, to enjoy several freedoms, that great expectations are created in the minds of millions of down-trodden peoples, and that all peoples including Indians will be faced in the near future with democracy and great problems of reconstruction and that knowledge of the past cannot throw much light on the pressing needs of the present or the serious questions that will confront all in the latter half of the 20th century It may be conceded that the situation in which we find ourselves now and in which we shall be placed in the near future is unique and much light cannot be thrown by a study of the past on the solution of the problems that will have to be tackled by us But that study has certain useful purposes to serve. Millions of people in India as well as in the world are hardly better than hewers of wood and drawers of water in their own countries. They intensely desire to be masters in their own countries and of their own destinies. The iron has entered

deep in their souls that for countries as well as individuals freedom of action spells happiness and dependence on the will of others is misery (as Manu laconically puts in IV. 160), that men who have no independence are hardly human beings (as the Mārkandeya 125·29 says).[315] The study of the past will give us hope and convey the assurance that we have in the past conducted governments and administrations of vast empires, that we evolved theories and practices which were not inferior to those of some of the most advanced nations of the world, that, allowed opportunities and scope, we may rise equal to what the circumstances may demand of us. On the other hand, such a study will stimulate thought, focus our attention on our mistakes and short-comings, make us be careful to avoid pitfalls and give us indications of the directions in which we must make a new orientation in our ideals and practices.

At the end of this section on Rājadharma, a question may be asked: what were the ends or purposes that the State in ancient India placed before itself or the dharmaśāstra and arthaśāstra writers said the State should place before itself? The end of the State has been differently stated by different philosophers and theorists of the West from ancient times to the present day. To take only a few examples To Plato and Aristotle[316] the end of the State was good life for the citizens. But it is not very easy to say what is meant by the good life. Bluntschli in 'Theory of the State' (Oxford, 1885) Book V Chap. IV p. 300 formulates the proper and direct end of the State to be 'the development of the national capacities, the perfection of the national life and finally its completion', provided, of course, that the process of moral and political development shall not be opposed to the destiny of humanity. This definition is not easy to grasp. There is no agreement as to what is the destiny of humanity and the concepts of nation and national life are hardly older than a few centuries even in Europe. For 'nation' one may substitute the word 'country'

315. सर्वं परवशं दुःख सर्वमात्मवशं सुखम्। एतद्विद्यात्समासेन लक्षणं सुखदुःखयोः॥ मनु. IV. 160; स्वतन्त्रता मनुष्याणां परतन्त्रा सदाचला। नरोपि परतन्त्रो यस्तस्य कीदृङ्मनुष्यता॥ मार्कण्डेयपुराण 125. 29.

316. Aristotle in 'Politics' says 'A state exists for the sake of a good life and not for the sake of life only .. Political society exists for the sake of noble actions and not of mere companionship' (Book III Chap. 9).

or 'kingdom'. Then it may be of some application to India It is impossible to define the end of the State in a single word or in a few words. This question about the end of the State has been partly answered already when speaking of the ideals of kingship. At the risk of some repetition a reply to the above question may be given in the following words The authors on Dharmasāstra had a very low estimate of human nature, they believed that ordinarily men were depraved, that it was difficult to find a man pure by nature and that men were kept in the straight path by the fear of punishment (Manu VII. 22 = Śānti[316a] 15. 34) Yāj I. 361 requires the king to punish and bring to the proper path castes and guilds when they swerve from their dharma. Kām. (II. 40 and 42–43) says the same thing and adds that in the absence of danda the world will revert to the state of mātsya-nyāya (the strong devouring the weak). Śukra I. 23 says the same thing The ancient writers did not rely on the natural moral impulses of man and on his will to do the right thing. The same ideas are expressed by some Western writers on law and politics 'A herd of wolves is quieter and more at one than so many men, unless they all had one reason in them or have one power over them' says Jeremy Taylor Salmond (Jurisprudence p 65) states 'man is by nature a fighting animal and force is the *ultima ratio* not of kings alone but of all mankind' We must distinguish between immediate or proximate ends and the ultimate end The ultimate end or goal of most of our philosophy was moksa (release or liberation from the ever-recurring cycle of births and deaths and from the miseries and suffering of life) The same was the ultimate goal of rājadharma But the proximate goal of the State in India was to create such conditions and

---

316a सर्वो दण्डजितो लोको दुर्लभो हि शुचिर्नरः। दण्डस्य हि भयाद्भीतो भोगायैव प्रवर्तते ॥ शान्ति 15 34, इदं प्रकृत्या विषयैर्वशीकृतं परस्परं स्त्रीधनलोलुपं जगत्। सनातने वर्त्मनि साधुसेविते प्रतिष्ठते दण्डभयोपपीडितम् ॥ काम. II 42, राजदण्डभयाद्भीतः स्वस्वधर्मपरो भवेत्। शुक्र I. 23, This conception bears striking resemblance to the words of Machia. 'Discourses' I 3 quoted by H Butterfield in 'State craft of Machiavelli' (1940) p 111 'Those who have discussed the problems of civic life demonstrate–and history is full of examples to confirm the fact–that whoever organizes a state and arranges laws for the government of it must presuppose that all men are wicked and that they will not fail to show their natural depravity whenever they have a clear opportunity, though possibly it may be concealed for a while'

environments as would enable all men to live in peace and happiness, to pursue their avocations, to follow their own customs and usages and their 'svadharma', to enjoy without interference the fruits of their labour and the property acquired by them. The king was the divinely provided instrument to create the conditions of peace, order and happiness. If the king impartially exercises the power of *daṇḍa* over all, whether his own son or enemy, in proportion to their guilt, he secures this world and the next for himself and the people; the king's scrupulous performance of his own duties leads him and his people to heaven The task of the State (or the king who represented the State) was to repress by the threat and use of force any violation of the rights of personal freedom and property, to enforce the practice of people's own traditional customs and usages and to take serious care of virtues and dharma. These were the sentiments of Kautilya himself (III 1.).[316] At the very threshold of his work he remarks 'therefore the king should not allow people to swerve from or fail in their duties (dharma); for whoever holds fast by his dharma, observes the rules laid down for *āryas* and those of castes and āśramas (the stages of life) will be happy in this world and the next. The members of society consisting of four castes and having four āśramas when guarded by the king with danda will abide by their respective paths, being devoted adherents of their respective duties and avocations'.

Both Kām. I. 13 and Śukra I. 67 state[317] that a king following the path of righteousness confers upon himself and his subjects the group of three viz. the three *puruṣārthas* of dharma, artha and kāma; if he acts otherwise he certainly ruins (himself and the people) The same doctrine is inculcated by other works, such as Śānti 85. 2, Mārkandeya 27. 29-30.[318]

316 b. राजः स्वधर्मः स्वर्गाय प्रजा धर्मेण रक्षितुः । ... दण्डो हि केवलो लोकं परं चेमं च रक्षति ॥ राज्ञा पुत्रे च शत्रौ च यथादोषं समं धृतः ॥ कौटिल्य III 1; तस्मात्स्वधर्मं भूताना राजा न व्यभिचारयेत् । स्वधर्मं सन्दधानो हि प्रेत्य चेह च नन्दति ॥ व्यवस्थितार्य-मर्याद कृतवर्णाश्रमस्थितिः । त्रय्या हि रक्षितो लोकः प्रसीदति न सीदति ॥ कौटिल्य I. 3, last two verses; चतुर्वर्णाश्रमो लोको राज्ञा दण्डेण पालितः । स्वधर्मकर्माभिरतो वर्तते स्वेषु वर्त्मसु ॥ कौटिल्य I 4, last verse.

317 न्यायमवृत्तो नृपतिरात्मानमपि च प्रजाः । त्रिवर्गेणोपसन्धत्ते निहन्ति ध्रुवमन्यथा ॥ काम I 13 and शुक्र I. 67.

318. वर्णधर्मा न सीदन्ति यस्य राज्ये तथाश्रमाः । वत्स तस्य सुखं प्रेत्य परत्रेह च शाश्वतम् ॥ मार्कण्डेयपुराण 27. 29.

Therefore what the king was to do was to see that the dharmas of *varna* and *āśrama* were observed by the people and if they swerved from them to bring them back by punishments Śukra IV 4 39 says that each caste was to observe the rules of the caste handed down from generation to generation and that if its members behaved otherwise they were liable to be punished by the king The principal works emphasize that each individual in the State should fulfil his own duties (svadharma) as belonging to a particular class (varna) or a particular stage of life (āśrama) or his own duties due to the position he occupies and those known as sāmānya dharma such as *ahiṃsā*, truthfulness &c (for which see H of Dh vol II pp 10–11) and that the purpose of the State was to enable him to do so and to prevent others from interfering with him All this laid undue emphasis on the preservation of the *status quo*, on current beliefs and practices as the ideal The writers do not emphasize that each individual must actively pursue the good of the society as a whole As the final goal was moksa, undue emphasis was laid on other-worldiness, on individual attainment and on detachment and running away from ordinary worldly affairs The goal of the State was deemed to be to enable men to attain the four *puruṣārthas*, particularly the first three (as the last viz *moksa* depended only upon individual philosophical insight and mystical experience and was attainable only by a microscopic number) Even the Bārhaspatya-sūtra[319] (II. 43) says that the fruit of polity was the attainment of dharma, artha and kāma Somadeva begins his Nītivākyāmṛta in a characteristic way when he performs obeisance to *rājya* (the State) that yields the three fruits of dharma, artha and kāma [320] Kām.[321] IV. 77 winds up his discussion of the seven elements of rājya with the declaration that the entire State depends for its highest stability on wealth and the army and that the State when handled by a sagacious minister results in securing the three goals Kautilya[322] (in I. 7) first advises people not to eschew pleasures altogether,

319. नीते. फलं धर्मार्थकामावाप्ति । धर्मेणार्थकामौ परीक्ष्यौ । बार्हस्पत्यसूत्र II 43–44

320 अथ धर्मार्थकामफलाय राज्याय नम. । नीतिवाक्यामृत p. 7

321 इति स्म राज्यं सकलं समीरितं परा प्रतिष्ठास्य धृत ससाधनम् । गृहीतमेतत्त्रिपुणेन मन्त्रिणा त्रिवर्गनिष्पत्तिसुपैति शाश्वतीम् ॥ काम. IV 77.

322. धर्मार्थाविरोधेन कामं सेवेत । न हि सुखः स्यात् । समं वा त्रिवर्गमन्योन्यानुबन्धम् ।

but to enjoy pleasures in such a way as not to conflict with the requirements of dharma and artha, and adds that a man may enjoy in an equal degree the three goals of life that are dependent on each other, since any one of the three if pursued to excess harms not only the other two but also itself. The Dharmaśāstra authors held that Dharma was the supreme power in the State and was above the king, who was only the instrument to realize the goal of dharma. To these authors the State was not an end in itself but only a means to an end. Kautilya, true to his position as a writer on arthaśāstra, finally states his opinion that *artha* is the chief among the three goals, as the other two depend upon wealth for their realization. With this statement of Kautilya, one of the most renowned figures of Indian antiquity, this section on rājadharma may be appropriately brought to a close.

VYAVAHĀRA

(LAW AND ADMINISTRATION OF JUSTICE)

CHAPTER XI

That to administer justice impartially and to punish the guilty were among the prime functions of the sovereign has been stated above (p. 57) The king was deemed to be the fountain (i.e the distributor) of justice Kautilya[323] (I. 19) prescribes that the king was to look into the disputes of citizens and country people in the 2nd part of the day (divided into eight parts). Manu (VIII. 1–3) states that the king desirous of looking into the disputes of people should enter the *sabhā* (the hall of justice) accompanied by brāhmanas, ministers and should there decide every day the causes of litigants. Śukra IV. 5·45 is the same as Manu VIII. 1, Vas 16 2, Śankha-Likhita, Yāj. I. 327 and II. 1, Visnu Dh. S. III. 72, Nār. (I. 2), Śukra IV. 5·5, Mānasollāsa II. 20, verse 1243 state that the administration of justice was the personal concern of the king. The Mit on Yāj. II. 1 says that protecting the subjects is the highest duty of a king and that that duty cannot be discharged without eradicating and punishing the wicked, which latter requires that the king should administer justice (vyavahāradarśana). Medhātithi on Manu VIII. 1 also says that protection consists in the removal of troubles, secular and spiritual (adrsta). Manu VIII. 12 and 14 (= Nār III. 8-9 p. 42) personifies the administration of justice as Dharma incarnate by representing that when justice is administered the dart of adharma or falsehood by which dharma is pierced is taken out from the body of Dharma. Yāj. (I. 359–360) declares that the impartial administration of justice yields the same rewards as solemn vedic sacrifices do. In this way administration of justice was held to be a very sacred duty. Manu VII. 128 (= Vrddha-Hārīta VII. 194) declares that a king who punishes those that do not deserve to be punished and who does not punish those that deserve punishment incurs great obloquy and goes to hell. Vas. (19·40–43) prescribes one day's fast for the king and three 'days' fast for the *purohita* when the king lets off those that deserve punishment and three days' fast for the king and the *krcchra* penance for the purohita when the king

323. द्वितीये पौरजानपदानां कार्याणि पश्येत्। कौ. 1. 19.

punishes the innocent. The Mahābhārata[324] (Anuśāsana 6·38 and chap. 70) and Rāmāyana say that if a king intent on pleasures does not show himself to litigants who approach him for decision, he would suffer like king Nṛga. The Śukranītisāra (IV. 5·8) also says the same thing. In the Rāmāyana (VII. 53–54) king Nrga is said to have been cursed to become a chameleon for a long period by two brāhmanas who had a dispute about the ownership of a cow and could not see the king for many days. Megasthenes (Frag. XXVII. pp. 70–71) says 'the king remains the whole day in court without allowing the business to be interrupted.' Kaut[325] (I. 19) gives the advice that, when in court, the king should not cause petitioners or litigants to wait long at the door, for when a king makes himself inaccessible, those who are near him create confusion about what should or should not be done, whereby the king engenders disaffection among his subjects and makes himself a prey to his foes. The king's court[326] of justice was called *dharmasthāna* (Śankha-Likhita), *dharmāsana* (Nārada I. 34, Manu VIII. 23, Śukra IV. 5·46) or *dharmādhikarana* (Kātyāyana and Śukra IV. 5·44)· 'The place where the decision of the truth of the plaint (lit. the cause or root of dispute) is carried on by a consideration of the rules of the sacred law is called the *dharmādhikaraṇa* (the Hall of Justice)'—says Kātyāyana Kālidāsa (Śākuntala V) and Bhavabhūti (Uttararāmcarita I.) employ the word dharmāsana·

The authors of smrtis believed that there was a golden age or era of perfect virtue in the dim past, when men were bent only on right conduct, that later ages saw the advent of sinful

326. धर्मस्थानं प्राच्यां दिशि तच्चाग्न्युदकैः समवेतं स्यात् । शङ्ख q. in स्मृतिच. (II. p. 19); धर्मशास्त्रविचारेण मूलसारविवेचनम् । यत्राधिक्रियते स्थाने धर्माधिकरणं हि तत्॥ कात्या० q. in स्मृतिच० (II, p 19), परा. मा. III 1 p. 22. The व्य. म. p. 8 reads धर्मशास्त्रानुसारेण अर्थशास्त्रविवेचनम्. The verse as thus read is the same as Śukra IV. 5. 44. Vide स. वि. p. 63 'यत्र स्थाने आवेदितव्यतत्त्वनिष्कर्षः धर्मशास्त्रविचारेण निर्णेतृभिः क्रियते इति धर्मस्थानम् । अस्यैव धर्माधिकरणमिति नामान्तरम् ।'

promptings, that therefore regulation of life by the learned and the king came into vogue (compare Gaut VIII. 1). Manu I. 81–82 (= Śāntiparva 231. 23–24) state that in the Krta age dharma prevailed in its perfection, there was no advent of adharma among men then and that in each of the three succeeding *yugas* dharma declined progressively by the introduction of theft, falsehood and deceit. The Śāntiparva (59. 13 ff) narrates that in the Krta age there was no king and no punishment, that gradually kāma (lust) and rāga (passion) began to wield sway and dharma dwindled away. This belief in an ideal or perfect past was universal and was probably depicted in order to induce men to rise higher and higher in goodness and virtue and to make them submit easily to the discipline of government and the priestly requirements. This ideal description of the past, is often found associated with the picture of anarchy that reigned in the dim past which was retrieved from horrors by the creation of the kingly office (vide pp 30–34 above). These diametrically opposite views of the past contained in the same works (such as Manu and the Mahābhārata) probably owe their origin to the desire of the writers to make the common people submit to the absolute rule of kings. Almost all works even from the Ṛgveda (X. 10. 10) downwards believe in the progressive deterioration of religion and morals. A state of anarchy is visualised in a few works only for the purpose of glorifying the great usefulness of the institution of kingship. Nār. I. 1 states[327] 'when people were solely bent on dharma and were truthful, there existed neither administration of law and justice nor hatred nor jealousy. When dharma declined (or disappeared) among men, administration of law and justice came to be introduced and the king was declared to be the decider of disputes and the chastiser (of the guilty)'. Br. also (S. B E. 33 p. 277) says 'In bygone ages men were pre-eminently virtuous and free from cruel tendencies; now that men are overwhelmed by greed and hatred, judicial procedure has to be declared'.

The idea of Dharma took the place of the very ancient conception of *ṛta*. In the Ṛgveda ṛta denotes the supreme

327. धर्मैकताना पुरुषा यदासन्सत्यवादिनः । तदा न व्यवहारोऽभूत्र द्वेषो नापि मत्सरः । नष्टे धर्मे मनुष्याणां व्यवहारः प्रवर्तते । द्रष्टा च व्यवहाराणां राजा दण्डधरः स्मृतः ॥ नारद I. 1–2, धर्मप्रधानाः पुरुषा पूर्वमासन्महर्षिकाः । लोभद्वेषाभिभूतानां व्यवहारः प्रकीर्तितः ॥ बृह. q by स्मृतिच II p 1, व्य प्र. p. 4 Compare Plato in 'Laws' (Book IV p 485 of the Random House edition) 'There is a tradition of the happy life of mankind in days when all things were spontaneous and abundant'

transcendental law or the cosmic order by which the universe and even the gods are governed and which is intimately connected with sacrifice. Vide Ṛg. I. 68. 2, I. 105. 12, I. 136. 2, I 142. 7, I. 164. 11, II 28. 4, IV. 23. 8–10 (in which the word rta occurs ten times), X. 190 1. On the relation of rta and law Berolzheimer in his 'The world's legal philosophies' (translated by Jastrow, New York, 1929) says: " closely connected with the religious and philosophical views of the Aryans are certain fundamental positions in regard to the philosophy of law which in turn became the antecedents of later legal and ethical developments among the Greeks and Romans. Foremost among these philosophical conceptions is 'rita', which is at once the organized principle of the universe and the divine ordering of earthly life; as the former it regulates the appearance of the sun and the moon, of day and night and embodies the unchangeable principle that pervades the succession of phenomena; as the latter it is affiliated with purpose and human benefit and is exemplified in the flow of the rivers which fertilize the fields; in the cattle useful to men; in the institutions of marriage, of the monarchical state, of the patriarchal home; and in man's sense of responsibility for his sins. The derivative conceptions of 'vrata', 'dharma', 'dhāma', 'svadhā' represent special aspects of 'rita'; thus 'vrata' refers to any specialized embodied 'rita'; while 'dharma' refers specifically to the moral function of rewarding good and punishing evil" (pp. 37–38). Vide Prof. V. M. Apte's paper or 'Ṛta' in the Ṛgveda (pp. 55–60 of the Silver Jubilee Volume of the Annals of the B. O. R. Institute) in which he tries to prove that ṛta means primarily 'the belt of the Zodiac'.

The word *vyavahāra* is used in several senses in the *sūtras* and *smṛtis*. One meaning of vyavahāra is 'transaction or dealing' as in Udyogaparva 37. 30 quoted above (on p 207) or in Āp. Dh. S II. 7·16·17, I. 6·20. 11 and 16. It also means 'a dispute, a lawsuit' in Śānti 69·28, Manu VIII. 1., Vas. 16·1, Yāj. II. 1., Visnu Dh. S. III. 72, Nār. I. 1 and 2, Śukra IV. 5·5. A third sense is 'legal capacity to enter into transactions' (as in Gaut. X. 48,

Vas. 16·8, Śankha-Likhita (*rakṣed rājā bālānām dhanānyapi āpla-vyavahārāṇām* &c. quoted in V. R. p. 599) A fourth but a rare sense is 'the means of deciding a matter' (as in Gaut XI. 19 'tasya *vyavahāro* vedo dharmaśāstrānyangāni &c). In this chapter the word vyavahāra is taken to mean 'law-suit or dispute in a court' and 'legal procedure'. This sense is very ancient. In the Delhi-Topra Pillar Edict No. 1 of Aśoka (Corpus I. I. vol. I p. 123) we have the word 'viyohālasamatā' (vyavahārasamatā) and the word 'vyavahāravidhi' occurs in Kharavela's Hāthigumphā Inscription (E I. vol XX. p. 79). A 'vohārika-mahāmatta' (vyāvahārika-mahāmātra, minister of justice) occurs in the Mahāvagga, I. 40 3 and Chullavagga VI 4 9). In the medieval digests, both law and procedure are sometimes dealt with in one book as in the Vyavahāra-nirnaya of Varadarāja and the Vyavahāra-mayūkha, sometimes the titles of law are treated of in one work and judicial procedure in another. For example, Candeśvara composed the Vivādaratnākara (on titles of law) and Vyavahāraratnākara (on judicial procedure) The word vyavahāra is restricted in some works to judicial procedure alone (as in the Vyavahāramātrkā of Jīmūtavāhana and the Vyavahāratattva of Raghunandana). The word *vivāda* which means 'dispute' is often used as a synonym for vyavahāra in the sense of law-suit or legal procedure or both In Āp. Dh S. II. 11·29 5 and in Nār. I. 5 *vivāda* means 'law-suit' In the Vivādacandra of Misarumiśra and the Vivādatāndava of Kamalākara both law and judicial procedure are treated of. Yāj. (II. 8 and 305) appears to distinguish between *vivāda* (law-suit) and *vyavahāra* (judicial procedure)

The word '*vyavahāra*' is defined by several smrtis and commentators. Kātyāyana gives two definitions, one based on etymology and referring principally to procedure and the other giving the conventional sense having in view a dispute "The (*upasarga*) *vi* is employed in the sense of 'various', '*avi*' in the sense of 'doubt', '*hāra*' means 'removing'; *vyavahāra* is so called because of its removing various doubts" (quoted by V. M.

p. 283, Par. M. III. p. 7 and Kullūka on Manu VIII. 1).[327a] This definition places the administration of justice on a high plane. The purpose of all branches of Indian philosophy is the quest of Truth or Reality. The purpose of legal procedure is, according to Kāt, the same viz. to find out the truth when there is a dispute. But there are some points of difference. The philosopher may take his own time in his search for truth; but justice has to be done as quickly as possible. Further, legal procedure has its own method and limitations in finding out the truth, that is, it depends on oral and documentary evidence, while a philosopher's quest of truth may be purely intellectual and subjective. Another definition is: 'When the ramifications of right conduct, that are together called dharma and that can be established with efforts (of various kinds such as truthful speech &c.), have been violated, the dispute (in a court between parties) which springs from what is sought to be proved (such as a debt), is said to be *vyavahāra*'. Hārīta gives an easier definition: 'that is declared to be *vyavahāra* where the attainment of one's wealth (taken away by another) and the avoidance of the dharmas of others (such as those of heretics) are secured with (the help of) the means of proof' (quoted by the Sm. C. II. p. 1). The Mit. (on Yāj II. 1) defines vyavahāra as 'averment (about a matter) as related to oneself in opposition to another'. Śukra IV. 5. 4 gives another definition. The Vyavahāramayūkha gives a much

327 a. वि नानार्थेऽव सन्देहे हरणं हार उच्यते । नानासन्देहहरणाद् व्यवहार इति स्मृतः ॥ कात्या. quoted in व्य मा. p. 283, कुल्लूक on मनु VIII. 1, दीपकालिका p. 36, which says 'ऋणादानादिनानाविवादपदविषयः निराक्रियतेऽनेनेति नानासंशयहारी विचारः व्यवहारः ।', प्रयत्नसाध्ये विच्छिन्ने धर्माख्ये न्यायविस्तरे । साध्यमूलस्तु यो वादो व्यवहारः स उच्यते ॥ अपरार्क p 596, स्मृतिच. (II. p. 1), परा. मा. III pp. 5–7, व्य. प्र. pp. 3–4. This last verse is variously explained. Vide my notes to Kāt. 25. The मदनरत्न (व्यव Ms in my possession) explains 'प्रयत्नसाध्ये कष्टसाध्ये गृहक्षेत्रादिके विषये विच्छिन्ने स्वेच्छया भोक्तुमशक्ये सति न्यायविस्तरे न्यायः प्रमाण विस्तीर्यते प्रगच्छते निर्णीयते यस्मिंस्तस्मिन् धर्माख्ये धर्मनामके धर्माधिकरणमिति प्रसिद्धे सभालक्षणे स्थले साध्यमूलको यो गृहक्षेत्रादिविषयो वादः स व्यवहार इति ।'; स्वधनस्य यथा प्राप्तिः परधर्मस्य वर्जनम् । न्यायेन यत्र क्रियते व्यवहारः स उच्यते ॥ हारीत q. by स्मृतिच. (II. p. 1).

more elaborate definition (vide text p 1 and notes pp. 3–4 of my ed.).

A *vyavahārapada*[328] means 'the topic or subject matter of litigation or dispute'. It is the same thing as 'vivādapada' which word occurs also in Kaut. (III ·16 p 191 and IV. 7 p. 218) and in Nār. (dattāpradānika 1, abhyupetyāśuśrūsā 1). Manu VIII. 8 shows that '*pada*' means '*sthāna*'. Yāj. II. 5 defines it as 'If a person, who is set at naught by others in a manner that is opposed to the rules of smrti and to good usage or conventions, informs the king (or his judge), that is a *vyavahārapada*'. From very ancient times eighteen vyavahārapadas have been enumerated. The underlying idea is that most of the disputes between men can be classified under 18 heads. Even Manu (VIII. 8) was conscious of the fact that the enumeration of 18 vyavahārapadas was a matter of a convenient arrangement and that the number 18 did not embrace all disputes whatever but only the largest number of disputes and the most important among them. Medhātithi and Kullūka make this position quite clear.[329]

There is some difference about the number and nomenclature of the vyavahārapadas among Manu and other writers of smrtis The following table will give some idea of the divergence as to nomenclature and the sequence in which they are treated of. All do not mention them in the same order as in Manu VIII. 4–7. For example, the order in Yāj is rnādāna, upanidhi, dāyavibhāga, sīmā-vivāda, svāmipālavivāda, asvāmivikraya &c. Yāj. does not enumerate all of them in one place as Manu and Nārada do.

	0	4 sīmāvivāda	pradāna	15 vākpārusya
9 svāmipālavivāda	3 sīmāvivāda	13 vākpārusya	0	16 dandapārusya
10 sīmāvivāda	13 vākpārusya	14 dandapārusya	11 ksetrajavivāda	12 steya
11 vākpārusya	14 dandapārusya	18 steya	15 vākpārusya	17 vadha
12 dandapārusya	0	15 sāhasa	16 dandapārusya	18 strisangraha
13 steya	12 sāhasa	19 strisangrahana	0	11 strīpumsayoga
14 sāhasa	sangrahana (IV. 12)	0	14 sāhasa	
15 strisangrahana	1 (no name but subject		0	13 dāyabhāga
16 strīpumdharma	dealt with in III. 2–4)	3 dāyavibhāga	12 strīpumsayoga	14 aksadevana
	2 dāyavibhāga	12 dyūtasamāhvaya	13 dāyabhāga	6 asusrūsā
17 vibhāga	15 dyūtasamāhvaya	9 abhyupetyāsuśrūsā	17 dyūtasamāhvaya	19 prakīrnaka
18 dyūtasamāhvaya	0	20 prakīrnaka	5 abhyupetyāsuśrūsā	
	17 prakīrnaka		18 prakīrnaka	

It will be noticed that Yāj omits the duties of husband and wife from the 18 topics of vyavahāra as he had already dealt with them in his section on *ācāra*, adds *abhyupetyāśuśrūsā* and *prakīrnaka* (miscellaneous wrongs) and splits krayavikrayānuśaya into two and thus gives 20 topics Nārada (I. 16-19) has the same 15 topics as those of Manu (in some cases under slightly different names), omits svāmipālavivādā, steya and strīsangrahana, adds abhyupetyāsuśrūsā and another topic viz prakīrnaka and splits krayavikrayānuśaya into two, viz *krītānuśaya* and *vikrīyāsampradāna*. He includes *steya* under *sāhasa* (sāhasa verse 21) and also in what is an appendix. Brhaspati as quoted in the Smrti-candrikā (vyavahāra p 9) names the 18 vyavahārapadas and adds prakīrnaka Kautilya also adds prakīrnaka and omits 'steya' under his dharmasthīya section, though he deals with theft elsewhere (as in IV. 8 and 11). It is not to be supposed that the 18 topics were first started by the Manusmrti. Gaut. XII. 1 mentions *vākpārusya* and *dandapārusya*, treats of some of the topics without specifying the technical names e g. he refers to the subjects of sangrahana (in XII 2-3), of theft (XII. 12-13), of svāmipālavivāda (in XII 16 ff), of rnādāna (in XII. 26-33), of nidhi (in XII 39), of dāyavibhāga (in XXVIII). Similarly the Āp Dh. S speaks in scattered places of some of the topics of vyavahāra such as murder (i. e *sāhasa*) in I. 9. 24, of adultery in I 9. 25. 1-2 and I. 10. 28 15-20, II. 10 26 18 ff, theft in I. 9 ·25 4-11, dāyavibhāga in II. 6 14, vākpārusya in II. 10. 27 14. Vas. also mentions the word dāyavibhāga (in XVII. 40) and sets out rules about it and about means of proof (XVI. 13-15), about *rnādāna* (XVI 31), about the twelve kinds of sons (XVII. 12-39). The Baud Dh S. (II. 2 8) employs the word dāyavibhāga and gives several rules on that subject. Thus some at least out of the eighteen vyavahārapadas (such as vākpārusya, dandapārusya, dāyabhāga, steya) were distinctly recognized centuries before the present Manusmrti was composed. Someśvara in Mānasollāsa (II. 20 verses 1265-1273) enumerates 22 vyavahārapadas, by splitting dattasyānapākarma into two as *datta* and *dattāpahāraka*, adds svāmibhrtyavivāda after svāmipālavivāda, counts krayavikrayānuśaya as two and dyūtasamāhvaya as two distinct topics

The definition of *vyavahārapada* in Yāj II 5 (= Śukra IV. 5. 68) viz 'if a person informs or complains to the king' (*āvedayati ced rājñe*) conveys that vyavahārapada means and includes only those disputes that are started or brought before

the Court at the instance of the parties. Manu VIII. 43 prescribes that neither the king nor his officers should start a dispute (i. e. a legal proceeding), nor should he sit silent upon (hush up) a matter which has been brought before him by another (i. e. by a party). Gaut. XIII. 27 lays down that a party should humbly approach a judge with his complaint. Kātyāyana (27) states: 'The king[330] should not, through influence or through greed of money, take upon himself the disputes of men, when they do not themselves want to contend (in a court)'. Mānasollāsa II. 20 verse 1274 and Śukra IV. 5. 69 say the same. There must have always been several matters, of which nobody might complain and which the king might have to look into *suo motu*. Manu after dealing with the 18 vyavahārapadas (in VIII. 1 to IX. 251) requires the king (in IX. 252–253) to make efforts to destroy kantakas (thorns, harmful persons) and dilates upon many aspects of his activities in this respect. Nārada relegates all matters in which the king took action *suo motu* to a separate topic, prakīrnaka, about which he says 'under prakīrnaka are comprised lawsuits depending on the king (i. e. on the king's own action) such as transgressions of the king's commandments and obedience to his injunctions, grants of towns, dissensions among the constituent elements (such as ministers) of the State, the duties and breaches there of among heretics, followers of the veda, corporations (of merchants) and groups, dispute between father and son, neglect of prescribed penances, abstraction of gifts made to worthy persons, the wrath of hermits, sinful confusion of castes and the rules regarding their maintenance and (in short) whatever (matter) has been omitted in the preceding (vyavahārapadas)—these are treated under prakīrnaka'.[331] Brhaspati defines prakīrnaka in

(*Continued on the next page*)

the same way as Nārada Kautilya deals with the vyavahārapadas in his Dharmasthīya (III) section and in the Kantakaśodhana section (IV) speaks of matters that are similarly dealt with by officers called *pradestrs* (who correspond to coroners and police magistrates of modern times), while matters falling under the dharmasthīya section (viz. the vyavahārapadas) were disposed off by judges (called *dharmasthas*). Kantaka means in Kautilya as in Manu IX. 252 'harmful persons' The chief matters that fell within the purview of the kantakaśodhana (removal or punishment of harmful persons) officers or courts were: Artisans like blacksmiths and carpenters were generally to work in guilds and receive from people materials for working them up; if they caused unreasonable delay in handing back finished articles, they were to receive one-fourth less than the proper wages and were to be fined twice the amount of wages, similar provisions are made for loss of wages and fines for weavers who do not increase the weight of cloth (cotton, linen, silk or woollen) woven up to the usual standard: washermen were to wash clothes on wooden planks or smooth stones, but if they washed them elsewhere, they were to pay compensation for loss caused and a fine of 6 *panas*; they were to be fined twelve panas for the sale, pledge or hiring out of other's clothes; they were also to be fined for keeping clothes with them beyond the time ordinarily required, for washing the best garments, garments of middling quality and inferior garments the wages were respectively one pana, $\frac{1}{2}$ and $\frac{1}{4}$; trustworthy persons and experts were to decide disputes about colour and wages; similar rules apply to tailors; goldsmiths, who

(*Continued from the last page*)

In an interesting paper contributed to the Sir Denison Ross volume of papers pp 234–240 Dr. V. Raghavan describes a work called 'Vaiśyavaṃśa-sudhākara' composed by Kolācala Mallinātha, the renowned commentator of the five classical Sanskrit Kāvyas This work is the report or decision given by a commission presided over by Mallinātha appointed to settle a dispute (which in these days might be called a caste question not cognisable by civil courts) that arose in the times of Devarāya II of Vidyānagara (1422–1466 A D). Vaiśyas were given a license to trade in the 24 cities and 108 shrines of the realm, certain subcastes like the Komatis claimed to be vaiśyas and this privilege also. Mallinātha decides after a searching examination of authorities that the words vaiśya, vaṇik, nāgara, ūruja, tṛtīya-jātīya are synonyms, that Komatis, who were styled *vijātis* by their rivals, were vaiśyas and entitled to all the privileges of vaiśyas. This decision would come under either पाखण्डि ... विपर्यय: or तद्वृत्तिनियम:.

without informing (government officers) purchased from unclean hands (i e from menial servants or slaves) without changing the form of the article or after changing the form, or purchased from a thief were to be fined respectively 12, 24 or 48 panas; for stealing one (gold) māsaka (one-sixteenth of a suvarna) from off a suvarna, the gold-smith was to be fined two hundred panas and for stealing one māsaka out of a silver *dharana* there was a fine of twelve panas; fines are provided for loss of weight (beyond the recognised standard) in the case of working up copper, lead, brass, bell-metal, tin into vessels and articles; for manufacturing a counterfeit coin, for accepting it or passing it off to another the fine was a thousand panas and for entering a counterfeit coin in the royal treasury the punishment was death; a physician, who undertook the medical treatment of a patient without informing (government officers) of the dangerous nature of the disease, was to be punished with the first amercement if the patient died and with the middling fine if the patient died through the carelessness of the physician and if the patient suffered some vital injury, the matter was to be dealt with as assault (dandapārusya); musicians and actors shall stay in one place during the rainy season and shall avoid taking excessive gifts or indulging in excessive praise of one patron; for violating this rule the fine was twelve panas The same rules apply to those who show dumb plays and to other mendicants, the latter receiving as many lashes as the fine imposed in similar cases on others. In IV. 2 Kautilya prescribes fines against merchants that use false measures, weights and balances; that sell timber, iron, jewels, ropes, clothes misrepresenting them as superior when they are inferior; that conspire to prevent the sale of merchandise; that cause adulteration of grains, oils, salt, medicines &c.; that raise the prices beyond those fixed by the superintendent of commerce for local commodities and for foreign produce. In IV. 3 Kaut. provides for measures against such calamities as fire, floods, pestilential diseases, famine, rats, tigers, serpents and prescribes a fine of twelve panas for catching or injuring cats and mongooses employed to destroy rats. In IV. 4 Kaut. prescribes the measures that the officer called samāhartṛ has to take to protect the subjects against those who prey upon the people secretly by employing foul means. He has to employ spies under various disguises to find out the honesty or corruption of officers in the villages, of superintendents, of judges, of magistrates and witnesses and the punishment in these cases is generally

banishment Kautilya IV. 5 deals with the detection of young men inclined to robbery and adultery by the employment of spies and agents *provocateurs* in the guise of ascetics and persons reputed to possess miraculous powers The Kautilīya IV 6 and 7 respectively describe the seizure of criminals on suspicion or in the very act itself and examination in cases of sudden death Kaut IV. 8 speaks of questioning in the presence of the wronged party of the witnesses of the accused, whether they are his relatives or total strangers, as regards the country, the caste, the family, the name, occupation, property, friends and residence of the accused and of the application of torture to the accused to elicit an admission of guilt It is said that torture is to be applied only in the case of those whose guilt is believed to be established *prima facie* (*āpladosam karma kārayet*), that torture is not to be employed when the accused is guilty of a minor offence, is under age, old or diseased, is under the influence of intoxicants, or is a lunatic, or is overwhelmed by hunger or thirst or fatigue due to a journey, or has eaten to excess or is suffering from indigestion or is weak, nor is it to be employed in the case of a pregnant woman or a woman who was delivered of a child within a month; and in the case of other women only half the torture prescribed for males or only the asking of questions is to be employed. Learned brāhmanas and ascetics (when accused) are to be subjected to espionage only. Those who violate these rules or incite others to do so and those who are guilty of causing the death of an accused by torture are to be punished with the highest amercement. Four kinds of torture were employed in the case of complaints about wrongs viz. six dandas, seven whippings, two kinds of suspension, and (fourthly) water-tube (i e injecting salt water in the nose from a tube) [332] In this chapter Kaut states that one who

332 The exact meaning of the four kinds of torture is not clear. Prof V. R Dikshitar in 'Hindu Administrative Institutions' pp 237-247 tries very hard to establish that Kaut recommends no torture in any case, that '*vākyānuyoga*' means 'pronouncing of guilt by the jury' and *karmānuyoga* means 'judgment of the Chief Justice' Though the learned Professor's attempt to exculpate Kautilya may be due to laudable motives, the words of Kautilya are too clear to admit of any other interpretation than the one given above If one dispassionately considers the fact that no *karma* was allowed to be employed in the case of the weak, the diseased, old men &c., that in the case of women '*ardhakarma*' alone was allowed, that a heavy fine was imposed for causing death by *karma* (*karmanā vyāpādanena*),

(*Continued on the next page*)

charges an innocent man with being a thief or who conceals a thief is to be punished like a thief and that even one who is not a thief may for fear of torture admit that he is a thief, as Māndavya did. Kaut in IV. 9 prescribes that the *samāhartr* and *pradestrs* should exercise control over all superintendents of the various State departments and their subordinates, that those who steal or seize valuable articles or jewels from State mines or manufactories should be simply sentenced to death, prescribes various fines and punishments for stealing or removing by force articles of different prices from the State granaries and store-houses, provides punishment for judges that threaten, browbeat, send out or unjustly silence or abuse litigants or that do not ask proper questions or ask improper questions, that cause unnecessary delay, unjustly rehear causes that have been heard or disposed of, and provides heavy punish-

---

(*Continued from the last page*)

that Māndavya, though really not a thief, declared that he was so through the fear of the torments of *karma* (*karmaklesabhayāt*), that in the four karmas we find suspension and water-tube and that immediately after the words '*karma kārayet*' we get the rule that in all crimes the brāhmana was not to be subjected to bodily pain, it will have to be admitted that '*karma*' in this chapter of the Arthaśāstra means 'torture'. One fails to see what 'ardhakarma' in the case of women will mean if 'karma' signifies only the judgment of the chief justice or why Māndavya should have confessed theft through fear of 'karmaklesa' And one need not feel apologetic if Kautilya recommends torture in certain well-defined cases. Torture was an essential part in the Roman Criminal Procedure and Augustus had issued an edict about it. Vide Stephens' 'History of English Criminal Law' vol. I, pp. 47–49 Torture by the police and third-degree methods are not unknown in the 20th century in the West (even apart from the latest German methods) or in India, though they are not expressly mentioned in any text-book or Act as allowable Vide Harry E Barnes' 'Story of Punishment' pp. 10–15 for various kinds of tortures employed in the West for several centuries and third-degree methods (pp. 15–24), which he asserts are even now in almost universal use by the Police Department in the U. S. A The story of Māndavya who though not a thief was held to be a thief, because he, owing to his vow of silence, did not reply when questioned and near whom was found the booty stolen and who was impaled, is found in Ādi. 63. 92–93 (cr ed chap. 57), Ādi. 107–108 (cr. ed chap 101), Anuśāsana 18. 46–50 and in Nār, (I 42) and Br. quoted by Aparārka (p 599). शूले मोतः पुराणर्षिरचोरश्चोरशङ्कया । अणीमाण्डव्य इत्येवं विख्यात. क्षुमहायशाः ॥ आदि 63. 92–93 Kaut IV 8 appears to have had a different version of the story before him. The Mārkandeyapurāna chap 16 has the story of Animāndavya. The story of Māndavya was a leading case, it appears, in criminal law The Mṛcchakaṭika (Act IX. 36) appears to refer to torture.

ments for releasing persons jailed or for rape on a woman in a lock-up Kaut. IV. 10 prescribes alternative punishments of fines in lieu of the cutting off of fingers or mutilation of limbs for several offences such as theft or assault, abuse and defamation or showing contempt to the king by riding his horse or other conveyance or fabricating royal orders, prescribes death for selling human flesh, simple death or highest amercement for stealing images of gods or animals, for abducting human beings or for wrongfully seizing fields, houses, gold, gold coins, jewels and crops. Death with or without torture is provided for in Kaut. IV. 11 for murdering a man in a quarrel (but when the wounded man dies a fortnight or a month after the quarrel, highest fine or fine of five hundred *panas* and the expenses of medical treatment); different kinds of punishments are provided for wounding with a weapon, impalement for causing violent death of men and women, burning alive for those who aim at securing the kingdom or force entrance into the royal harem or incite wild tribes or enemies or instigate disaffection in the capital or country or army, drowning (or solitary confinement in a dark room, acc. to another reading) for a brāhmana offender of this sort, cutting of tongue for insulting or abuse of parents or a teacher or an ascetic, drowning for one destroying the dam of a tank or for a poisoner or for a woman murdering a man, tearing to death by bulls for a woman who murders her husband or child or her elders or administers poison or sets fire Kaut adds that the punishment of death with torture has been prescribed by ancient smrti-writers, but that it is proper to order simple death in cases of offences in which no cruelty enters. Kaut. IV 12 starts by declaring that no man shall have sexual intercourse with a woman (not his wife) against her will, prescribes different punishments for forcible sexual intercourse with an immature girl or a girl that has attained maturity, of the same caste, or of a different caste, provides that for intercourse with a willing maiden the fine will be 54 panas for the man and 27 for the maiden, further provides that it is no offence for a man of the same caste to have intercourse with a maiden who has not been got married for three years after the appearance of menses, provides fines for deceitfulness in substituting one girl at marriage while showing another before, provides that if a woman whose husband is gone abroad commits adultery a relative or servant of the husband may keep her under restraint and that if the husband on his return forgives the woman her paramour may not be proceeded against,

but if he does not condone, the nose and ears of the woman may be cut off and the paramour should be sentenced to death. Kaut. IV. 13 provides punishment for brāhmanas eating or drinking what is forbidden to them and varying fines for administering forbidden food or drink to members of the four varnas, provides fines for house-trespass and lurking house-trespass by night, provides punishments for witchcraft, provides burning alive in a vessel for adultery with the queen and other punishments for adultery with women of the several castes, whether guarded or unguarded, prescribes a fine of 24 panas for adultery with a nun

The above is a meagre summary of Kautilya's section on kaṇṭakaśodhana. Kautilya is encyclopaedic on this subject as on several others. The number of offences dealt with by him is very large and his treatment in some respects compares favourably with such modern criminal codes as the Indian Penal Code. Many of the provisions contained in Kaut. IV are found in Yāj. (II. 273-304), in Nārada (in prakīrnaka and elsewhere) and also in Manu (e g. VIII. 365-368 about rape or adultery, VIII. 396-97 about washermen and weavers, IX. 225-226 about musicians and dancers, IX. 231-232, IX. 261-267). Why Kaut. treats of several offences under kaṇṭakaśodhana and not under the dharmasthīya section, it is somewhat difficult to say. It is probable that he included under dharmasthīya only those complaints or actions that were fought out between the parties, even though many of the wrongs complained of under vākpārusya, daṇḍapārusya, sangrahana and steya were criminal and the same as those treated of in the section on kaṇṭakaśodhana In wrongs dealt with in the kaṇṭakaśodhana section it was the king or king's officers who themselves brought up the offenders for punishment and the offences were viewed not as mere private matters, but as matters in which the State was concerned for the eradication of crime in general. Kautilya in III. 20 speaks of *prakīrnaka* but therein he seems to include some miscellaneous matters like non-return of borrowed articles or deposits (at the proper time and place), evading payment of ferry tax under the pretence of being a brāhmana, connection with a public woman kept by another, misappropriating revenue collected as agent for a householder, a cāndāla's touching an Ārya woman, inviting for dinner in honour of Gods and Manes Buddhist or Ājīvaka or Śudra mendicants, abandonment of parents, child, wife or husband, brother or sister, teacher or pupil (when not

guilty of a grave sin), wrongful confinement of a person &c. Kautilya does not apparently include under prakīrnaka all matters in which the king acts *suo motu* as Nār, Br. and Kāt do but includes these latter under kantakaśodhana. He, however, states here and there (IV. 1 and 13) that the matters dealt with under kantakaśodhana are quite analogous to those under such titles as dandapārusya treated of under the dharmasthīya section. For example, in IV. 1. he says that if a physician through negligence causes loss of a vital part to a patient then the matter may be treated as dandapārusya.[333] So Kautilya probably represents a much earlier stage of judicial administration than Nār. or Br, who included under prakīrnaka all matters in which the king acted of his own motion (i. e all that falls under kantakaśodhana in Kaut.)

The enumeration of vyavahārapadas is very ancient and authoritative, but there is hardly any scientific principle of classification underlying them. A writer called Nibandhanakāra quoted in the Sarasvatīvilāsa[334] (p. 51) holds that in all the vyavahārapadas from *rnādāna* to *dāyavibhāga* the relief claimed is something to be given or rendered (*deya*) by one party to the other, while in vākpārusya, dandapārusya, sāhasa, gambling and betting the principal relief is in the form of danda (punishment). Here there is a glimmering of the distinction between civil and criminal litigation. Two deep-seated principles in the administration of law and justice everywhere are 'fulfil your promises' and 'cause injury (himsā) to no one'. It is therefore that we find Brhaspati stating that lawsuits are of two kinds according as they originate in (demands about) wealth or in injuries. Yāj. II 23 speaks of *arthavivāda* (civil dispute) and so made a distinction between civil and criminal disputes. Lawsuits[335] originating in wealth are divided into

---

333. भिषजः ..... कर्मापराधेन विपत्तौ मध्यमः । मर्मवेधवैगुण्यकरणे दण्डपारुष्यं विद्यात् । अर्थशास्त्र IV. 1. दुर्बलं वेश्म शकटमनुत्तब्धमूर्ध्वस्तम्भशल्यमनपाश्रयमतिच्छन्नं स्वभ्रं कूपं कूटावपातं वा कृत्वा हिंसायां दण्डपारुष्यं विद्यात्। अर्थशास्त्र IV. 13.

334. तथा च गौतमसूत्रम्। द्विरुत्थानतो द्विगतिरिति। व्यवहार इत्यनुषज्यते। तत्र निबन्धनकारेणोक्तम्-ऋणादानादिदायविभागान्ताना देयनिबन्धनत्वं साहसादिपञ्चकस्य दण्डनिबन्धनत्वमिति द्विरुत्थानतेत्यर्थ इति। स. वि. p. 51.

335. द्विपदो व्यवहारः स्याद्धनहिंसासमुद्भवः। द्विसप्तकोऽर्थमूलस्तु हिंसामूलश्चतुर्विधः॥ ... एवमर्थसमुत्थानि पदानि तु चतुर्दश। पुनरेव प्रभिन्नानि क्रियाभेदादनेकधा। पारुष्ये द्वे साहसे च परस्त्रीसंग्रहस्तथा। हिंसोद्भवपदान्येवं चत्वार्याह बृहस्पतिः॥ स्मृतिच० II p 9, व्य.मा p 277 (for first verse), परा मा. III. pp. 20-21, सार्थं वादस्य मूलं स्याद्धनादिना यतिर्यदि। देयादानं हिंसा चेत्युत्थानद्वयमुच्यते॥ कात्यायन (30) quoted in स्मृतिच० II p. 13.

fourteen sorts and those originating in injuries are of four sorts These last are vākpārusya (defamation and abuse), dandapārusya (assault and battery), sāhasa (murder and other forms of violence) and strīsangraha (adultery). Here there is a clear distinction made between civil disputes (*arthamūla* or *dhanamūla*) and criminal ones (*hiṃsā-mūla*) Kāt. also says that disputes have their source in two viz. not rendering what should be given and injury (himsā). Though in this way a distinction was made between civil and criminal disputes among the 18 titles of law, it appears that the set of rules and the procedure in both were the same (except as to the time allowed for reply, as to the qualifications of witnesses and as to proxies), the same courts tried both kinds of disputes and not as in modern times (when civil disputes are tried in one class of courts and criminal complaints in another and when the procedure also in both differs a great deal) There were not two sets of courts in ancient India as there were in England before the fusion of Law and Equity, but all courts in ancient and medieval India were required to administer the law of the texts tempered by common sense and reason as laid down by Br.: 'a decision should not be given by merely relying on the text of the sāstra; when consideration of a matter is divorced from reason and common sense loss of dharma results' (q by Aparārka p. 599).

Nār. (I. 8-29), Bṛ., Kāt, the Agnipurāna (253. 1-12 which reproduce almost *verbatim* the verses of Nār.) and others predicate several things about vyavahāra, such as that it is *dviphala* (has two results) and so on. All these are brought together here below for convenience Vyavahāra is:—

Catuspād—having four feet, viz. dharma,[336] vyavahāra, caritra, rājasāsana, acc. to Nār (I. 10); while acc. to Yāj II. 8

336. Among the verses at the end of IV.1 of the Arthaśāstra the following two verses occur. धर्मश्च व्यवहारश्च चरित्रं राजशासनम्। विवादार्थश्चतुष्पादः पश्चिमः पूर्वबाधकः। तत्र सत्ये स्थितो धर्मो व्यवहारस्तु साक्षिषु। चरित्रं संग्रहे पुंसां राज्ञामाज्ञा तु शासनम् ॥. These two occur in Nār (I 10-11) and Hārīta (q. in S V. p 58) with variations, viz. both read चतुष्पाद् व्यवहारोयमुत्तरः पूर्व० and चरित्रं पुस्तकरणे. Par M. III. p. 10 reads चरित्रं तु स्वीकरणे. Lengthy explanations of these verses are offered in Aparārka (p. 597), Smrticandrikā (II. pp 10-11), Vyavahāraprakāśa (pp. 7, 88-89) and other digests. It has to be noted that the four (dharma &c) mentioned in these verses are the means of arriving at a decision in a law-suit, as Br. says· धर्मेण व्यवहारेण चरित्रेण नृपाज्ञया। चतुष्प्रकारोभिहितः सन्दिग्धेर्थे विनिर्णयः ॥ (in स्मृतिच० II p 10, परा. मा. III. p. 16, व्य प्र p 6); व्यवहारोपि चरित्रेण बाध्यते यथा। साक्षिभिः साधितेप्यभीरःस्त्रिया। पुरुषान्तरोपभोगे तद्दृष्टे च व्यवहारतः मासेपि राजकुलाधिगतलिखितासिद्धतते। एवं हि तत्र लिखितम्- आभीरस्त्रीणां व्यभिचारेपि सति दण्डो न ग्राह्य इति। अपरार्क p. 597 (on या. II. 17.)

and Br. they are the plaint, the reply, the proof (*kriyā*) and decision (*nirnaya*) or acc. to Kāt. 31 (q. by Aparārka p 616) plaint, reply, *pratyākalita*[337] and *kriyā*

Dharma and the other three are really the four feet of nirnaya (final decision), which is one of the four stages of a law-suit (vyavahāra) and so only in a secondary or far-fetched sense they are the four pādas of vyavahāra Each of these four is said to be of two kinds. Vide Sm C. II. pp 10–11, Par. M III. pp. 198–199, V. P. pp. 87–88 where the verses of Br are set out and fully explained A decision is said to be arrived at according to dharma when the wrong-doer admits his guilt or wrong-doing and the real owner secures his wealth or the relief due to him without having to undergo the trouble of a protracted trial by means of witnesses, documents &c Similarly a decision to be arrived at by ordeals is said to be one by dharma Dharma and satya are often identified (vide note 125 above) and here the wrong-doer tells the truth and the decision is therefore said to be by *dharma*. When a litigation is fought out in Court by citing witnesses, the decision is said to be by vyavahāra 'Witnesses' are mentioned only by way of illustration (and imply documents, possession and other means of proof) When a defendant is guilty of not giving a straight reply or when his reply is tainted with faults and so is unacceptable and a decision is given against him on that ground alone it is still a decision by vyavahāra *Caritra* means 'the usages of a country, village or family' (*deśasthitiḥ pūrvakṛtā caritram samudāhṛtam*—Vyāsa q. in Sm C II. p 11 and Vy Nir p 138) This seems to be the sense of 'caritra' in 'phalakavāre charitratoti' occurring in Nasik Inscription No 12 in E I. vol VIII p 82. In prakīrnaka 24 Nār seems to give the same sense 'sthityartham prthivīpālaiscaritravisayāh krtāh'. *Caritra* also means 'anumāna' (possession and presumptions). 'Anumānena nirnītam caritramiti kathyate'—says Br. quoted in Vy Nirnaya p. 139 and Par. M. III. p. 198. Usages are the means of decision in certain cases apart from the question whether they are supported by the smrtis or

337. *Pratyākalita* means, acc. to Aparārka p 616, the deliberation of the judge and sabhyas as to where the burden of proof (*onus probandi*) lies and as to the method of proof. Acc. to the Mit on Yāj II 8, pratyākalita in this sense is not a vyavahārapāda, since it is not directly related to the litigants. Acc to Nār. II. 21 pratyākalita seems to mean an addition to the plaint or to the reply (i e a supplementary written statement), वादिन्या लिखिताच्चेयं यत्पुनर्वादिना स्मृतम्। तत्प्रत्याकलितं नाम स्वपादे तस्य लिख्यते ॥

not. 'Caritram pustakarane' means that such usages are valid means of decision if they have been written down or recorded by the king, while 'caritram tu svīkarane' (the reading in Par. M) means 'usages become the rule of decision when they are accepted as valid by the people and by the courts'. When a king issues in a matter of dispute an order which is not opposed to smrtis or local usages and which is thought out as the most appropriate one by the king's intellect or which is issued to decide a matter when the authorities on each of two sides are equally strong, it is a decision by royal command Br (in Par. M III p. 148) and Kāt (verses 35-38 q in Sm C II p. 10, Par. M. III pp. 16-17, V P p 7) explain the above four. Brhaspati gives two meanings of caritra: (1) what is decided by inference; (2) the usages of a country When it is said that each later one of the four stultifies each preceding one, the idea is not that in all cases it is so, but that it is so only in some cases. Vide Kāt. (43 q by V. P. p 90) which makes this clear. Some examples may be given If one litigant says that he would prove his case by an ordeal, while the other says that he will prove his contention by human means (documents or witnesses &c.), then the trial by ordeal is not to be resorted to but the hearing of the case is to proceed in the ordinary way. Vide Kāt 218 (q. by Mit. on Yāj. II. 22) for this rule. Here dharma is set aside in favour of vyavahāra. Another example is given in the Par M. III. p. 18. A person belonging to one of the four varnas commits a seditious act (*rājadroha*) and through timidity admits his guilt (this is *satya*), but the witnesses (relying on Manu X. 130 that where the punishment would be death, a witness may tell a lie) deny that he was guilty of the act and he is let off. Here dharma is set aside in favour of vyavahāra (trial based on the depositions of witnesses). Vide Sm. C. (II. p. 11) for another similar example. In the country of Kerala visiting a prostitute was not condemned by custom So even though it is established by witnesses that a person in Kerala did so, the local king may not punish him with a fine Or suppose a person is charged with the offence of adultery with the wife of an *ābhīra* and this fact is established by witnesses. Yet the man charged may show that among the ābhīras there is a usage (written down in the census records of the king) that adultery with an ābhīra woman is not punishable. In such cases caritra (usage) annuls the (ordinary) vyavahāra. But suppose that in such cases the king, in order to improve the morals of a section of his subjects, issues a

proclamation that from the date of the proclamation one who is guilty of adultery with an ābhīra woman will be punished, then in that case usage will be set aside by royal command, which will then be the rule of decision Similarly where there are no witnesses nor documents nor possession and no room for ordeal and there are no texts and local usages it is the king who has to decide as best as he can Vide Pitāmaha q in Sm C (II p 28) Kāt (verses 39–43 q in V. P p 89) describes how and when each later one sets aside each prior one

Catusthāna—having four bases viz satya, witnesses, pustakarana and rājasāsana

Catuhsādhana—having four means viz *sāma*, *dāna*, *bheda* and *daṇḍa*

Caturhita—benefitting the four (the four varnas and four āśramas).

Caturvyāpin—that envelopes or reaches four viz the disputants, witnesses, the sabhyas and the king

Catushkārin—that brings about four results viz dharma (justice), gain, renown, love or regard of the people

Aṣṭānga—it has eight limbs or members viz, the king, his good officer (chief judge), sabhyas (*assne judges*), śāstra (law books), accountant, scribe, gold, fire and water

Aṣṭādaśapada—has eighteen titles (viz ṛnādāna and others enumerated above)

Śatuśākha—having a hundred branches This is approximate. Nār. (I. 20–25) states that the 18 titles have 132 sub-heads (ṛnādāna 25, upanidhi 6, sambhūyasamutthāna 3, dattāpradānika 4, aśuśrūsā 9, vetana 4, asvāmivikraya 2, vikrīyādāna 1, krītānusaya 4, samayasyānapākarma 1, ksetravāda 12, strīpumsayoga 20, dāyabhāga 19, sāhasa 12, yākpārusya and dandapārusya 3, dyūtasamāhvaya 1, prakīrnaka 6)

Trayoni—having three springs or motives viz kāma (sexual desire), krodha (hot temper), lobha (greed).

Dvyabhiyoga—founded on two kinds of complaint viz. on suspicion or on fact Nār I 27 says that a complaint on suspicion may be made against those who associate with men of evil repute (such as thieves, gamblers and dissolute persons) or it may be made on the ground that a certain person is really

the thief because the thing stolen is found with him (this is *tattvābhiyoga*). This latter may take two forms i e. the grievance of the plaintiff may be negative (e. g. the defendant took or borrowed a debt or article and does not return it) or positive e. g. the defendant has dispossessed the plaintiff of land).[338] Vide Mit on Yāj II. 5.

Dvidvāra—having two openings i. e. it is based on the statements in the plaint and those in the reply.

Dvigati—having two issues, that is, the decision may be founded on truth or on error.

Dvipada—having two aspects, viz. relating to wealth and so civil (dhanamūla), and relating to injury and so criminal (himsāmūla) This is acc to Kāt. 29.

Dvirutthāna—having two springs or sources. It is the same as above. Hārīta and Kāt. 30 mention this

Duskandha—having two trunks viz. dharmaśāstra and arthaśāstra (acc to Kāt. 32).

Dviphala—having two results, victory or failure (Kāt 32).

Ekamūla—Hārīta and Kāt mention this. It means 'having only one (viz. what is to be established) as its root'.

Sapaṇa and *apaṇa*—where both parties to the litigation or one of the parties stakes (either through pride or anger or belief in the truth of his case) a certain sum of money to be paid by him in case of his defeat, that is called *sapaṇa* law-suit (Yāj. II. 18); in this case the defeated party will pay to the king the usual fine for a defeated party and also the sum staked by him and will deliver to the successful party what is due to him. Vide also Visnudharmottara III. 324 44 A lawsuit may also be *apaṇa* (without a stake being declared). Nār. (I. 4) employs the words *sottara* and *anuttara* for these two

The Sm. C. (II. pp 27–28), Par. M. (III. pp 42–45), Sarasvatīvilāsa pp. 73–74, V P. pp 36–38, state that, according to Pitāmaha, the king may take cognizance of his own motion without

---

338. न्यायं मे नेच्छते कर्तुमन्यायं वा करोति च। न लेखयति यस्त्वेवं तस्य पक्षो न सिध्यति॥ कात्या. q. by विश्वरूप (on या. II. 6), स्मृतिच० II p. 39, मिता. on या. II. 5 'न्यायागतं मदीयं धनं गृहीत्वा न ददातीतिवत् प्रतिषेधरूपेण वा मदीयं क्षेत्रादिकमपहरतीति वा विधिरूपेण वा यो न लेखयतीत्यर्थः।' स्मृतिच० II. p. 39.

the complaints of private persons of certain matters called *apa-rādhas*, *padas* and *chalas* and these works set out the lists of ten *aparādhas*, 22 *padas* and 50 *chalas*[339]. The king may himself come to know about these or these matters may be brought to his notice by an officer called sūcaka or a private man called *stobhaka*, defined acc to Kāt. (33-34) as follows —[340] that man is declared to be *sūcaka* who is appointed by the king himself for finding out the wrong-doings of people and who on coming to know of them conveys them to the king; that man is a *stobhaka* who with a sole eye to money and without being urged by the king informs the king first of actions (among the people) that are condemned by the sāstras' Therefore a stobhaka is a private informant for money The ten aparādhas, acc. to Nār, are· disobedience of the king's order, murder of a woman, confusion of varnas, adultery, theft, pregnancy from one not the husband, abuse and defamation, obscenity, assault (danda-pārusya), abortion[341] They were called aparādhas because they were met with fine It will be noticed that some of these come under several vyavahārapadas and some like 'varnasankara' are included in prakīrnaka by Nārada (v 4) The king could by his own action investigate these even if no private complaint be lodged. Samvarta (quoted by the Sm C II p 28, Par M III. pp 44-45) gives another list which differs in some respects from the above. In the Nālandā copperplate of Devapāladeva (E I vol XVII p 310, p 321) an officer called 'dasāparādhika' is mentioned In many grants from the 7th century onwards among the taxes remitted to the donees we often meet the expression 'together with the ten aparādhas' (sadaśāparādhah', in Valabhī grant of Dhruvasena III dated samvat 334 i e 653-4 A.D, E I. vol. I p. 85, at p 88, E.I. XVII p 310 at p 321, in Gupta Ins. No 39 p 179 of 766-767 A. D), or 'daśāparādhādisamastot-pattisahito dattah' (in E I vol VII p. 26, p 40 of śake 852), or

339 छलानि चापराधाश्च पदानि नृपतेस्तथा । स्वयमेतानि गृह्णीयान्नृपस्त्वावेद-कैर्वना ॥ पितामह q in स्मृतिच II p 27, परा. मा III p 42

340 शास्त्रेण निन्दितं स्वर्थमुरुष्यो राज्ञाप्रचोदित. । आवेदयति यत्पूर्वं स्तोभक· स उदाहृत· ॥ नृपेणैव नियुक्तो य. परदोषमवेक्षितुम् । नृपस्य सूचयेज्ज्ञात्वा सूचक· स उदाहृतः ॥ कात्यायन q in स्मृतिच० III p 28 (reads मुरुष्यश्चार्थप्रचोदित·), परा. मा III p 45 (reads स्वर्थं मुरुष्यश्चार्थं and नृपस्य समर्थं ज्ञात्वा), व्य प्र p 38 (reads परदोषानवेक्षणे)

341. आज्ञालङ्घनकर्तार स्त्रीवधो वर्णसङ्करः । परस्त्रीगमनं चौर्यं गर्भश्चैव पतिं विना ॥ वाक्पारुष्यमवाच्यं यद्दण्डपारुष्यमेव च । गर्भस्य पातनं चैवेत्यपराधा दशैव तु ॥ नारद q in स्मृतिच. II. p 28, परा. मा III p. 44, स. वि. p 73, दण्डनीतिप्रकरण of केशव p. 12.

'sadaṇḍadaśāparādhaḥ' (E. I. vol. III p. 53 at p. 56, Torkhede plate of Govinda in śake 735, and E. I. vol. III p. 265, 266, the Rajor inscription of Mathanadeva dated Vikrama saṁvat 1016). It is not correct to hold that the words refer to the right of the donee to be exempt from guilt arising from the commission of some traditional offences or that authority was conferred by the grant on the donee to deal with offenders committing the ten aparādhas and to recover the fines imposed by themselves (as suggested in J B O R S for 1916 p. 53n). No king would ever think of exempting donees in pious gifts or the villages in those grants from the results of such grave aparādhas as the murder of a woman, adultery, theft and abortion, nor is it possible to hold that a king authorised a private individual or individuals to exercise judicial power in such crimes as murder when (as we shall see later on) the power of dealing with *sāhasa* was not conferred on śreni or gana tribunals. The real meaning appears to be that the fines levied by him for the commission of the aparādhas in the villages granted would be made over to the donees as part of the gift, when recovered by the king. The 22 *vadas* were called *padas* of the king to distinguish them from the vyavahārapadas. According to Pitāmaha[342] they are: ripping open an animal's body (with a sharp weapon), destruction of growing crops, incendiarism, rape of a maiden, concealment of treasure trove, making a breach in an embankment or thorny hedge, grazing cattle over the field of another, destruction of a public garden, poisoning, high treason, unauthorised breaking of the royal seal, divulging the secret line of policy of the king, releasing from jail a prisoner, appropriation of the taxes or fines to be levied by the king (these are two), appropriating gifts (made by the king) or the *utseka*

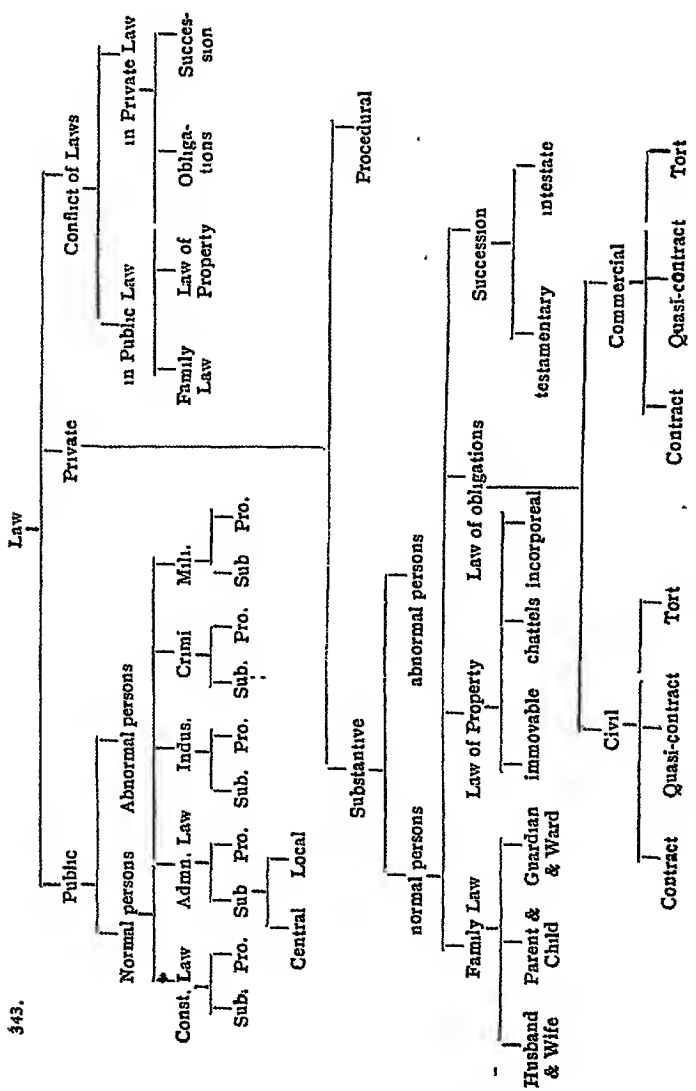
342. उत्कर्ती सस्यघाती चाप्यग्निदश्च तथैव च। विध्वंसकः कुमार्याश्च निधानस्योपगोपकः॥ सेतुकण्टकभेत्ता च क्षेत्रसञ्चारकस्तथा। आरामच्छेदकश्चैव गरदश्च तथैव च॥ राज्ञो मोहमकर्ता च तन्मुद्रामेदकस्तथा। तन्मन्त्रस्य प्रभेत्ता च चक्षुरस्यैव च मोचकः॥ भोगदण्डौ च गृह्णाति दानमुत्सेकमेव (? मुत्सर्गमेव) च। पडहाघोषणाच्छादी द्रव्यमस्वामिकं च यत्॥ राजावलीढं द्रव्यं यश्चैवाङ्कविनाशनम्। द्वाविंशतिं पदान्याहुर्वृद्धपज्ञेयानि पण्डिताः॥ स्मृतिच II. p. 28, परा. मा III. p. 45, स वि. p 73, व्य. प्र p. 37. The passage is somewhat corrupt; स. वि. gives a summary in prose and begins with चिकृतिः, while the rest read उत्कर्ती or उत्कृत्ती. व्य. प्र and वृद्धनीतिप्रकरण p. 12 reads दानं विक्रयमेव च (which would mean 'appropriating a gift or property sold by the king').

(? *utsarga*, dedication to the public), preventing the proclamation (of royal orders) by beat of drum from being heard, receiving property from a person who is not the owner, receiving articles that are enjoyed by the king (without his permission), causing destruction (or loss) of any one of the (seven) elements (of the State). The fifty *chalas* were mostly breaches of etiquette before the eyes or in the presence of the king. According to Pitāmaha they are: obstructing the road, raising the hand threateningly, leaping over a fort-wall (without permission or reason), destroying a cistern, destroying a temple, filling up a ditch (dug round a fort), divulging the weak points of the king (to the enemy), unauthorized entrance into the harem or royal chamber or the treasury or the royal kitchen (these are four), prying when the king is taking his meals, voiding ordure or urinating or blowing the nose or passing wind in the presence of the king (these are four), to sit before the king on haunches (*paryaṅkāsana*), to occupy the foremost seat in the king's presence, to enter royal presence in a dress more resplendent than the king's or supported by another or by the wrong-doer or at an improper time (these are four), to lie down on the bed or seat of the king or to put on his shoes (these are three), to go near the king (uncalled) when the latter is lying down on his bed, to serve the king's enemies, to occupy a seat that is not offered, to use gold in the dress or ornaments (these are two), to take tāmbūla (from the king's betel box) and chewing it (this is one), to speak loudly without being asked (by the king), to run down the king, to wear only one garment, to appear before the king with oil on the hair, to untie the hair (before him), to cover one's face, to have a body painted with figures, to wear a garland, to shake one's garment, to cover the head, to be bent on finding the weak points of the king, to be thick with evil men (or to touch the king), to have dishevelled hair, pointing out the nose, the ears and the eyes (these are three), to pick the teeth, to cleanse the ear or the nose (these are two). As the list of *chalas* is a very long one the verses are not quoted below, but are given in the Appendix (note 342 a). Śukra (IV. 5. 73-88) quotes all the verses from Nārada and Pitāmaha on the *aparādhas*, *padas* and *chalas* and in III. 6 also gives a list of ten sins, which is different from that of the aparādhas.

In modern works on Jurisprudence various classifications of Law are stated. For example, Dr. E. Jenks in 'New Jurisprudence' (1933) furnishes at the end of his work a very

elaborate classification which is set out in the note below.[343] Ancient systems cannot be expected to present such a classification. Ancient Hindu smrtis were content, as shown above, to

343.



divide the vyavahārapadas into civil and criminal They more or less deal with most of the subjects brought out in modern classifications but not in an orderly manner They also divide laws into substantive and adjective or procedural The vyavahārapadas correspond to the former and the rules about procedure, the appointment of Judges and the constitution of courts, evidence and limitation are adjective law. Some of these are dealt with in the commentaries and digests under a section called *vyavahāramātṛkā* (the elements of judicial procedure) and the rules of evidence are stated in Yāj, Nār. and others under the vyavahārapada ṛnādāna once alone It would be more convenient to deal with adjective law first That law is now of antiquarian or academic interest only and will therefore be treated somewhat briefly. The smrtis lay down a high level of judicial procedure, but the procedure must have been modified to suit the requirements of different times and the resources and inclinations of different kings. Some of the vyavahārapadas viz *ṛṇādāna* (recovery of debt), *strīpumsayoga* and *dāyabhāga* (partition of heritage) are of great practical importance even now, as all Hindus are governed in matters of partition, inheritance, debts, marriage and sonship by the rules of Hindu Law gathered from the Smrtis and digests as modified by legislative enactments and judicial decisions For description of Judicial administration in the Buddhist texts and times, vide Fick pp 107, 111–112 (which show that the administration of justice in Vesāli, the capital of the Licchavis, was a complicated affair, one of the courts being that of the *atthakulakas* i. e. of eight heads of families), Jayaswal's 'Hindu Polity', part II pp. 156–157, Hiouen Thsang's account in Beal's B.R W. W. Vol. I. pp 84–85 ; and Bombay Gazetteer, Vol. 24 pp 266–267 (for the administration of Justice under the Marathas)

Justice was to be primarily dispensed by the king. He was an original court as well as an appellate tribunal. Smrtis and digests insist that the king cannot dispense justice by himself alone, but must do so with the help and guidance of others. Manu VIII. 1–2 and Yāj II. 1 provide that the king wearing no gaudy dress or ornaments is to enter the sabhā (the Hall of Justice) for looking into the causes of litigants, accompanied by learned brāhmanas and ministers proficient in statecraft, is to be free from hot temper and greed and decide according to the law laid down in dharmaśāstras. Kāt. (55–56 quoted in V. M. p. 278, Mit. on Yāj. II. 2) says the same thing and adds that

a king who examines disputes in the presence of the Judge, the ministers, learned brāhmanas, the purohita and the sabhyas attains heaven. Vide Śukra IV. 5. 5 to the same effect (taking half verses from Yāj. and Kāt.). The king was not to decide by himself but was to follow the advice of his judge, though the responsibility even when he took advice was the king's. Vide Śukra IV. 5.6 (*naikah paśyecca kāryāṇi*). Nār. I. 35 says that the king has to abide by the view of the judge (*prāḍvivāka-mate sthitah*). This sentiment that it is not safe for a single man, however clever he may be, to undertake to decide a dispute was so ingrained among all people that Kālidāsa gives expression to it in the Mālavikāgnimitra (Act I) when he pens the sentence 'sarvajñasyāpyekākino nirnayābhyupagamo dosāya'. In Raghuvaṁśa 17.39, Kālidāsa states that king Atithi always looked into the causes of people himself with the help of judges (*dharmastha*)[344]. Pitāmaha[345] states that a person even if he knows the rules (of dharma) should not give a decision single-handed. Justice was to be dispensed openly in the court and not secretly. Śukra (IV. 5. 6–7) states[346] that neither the king nor the judge nor the sabhyas were to hear a cause in secret and that there were five reasons that led to the charge of partiality in judges viz. hot temper, greed, threats, enmity and hearing disputes in private. Judicial action is divisible into two provinces, viz. that of law and that of fact. The latter is a field in which it is impossible to lay down rules for determination. On points of facts there was a vast scope for the king's or judge's discretion. And therefore the texts contented themselves by saying that the king or judge should keep an open or impartial mind, should be free from hot temper or greed, should hear causes under the glare of public view and should not decide at his own will alone but with the help of learned brāhmanas and sabhyas. As regards points of law the king or judge is

---

344. स धर्मस्थसखः शश्वदर्थिप्रत्यर्थिनां स्वयम् । ददर्श संशयच्छेदान्व्यवहारान-तन्द्रितः ॥ रघुवंश । 17. 39. The word धर्मस्थ used here for judges may be noted. Kaut uses the same word in III. 1. From a detailed examination of the Raghuvaṁśa it appears very probable that Kālidāsa had closely studied Kauṭilya's Arthaśāstra.

345. तस्माच्च वाच्यमेकेन विधिज्ञेनापि धर्मतः । इति पितामहेन एकस्य धर्मकथननिषेधात् । स वि p. 67.

346. नैकः पश्येच्च कार्याणि वादिनोः शृणुयाद्वचः । रहसि च नृपः प्राज्ञः सभ्यैश्चैव कदाचन ॥ पक्षपातार्थिरोषस्य कारणानि च पञ्च वै । रागलोभभयद्वेषा वादिनोश्च रहःश्रुतिः ॥ शुक्र. IV. 5. 6–7.

required to decide according to the rules of dharmaśāstra (Manu VIII. 3, Yāj II. 1, Nār. I. 37, Sukra IV. 5. 11) and where there are no texts the king should decide in accordance with the recognized custom of the country. Kāt solemnly warns[347] the king against legislating or deciding according to his own will in the face of the texts: 'If a king decides (a case) by his own *fiat* where there is a text (of the śāstra applicable to it) it leads him away from heaven, it causes ruin to the people, it brings danger (to the king) from the armies of his foes and it strikes down the roots of (long) life; therefore a king should decide the causes of people according to the rules of śāstra; but in the absence of smrti texts he should carry out (judicial administration) according to the usages (lit the views) of the country'. These are the same as Śukra (V. 5. 10–11). Kāt further prescribes that the usages established in a country by the approval of its people and that are not in direct conflict with Veda and Smrtis should be recorded in writing under the seal of the king Pitāmaha[348] quoted by the Sm. C. (II. p. 26) states that in certain cases it is the king's own mind that is the deciding factor.

How the king directly dispensed justice is illustrated by the rules of Gaut. XII 40–42 and Manu VIII. 314–316 that a thief who has stolen a brāhmana's gold may run with dishevelled hair to the king carrying an iron club or a heavy bludgeon of khadira wood, may declare the sin committed by him and request the king to award punishment, that the king may then strike him with the club and that whether the thief dies or lives after the king so strikes him he becomes free from the guilt. The king was also the highest court of appeal. The Rājatarangini (VI. 14–41) states how king Yaśaskara heard the appeal of a person who had sold his house without the well, who on returning

III. p 41 शुक्र IV. 5 10–11 are the same as कात्या. यस्य देशस्य यो धर्मः प्रवृत्तः सार्वकालिकः। श्रुतिस्मृत्यविरोधेन देशदृष्टः स उच्यते॥ देशस्यानुमतेनैव व्यवस्था या निरूपिता। लिखिता तु सदा धार्या मुद्रिता राजमुद्रया॥ कात्या. q. in स्मृतिच. II. p 26, परा. मा III p 41. Vide मनु 8 3 for देशदृष्ट.

348 यत्र चैते हेतवो न विद्यन्ते तत्र पार्थिवचनाभिर्णय इत्याह स एव (पितामह एव)। लेख्यं यत्र न विद्येत न युक्तिर्न च साक्षिणः। न च दिव्यावतारोस्ति प्रमाणं तत्र पार्थिवः। निश्चेतुं ये न शक्याः स्युर्वादा सन्दिग्धरूपिणः। तेषां नृपः प्रमाणं स्यात् स सर्वत्र प्रभुर्यतः॥ स्मृतिच॥ II. p. 26.

from a long absence abroad found the well usurped by the vendee and was defeated in the lower courts because the vendee had bribed the scribe to write '*kūpasahita*' instead of '*kūpaḥahita*' and how the king decided in the man's favour by exposing the vendee with a trick; while in VI. 42–69 the same king is said to have reversed another decision about a contract by a man whose 100 coins had fallen into a well. The same work in another place (IV. 82–108) states how a brāhmana wife appealed to the king of Kashmir to find out the culprit who had murdered her husband in his sleep and how the king by superhuman means held a sorcerer to be the murderer.

When owing to pressure of other weighty business the king cannot attend to the work of administering justice, the king should appoint a learned brāhmana together with three sabhyas to decide the disputes of people. Vide Manu VIII. 9–10, Yāj. II. 3, Kāt. 63[349] (same as Śukra IV. 5. 12). The qualifications of a judge are set out in many places. Āp.[350] Dh. S. II. 11. 29. 5 prescribes that in law-suits judges shall be endowed with learning, good family, and should be old, clever, and careful about dharma. Nār. requires: 'The Judge should be proficient in the texts on the eighteen titles of law, their 8000 sub-heads, in logic (ānvīksiki) and should be master of the Veda and Smṛtis. Just as a physician takes out from the body an iron dart by the employment of surgical instruments, so a judge should extricate from a law-suit the deceit (underlying it)'.[351] Kāt. says that a judge should be restrained, born of a good family, impartial, not repellent (or harsh in his manners), steady, afraid of the next world, highly religious, assiduous and free from hot temper. A fine enumeration of the qualities required in a judge is given in the ancient drama Mṛcchakatika (IX. 4). Vide Mānasollāsa

---

349. यदा कुर्याच्च नृपतिः स्वयं कार्यविनिर्णयम्। तदा तत्र नियुञ्जीत ब्राह्मणं शास्त्रपारगम् ॥ दान्तं कुलीनं मध्यस्थमद्वेगकरं स्थिरम्। परत्र भीरुं धर्मिष्ठमुद्युक्तं क्रोधवर्जितम् ॥ काल्या. quoted in स्य. मा. p. 279, स्मृतिच० II p. 16, राज. र. p. 18 (first verse), मिता० on या. II. 3 (2nd verse), व्यवहारतत्त्व p. 196, शुक्र IV. 5. 12–13. Some read दक्षं कुलीनम्.

350. विवादे विद्याभिजनसम्पन्ना वृद्धा मेधाविनो धर्मेष्वविनिपातिनः। आप. ध. II. 11. 29. 5.

351. अष्टादशपदाभिज्ञस्तद्भेदाष्टसहस्रवित्। आन्वीक्षिक्यादिकुशलः श्रुतिस्मृतिपरायणः ॥ यथा शल्यं भिषक्छायादुद्धरेद्यन्त्रयुक्तिभिः। प्राड्विवाकस्तथा शल्यमुद्धरेदृज्यवहारतः ॥ नारद् q in स्मृतिच० II. p. 14. The 2nd is नारद् (III. 16). It is quoted as हारीत's in राज. र. p. 19.

II. 2 verses 93-94. A Judge was generally styled *prāḍvivāka* or sometimes *dharmādhyakṣa* (as in Rāj R p. 18),[352] or *dharmapravaktṛ* (Manu VIII. 20) or *dharmādhikārin* (as in Mānasollāsa II. 2. verse 93). Prāḍvivāka is an ancient word. It occurs in Gaut XIII. 26, 27 and 31, Nār.[353] (I 35), Brhaspati (q. by Aparārka p. 602). The word is a combination of '*prāḍ*' (one who puts questions to the suitors, from the root 'pracch') and '*vivāka*' (who speaks out or analyses the truth, from the root 'vac' with 'vi'). The derivation is given by Nār, Brhaspati, Kāt. 68 and others. The word 'praśnavivāka' (which is quite close to prādvivāka in sense and etymology) goes very far into antiquity and occurs in Vāj. S. XXX. 10 and Tai. Br III. 5 6. The existence of the word prāḍvivāka as early as Gautama (about 500 B.C.) and of praśnavivāka in the Vāj. S and Tai Br. clearly establishes that in ancient India judicial functions became separated very early from executive or political functions.

The chief Judge was preferably to be a learned brāhmana (Manu VIII. 9, Yāj. II. 3). Kāt. (67)[354] and Śukra IV. 5. 14 prescribe that, if a learned brāhmana cannot be had for the post of the chief judge, then a ksatriya or a vaiśya who knows the

354. ब्राह्मणो यत्र न स्यात्तु क्षत्रियं तत्र योजयेत् । वैश्यं वा धर्मशास्त्रज्ञं शूद्रं दूरेण वर्जयेत् ॥ कात्या q. by मिता० (on या II 3), अपरार्क p. 601, व्य मा 279, राज र. p. 23, स्मृतिच० II p. 17. The स्मृतिच० II. p 17 cites another verse where the first quarter is यत्र विप्रो न विद्वान् स्यात् and the other three are the same as above. शुक्र IV. 5 14 (यदा विप्रो न विद्वान्) is the same as this वेदव्यास IV. 44 defines ब्राह्मणव्रुव (which occurs in मनु VIII 20) 'गर्भाधानादिभिर्मन्त्रैर्वेदोपनयनेन च । नाध्यापयति नाधीते स भवेद् ब्राह्मणव्रुवः ॥'. कुल्लूक on मनु. VII. 85 explains यो ब्राह्मणः क्रियारहित आत्मानं ब्राह्मणं ब्रवीति स ब्राह्मणव्रुव.'.

dharmaśāstras may be appointed, but the king should carefully avoid appointing a śūdra as a judge. Manu VIII. 20 says that the king may prefer a brāhmana who is not learned and maintains himself by the mere fact of his caste, but should never have a śūdra as the expounder of dharma and that the country whose king has a śūdra as judge to expound dharma comes to ruin as a cow sinks in mud. Vyāsa (q. in S. V. p. 65) is to the same effect. Manu (VIII. 10-11), Yāj. (II. 3;), Nār. (III. 4) and Śukra IV. 5. 17 state that the king should appoint at least three sabhyas (*puisne* judges or members of the court of justice) to associate with the Chief Judge in the disposal of suits (the idea being that three are the least number of sabhyas to be appointed). Kaut. (III. 1) prescribes that the courts called '*dharmasthīya*' should be manned by three judges called *dharmasthas* who should possess the qualifications and status of amātyas and that such courts should be established on the borders of the provinces, for a group of ten villages (*saṅgrahana*), for a district (*dronamukha*, 400 villages) and provinces (*sthānīya*, 800 villages). Brhaspati says[355] that the sabhyas may be seven, five or three. As in the case of the chief judge, the sabhyas should be preferably brāhmanas, but they may be ksatriyas or vaiśyas. Manu (VIII. 11) and Br. say that when in a sabhā three brāhmanas learned in the Vedas sit along with the chief judge appointed by the king that is like the *sabhā* of Brahmā or it is like a sacrifice. Yāj II. 2, Visnudharmasūtra III. 74, Kāt. 57, Nār. III. 4-5, Śukra IV. 5. 16-17 and others require the following qualifications in the sabhyas: they should be endowed with the study of the Vedas, should know dharmaśāstra, should speak the truth, should be impartial to friend or foe, should be steady, devoted to their work, intelligent, hereditary, proficient[356] in arthaśāstra. Impartiality in the king and the judges is insisted on in the texts. Vide Vas. 16 5-5, Nār. (I. 34, III. 5) The king was not to appoint as sabhyas those who were ignorant of the usages of the country, who were atheists and devoid of the study of śāstras, who were either puffed up, hot-tempered, greedy or distressed (Br. q. in Sm. C.

355. लोकवेदाङ्गधर्मज्ञाः सप्त पञ्च त्रयोपि वा। यत्रोपविष्टा विप्राः स्युः सा यज्ञसदृशी सभा॥ बृहस्पति quoted in स्मृतिच० II. p. 15. It is also शुक्र० IV. 5. 26.

356. स तु सभ्यैः स्थिरैर्युक्तः प्राज्ञैर्मौलैर्द्विजोत्तमैः। धर्मशास्त्रार्थकुशलैरर्थशास्त्रविशारदैः॥ कात्या. q. by मिता० (on या. Vide शान्ति 83.2 for सभ्यगुण.

II. p. 15). The chief justice (*prādvivāka*) with the sabhyas constituted the Court, being appointed (*niyukta*) by the king It was stated above that the king was to enter the Hall of Justice with the chief justice, sabhyas and brāhmanas. The distinction is that sabhyas were appointed by the king as judges, while brāhmanas were persons who were well-versed in dharmaśāstra, who could attend the Court, though not appointed (*aniyukta*) and whose opinions on difficult points of law were respectfully received by the judges. They (the learned brāhmanas) were in the position of *amicus curiæ*. All and sundry were not to intermeddle in trials before the court, but only those who were learned in dharmaśāstra were allowed to express their opinions on knotty points. Vide[357] Mit on Yāj. II. 2. Manu VIII. 12–14 (same as Nār. III. 8–10 in a different order) say that either a person should not enter a *sabhā* or if he enters should say what is proper, that a man remaining silent or declaring what is false becomes a sinner and that, where in spite of the opinion of some or all sabhyas, justice is not done by the king, they become participators in the king's guilt. Kāt. (74–78) makes it the duty of the sabhyas to bring round a king gradually to the right path when the king is about to start on the path of injustice and to state the true decision.[358] In the case of the brāhmanas their duty ends with stating the rule according to the śāstras; they have not, like the sabhyas, to prevent the king from doing the wrong thing or to bring him round to the path of right and justice. Nār. (III. 1) states elsewhere that one who is not appointed by the king should not interfere by his speech in the decision of a case and that if he does so he would be fined. This applies to the people that are present in the court to see the trial or that accompany the litigants. It has no application to learned brāhmanas, who though not appointed by the king, can state their view of the law.[359] Vide Vyavahārasāra pp. 16–17. Nār. III. 17 requires that all the judges of the Court should give a unanimous decision, and that then only the decision leaves no grievance (in the

357. तत्र ब्राह्मणा अनियुक्ताः सभासदस्तु नियुक्ता इति भेदः। मिता. on या. II 2.

358. अन्यायेनापि तं यान्तं येऽनुयान्ति सभासदः। तेऽपि तद्भागिनस्तस्माद् बोधनीयः प्रयत्नेनृपः॥ अधर्माय यदा राजा नियुञ्जीत विवादिनाम्। विज्ञाप्य नृपतिं सम्यक्सदाकार्यं निवर्तयेत्॥ कात्या. q. in स्मृतिच० II p 21, राज. र. pp. 24–25

359. नियुक्तो वानियुक्तो वा धर्मज्ञो वक्तुमर्हति। यो वा यावं स वदति यः शास्त्रमुपजीवति॥ नारद III. 2 (= शुक्र IV. 5. 28)

mind of the litigants).[360] The V. P. (p. 27) states, following Jaimini XII 2. 22, that the opinion of the majority of sabhyas is to prevail.[361] According to Gaut.[362] XI. 25 as interpreted by Aparārka p. 599, if there is a difference of opinion among the judges, the king is to seek the advice of those who are learned in the three Vedas (along with the other *vidyās*) and decide the matter finally. Kāt. (58–59) states that the court of justice should have associated with the task of deciding disputes some merchants who belong to a guild, who are men of good family and character, of mature age, endowed with wealth and decent conduct and free from malice. The Mit. and Sm. C. say that this is done to placate the common people in the country.[363] This also shows the growing importance of the moneyed classes and of traders In the Mrcchakatika a śreṣṭhin and a kāyastha are associated with the Judge

The chief judge and the sabhyas[364] were not to hold conversation in private with any one of the litigants while the suit was pending and if they did so they were liable to be fined (Kāt. 70). Kaut IV. 9 prescribes fines and even corporal punishments for judges (*dharmasthas*) and pradestṛs who corruptly give wrong decisions, cause loss or sentence to corporal punishment. If the sabhyas[365] give a decision, which is opposed to smṛti and usage, through friendship, greed or fear, each was liable to be fined twice as much as the fine to be paid by the defeated party (Yāj. II. 4, Nār. I. 67, Kāt. 79–80). The Visnu Dh. S. V. 180 and Br prescribe banishment and forfeiture of all property for

sabhyas that give an unjust decision or take bribes Kāt 81 prescribes that the loss caused by the fault of sabhyas must be made good by them to the losing party, but the decision given by them will stand[366] Śukra (IV. 5 63-64) prescribes the punishment of a thief for a *lekhaka* (a scribe) taking down a different deposition from the one actually given or for a sabhya making use of such a deposition knowingly, IV 5 93 prescribes fine and removal from office if a sabhya gives a wrong decision through greed &c. and IV. 5. 282 prescribes a fine of 1000 panas against a judge giving a corrupt decision. There must have been a few cases of judges taking bribes in ancient India as in modern times (even Lord Bacon in the 17th century was found guilty of taking bribes as Lord Chancellor and confessed his guilt) In the Daśakumāracarita[367] (VIII. p 131) the cynical jester Vihārabhadra says to his king that judges decide matters just as they please after taking bribes and the king thereby incurs infamy and the sin of doing injustice It was believed that when a just decision was given, the king and the sabhyas became free from sin, the sin reaches him only who is guilty (whether plaintiff or defendant); but where an unjust decision is rendered a quarter of the sin falls on the litigant (plaintiff or defendant) who is guilty of *adharma*, one quarter each on the witnesses, the sabhyas and the king The Baud Dh S I.10 30-31, Manu VIII. 18-19, Nār (III 12-13) have the same two verses. The Vyavahāratattva (p 200) says that Hārīta also had the same verses In the Mattavilāsa-prahasana (pp. 23-24) reference is made to the giving of bribes to the presiding officers of courts (we should read '*adhikaraṇa-karaṇikānām*' instead of '— kārunikānām). Kaut IV 4 makes it a duty of the *samāhartr* to employ spies in various disguises to test the honesty of judges (dharmasthas) and magistrates (pradestrs) and, if they were found to be ready to succumb to bribes, to order their banishment

As to *sabhā*, vide pp. 92-93 above The Nirukta (III. 5) in explaining Rg. I. 124. 7 (*gartārug-iva sanaye dhanānām*) states that *gartā* means a wooden board or stump in a sabhā on which a sonless widow claiming her husband's wealth had to stand when claiming it.

366. सम्यग्दोषाद्यु यस्तद देयं सभ्येन तत्तदा। कार्यं तु कार्यिणामेव निश्चित न विचालयेत्॥ कात्या q. by स्मृतिच. II p. 23, स वि p 69

A court of justice was (acc. to Br.[368]) of four kinds, viz. one established (*pratiṣṭhitā*) in a fixed place such as a town, *apratiṣṭhitā* (not fixed in one place, but moving from place to place as on a circuit), *mudritā* (the court of a judge appointed by the king, who is authorised to use the royal seal), *śāstā* (or śāstritā, acc to S. V p. 68 and Par. M. III. p. 24) i. e. the court in which the king himself presides The Court of justice (in the capital) was to be to the east of the palace as stated by Śankha and Br. (in Sm. C. II. p. 19) and was to face the east The court-house should be decorated[369] with flowers, statues, paintings, idols of gods and should be furnished with incense, throne or seat (for the king or judge), seeds, fire and water (Br. in Sm C. II. p. 19). The sabhā was also called, as stated above, dharmādhikarana or simply adhikarana (in Mrcchakatika IX and the Kādambarī, para 85) or dharmasthāna or dharmāsana or sadas (Vas. 16. 2) The Kādambarī (para 85) speaks of the royal palace as having a court of justice where the judges (dharmādhikārins) sat on high cane seats The time for holding the court is the morning, acc. to Manu VII. 145, Yāj. I. 327. Kaut states that the king[370] should look into the disputes of people in the 2nd part of the day divided into eight parts. The Dasakumāracarita (note 367 above) shows the same thing. Kāt. (61-62) prescribes that the time for holding the court as laid down in the śāstras is three parts of the day after the first part (when the day is divided into eight parts) i. e. from 7-30 A. M. to noon. There were holidays on which courts were closed i. e on 8th and 14th *tithis*, Full Moon day and the *amāvāsyā* of every month (Samvarta acc. to Par. M. III. p. 23, Hārīta, acc. to S. V. p. 72). The sabhā is said to have ten *aṅgas*

It is probably such a hall decorated with statues and pictures that is referred to in the play Kundamālā (p. 10) 'शुश्रूषयितव्य प्रतिमागतो महाराजः' (in Prākrit), in which some scholars find a reference to the play called Pratimā, one of the Trivandrum plays. अधिकरणमण्डपगतैश्चार्यवैषरत्युद्धवेत्रासनोपविष्टैर्धर्ममयैरिव धर्माधिकारिभिर्महापुरुषैरधिष्ठितम् (राजकुलम्) । कादम्बरी para 85.

370 नाडिकाभिरहरष्टधा रात्रिं च विभजेत् । ... ... द्वितीये पौरजानपदानां कार्याणि पश्येत् । अर्थशास्त्र I 19; आद्यादद्वोष्टभागाद्यदूर्ध्वं भागत्रयं भवेत् । स कालो व्यवहारस्य शास्त्रदृष्टो मनीषिभिः ॥ काप्या. q. by अपरार्क p. 601, स्मृतिच. II. p. 27, स वि p. 72.

by Br.[371] viz the king, the chief judge appointed by him, the sabhyas, smrti, ganaka (accountant), lekhaka (the scribe), gold, fire, water and *svapurusa* (a bailiff, otherwise called sādhyapāla) The chief judge declares (the law), the king awards punishment, the sabhyas examine the dispute, smrti (dharmaśāstra) lays down the rule of decision, the success (of one party or the other) and the punishment; gold and fire are required for taking oaths, the water is for men when they feel thirsty, the ganaka counts the wealth or subject matter of dispute, the scribe writes down the pleadings, depositions and the decision, the *purusa* summons the sabhyas, the defendant, the witnesses and he guards the complainant and the defendant when they have furnished no surety (for appearance). It is further said that of these ten *angas* (limbs) the king is the head, the judge the mouth &c. Acc to Br. (q. in Par. M III. p 30) and Śukra IV 5 43 the accountant and the scribe were to be proficient in grammar, lexicography and counting, were to be pure (in character) and conversant with several alphabets Purusa was called sādhyapāla, who was to be hereditary, strongly built, a śūdra and obedient to the sabhyas (Vyāsa in Par M. III p 30, V P p 31) The ten angas enumerated above (viz. king &c) are respectively identified with the head, the mouth, the arms, the hands, the thighs (ganaka and lekhaka), the two eyes (gold and water), the heart, feet (Br. in V. P p 31, Hārīta in Rāj R p 20) In the Hall of Justice the king faces the east, the sabhyas, the accountant and the scribe respectively face the north, the west and the south (Br. in Par M III. p. 35, Vyavahārasāra p 25) Omitting the king and the chief judge the sabhā is said to have eight angas in certain works (e g. S V p 72) The chief justice, the sabhyas and the learned brāhmanas were probably elderly people, as great emphasis is laid on this by Nār. (III. 18) and Udyogaparva 35.58 'that is not a real sabhā where there are no elderly men &c'[372].

371. नृपाधिकृतसभ्याश्च स्मृतिर्गणकलेखकौ। हिमाग्न्यम्बुस्वपुरुषाः साधनाङ्गानि वै दश॥ ... वक्ताध्यक्षो नृप॰ शास्ता सभ्याः कार्यपरीक्षकाः। स्मृतिर्विनिर्णय ब्रूते जयदान दमं तथा। शपथार्थे हिरण्याग्नी अम्बु तृषितजन्तुषु। गणको गणयेदर्थं लिखेल्लेखकन्यायं च लेखक॰। प्रत्यर्थिसभ्यानयन साक्षिणा च स्वपूरुषः। कुर्यादलग्नको रक्षेदर्थिप्रत्यर्थिनौ सदा॥ बृहस्पति q in अपरार्क p 600, स्मृतिच॰ II p 20, परा मा III p 31, राज र (pp 20–21) attributes these to हारीत Vide शुक्र IV 5 38–42 for the verses up to लेखक॰.

372 न सा सभा यत्र न सन्ति वृद्धा वृद्धा न ते ये न वदन्ति धर्मम्। नासौ धर्मो यत्र नो सत्यमस्ति न तत्सत्य यच्छलेनानुविद्धम्॥ नारद III 18 = उद्योगपर्व 35 58 (reads यच्छलेनाभ्युपेतम्). Acc to a verse quoted from the राजधर्म by the भाष्य on सत्या॰ श्रौ सू a सभा is of three kinds सभास्तु तिस्रो विज्ञेया धर्मस्यैका च कर्मण॰। तथा राजसभेत्येता विद्वद्भिः परिकीर्तिता॥ The first (धर्मसभा) dealt with व्यवहार and प्रायश्चित्त, the 2nd (कर्मसभा) was a hall where sacrifices were performed and the 3rd (राजसभा) was the royal *durbar* attended by brāhmanas, warriors, royal officers and servants.

In the drama Mrcchakatika (Act IX) we have a graphic, though brief, description of judicial procedure in ancient India. That drama is at least as old as the 4th or 5th century A. D. It is very instructive to compare the procedure described in it with that gathered from Nār., Br. and Kāt. who constitute the leading triumvirate on law and procedure in the smrtis and who probably flourished a little before and a little after the drama. It will be found on comparison that the procedure in the drama is in essentials the same as that of the three smrtis mentioned above, though there is some difference in minor details. The principal points in the drama bearing on judicial administration may be brought together here at one place. The court house was called 'adhikarana'; the chief judge was called adhikaranika; he was assisted by the *śresthin* (a prominent merchant or banker) and a *kāyastha*; all three are referred to as 'adhikaranabhojaka' and are addressed as *adhikrta* or *nyukta* (appointed by the king); when a despot was on the throne, the judge's position was precarious and he could be deprived of the post at the king's sweet will (the Śakāra, king's brother-in-law, threatens the chief justice with summary dismissal). There was a servant who arranged the seats in the court, inquired whether there was any litigant, summoned Vasantasenā's mother and Cārudatta (this man corresponds to the purusa or 'sādhyapāla); inquiry was made by the judges as to whether any one wanted to file a suit or complaint; the śresṭhin and kāyastha are asked by the presiding judge to write down the important parts of the complainant's statement; a private person (who was not a relative) could complain to the court about an alleged murder; the judge allowed an old person like the mother of Vasantasenā and a respectable and well-known citizen like Cārudatta to occupy a seat when replying to questions from the court, but Cārudatta was deprived of this concession when a *prima facie* case was made out against him; the court-house (being probably situated near the palace) had near it mantrins, dūtas, spies, an elephant and a horse (and the chief of the city police is asked to ride the horse and find out whether the corpse of a woman lay in the public garden), and kāyasthas; Cārudatta was called upon to state the truth and the judge tells him that in the court no trick (*chala*) will be allowed to pass;[373] when a strong case was

373. Compare छलं निरस्य भूतेन व्यवहारान्नयेन्नृपः। याज्ञ. II. 19; भूतच्छलाकुलात्स्विद्यात् द्विगतिः सहसादृतः। नारद I 29, न तु शिष्टं छलं राजा मर्षयेद्धर्मसाधनः। भूतमेव ब्रूयात् धर्ममूला यतः श्रियः॥ नारद I. 31.

made out against Cārudatta by circumstantial evidence he was asked to confess his guilt, otherwise he was told that he would be whipped (i.e this refers to whipping to extort a confession, vide above note 332); the judge was only to pronounce the judgment and recommend the legal punishment, while the king had the last word about the exact punishment, Manu's work was an authority; a brāhmana offender was not to be sentenced to death, but was to be banished with all his wealth, though some kings did not act up to this rule; impalement was carried out by cāndālas, ordeals of fire, water, poison and balance were known and Śūdraka conveys (*visasalilatulāgniprāthite me vcāre*) that Cārudatta had prayed for trial by ordeal, but that the chief justice, because there were witnesses and circumstantial evidence, refused that request.

The court so far described (i. e. where the king or the chief justice appointed by him presided) was the highest court. But other tribunals were recognized in the smrtis and digests Yāj. I 30 and Nār. (I. 7) state[374] that law-suits may be decided by village councils (*kulāni*), corporations (*śrenī*), assemblies (*pūga* in Yāj, *gana* in Nār.), the judges appointed by the king and the king himself, each later one being superior to each preceding one The first three were practically arbitration tribunals like the modern *panchayats* The several words here require explanation and they have been differently interpreted by different digests Medhātithi on Manu VIII 2 explains these words at great length Acc to him 'kulāni' means 'group of relatives' and also (acc. to some) 'impartial persons' (madhyasthapurusāh) and '*gana*' means 'builders of houses and mansions or brāhmanas dwelling in mathas'. Acc to the Mit and V P. p 29 'kulāni' means 'an assembly of the relations, agnatic and cognatic, of the litigants', acc. to the Sm. C. it means 'the agnates of the parties'; acc. to Aparārka it means 'husbandmen'. It appears likely that 'kulāni' means officers who presided over a group of eight or ten villages and who were granted the produce of one *kula* of land as their salary. Vide Manu VII. 119 and Kullūka thereon and Dāmodarpur plate of Gupta year 124 in which the head of the district (visayapati) is said to have been assisted by the nagaraśresthin, prathama-kulika and prathama-kāyastha (E. I. 15 p. 130) and

374 कुलानि श्रेणयश्चैव गणश्चाधिकृतो नृपः । प्रतिष्ठा व्यवहाराणा गुर्वंग्यस्तूत्तरोत्तरम् ॥ नारद (I. 7).

'grāmāsta-kul ādhikaranam' in E. I. vol. 17 p. 345 at p. 348 in the reign of Ku māragupta I. From the Sanchi stone Inscription of Chandragupta II (of the Gupta year 93 i. e 412–13 A D.) it appears that *panchayats* were called 'pañcamandalī' (Gupta Inscriptions pp. 29, 31). 'Śreni' means, acc. to most commentators, 'the corporation of persons following the same craft or avocation, though they may belong to different castes' such as horse-dealers, betel-leaf sellers, weavers and dealers in hide. Acc. to the V. M. p. 280, 'śreṇi' is an association of artisans or traders'. 'Pūgas' are assemblies of men of one place (a village or a town) belonging to different castes and following different avocations. Kāt (225 and 682) distinguishes between *gana* and *pūga* which he respectively defines as 'assembly of families' (*kulas*) (Sm. C. II p. 18, Par. M. III. p. 352) and 'assemblies of traders and the like' (V. R. p. 668) V. P. p. 30 says *gana* and *pūga* are synonyms The king was thus the highest court of appeal and next to him was the court of the judges appointed by him. Brhaspati (S. B. E. vol. 33 p. 281 verse 28) ordains[375] that the kulas, śrenis and ganas that are well-known to the king may decide the disputes of litigants except those that fall under *sāhasa* and that it was only the king who could carry out the order for fines or corporal punishments, i. e the arbitration courts could only decide disputes not involving *sāhasa* and they had no power to execute their decrees about fines and corporal punishments, but that their decisions had to be filed with the king, who, if he did not disapprove of them, put them into execution. Pitāmaha[376] appears to mention three classes of State courts, while Yāj and Nār. refer only to two (viz. that of the chief justice and that of the king himself): 'a dispute decided in a village may be taken to the city and one examined in the city (court) to the king; a dispute decided by the king whether correctly or incorrectly cannot be reviewed.' It is distinctly

375. वाग्दण्डो धिग्वृमश्चैव विप्रायत्तावुभौ स्मृतौ। अर्थदण्डवधावुक्तौ राजायत्तावुभावपि। राज्ञा ये विदिताः सम्यक्कुलश्रेणिगणादयः। साहसन्यायवर्ज्यानि कुर्युः कार्याणि ते नृणाम्॥ बृह in स्मृतिच० II. 20, परा मा III. p 32, स वि p 68, व्यव. सा. p. 22 For the first, vide शुक्र IV 5. 279 and the second is शुक्र IV. 5. 30 which reads साहसस्तेयवर्ज्यानि.

376. ग्रामे दृष्टः पुरे यायात्पुरे दृष्टस्तु राजनि। राज्ञा दृष्ट कुदृष्टो वा नास्ति तस्य पुनर्भवः॥ पितामह in स्मृतिच. II. p 19, परा मा. III. p 42.

provided by Br.[377] (S B. E. vol 33 p. 282 verse 31) that the sabhyas are superior to the *kulas* and the rest, the chief justice is superior to sabhyas and the king is superior to all Pitāmaha[377a] provides that when a litigant is not satisfied with the decision given by a kula tribunal or the others, he can carry the matter by way of appeal to the king. Besides these courts it appears from Kautilya that the village headman (*grāmika* or *grāmakūta*) exercised certain summary powers such as driving out of the village a thief or an adulterer (III. 10) and that he could try some offences (IV. 4, *grāmakūṭamadhyakṣam vā satrī brūyāt &c.*). Even in the 20th century in the Bombay Presidency under the Village Police Act (Bombay Act VIII of 1867) the village headman (called Police Patil) has the authority to try and on conviction to punish with confinement for a period not exceeding twenty-four hours any person charged with the commission of petty assault or abuse within the limits of a village and the person convicted has no right of appeal to any court or magistrate against such conviction and only the High Court has the power to entertain a petition for revision (which it hardly ever does). Bhrgu[378] quoted in Sm. C II. p 18 and other digests says that there are ten tribunals common to all men viz. the village people, the assembly of the citizens of the capital, gana, sreni, men learned in the four vedas (or *vidyās* viz. ānvīksiki and the rest), the *virgins*, *kulas*, *kulikas*, judges (appointed by

the king) and the king himself. The *vargins*[379] are the groups of various kinds such as ganas, pūgas, vrātas, srenis and others Kulikas may be the elders of the families of the plaintiff and the defendant. In the Dāmodarpur plates (E. I. 15 p 130) we come across one Dhrtimitra who is described as 'prathamakulika'. The word 'pañcakula' was applied to certain high officers in Gujarat and Kathiawad; vide I. A, vol. 11 p. 220 (Abu Ins. of Bhīmadeva dated Vikrama year 1265) and Tawney's translation of the Prabandha-cintāmani pp. 18, 84, 129, 149, 190 for 'pañcakula'. The provisions about the conflict between customs and usages on the one hand and *śruti* and *smrti* on the other will be dealt with in detail later on in another section. A few words may be said here about conflicts between smrtis. In disputes between residents of the same country, the same city or the same hamlet of cowherds or of the same capital or village, the decision should be according to their own conventional usages, but in disputes between these and others (who are not residents of those respective places) the decision must be in accordance with the sacred texts[380] (Kāt. 47 q in S. V p 72, Par. M. III. p. 41). Another rule is that when there is an apparent conflict between two smrtis, reasoning is to decide in ordinary life which should be followed or reasoning based on the actions of the aged and the experienced is to decide what text to follow (Yāj. II 21) and the business of the interpreter consists in holding that one of the smrtis contains a general rule and the other an exception or that the two apply to different sets of circumstances (visaya-vyavasthā) or that an option may be intended. Voluminous glosses have been written on this one text of Yāj II. 21 right from Viśvarūpa in the 9th century downwards Another rule is that in the administration of justice dharmaśāstra rules have superior force to those of arthaśāstra This has been already referred to above (p 9) Bhrgu further provides that foresters may get their disputes settled by foresters, members of caravans by other members, soldiers by (a tribunal of) soldiers and those who stay in a village as well as in a forest may get their disputes settled either by villagers or by foresters by mutual

agreement and that the five tribunals for foresters and others are *kulikas* (high officers or heads of families), *sārthas* (members of caravans), headmen, villagers, citizens The texts further provide that in certain cases the court was to call in aid outsiders to help in deciding disputes. Vyāsa[381] says: 'In the case of disputes among traders, artisans, husbandmen and actors it is impossible for others to give a (correct) decision, hence such matters should be got decided by experts in those various matters' Br. states that in disputes among husbandmen, craftsmen (carpenters and the like), artisans (like painters), money-lenders, guilds, dancers, sectarians (like Pāśupatas) and criminal tribes the decision should be made with the help of those who understand the conventions made by them and their usages. In disputes about the boundaries of villages and about fields in a village, four, eight or ten neighbours were to settle the boundaries (vide Manu VIII. 258, Kaut. III. 9, Yāj. II. 150-152). Kaut. 1 19 and Br.[382] (q in V P. p. 23) say that disputes between those who have performed austerities or between those who are adepts in witchcraft and Yoga should not be decided by the king (unaided), but with the help of those learned in the three Vedas, as otherwise they may feel offended These quotations show that certain people could claim to be tried by their peers or at least by a jury. This jury system was resorted to for settling complicated questions of fact It is a very ancient system, being mentioned even by Gautama[383] XI. 21-22 'the king, having received help from the heads of husbandmen, merchants, cow-herds, money-lenders and artisans as regards disputes in their own groups, should finally decide what is just'.

It has already been stated above that the king is to decide according to the smrtis He has also to take into consideration the duties and usages of the several varnas and the eighteen low

castes[384] (acc. to Manu VIII. 41 and Hārita). The eighteen low castes said to be outside the pale of the four varnas and āśramas are enumerated by Pitāmaha, viz. washerman, shoe-maker, nata (dancer caste), bamboo-worker, fisherman, mleccha, bhilla, ābhīra, mātanga and nine others (the names of which are not given here as the text is corrupt).

The foregoing gradations of tribunals did not all exist at all times in ancient and medieval India. One thing is, however, quite clear There was always a court of the Chief Justice appointed by the ruling power and final appeal lay to the ruler himself. But as regards inferior tribunals usage varied. For example, it appears from a decision of 1742 in which a ruling of king Shivaji about a Kulkarni *vatan* is set out that in Shivaji's time disputes could be taken before three different but inferior tribunals, viz the *got* (i. e. the assembly of castemen) which is somewhat like the *kula* tribunal of the smrtis, or before arbitrators hailing from a place other than where the dispute took place or before the officers, *balutedars* and chief men of several villages round about.[385]

Manu (VIII 23) prescribes that the king fully dressed and with an undisturbed mind, after taking his seat in the Hall of Justice, should perform obeisance to the gods, the guardians of the (eight) quarters (Indra and others, as specified in Manu VII 4) and should then commence the work of looking into the legal business The transaction of legal business has four stages (from the king's or judge's point of view) viz. first receiving information from a person, then finding out under what title of law (vyavahārapada) the information falls, then consideration of the pleadings of the parties and the evidence

led by them and lastly the decision.[386] When a litigant comes before the court at a proper time (i. e. when the court is sitting) and makes his bow, he (the king or judge) should[387] address him as follows.—" What is your business? What is the injury done to you? Don't be afraid, speak out, man! By whom, when, where and why (was the injury caused)? When thus asked whatever he replies should be considered by (the judge) with the sabhyas and brāhmanas and if the matter be legally entertainable he (the judge) should deliver the seal (sealed order) to the plaintiff or order the bailiff to summon (the defendant)". These observations are made by Kāt (86-88) Whatever a man, being excited by one of the emotions of love (or anger or greed), says before the court, should be first written down on a board or the like by the scribe (Nār [388] II 18)

Very elaborate rules are laid down about the summoning of the defendant or accused by Nār. (I. 52-54), Br, Kāt (96-100), Śukra (IV. 5·102-106) and others. A few of the rules are set out below. The first person to be summoned is the one against whom a complaint based on suspicion or truth is made by the plaintiff or complainant But other persons may be called as defendants[389] either when the person proceeded against by the plaintiff puts forward another as liable to plaintiff's claim or makes another liable along with himself or when another person is accepted by the plaintiff (on behalf of another who is a minor &c.) or (acc. to the Madanaratna) another person himself comes forward (as defendant) The king should not require the personal appearance of the following persons the diseased, minors, very old (beyond 70), one in a calamity, one engaged in some

religious rite, one who would suffer irreparable loss by coming, one in misfortune (such as the death or disappearance of a dear relative), one engaged in the king's business or in a (religious) festival, one intoxicated, a lunatic, one distressed, a servant, a woman[390] who is young and whose family is in straitened circumstances or who is of good family or who is recently delivered, a maiden who is of a higher caste than that of the complainant. Nār. (I. 53) prescribes that cowherds when it is the season for taking cows for grazing, agriculturists in the sowing season, artisans actually engaged in work and soldiers engaged[390a] in war should not be summoned to appear in person, while so engaged. In these cases some one on their behalf should be summoned as a representative. But it is provided that even these persons may be summoned with proper safeguards in important cases or grave charges, such as the killing of human beings, theft, rape, eating forbidden food, counterfeiting coins, high treason &c. But women who by their earnings support their families, unchaste women, prostitutes, women without family and women excommunicated for grave sins may be summoned to appear personally[391]. A person who is summoned and is able to appear but does not appear in person was to be fined according to the value or importance of the subject matter of dispute e. g. in slight causes fifty (copper) panas, two hundred at least in the cases of middling value and 500 panas at least in heavy causes (vide Kāt. 100-101 quoted by Sm. C. II p 34, Aparārka p. 607.) After taking the fine and waiting for 30 days or a month and a half the king may give a judgment in favour of the plaintiff, due to defendant's default. But if the defendant does come after that time, the suit may be restored and proceeded with.[392] But when there is an invasion by an enemy or a famine or an epidemic or disease the king should not impose a fine, but send a second summons. In the case of those who are exempted from personal appearance (as above) their relatives (son, father &c.) or some other person

390. Compare sec. 132 of the Indian Civil Pro. Code (Act V of 1908) for exemption of certain women from personal appearance.

390a. Compare the Indian Soldiers (Litigation) Act (IV of 1925).

391. Vide Mit. on Yāj II. 5 (for quotations about most of these rules), Aparārka p 606, Par. M. III p 51, Vyavahāra-mayūkha pp 9-10.

392 एवं दण्डमादाय त्रिंशद्रात्राद्ऊर्ध्वं त्रिपक्षाद्वादशवन्धार्थं (त्रिपक्षाद्वा दशवन्धं ?) गृहीत्वा हानिनिमित्तजयपत्रं दद्यात्। एवं कृते यदि प्रतिवाद्यागच्छति पुनरपि व्यवहारदर्शनं कर्तव्यमिति। स्य. नि. p. 29

appointed by them (such as a pupil, servant &c.) or one who can be recognised as their agent may be allowed to appear [392a] But no representative was allowed in serious charges cited above (vide Kāt 93–95 q by Aparārka p. 639, Sm C. II p 34). If a father, brother, a friend, or a relative appears before the court for the real litigant, the law-suit may be proceeded with (Prāmaha) Whoever carries on anything through another by appointing him to that task should be understood to have done it himself and the business transacted by such a representative or agent cannot be annulled If a person who is not a brother nor father nor son nor appointed to represent another prosecutes a law-suit for another, he is liable to be fined[393] As the king was supposed to be the guardian of a minor's wealth, it appears from this that a king could have appointed a guardian for the suit when a minor was concerned. The above provisions show that maintenance and champerty were not encouraged by ancient Hindu lawyers.

An interesting question arises whether lawyers as an institution existed in ancient India The answer must be that so far as the smrtis are concerned, there is nothing to show that any class of persons whose profession was the same as that of modern counsel, solicitors or legal practitioners and who were regulated by the State existed. This does not preclude the idea that persons well-versed in the law of the smrtis and the procedure of the courts were appointed (*niyukta*) to represent a party and place his case before the court The procedure prescribed by Nār, Br and Kāt reaches a very high level of technicalities and skilled help must often have been required in litigation. In the com of Asahāya as edited by Kalyānabhatta on Nār. (rnādāna 4) there is an instructive story from which it appears that persons who had studied the smrtis helped parties in return for a monetary consideration to raise contentions

before the court. But there also the helper comes forward saying that he is a very old friend of the family and has been appointed by the party to represent him. So he corresponded to what is called a recognized agent in the Indian Civil Pro. Code, Order III r 2 (Act V of 1908). In Śukra IV. 5. 114–117 some important rules are given:[394] the person who is appointed to represent a party should get as his wages 1/16, 1/20, 1/40, 1/80 or 1/160 part of the amount in dispute, that the wages become less and less as the claim in dispute becomes higher or if several persons employ one representative; one who knows dharmaśāstra and the procedure of law-suits should be appointed as representative and not any one who is deficient in these; if the representative takes wages without knowing these he should be punished by the king. A representative is to be appointed by the party and not by the king at his will; if the representative allows the matter entrusted to him to fail owing to his greed he is liable to be fined[395]. In the 'Questions of Milinda' (S. B.

394. नियोगि (जि?) तस्यापि भृतिं विवादात् षोडशांशिकीम् । विंशत्यंशां तदर्धां वा तदर्धां च तदर्धिकाम् ॥ यथा द्रव्याधिकं कार्यं हीना हीना भृतिस्तथा । यदि बहुनियोगी स्यादन्यथा तस्य पोषणम् ॥ धर्मज्ञो व्यवहारज्ञो नियोक्तव्योऽन्यथा न हि । अन्यथा भृतिं गृह्णन्तं दण्डयेच्च नियोगिनम् ॥ कार्यो नित्यो नियोगी न नृपेण स्वमनीषया। लोभेन स्वन्यथा कुर्वन् नियोगी दण्डमर्हति ॥ शुक्र IV. 5. 114–117. The words भृतिं गृह्णन्तं present a difficulty. Probably there is a compound of भृति with गृह्णन्तम्.

395 The story in the com. on Nār. is as follows: In Pātaliputra (modern Pātnā) a brāhmana named Śrīdhara acquired with great trouble a fortune and lent to a trader named Devadhara ten thousand *drammas* at the rate of 2 per cent per month When one month passed Devadhara paid as interest 200 drammas. When the 2nd month was running, Devadhara died of high fever, his son died of cholera and only the great-grandson of Devadhara, by name Mahīdhara, remained. He was a very young man addicted to gambling and other vices His property was taken under their protection by his maternal uncles They were advised hy a brāhmana who had a smattering of smrti lore and was called Smārtadurdhara 'Don't pay even a rupee to the creditor Śrīdhara I shall save you even in Court by citing appropriate texts' The uncles replied 'if you save us, we shall give you a thousand *drammas* as a reward' When the 2nd month passed (from the date of borrowing), Śrīdhara called upon the uncles to pay 200 drammas as interest for the 2nd month. They replied 'You cannot claim even the principal (from the great-grandson of the original horrower), much less interest'. Smārtadurdhara, the legal adviser of the uncles, said "Nārada declares (rnādāna 4) 'grandsons should pay the debts of the grandfather; that (debt) ceases from the fourth'. On hearing this Śrīdhara was stunned, but gathering his wits filed a suit in the court and had summonses issued

(*Continued on the next page*)

E vol 36 p. 238) there is a passage about certain *bhikkhus* in the 'city of Righteousness' (*dhammanagara*) who are styled 'dhammāpanikas' (dealers in dharma) and are described as follows: '(Bhikkhus), who in the spirit and the letter, in its arguments and explanations, its reasons and examples teach and repeat, utter forth and recapitulate the ninefold word of the Buddha; such bhikkhus are called, O king, lawyers in the blessed one's city of Righteousness' and on p 239 there are 'dhammasetthino' (bankers of dharma), which word reminds us of the sresthin in the Mrcchakatika. The dhammāpanikas probably correspond to such lawyers as Smārtadurdhara mentioned above The rules of Śukra make a near approach to the modern institution of the Bar and the fees prescribed by Śukra are similar to those allowed by the Bombay Regulation II of 1827 and by Schedule III to the Bombay Pleaders' Act (Bombay Act XVII of 1920) The first legislative enactment in India to deal with lawyers for representing parties passed by the British Government was the Bengal Regulation VII of 1793 which defined the privileges, the fees (five per cent up to 1000 and then on a sliding scale) and responsibilities of *vakeels* (which word originally means 'agent').

The plaintiff may put under restraint till the approach of the summoner (the bailiff) by the king's order the defendant, who does not stand up to meet the claim (i e, is about to abscond or may abscond) that is to be investigated (or when the plaintiff spoke to him about the claim before coming to court) and

---

(*Continued from the last page*)

to Mahidhara, great-grandson of Devadhara, and his uncles Sureties were taken from both sides The uncles were asked (by the court) 'why don't you pay the interest to Śridhara'? They appointed as their representative Smārtadurdhara, who said that he and his ancestors were friends of the family of Mahidhara and so he addressed the court 'I rely on Nārada's words (quoted above), and Mahidhara being the fourth from Devadhara (including the latter) is not liable to pay' Bhatta Smārtaśekhara laughed at this and said 'Smārtadurdhara, you are not deeply learned in the smrti texts nor have you studied glosses thereon The whole of the debt of 10000 drammas lent by Śridhara is still due from Mahidhara, as he is the great-grandson of the borrower, as three male descendants of the borrower are liable to pay the ancestor's debt and as Nārada means only this that the son of the great-grandson (who is the fourth from the borrower, excluding the latter from computation) is not liable to pay the debt of his great-great-grand-father' and the learned speaker charged him with having been promised a gratification. Smārtadurdhara and his proteges lost the case.

who disregards the words of the claimant. This is called *āsedha* which is explained by the Mit. on Yāj. II. 5 as restraint under the king's order. It is of four kinds viz. restraint as to (*sthāna*) place (e g. you are not to go elsewhere from your house or a temple), as to time (e. g. you must present yourself on the 5th of a certain month), restraint from going on (*pravāsa*) a journey (till the suit is decided) and restraint from doing certain actions (e. g. you are not to sell certain property or to plough a certain field till the disposal of the suit)[396]. The rules about āsedha are laid down by Nār. (I. 47-54), Br. (q. by V. P. p. 42, Sm. C II. pp. 30-31), Kāt 103-110 (all quoted by V. P. pp 41-42, Sm. C. II. pp. 30-31) Nār. (I. 54) states that those persons whose personal appearance is dispensed with as stated above are not to be subjected to āsedha Nārada provides that he who disregards the prohibitory order (āsedha) of the court should be punished and that he who obtains a restraint order against a person that should not have been thus proceeded against should also be punished. Acc to Kāt. that man who restrains the defendant so as to prevent him from exercising his limbs or from talking or breathing freely should be punished and not the defendant if he breaks such restraint. A defendant would not be liable to be fined, if he disregards a restraint order which ties him down to a river ford, or to a forest, to a bad place (infested by thieves and tigers) or at the time of an invasion (Nār I 49) There is a provision which looks like one for the appointment of a Receiver in modern times. Kāt. (120) says 'A king should not allow a litigant to proceed if the litigant retains the property or money which he has (been shown to have) seized: it should be delivered over to the opposing litigant (if he be trustworthy)' or it may be kept with a third person (as receiver for the successful party)[397] When the defendant comes on being summoned, he and the plaintiff are both to be placed before the judges (Pitāmaha q. in Sm C II p 34) Then a surety is to be taken from both who would be capable of carrying

396. It should be noted that these provisions about *āsedha* are analogous to those about attachment or arrest before judgment (section 94 and Order 38 of the Indian Civil Pro Code of 1908) and temporary injunction (Order 39 of the same).

397. गृहीतग्रहणो न्यायो न प्रवर्त्यो महीभुजा। तस्य वा तत्समर्प्यं स्यात्स्थाप्यं वापि परस्य तत्। कात्या q in स्मृतिच. II. 5 35, विवादचन्द्र p. 94, which explains 'अर्थिना प्रत्यर्थिसकाशाद्विवादपदमानीयते तदा यावत्प्रत्यर्थिनि मध्यस्थे वा न समर्प्यते तावद्विवादो न प्रवर्त्यः। गृहीत॰। गृह्यते इति ग्रहणं विवादपदं तद्गृहीतं यत्र स गृहीतग्रहणः। तस्य प्रत्यर्थिनः कृते (इत्ते?) तत्समर्प्यं परस्य मध्यस्थस्य स्थाने वा स्थाप्यमित्यर्थः।'

out the decree made by the court i. e who would be able to pay the amount of fine to the king if the defendant denied the plaintiff's claim or who would be able to pay double the amount of the claim if the plaintiff's claim be found to be false (Yāj. II 10–11) If any one of the parties cannot offer a surety, then he has to be kept in the custody of the court's bailiff (sādhyapāla) and has to pay the daily wages of the bailiff at the end of every[398] day (Kāt 117 q. by Mit on Yāj II 10) The following persons could not be accepted as sureties (Kāt. 114–116 q. by Mit on Yāj II 57) 'the master (in the case of a party being a servant), an enemy, one authorised by the master, one arrested, one fined, one accused of grave sins or offences, one who is a co-sharer in family property, a friend, one who is a perpetual student, one who is appointed to do the king's business, ascetics, one who would not be able to pay the amount decreed and the fine to the king, one whose father is living, one who incites the party for whom surety is demanded, one whose antecedents are unknown' When a person (of any caste) is kept guarded for want of a surety he is not to be prevented from doing necessary and obligatory acts (bath, *sandhyā* worship &c) and if he runs away from the guard he should be fined eight panas (Kāt 119 q in Par M III 58).

When the defendant comes before the court, the information at first given by the plaintiff is to be written down accurately in his presence together with the year, month, fortnight, day, names (of parties), caste &c (Yāj II. 6) When the aggrieved party first comes to the court, all that is taken down is the matter in dispute (i e the draft of the plaint), when the defendant comes, the plaint is written down with all details (including the grievance as stated in the beginning).[399] The plaint is called by various names in Sanskrit viz. *paksa, bhāṣā, pratijñā* (Mit on Yāj II 6) Sometimes the word 'pūrvapaksa' is used for paksa (as in Kāt 131, Nār II. 1) *Vādin* and *prativādin* generally mean the plaintiff and the defendant, though vādin sometimes means 'a litigant' (either the plaintiff or defendant) *'Arthin'* (one who seeks the assistance of the court) and *abhyoktr* (attacker) are synonyms of *vādin*, and *pratyarthin* and *abhyukta* (attacked) are synonyms of *prativādin* Kāt.

398. अथ चेत्प्रतिभूर्नास्ति कार्ययोग्यस्तु वादिनः । स रक्षितो दिनस्यान्ते दद्याद्भृत्यांश्च वेतनम् ॥ कात्या quoted by मिता. on या II. 10 and V P. p. 44

(130–131) says that the judge[400] should have the plaint written down on a board (or on the ground) with a piece of chalk as narrated naturally by the claimant and then on a leaf (palm leaf or bark or paper) when it is corrected (after the defendant appears) and that the plaintiff may delete some matters from the original (draft of) plaint and may fill in gaps and that such amendments may be made in the draft till the plaint is finally settled.[401] It appears from the Vyavahāratattva (p. 205) that the pleadings (the plaint and the reply) could be written down in Sanskrit or in the vernacular of the parties if they were ignorant The Mrcchakatika (Act IX) shows how the presiding judge asks the śresthin and kāyastha to write down the words 'not by me' as the complaint of the Śakāra when the latter averred that Vasantasenā was killed by Cārudatta and not by himself The plaint could be amended till the filing of the reply[402] (Nār II 7). Elaborate rules are laid down about the contents of the plaint by many writers from Kautilya (III. 1) downwards. Kaut[403] states that in the plaint should be entered the year, season, month, fortnight, day, the documents (to be relied upon), the court (in which the plaint is lodged), the (amount of) debt (or other money due) and the country, village, caste, family, names and occupations of the plaintiff and defendant together with the relationship in which they stood to each other. Kāt (127–128 q by Mit on Yāj II. 6 and Aparārka p 608) requires that in suits about immoveable property, ten details should be recorded in the plaint viz the country, the place (town or village in which the property is situated), situation (boundaries or the figure such as a square &c.), the caste (of both parties), names,

the dwelling place (of the parties), the measure (so many *nivartanas* &c), the name of the field, (names of) the father, grandfather and great-grand-father, mention of the former kings Kāt. 124–126, Br (q in Sm C. p. 36 and V M p. 294) give further details, which are passed over for want of space. All the details enumerated above need not occur in every plaint, but the necessary ones must be stated according to the facts of each case[404].

These rules about the contents of plaints are very similar to those in the Indian Civil Pro. Code, Order VII rules 1–5

In modern India no suit or appeal can be filed unless the plaintiff or appellant pays substantial court-fees (Rs 7½ per cent upto Rs 1000 and 5 per cent for higher claims up to 5000 and so on at reduced rates as the claim rises) It is interesting to see how the litigants in ancient India fared in this respect It appears that in disputes of a criminal nature no court fees had to be paid in ancient India The person found guilty had to pay to the king the fine declared in the Smrtis for offences or awarded by the Court. As regards civil disputes also nothing had to be paid at the inception of the suit Certain rules are prescribed by Kaut (III 1), Yāj, Viṣnudharmasūtra, Nār and others about payments to the king after the suit is decided, which payments may be regarded as in the nature of court fees Yāj II 42 and Viṣnudharmasūtra VI. 20–21 state that in the case of suits for the recovery of debts the debtor who admitted that he was a debtor (but did not pay the creditor) should be made to pay to the king 10 per cent on the amount decreed and the successful creditor should pay five per cent out of the amount decreed (as *bhṛti*, compensation or court fee)[405]. When the debtor denies the fact of debt altogether and the creditor succeeds in establishing it, the debtor had to pay the amount decreed to the creditor and an equal amount to the king as fine, but if the plaintiff turns out to be a false claimant (i. e. the relationship and the amount of the debt are not proved) he had to pay to the king as fine twice as much as the amount claimed by him (Yāj II 11) Nār also (IV 132) says[406] that a debtor, who is able to repay a debt but does not

404. येषा मध्ये यानि साधकबाधकप्रमाणोपन्यासोपयोगीनि यत्र भवन्ति तत्र तान्येव लेख्यानि न सर्वाणि प्रयोजनाभावात् । अपरार्क p 608

405 उत्तमर्णश्चेद्राजानमियात्तद्विभावितोऽधमर्णो राज्ञे धनदशभागसमित दण्डं दद्यात् प्रातार्थश्चोत्तमर्णो विंशतितमसंशम् । विष्णुधर्मसूत्र VI 20–21

406. ऋणिकः सधनो यस्तु दौरात्म्याद्य प्रयच्छति । राज्ञा दापयितव्य स्यात् गृहीत्वा पञ्चार्क शतम् ॥ नारद IV 132. The व्य. मयूख p 182 reads गृहीत्वाश तु विंशकम् (i. e 20 per cent)

do so through wickedness or malice, should be made to pay the debt after recovering five per cent from the debtor. The Sm. C. II. p 121 says that this applies to a case where the debtor admits his liability to the plaintiff. Manu VIII. 139 gives milder rules: 'if a debtor admits before the Court that he is a debtor, then he has to pay a fine equal to five per cent on the amount decreed, but if he denied the fact of debt altogether, then he has to pay as fine ten per cent'. Manu VIII. 59 which prescribes a fine twice of that amount which the debtor falsely denies or which the creditor falsely claims contains a somewhat different rule (which Medhātithi says applies where parties are guilty of downright fraud, while VIII. 139 applies where there is negligence or loss of memory &c.). In suits other than for debts such fines are also prescribed e. g. in Yāj. II. 26 for one who misappropriates a pledge, II. 33, II 188 (for breach of the rules of guilds and other groups), Yāj. II. 171 (where a person claiming to be the owner of lost goods and failing to prove his ownership of them was fined *pañca-bandha* i. e a fifth part of the price of the goods). Kaut prescribes[407] that when a party is guilty of contradictory pleadings, or does not cite witnesses though saying he has witnesses and is defeated for these and similar reasons he has to pay a fine of 20 per cent of the claim and 10 per cent only if he relied on his own deposition (and called no witnesses) and further the defeated party has to pay the costs viz. the wages of the bailiff and of the subsistence allowance of witnesses. Therefore it may be said that in ancient times Indian litigants had an easy time, while in modern times litigation is often ruinous, what with the heavy court fees to be paid in several courts, the fees of legal practitioners and the expenses of witnesses and the delay of years[408]. The remark of Dr. Hart (in 'Way to justice' p. 17) is as applicable to modern India as to England 'the plain truth is that the justice of the courts is unattainable by some citizens through want of the necessary financial resources; while in the case

407. परोक्तदृण्डः पञ्चबन्धः स्वयंवादिदृण्डो दशबन्धः । पुरुषभृतिरष्टाङ्गः । पाणिभक्तमर्यादविशेषतः । तद्दुभयं नियम्यो दद्यात् । अर्थशास्त्र III. 1.

408 In modern times a plaint or memorandum of appeal is to be rejected if not properly stamped Vide Order VII. r. 11 of the Indian Civil Pro Code The Peshva's Government appears to have taken one-fourth or one-fifth from the party whose claim for partition or for recovery of debt succeeded Vide 'Peshwa's Diaries' ed by Rao Bahadur Wad, vol 2 pp 132, 146, 163

of many others it is not worth having at the cost which it involves'.

In one of his most famous soliloquies Shakespeare (in Hamlet III. 1 'Oppressor's wrong, the proud mans's contumely, the pangs of despised love, the *law's delays*') enumerates law's delays among the principal evils of human life. In modern India as in England[409] before 1873 delay in the decision of causes is a crying evil. In the rough and ready methods of administering justice in ancient India care seems to have been bestowed on disposing of cases as quickly as possible The story of king Nrga who caused delay has already been referred to (p 243). Kaut (III. 1) states that if the plaintiff, after the defendant files his answer, does not on the same day begin to support his case (by evidence) he would be declared to be defeated, since the plaintiff comes to court after determining the strength of his case, but the defendant does not do so (he is dragged to the court); that the defendant may be allowed an adjournment of three or seven days for his defence; if he is not ready with his defence within that time he may be punished with a fine ranging from 3 to 12 panas; if he does not answer even after three fortnights he shall be punished with fine for *parokṣa* (viz *pañcabandha* or *daśabandha* as stated above in note 407) and the plaintiff's claim would be recovered from the property of the defendant A similar rule is laid down in Manu VIII. 58. Yāj. II. 12 prescribes that disputes relating to *sāhasa* (killing by poison or weapon), theft, abuse, assault, cows, charges of grave sins and women (about the chastity of all women and about ownership in the case of female slaves), the defendant has to make his defence at once, and that in other cases time may be granted at the discretion of the court Nār. I. 45 is to the same effect. Nār. I. 44 holds that adjournments may be granted in suits about debts and the like for finding out the truth as such disputes are complicated and as memory is weak. Pitāmaha (q. in Sm. C. II. p. 42) says that adjournments may be granted in disputes about deposits, sealed deposits, gifts, partnerships, transgression of conventions and partition of heritage. Gautama XIII. 28 speaks in general terms of an adjournment for one year, when the defendant does not remember the transaction, but prescribes immediate trial in

409. For the enormous delay in the disposal of even simple proceedings or Bills in Chancery in England, vide Holdsworth's 'History of English Law' (1926) Vol. IX. pp. 374–375 and 433–435.

disputes about kine, women and children or when the matter is urgent i e. where loss or abandonment of the thing will be the result of delay (Gaut. XIII. 29–30). Brhaspati allows time even to the plaintiff if he is not able to put forward his case owing to his immaturity or lack of boldness.[410] Kāt. (145–158 quoted by Aparārka p. 619, Sm. C II. p 42, Par. M: III. pp. 69–72) contains elaborate rules about adjournments. He says that according to the importance or otherwise of the dispute, one, three, five, or seven days may be allowed to the defendant to make his defence in disputes about debts, according as the debt was contracted three months ago or 6, 12, 20 or 30 years ago ; that even more than a year may be allowed if the defendant is an idiot or lunatic or is suffering from disease or if the subject of dispute or the witnesses are in a foreign country ; that more adjournments than one may be granted in such cases ; that according to Brhaspati in disputes about immoveable property also no adjournments should be granted ; that if the act of God (*daiva*) or the king prevents the defendant from making his defence he should not be declared defeated, but time should be granted to him to prove this. It is clear that with the advance of time adjournments became longer and more frequent in Kāt. compared with the rigid rules of Kaut.. Kāt. and Śukra (IV. 5. 167, 209) contain the last word on this point. According to them delay in deciding causes is tantamount[411] to denial of justice (*dharmavyāpatti*, lit. death of Justice).

The sequence of stages in a law-suit is as follows : first the plaintiff makes his averments, then the defendant makes his reply; when both have finished, the members of the court speak (or deliberate among themselves) and after them (speaks) the judge (Kāt. 121 q by Aparārka p. 611, Par. M. III. p. 58). The four stages (*pādas*) of a law-suit, acc. to Yāj. II. 6–8, and

410 ऋणोपनिधिनिक्षेपदानसंभूयकर्मणाम् । समये द्वयभागे च कालः कार्यः प्रयत्नतः ॥ पितामह q. in स्मृतिच० II. p. 42 ; अभियोक्ताऽप्रगल्भत्वाद् वक्तुं नोत्सहते यदि । तस्य कालः प्रदातव्यः कार्यशक्त्यल्पलक्षयतः ॥ बृहस्पति q. in स्मृतिच० II. p 40, अपरार्क p. 611.

411. न कालहरणं कार्यं राज्ञा साधनदर्शने । महान् दोषो भवेत्कालाद् धर्मव्यापत्तिलक्षणः ॥ दृष्ट्वादेशात्तुरूपं तु कालं साधनदर्शने । उपाधिं वा समीक्ष्यैव दैवराजकृतं सदा ॥ शुक्र IV. 5 167 and 209. The first is almost the same as Kāt. 339 (q. in स्मृतिच० II. p. 92, व्य. मा. p. 306, स. वि. p. 148, which read साक्षिप्रभाषणे and धर्मव्यापत्तिः)

Br are named[412] *bhāṣāpāda* (the plaint), *uttarapāda* (the reply), *kriyāpāda* (the adducing of evidence), *sādhyasiddhi*[413] or *nirnaya* (the decision); while Kāt 31 states them as pūrvapakṣa, uttara, pratyākalita and kriyā Pratyākalita means 'discussion or consideration among the *sabhyas* about the burden of proof' (vide p 260 n 337) If several persons come simultaneously with complaints or plaints, then the order of taking up the cases is regulated by the *varna* of the plaintiffs i. e. the suit of a brāhmana is first taken up (Manu VIII 24) Kaut I 19 states[414] that the causes of temples (or idols), ascetics, heretics, brāhmanas learned in the vedas, about cattle and sacred places, of minors, of the aged, of those afflicted with disease or misfortunes, of the helpless and of women are to be looked into in the order enumerated or according to the importance of the causes or their urgency. Kāt (122 q in Sm C II. p 35, Par M III p. 59) says that preference should be given to that litigant whose injury is greater or whose cause is more important than those of the rest. Kaut III. 20 went[415] so far as to say that judges should look into the causes of idols (or temples), brāhmanas, persons performing austerities, women, minors, the old, the diseased, the helpless, even if they did not come forward to complain nor should judges put forward the excuses of time (i. e. the long delay in taking cognisance of their causes), place, or (long) enjoyment (of their opponents)

Lengthy quotations and illustrations are cited in the commentaries and digests about the requirements of a good plaint They are all passed over. They well illustrate the *penchant* of ancient Indian writers for divisions, sub-divisions and subtle distinctions.

Kāt. (136 quoted by Aparārka p. 609) specifies several reasons which make a plaint unacceptable viz one that lacks

the mention of the time and place (of the cause of action), that omits the statement of the material (*drawya*, which is the subject of dispute) or the amount thereof and that is wanting in (stating) the extent of the relief claimed, that is opposed (to the interests or usages) of the country, that is prohibited by the king's order, that mixes up several vyavahārapadas.[416] Certain plaints are declared to be vitiated (*paksābhāsa*)[417] and not entertainable viz. a plaint that contains an unknown (or imaginary) grievance, that discloses no injury, that contains letters or words making no coherent sense, that states no cause of action, that is incapable of proof or is self-contradictory (Kāt. 140 q. by Mit on Yāj. II 6, Par. M III. 61) Nār. II. 8 also points out the faults (*dosas*) of a plaint and explains them (II. 9-14) Brhaspati states that there is to be no law-suit between teacher and pupil, father and son, husband and wife, and master and servant This does not mean that law-suits between these pairs are altogether prohibited but that suits between them are undesirable, that the king or judges should persuade them to desist from proceeding in Court, that if they persist the court has to decide the suits according to the śāstra.[418] Manu (VIII. 299-300) prescribing the same punishment as for a thief in cases where a wife, son, slave, servant or brother is beaten for correction more severely than is allowed in the śāstras by the husband, father, master, or elder brother respectively conveys by implication that a legal proceeding by these is possible The smrtis did not encourage disputes based on

---

416 If a plaintiff states ' the defendant stole my gold, I deposited a thousand *drammas* with him which he does not return, he sold a cow to me without being its owner ', there is a joinder of three vyavahārapadas viz *steya*, *nikṣepa*, *asvāmivikraya* This is not a bad or altogether unacceptable plaint All that is meant is that the trial of all these cannot be carried on simultaneously, but one after another

417 अप्रसिद्धं निराबाध निरर्थं निष्प्रयोजनम् । असाध्यं वा विरुद्ध वा पक्षाभास विवर्जयेत् ॥ कात्यायन quoted by मिता. on या. II 6 (without name), परा. मा III 61 The स्मृतिच० II 37 ascribes the same verse to बृहस्पति (last pāda being पक्षं राजा विवर्जयेत्). Vide my notes to Kāt 140 where it is shown how there is a good deal of divergence about the interpretation of this verse

418. गुरुशिष्यौ पितापुत्रौ दम्पती स्वामिभृत्यकौ । एतेषा समवेताना व्यवहारो न विद्यते । नारद acc to विश्वरूप on याज्ञ II, 5, and बृह. acc to मदनरत्न and व्य प्र p 34 The latter remarks ' तस्माद्दिदं वचनं गुर्वादीना शिष्यादिभिः सह व्यवहारकरणे लोकद्वये न श्रेय इह निन्दावहत्वादमुत्र नरकजनकत्वादित्येतत्परमेव । राजादिभिस्तु नायसूचितो व्यवहारो लोकद्वयहानिकरत्वादिति निवार्यमाणा अपि शिष्यादयो न परितुष्यन्ति चेत्तदा तेषा यथाशास्त्रं निर्णयकरणमदोष एव ।; vide also मिता. on या II. 32 for similar words.

flimsy or trumpery grounds. Brhaspati[419] says that a plaint that is *nirarthaka* (i. e the injury in which is very small or the monetary value involved is negligible) should not be entertained by the king This is on the principle of *de minimis non curat lex* (the law does not take account of trifles) also embodied in sec. 95 of the Indian Penal Code.

When the plaint has been finally settled, the defendant should be called on to reply in writing to the plaint in the presence of the plaintiff (Yāj II. 7, Nār. II 2) This is called *uttara* (reply) or *pratipaksa* (Nār. II. 2). When time may be given to the defendant for putting in his answer has already been stated above.

The answer of the defendant must possess the following characteristics viz it must completely meet all the points of the plaint, it must not deviate from the truth, must not employ vague words, must not be self-contradictory, it should not be such as to require further explanation (because of containing words in a foreign tongue or unknown or rarely used words or elliptical or badly arranged sentences)[420] A reply is of four kinds, (1) *mithyā* (of denial), *samprati pati* or *satya* (confession or admission), *kārana* or *pratyavaskandana* (of special plea or demurrer), *prānnyāya* or *pūrvanyāya* (of former judgment or *res judicata*) A reply of denial may take four forms (Nār II. 5) viz. (1) this (what is affirmed in the plaint) is false, I do not know anything about it, I was not present (when the transaction alleged in the plaint is said to have taken place), I was then not born[421] The first is a direct denial, the others are implied or indirect Very strict rules of pleading were evolved by the

The व्य. मा reads आधार्यं, which appears to be a wrong reading.

time of Kāt., who provides (144) that if a statement asserted by the plaintiff in the hearing of the defendant is not traversed by the latter or if the latter remains silent when he should have given a reply, it (should be held by the court that it) is admitted (by the defendant).[422] When the defendant declares the truth of the claim made in the plaint that is a reply of admission. Where the defendant accepting as correct the matters (or facts) set out by the plaintiff raises a plea, that is a reply of special plea.[423] The same is designed by some as *ādhārya* or *ādharya* (rendering futile) of the plaint. For example, where plaintiff avers that defendant took one hundred rupees and defendant accepts that fact but adds either that he later on returned them or that they were really donated to him, that is a reply of special plea. Where a person though defeated in a (former) proceeding again causes a plaint to be written and is addressed (answered) with the words 'you were formerly defeated', that is a reply of former judgment. That there was a former judgment between the same parties may be proved by citing the judges or arbitrators or by citing other witnesses or by producing the writing itself i. e the copy of the judgment (Kāt. 172).[424] In a reply of admission there are only two stages of *vyavahāra* viz. the plaint and the reply; there is no need of proof (so there is no *kriyāpāda*) and the plaintiff succeeds as a matter of course (and so there is no necessity of a regular judgment, *nirnaya*). Kāt. (173–190) states at great length the faults of a reply and also what are not proper replies The Mit (on Yāj. II. 7), Aparārka pp 613–614, Sm. C. II. pp. 43–46 and

424 विभावयामि कुलिकैः साक्षिभिर्लिखितेन वा । जितश्चैव मयार्थः प्राङ्न्यायक्रियाकारकः ॥ कात्यायन q. by स्मृतिच० II p. 43 which explains 'कुलिकैरिति प्रकृतव्यवहारद्रव्यापहृपलक्षणार्थम्', व्य. प्र. p 61. The व्यव. नि. (p. 53) has the following note on this 'ऐन्द्रस्थाने जितस्य प्राङ्न्यायविधिसिद्धौ जयपत्रेणाहं भावयामीत्येकः कुलव्यवहारे च जयपत्राभावात्-कुल्या कुलविवादेषु विज्ञेयास्तेपि साक्षिणः—इति वचनात् तैरेव व्यवहारदर्शिभिर्भावयामीति द्वितीयः । राज्ञा धर्मासनस्थेन यच्छ्रुतं तत्त्वदर्शिना । नान्यः साक्षी भवेत्तत्र हुक्त्वा राजानमीश्वरम् ॥—इति वचनात् साक्ष्यभावात्तेन राज्ञा भावयामीति तृतीयः ॥

other digests quote long passages from Kāt, Br, Hārīta, Vyāsa and others on faults of *uttara* and illustrate them at length These have to be omitted for want of space One of the faults is '*saṅkara*' (mixture or confusion or misjoinder of pleas in defence). For example, if the plaint alleges 'the defendant took gold, a hundred rupees, certain valuable clothes and a quantity of corn and has not returned any of them,' and the defendant's reply is 'I took the gold, I never took any rupees, the plaintiff donated the clothes to me, as to the corn plaintiff had already filed a suit against me and failed' Here the reply contains all four varieties, viz. the first is a reply of admission, the 2nd is one of denial, the third is a special plea and the 4th is a plea of former judgment This is a *saṅkara* But it is not meant that this reply would not be allowed All that is meant is that, as the burden of proof varies, the adducing of evidence will not be allowed simultaneously, but one after another. Vide Mit. on Yāj II. 7, Par M III pp 77–80. These questions are concerned with cases in which several issues arise, the burden of proving some of which lies on the plaintiff and the burden of proving others lies on the defendant If a defendant does not come forward to give a reply, the king or judge should make him give one by *sāma* (conciliatory words), *bheda* (threats) and other ways and if he does not give a reply for seven days after that, he may be declared to have been defeated and a decree may be passed against[425] him Kaut (III. 1), Yāj II. 9, Nār I. 55, Kāt (163) state that a defendant cannot[426] raise a counter-claim (*pratyabhyoga*) as long as he has not met the attack of the plaintiff, nor should another plaintiff attack a person who is a defendant in a suit already filed, except in the case of abuse and assault, *sāhasa* (death or grievous hurt by a weapon &c.), theft or in a very urgent matter, or in disputes among members of caravans or guilds or in charges of adultery, Yāj II. 29, Nār. IV 93, Śukra IV. 5. 120 say that when a litigant dies while a suit is pending, his son (or other representative) who takes his estate should carry on the litigation or be liable for the claim and the son cannot add his own enjoyment (to make up

425 उपायैश्चोद्यमानस्तु न दद्यादुत्तरं तु यः । अतिक्रान्ते सप्तरात्रे जितोऽसौ दाप्त मर्हति ॥ वसिष्ठ q in स्मृतिच० II p 46, परा मा III p 81, व्य प्र p 56 (reads उभयैश्चोद्य० and दण्डमर्हति). This is हारीत acc to स वि p 99

426 अभियुक्तो न प्रत्यभियुञ्जीत अन्यत्र कलहसाहससार्थसमवायेभ्यः । न ह्यभियुक्तेऽभियोगोस्ति । अर्थशास्त्र III 1. अभियुक्तोऽभियोक्तारमभियुञ्जीत कर्हिचित् । अन्यत्र दण्डपारुष्यस्तेयसंग्रहणात्ययात् ॥ कात्या. q by व्य मा. p 299, should we not read नाभियुक्तो or नाभियुञ्जीत?

three generations &c. as required for possession ripening into ownership) [427]

There were many grounds on account of which a litigant became what is called *hīna* (a losing party) and some times either had his plaint dismissed or his defence struck out and a decree passed against him or he was simply fined. For example, Nār. II. 33 speaks of five kinds[428] of *hīna* viz. one who changes his statements (or pleading), who does not prosecute his pleading by adducing evidence (i. e. avoids investigation), who does not appear when summoned, who gives no reply, who disappears or runs away when summoned. Nār. I. 56–61, II. 24 explain some of these and other *hīna* parties. Kāt. 202 (q. by Sm C. II. p. 47) prescribes that the above five should respectively be fined 5, 10 12, 16 and 20 panas Nār. II. 25 states that in all civil disputes such as those about women, land or debts the litigant does not lose his cause even if he commits a mistake in his statements, but he is liable to fine. This conveys that in disputes arising out of wrath (manyukrta i. e. in criminal matters) a person loses his cause if he is guilty of the above acts and he is prohibited from pursuing the matter again. Kaut III. 1, Manu VIII. 53–57 contain in almost the same words, certain similar rules, Kaut. calling the several actions causes of *parokta* (defeat). Vide Yāj. II. 16, Śukra IV 5. 136, Kāt. 191–210 for further details on dismissal for default and cognate matters. In these cases of *hīnavādins*, though a fine was imposed, a retrial could be ordered. When defendant filed his reply and parties joined issue in court, Br. and Kāt say that they should not then be allowed to compromise the dispute privately without the permission of the

Vide S B. E. vol. 33 pp. 295–296 verses 10–12 for Br. (Dr. Jolly's tr of verse 10 is not correct) Compare Order 23 r 3. of the Indian Civil Pro. Code and sec. 345 of the Criminal Pro. Code for compounding offences).

court. if they did so they were both to pay double of the fine imposed on a defeated party, as they deprived the king of his dues (court *fees*). But a compromise with the court's permission was allowed when the parties were in doubt as to what the witnesses might say or the *sabhyas* might decide (in such cases it would be wisdom for the parties to compromise) and particularly when the evidence on both sides was evenly balanced or where there was a conflict between the different smṛtis and usages

When the reply had been given the *sabhyas* had to consider the question about the burden of proof. Br.[430] says 'the sabhyas after considering the nature of the reply should call upon one of the parties that are in court to establish his case' (Sm C. II. p 50). What a party sets out to establish is called *sādhya* and the means whereby the claim (of the litigant) in its entirety is established is called *sādhana* (Kāt. 213 in V. P p. 79). Yāj II. 7 and Nār. II 27 say that the party (on whom the burden of proof lies) should immediately (after the reply is given) write down the means whereby he proposes to prove his averments. This third stage (pāda) is called *kriyā* i. e. proof. *Sādhya* and *kārya* are synonyms, *kriyā* and *sādhana* also are synonyms (Kāt. in Aparārka p 616, Vyāsa in Sm. C. II. p 54). The rules about burden of proof are laid down by Hārīta (q in Mit on Yāj II. 7, Aparārka p 616). In a reply of denial, the burden of proof is on the plaintiff, in a reply of former judgment or of a special plea, it is on the defendant and in a reply of admission no question of burden of proof arises Compare also Nār II. 31. The Mit on Yāj II. 80 states another rule that an affirmative proposition has to be proved by him who asserts it (*bhāvapratijñāvādina eva kriyā*) Yāj. II. 22, Nār. II. 28-29 and IV. 69, Br. (in Sm. C. II p. 54), and others say that means of proof are two-fold, human and divine, and that documents, witnesses and possession are the human means of proof (Vas. 16. 10 also), while the ordeals of balance and others are divine means. Yāj II. 22, Nār. II. 29, Kāt. 217 expressly state that ordeals are to be resorted to only when none of the human means are possible or available. If one party relies on human means alone and the other offers divine means, the king (or judge) has to accept human means and not divine; in disputes among men, if there be human means of proof though reaching

430. ये तु विहन्ति करणे तेषां सम्यैर्विभावना । कलयित्वोत्तर सम्यग्व्रातःपैकस्य वादिनः ॥ बृह. in स्मृतिच० II. 50.

(or covering) only a portion (of the allegations in the plaint) then human means should be accepted and not divine ones even though the latter may cover the whole ground (Kāt. 218–219 q by Mit. on Yāj. II 22). This latter rule is based on the proposition laid down in Yāj. II. 20 and Viṣnudharmasūtra VI. 22 that when a party totally denies a claim and the opponent establishes by evidence a substantial portion of it, the judge may pass a decree against the denying party for the whole of the claim This is practically the same as the maxim 'omnia praesumuntur contra spoliatorem '.[431] Therefore the general rule was that the divine mode of proof was to be resorted to only in the absence of any human means of proof. Kāt. 229 (q. by Mit on Yāj. II. 22, Aparārka p. 629) allows witnesses or ordeals when the dispute is started with reference to *sāhasa*, assault or abuse and causes that spring from force and Kāt. 230 (q in Sm. C. II. p 51) provides that, in the case of a person guilty of *sāhasa* perpetrated in secret, investigation has to be made by divine proof. Kāt. 225–228 (q. by Mit. on Yāj. II. 22, Aparārka p. 629, Sm. C. II. pp. 53–54) lay down certain rules about preference among the several means of proof: whatever are declared as the conventional usages of the associations of traders, of guilds (of artisans) and of groups (of brāhmanas), the means of proving them are documents and not ordeals nor witnesses; enjoyment[431a] (or possession) alone is weightier in the case of the making and (the use of) doors and ways, as also in the case of water-courses and the like (i. e. in the case of easements) and not writing nor witnesses; in the case of things promised to be given but not given, when a decision is to be given in disputes of servants with masters, in the matter of taking back a thing after it is sold or when a person having purchased a thing does not pay the price, in gambling and prize fighting–when in these matters disputes arise the means

431 Vide H of Dh vol I. p 204 and n. 357, where a half verse from the drama Vikramorvaśīya (IV. 17) is quoted containing the same proposition and it is shown that Nārada as quoted in V. M. p. 311 and Par M III p. 203 contained the same half verse The half verse is विभावितैकदेशेन देयं यद्भियुज्यते. The maxim cited above is relied upon in *Ardeshir* v *The Collector of Surat* 3 Bom H C. R (A C J) p. 116 and in *Framji* v *The Commissioner of Customs* 7 Bom. H. C. R. (A. C J.) p 89.

431a In *Lalubhai* v. *Bai Amrit* I. L. R. 2 Bom. 299 at p. 312 there is a reference to Kāt 226 द्वारमार्गक्रियाभोगे जलवाहादिके तथा । मुक्तिरेव तु दुर्बी स्यात्प्रमाणेष्विति निश्चयः ॥. There is a similar verse of Kāt 314 (q in स्मृतिच० II. p. 67) 'दत्त्यानिर्गमनद्वारजलवाहादिसंशये । मुक्तिरेव तु दुर्बी स्यात्प्रमाणेष्विति निश्चयः ॥.'

of proof are witnesses and not documents nor ordeals Marīci (q. by Sm. C. II. 60, V. P p 141) states that as regards the sale, mortgage, gift or partition of immoveable property a document (should be executed as it) enables the person (in whose favour it is executed) to acquire (clear) title and freedom from doubt[432] (even after the lapse of years) It is in consonance with this that the Indian Legislature (in the Transfer of Property Act, IV of 1882) requires writing and registration as regards the sale, mortgage and gift of immoveable property Nārada IV 75 very concisely hits the special characteristics of each *pramāna*: 'a document is always strong, witnesses are strong (as evidence) only as long as they are alive, possession becomes strong as time passes'. The comparative strength of the several kinds of evidence is well put by Brhaspati[433]: 'Witnesses are superior to inference (circumstantial evidence), a document is superior to witnesses, undisturbed possession for three generations is superior to all these' Kāt. 221 (q. by Mit on Yāj II 80 and V. P. p. 80) gives the warning that when a litigant abandoning a strong ground or means of proof resorts to a weak one to prove his case, he would not be again entitled to rely on that (strong ground of proof) after the members of the court have decided as to who should succeed This practically propounds the same rule as that of constructive *res judicata* contained in explanation 4 to section 11 of the Indian Civil Pro Code (of 1908)

The means of proof will now be briefly dealt with in order And first come documents 'Those in search of an exhaustive treatment may usefully consult Dr Amareshwar Thakur's 'Hindu Law of Evidence' (Calcutta, 1933).

When writing was first employed in India and how the Indian Brāhmī alphabet was derived have been moot points for many decades among scholars Max Muller's theory ('History of Ancient Sanskrit Literature' p 507) that the use of writing for literary purposes was unknown to Pānini was thoroughly exploded by Goldstückor in 'Pānini and his place in Sanskrit Literature' and was later on abandoned by Max Muller himself

432. स्थावरे विक्रयाधाने विभागे दान एव च । लिखितेनामुयास्सिद्धिर्भावेसवादमेव च ॥ मरीचि q. by स्मृतिच० II p 60.

433. अनुमानाद्गुरुः साक्षी साक्षिभ्यो लिखितं गुरु । अध्याहता त्रिपुरुषी श्रुतिरेभ्यो गरीयसी ॥ बृह. in व्य मा. p 350. व्यवहारतत्त्व p 224, the same is कात्यायन (315) acc. to व्य. मा. p. 313. Probably कात्या took over बृहस्पति's verse or there may be some mistake in quoting.

Then Bühler (in 'the Origin of the Indian Brāhmī alphabet') started the theory that Brāhmī was derived from a foreign Semitic script about 800 B C. and this hypothesis held the field for a long time (vide e. g. Rhys Davids in 'Buddhist India' chapters VII and VIII). Even Western scholars are not now prepared to accept this dating of Buhler; vide Cambridge History of India, vol. I p. 141 (1922) The excavations at Mohenjodaro tend to throw grave doubts on this theory and discredit it At Harappa and Mohenjo-daro there is writing (not satisfactorily deciphered yet) on burnt clay and pottery. The Piprahva vase shows writing on stone several centuries before the Christian era and the Sohagpur copperplate inscription is the earliest writing on copper plates yet discovered (vide Annals of B. O R Institute, Vol XI. p. 32 ff) This is not the place to discuss the questions about the origin of the art of writing in India and of the Brāhmī script. It cannot be gainsaid that the most ancient dharmaśāstras refer to writing as well-known. Gaut XIII. 4 appears to refer to a witness signing himself as such on a document Vas. 16. 10, Visnudharmasūtra VI. 23, Yāj II. 22 mention *likhita* (document) as the first means of proof Manu VIII. 51 uses the word *karana* in the sense of document (*arthepavyayamānam tu karanena vibhāvitam*), in VIII. 168 refers to documents obtained by coercion and in IX. 232 to fabricated royal edicts (kūtasāsana). Kaut. has a special chapter (II. 10) on royal writings (śāsana), in which he dilates upon the qualifications of the king's scribe, on the contents of an official document, the good points required in an official missive, on various divisions of writings and on the faults in official writings that are to be avoided. In I. 11 Kaut. prescribes that the king should hold consultations with absent ministers by sending a letter (*patra*, a leaf of palm or a piece of birch bark or similar material) and in I. 19 states that consultation by letter (*patra*) with the council of ministers should be held in the fifth part of the day. In II. 7 Kaut. advises the construction of rooms with shelves for books containing accounts (*akṣapaṭalam nibandhapustakasthānam kārayet*). Vide also Kaut. II. 21, II. 30, IV. 9, IV. 10 for references to writing in various other connections. Kaut. (III 1) appears[434] to use the word *karana* in the sense of document and gives a rule which is the same as Yāj. II. 23. Yāj. I. 319 speaks of land grants being written or

434. पश्चिमं त्वेषां करणमावेशाधिवर्जं अन्वेयम्। अर्थशास्त्र III 1; compare याज्ञ. II. 23 सर्वेष्वर्थविवादेषु बलवत्युत्तरा क्रिया। आधौ प्रतिग्रहे क्रीते पूर्वा तु बलवत्तरा ॥.

engraved on cloth or copperplate Megasthenes (McCrindle p. 69) no doubt says that Indians have no written laws, but there is no doubt that he is under some misapprehension as to what he was told, since in another place (p. 83) he refers to philosophers committing useful suggestions to writing Similarly Strabo (XV. 1 53–54) states that the Indians were ignorant of writing, but (67) narrates that Nearchus states that Indians write letters on cloth. One of the oldest copperplate grants is the Taxila plate of Moga (identified with Moa of the Śakas) and is not later than 120 B. C Vide E. I. Vol IV. p. 54 and Rapson's 'Indian coins' p. 7. It appears that wooden boards were used for writing ephemeral matters and *patra* for more permanent use, as Kāt (p. 293, n. 400 above) states that the first information was to be written on a board with chalk and the formal plaint on a leaf (*patra*). The Lalitavistara (10th chap. p. 143, B. I. ed.) states that the Buddha used a board of sandal-wood for learning the scripts (-candanamayam lipiphalakam-ādāya).

Yāj. II. 84–94, Nār. IV. 69–75 and 135–146, Br., Kāt. 249–312, Śukra II. 291–318, IV. 172–182 and several digests devote great attention to documents. A few salient points only will be brought out here. Nār. (IV. 70–71) eulogises documents by saying that if the Creator had not created writing which is like an excellent eye, the world would have come to grief and that a document is an indubitable means of apprehending the time, the place, the object, the material, the extent and the duration of a transaction. Br. (q. in V. P p. 141) says that, since [435] people begin to entertain doubts (about a transaction) even in six months (from an occurrence or transaction) the Creator therefore created in the hoary past letters which are recorded on writing material (*patra*). The Lalitavistara (about 2nd or 3rd century A. D.) mentions 64 scripts which were known to the Buddha, among which the first is Brāhmī (10th chap p. 143). Nār., Br., and Śukra probably try to explain why the alphabet current in their days was called Brāhmī (it was created by Brahmā). Śukra II. 297, IV. 5. 172 are similar verses. The texts divide documents in different ways. Visnu [436] Dh. S.

436. राजाधिकरणे तस्मिन्मुक्तकायस्थकृतं तदृक्षपक्षकरांचिह्नितं राजसाक्षिकम्। विष्णुधर्मसूत्र VII. 3.

VII. 2 divides documents into three kinds viz. those written before the king (i. e. by public officers), those bearing the superscription of witnesses and those without witnesses. The first is a document written in a state office by a scribe appointed by the king and bearing the signature of the head or superintendent of the office. This is just like the registration of documents in modern India. Br.[437] (q by V. P. p. 141, V. May, p. 24) divides documents into three sorts viz. royal writing, writing made at a fixed place and that written in one's own hand. Nār. IV. 135 speaks of two kinds viz. one written by the executant himself in his own hand and that written by another; (the first of these is valid) without attesting witnesses, while the second requires to be attested. In the former no writer (lekhaka) nor witnesses are necessary, while in the latter both are necessary. Even now in India no deed concerning even immoveable property is required by law to be attested except mortgages and gifts. The author of the Saṅgraha, the Mit. on Yāj. II. 84 and several others divide documents into *rājakīya* (public) and *jānapada* (private or of the common people). The V. Mayūkha (p. 24) says that *laukika* and *jānapada* are synonyms and jānapada document is of two kinds viz. written by the executant himself in his own hand and that written by another, and that the first may be without attestation of witnesses, but the other must be attested. On Yāj. II. 22 the Mit. divides documents into śāsana and cīraka. The first is the same as rājakīya (described in Yāj. I. 318–320) and cīraka is practically the same as jānapada writing. On Yāj. II. 89 the Mit. remarks that a royal deed must be written in correct and elegant language but a document executed by ordinary people is not required to be in correct Sanskrit, but may be written in the local dialect of the parties. Yāj. II. 89 states that a document written by the executant himself in his own hand is authoritative except when it is brought about by force or fraud. Yāj. II. 84–87 prescribe that a document of debt or the like should be written down by mutual agreement, that the creditor's name should be placed first, that it should

437. राजलेखं स्थानकृतं स्वहस्तलिखितं तथा। लेखं तु त्रिविधं प्रोक्तं भिन्नं तद्बहुधा पुनः॥ बृह. in व्य. प्र. p. 141, व्य. न. p. 24, परा. मा. III. 119. स्थानकृत means 'written in a well-known place by a professional scribe appointed by the king or his officers and attested by witnesses' राजकीयं जानपदं द्विविधं लिखितं स्मृतम्। शासनं राजकृत्यादौ चीरकं स्वाक्षरणादिषु॥ प्रजापति q. by व्यव नि. p. 82, व्यव. नि. p. 83 explains स्थानलेखं तु ग्रामजनपदादिव्यधिकृतकायस्थकृतं तदृष्टयक्षकराङ्कितं चीरकमित्युच्यते।.

mention the year, month, half month, *tithi* (day), the names, caste, gotras, the Vedic School, the names of the fathers of the parties, that when the writing is finished the debtor should write at the end that the deed is approved by N. N (the executant) son of so and so, that an even number (i e not less than two) should attest the document, stating their father's names and that they attest as witnesses and the scribe should write at the end that he wrote the document at the request of both parties. If the debtor or any witness cannot write, his signature should be made by another in the presence of all witnesses (Nār. q by Mit. on Yāj. II 87 and by Vy. Nir. p. 87 without name). Rājakīya documents are of three kinds (acc. to Br quoted in V P p 141, V May. p. 24) viz *śāsana* (a royal grant of land), *jayapatra* (a judgment deciding a law-suit), *prasāda-patra* (a deed showing the king's pleasure at the devoted service or bravery of a person); acc. to Vasiṣtha (q in Sm. C. II p. 55 and V. May p 28) it is of four kinds viz *śāsana, jayapatra, ājñāpatra* (a royal command addressed to feudatories, high or low officers like the wardens of the marches), *prajñāpanāpatra* (a writing of request addressed by the king to sacrificial priests, a *purohita*, teacher, learned brāhmaṇas or other highly honoured persons), it is five-fold acc. to S. V pp. 111–113 viz sāsana, jayapatra, ājñāpatra, prajñāpanāpatra and prasādapatra. Kaut in II. 10 speaks of several kinds of royal orders and names them, such as prajñāpanā (request by a messenger about what another prays), ājñāpatra (as above), *paridāna* (honour to the deserving or gift in distress), *parihāra* (remission of taxes for certain castes or villages by the king), *nisṛstilekha* (writing whereby the king accepts the actions or words of some trustworthy person as his own), *prāvṛttika* (conveying information about some portentous happening or some news about enemies etc.), *pratilekha* (reply in accordance with discussion held with the king on a message from another), *sarvatraga* (order addressed to high functionaries and officers for the welfare of travellers) The contents and form of royal grants have been described in H. of Dh. vol. II pp 860–861. The jānapada writings are divided into various sorts, seven (acc. to Br. q. by Aparārka p 683, Sm C II p. 60) or eight (acc to Vyāsa in Sm C II. p. 59) and the Sm. C. remarks that there is no emphasis on the number and there may be many more varieties. Br. (S B. E vol. 33 p 305), Kāt (254–257) and others mention and define the following jānapada writings; *bhāga*- or *vibhāgapatra* (deed of partition), *dānapatra* (deed of gift),

krayapatra (sale deed), *ādhānapatra* or *ādhipatra* (deed of pledge or mortgage), *sthitipatra* or *samvitpatra* (deed of convention, which is made by the inhabitants of a village or city or the members of a corporation or guild by mutual agreement for settling their conventions), *dāsapatra* (deed of bondage to serve executed by a person devoid of food or clothing), *rnalekha* or *uddhārpatra* (bond of debt promising return at a future date with interest), *viśuddhipatra* (deed of purification given to a person with the attestation of witnesses when a penance for a sin has been performed), *sandhipatra* (deed of peace when a compromise in the presence of leading people after a charge of the commission of a crime has been made), *sīmāpatra* (deed of boundary when a dispute about it is settled), *upagata* (a receipt passed by the creditor to a debtor on payment of the whole or part of a debt, Yāj II. 93), *anvādhipatra* (a sub-mortgage i. e where the mortgagee or pledgee mortgages or pledges the property or thing to another and hands over the former deed to his own creditor). The two branches of private documents (jānapada) are either *ciraka* or not ciraka; ciraka is defined as a document written by hereditary scribes residing in the capital, who are approached by the parties and bearing the signatures of the parties and witnesses and the names of their fathers (Sangraha q by Sm. C II. p 59, Par M III. p 127). Vide n. 437 above and Śukra II. 299–318 and IV. 5. 172–177 for definitions of these and other kinds of documents But acc to Vyāsa quoted by Sm. C. II. p 59 private documents are of eight kinds viz ciraka, upagata (a receipt), svahasta (written by the executant himself), ādhipatra, krayapatra, sthitipatra, sandhipatra, viśuddhipatra Some works like the Vyavahārasāra (p 69) and the Mit write the word as *cīraka* and not *ciraka*. It was so called (viz *ciraka*) probably because it was written on the back (of the bark of the birch or some other tree). If the proper word is *ciraka* then it was employed because being executed by scribes appointed by the king, it had validity for all time (*cira*) as compared with purely private documents. 'Ciraka' in this last sense seems to be equal to 'sthānakrta' of other writers.

Nār.[438] IV. 136, Visnu. Dh. S VII. 11 and Kāt. (252) require that a document is held valid which is not adverse to the custom of the country, the contents of which follow the rules

438. देशाचाराविरुद्धं यद्व्यक्ताधिविधिलक्षणम् । तत्प्रमाणं स्मृतं लेख्यमविलुप्तक्रमाक्षरम् ॥ नारद IV. 136, देशाचाराविरुद्धं व्यक्ताधिविधिलक्षणमलुप्तक्रमाक्षरं प्रमाणम् । विष्णुधर्मसूत्र VII. 11.

regarding pledges (and other transactions) and the sequence of the sense and of the words in which is not contradictory or confusing. Sm C. II. p. 59 applies the word[439] *pañcārūḍha* (on which five are recorded) to documents that are signed by the creditor, the debtor, two witnesses and the scribe. The Sarasvatīvilāsa p 114 holds that *pañcārūḍhatva* consists in having the creditor, debtor, witnesses (as one item), scribe and the matter to be written. Hārīta and Vyāsa (q in Sm. C. II. p. 59) employ the dual (sāksinau), while Yāj II. 87 employs the plural Therefore ordinarily two witnesses sufficed, but in very important writings there should be more witnesses. Viśvarūpa reads 'asamāh' in Yāj. II. 87 and requires three witnesses as the minimum. Nār. IV. 137, Viṣnu[440] Dh. S VII. 6–10, Br. (S. B. E. vol 33 p. 307 v. 23.), Kāt. (271) state that a document is invalid that is executed by a person intoxicated, by one already charged (with an offence), by a woman, a minor, that has been brought about by threats or deceit or coercion, by one dying, by one diseased, by a lunatic, or by those that are dependent. Viṣnu Dh. S. (VII. 8–9) and Kāt. 273 (q by V. M. p. 338, Aparārka p. 686, Par. M. III. p. 131) state that a document may be held invalid owing to defects in the witnesses or in the scribe or to the fraud of the creditor or executant

Nār. IV. 145, Kāt. (306–307), Samvarta (both quoted by Aparārka pp. 691–692) and Br. (S. B. E. 33 p. 309 verse 31) say that no oral evidence should be allowed to contradict the (terms of a) document, that the mode of proving (a matter) by a document is always superior, that a writing can be refuted or superseded only by another document relating to the same matter and not by the oaths of witnesses and that if oral evidence

---

439 उत्तमर्णाधमर्णौ च साक्षिणौ लेखकस्तथा । समवायेन चैतेषां लेखं कुर्वीत नान्यथा ॥ इति हारीतेन लेख्यमात्रे साक्षिणामिदमुक्तत्वात् । एवं चात्मकृतलेख्यस्योत्तमर्णाधमर्णसाक्षिद्वयलेखकरूपपञ्चारूढत्वात्पञ्चारूढं पत्रमिति लोके व्यवहारः साक्षिसंख्याधिक्ये चार्थं व्यवहारो गौण इति मन्तव्यम् । स्मृतिच० II p. 59.

440. तद्बलात्कारितमप्रमाणम् । उपधिकृताश्च सर्व एव । कूटितकर्मदुष्टसाक्ष्यकृतं ससाक्षिकमपि । बादृन्विधेन लेखकेन लिखितं च । बालाद्यवतन्त्रमत्तोन्मत्तभीतताडितकृतं च । विष्णुधर्मसूत्र VII. 6–10, सुमूर्छुक्षिप्तभीतार्तस्त्रीमत्तव्यसनाहतैः । निशोपधिबलात्कारकृतं लेख्यं न सिध्यति ॥ बृह. q. by स्मृतिच० II. p. 62. Manu. (VIII. 165 and 168) declares that fraud vitiates all transactions Compare with Viṣnu Dh. S sections 10–12, 15–18 of the Indian Contract Act (of 1872) In I L. R. 5 Bom. 99 at p 104 'strīmatta' in Br (S B. E vol 33 p 307 v 23) is taken as one word and rendered 'under female or aphrodisiac influence', which is not correct as shown by the texts of Viṣnu and Kāt., where the two words are separated by other words.

were allowed to overrule the force of documents there would be confusion and an end to all written transactions[441]. If there is a conflict among documents then a *jānapada* document (written by a scribe and attested) is superior to one written in the hand of the executant himself and a public document is superior to a jānapada one (Vyāsa q. by Sm. C. II p 66 S. V p 122).

Yāj. II. 91, Nār. IV. 146 and Kāt. 312 (q. by Aparārka p. 687) prescribe that when a document is in another country or when it is illegibly written, when it is lost or its letters have become indistinct (by lapse of time or other causes) or it has been stolen or is crushed or burnt or shattered into pieces, another document may be caused to be written (if both parties agree), but if they do not agree and the contents have to be proved or if the executant denies his signature, then Nār. IV. 142 and Kāt. (282 q. by Sm C II p. 63) say that time may be given to bring it from the foreign country or the contents may be proved by the evidence of the attesting witnesses or of the scribe or of those that have seen it. This shows that the smṛti law required the production of the document itself as primary evidence, but allowed secondary evidence only in exceptional cases [442] If a document belonging to one man is produced by another the latter has to explain his custody of it[443] (Vyāsa q. by Aparārka p. 690, Sm. C. II. 66). Kāt. (308 q by Sm. C. II. p. 65) says[444] that just as the reflection of a person or thing made in a mirror is seen as if it were real though it is unreal, so clever people can fabricate documents resembling (the genuine writing of a person). Vyāsa (in Aparārka p. 688, Sm C. II. 65) and Br. (S. B. E vol 33 p. 307

vv. 20–21) say the same thing and add that documents have to be carefully scrutinized and that no certain conclusion can be established by documents alone (in every case), that women, minors and illiterate persons are deceived even by their relatives by the fabrication of documents bearing the names of these (women and others) and that this has to be investigated with skill. When there is a doubt about the genuineness of a document, it can be established by comparison with other documents admitted to be written or signed by the same person, by ratiocination, by the probability of the two parties being together at the time of the transaction, by citing the attesting witnesses,[445] by the peculiarities or flourishes in writing certain letters or making certain signs (in the writing questioned and in other admitted writings), the previous transactions between the parties (or their subsequent conduct), and the source of the acquisition of the subject matter in dispute (Yāj II. 92, Viṣṇu Dh. S. VII. 12, Nār. IV. 143–144, Kāt 283 q. in Mit. on Yāj II. 92). Viṣṇu Dh. S. (VII. 13) and Kāt.[446] 285–286 (q by Aparārka pp. 689–690) prescribe that if the debtor, creditor, witnesses or the scribe be dead the authenticity of the document has to be ascertained by (a comparison of the signatures on the disputed document) with other specimens of their handwriting or signatures or other documents executed by the debtor. Kāt 287 (q. by Aparāka p. 689, Sm. C. II. p. 64 and Par. M. III. p. 134) states the striking[447] rule that when a document bears the royal seal, that document is presumed to be authentic, even though all the three (viz. the debtor, the witnesses and the scribe) are dead. This shows that documents bearing the king's seal or that of royal officers were regarded as prima facie genuine and this rule is analogous to the provisions in sec 79 of the Indian Evidence Act and sections 59–60 of the Indian Registration Act. That even copperplate grants were sometimes forged is clear from the reference in the Madhuban plate of Emperor

445. Vide sec. 68 of the Indian Evidence Act about the proof of attested documents

446. अथ पञ्चत्वमापन्नो लेखकः सह साक्षिभिः । तत्स्वहस्तादिभिस्तेषां विद्युध्येत न संशयः ॥ ऋणिस्वहस्तसन्देहे जीवतो वा मृतस्य वा । तत्स्वहस्तकृतैरन्यैः पत्रैस्तल्लेख्यनिर्णयः ॥ कात्या. quoted by व्य मा p 339, अपरार्क pp 689–690, परा मा III p. 134; स्मृतिच० II p 63 ascribes the 2nd to हारीत Compare sec 69 and 73 (for proof of handwriting by comparison) of the Indian Evidence Act.

447. सम्मुद्रेपि यदा लेख्ये मृताः सर्वेपि ते स्थिताः । लिखितं तत्प्रमाणं तु मृतेष्वपि हि तेषु च ॥ कात्या. quoted by अपरार्क p. 689, स्मृतिच० II. p. 64.

Harsa (E. I. VII. p. 155, 158), and from the Tārāchandi Rock Inscription (in Bihar) of Mahānāyaka Pratāpadhavaladeva (in E. I. XX. Appendix No. 340) of *saṁvat* 1225 which declares that a certain copperplate purporting to be issued by Vijayacandra of Kanoj was forged. Vide Fleet in I. A. vol. 30 pp. 201–223 for many forged grants. Verses (variously attributed to Kāt. or Bṛhaspati by the digests) state that when a loan (recorded in a document) has not been expressly claimed by the creditor able to claim from a debtor who is able to pay off and who is at hand, the document loses its validity because a suspicion arises that the debt has been paid off and that a document executed more than thirty years before which has never been seen (by any body) nor read out (by the creditor to any body) does not attain validity even though the witnesses on it are living. Nār. IV. 141 is very similar to this last. Kāt. 298–299, 301 (q by Par. M. III. 136, Mit. on Yāj. II. 24, Aparārka p. 690–691) prescribe that if no objection is raised for twenty years as regards a patent fault in a document of debt or pledge or of the settlement of boundaries, then the document ceases to be voidable Kāt. 275 and Br. (S. B. E vol. 33 p. 302 v. 25) both quoted by Aparārka p. 671 and V. P. p 122 require that the latent defects in documents or witnesses must be declared (pointed out) by the disputant at the (proper) time (i. e. when they are produced), while patent defects may be considered by the *sabhyas* at the time (of the consideration of the evidence) by reference to the rules of the śāstra. Yāj. II 93–94, Visnu Dh. S. VI. 25–26[448] prescribe that when a debtor pays part of a debt, the debtor should write on the back of the document how much he paid or the creditor may hand over to the debtor a writing of receipt signed or written by himself, particularly when the original document is not at hand, and when the whole debt is paid or the contract is fully performed the creditor should tear off the document or should execute another document in order to make clear the fact of satisfaction

The fabrication of royal edicts and private documents was so much condemned by the sentiments of society that Manu IX. 232 and Visnu Dh. S V. 9–10 prescribe the extreme penalty of death for such offences as in the case of the murder of women, minors and brāhmanas. Yāj. II. 295 (= Matsya 227. 202)

448. लिखितार्थे प्रविष्टे लिखितं पाटयेत् । असमक्षदाने लेख्यासंनिधाने चोत्तमर्णः स्वलिखितं दद्यात् । विष्णुधर्मसूत्र VI 25–26

prescribes the highest fine for him who adds to or writes less than what was intended to be declared in a royal grant or edict. Śaṅkha also prescribes death or the excision of a limb for fabrication of documents (q. by V R. pp. 298, 369).

For detailed treatment about documents in ancient and medieval India two papers in the Annals of B. O. R. Institute, vol. IX. pp 49–81 and in the Journal of the Andhra Historical Society, vol. 18 pp 203–232 may be consulted

CHAPTER XII

BHUKTI or BHOGA (possession).

According to Gaut. X. 39 a man becomes an owner by inheritance, purchase, partition, seizure (appropriation of forest trees and other things which have no owner) and finding (i e appropriation of lost property the owner of which is unknown). Gaut. (X. 40–41) adds that in the case of brāhmanas acceptance (of a thing donated) is an additional mode (of becoming an owner), that conquest in the case of a ksatriya and gain (by trade or labour) in the case of a vaiśya or sūdra are also additional modes Vas. 16. 16 mentions eight modes. Br. (quoted in V. P. p 153, Aparārka p. 635, S. B. E. vol. 33 p 309 v. 2) mentions seven modes of acquiring immovable property viz. by learning, purchase, mortgage, valour (i e. conquest), through the wife (as dowry), inheritance (from an ancestor) and succession to an issueless kinsman. Nārada (q. in Sm. C. II p. 70) mentions the same except mortgage. None of these expressly says that long possession is by itself a source of ownership Great divergence[449] has prevailed throughout the centuries among the sages and digests about the relation of title and possession and about the length of possession necessary for making a person secure in his right to property by reason of possession Possession (*bhukti*) may be with title (*sāgamā*) or without title (*anāgamā*). Āgama means 'origin' or 'source of title' such as purchase or simply 'title'.[450] Manu VIII. 200, Yāj II. 27, Nār. IV. 84 employ that word in that sense Vide Kāt 317 (q. in Sm. C II p 73 and Par. M III. p 141) If property is held in one of the modes of acquiring ownership stated above and there is also possession, one's right to that property is indefeasible (Nār. IV. 85, Br. q. by Sm. C. II. p. 70, S. B. E. 33 pp. 309 and 312 v. 3 and 22), but possession without a clear title

---

449. Vide *Lalubhai v. Bai Amrit* I. L R 2 Bom 299, 304 ff, where Mr Justice West enters on an elaborate analysis of the doctrines of the Mit. and the Vyavahāramayūkha on title and possession

450 स्वस्वहेतुः प्रतिग्रहक्रयादिः आगमः । मिता. on या II 27, आ समन्माप्यते प्राप्यते स्वीक्रियते येन स आगमः क्रयादिरिति व्यवहारमातृका । आगमः साक्षिपत्रादिकमिति दीपकलिका । आगमो धनार्जनोपायः क्रयादिरिति मैथिलाः । व्यवहारतत्त्व p. 225.

does not lead to (or ripen into) ownership[451] (with certain exceptions to be noted later on) Vyāsa and Pitāmaha[452] declare that possession in order to be valid must have five characteristics viz it must have title behind it, must be of long standing, unbroken, free from protest (by another person) and in the presence (i. e before the very eyes) of the opponent (q in Mit on Yāj II 27 and Aparārka p 635) Even title, if not accompanied by some slight possession, has no strength, while title is stronger than possession not handed down hereditarily (Yāj II. 27) Nār. IV. 85 states that possession becomes strong when backed by clear title. These passages present some difficulty and make title and possession depend on each other. Nār. IV. 77 states that even if there be a document or witnesses to support a man's title, when there is no enjoyment, particularly in the case of immovable property, there is no validity All that is meant is that a transfer without possession though under a deed or before witnesses is risky and that title and possession lend support to each other as stated by Nār IV. 84–86, Br, Hārita and Pitāmaha[453] Nār (IV. 86–87) declares that one who pleads mere possession and no title at all should be considered a thief on account of his putting forward the deceptive plea of possession (which even a thief can assert) and that the king should punish as a thief one who enjoys a property even for hundreds of years without title. All that this last verse means is that the person in possession must prove legal origin or such a long possession that there is no possibility of an inference that the possession

453. पित्र्यलब्धक्रयाधानरिक्थशौर्यप्रवेदनात् । प्राप्ते समर्विधे भोगः सागमः सिद्धिमाप्नुयात् ॥ बृह. in व्यव नि. p 126, व्य. प्र p. 153, न मूलेन विना शाखा अन्तरिक्षे प्ररोहति । आगमस्तु भवेन्मूलं भुक्तिः शाखा प्रकीर्तिता ॥ हारीतः; नागमेन विना भुक्तिर्नागमो भुक्तिवर्जितः । तयोरन्योन्यसम्बन्धात्प्रमाणत्वं व्यवस्थितम् ॥ पितामहः, both q by स्मृतिच II p 70, स वि p 131. The व्यव. नि which regarded *tripurusa-bhoga* as equal to 60 years (p. 128) briefly explains the strength of title and possession as follows: आद्यविंशतावागमप्राबल्यं भोगस्य तदाढ्यगुण्यात् । द्वितीये भोगागमयोः साम्यम् । तृतीये भुक्तेः प्राबल्यम् । चतुर्थे पुरुषे पञ्चाङ्गभोग एव प्रमाणं नागमापेक्षेति सिद्धम् । p. 132

of his ancestor originated is wrong. Delivery of possession was the principal mode of transferring ownership in ancient times in almost all systems of jurisprudence and so possession was given great weight as evidence of ownership.[454] The Mit. on Yāj. II. 27 makes the position clear. In the case of a gift or sale there must be the cessation of the ownership of the transferor and the arising of the ownership of the transferee. This last occurs only when the transferee accepts the property and not otherwise. Acceptance is mental, vocal and physical (i. e. the acceptor makes a resolve to accept, says that he accepts and takes physical possession). These three may exist in the case of such movable articles as gold, clothes &c But in the case of a field physical acceptance is not possible except by enjoying the fruits or profits thereof Therefore in order to make a gift or sale perfect there must be some slight possession at least In the absence of such possession mere title is weak. Title may succeed against the man in possession who has no title and who has not been in possession for the prescribed period (such as three generations). If the possessor proves possession for that period he will succeed against one who has bare title and no possession whatever. If it is known or proved that a man purchased from A but got no possession and that another purchased from A subsequently and got possession (but was not in continuous possession for the prescribed period) the prior title though without possession will prevail over the later one, acc. to Yāj. II 23. But when it is doubtful as to which title is prior and which posterior the one with possession will prevail. Where the possession has been uninterruptedly with a man's ancestors for three generations he will succeed against one who has bare title. Therefore possession was not absolutely indispensable for transfer even acc. to the Mit. and other works, but title without possession was risky and so possession was insisted upon as it was 'nine points of law'. It follows, acc. to the Mit., that (1) when possession was comparatively of short duration and not supported by any title much weight was not attached to possession and title by itself would prevail against it, that (2) continuous possession for three generations (though there is

454. In English Law until the year 1845 (8 and 9 Vic. chap. 106, sec. 2) land could in theory be conveyed in no other method than by delivery of possession and no deed or conveyance was in itself of any effect. Vide Salmond's Jurisprudence, 9th ed. 1937, p. 620.

nothing to show there was title to begin with) will prevail over a mere documentary title and that (3) a prior title with less than the possession for three generations (but with some possession) succeeds over a later title accompanied by possession. Long possession was assumed to have originated in legal title, although owing to lapse of time it was not possible to prove the origin [455] The main controversy has raged round the question of what is long possession. Yāj II. 24 literally translated means ' loss of land results in twenty years when it is enjoyed by a stranger before the owner's very eyes and without any protest from him and loss of chattels (results under similar circumstances) in ten years '. Manu VIII 147-148 and Nārada IV. 79-80 have two verses in common which mean ' If the owner of anything silently looks on (i. e raises no protest) when it is being enjoyed in his presence for ten years by strangers he does not deserve to recover it (i.e he loses the thing). When the owner is not an idiot nor a minor and his property is enjoyed within his sight then the property being lost by his conduct (*upayahāra*) comes to belong to the enjoyer '. Gaut. XII. 34 has almost [456] the same words as Manu VIII 148. Śankha (in V. R p 208) also refers to ten years. These passages apparently mean that at the end of 20 or 10 years' adverse possession by the wrongful possessor the ownership of the original owner is lost and the wrongful possessor becomes the owner. But there are several other smrti passages where it is said that possession even for a hundred years originating in wrong cannot confer title and much longer periods are required for the loss of ownership and the acquisition of ownership by prescription Vide Nār IV. 86-87 cited (on p 318 above) Nār. (IV 89) himself says elsewhere that possession requires

455 Under the Law of England 'Time immemorial or time whereof the memory of man runneth not to the contrary ' was considered to include the whole period of time from the reign of Richard I This was a very inconvenient and absurd rule which was abrogated by sec 1 of the Prescription Act of 1832 (2 and 3 William IV, chap 71) whereby the rights to any land became absolute and indefeasible by sixty years' uninterrupted enjoyment before that Act (except when the enjoyment was by some consent or agreement made under a deed) By French Law the time of memory was held to extend for one hundred years as done by the Mit and other Sanskrit digests. Vide Salmond's Jurisprudence (9th ed of 1937) p 265. *note y.*

456. अजडापोगण्डधनं दशवर्षमुक्तं परैः सन्निधौ भोक्तुः । गौ. XII. 34. ग्रामनगर क्षेत्रश्रेणिविरोधे दशवर्षमुक्तमन्यत्र राजविप्रस्वात् । शङ्ख q. in वि. र. p. 208.

to be supported by title only during *smārtakāla* (during human memory), but in cases beyond human memory possession continued successively for three generations (or ancestors) is proof of ownership even in the absence of a document (or other title). Visnu Dh. S. V. 187 is in similar[457] terms. The Mit. on Yāj. (II. 27) says that *smārtakāla* is a period of 100 years, as the Veda declares that the span of a man's life is 100 years. For a hundred years it is possible for witnesses to depose to the origin of possession. So if there is possession for less than one hundred years, oral evidence can be adduced for establishing its origin, and title will have to be proved by the possessor and if no oral evidence is adduced to prove title, it is a case in which it may be held as certain that there was no title to begin with. Mere possession is not enumerated by sages like Gautama among the means of acquiring ownership. As the Sarasvatī-vilāsa (p. 124) puts it, long uninterrupted possession only leads to an inference that it originated in title acquired by sale, gift or the like i. e. there arises a presumption of lawful origin[458] Therefore in order to enable a man to rely on possession alone as proof of ownership it must extend uninterruptedly over 100 years (acc. to the Mit). The Smṛticandrikā[459] (II. p. 72) accepts this meaning, only requiring 105 years' possession instead of 100 years'. Acc. to a smṛti quoted by it each generation means 35 years and so when Nārada requires possession for three generations 105 years are meant (acc to Sm. C.) Visnu Dh. S. V. 187, Kāt (327) also hold that continuous enjoyment for three generations makes the fourth generation owner of the land. Kāt. (321 q. by Mit. on Yāj. II. 27, Aparārka p 636) states 'in cases falling within the memory of man it is desirable that possession must be accompanied with title

457 त्रिभिरेव तु या भुक्ता पुरुषैर्भूर्यधाविधि । लेख्याभावेपि तां तत्र चतुर्थः समवाप्नुयात् ॥ विष्णुधर्मसूत्र V. 187. The same is ascribed to both विष्णु and कात्यायन by व्य मा p. 341 The व्यव. नि p 130 ascribes it to अग्निमित्र.

458. मुक्तिरपि कैश्चिद्विशेषणैर्युक्ता स्वत्वहेतुभूतक्रयदानादिकमभ्युपेक्षारादनुमापयति । अन्यथानुपपद्यमाना कल्पयतीत्यनुमानेऽर्थापत्तौ चान्तर्भवतीति प्रमाणमेव । सरस्वतीविलास p 124, these words are apparently taken from the व्यव. नि p. 73.

459. एतदुक्तं भवति । स्मरणयोग्ये पञ्चाधिकशतवर्षपर्यन्तातीतकालमध्ये प्रारब्धा मुक्तिः स्वेतरप्रमाणावगतागममूलैव स्वत्वे प्रमाणमिष्यते । स्वतः स्वमूलावगतेर्योग्यानुपलब्ध्या बाध्यमानत्वात् । स्मरणयोग्ये पुनः पञ्चाधिकशतवर्षपर्यन्तातीतकालात्प्राचीनकाले प्रारब्धा स्वदार्ढ्यावगतागममूलिका विनापि मानान्तरावगतागममूलतां स्वत्वे प्रमाणमिति । स्मृतिश्च II. p. 71.

(in order to be proof of ownership as to land); but in cases beyond the memory of man possession extending over three generations in succession (is independent proof of ownership), since there is no certainty that there was no title (to begin with)'. Vide also Br. (in S. B. E. vol. 33 p 313 verses 26-28). 'Three generations' is a vague expression. The great-grandfather, the grandfather and the father of a man may die in the space of ten years and if the great-grandfather took possession wrongfully and all died within ten years of the time of taking possession one after another, the fourth in descent might urge that there was possession for three generations and that he had become owner. Therefore Kāt. in another verse (318, q by Aparārka p 636 and V. P. p. 155) laid down that unbroken possession for three generations extending over sixty years becomes firm (independent means of proof of ownership) Thus *tripurusa-bhoga* or *pūrvakramāgata-bhoga* (in Yāj II 27) means the same thing as possession continuing from a time beyond human memory (*asmārta-kāla*) and is equal to 60 years acc. to Kāt, Vyāsa and a few other smrti writers[460]. Nārada (q. by Aparārka p 636) says that as regards possession one generation means twenty years, while Br. (q by Sm. C. II. p 72) says it means thirty years. It will be noticed from the above that early authors like Gaut, Manu., Yāj appear to lay down 20 years' adverse enjoyment of land as sufficient to create ownership, while other and comparatively later authors like Nār. and Kāt. require sixty years enjoyment In order to remove this conflict and following the maxim that apparently conflicting texts should be reconciled as far as possible, the writers of commentaries and digests from Viśvarūpa and Medhātithi (on Manu VIII· 148) downwards proposed various interpretations of Yāj. II 24 and similar texts. Some lay emphasis on possession and others on title. There are at least three explanations Aparārka (pp. 631-632), Kullūka and Raghunandana take the literal sense and say that on 20 years' adverse possession there is loss of ownership (i e. there

460 मुख्या पैतामही भुक्तिः पैतृकी वापि संमता। त्रिभिरेतैरविच्छिन्ना स्थिरा षष्टाब्दिकी मता॥ कात्या०; वर्षाणि विंशतिं भुक्ता स्वामिनाऽध्याहृता सती। भुक्तिः सा पौत्रकी भुक्तिर्द्विगुणा च द्विपौत्रकी। त्रिपौत्रकी च त्रिगुणा न तत्रान्वेष्य आगमः॥ नारद; both quoted by अपरार्क p. 636, and व्य म. p. 155 which ascribes the verses वर्षाणि &c to व्यास; परा III. p 142 also ascribes it to व्यास. प्रपितामहेन यद्भुक्तं तत्पुत्रेण विना च तत्। तौ विना यस्य पित्रा च तस्य भोगस्त्रिपौत्रकः॥ व्यास q in व्यवहारमातृका p. 341.

is *svatvahānam*)[461]. The 2nd explanation is that the meaning of Yāj. II 24 is that after 20 years' enjoyment by a stranger, if the owner brings a suit and relies on a document in his favour, he runs the risk of being unable to prove his ownership barely on the strength of the document, since it is possible to argue that, even though he had a document, by his silence he acquiesced in the stranger taking possession and tacitly consented to it. Therefore all that Yāj II. 24 means or recommends is that an owner should not be negligent (*upekṣā*) or should not remain silent when a stranger takes wrongful possession This view was first started by Visvarūpa among extant writers and it approaches the modern idea of requiring vigilance in the assertion of ones' rights[462], that is there is only loss of the suit (vyavahārahāni). This view lays emphasis on a verse attributed to Nār. and the word *vyavahāra* in it and in Manu VIII 148 and Nārada IV. 80, where the word means lawsuit also, the idea being that the sages declare only what would happen or be decided by the judges in a law court and do not intend to say that the decision would be just or righteous from the higher or the moralist's point The third view is that of the Mit. (followed by the Vyavahāramayūkha, Mitramiśra and several others) which[463] explains that the loss is not that of the ownership of the thing itself but of the produce of it (there is only '*phala-hānam*') i e. if without protest the owner allows a stranger to remain in possession before his very eyes for twenty years and then he brings a suit, he may succeed in getting back his land but he would lose his claim to the profits of the land. The Mit., the Vyavahāramātrkā and V. P (pp 157–165) contain very

elaborate discussions on Yāj. II. 24; but considerations of space forbid any further reference to them. The V M [464] connects Yāj II. 24 with the preceding verse (viz that in mortgages, gifts and sales a prior transaction prevails over a later one) and remarks that this verse (Yāj. II 24) says that if a person after a gift, sale, or mortgage to him allows the property to remain with the seller, donor or mortgagor, who subsequently transfers it to another with possession and the latter holds it for twenty years, then the first dealing though prior is of no avail (as it is not accompanied with possession for 20 years). Śrīkara (as stated in the Vyavahāramātrkā) tried to reconcile the conflicting smrti texts by holding that in twenty years the real owner lost ownership if he was present and did not protest while a stranger was in possession, but passages speaking about possession for three generations (or sixty years) applied only where the owner was absent. The Mit. and others point out that Yāj II. 24 (who employs the words 'paśyatah' and 'abruvatah') conveys that if a stranger takes possession while the owner is absent or if the owner protests, then even 20 years' possession does not lead to the loss of anything. The text of Nār. IV. 87 quoted above (p. 318) shows that the sage held that possession for several hundred years even would not avail the possessor if it is certain or established that the possessor had no title at all to begin with or that his possession started wrongfully. This text is emphasized by those who favour title and want to discourage persons benefiting by their own wrongdoing But there are other smrti texts of a contrary tenor. For example, Nār. IV. 91 himself says 'whatever has been enjoyed even unlawfully for three generations (i e by three ancestors) including the father cannot be recovered by the owner from the person (who is the 4th in succession) because it has gone through three lives in succession'; a text of Hārīta states 'what has been enjoyed by three prior ancestors without any title whatever cannot be recovered back (from the present holder, who is 4th), since it has descended successively through three generations' These two are relied upon by those who hold long possession as leading

464. अयं तत्त्वार्थः। क्रीताहितप्रतिग्रहीतां द्विधनभूमिगतः परस्य दशविंशतिवार्षिको भोगः क्षमाकारणजडपोगण्डत्वाद्यभावेष्वपेक्षितत्वाद्धानिं कुरुते। स्वोपभोगार्थं तेन क्रयादेश्च तेनोपेक्षितत्वादिति मुनीनामभिप्रायः। तस्मात् 'पश्यतोऽब्रुवत' इति वचनं 'आधौ प्रतिग्रहे क्रीते' इत्यस्यापवादकम्। आधिग्रहणक्रयणप्रतिग्रहकर्तृणामाहितक्रीतप्रतिगृहीतेषु गवाश्वाद्विषु योन्येषु दशवर्षाणि परभोगोपेक्षया स्वत्वहानिः। भूमौ तु विंशतिवार्षिकी। तेन वचनात्कारणत्वेनावधारिता उपेक्षा कार्यभूतां स्वत्वहानिं ज्ञापयति। व्यवहारमातृका p 348–49

to an inference of title (*tripurusa-bhuktavādinah*, as Medhātithi on Manu VIII. 148 calls them). These like the Vyavahāratattva and Vivādacandra[465] who rely solely on possession boldly say that long possession even originating in wrong leads to ownership. Medhātithi says 'there can be no memory of the origin of title when there has been possession for hundreds of years and (if title had to be proved for the origin of such possession) a king may resume villages enjoyed by ancient temples, brāhmanas and mathas; therefore ancient possession is evidence of ownership because it makes it extremely probable that the ancient possession originated in gift or the like'. The Mit. on Yāj. II. 27 (which is *svatvavādi*) refers to all the three views, refutes the first two and accepts the view of loss of profits It does not literally interpret the texts of Hārita and Nārada quoted above, takes them to be over-statements and intended to convey that continuous possession for over three generations cannot be interfered with even if there is no clear proof of the origin of title In modern India under the Indian Limitation Act (IX of 1908) the tendency is to prescribe the very short period of twelve years for adverse possession in order to defeat a title, following the English Real Property Limitation Act of 1833 (3 and 4 William IV chap. 27), sec. 2 of which insisting on vigilance by every one about one's rights however prescribes the period of 20 years within which to bring an action for recovery of land. Modern case law has rather gone too far and sets a premium on wrongful possession by holding that it is not necessary that adverse possession should have been brought to the knowledge of the real owner[466] Ancient Hindu lawyers put down the tendency to usurp another's property and placed many obstacles in the way of the wrongful possessor.

It may be noted that there were a few rare texts that referred to very short periods for possession causing loss of

466 Vide *The Secretary of State for India v Debendra Lal Khan* 61 I A p 78 at p 82 (=36 Bom. L R 249) and *Srischandra Nandy v. Baijnath*, 62 I A 40 at p. 44 (=37 Bom. L R 323).

title, viz. 3 years for immovable property (provided there was no permissive origin, *kṣamālinga*) or one year for corn, cattle and other movables[467]. This idea being opposed to innumerable texts was explained away as merely conveying the great importance of possession. Marici states[468] that cows, beasts of burden, ornaments that are borrowed through friendship should be returned within four or five years, otherwise the owner would lose them This is opposed to Manu VIII. 146 and other texts and so is explained as being applicable only if there is no sufficient cause for allowing them to remain with the borrower. The ancient Roman Law was very like this. Before Justinian the Roman Law gave the ownership of a thing by quiet possession bona fide and founded on good title if maintained during one year over movables and during two years over immovable property[469]. Justinian altered this and provided that possession during three years gave ownership of movables and possession during ten years (if parties resided in the same province) or during twenty years (if they did not) gave the ownership of immovable property.

Br (S. B E. vol. 33 p. 314 verse 31) lays down the proposition that if a person has title and is already in possession and is dispossessed by another then he may succeed in a lawsuit on the strength of his prior possession provided the dispossessor does not establish continuous possession for three generations[470]. This is similar to a suit in ejeotment contemplated by Art 142 of the Indian Limitation Act.

Br (S B E vol 33 p. 310 v. 11) and Kāt. 335 (both quoted by Aparārka p 637, V. P p. 166) state that what is enjoyed by a man's agnates and cognates and his own people does not pass to their ownership by their mere possession; one should regard

possession (as leading to ownership) in cases other than these. Pitāmaha states that possession by a stranger is powerful, but possession by members of one's own family has certainly not the same force[471]. This appears to adumbrate the principle of modern law that possession by one co-owner or one tenant-in-common is ordinarily the possession of all co-owners and the mere fact that the profits of a property have been enjoyed by only one co-heir or tenant-in-common for many years does not by itself amount to the ouster of the other tenants-in-common[472]. It is stated in Gaut. XII. 35 that property which is enjoyed for a long time by a śrotriya, an ascetic or a king's officer is not lost to the owner by that enjoyment, since the owner may have thought that he would reap long-enduring spiritual merit by the first two enjoying this property (such as a vacant house) or that he might be prevented from asserting his right from fear (of the royal official). Compare Br. (S B. E. vol 33 p. 311 v. 12).[473] Manu VIII. 149 (=Nār. IV. 81 and Vas. 16. 18), Yāj II. 25, Br. (S. B. E. 33 p. 312 v. 21), Kāt. (330) state the following exceptions to the rule of loss by long possession; a mortgaged or pledged property, boundary, minor's property, an open deposit, a sealed deposit, women (female slaves), the property of the king i. e. (of the State) and the property of a brāhmaṇa learned in the Veda are not lost by the possession of another (for twenty or ten years referred to in Manu VIII. 147 and Yāj. II. 24). Manu VIII. 145 provides that neither a pledge nor a deposit can be lost by lapse of time and that both are recoverable even if they have remained long (with the pledgee or depositee). Yāj II. 25 adds to the above list the properties of idiots and of women. Nār. IV. 83 emphatically states that women's property (strīdhana) and state property (land) is not lost even after hundreds of years, when it is enjoyed without title. Kāt. (330) adds to the above list temple property and what is inherited

from the father or mother[471]. All systems of jurisprudence throw protection round the interests of minors, persons of unsound mind and others similarly situated and provide longer periods of possession for loss of their right The Mit. on Yāj II. 25 gives reasons why the several exceptions are made· in the case of a pledge or mortgage the property is enjoyed by the pledgee or mortgagee under an agreement and so there is no fault on the part of the owner if he remains quiet while the property is being enjoyed by the creditor, boundaries between villages can be easily established by such signs as trees (growing on the border), streaks of chaff and coal (buried underground), deposits are entrusted to a person out of confidence for being preserved and not for enjoyment; idiots and minors are ignorant or incapable of understanding their rights, the king being engrossed in numerous state affairs may not be able in time to look into the question about possession of state properties; women on account of their ignorance and timidity may not assert their rights and a learned brāhmana being devoted to learning, teaching and performance of rites and duties may have no time to go to law. In modern times also the law favours minors and other persons as indicated in the note below[475]. Kāt (331–334 q. by Par. M III. p 148, Sm C II p. 69

474. न भोगं कल्पयेत्क्षीणे देवराजधनेषु च। बालश्रोत्रियचित्ते च मातृत. पितृत: क्रमात् ॥ काट्या quoted in व्य मा p 351 (reads श्रोत्रियवृद्धे च प्राप्तेपि पितृत: &c), स्मृतिच. 475 Under the Indian Limitation Act, a mortgagor can sue for redemption and possession within 60 years from the time when the right to redeem accrues (Art 148), though for ordinary suits for possession the period is 12 years, while a pawnor of moveable property has 30 years (Art 145) from the date of the pawn, if a thing is entrusted to a man for a specific purpose as a trustee then sec 10 of the Limitation Act provides that no length of time will bar a suit for recovering from him or his legal representatives or voluntary assigns the trust property or its proceeds (*upanidhi* and *nikṣepa* may be examples of trust), a suit on behalf of the Secretary of State for India can be brought within 60 years (Art. 149), sections 6–8 provide longer periods for persons who were minors, idiots or lunatics at the time when their rights were invaded Under the Real Property Limitation Act of 1833 (3 and 4 William IV chap 27 sections 16 and 17) a suit could be brought within ten years of the time when the disability ceased in the case of minors, lunatics, idiots, *those absent beyond the seas*, but no suit can be

(*Continued on the next page*)

which ascribes them to Nārada) prescribes that in the case of a *Snātaka*, engaged in his vow of veda study extending over 36 years, and in the case of a man who remains in a foreign country in pursuit of wealth, enjoyment extending over 50 years will alone make him lose his property by the possession of another ; that when a person has been a student for a shorter period than 36 years he may get longer additional periods proportionately and that when a person is in jail time does not run against him

(*Continued from the last page*)

brought beyond forty years from the starting point Section 13 of the Indian Limitation Act provides that when the defendant is absent from British India the plaintiff can add the period of defendant's absence to the period prescribed for bringing a suit but does not provide for the rule of Kāt which allows a longer period for loss of right when a person (who may have to sue) is absent in a foreign country. Under the Civil Law of Rome the rule was ' *nullum tempus occurrit regi* ' (lapse of time does not bar the right of the crown) Vide *Vyakunta v Government of Bombay* 12 Bom H C R (O. C J.) 1 at p 217 for this rule and its limitation under modern Indian Law

CHAPTER XIII

WITNESSES (*sākṣinaḥ*).

The word *sākṣin* occurs in the Śvetāśvataropanisad[476] (VI. 11) where it is applied to the one immanent Spirit of the universe as All-seeing. Pāṇini[477] V. 2. 91 explains the word *sākṣin* as meaning 'one who has directly seen' Gaut[478] XIII. 1, Kauṭ III. 11, Nār IV. 147 state that when two persons litigate and there is a doubt or discrepancy between the two the determination of the truth in the dispute is due to witnesses Manu VIII. 74, Sabhāparva[479] 68 84, Nār. IV. 148, Visnu Dh. S. 8 13, Kāt 346 (q in V M p 317 and V. P p 106) provide that a (proper) witness is one who has himself either seen or heard or experienced the matter in dispute. This means that the evidence of a witness must be direct and should not be what is called hearsay. Medhātithi (on Manu VIII. 74) says[480] that hearsay evidence occurs when a person who hears from another that has himself heard something from another comes forward as a witness and that hearsay is no legal evidence. Manu VIII. 76 prescribes that even though a man may not have been expressly asked or appointed by the parties (in the words 'you are the witness to this transaction'), he is a proper witness when asked as to any matter in dispute that he has himself seen or heard The only exception to hearsay evidence allowed by

the Visnu Dh S. VIII. 12 is that[481] when a person that is appointed as a witness is dead or gone abroad, those who have heard what he said may give evidence It has already been stated (p 297) that a king was not to delay the examination of witnesses Kāt. (340-341 q by Aparārka pp 675, 677, Sm C. II. p 92, V. M p. 331) prescribes that the king (or the chief judge) should himself examine the witnesses that are present (in court) and should consider along with the *sabhyas* the statements made by witnesses and that, where it is doubtful who the witnesses on a disputed matter are, time should be given for producing the witnesses in order to ascertain the proper means of proof but that where it is clear who the witnesses may be he should make the hearing of the case proceed at once Kāt (352) further prescribes[482] that when it is impossible to bring witnesses because they reside in a foreign country, evidence taken in writing before a man learned in the three Vedas and sent by him should be read in deciding the cause[483]. Gaut. 13. 2, Manu VIII. 60, Yāj. II 69, Nār. IV. 153 and others require that ordinarily there should be at least three witnesses in a cause. Br. (S. B E 33 p 301 v. 16) says that there may be nine; seven, five, four or three witnesses, or two only if they are learned brāhmanas[484]. Visnu Dh S VIII 5 and Br. (S. B. E vol. 33 p 301 v 16) emphasize that a single witness alone cannot be examined for deciding a matter[485].

481 उद्दिष्टसाक्षिणि सृते देशान्तरगते वा तदभिहितश्रोतारः प्रमाणम् । विष्णुधर्मसूत्र VIII 12

483. This corresponds to the modern rule of taking evidence on commission as provided for in Order 26 rules 4 and 5 of the Indian Civil Pro Code (of 1908)

484 नव सप्त पञ्च वा स्युश्चत्वारस्त्रय एव वा। उभौ वा श्रोत्रियौ ब्रूयातौ नैकं पृच्छेत्कदाचन ॥ बृह q by स्मृतिच II 76 (adds उभावपि लिखितगूढसाक्षिविषयम्), परा. मा. III 95, व्य प p 112.

485 Vide Best on 'Evidence' (12th ed of 1922) p 515 The Mosaic law in some cases and the Civilians and Canonists in all exacted the evidence of more than one witness, a doctrine adopted by most nations in Europe and by the ecclesiastical and some other tribunals among us' According to the Common Law of England and the Indian Evidence Act (I of 1872) sec 134, no particular number of witnesses shall in any case be required for the proof of any fact Best (*ibid* p 520) notices that in prosecutions for perjury the testimony of at least two witnesses is required by the Common Law of England (now confirmed by Statute) and that by Statute two witnesses at least are required in trials for treason Vide *Emperor v Bal Gangadhar Tilak* 6 Bom. L R 324 where the rule about two witnesses in convictions for perjury according to the Common Law of England was relied on

But Yāj II 72, Viṣnu Dh S VIII. 9, Nār IV 192 state that one man alone may be a witness in a cause if he is endowed with the regular performance of his religious duties (is possessed of the qualities stated in Viṣnu Dh S VIII 8) and is accepted as a witness by both sides Vide Manu VIII 77 also Br (S B E vol 33 p 301 v 18) allows a single witness to furnish valid proof if he is a dūtaka[486] (messenger), an accountant, one who has accidentally witnessed the transaction or if he is the king or the chief justice Vyāsa says[487] that even a single person may be enough in a cause, especially in heinous offences called *sāhasa*, if he be one whose actions are pure, who knows the *dharma* and whose truthfulness has been well attested before Kaut (III 11) says that a single witness (whether a man or a woman) may be enough in cases where the transaction in question was effected in secret (except the king and one performing austerities)[488] Kāt (353–355 q by V M pp 319–320, Sm. C II 76, V. P. pp. 112–113) states that even a single person may be allowed to depose as a witness if he was taken in confidence at the time of making a deposit; so also a messenger sent by a litigant for borrowing an article (such as an ornament) or the manufacturer of an article may alone be sufficient to prove the identity of the article or when a matter has been decided by the king or chief judge, the scribe, the chief justice or any one of the sabhyas may alone prove the plea of *res judicata* or the point as to what was said by the plaintiff or the defendant in a suit[489] Vide Br (S B E. 33 p 300 verses 13–14).

The qualifications of witnesses to be examined in a suit are stated in numerous places such as Gaut XIII. 2, Kaut III 11, Manu VIII 62–63, Vas 16·28, Śankha-Likhita (q in S. V. p 138), Yāj II 68, Nār IV 153–154, Viṣnu Dh S VIII 8, Br (S. B E vol 33 p 302 v 28), Kāt 347 (in Sm C II p 76 and

---

486 Br (S B E vol 33 p 300 v 8) defines a *dūtaka* as one who is a respectable man esteemed and appointed by both parties and had come near to listen to the speeches of the parties

487. शुचिक्रियश्च धर्मज्ञ साक्षी यत्राद्भुतवाक् । प्रमाणमकोपि भवेत्साहसेषु किं पत. ॥ व्यास in स्मृतिच II p 76, व्य म p. 112

489 अर्थिप्रत्यर्थिनोर्वाक्य यच्छ्रुतं भूभृता स्वयम् । स तत्र तत्र साक्षी स्याद्विसंवादे द्वयोरपि ॥ निर्णीते व्यवहारे तु पुनर्न्यायो यदा भवेत् । अध्यक्षः सभ्यसहित साक्षी स्यात् तत्र नान्यथा ॥ बृह्. q. by अपरार्क p 667, व्य म p 108

V P p 111) The principal qualifications are;[489a] they should be born of a good family, should have lived hereditarily in the country, should be householders having a son or sons, should be well-to-do and men of character, should be trustworthy, should know dharma and act up to it, should not be covetous and should have been cited by the parties as witnesses. Some Smṛti texts such as Kaut III 11, Manu VIII 68 (=Kāt. 351 and Vas. 16·30), Kāt 348 provide[490] that ordinarily witnesses should be of the same *varṇa* or caste as the parties, that women should be witnesses in disputes between women, that men of the lowest castes (*antyajas*) should be witnesses for litigants of those castes and that a litigant of a lower caste should not try to prove his case by citing witnesses of a higher caste or a brāhmaṇa (unless the latter is an attesting witness on a deed). But most (even including Gaut and Manu) give an option and say that persons of all castes (even śūdras) may be witnesses for all. Vide Gaut. XIII 3, Manu VIII. 69, Yāj. II. 69, Nār. IV. 154, Vas. 16·29 (*sarveṣu sarva eva vā*). Nār. IV 155 and Kāt (349–50 q by Aparārka p 666 and V. P. pp 111–112) provide[491] that in disputes between members of groups such as those who wear peculiar symbols (indicative of their sect), śreṇis (guilds), pūgas (associations), companies of traders and all others who work in groups and who are therefore called *varga*s and in the case of slaves, bards, wrestlers, elephant riders, horse-trainers and soldiers the heads (called *varga*) of these groups are the proper witnesses. Gaut. XI. 21 says that in disputes among members of classes of agriculturists, traders, cowherds, money-

lenders and craftsmen (such as carpenters and washermen), the help of other members of the same calling may be taken as witnesses and arbitrators.

Long lists of persons who are generally to be regarded as incompetent to be witnesses are given in Kaut. III. 11, Manu VIII 64–67. Udyogaparva 35. 44–47, Yāj II 70–71, Nār. IV. 177–187, Visnu Dh. S. VIII. 1–4, Br (S B E vol. 33 p. 303 vv. 29–30), Kāt 360–364 (q by Aparārka pp. 669–670, Sm C II pp 77–78, V. P p. 119) Manu VIII 118 states the general grounds why oral evidence tends to be false viz covetousness, infatuation, fear, desire of pleasures, anger, friendship, ignorance, minority. As the list of incompetent witnesses in Nār. is the longest,[492] that alone is set out here. one who has monetary[493] interest in the parties or the subject matter of the suit (such as a co-sharer, creditor and debtor of the parties), a

---

492 Vide appendix for the verses of Nārada The commentaries and digests give various interpretations of some of the words A few such are stated in the next note

493 The Mit explains 'arthasambandhin' as 'vipratipadyamānārtha sambandhin' while V P. p 117 explains as 'creditor or debtor' of a party. 'Āptāh' is defined by Kāt 361 (quoted by Aparārka p 669) as 'those who depend for livelihood on the subsistence given by a party to the suit or those who serve him or cause benefit to him or those who are his relatives, friends or servants' Sm C explains 'cākrika' as a bard, while V P. (p 118) as oil-presser. The printed text of Nār reads 'asrāddha' (who is not invited at a śrāddha), while V P and others read 'aśraddha', for vrātya (one whose upanayana has not been performed) vide H of Dh vol II p 376, 'prāg-drstadosa' is explained by Asabāya as 'one who suffers from a disease which is the effect of evil actions done in past lives' Kāt 362 (q by Aparārka p 669) explains 'sanābhayah as sons of one's mother's sister or one's full sister or one's maternal uncle The printed text reads 'śrānta', while Sm C II p 78 reads 'aśānta' (restless) and V P 117 reads 'aśrānta' (one constantly engaged in work) Kulika is explained as 'one appointed by the king to decide causes' (by Kalpataru), while the Madanaratna says 'he is the person in authority over a kula i e a group of brāhmanas or the like'. Vide V P p 119 Sm C II p 78 and V P p 118 read 'sūcaka' (one appointed by the king to find out crime amoog the people) for 'stāvaka' of the printed Nār

friend (or relative such as an uncle); associate (in undertakings); enemy; one who has already been held to have given false evidence; one charged with (or addicted to) sins; a slave; one who is in the habit of finding the weak points of others (or harming others); one who has no faith in religion; a very old man (above 80 years); a minor; a woman; an oil-presser; one intoxicated; a lunatic; one who is extremely inattentive; one distressed; a gambler; a village priest; one who undertakes long journeys (on the great roads); one who is a merchant engaged in sea voyages; an ascetic (who has renounced the world); one sick; one bereft of a limb; one who is the only witness; a brāhmaṇa learned in the Veda; one who does not perform the customary religious rites; an impotent person; an actor; an atheist; a *vrātya*; one who has abandoned his wife; one who has given up *agnihotra* (daily offerings into *śrauta* or *smārta* fire); one that officiates as priest for persons who are not entitled to perform vedic sacrifices; one who is an associate in eating food from the same vessel in which food is cooked (i e. who is in commensality with a party); a former enemy (*aricara* as one word); a spy; an agnate, a cognate (or born of the same womb); one whose evil doings in former lives are seen clearly; a public dancer (śailūsa, or one who makes his women actresses); one who lives by (i. e. buys or sells) poison; a snake-catcher; one who is a poisoner, an incendiary, a mean person (*kināśa*, or parsimonious person); the son of a śūdra woman (from one of a higher caste); one guilty of a minor sin (upapātaka); one fatigued; a desperado; one who has relinquished all attachments; a person who is penniless (through gambling or other extravagance); a member of the lowest (untouchable) caste; one leading a bad life; a brahmacārin who has not yet returned from his teacher's house: an idiot; an oil-seller, a seller of roots; one possessed (by a ghost or demon); one hated by the king; a weather-prophet; an astrologer; one who proclaims to the public the sins of others; one who has sold himself (for money): one who has a limb too little (e. g. having four fingers to the hand): one who lives on the immorality of his wife, one who has bad nails: one with black teeth; one who has betrayed his friend; a rogue; a seller of liquor; a juggler, an avaricious man; a ferocious man; an opponent of a śreni (guild) or gaṇa (association); a butcher; a hide-worker; a cripple; one excommunicated for a grave sin (like brāhmaṇa-murder); a forger (of documents or coins or weights &c); one who employs incantations and drugs for influencing

others: one who is an apostate[494] from the order of ascetics (*pratrajitasaka*); a robber; a servant of the king, a brāhmana who sells human beings, cattle, meat, bones, honey, milk, water or clarified butter; a member of the three higher castes who engages in usury; one who has given up the peculiar duties of his caste (or station); a *kuhaka*; a bard; one who is the servant of a low person; one who has quarrelled with his father, one who causes dissensions Kaut III 11, Manu VIII 65, Visnu Dh S. VIII. 1 and several others say that the king cannot be cited as a witness[495] (except possibly to prove the plea of *res judicata* or to prove what transpired before him when a litigation was going on)

The above is a formidable list of incompetent witnesses, therefore, most Smrtis such as Gaut XIII 9, Kaut III 11, Manu VIII 72, Yaj II 72, Nār IV 188-189, Visnu Dh S III 6, Usanas (q. in Sm. C II p 79), Kāt 365-366 (q in Sm C II. p 79) expressly point out that strict examination of the character of witnesses should be entered upon in disputes about debts and

---

494 In *Omichund v Barker* (Willes 1737-1860 p 538) where Willes (Lord Chief Justice) says (at p 551) that in Popish times and for some little time afterwards till the Reformation was fully established there was a notion that 'even an alien friend especially if he were an infidel could not sue in a court of justice here' That shows how non-Christians found it difficult to sue in England for their just rights a few centuries back In the case cited above Lord Chief Justice Willes had to deliver an elaborate judgment in 1745 for holding that evidence taken in India according to the oaths administered to non-Christian witnesses could be read in a trial held in England. So one need not laugh at Nār who flourished at least about 1200 years before that date if he held an atheist or an apostate to be an incompetent witness It should be noted that 'By the canon Law a Jew is not admitted to give evidence against a Christian, especially if he be a clergyman,' vide Taylor on Evidence (ed of 1848, p 655 note C.)

495. Vide Taylor's 'Law of Evidence' (12th ed) vol II p 872 para 1381 about the sovereign giving evidence on oath, his considered opinion being (after referring to the case of *R v Mylius* in which the defendant was prosecuted for a libel upon king George V) 'that the sovereign if so pleased may be examined as a witness in any case, civil or criminal, but not without being sworn' The व्यव. नि p 100 says नतु न साक्षी नृपति. कार्य इति राज्ञ साक्षित्वनिषेधात्। तस्य कथं साक्षित्वमिति चेत्, उच्यते। व्यवहारदर्शनकालेऽवगतेऽर्थेतु तस्यैव साक्षित्वमुच्यते, कालान्तरापेक्षया निषेधः। तथा च व्यासः। राज्ञा धर्मासनस्थेन यच्छ्रुतं तत्त्वमिच्छता। नान्यः साक्षी भवेत्तत्र मुक्त्वा राजानमीश्वरम्। इति। बृहस्पति.। निर्णीते व्यवहारे तु पुनर्न्यायो यदा भवेत्। अध्यक्ष सभ्यसहितः साक्षी स्यात्तत्र नान्यथा॥ The स्मृतिच II. p 80 and परा मा III. p. 103 have the verse of बृहस्पति न साक्षी नृपति कार्यो is मनु. VIII. 65.

the like which are of a fixed nature (of a civil nature), but that in complaints about all kinds of *sāhasa* (heinous crime), in robbery, adultery or the two kinds of *pāruṣya* (viz. defamation and assault) there should be no (strict) inquiry into the character of witnesses (that is, all can be witnesses in such cases) and that even those like slaves and fault-finders who have been enumerated among incompetent witnesses can become witnesses in grave matters[496]. The idea is that in such cases the witnesses need not be strictly examined as to their possessing the good qualities ordinarily required in witnesses But this does not authorize the examination of such persons as lunatics or idiots as witnesses, because they have not the power to understand things Manu VIII 77 emphatically states that even a single male, if he is free from greed, may be (sufficient as) a witness, but not women of good character, even though they be many, since the feminine intellect is apt to be unsteady But even Manu had to concede (VIII 70) that a woman or a minor or a very old person or a pupil, relative, slave or a hired servant may be a (competent) witness, if it is impossible to find another witness (in matters that occurred inside a house or in a forest or in crimes where life is lost). Kāt 367 (q by Aparārka p. 671) says the same thing. Uśanas[497] (quoted in the Sm. C II p 79, V. P. p. 120) provides that even a slave, a blind man, a deaf person, a leper, a woman, a minor, a very old man may be (competent) witnesses in *sāhasa*, provided they are not interested in the matter of dispute (or are not related or partial to the parties). Nār. (IV. 190–191) gives it as his view that even when there is to be no strict inquiry into the character of witnesses in *sāhasa*, still a minor, a woman, a single person, one who forges deeds (or who is a

cheat), a relative and an enemy cannot be witnesses in *sāhasa*, since a child through ignorance, a woman from her habit of untruthfulness, a forger (or cheat) because he is accustomed to doing evil deeds, a relative from affection and an enemy from the idea of taking revenge may speak falsely There was no total disqualification of women as witnesses, since Manu quoted above allows them to be witnesses in disputes between women and in cases where it is not possible to have other witnesses. Medhātithi on Manu VIII. 68 holds that women are disqualified as witnesses only where the plaintiff and defendant are both males but that where there is a litigation between a man and a woman or between women alone, a woman may be a competent witness. Ancient Hindu Law is not singular in its partial rejection of the testimony of women. Vide Best on Evidence (12th ed. of 1922) pp 53–56 where it is shown how ancient Roman Law and the Medieval laws of several countries of Europe more or less excluded the testimony of women, how some States in the U S A. excluded the testimony of negroes and persons of coloured blood. By the Canon Law more credit was given to male than female witnesses (Taylor on Evidence, ed. of 1848 p. 655, note d).

Nār. (IV. 157–172) states that incompetent witnesses fall into five classes : (1) some[498] like learned brāhmanas, very old men, ascetics, persons practising austerities are incompetent because ancient texts (*vacana*) say so and there is no other (special) reason for their exclusion. The Vyavahāratattva

498. असाक्ष्यपि हि शास्त्रेऽस्मिन् दृष्ट. पञ्चविधो बुधैः । वचनाद्दोषतो भेदात्स्वयमुक्तिर्मृतान्तरः ॥ श्रोत्रिया तापसा वृद्धा ये च प्रव्रजिता नरा । असाक्षिणस्ते वचनान्नात्र हेतुरुदाहृतः ॥ स्तेनाः साहसिकाश्चण्डाः कितवा वधकाश्च ये । असाक्षिणस्ते दृष्टत्वात्तेषु सत्यं न विद्यते ॥ राज्ञा परिगृहीतेषु साक्षिष्वेकार्थनिश्चये । वचनं यत्र भिद्येत ते स्युर्भेदादसाक्षिणः ॥ आनिर्दिष्टस्तु साक्षित्वे स्वयमेवैत्य यो वदेत् । सूचीमुक्तः स शास्त्रेषु न स साक्षित्वमर्हति ॥ योर्थः श्रावयितव्य' स्यात्तस्मिंश्चसति चार्थिनि । क्व तद्वदतु साक्षित्वमित्यसाक्षी मृतान्तरः ॥ नारद् IV 157–162, compare नारद् IV. 94 'सन्तोपि न प्रमाणं स्युर्मृते धनिनि साक्षिण । अन्यत्र आवितात्स्वयमासन्नमृत्युना ॥ शख q. by मिता on या. *II 69* says 'पित्रा विवदमानशुश्रूषकुलवासिपरिव्राजकवानप्रस्था निर्ग्रन्थाश्चासाक्षिणः'. This may be one of the texts to which Nār. refers in the words असाक्षिणस्ते वचनात्'. The व्य. म p 115 explains मृतान्तर as सामान्यतो य आवयोः कश्चिद् व्यवहारसम्बन्धोस्ति तत्र त्वया साक्षिणा भाव्यमित्येतावन्मात्रमुक्त विशिष्य च व्यवहारविषयो न तस्मै आवितः श्रावयिता च नास्ति स पृष्टोऽपि विशिष्य विषयाज्ञानादसाक्षीति यावत् ।'. The स्मृतिच II p 81 and व्यव नि p. 106 explain मृतान्तर differently. धानीनि प्रेते अनावेदिते च व्यवहारे अनाहूतः सन् स्वयमेवैत्य मृतपुत्रं निर्दिश्याशुव्ययासौ धारयति अहं साक्षीति यो ब्रवीति असौ मृतान्तरनामा असाक्षी । मुमूर्षुणा पुत्र प्रति आवितेतस्मिंश्चयंऽसौ साक्षीत्येव आवितः पुत्र प्रति साक्षी भवत्येव । व्यव नि. p 106.

(p. 214) points out that śrotriyas and others cannot be appointed as witnesses, but they may be what is called *akṛta* witnesses explained below (i e. they may if they choose appear as witnesses in a cause). They are not competent like the king, not because they are untrustworthy but because it is not advisable to call them. They were privileged persons; (2) thieves, robbers, dangerous characters, gamblers, assasins are declared to be incompetent because there is the defect (*dosa*) of untruthfulness in them; (3) witnesses are rendered incompetent on the ground of contradiction (*bheda*), when the statement of witnesses who have been accepted by the king for determination of the same matter do not agree; (4) he who without having been appointed (by the parties to a transaction) as a witness (to it) comes of his own accord to depose is termed a *sūcī* (i. e a spy) in the *śāstras* (and so was styled *svayamukta* by Nār. IV. 157) and is unworthy to be a witness; (5) a person is incompetent as a witness by reason of intervening death (i e. he is *mṛtāntara*); when can any person bear testimony if the creditor (or claimant) is no longer alive, whose claim should have been heard by him specifically (but was not heard in that way)? *Mṛtāntara* is a witness whom one or other of the parties informed in a general way that there was some dealing between the parties and who was asked to be a witness (but was not told the details of the dealing) and then subsequently the party died. In such a case the person told is not a good witness, as he cannot give the details. But Nār. (IV. 94) mentions an exception to this last rule viz when a father while on the point of death tells his sons and the like 'these are the witnesses on such and such a matter,' there even after the father's death those witnesses would be competent though death intervenes.

Witnesses are divided by Nār. IV. 149 into two sorts; (1) those appointed (*kṛta*) by the parties and (2) those not appointed (*akṛta*); the first being of five kinds and the last of six kinds. The first five (acc to Nār IV 150) are a subscribing witness (*likhita*), one who has been reminded (*smārita*) i e. one who is called as a witness without there being a document and who is present at a transaction and is again and again reminded of it by a party to it in order that the transaction may be effectively proved thereafter (Kāt. 371 and 372 q. in Mit on Yāj. II. 68), a casual witness i e one, who, while a transaction is being entered into, comes there by mere chance and is then asked to be a witness (yadṛcchābhijñā or yādṛcchika,

acc. to Br.), a secret witness i. e. one who is made to listen the speech of the debtor while concealed behind a wall screen, an indirect (*uttara*)[499] witness (i. e one who learn from a witness who has seen or heard of a transaction when th latter is going to a distant country or is on the point of death. The six *akrta* witnesses (acc. to Nār IV. 151–152) are co-villager (in disputes about boundaries), the chief judge, the king (befor whom a suit was tried), one who is closely acquainted with the transaction of the parties (i. e *kāryamadhyagata*, acc. Br.), one who is deputed by a party (for borrowing an ornamen or for settling a transaction, called *dūtaka* by Br.), members of the family (*kulya*) in disputes among other members of the family (as regards partition &c) Br. mentions twelve kinds of witnesses that are practically the same as the eleven of Nār. except one which he adds viz *lekhita*[500] (one whose name is caused to be written by a party in the presence of the witness when that party enters into some transaction in writing such as a loan with another) The only difference between 'likhita' and 'lekhita' seems to be that the first himself writes his own name as a witness on a document while the latter's name is written as a witness by one party in the presence of the other and of the witness Br (S. B E. vol. 33 p. 299 verses 4-15 q. by Aparārka pp 666–667) defines at great length all the twelve and Kāt also defines most of them, but these definitions are passed over as not very important. Visvarūpa remarks that these nice distinctions among eleven kinds of witnesses are made only for the sake of exposition and for the benefit of simple people[501].

501. यत्तु नारदेनैकादशविध साक्ष्य कृताकृतत्वभेदेनोक्त तत्सौढदान्धजनभुत्पन्न-

[illegible] on या II 71.

Before a witness for a party begins to depose, it is the duty of the opposite party to point out the ground or grounds, if any, of the incompetence of the witness put forward for examination. Kāt. adds[502] that the latent defects of the witnesses of a party must be pointed out by the opposite party, but the patent defects will be considered by the members of the court at the time of giving their decision. Vyāsa[503] states 'the defects of the witnesses of a party should be pointed out by the opponent in open court by putting them down in writing and the witnesses should be called upon (by the judge) to refute them; if the witnesses admit (the faults pointed out) they do not deserve to be witnesses; if otherwise (if the faults are not admitted) they should be established by the opponent with evidence (other than those of other witnesses); for if the defects of the witnesses of a party were allowed to be established by other witnesses to be cited by the opponent, there would result the fault of a never-ending series (*anavasthā*), since the first party would then try to show defects in the latter set of witnesses and this may have to be carried on *ad infinitum*.' Br. laid down that an opponent should not be allowed to point out the grounds of incompetency in witnesses after they have begun to depose and Kāt. adds[504] that he (that party), who points out, after the witnesses have deposed to a matter, faults in them in whom he found none at first and who can not set out a proper reason (for his not proclaiming the faults at first) should be fined in

502. प्रमाणस्य हि ये दोषा वक्तव्यास्ते विवादिना। गूढास्तु प्रकटा सभ्यैः काले शास्त्रप्रदर्शनात्॥ कात्या q by अपरार्क p. 671, स्मृतिच II. p 83 which adds काले निर्णयकाले. The व्य म p, 39 says 'गूढाः शास्त्रप्रदर्शनेन साक्षिवादात्पूर्वकाले वक्तव्याः'.

503. साक्षिदोषाः प्रयोक्तव्याः संसदि प्रतिवादिना। पत्रेऽभिलेख्य तान् सर्वान् वाच्याः प्रत्युत्तरं तु ते॥ प्रतिपन्नौ न साक्षित्वमर्हन्ति तु कदाचन। अतोऽन्यथा भावनीयाः क्रियया प्रतिवादिना॥ अन्यैस्तु साक्षिभिः साध्ये दूषणे पूर्वसाक्षिणाम्। अनवस्था भवेद्दोषस्तेषामप्यन्यसम्भवात्॥ व्यास q by स्मृतिच II. p 83, व्य म. p 38 (first two) The first two are ascribed to कात्या. by परा. मा III. p. 106 and व्यव नि. pp 112–113 The मिता॰ on या. II 73 has the following lucid note 'प्रतिवादिना साक्षिदूषणे दत्ते प्रत्यक्षयोग्यदूषणेषु बाल्यादिषु तथैव निर्णयः। अयोग्येषु तु तद्वचनाच्छोकतश्च निर्णयो न साध्यन्तरेणेति नानवस्था। यदि साक्षिदोषमुद्भाव्य साधयितुं न शक्नोति प्रतिवादी तदासौ साराज्ञसारेण दण्ड्यः। अथ साधयति तदा न साक्षिणः।'. Compare sections 148 and 153 of the Indian Evidence Act about cross examination to shake the credit of a witness.

504 लेख्यदोषास्तु ये केचिदसाक्षिणां चैव ये स्मृताः। वादकाले तु वक्तव्याः पश्चादुक्ताश्च दूषयेत्॥ उक्तेर्थे साक्षिणो यस्तु दूषयेत्प्रागदूषितान्। न च तत्कारणं ब्रूयात्साप्नुयात् पूर्वसाहसम्। कात्या in स्मृतिच p 83, स चि. pp. 143–144 The first is ascribed to बृहस्पति by अपरार्क p. 672.

the first amercement. Br. further states[505] that the defendant may point out the defects, if they exist, in the witnesses cited by the plaintiff; but if he finds faults which do not exist in the witnesses, he should be punished with a fine equal to the amount claimed (in monetary disputes) or equal to that which is levied from a false witness. If the witness of a party is not able to refute the defect pointed out by the opponent, the party calling him should try to clear his witness of the fault; otherwise he should not succeed in his suit

When a witness is about[506] to depose, he was, acc, to Br. (S B. E 33 p 302 v. 23), to put off his shoes and turban, raise his right hand (in order to draw the attention of the Court) and after touching gold, cowdung or *darbha* grass was to depose to the truth Āp Dh S. II. 11 29. 7 says[507] that a witness should depose to the truth on an auspicious day in the morning in the presence of kindled fire and near (a jar of) water in the hall presided over by the king (or chief justice) and after being exhorted as regards both (viz. the results of truthfulness and falsehood) and when accepted by all (the court and parties) as a competent witness. Kaut also (in III. 11) says that witnesses should be examined in the presence of brāhmaṇas, water-jar and fire. Manu (VIII 79-80) provides that the judge should in a conciliatory manner exhort all witnesses assembled inside the court in the presence of the plaintiff and defendant as follows: 'whatever acts of these two (litigants) between themselves you know as regards this matter (in dispute), narrate them all truthfully, since you are the witnesses in this case'. Yāj II. 73 also states that witnesses should be made to depose in the presence of the parties and Gaut. XIII. 13 and Kāt (q by Mit on Yāj II. 73) prescribe that witnesses[508]

should face the east or north, are to be examined in the presence of the images of gods and brāhmanas in the first half of the day and should be exhorted to tell the truth by being bound with oaths. This examination in the public and after an oath went a long way in checking the tendency to depose falsely. The oath consisted of two parts, viz. (1) the requirement to tell the truth and (2) the exhortatory and imprecatory part. Both were administered by the presiding judge. Gaut. (XIII. 12–13) appears to prescribe that an oath (*śapatha*) was not to be administered to brāhmana witness, but ManuVIII. 113 (= Nār. IV. 199) does not make this distinction. Gaut. (XIII. 14–23), Manu VIII. 81–86, 89–101, Visnu Dh. S. VIII. 24–37, Nār. IV. 201–228 contain very long exhortations addressed by the judge to the witnesses relating to the importance and high worth of truth, stating how the conscience of a man pricks him, what rewards await the truthful witness here and in the next world and what sin and terrible torments in Hell are the lot of an untruthful witness, what evil befalls even the deceased ancestors of an untruthful witness and how he is liable to be punished by the king. They are too long to be cited here[509]. Shorter exhortations are found in Yāj. II. 73–75, Vas 16. 32–34, Baud. Dh. S. I. 10. 19. 9–12 (S. B. E. vol. XIV p. 203), Br. (S. B. E. vol. 33 p. 301 verses 19–22), Kāt. 343. Nār. IV. 200 provides 'let him (the judge) inspire them (the witnesses) with awe by (quoting) ancient texts, extolling the greatness of truth and denouncing falsehood'. Kaut. (III. 11), Manu VIII. 88 and 113 (=Nar. IV 199), Visnu Dh. S. VIII. 20–23 add further modes of speech and exhortations according to the *varna* of the witness: A brāhmana witness is to be addressed by the judge as 'speak' and to be exhorted to swear by his veracity, a ksatriya one was to be addressed as 'speak the truth' and to be sworn by the animal he rides and his weapons (which he is to touch), a vaisya is to be sworn by his kine, grain and gold and a śūdra is to be sworn by (imprecating on his head) all grave sins. Manu VIII. 88 provides that a brāhmana should be asked to depose

509. Vide Appendix for Nārada's verses

510. The exhortation in the अर्थशास्त्र (III. 11) is somewhat different from Manu's 'तत्र ब्राह्मणं ब्रूयात्सत्यं ब्रूहीति राजन्यं वैश्यं वा मा तवेष्टापूर्तफलं, कपालहस्त शत्रुबलं भित्वार्थी गच्छेरिति शूद्रं जन्ममरणान्तरे यद्वः पुण्यफलं तद्राजानं गच्छेत्, राज्ञश्च किल्बिषं पुमानन्यथावादे। दण्डव्याधुवन्धः पश्चादपि श्रावेत यथाद्रुडक्षुतम्। एकस्याः सत्यमवहरतीति।'. The text in Dr Sham Shastri's edition is rather corrupt and not properly arranged.

with the word 'speak', while VIII. 113 states that a brāhmana is to be made to swear by his truth Some explain that the first rule applies to excellent brāhmanas and the second to inferior ones and rely on Gaut (XIII 12-13) who prescribes that an oath to speak the truth is not to be administered to brāhmanas but only to others. Vide Haradatta on Gaut and Vivādacandra p 127 Manu VIII 102 (=Baud Dh. S I. 5 95) is careful to point out that the exhortation is not to depend purely on the caste but that brāhmanas (and others) who tend kine, who engage in trade, who are craftsmen or actors, who are menial servants and usurers should be treated (by the judge) as śūdras[511] (in the matter of taking oaths) Witnesses after they are assembled before the Court are to be ordinarily examined separately (vide Kāt quoted in n. 508 above) But Gaut XIII. 5 and Kāt 394 provide[512] that if a certain matter is seen by the witnesses as a body then they may be examined together. Manu VIII 78 and Kāt 392 prescribe that what the witnesses declare quite naturally (without hesitation and fear) should be taken down and that when the witnesses have declared (what they know) they should not be questioned again and again by the king (or judge). From the Smrtis and the 9th Act of the Mrcchakatika it appears that

511. The Mit on Yāj. II 73 explains Manu VIII 113 as follows a brāhmana witness is to be sworn by being told that if he spoke untruth his truth will perish, a ksatriya that his vehicle and arms will be fruitless, a vaisya that his cattle, grain and gold will be lost and a śūdra that all sins will be his lot. Others explain differently The Vyavahāratattva p 215 says 'गोबीजकाञ्चनापहारे यत्पापं तत्तवावृत्ताभिधाने स्यादिति वैश्यम्' The दीपकलिका on या. II 74 says the same Medhātithi on Mann VIII 113 appears to hold that the exhortatory part is repeated by the witness यद्यहमेव कुर्यां तदिदमनिष्टमाप्नुयामिति संकीर्तनक्रिया शपथः। तत्र यः शाप्यते स एवं वाच्यते सत्येन शपे सत्यादिनिबन्धनोयं धर्मो वा मे निष्फलः स्यादिति। ... गोबीजकाञ्चनानि वैश्यो हस्तेन स्पर्शयित्वाभिशपेदेतानि वा मे निष्फलानीति पूर्ववत्।' The Madanaratna says that brāhmanas following such avocations as rearing cattle should be made to take an oath like śūdras, गोरक्षणादिभिरपकृष्टा ब्राह्मणास्तु शूद्रवच्छपथं कार्यैरन् ये व्यपेताः स्वकर्मभ्य परपिण्डोपजीविनः। द्विजत्वमभिकाङ्क्षन्ति तांश्च शूद्रवदाचरेत्॥ Vas. III. 1 and Manu II 168 provide that brāhmanas who have not studied the Veda, who do not expound it or do not keep the sacred fires become equal to śūdras The Indian Oaths Act (X of 1873) sec 6 allows a witness who has an objection to taking an oath to make an affirmation.

512. 'समवेतैस्तु यद्दृष्टं वक्तव्यं तत्तथैव तु। विभिन्नैकैककार्यं यद्वक्तव्यं तत्पृथक् पृथक्॥ कात्या. q in अपरार्क p 675 Vide व्य म p 126 for two different readings and interpretations of गौ XIII 5 स्वभावोक्तं वचस्तेषां ग्राह्यं यद्दोषवर्जितम्। उक्ते तु साक्षिणो राज्ञा न भेतव्याः पुनः पुनः॥ कात्या q in अपरार्क p 675, मिता on या II 79 (without name)

it was the chief judge or the judges who put questions and that there was no elaborate cross-examination and re-examination of witnesses as in England (which practice is followed in modern India). The only cross examination that appears to have been allowed was about the faults or grounds that made a person an incompetent witness. In this respect ancient Indian practice resembled modern judicial practice in some European[513] countries other than England. Witnesses were compelled to attend. Kaut III. 11 states that witnesses who are not far removed by time or space should be produced by the parties themselves, but those who are far away or who are unwilling to stir shall be got summoned by order of the king[514]. Manu VIII. 107, Yāj. II. 77, Br., Kāt and Visnu Dh. S. VIII. 37 say that if a witness knowing all facts and not prevented from coming by disease or similar causes refuses to come as a witness he incurs the sin of false witness, has to pay the amount in dispute and ten per cent thereof as fine to the king. This is in accordance with the principle enforced in modern times that it is the duty of a citizen to appear before a court of justice when summoned. Kaut (III 1) provides for subsistence allowance to witnesses. It is not quite clear whether parties could be regarded under ancient Hindu Law as competent witnesses on their own behalf. Yāj (II. 13-15) appears to suggest that parties could be regarded as witnesses in their own cause and held to be false from their demeanour as in the case of witnesses. Kaut. IV.[515] 8 and the 9th Act of the Mrcchakatika show that the accused was questioned by the Court as to his movements about the time of the alleged offence and till his arrest. Śukra [516]

513. Vide Stephens' 'History of the Criminal Law of England' (1883), vol. I. chap XII, where on p 431 he remarks 'cross examination is a highly characteristic part of an English trial, whether civil or criminal, and hardly any of the contrasts between the English and continental systems strikes an English lawyer so forcibly as its absence in the continental system'

514 देशकालाविदूरस्थान् साक्षिणः प्रतिपादयेत् । दूरस्थानमसारान्वा स्वामिवाक्येन साधयेत् ॥ कौ. 516. स्वेतरः कार्यविज्ञानी यः स साक्षी स्वनेकधा । दृष्टार्थश्च श्रुतार्थश्च कृतश्चैवाकृतो द्विधा ॥ शुक्र IV. 5. 184.

IV. 5. 184 defines sākṣī in such a way as to exclude the litigant himself. Ordinarily witnesses were examined in the open court in the presence of the parties and never behind their back, but Kāt (387–389) prescribes that in the case of immovable property oral evidence may be taken on the property itself and in some cases even elsewhere than these two (viz the Court and immovable property), that is, in the case of the death of living beings witnesses may be made to depose before the corpse (of the animal killed) or, in the absence of the body, before[517] some mark (such as the horn of an animal) Br. and Manu VIII. 25 state that the truth of the statements of witnesses should be examined by marking their tone, their change of colour, their eyes, their gestures, and their demeanour[518] Texts like Śaṅkha-Likhita (q by V. P. p 124), Nar IV 193–196, Viṣṇu Dh S VIII. 18, Yaj. II 13–15 and Kāt 386 point out the actions and appearances of a party or witness that deposes falsely, viz he appears restless, changes his place (*i e* moves from one spot to another), licks the corners of his lips, his forehead perspires, his face loses colour, he frequently coughs and heaves frequent sighs, he scratches the ground with his feet (toes), waves his hands and garment, his mouth becomes dry and his voice falters, he speaks incoherently, talks too much though not asked and does not reply straight to the questions asked and avoids meeting the eyes of the questioner Such a witness may be looked upon as untrue and the king or judge should bring him under discipline (so that he will be afraid to lie) Merely on seeing these signs a witness was not to be punished or entirely disbelieved, since these signs raise only a probability of untruthfulness (as remarked by Mit. on Yāj II 15 and V P p 124)

II 15 cited above

When there are many witnesses but they differ in their statements certain rules are laid down by Manu VIII. 73 (=Visnu Dh S. VIII. 39), Yāj II. 78, Nār. IV. 229, Br. (S. B. E. vol. 33 p 303 v. 35), Kāt. (408) They are briefly these:[519] The statement of the majority of witnesses should be accepted, but if they are equally divided then the statement of those who are more pure (in character or more disinterested) should be accepted and if the meritorious are divided equally then those who are the best among them should be accepted as true. The Mit on Yāj. II. 78 adds that if there is a conflict of testimony between the statements of a few but eminently qualified witnesses on the one hand and those of a larger number of ordinary witnesses, then the former should be accepted as Yāj II. 72 requires i. e it prefers quality to mere numbers. Kaut. III. 11 prescribes that when there is conflict in the oral evidence the decision should be according to the evidence of the majority of witnesses or of those who are pure in character or of those who are approved of by both sides as good witnesses or a mean should be drawn from their statements. Nār. IV 160 and Kāt. 359 state[520] that if one out of the (three) witnesses attesting a document or out of (three) witnesses that are cited by a party deposes in a way contradictory to what is deposed to by the other two, then all the three become incompetent witnesses on account of contradiction This has been interpreted by the Vyavahāra mātrkā (p. 326) to mean that where all witnesses are of equal status and there is a majority of only one favouring one side, then all the witnesses are incompetent and oral evidence is in that case futile for decision.

The important question is how much has to be proved by the party calling witnesses Yāj. II. 79 (=Visnu Dh S VIII. 38), Nār II. 27 and Br (q by Sm C. II. 91) state the general rule that that party whose averments are supported in their entirety as true by the witnesses becomes successful, while that litigant.

519 साक्षिद्वैधे प्रभूतास्ते ग्राह्याः साम्ये गुणान्विताः । गुणिद्वैधे क्रियायुक्तास्तत्साम्ये शुचिमत्तराः ॥ बृह. q by व्य मा p 325, पराः मा III p 116 The मिता० on याः II 76 explains 'यदा पुनर्गुणिनां विप्रतिपत्तिस्तदा ये गुणवत्तमाः श्रुताध्ययनतदर्थानुष्ठान-धनयुक्तादिगुणसंपन्नास्तेषां वचनं ग्राह्यम् । यत्र तु गुणिनः कतिपये इतरे च बहवस्तत्रापि गुणिनामेव वचनं ग्राह्यम् । उभयानुमत. साक्षी भवत्येकोऽपि धर्मविदिति गुणातिशयस्य गुरुत्वात् ।'

520. साक्षिणां लिखितानां तु निर्दिष्टानां च वादिना । तेषामेकोऽन्यथावादी भेदात्सर्वे न साक्षिणः ॥ कात्या. q by अपरार्क p. 670, व्य मा. p. 325, पराः मा. III. 116.

whose claim is declared by them to be false certainly loses [521]. Nār. IV. 232 and 234, Kāt. 396, 398 lay down [522] the rule that in civil disputes that are of a non-urgent nature (like recovery of debts), if witnesses depose to more or less (than what is averred in the plaint), then the claim is not established in its entirety, where the witnesses depose to more or less (than the claim affirmed by the party) the deposition of the witnesses should be considered as not taken down or it should be omitted (from consideration) [523], the witnesses in such a case are not liable to fine; they may deserve to be fined if they do not depose (to what they know) Similarly Nār. IV 233 and Kāt [524] 399 say that where the depositions of witnesses are in conflict as to the place, the time, the property, the amount, the colour, the species (or caste), the form (or shape), the age (as stated in the pleading of a party), the depositions are to be regarded as good as not given at all The rule amounts to this that any discrepancy between the essential details or particulars of a claim

521. यत्राशेषप्रतिज्ञार्थः साक्षिभिः प्रतिषेधितः । स जयी स्यादन्यथा तु साध्यार्थं न समाप्नुयात् ॥ बृह. q by अपरार्क p 678, स्मृतिच. II. p 91, परा मा III. 114.

522. ऋणादिषु विवादेषु स्थिरमाधेषु निश्चितम् । ऊने वाप्यधिके चार्थे मोक्षे साध्यं न सिध्यति । ऊनाधिकं तु यत्र स्यात् तत्साक्ष्यं तत्र वर्जयेत् । साक्षी तत्र न दण्ड्यः स्याद्बुवन् दृष्टमर्हति ॥ कात्या 396, 398 q by व्य. मा p. 312 and 318, अपरार्क p. 678, स्मृतिच II. p. 90, व्यव. नि. p. 68

523. The maxim (in Yāj. II 20) that on proof a part of a claim the whole may be held to be proved (vide above n 431) applies only where the opponent totally denies every item of the claim of the plaintiff. This is a presumption and the king or judge is not to be blamed for acting upon it in case of total denial, as said by Gaut. XI 23 and 32 'न्यायाधिगमे तर्कोन्मुपायः । ... तस्माद्राजाचार्यावनिन्द्यौ' This text of Yāj is apparently in conflict with Kāt 473 (q. by Mit on Yāj II 20) 'in claims containing several items, the creditor (or plaintiff) secures a decree for as much out of them as he is able to establish by means of witnesses'. These two verses are sought to be reconciled in various ways by the Mit (on Yāj II, 20), the Sm. C II pp. 120–121 Vyavahāra-mātrkā pp.310–312 (where it criticizes the views of Yogloka), V P. pp. 98–102. It is impossible for want of space to go into these interpretations The Mit. says that Kāt 473 applies to a case where the son or the like being ignorant of the debts contracted by his father or the like says 'I do not know' i. e. pleads ignorance. In that case he does not deny (he is not 'nihnava-vādin but only ajñānin The Vyavahāranirnaya p. 68 explains Kāt. 473 in the same way and about 396 it adds that when he cites witnesses as supporting his entire claim and the witnesses depose only to a part of it or to more than he avers then his claim fails in its entirety but in sāhasa, theft and adultery it is otherwise.

524. देशं कालं धर्मं संख्यां रूपं जात्याकृतौ वयः । विसंवदेद्यत्र साक्ष्ये वदृतुके विनिर्दिशेत् ॥ कात्या. in अपरार्क p. 678 (reads विनं for धर्मं), स्मृतिच. II. p. 90.

made in the plaint (such as the time, place, number &c.) and the case made out in the depositions as to any of these essential particulars will have the same consequence as tendering no oral evidence. This rule was not followed to the letter and besides other means of proof could be resorted to, as stated by the Mit., the Vivādacandra and others[525]. Kaut. III. 11[526] states that when the witnesses depose to less than what is averred in the plaint, the plaintiff has to pay a fine (of a fifth part) on the excess and when they depose to more than the claim, the excess (held proved on the depositions) may be taken by the king.

In charges of adultery, heinous crimes (*sāhasa*) and theft the whole of the matter that is alleged may be held proved, when witnesses depose to only a part of the matter[527] (says Kāt. 397).

Nārada IV. 165 prescribes that a litigant[528] should not secretly approach a witness cited by his opponent, nor should he try to win him over (by bribes or threats) through another; if he does so, he would suffer the consequences of a losing party (*hīna*).

There were rules about the late production of evidence. It has been already shown how if a litigant adduces weak evidence, though strong evidence is available, he would not be allowed to rely on the latter after judgment is pronounced. It is said by Nār. I. 62 that when a law-suit has proceeded far enough (lit. has been cleansed or thrashed out), evidence such as a

526 साक्षिणश्चेदभियोगादूनं ब्रूयुरतिरिक्तस्याभियोक्ता बन्धं दद्यात् । अतिरिक्तं वा ब्रूयुस्तदतिरिक्तं राजा हरेत् । अर्थशास्त्र III. 11.

527. साध्यार्थांशेपि गदिते साक्षिभिः सकलं भवेत् । स्त्रीसङ्गे साहसे चौर्ये यत्साध्यं परिकल्पितम् ॥ कात्या. q by मिता. on या II. 20, अपरार्क p. 678, स्मृतिच II, p 90.

528. The fact that a party requested a witness to give false evidence is, admissible evidence against such a party, it being an admission by conduct that the party has a bad case Vide Cockburn C. J. in *Moriarty v. London Chatham and Dover Ry* Co. L. R. 5 Q B p 314 at p. 319 ' if you can show that a plaintiff has been suborning false testimony and has endeavoured to have recourse to perjury, it is strong evidence that he knew perfectly well his cause was an unrighteous one '. Vide illustration e to section 8 of the Indian Evidence Act.

document or witnesses, would then become useless, if that evidence had not been announced before[529] After a reply is filed by the defendant, the plaintiff has to give a list of his evidence i e documents or witnesses (Yāj II 7) The meaning briefly is as follows: If he does not do so, proceeds with the trial and does not call all necessary witnesses or produce all documents and the case is almost finished, but judgment is not pronounced, even then he would not be allowed to produce fresh evidence at that late stage For if fresh evidence not previously disclosed were allowed to be given at that late stage, it would cause surprise to the defendant, who would then demand time for adducing evidence in rebuttal and then the plaintiff may again cite further evidence and this process is in danger of being carried on *ad infinitum*. If however witnesses were already cited but all were not examined (e g. if ten witnesses were mentioned and only three examined) and the plaintiff found that the evidence of the few witnesses examined for him is contradictory or hostile, then he may be allowed to produce even at a late stage the remaining witnesses (who may be seven i e. double the number of those already examined or who may be more respectable or purer in character). This proposition is contained in Yāj II 80 on which the Mitāksarā remarks that even if witnesses are not mentioned in a list, but before judgment is pronounced other more reliable or respectable witnesses or double in number (and of the same status as) of those examined are available, they should be examined by the court even at a late stage The rule is that as long as witnesses are available resort to ordeals should not be had Yāj. II 80 also has given rise to various interpretations Vide Mit and Aparārka on Yāj II 80, Sm C II. p 94, V. P p. 130–134 The Mit thinks that the verse applies where the plaintiff or the party on whom lies the burden of proving a positive proposition finds that the witnesses produced by him are hostile or contradictory and that in such a case he may be allowed to cite other more respectable or more numerous witnesses to prove his proposition and to show that the first set of witnesses is false, while Aparārka holds that the verse says that when the party who has to prove his

529 निर्णिक्तव्यवहारेषु प्रमाणमफल भवेत् । लिखित साक्षिणो वापि पूर्वमावेदित न चेत् ॥ नारद I. 62, निर्णिक्त does not mean निर्णीत, but शोधित (as स्म प्र p 8 says) lit washed out, cleansed (carried far) For detailed explanation of this verse vide my notes to स्म प्र. pp 78–80. The Madanaratna introduces Nār. I. 62 with the words 'अथ च विपरीतसाधनोपन्यासे व्यवहारसमाप्ति प्राग्दर्शयन्'.

case cites witnesses which the opponent feels are false, the opponent may produce more respectable or more numerous witnesses to depose to the contrary and he would thus prove the first set to be false Aparārka relies on Kāt. (408) for this proposition[530]. It may be said that Aparārka's interpretation appears more natural. V. P. (p 134) accepts Kātyāyana, but says that the interpretation of the Mit. (of Yāj. II. 80) is correct. Whatever view is accepted it leads to this that one set of witnesses not only may prove the truth of a party's case but also establish that another set of that party's witnesses are guilty of perjury.

Yāj. II. 82 provides that if a witness, having promised with other witnesses to depose to a state of things, denies at the time of his examination that he saw the matter in dispute, he should be fined eight times the amount that a defeated litigant would have to pay and a brāhmana witness similarly guilty if unable to pay may be banished (or his house should be razed to the ground). Nār. IV. 197 says that such a person is worse than a false witness Manu VIII. 107, Yāj II. 76, and Kāt. (405) prescribe that if a person who has witnessed a transaction does not depose (i. e. remains silent) about it, though not suffering from disease or some other calamity, he should be made (after waiting for three fortnights) to pay the amount of the debt or other matter in dispute and also one-tenth thereof as fine to the king.

After the witnesses have deposed the chief justice and sabhyas have to consider the depositions of witnesses (as Kāt. 340 provides)[531] The Court has to find out which set of witnesses are to be believed and what witnesses are perjured. Perjury entailed, according to dharmaśāstra works, both secular and other-worldly consequences. Āp. Dh. S. (II. 11. 29. 8-9) states: 'When a witness deposes falsely the king should fine him and, in addition, the witness incurs hell after death' and Gaut. provides (XIII. 7 and 23), 'a witness telling the truth goes to heaven, but falls into hell if he does the reverse and when he deposes falsely he is to be censured and fined'. Manu VIII. 118 states that witnesses depose falsely through covetousness,

530. यत्र वै भाषितं क्वापि साक्षिभिर्वादिना भवेत् । प्रतिवादी यदा तत्र भावयेत्कार्यमन्यथा । बहुभिश्च कुलीनैर्वा पूर्वः स्युः कूटसाक्षिणः । कात्या 408 q. by अपरार्क p. 679, व्य. मा. p 335, स्मृतिच. II 94, व्य. प्र p. 134.

531. साक्षिभिर्भाषितं वाक्यं सभ्यैः सह परीक्षयेत् । कात्या 340 q. by मिता. on या. II. 80, अपरार्क p. 675, व्य मा. p. 331.

wrong ideas, fear, friendship, sexual passion, wrath, ignorance and minority and prescribes (VIII. 120-122) varying fines for perjury arising from these several causes. Br. (S. B. E. vol 33 p. 301 v. 21) regards[532] a corrupt judge, a perjured witness and the murderer of a brāhmana as equally sinful. Yāj. II. 81 and Kāt. (407) prescribe[533] that the litigant who procures perjured evidence and the witnesses guilty of perjury should each be separately fined double the amount of the fine prescribed for defeat in various disputes and a brāhmana (guilty of doing the same) should be banished from the country[534] (but not fined). But when a person (of any of the three castes other than brāhmana) is frequently guilty of perjury he should be fined and given physical punishment (as cutting the tongue or death) and a similarly guilty brāhmana should be fined and banished (or degraded by being carried naked through the streets or deprived of his house) The Mit. on Yāj. II. 81 says that when Manu prescribes (VIII. 380) that a brāhmana guilty of a sin is not to be awarded death or corporal punishment and that he is to be banished with all his wealth, he refers to the brāhmana being a first offender and not a confirmed one. Manu VIII. 108 says 'where within seven days from deposing in a cause a (serious or painful) disease or fire or the death of a relative befalls a witness, he should be (being held as a false witness owing to these portentous happenings) made to pay the debt in dispute to the opposite side and a fine to the king' The Sm. C. (II. p 94) explains that this applies to a witness who is the only one on a disputed matter such as a messenger and the king or judge should wait for seven days to see whether any of these calamities befalls that witness and then hold him to be perjured. Kāt. (410) contains[535] a similar rule, but he states that the king should wait one, two or three weeks or up to 45 days according to the value of the matter in dispute and the caste of the deponent Manu VIII. 117 (=Visnu Dh S VIII 40) prescribes that in

532. कूटसन्य· कूटसाक्षी ब्रह्महा च समा· स्मृता । बृह. q by व्य प्र p. 135.

533 येन कार्यस्य लोभेन निर्दिष्टा· कूटसाक्षिण· । गृहीत्वा वस्य सर्वस्वं कुर्यात्तैर्द्विगुणं दमं ततः ॥ काल्या. 407 q by अपरार्क p 672, स्मृतिच II p. 93

534 The मिता० explains विवासन in या. II 82 as follows 'विवासनं च नगरीकरणगृहभङ्गदेशनिर्वासनलक्षणं विषयाद्व्यसारेण द्रष्टव्यम् । इतरेषां स्वदासुणदण्डदण्ड-दानासम्भवे स्वजात्युचितकर्मकरणनिगडबन्धनकारागृहप्रवेशादि द्रष्टव्यम् ।.' Vide मिता० on या. II 81 for three meanings of विवासयेत्.

535 सप्ताहात्तु प्रतीक्षेत यत्र साक्ष्यनृतं वदेत् । रोगोऽग्निर्ज्ञातिमरणं हिंसमाहत्तिन्नस या। यद्यत्वारिंशके वापि द्रव्यजात्यादिभेदतः ॥ काल्या. 410 q by स. चि. p. 149.

whatever lawsuit it is established that witnesses perjured themselves, the judge should hear it again (from the beginning) or if the suit has ended he should set aside the decision and examine it again.

Gaut 13 24–25, Vas 16. 36, Manu VIII. 104, Yāj. II. 83, Visnu Dh. S. VIII. 15 prescribe that a witness may depose falsely in a cause when, if he were to speak the truth, a person of the four varnas is liable to suffer the sentence of death. Manu VIII. 105–106, Yāj II. 83, Visnu Dh S. VIII. 16 prescribe that as a penance for the falsehood a witness of the three higher castes may offer three oblations of boiled rice to the goddess of speech (Śarasvatī) or he may offer into fire clarified butter with the mantras called Kūsmānda (Vāj. S. XX. 14–16 or Tai Ā. X. 3–5), or with the three verses beginning with 'yaddevā devahedanam' or with the verse sacred to Varuna (viz Rg. I. 24 15, 'uduttamam varuna') or with three verses of which waters' are the deity (Rg. X. 9. 1–3 'āpo hi sthā)'. Visnu Dh S. VIII. 17 adds that a śūdra guilty of perjury in the above case may by way of expiation feed ten cows for one day. It is strange that the dharmaśāstra works should permit perjury to save a culprit from being sentenced to death. Probably popular sentiment of old standing allowing the speaking of falsehood in certain cases was responsible for this In the Mahābhārata frequent reference is made to the permission to speak untruth in ordinary life when one's own life or another's life is in imminent danger Vide Śānti[536] 45. 35, 109. 19. It is stated in Śānti 165. 30 that speaking falsely is not a sin in five cases viz in jest, to women, at the time of (i. e. in bringing about) a marriage, for the preservation of great wealth and for one's life Vas. 16. 56 mentions those five occasions somewhat differently. Vide Manu VIII. 112 also for a similar rule. But so old a sage as Gaut (23 29) implies that he disapproves of this sentiment[537], when he states, 'according to some falsehood entails no fault (i. e. no expiation need be performed) in (bringing about or breaking promises made at)

536. प्राणत्राणेऽनृतं वाच्यमात्मनो वा परस्य च । गुर्वर्थे स्त्रीषु चैव स्याद्विवाहकरणेषु च ॥ शान्ति 34 25, न नर्मयुक्तमनृतं हिनस्ति न स्त्रीषु राजन्न विवाहकाले । न गुर्वर्थे नात्मनो जीवितार्थे पञ्चानृतान्याहुरपातकानि ॥ शान्ति 165 30, उद्वाहकाले रतिसंप्रयोगे प्राणात्यये सर्वधनापहारे । विप्रस्य चार्थे ह्यनृतं वदेयुः पञ्चानृतान्याहुरपातकानि ॥ वसिष्ठ 16 36 In आदि 82 16 we have the verse न नर्म etc. as 'प्राणात्यये सर्वधनापहारे पञ्चा० '

537. विवाहनैथुननर्मार्तिसंयोगेष्वदोषमेकेऽनृतम् । गौ. 23. 29.

marriage, in sexual intercourse, in jest and in giving relief to one distressed'. Vide Gr. R. pp. 507–508 quoting Hārita Dharmasūtra on the same subject and mentioning four kinds of falsehood such as that by a witness, that in transactions of sale &c.

Nār. (IV. 235–236) states that when through[539] the carelessness of the creditor (who dies) there is no document nor witness to prove a debt and the defendant denies it, then one of three methods (of proof) may be resorted to, viz. *codanā prati(ti)kālam* (dunning the debtor each time to repay), *yukti(kti)leśa* (putting forth arguments) and *śapatha* (special oaths and ordeals)[538a]. Kāt. (233 q. by Sm C. II. p 52 and Par M. III. 91) has a similar verse *Yukti* according to Nārada IV. 238 means[539] 'the creditor should follow (the debtor) by arguments and by himself remembering and by reminding the debtor of the time, the place, the relation (subsisting between the two)' Others interpret *yukti* differently, that is, it means 'logical reasoning' Kāt (214) defines[540] 'yukti' as 'the ascertainment or knowledge of a *linga*' (i e. a sign that leads on to an inference).

---

538 प्रमादाद्धनिनो यत्र न स्याद्लेखं न साक्षिण. । अर्थे चापह्नुते वादी तत्रोक्तस्त्रिविधो विधिः ॥ चोदना प्रतिकालं च युक्तिलेशस्तथैव च । तृतीयः शपथः प्रोक्तस्तैरेनं साधयेत् क्रमात् ॥ अभीक्ष्णं चोद्यमानो यः प्रतिहन्याच्च तद्वचः । त्रिश्चतु· पञ्चकृत्वो वा परतोर्थं स.दापयेत् ॥ नारद IV 235–237. अर्थिनाऽभ्यर्थितो यस्तु विघात न प्रयोजयेत् । त्रिचतुःपञ्चकृत्वो वा परतस्तद्दणमिवेत् । कात्या. 386 q by व्य प्र p 168, which explains नारद as 'चोदनाया धनदानादिविषयकप्रेरणाया अप्रतिकालोऽप्रतिषेधः । सोपि यद्यमस्य ऋणादिसम्बन्धी न स्याद्याच्यमान एव निराकुर्याद्निराकरणाद्स्त्यस्यानेन सम्बन्ध इत्यर्थापत्तिविधयाऽनुमानविधया वा ऋणादिसम्बन्धं साधयन् भवति प्रमाणम् ।'.

538a. The printed text of Nār. IV 236 reads चोदना प्रतिकाले च as separate words The Sm C. II, p. 52 explains that as meaning 'pressing or urging the debtor three, four or five times in the presence of third persons without the debtor protesting against the demand' The Madanaratna and V. P p 168 appear to read, चोदनाप्रतिकालश्च (equal to चोदना+अप्रतिकाल) and interpret 'if there is no denial or protest (by the debtor) when the creditor frequently demands the debt, then the court may presume that he is a debtor' The Madanaratna explains 'चोदनाप्रतिकाल. बहुकृत्वो धन मे दृहीति प्रेरणाया अप्रतिकालः अनिराकरणम् '

539 चोदनाप्रतिघाते तु युक्तिलेशैस्तमन्वियात् । देशकालार्थसम्बन्धपरिमाणक्रियादिभिः ॥ नारद IV 238, स्मृतिच० II. p 52 explains युक्तिलेश as 'अमुस्मिन्देशे अमुस्मिन् काले अमुनार्थसम्बन्धेन यत्परिणमेत् तत्कर्मार्थभूतं गृहीतं त्वयेत्यादि' द्वितीयोपायः ।'.

540. लिङ्गोद्देशस्तु युक्तिः स्यादित्यानीह विषादय । कात्या (214) quoted by परा. मा. III 91, व्यवहारसार p. 43, व्य प्र. p 167 which explains लिङ्गस्य अग्रिदत्वाद्यभिचारिण उत्कादृशतत्वादेः उद्देशो निश्चयः तेन चाग्निदत्वाद्यनुमानम्.

It is stated by Brhaspati that *anumāna* (inference[541] or presumption), as a means of deciding a law suit, is of three kinds, but it is inferior to witnesses (vide note 433 above). Vyāsa (q. by Sm. C. II. p. 95) states that *anumāna* is the same as *hetu* and *tarka* V. P. (p 167) remarks that (long continued) possession and the frequent urging by the creditor both lead to the inference of title and the taking of a loan respectively and are therefore to be comprehended under *yukti* according to the definition of Kātyāyana Yet by popular usage *yukti* is restricted to presumptions arising from certain circumstances on the analogy of the maxim of 'gobalīvarda' explained below under 'steya' Yukti therefore means circumstantial evidence from which an inference may be drawn about a fact in issue in a judical poceeding. Āp. Dh.[542] S. II. 11. 29 6 says that in case of doubt (judges) should decide from signs (i. e by inference) or divine proof (ordeals). Vas. 19. 39 mentions the view of some sages that one who is found armed or wounded or in possession of the booty (stolen) may be declared to be (the thief or offender). Manu IX. 270 (=Matsya 227. 166) requires the just king not to condemn to death one accused of theft unless his guilt is proved as certain by proof that the accused had in his possession the articles stolen and tools for theft (for house-breaking). 'An adulterer is proved[543] to be so by being caught in such acts as playing with the hair of another's wife, an incendiary by being caught with a firebrand in his hand (near the house set on fire), a murderer by being found (near the murdered man) armed and a thief when caught with some of the articles stolen in his possession'—say Śankha-Likhita[544].

543 केशाकेशिसङ्ग्रहणात्पारजायिक उत्काहस्तोऽग्निदः शस्त्रपाणिर्घातुको लोपत्रहस्तश्चौरः। शङ्खलिखित q by परा मा III 119, स्मृच्चि. II p 95, व्य म. p 168

544. Compare sec. 114 of the Indian Evidence Act which lays down how a court is to draw presumptions of fact from the common course of natural events in relation to the facts of the case before it, illustration (a) to which is 'the court may presume that a man who is in possession of stolen goods soon after the theft is either the thief or has received the goods knowing them to be stolen, unless he can account for his possession'

Kaut.[545] IV. 12 and Yāj. II. 283 similarly say that adultery may be inferred from (the man and woman) being caught in the act of dalliance with the hair or from the signs left (such as marks of nails or teeth on the lips, cheek &c) after carnal enjoyment or from the admission of the woman concerned (or of both) Nār. (IV. 172–175) declares that there are six kinds of disputes in which the indications (or circumstances) themselves serve as witnesses and lead to a conclusion without the testimony of witnesses viz one found with a fire-brand in his hand (near the scene of arson) may be inferred to be the incendiary, one armed[546] (found near the scene of murder) as the murderer, one caught dallying with the hair of another's wife as an adulterer, one with a spade in his hand near a breached embankment as the person who caused the breach in it and one armed with an axe as the feller of a tree, a person guilty of an assault may be inferred to be so from visible signs (such as his club or sword being smeared with blood) But Nār. IV 176 gives the warning that in such cases it is necessary to be careful in arriving at a conclusion, since a person in order to bring into trouble another whom he hates may create marks of injury on himself Kāt (337–338) further provides[547] that where one litigant proves as against his opponent (such as a debtor) either the offer of a bribe, or the effacing of the means of recognition (such as effacing one's signature on a document) or holding out temptations (to the witnesses or *sabhyas*) or the concealment of his wealth (to avoid its being attached in execution of a decree), there the original claim (such as a debt) may be presumed to be proved even if he (the opponent) denies his liability.

545 केशाकेशिकं सग्रहणम् । उपलिङ्गनाद्वा शरीरोपभोगाना तज्जातेभ्यः क्रीवचनाद्वा । कौटिल्य IV 12

546 Best on 'Evidence' (12th ed 1922) sec 294 cites as an illustration of circumstantial evidence the fact of one armed being regarded as the probable murderer in certain cases Compare Wills on 'Circumstantial evidence' (7th ed of 1937 English and Indian combined) p 145 'Amongst the most forcible of presumptive indications may be mentioned all attempts to pollute or disturb the current of truth or justice, or to prevent a fair or impartial trial by endeavours to intimidate, suborn, bribe or otherwise tamper with the prosecutor, or the witnesses or the officers of justice, or by the concealment, suppression, destruction, alteration of any article of real evidence'

547 दानं प्रज्ञापनाभेदः संप्रलोभक्रिया च या । चित्तापनयन चैव हेतवो हि विभावकाः । एषामन्यतमो यत्र वादिना भावितो भवेत् । मूलक्रिया तु तत्र स्याद् भाविते वादिनिह्नवे ॥ कात्या (337–338) q by व्य. प्र p 169, विवादचन्द्र p 188 (only the first), which reads चित्तापनयनम्.

Judges often repeat from the Bench the words 'witnesses may lie, but circumstances cannot'. But this so-called maxim is often dangerous. Circumstantial evidence leads to conclusions that are in several instances false. The ancient Hindu lawyers were quite aware of the dangers of drawing inferences from circumstantial evidence. Nārada's warning has already been mentioned (p. 356). Kaut.[548] (in IV 8) remarks: 'even one not a thief may by chance be on the way by which thieves pass and one meeting thieves is seen to be apprehended as a thief because he is mixed up in dress, arms and articles carried with the thieves or is found near the articles stolen, just as Māndavya though not a thief declared himself to be a thief for fear of being subjected to torture; therefore (the king) should punish one only after thorough examination' Māndavya's is a leading case on the danger of relying on purely circumstantial evidence. Brhaspati[549] also remarks that 'a decision should not be arrived at merely by relying on the words of texts; for, if judges come to a conclusion without applying careful reasoning, loss of dharma results; a thief is held to be not a thief and a good man is held to be a wicked one in a judical proceeding (not arrived at with proper reasoning). The sage Māndavya was held to be a thief on account of the decision being arrived at without proper reasoning'[550].

The 9th Act of the Mṛcchakaṭika is a standing literary condemnation of conclusions about guilt drawn from circumstantial evidence and of how judicial procedure is vitiated (of *vyavahāra-dustatā*, as the author says in Act I)

Nār IV. 289 provides that when even circumstantial evidence and presumptions therefrom do not enable the court to arrive at a decision, the judge should press the litigant with

Vide note 332 above for other references to माण्डव्य

550 Wills' work 'Principles of circumstantial evidence' (English and Indian ed combined, 7th ed pp 39–48) contains a lucid exposition of the value and defects of purely circumstantial evidence.

śapathas (oaths and ordeals) according to the place, time and strength of the litigant, such as fire, water, his spiritual merit and others Manu VIII. 109 also says that when there are no witnesses the truth would have to be found out by *śapathas* Divine proof is called *dauṛkīkriyā* or *samayakriyā* (Viṣnu Dh S. IX. 1) Some writers make a distinction between *sapathas* (special oaths) and ordeals (*divyas*), others (like Manu VIII 109–114, Nār. IV. 239) do not For example, the Vivādacandra quotes Nār IV. 247 'when there is no witness in a dispute between litigants, there the judge should decide by means of ordeals[551] and various *śapathas*' Acc. to the Mit. (on Yāj II. 96) and S V (p. 106) both special oaths and ordeals are divine proof (*divya pramāna*), but in disputes of small value *sapathas* (oaths) were generally employed, while ordeals were resorted to only in serious disputes or crimes The Mit (on Yāj. II 96), the V May. p 46 and V P (p 170) state that ordeals are those that generally end in immediate decision of the dispute, while *śapathas* take time for decision (because after the oath the king has to wait for a week or more to see whether a calamity befalls the person taking the special oath) Vyāsa quoted by Sm C II. p. 96 employs the word *śapathas* for both special oaths (taken as to one's 'satya ') and ordeals like balance. Śankha-Likhita state that divine proofs are the balance, eating poison, entering fire, holding a piece of (hot) iron, offering one's merit acquired by sacrifices and charity and the king should make him undergo other sapathas[552]. Brhaspati says that where documents or witnesses do not lead to a certain decision or where inference from circumstantial evidence also is confusing, there the matter is to be decided by divine proof[553]

Special oaths were taken not only in judicial proceedings, but also in ordinary dealings to clinch one's assertion or to clear one's character or reputation Nār (IV. 243–244) refers to

553. लिखिते साक्षिवादे च सन्दिग्धिर्यत्र जायते । अनुमाने च सम्भ्रान्ते तत्र दिव्यं विशोधनम् ॥ बृह. q by व्य. मा. p 333, अपरार्क p. 629, विवादचन्द्र p. 111 (reads प्रकल्पयेत् as the last word).

the special oaths taken for clearing themselves by Vasistha when he was suspected to be a *yātudhāna* (a demon or sorcerer) and by the seven sages together with Indra, who (sages) were suspected to have stolen lotus fibres (by each among them[554]). Manu VIII. 110 also speaks of the *śapatha* taken by Vasistha before Sudās, son of Pijavana (when the sage was charged by Viśvāmitra with the offence of devouring his own hundred sons). Nārada (IV. 243) refers to Rg. VII. 104 15-16 in the first of which Vasistha made the imprecation,[555] 'May I die this very day if I am a *yātudhāna* or if I injured the life of a human being, May he who falsely addressed me as yātudhāna be deprived of his ten valiant sons'! Manu VIII. 110 also refers to the same hymn[556]. Manu VIII. 113 (=Nār. IV. 199) referred to above (p 343) states the various oaths to be taken or administered to the parties according to their respective castes. Manu VIII. 114 further provides for special oaths for litigants by touching the heads of their sons and wives. That sapatha taken by *satya* was common in very ancient times appears from Pān. V 4 66 (*satyād-asapathe*).[557] Nār. IV. 249 prescribes that in charges of grave offences ordeals may be resorted to and *śapathas* in matters of small moment Nār. IV. 248 mentions 'truth, horses and arms, kine, grains and gold, the feet of (the images of) gods and the ancestors, acts of charity and good deeds (*sukṛta*) are to be employed in śapathas as declared by Manu' Brhaspati[558] enumerates the special

554. In the Anuśāsanaparva 95 13-35 it is narrated that each of the seven sages suspected the others of the theft of lotus-fibres and that they cleared themselves by taking oaths Indra is said to have taken an oath when he was the subject of suspicion in relation to Ahalyā. Vide Best on 'Evidence' (12th ed. of 1922) pp 42-45 sections 56-59 for the employment of oaths in all ancient societies in courts as well as outside, for the forms and sanctions of oaths and for the arguments urged against their use

oaths mentioned by Manu and Nār. and adds that they are to be employed in small matters (civil and criminal) The Viṣnu Dh. S. (IX. 5–10) prescribes that when the litigant is a sūdra and the dispute relates to a matter worth less than one, two, three, four or five *kṛsnalas* he should swear respectively by holding in his hand *dūrvā* grass, sesame, silver, gold or earth taken from ploughed land, that (IX 11–12) beyond that value various ordeals may be offered and that oaths with similar objects in the hands may be offered to vaiśyas, kṣatriyas and brāhmaṇas when the value of the subject matter is double, three times or four times of the value in the case of a sūdra Manu VIII. 111 gives the admonition that a wise man should not make a false oath, because by so doing he incurs loss (of reputation) here and after death (by falling into Hell) Yāj II. 236 prescribes a fine of 100 *paṇas* for one who takes an improper or profane oath [559].

The benefit of doubt is to be given, according to modern ideas on the administration of justice, to the accused. This principle was put forward several centuries before Christ by Āp Dh. S II 5 11 2 'the king should not punish when there is a doubt' (about a man's guilt [560])

CHAPTER XIV

ORDEALS

A brief history of ordeals may be set out here. Rg. I. 158. 4–5, wherein[561] the sage Dirghatamas, son of Ucatha, prays that the fire of faggots heaped tenfold may not burn him and that the rivers in which he was thrown bound hand and foot may not engulf him, are regarded by some as a reference to the ordeal of fire and water Yet in those verses there is probably no reference to ordeals, but to the cruel treatment of Dirghatamas by *dāsas* headed by Traitana Rg. III. 53. 22 also, where it[562] is said 'he heats the axe (or acc to Sāyana 'just as the tree is injured by contact with the axe &c')', does not contain a clear or certain reference to the ordeal of holding the heated axe. Atharvaveda[563] II. 12 is held by several Western scholars to contain a reference to the fire ordeal. This also is far from certain, though verse 8 may lend some support to that view[564] The Pañcavimsa (or Tāndya) Brāhmana 14. 6. 6 refers[565] to the story of Vatsa, who was abused by his step-brother that the former was the son of a śūdra woman, against which Vatsa protested, urged that he was a brāhmana, entered fire to prove the truth of his assertion and came out of fire unscathed. This is referred to by Manu VIII. 116. This is probably the earliest

561. मा मामेधो दशतयश्चितो धाक्रू प्र यद्वां बद्धस्त्मनि खादति क्षाम् ॥ न मा गरन्त्यापो मातृतमा दासा यदीं सुसमब्धमवाधुः । ऋ. I. 158. 4–5

562. परशुं चिद्धि तपति शिम्बलं चिद्धि वृश्चति । उखा चिदिन्द्र येषन्ती प्रयस्ता फेनमस्यति ॥ ऋ. III 53. 22.

563. आ दधामि ते पद समिद्धे जातवेदसि । अग्निः शरीरं वेवेष्टूवसु वागपि गच्छतु ॥ अथर्ववेद II. 12. 8.

564 Vide Proceedings of the American Oriental Society, vol XIII pp CCXXI–XXVI where, after referring to the views of Ludwig (III p. 445), Weber (Indische Studien XIII. p 164) and Zimmer (Altindische Leben, p 184) about the mention of the fire ordeal in the above hymn, it is sought to be proved that the hymn refers to re-establishing a soiled reputation and reliance is placed on the Kausikasūtra (47. 25 ff) which does not treat it as a fire ordeal hymn.

565. वत्सश्च वै मेधातिथिश्च काण्वावास्तां तं वत्सं मेधातिथिराक्रोशदब्राह्मणोसि शूद्रा-पुत्र इति । सोग्निमुदूतेनाग्निं व्यपाद यत्तरो नौ ब्रह्मीयानिति । वात्सेन वत्सो व्यैन्मेधातिथेन मेधातिथिस्तस्य न लोम च नौपत् । ताण्ड्यमहाब्राह्मण 14. 6. 6.

and clearest reference in ancient Sanskrit Literature to the fire ordeal Next comes the reference to holding in the hand the heated head of an axe by a person accused of theft to prove his innocence contained in the Chāndogya[566] Upanisad VI. 16 1. Āp. Dh S. II. 11. 29 6 refers to inference and divine proof (quoted above n. 542). In another place (II 5. 11. 3) Āpastamba states that after carefully considering (the charge before him) by means of divine proof and questioning (of witnesses) the king should set about awarding punishment Śankha-Likhita (n 552) name four ordeals, viz those of balance, poison, water and holding red-hot iron[567]. Manu VIII. 114 mentions only two viz. the holding of fire (i. e. red-hot iron) in the hand or plunging in water, but Nār. IV. 251 states that Manu declared five kinds of ordeals. Yāj II 95, Visnu Dh. S. IX-XIV and Nār. IV. 252 mention five viz. balance, fire, water, poison and *kośa* (consecrated water). Nārada, however, knew two more viz. *taptamāsa* (IV. 343) and *tandula* (IV. 337). Brhaspati (S. B E. vol. 33 p. 315 verses 4 and 5) and Pitāmaha speak of nine (Aparārka pp. 628, 694 respectively).

Yāj II. 95-113, Visnu Dh. S IX-XIV, Nār. IV. 239-348, Kāt. 411-461, Śukra IV. 5. 233-270 treat of the several ordeals Pitāmaha contained, as the quotations from the digests show, the most elaborate treatment That ordeals had attained great vogue in the early centuries of the Christian era is shown by the Mrcchakatika Act IX. 43 (where the ordeals of poison, water, balance and fire are expressly named) and by Bāna who mentions the same four in Kādambarī, para 47[568]. Among the digests and commentaries the Mitāksarā, the Smrticandrikā, the Divyatattva of Raghunandana, the Vyavahāramayūkha and the Vyavahāraprakāśa contain the most elaborate treatment of ordeals[569]

569. Those interested in the further study of ordeals may consult my translation of and notes on the Vyavahāramayūkha

Divya is defined as 'that which decides a matter (in dispute) not determined by human means of proof' (V. Mayūkha) or 'that which decides what cannot be or is not to be decided by human means of proof' (Divyatattva[570] p. 574). Medhātithi on Manu VIII 116 discusses the question how ordeals can be relied upon for the discovery of truth The objection is raised that fire and water are natural forces that act in a uniform way and are not intelligent beings which may change their minds by an appeal to them. Therefore, the objector says, ordeals and oaths are like magic and are only meant to frighten the parties into telling the truth It is further objected that thieves may (by some trick) not be burnt in the fire ordeal and good men are seen to suffer burns. The reply is: the usefulness of ordeals cannot be negatived by these examples of failures, as they are not frequent and as even direct perception and inference sometimes lead to uncertain results No one, however, says that these latter should not be relied upon. Just as one relies on witnesses in deciding a matter (who may for aught one knows be telling lies), so reliance can be placed on ordeals. Where there is failure in case of ordeals, it must be held to be due to the results of the performer's actions in past lives. The general rule as stated by Yāj II. 22, Nār. II 29, IV. 239, Brhaspati[571], Kāt (217) and Pitāmaha is that ordeals were to be resorted to only if no human evidence (witnesses, documents, possession) or circumstantial evidence was available Kāt. (218-219) prescribes that[572] if one party relies on human means of proof and the other on divine proof, the king (or judge) is to accept human means and not divine and that if human means of proof reach (i e. are able to establish) only a part of the allegations (in the plaint), then human means should be accepted and no divine modes of proof, even though they may be complete (i.e completely cover all allegations) When Nār. II 30 (= IV. 241) states that divine means of proof are to be resorted to when a transaction takes place in a forest, in

a lonely place, at night, inside a house, in cases of *sāhasa* and when a deposit is denied, or when Kāt (230) prescribes that trial by ordeals is to be resorted to in the case of persons accused of committing *sāhasa* in secret (i.e. by wearing masks &c.),[573] those words only apply where it is impossible to have human evidence. Kāt. (229) states an exception to this viz. when the dispute[574] investigated is about *sāhasa* or about assault or abuse and defamation and in causes that spring from the use of force there is an option that witnesses or divine proof may be resorted to. Nār. IV. 242 states that divine proof could be resorted to when the chastity of women was in question, in theft and *sāhasa* and in all cases of the denial of monetary liability. Sītā's ordeal of fire at once comes to mind as an illustration of Nārada's rule. Brhaspati[575] and Pitāmaha say that in disputes about immoveable property divine proof should be avoided, which does not forbid *divya* altogether, but only where the evidence of neighbours or of a document is available and that in the latter case even if the defendant offers to pay a fine if he fails by the divine proof, *divya* is not to be resorted to. The ordinary rule was that ordeals were to be administered to the defendant[576] (Kāt. 411 = Visnu Dh. S. IX. 21). But Yāj II. 96 gives an option that any one of the two litigants may by mutual agreement undergo an ordeal and the other should agree to pay on defeat a fine or undergo physical punishment This means that human proof is adduced to prove a positive proposition, that divine proof may be resorted to prove a negative proposition as well (e. g. a defendant denying the claim for a debt may prove by *divya* that he did not borrow a loan). Making an offer to pay a fine or undergo corporal punishment is said to be being *śirsakastha*[577] or *śirastha*

577. On शीर्षकस्थेऽभियोक्तरि (या. II 95) the मिता. explains 'शीर्षक शिरो व्यवहारस्य चतुर्थः पादो जयपराजयलक्षणस्तेन च दण्डो लक्ष्यते तत्र तिष्ठतीति शीर्षकस्थः तत्प्रयुक्तदण्डभागित्यर्थः ।' *Śiras* (head) indicates the fourth stage of a law-suit viz success or defeat and since fine is imposed on the defeated party, it indicates fine or corporal punishment.

(in Yāj. 95, Viṣnu Dh. S IX. 20, 22, Pitāmaha, Nār IV. 257, Kāt. 412-413) Yāj. II 95 prescribes that the ordeals of balance, fire, poison and water were to be prescribed in disputes of great value and not elsewhere and in II. 99 he says that all claims above 1000 panas (of copper) are to be regarded as of great value, but in charges of treason and of the committing of any one of the five grave sins (*mahāpātakas*) any one of these four ordeals may be resorted to without regard to value and without any offer to pay fine on defeat. So also these four ordeals were to be offered to the defendant where the plaintiff offered to pay a fine on defeat. The ordeal of *kośa* was allowed in all claims whether of high value or low value or whether the plaintiff offered to pay a fine on defeat or not.

Yāj. II. 98 states that the ordeal of balance should be given to women, a minor (under 16), a very old person (above eighty years), the blind, the cripple, brāhmaṇas and the diseased; the fire ordeal (i. e. heated ploughshare and heated māsa) to kṣatriyas, water ordeal to vaiśyas, poison to śūdras. Nār. IV. 335 assigns ordeals to the different varṇas similarly. Nār IV. 256 prescribes that ordeals should not be undergone by those who are observing a vow, who are much distressed or who are performing austerities, and by women Pitāmaha quoted by Mit. (on Yāj. II. 98) adds minors and old persons to these. The Sm. C. II p. 103 explains this as referring to the ordeals of fire, poison and water only. Another Smṛti (q. by Mit on Yāj. II. 98) prescribes that the ordeals of balance and kośamay be offered to women, minors and the others mentioned above. There is in all these rules a spirit of tolerance, kindness and concern for the weaknesses of mankind. Kāt (423) holds[578] that persons of the higher castes who are cowherds, traders, artisans, bards, domestic servants and usurers should be given ordeals as if they were śūdras. Kāt (422) allows all ordeals to members of all castes, except that brāhmaṇas are not to undergo the poison ordeal. Kāt. (424-426) prescribes that the ordeal of fire should not be offered to blacksmiths or those who are leprous nor of water to those who ply boats or who suffer from difficulty in breathing or cough, nor poison to those who are experts in incantations and *yoga* practices or who suffer from (excess

of) bile or phlegm, nor *kośa* to those who are drunkards, to persons fond of women, to gamblers and to those who are atheists. Visnu Dh. S. IX. 25, 29 and Nār IV. 255, 332 contain similar provisions. Kāt (427–430) further provides that no ordeal should be allowed to be performed personally by the following persons, viz. those charged with the murder of their father, mother, a brāhmana, their teacher, a minor, a woman and the king; those guilty of the (five) grave sins; particularly those that are atheists; those who wear (or subsist by) peculiar sect marks; great rogues; those who are experts in incantations and *yoga* practices; those who are the progeny of unions of persons of different varnas; those who repeatedly engage in sin; in the case of these the king should offer ordeals to good men appointed by them on their behalf and if such good men are not willing then they should appoint their own relatives. Śankha-Likhita also refer to the appointment of friends or relatives as representatives (Aparārka p. 842)[579] Kāt (433)[580] lays down the following rather remarkable provision, viz when untouchables, men of lowest castes, slaves, *mlecchas* and those born of mixed unions in the reverse order of the castes are guilty of crimes, the determination of their guilt (by the above mentioned ordeals) should not be made by the king; he should indicate such ordeals as are in vogue among them. The Sm. C and Par M say that this applies

579. असाक्षिमणिहिते दिव्यम् । अथवा मित्रैः सज्जनैरात्मानं वा शोधयेदेव । स चेद्दण्डोऽधिना चार्थं दापयेत् । शङ्खलिखित q by अपरार्क p 842

580 अस्पृश्याधमदासाना म्लेच्छाना पापकारिणाम् । प्रातिलोम्यप्रसूताना निश्चयो न हु राजनि । तत्प्रसिद्धानि दिव्यानि संशये तेषु निर्दिशेत् ॥ कात्या q by मिता on या II 99, स्मृतिच० II p 104, परा मा III p 161, 'तत्प्रसिद्धानि सर्पघटादीनि' व्यवहारतत्त्व p 579, व्य. प्र 180 'तत्प्रसिद्धानि सर्पघटादीनि इति स्मृतितत्त्वे'. In the Gadag Inscription of Vikramāditya VI dated 1098 A D. (E I vol 15 p 348 at p 360' there is this passage 'we handle boiling water, *we strike with the hand a great snake placed in a jar* or we may well mount the balance' In I A, vol 19 p 242 at p 246 it is stated in an inscription dated 1208 A D of the Mahāmandaleśvara Kārtavīrya IV that Candrikā (or Candaladevī), the queen of Laksmīdhara of the Rattas of Sugandhavarti (Saundatti) was a pativratā and got success by *ghatasarpa* 'भाति श्लाघ्यगुणा पतिव्रततया देवी चिर चन्द्रिका संग्राह्य घटसर्पजातविजयं लक्ष्मीधरेयसी'. The Bombay Gazetteer vol I part 2 p 556 n 5 gives a quotation from the Asiatic Researches vol I where the ordeal of putting a ring or coin in a vessel in which a snake has been already placed and asking a person to take it out is mentioned. Vide also Report of South Indian Epigraphy for 1924 para 66 for the ordeal of dipping the fingers in boiling ghee or oil

only when they cannot secure relatives or other persons appointed by them to undergo the usual ordeals on their behalf. The Vyavahāratattva (p. 579) explains that the ordeals referred to among mlecchas and others are the snake in the jar and the like. This seems to have consisted in taking out a ring or coin with the hand from a jar in which a snake was placed; if there was no snake-bite or no effect even if the snake bit, the person was declared innocent. Vide note 580. Yāj. II. 97 and Nār. IV. 268, 320 prescribe that all ordeals are to be administered by the chief justice in the morning at sunrise or in the forenoon in the presence of the king, the sabhyas and brāhmanas. The Mit. adds that a Sunday is the proper day according to the usage of respectable people (*śiṣṭas*). Pitāmaha specially provides that the water ordeal should be administered in the noon and poison in the last watch of the night (Mit. on Yāj. II. 97). Certain seasons and months were either appropriate or inappropriate to certain ordeals e. g. Nār. IV. 254 states that the fire ordeal should be given in the rainy season, balance in the winter (*śiśira*), water in summer, poison when the season is cool Nār. IV. 259 prohibits water ordeal in the cold season, fire in summer, poison in the rainy season and balance while the wind blows violently. The Mit. (on Yāj. II. 97) and Par. M. III. 162 quote Pitāmaha to the effect that the months of Caitra, Vaiśākha and Mārgaśīrsa are common to all ordeals, *kośa* and balance may be administered in all months.

As regards the place, Pitāmaha prescribes that ordeals are to be administered by the king or the judge appointed by the king in the presence of learned brāhmanas and the public (or the ministers)[581]. Kāt. (434–35 and 437) provides:[582] 'ordeals should be administered in some well-known temple in the case of men accused of grave sins and near the royal gate in the case

For the festival of the banner of Indra, vide H. of Dh. vol. II. p. 398, 825–826. On व्यभिचारं &c the स्मृतिच० says 'विहितदेशाद्यनादरे दिव्यमाप्यहानिर्भवतीत्याह स एव'.

of those charged with treason; in a public place where four roads meet in the case of those born of mixed unions in the reverse order of castes, in cases other than these in the hall of justice. When ordeals are administered in an improper place or at an improper time and when they are performed outside human habitation (in a lonely place) they fail as to the matter in hand (i. e. they cease to be decisive). Nār IV 265 prescribes that the balance should be planted in the hall of justice or at the royal gate or near a temple or where four roads meet.

The procedure common to all ordeals and described in the Mit on Yāj II 97 and 99, the V May pp 52–55, V P. pp 183–186 (all relying on Pitāmaha) and Vyavahāra-nirnaya pp 148–53 (relying on Prajāpati, Pitāmaha, Br) is briefly as follows —In ordeals the chief justice is to do every thing at the king's bidding as the *adhvaryu* priest does in all sacrifices He should observe a fast and the *śodhya* (person undergoing the ordeal to clear himself) is also to do the same. Both are to bathe in the morning and the śodhya was to have his wet clothes on. The Chief Judge is to invoke the gods to the accompaniment of music and to offer flowers, sandal-wood paste and incense He should fold his hands, face the east and invoke Dharma to be present at the ordeal (Dharma being the principal deity in ordeals) and assign places to Indra, Yama, Varuna and Kubera in the four principal quarters from the east and to Agni and other guardians of quarters in the corners of the principal quarters. He is to contemplate on the eight deities of the eight quarters as having different colours (viz Indra as yellow, Yama as dark &c.) He is to assign the eight Vasus (repeating their names) to the south of Indra, the twelve Ādityas (repeating their names) between Indra and Īsāna (i. e. between east and north-east), assign a place to the eleven Rudras to the west of Agni, assign a place to the seven Mother goddesses between Yama and Nirrti (between south and south-west), assign a place to Ganeśa to the north of Nirrti, to the Maruts (seven) to the north of Varuna; to the north of the balance (or the place of other ordeals) he should invoke Durgā. All these deities are to be invoked with appropriate Vedic mantras (set out in V. May.) He should offer the several items of worship from *arghya* (water offered by way of honour) to ornament to Dharma (as the principal deity) and then to the subsidiary deities from Indra to Durgā (according to appropriateness) and then sandalwood paste, flowers, incense, lamp and *naivedya* to the deities from Dharma to Durgā The

flowers for Dharma are to be red. Up to this is the work of the Chief Justice. Sacrificial priests should offer into fire in the four quarters 108 oblations of clarified butter, boiled rice and fuel sticks with syllable *Om* and the *Gāyatrī* and with '*Om*' and '*svāhā*' at the end of each. Having written down on a leaf the subject matter for which the party is undergoing ordeal the leaf should be placed on the head of the śodhya with the *mantra*,[583] 'the sun, the moon, the wind, fire, heaven and earth, waters, the heart, Yama, day and night, the two twilights and Dharma know (see or mark) the deeds of men'.

The several ordeals will now be briefly described.

First comes *tulā* or *dhata* (balance) A sacrificial tree (such as *khadira* or *udumbara*) should be cut to the accompaniment of vedic mantras (employed in making a sacrificial post). Two wooden posts made of that tree should support a transverse beam (called *akṣa*). The posts should be fixed in the ground, the part above ground being four cubits and that below being two cubits. This frame should face the east (i. e. the posts must be in the south and north). Then the beam of the balance was to be made from the same tree and was to be suspended from the transverse beam of the frame by means of a hook. Three iron rings were to be fastened to the beam of the balance, two at the end and one in the middle for suspending the balance from the transverse beam by means of a chain or string. Two scales were to be suspended at the two ends of the beam by hooks and strings from the iron rings fixed at the ends of the beam On the two sides of the balance there should be two arches in which the scales should move and which should be ten angulas higher than the balance. There should be two perpendicular pendants made of clay hanging down from the arches and touching the upper surface of the balance In the pan to the west the *śodhya* should be placed and weighed against clay, bricks and stones placed in the other pan. Then traders or goldsmiths or braziers should examine the balance and bring it on a level with the two pendants hanging down from the arches and examine the perfect horizontality of the

583. The मन्त्र is आदित्यचन्द्रावनिलोऽनलश्च द्यौर्भूमिरापो हृदयं यमश्च । अहश्च रात्रिश्च उभे च सन्ध्ये धर्मोपि जानाति नरस्य वृत्तम् ॥ आदिपर्व 74 30. It is to be noted that पितामह quoted by the मिता० regards this verse of the आदिपर्व as a मन्त्र and Prajāpati quoted by the Vyavahāranirnaya p. 153 does the same Compare for a similar verse Manu VIII. 86.

beam of the balance by spilling a little water on the beam. When the person sitting in one pan is equal in weight to the materials (clay &c) in the other, a line should be drawn with chalk by the experts on the arch (to show the exact position of the pans). Then the man is made to get down from the pan and he is to invoke the balance as stated in Yāj. II. 101-102, 'O balance, you are the abode of truth, you were created by the gods for this purpose, declare the truth, free me from this (cloud of) suspicion. Mother! if I am a sinner then take me lower, if I am pure take me upwards'. The person is then to hear exhortations about the result of untruth after putting the writing on his head (vide Nār. IV. 276 and Visnu Dh. S. X. 9), then he is again to be placed in the pan to the accompaniment of invocations (Nār. IV. 278-279, Visnu Dh. S. X 10-11). A worthy brāhmana learned in astronomy is to calculate the time of five *palas*[584] or *vināḍīs* Then his weight is again to be marked. If the person goes up (i. e is found lighter than what he formerly weighed) he is declared innocent (acc. to the com. on Nār. IV. 283, V. Mayūkha p. 60, Dīpakalikā on Yāj II. 102); if he weighs the same or goes down (i. e. weighs more) he is guilty. Then the person concerned is to distribute gifts to the judge, the brāhmanas and sacrificial priests and take leave of the deities invoked Brhaspati (SBE vol. 33 p 317 v. 19) states that he who weighs the same should be weighed once more. If the pan or the beam or the hooks break or the ropes give way owing to some visible cause then the procedure was to be repeated, but if the breaking is due to an unseen cause or accident, the person was to be declared guilty.

The ordeal of fire is as follows :—Nine circles with cowdung are to be drawn from west to east, they being meant for Agni, Varuṇa, Vāyu, Yama, Indra, Kubera, Soma, Savitr and all gods. Each circle was to be 16 *aṅgulas* in diameter and the space between two circles was to be 16 angulas. In each circle kuśa grass was to be spread and the person to be tested was to plant his feet on them; ghee was to be offered into fire 108 times A blacksmith by birth should heat in fire a ball of iron weighing 50 *palas* (16 palas[585] in the case of a weak man) and eight

584 A vināḍī is the time required for reciting 60 long syllables and 60 vināḍīs make one ghaṭikā So five vināḍīs will be equal to two minutes

585 A *pala* weighed 320 *guñjās* according to the Līlāvatī (*I. 4*). Acc. to Divyatattva (p. 608) 20 palas were equal to 66 *tolakas*, five māsas and 4 guñjās, which, while accepting the view that a pala is equal to 320 guñjās, gives the rather modern measurement into tolakas (*tolas*).

angulas in length till it becomes red-hot and emits sparks. Then all the details described above ending with the placing of the writing on the head of the *śodhya* are to be gone through by the judge and the fire (in the red-hot piece) is to be invoked with several mantras (such as Yāj. II. 104[586] and Visnu Dh. S. XI. 11-12). The *sodhya* should stand in the first circle facing the east. Having made red marks on all sores of the hands of the śodhya on which grains of rice have been rubbed, he (the judge) should place seven leaves of the *aśvattha* tree on them and also grains of rice and curds and should fasten round them threads Then the judge should carry the red-hot iron piece by means of a pair of tongs and place it in the hands of the śodhya (that are covered with leaves). Then the śodhya holding in both his hands the red-hot piece should walk from the first to the eighth circle not hurriedly but slowly and at ease. Having reached the 8th[587] circle he should throw the red-hot iron piece on to the 9th circle. Then the judge should rub on the hands of the śodhya rice grains and when the latter shows no hesitation at the rubbing and no injury on his hand at the end of the day he is declared to be innocent. Kāt. (441) and Yāj. II. 107 provide that if the red-hot piece falls earlier (i. e. before reaching the 8th circle) or there is a doubt (whether his hands are injured or not) or if he loses his footing or is burnt elsewhere than on the hands he should again undergo the ordeal.

The ordeal of water as described in the smrtis and digests is rather complicated. The Sm. C. (II. p. 116) remarks that[588] as the ordeals of water and poison had gone out of vogue (in its day) it passes over the procedure of these and takes up the description of *kośa* ordeal after the fire ordeal. Having gone to a reservoir of water the judge should get erected on its bank a *torana* (an arch) as high as the ear of the *śodhya* on an even and cowdunged plot. He should offer worship to Varuna (Lord of waters), to a bow of middling size and to three arrows (the points of which are made not of iron but of bamboo) with sandal

586. Before the red-hot iron is placed on his hands the शोध्य repeats 'त्वमग्ने सर्वभूतानामन्तश्चरसि पावक। साक्षिवत्सुप्यपापेभ्यो ब्रूहि सत्यं कवे मम ॥ या. II. 104; the आदिपर्व 5 27. (cr. ed. 5. 22) has the same verse (but reads सुप्यपापेषु सत्यं ब्रूहि कवे वच').

587. अथ सप्तस्वथपर्णान्तरिते षोडशपलमग्निवर्णं लोहपिण्डमञ्जलिनादाय सप्त मर्यादा गच्छेत्। शङ्खलिखित in स्मृतिच० II. p. 112, व्य. प्र p 196.

588 अथ जलविषयोक्तस्य ज्ञानुष्ठानत्वात् तद्विधिमनारभ्याथ कोशविधिरुच्यते । स्मृतिच० II. p. 116.

paste, incense, lamp, flowers A target is to be fixed at the distance of 150 *hastas* (cubits) from the torana A post of some sacred tree is to be fixed in the water and a strong man of one of the three higher castes free from love or hatred for the *śodhya* is to stand in navel-deep water facing the east and holding the post Then the judge is to make the *śodhya* stand in water, invoke the deities from Dharma to Durgā, perform all the rites up to the placing of the writing (embodying the accusation) on the head of the *śodhya* A ksatriya or a brāhmana following the profession of arms who is of a pure heart and has observed a fast should discharge, while standing near the root of the torana, three arrows at the target. The *śodhya* should invoke the water with the mantra, 'O Varuna ! save me by means of truth' (Yāj. II. 108)[589]. Then a young but swift man should run to the spot where the second arrow struck the ground, and stand there holding that arrow in his hand. Another swift man stands at the root of the torana whence the arrows were discharged. Then the judge claps his hands thrice. At the third clap the śodhya dives into the water seizing the thighs of the man standing in water and at the same time the swift man near the arch runs at his best speed to the place where the second arrow fell The other man who holds the arrow starts off the moment the first runner reaches him and comes running to the arch If he does not see the śodhya or sees only his head (i. e. the back of the head) when he reaches the arch the śodhya is to be declared innocent; but if he sees other parts of the head (such as the ear or nose &c.) or if the *śodhya* floats to some part other than the one where he dived he is not innocent

Ordeal of poison After worshipping Maheśvara with incense[590] and the like (mentioned above) poison placed before the image of Maheśvara is to be administered in the presence of (images of)

---

589 Several smrtis give different mantras to be recited by the judge in invoking the waters (so that there is an option) Vide Visnu Dh S XII 7–8 (tvamambhah &c), Pitāmaha (toya tvam prāninām prānāh &c) quoted by the Mit on Yāj. II 108, Nār IV. 316–317 (satyānrtavibhāgasya &c.), Kālikāpurāna q. by V P. p 206 The mantra in Śankha-Likhita (q. by Madanaratna and V. P. p 206) was सदसच्च त्वमेव वरुण । उभयोः प्रतिष्ठितस्यापि सत्यं त्विदं देव वरुण । त्वमेव तद्ब्रूहि वरेण्य तदादिशस्व ।. The Ms of मदनरत्न reads तदादिशस्वा ।

590. It is most appropriate that Siva is to be worshipped in the poison ordeal, since, according to the Paurānic mythology, he swallowed the Hālāhala poison prodnced at the churning of the sea. 960 *yavas* make one *pala*.

gods and brāhmanas The poison to be selected is *śārṅga* (derived from the śrnga plant) or *vatsanābha* (aconite) or *haimavata* (Visnu Dh. S. XIII 3, Nār. IV. 322 &c.). Pitāmaha (q. by Aparārka p. 712) treats the three as distinct, while Yāj. II. 111 appears to prescribe śārnga growing on the Himālaya as the poison to be selected. Visnu Dh S. (XIII. 2–3) also does the same. In the rains the quantity of poison is to be six *yavas* in weight, in summer five, in hemanta (and śiśira) seven or eight and in śarad (autumn) less than the latter (i. e. six yavas acc. to Mit. and three acc. to V. Mayūkha). Poison is to be administered in the last watch of the night and never in the noon or afternoon or twilight; it was to be mixed with ghee thirty times as much. It may be administered to any one except a brāhmana. Visnu Dh. S. XIII. 6–7 and Nār. IV. 325 are mantras with which the judge invokes poison and Yāj. II. 110 is the mantra which the *śodhya* repeats before taking poison viz. 'O poison! thou art the son of Brahmā, thou art firm in the duty of (deciding) the truth. Save me from this accusation and be like nectar to me by truth (if I be innocent)'. Nār. IV. 326 states that then the śodhya should eat the poison, should be kept in shade without food and guarded the rest of the day and if he discloses no signs of the effect of poison should be declared innocent. If the dose of poison is large, the Mit. (on Yāj II. 111) says that when the śodhya shows no change till five hundred clappings of hands then he should be declared to be innocent and medical treatment should be resorted to. Pitāmaha says that, in order to prevent fraud, for three or five nights before the ordeal the intending śodhya should be kept under the supervision of the king's servants and an examination should be made whether medicines, incantations or precious stones that are antidotes are secretly employed.

The ordeal of kośa. The śodhya is made to worship the stern deities (such as Rudra, Durgā, Āditya) with sandal wood paste, flowers etc. and made to bathe the images with water. Then the judge asks the śodhya to invoke the consecrated water with the mantra '*satyena mābhuraksa*' (Yāj. II. 108) and makes him drink three handfuls (*prasṛti*) of that water. Pitāmaha gives some special rules. The water may be that of the bath of the image of that god of which the *śodhya* is a devotee or if he holds all images in equal esteem, then of the Sun. In the case of Durgā it is her spike (śūla) that is to be bathed, the orb in the case of the Sun and the weapons in the case of other

gods The water of the bath of Durgā is to be offered as ordeal to thieves and those who live by the profession of arms and the water of the bath of the Sun is not to be given to brāhmanas In other divyas the result is declared immediately, but in the kośa ordeal there is a period of waiting which is more or less according to the value of the claim or the gravity of the offence Acc to Yāj. II. 113, Visnu Dh S 14. 4–5, Nār. IV. 330, if within fourteen days of taking the kośa ordeal the śodhya does not suffer any serious calamity due to the king's action or the act of God or does not fall seriously ill or does not lose by death his son or wife or other dear relative or his wealth, then he is to be declared innocent Insignificant loss or illness did not matter as it is unavoidable in this world. Besides, the calamity or illness must not be one common to several people (such as an epidemic). Drinking holy water (*kośapāna*) was employed not only as an ordeal for proving innocence, but it was resorted to also for assuring another about one's good will and future honesty (vide Rājat V. 326).

Ordeal of Taṇḍula (rice grains). It is to be administered in charges of theft or disputes about debts or other monetary matters. On the preceding day grains of rice should be made white (i e. husked). The judge should perform all the rites on the previous day. The rice grains should be placed in an earthen vessel, exposed to the sun, water of the bath of (the image of) the sun should be poured over them in the vessel and the vessel should be kept in that state the whole night The next day in the morning the *śodhya* should swallow thrice the rice grains He should be made to spit on a *pippala* or birch leaf. If blood is found mixed in his saliva he should be declared guilty.

Ordeal of taptamāsa (heated piece of gold). In a vessel of copper, iron or clay sixteen angulas in diameter and four angulas deep, the judge should get twenty palas of ghee and oil poured and heat it to the boiling point. Then the judge should cast into it a golden piece weighing one māsaka (equal to five *guñjās*). The *śodhya* should take out the heated golden piece with the thumb and the next two fingers. If he does not jerk his fingers or there is no scalded skin he should be declared to be innocent There is another method. Cow's ghee should be poured in a vessel of gold, silver, copper, iron or clay and it should be heated to the boiling point so that when a green leaf is cast into it the sound '*churu*' is produced. Into the

boiling ghee he should cast a golden, silver, copper or iron seal ring once washed. Then he should invoke the ghee with this mantra 'O ghee! thou art the holiest thing in sacrifices, thou art nectar; burn him (the śodhya) if he is a sinner; be cool as ice if he be innocent.' Then the śodhya takes out the ring from the boiling ghee. If there are no marks of scalding on his forefinger he is innocent

Ordeal by phāla (ploughshare). This is described by Brhaspati (S.B.E. vol. 33 p. 318 verse 28) quoted by the Sm C II. p. 119, V.P. p. 218 and others. A ploughshare of iron weighing twelve *palas*, eight angulas long and four broad should be made red-hot and the thief should be made to lick it once with his tongue. If he is not burnt he establishes his innocence; if otherwise, he is guilty The Vyavahāratattva (p 608) mentions that acc. to Maithila writers the thief meant is a cattle-lifter. The ordeal mentioned in the Chāndogya Upaniṣad is a *phāla divya*.

Ordeal of dharma (i. e of the images or pictures of Dharma). Men guilty of causing bodily injuries or who have monetary disputes or who desire to undergo this ordeal as an expiation for sins should undergo this. A silver image of Dharma and a leaden or iron one of Adharma should be prepared or the judge should draw on a birch leaf or a piece of cloth figures or pictures of Dharma and Adharma respectively white and dark in colour. Having sprinkled *pañcagavya* over the two, he should worship them with white and dark flowers respectively. The images or figures should then be placed in two balls of clay or cowdung. The two balls should be then placed inside a new earthen vessel in a cowdunged spot in the presence of images of gods and in the presence of brāhmanas. Then the judge should perform all the rites from the invocation of Dharma to the placing of the writing on the head. The śodhya should repeat the words 'if I am free from guilt may (the image or picture of) Dharma come to my hands'. Saying this he should take out one ball from the vessel. If he takes out Dharma he is innocent This resembles the drawing of lots.

Ordeals played their part in the judicial systems of most ancient countries. In early England handling of red-hot iron and plunging the hand in boiling water were the commonest ordeals. In the ordeal of water sinking was a sign of innocence and floating of guilt. Stephens (History of Criminal Law of England, vol I. p 73) suggests that the ordeal of water

was a form of honourable suicide. The Assize of Northampton (1176 A. D) prescribed the ordeal of water for murder, robbery, theft, forgery and arson, but ordeals were abolished in England from 1215 A. D. (*ibid.* vol I. p. 300) In India[591] there is epigraphic and other evidence to show that ordeals were resorted to till the end of the 18th century and rarely even later. In the Kittur Pillar Inscription (J. B. B R A. S vol IX. pp. 307-309) dated in Kaliyuga era 4289 in the reign of Kadamba king Jayakeśideva there is a description of the *phāladivya* which was administered by mutual agreement on Sunday to an ācārya Śivaśakti who had a dispute about a plot of land with Kalyāna-śakti the ācārya of another shrine and whose hand was examined the next day after he underwent the ordeal by all the bankers of the *agrahāra* village Degāve In the Silimpur stone slab Inscription of the time of Jayapāladeva (E. I vol XIII. p. 283 at p. 291-292) there is a reference to the ordeal of

591 In Beal's 'Buddhist Records of the Western world,' vol I p. 84 (also Watters on Yuan Chwang's travels vol . I p 172) four kinds of ordeals are mentioned as in vogue, viz. by water, fire, weight and poison. In the water ordeal the accused is placed in a sack connected with a stone vessel and thrown into deep water If the man sinks and the stone floats he is guilty, if the man floats and the stone sinks then he is pronounced innocent. The ordeal by fire is they heat a plate of iron and make the accused sit on it and again place his feet on it and apply it to the palms of his hands, moreover he is made to pass his tongue over it. If no scar results he is innocent, if there are scars his guilt is proved In the ordeal by weight a man and a stone are placed evenly in a balance If the accused is innocent the stone rises in the balance, if he is guilty the man rises and the stone falls In the ordeal of poison an incision is made in the right thigh of a ram, all sorts of poison with a portion of the food of the accused are placed in the incised wound If the man is guilty poison takes effect and the animal dies, if he is innocent the poison has no effect and the animal survives It will be noticed that these descriptions of the four ordeals do not agree in several respects with the descriptions in the smrtis and digests, while the poison ordeal in Beal has nothing in common with the smrti poison ordeal Alberuni (tr by Sachau, vol II. pp. 159-160) probably speaks of poison ordeal in the words 'the accused person is invited to drink *bish* called hrāhmana' (he is probably referring to poison being called the offspring of Brahmā in Yāj. II 110 and Nār. IV 325) In the ordeal of water the accused is simply thrown into a deep and rapidly flowing river or a deep well and he was held innocent if he was not drowned He describes the *kośa* ordeal and balance ordeal accurately, but states that if the man has spoken the truth he weighs more than before He describes correctly *taptamāṣa* (gold piece taken from boiling clarified butter) and also the ordeal of the red-hot iron piece.

balance[592] (about 1200 A. D.). The Viṣṇukuṇḍin king Mādhavavarman in the 7th century A. D. (Journal of Andhra Historical Research Society, vol. VI pp. 17, 20, 24) is said to have carried out various ordeals (*avasita-vindha-divyaḥ*). The E C. vol. III (Māndyā Taluka Ins. No. 79 p. 47) records that a dispute having arisen about the boundaries of land bestowed by means of a copperplate grant by the Hoysala king Vīra-Narasimhadeva, one Kannaya, a descendant of the original donee, performed an ordeal by holding consecrated food in the presence of the God Hoysaleśvara in the capital Dorasamudra and came out successful. E. C. IV. p. 27 (Yelandur Jagir Ins. No. 2 page 27, about 1580 A D.) is a charter to potters whose headmen underwent the ordeal of dipping their hands in boiling ghee as against barbers and washermen who denied that potters could pare their toe nails and tie on upper cloth (at the time of marriage). In the Indian Antiquary for 1931 (vol. 60 p 179) an extract is cited from the Archæological Report for Travancore 1930 which describes the balance ordeal undergone by a brāhmana 18 years before and seen by the writer himself in the temple of Śiva at Calicut. For the ordeal of red-hot ploughshare in the case of thefts, vide Report of South Indian Epigraphy for 1907, para. 27.

In the times of the Maratha kings ordeals were resorted to. For example, in 'Peshwa's Diaries' vol. 2 p. 150 (in 1764–65 A. D.) mention is made of *taptakatāha* ordeal (i. e. taking out a coin or ring or a piece of metal from a large vessel in which either water or oil or ghee had been brought to the boiling point) in which the person undergoing it had his right hand burnt up to the middle joints of the fingers and was declared to be false. In a Marathi publication called 'Vatanpatrem, nivādapatrem &c' pp. 46–56 edited by P. V. Mavjee and D. B. Parasnis (1909) there is a document which describes in great detail the ordeal of fire undergone in connection with a dispute about the office and emoluments of Deshpande in the district of Kalyan in *śake* 1666 Pausa bright 11th, Thursday (1745 A. D.). It is stated therein that the ordeal was performed on the tank of the sacred river Godāvarī at Kopargaon in accordance with Dharmaśāstra in the presence of the Peshwa himself and learned brāhmanas and *paṇḍitas* near the temple of the god Śrī Śukleśvara, that as the opponent was long in

592. सन्दिग्धनिर्णयं युक्त्या कुर्वतोपि सहस्रशः । 'यस्य धर्मतुला नासीद्वनालङ्घित-पुञ्चका' E. I vol. XII, at pp. 291–292.

possession the ordeal had to be performed by the man claiming title, that an iron ball of 50 palas (i. e. 166 *tolas* and two *māsas*) was heated red-hot and the *śodhya* carried it across seven circles and threw it in the 8th circle on flour and bundles which began to burn, that his hands were examined in the presence of the opponent and the respectable people and were found unaffected and the opponent was made to pass a document of victory to the *śodhya* called '*yejitapatra*'. The description agrees very closely with that given above. In the same work at pp. 36–41 there is a remarkable description about an ordeal undergone (in 1742 A. D) by Mahomedan litigants in their own mosque for 15 days by lighting lamps and sitting down in the shrine. There are several other *vatanpatras* in the same work which refer to ordeals.

For an informing article on divyas reference may be made to Dr. Dines Chandra Sirkar's 'The successors[593] of the Śātavāhanas' Appendix pp 354–376 (Calcutta, 1939) He quotes therein a passage from the 'Asiatic Researches' vol. 1, from which it appears that a magistrate named Ali Ibrahim Khan at Benares tried by *phāla divya* two cases in 1783 A. D. and reported them to the then Governor–General, Warren Hastings. In the 'Trtīya-sammelana-vrtta' (pp. 18–26) and in the Caturtha-sammelana-vrtta pp 100–154 of the Bhārata-itihāsa-samśodhaka-mandala at Poona (both in Marathi) Mr Bhaskar Vaman Bhat contributes two thoughtful and scholary papers on the administration of Justice in the times of the Marathas in which the part played by ordeals is described at some length.

---

593. It is somewhat strange that Dr Sirkar refers to 'Divyatattva of Bṛhaspati' (in 'Successors of the Sātavāhanas' Appendix p. 360). A Divyatattva of Raghunandana is well-known. A Divyatattva of Brhaspati has so far been mentioned nowhere.

CHAPTER XV

DECISION

The last (i. e. 4th) stage in a judicial proceeding is *siddhi* (Yāj. II. 8) or *nirnaya* (decision). If pratyākalita (as defined above on p 298) is regarded as a *pāda* of *vyavahāra* (and since all are agreed that there are only four pādas) then the decision is not a *pāda* of a lawsuit but is the fruit thereof (V. P. p. 86). When the evidence has been led, the king (or chief justice) should with the help of the *sabhyas* decide upon the success or failure of the plaintiff[594]. Nar. II. 42 says that the sabhyas should ask the parties to leave the court when they are considering their verdict or what decision was to be pronounced[595]. It is stated by Vyāsa and Śukra IV. 5. 271 that the decision of a case is based on eight sources[596] (6 acc to Śukra) viz. the three *pramāṇas* (possession, documents and witnesses), logical inference, the usages of the country, śapathas (oaths and ordeals), the king's edict and the admission of the litigants. Pitāmaha prescribes that, in disputes where there are no witnesses, no possession nor documents and no recourse can be had to divine proof, there the king is the final deciding factor as he is the lord of all[597].

It is stated by Nārada II. 41 and 43 that, whether a party is defeated by his own admission or by his own conduct (i. e. because he adduces false witnesses or forged documents) or

594. उक्तप्रकाररूपेण स्वमतस्थापिता क्रिया । राज्ञा परीक्ष्य सभ्यैश्च स्थाप्यौ जयपराजयौ ॥ संग्रहकार q. by स्मृतिच० II. 120, परा. मा. III p. 199.

595. Dr Jolly (S B. E. vol. 33 p 35) is not right when he translates Nār II. 42 as 'whenever the false assertions have been removed the judges shall pass a decree'. He has not also correctly rendered the com. of Asahāya. There is no word for 'assertions' in Nār. II 42 पक्षाद्युत्सार्य तु सभ्यै कार्यो विनिश्चयः सदा' on which the comment of Asahāya is: यदा निर्णयकालो भवति लग्नस्तदा वादिप्रतिवादिनोः पक्षैः सर्वैस्तत्क्षणसम्भव्यमानकैः सह द्वावप्युत्सार्य सभ्यैः निर्णयः कार्यः ।

597. लेख्यं यत्र न विद्येत न भुक्तिर्न च साक्षिणः । न च दिव्यावतारोस्ति प्रमाणं तत्र पार्थिवः । निश्चेतुं ये न शक्याः स्युर्वादाः सन्दिग्धरूपिणः । तेषां नृपः प्रमाणं स्यात्स सर्वस्य प्रभुर्यतः ॥ पितामह q. by स्मृतिच० II. 26, परा. मा III. p 93. व्यवहारसार p. 43, मदनरत्न.

whether he is defeated after full trial and the adducing of proof, it is proper that the defeat should be declared by the sabhyas (the judges) and that a *Jayapatra* (a document of success i.e. a judgment) should be given to the successful party couched in fitting terms Several verses of Nārada (quoted by Aparārka p. 684), Brhaspati (S B. E. vol. 33 p 307 verse 19), Kāt. (259–265), Vrddha-Vasistha (q. by Mit. on Yāj II 91- and Aparārka p. 684) and Vyāsa (Sm C II. p 57) lay down the contents of the judgment[598] It was to contain a brief statement of the plaint, the reply, the evidence, the depositions of witnesses, discussion thereof, arguments, the smrti texts applicable, the opinion of the sabhyas, the decision and the relief granted, and should be signed by the chief justice and bear the royal seal Vas. 19 10 refers to precedents also in the decision of cases and the awarding of punishments (*āgamād-dṛṣṭāntāc-ca*) The Mit quotes a smrti text (on Yāj. II. 91) that other members of the assembly (who are not judges) proficient in smrti may also sign the judgment to show that the decision is acceptable to them also. But this was not absolutely necessary, as is made clear by the Vivādacandra p. 146. Kāt (256) applies the word *paścātkāra*[599] (refutation) to a judgment containing the above particulars given after a complete contest, while he restricts the word *jayapatra* to a document (given by the judge) when a plaintiff becomes what is called *hīnavādī* (because he makes a change in his pleading or for similar cause) and when there has been no complete trial of an action; and such a document embodies only what happened. Kaut. (III. 19) appears to employ the word 'paścātkāra' in a somewhat different sense when he says 'the

599. निरस्तास्तु क्रिया यत्र प्रमाणेनैव वादिना । पश्चात्कारो भवेत्तत्र न सर्वासु विधीयते ॥ अन्यवाद्यादिहीनेभ्य इतरेषां प्रदीयते । वृत्तान्तवादसंसिद्धं तत्र स्याज्जयपत्रकम् ॥ कात्या. q. by स्मृतिच. II 57-58, परा मा III. 124-125, व्य. म p 146 For हीनवादी vide above p. 303.

person, who, when charged with murder, does not reply to the charge that very day, stands refuted' (i. e. is found guilty)[600]. The Mit (on Yāj. II. 91) differing from Kāt holds a jayapatra to be a judgment giving a summary of the plaint, the reply, the evidence and the decision, while when a plaintiff is defeated for change of pleading or for default of appearance or for non-prosecution the document stating this is called '*hīnapatrāka*'. It is to be regretted that ancient jayapatras in Sanskrit have not yet been discovered. In 25 Calcutta Weekly Notes pp. CXLII—III Dr. Jolly communicated the substance of a *jayapatra*, couched in ancient Javanese, engraved on a copper-plate found in the island of Java and described by Dr. Brandes in a Dutch paper. That judgment is dated *śake* 849 (928 A. D.), relates to a dispute about a debt of one *suvarna* in which the plaintiff failed because he did not appear at the trial. At the end there are the signatures of four witnesses and the document is styled jayapatra at the end. Vide for the same jayapatra J. B. O. R. S. vol. VII pp. 117 ff The late Mr. K. P. Jayaswal published in 24 Calcutta Weekly Notes (pp. CXLIX-CLVI) a *jayapatra* (text, translation and remarks) granted by the Hindu court of Mithilā in *śake* 1716 (1794 A. D.) and in J. B. O. R. S. vol. VI pp 246-258, which strictly conforms to the rules of procedure laid down in the smṛtis and nibandhas and is couched in dignified, technical and scrupulously formal language. It related to the ownership of a slave girl. Plaintiff at first made default in appearance; the judgment notes this and also refers to the restoration of the suit. The defendant raised an objection that a single witness to prove a matter was inadmissible. This objection was upheld. Then plaintiff prayed that he might be allowed to undergo an ordeal, but this request was disallowed as human proof was possible and plaintiff ultimately lost his suit The judgment is written and signed by one Sacalamiśra, who was the chief justice, and is addressed to other members of the sabhā, called dharmādhyaksas and panditas, seven of whom express their concurrence (*sammati*) at the top of the document. Vide Journal of the Bihar and Orissa Research Society vol XXVIII for 1942 for nine Sanskrit jayapatras from the courts of Mithilā in the 18th and 19th centuries.

The Mit. (on Yāj II. 91), and V. Mātṛkā p. 309 note that a jayapatra is given specially to prevent the same matter being

600. पाताभियोगमप्रतिब्रुवतस्तदहरेव पश्चात्कारः । कौटिल्य III 19.

agitated again, while a document given where a party is hīnavādī (i. e. a *hīnapatraka*) serves the purpose of making that party liable later on to pay a fine When a dispute was decided by a domestic tribunal (kula &c) there was no jayapatra but only a *nirṇaya-patra* (*kulādibhir nirnaye jayapatrābhāvān-nirnaya-ptram tatra kāryam parattapatramiti yāvat*, as the Vy. Nirnaya p. 85 says). It would be better to adopt the reading '*vritapatram*' as given by one Ms

The defeated party has to pay a fine to the king and the successful party was complimented (or honoured) by the king (or chief justice) and was to be put in possession of the matter that he succeeded in proving[601]. Manu VIII. 51 prescribes that in monetary matters (i. e. in civil disputes) the defeated party should be made by the king to pay the judgment debt to the successful party and also some fine to the king according to his ability, while Manu VIII 139 lays down that when the defendant admits in the court his liability he has to pay to the king five per cent as fine and if the defendant denied his liability altogether and was proved to be false he had to pay as fine double of that (i. e ten per cent) This is analogous to court fee, for which see above pp. 294–295. If one or both parties had laid down a stake or wager (viz. 'if I be defeated in this suit I shall pay a hundred panas') then he had to pay that stake to the king and a fine as above and the subject of dispute to the successful party (Yāj. II. 18 and Nār. II. 5)[602]; compare Viṣnu Dh. S. V. 153–159 for similar rules. The punishments awarded in criminal matters will be discussed immediately below.

It would be necessary to see in what cases review of judgment was allowed. The general rule is stated by Manu IX. 233, 'whenever any legal proceeding has been completed (*tirita*) or has been carried out so far as to recover a fine from the defeated party, a wise king shall not annul it' (at his mere will or pleasure or through greed). The words 'tirita' and

601. सिद्धेनार्थेन संयोज्यो वादी सत्कारपूर्वकम् । लेखयं स्वहस्तसंयुक्तं तस्मै दद्यात्तु पार्थिवः ॥ कात्या q by स्मृतिच. II. p 57, अपरार्के p. 684, स. वि. p 220 The मदनरत्न (व्यव. ms) explains 'सिद्धेनार्थेन साधितधनेन। लेखयं जयपत्रम्। साधित धने तदभिवृद्धिसहितं दापनीयम् ।'

602 विवादे सोत्तरपणे द्वयोर्यस्तत्र हीयते । स एव हि पणं दाप्यो विनयं च पराजये ॥ नारद II. 5.

'anuśiṣṭa' have been variously explained[603]. The word 'tirita' is very ancient and occurs in the Delhi Pillar Edict IV of Aśoka (E I. Vol. II. p. 253) as 'tilita-dandānam' qualifying men imprisoned in jails. Medhātithi and Kullūka explain them as 'decided according to the rules of the śāstra' and 'taken so far as to recover fine from the unsuccessful party' respectively. Kāt. (495) defines them differently: "When a certain side is decided by the sabhyas themselves (without the examination of witnesses) to be either true or false, it is said to be tirita and that matter or side is called 'anuśista' which is declared (to be true or false) on the testimony of witnesses." The lexcion called Vaijayantī seems to have Kāt. in mind and defines 'tirita' as a perverse decision given by the sabhyas themselves and 'anuśista' occurs where the evidence of witnesses makes what is true appear as false (Bhūmikāṇḍa, vaiśyādhyāya, verses 11–12). Nār. II. 65 (S.B.E. vol 33 p 22) employs the two words, which the Mit on Yāj. II. 306 respectively explains as (tirita) 'decided by reliance on documents and witnesses but not carried so far as to recover a fine', and ('anuśiṣta') as 'decided so far as to recover a fine from the defeated party'. Vide Aparārka p. 866 and V. P p. 90 for explanations.

According to Kāt. quoted in the Vyavahārasāra (p 101)[604] the decree should provide for the successful party receiving the interest on or accretions to the movable or immovable property placed (during the pendency of the suit) in the hands of a third party (as a sort of Receiver). Kāt. (477–480) points[605] out the various ways in which a decree may be executed. The king should make a brāhmana debtor return the decretal debt

to the judgment creditor by conciliatory words, should make other debtors return it according to the usage of the country and compel bad people to satisfy the decree by means of physical pain (i. e. imprisonment) The king should make a co-sharer or friend (of the successful party) pay the decretal debt by means of a ruse (i. e by borrowing an ornament or the like from him on a festive occasion and handing it over to the creditor) and also make traders, husbandmen and artisans (to pay) in a similar way. On finding that the debtor is unable to return the debt in cash, the king should make the debtor, whether a ksatriya, vaiśya, śūdra or husbandman, work (for the creditor) If he be unable to work the debtor should be sent to jail except when he is a brāhmana Manu also (IX. 229) says that if the members of the three varnas other than brāhmana are unable to pay the fine imposed by the king they should be made to work for the king, but a brāhmana may be allowed to pay in easy and small instalments. If a brāhmana debtor was unable to pay, nothing could be done for recovery of the decretal debt except taking a surety from him if any one cared to be one In modern times also judgment debtors are liable to be arrested and detained in civil jail in execution of decrees under rules 55–58 of the Indian Civil Procedure code (except women in execution of a decree for the payment of money). If in ancient times state policy exempted brāhmanas from arrest and detention in a civil jail for monetary debts on spiritual grounds and on the ground of caste, in modern times the State in Indra exempts agriculturists from arrest or imprisonment in execution of a decree for money on economic grounds under certain legislative enactments like sec. 21 of the Deccan Agriculturists' Relief Act (Bombay Act XVII of 1879) As regards women also Kāt. (488–489) laid down certain prudent rules "Women who are not[606] independent should not be arrested (for offences like adultery); it is the male who should be regarded as the offender; women should be punished by their lord (i e the person on whom they depend) but the king should take away for punishment the male offender Even if a woman whose husband has gone abroad be consigned to jail she should be kept imprisoned only till he returns." The Sm. C. II. p 323 explains that the first verse applies to a woman who can perform the

606. नास्वतन्त्राः स्त्रियो ग्राह्याः पुमांस्तत्रापराध्यति । प्रभुणा शासनीयास्ता राजा तु पुरुषं नयेत् ॥ प्रोषितस्वामिका नारी स्थापिता यद्यपि ग्रहे । तावत्सा बन्धने स्थाप्या यावत्प्रत्यागतः प्रभुः ॥ कात्या. q. by स्मृतिच० II. p. 323.

expiation for adultery and who is dependent and the adultery is not with a male of a lower caste.

Nār (II. 40) lays down[607] a qualification that when a party has been defeated by his own conduct (i. e. by his demeanour or by his having adduced manifestly false witnesses or forged documents) there is to be no retrial or review of judgment, but where a man has lost his cause through (the dishonesty of) witnesses or the *sabhyas*, the cause may be tried anew. There are four exceptions to the finality of the judgments of the king's court. Where a litigant either through folly or insolence[608] thinks a decision to be wrong, he may be allowed a retrial, provided he agrees to pay double the fine inflicted on the losing party (Yāj II 306, Nār. I. 65, Kāt. 496). Secondly, where the former judgment is obtained by fraud or force, it may be set aside (Yāj. II. 31)[609]. Thirdly, where the litigant was incompetent, i.e. was a woman or a minor or a lunatic or intoxicated, seriously ill or distressed by a calamity or where the proceeding was carried on by another on behalf of a litigant who did not appoint him or with whom he was not connected in any way or was held inside a house or outside a town or village (i. e. in a forest) or by an enemy, the decision may be set aside and a retrial ordered (Nār. I. 43 in S. B. E. vol. 33 p. 16, Yāj. II. 31-32). Fourthly, a king could set right a former decision of his predecessor which was unjust and arrived at through ignorance (Mit. on Yāj. II. 306)[610].

Yāj. (II. 4 and 305) prescribes that legal proceedings that are suspected to have been wrongly decided by the *sabhyas* through partiality or greed or intimidation should again be tried by the king and if the suspicion turns out to be true he should levy from the *sabhyas* and the party who at first succeeded double the fine that is imposed on a defeated party. Nār. I. 66 (in S. B. E. vol. 33 p. 22) is similar. Manu IX. 231 (= Matsya 227. 158)

and 234 prescribe that when officers appointed to administer justice cause loss to litigants by taking bribes, the king should deprive them of all their wealth and when the *amātyas* (ministers) or chief justice disposes of a matter wrongly (but without being bribed), the king should himself decide the matter correctly and should impose on the *amātyas* or chief justice a fine of 1000 *panas*

Though there is hardly any express smṛti text for the transfer of cases from one court or judge to another court or judge, in practice this must have been done, though rarely In "Selections from Peshwa's Daftar" vol 43 p 108 there is a letter (of 12-8-1764 A. D) written by the renowned minister Nana Phadnis to the Peshwa Madhavrao in which the former endeavours to persuade the latter to cancel his order for transfer of a case from the court of Rāmśāstri, famed for his impartiality and strict life, to another judge on the ground that one of the litigants was afraid that Rāmsāstri showed some partiality to the other litigant. Manu (VIII 174-175) states that the king who decides the causes of people unjustly through greed is soon subjugated by his enemies, while the king who curbing his own temper and desires impartially decides causes according to the dictates of śāstra becomes of one mind with his subjects as rivers merge in the ocean. Br and Nār I 74 (S B.E vol. 33 p 24) lay emphasis on both the secular and spiritual effects of doing even justice, saying that when the king gives decisions according to śāstra he spreads his fame in this world and secures Heaven[611]

A crime may be defined as an act or omission that breaks the law and is subject to public punishment But all kinds of breaches of the law do not result in punishment; only some do. Those breaches are crimes which are deemed to be menaces to the conditions of existence of society, which society, the ruler or legislation recognises as preventible only through punishment The menace is not that of the specific action, but the abstract menace inherent in that type of action. A breach that is held to be a crime at one time may even be held not to be a crime at another time or in another country. For example, adultery is a crime under the Indian Penal Code (sec 497), while it is not a crime but a civil wrong in English Law.

611 एवं शास्त्रोदितं राजा कुर्वन्निर्णयपालनम्। वितरेद् यशो लोके महेन्द्रसदृशो भवेत्॥ साक्षिलेख्यानुमानेन प्रकुर्वन्कार्यनिर्णयम्। वितरेद् यशो राजा ब्रह्मप्राप्नोति विस्तरम्॥ बृह० q. by स्मृतिच० II p 123, परा. मा. III. p. 219.

Many crimes and wrongs were sins and entailed secular punishments and also religious sanctions (viz expiations, *prāyaścittas*). Vide Manu IX. 236, 240, Br. (S. B. E. vol 33, p. 362, verse 22) and Paiṭhīnasi quoted below[612]. Maine in his 'Ancient Law' chap. X (3rd ed of 1866) examines ancient western systems like those of Greece and Rome and makes the generalisation (p. 370) that the 'penal law of ancient communities is not the law of crimes; it is the law of wrongs or, to use the English technical word, of Torts The person injured proceeds against the wrong-doer by an ordinary civil action and recovers compensation in the shape of money damages if he succeeds'. Dr. Priya Nath Sen in his Tagore Law Lectures on 'Hindu Jurisprudence' (1918, Lecture XII) rightly points out that this generalisation is not applicable to Ancient Hindu Law. It has already been shown (on pp. 264–266) that the king could of his own motion take cognisance of many wrongs called *chalas, padas* and *aparādhas* and it is clear that in such crimes as theft, assault, adultery, rape, and manslaughter the smṛti texts do not prescribe only a money compensation to the person wronged, but corporal punishment in the first instance and monetary compensation in addition. Vide for example, Manu VIII. 287, Yāj. II. 222, Br. (SBE vol. 33 p. 358 verses 9–10), Kāt. (787) which prescribe a punishment for causing pain to the body or the loss of a limb and also the expenses of curing the person injured and some *solatium* to him[613] Āp. Dh S (I. 9. 24. 1 and 4) lays down that the slayer of a ksatriya should give a thousand cows in order to remove the enmity (i. e as compensation to relatives) and one bull in addition for expiation.[614] The Chāndogya Upanisad quoted above (p. 362) shows that a thief was punished with death in those early days. There is a passage in the Tai. S II.

6. 10. 1 (quoted in H. of Dh. vol. II. p. 151 n. 346) which states, 'He who threatens a brāhmana should be made to pay a hundred, he who strikes a brāhmana should be made to pay a thousand'. It is rather doubtful whether the figures stated are fines or are meant as *solatium* to the wronged In Rg. II. 32. 4 (which also occurs in Tai S III 3 11. 5) the poet prays to Rākā[615] (the Full Moon personified) that she may be pleased to grant the boon of a valiant son, who would be 'śatadāya'. Sāyana's rendering of this word as 'possessed of plentiful heritage or wealth' appears to be the right one. The words 'śatadāyam vīram' in the Tai S. III. 3. 11. 5 are translated by Prof Keith as 'a hero whose *wergild* is a hundred'. This is incorrect, confounding as it does the ideas of western Germanic tribes with the Rgveda composed several millenniums earlier It would be a strange thing to pray to a goddess for a son and at the same time to have in mind or refer to the price set upon him if he happened to be killed.

The ancient smṛti writers were quite aware of the several purposes served by punishments for crimes,[616] though they do not develop a regular science of penology. The person wronged feels a great urge for revenge or retaliation and other men sympathise with that emotion The individual, however, could not, in civilized societies, take the law into his own hands and therefore the State saw to it that the emotion for retaliation or revenge was to some degree satisfied by the adequate punishment of the wrongdoer. Yāj. II. 16 and Nār. I. 46 (SBE vol. 33 p. 17) state that when a person without complaining to the king sets about to secure what is denied by the opposite side or is doubtful he becomes liable to punishment and he also cannot secure the object he wants.[616a] In all ancient societies the *lex talionis* (the law of retaliation, viz. an eye for an eye,

615. राकामहं सुभगां सुहवां हुवे ... वदातु वीरं शतदायमुक्थ्यम् ॥ ऋ II 32.4.

616. The work of Harry Elmer Barnes on 'The Study of punishment (1930, New York) may be read with great interest and profit. It will set off to great advantage the comparatively humane treatment of criminals in Ancient India as compared with the horrible and revolting methods for punishing criminals employed in the West

616 a. अनावेद्य तु यो राज्ञे सन्दिग्धेऽर्थे प्रवर्तते । प्रसह्य स विनेयः स्यात्स चास्यार्थो न सिध्यति ॥ नारद I. 46.

a tooth for a tooth) prevailed.[617] Manu VIII. 280 (which is almost the same as Nār., pārusya, verse 25), Yāj II. 215, Visnu Dh. S. V. 19 and Śankha-Likhita prescribe that with whatever limb[618] a man of low caste offends against a brāhmana, that very limb of his shall be cut off. Another and the most important purpose of punishment is deterrent. Punishment of the evil-doer serves as an example and a warning to all others that might be tempted to tread the paths of violence and crime. This aspect of punishment (danda) has already been dwelt upon in the section on *rājadharma* (p. 21). The end sought to be served by punishment was the protection of society and the securing of its happiness. The Śāntiparva (15 5–6) remarks that people do not commit sins through fear of punishment at the hands of the king, through fear of Yama and of the next world and through fear of others (i. e public opinion).[619] Gaut XI. 28 derives the word *danda* from the root *dam* to restrain or to deter. This purpose of punishment is well brought out in the Mṛcchakatika (X) when the sentence passed on Cārudatta for the alleged murder of Vasantasenā is proclaimed to the citizens by the executioners[620] Another purpose of punishment is preventive i. e. if a culprit is imprisoned for an offence he is prevented or disabled from repeating the same offence or

617. Vide Deut XIX. 21, Lev, XXIV. 20 for the ancient Hebrew Code (eye for eye &c.), the code of Hammurabi (about 2200 B. C.) in Babylon and the law of the Twelve Tables in Romé. In the 8th Table in Ortolan's 'History of Roman Law' (tr. by Pritchard and Nasmyth, 1871) p. 114 the 2od provisioo is: 'retaliation against him who breaks the limb of another and does not offer compensation'. In Hammurabi's Code (text tr. by C. H. W. Johns, 1903) sections 196 and 200 are: 'If a man has caused the loss of a geotleman's eye, his eye one shall cause to be lost. If a man has made the tooth of a man that is his equal to fall, one shall make his tooth to fall out'.

618. येन येनाङ्गेनापराधं कुर्यात्तत्तदस्य च्छेत्तव्यमन्यत्र ब्राह्मणात्। शङ्खलिखित q. in स्म. च. p. 249; येनाङ्गेनावरवर्णो ब्राह्मणस्यापराध्नुयात्। तदङ्गं तस्य च्छेत्तव्यमेवं हुद्धिमवामुयात् ॥ नारद (पारुष्य 25); हीनवर्णोऽधिकवर्णस्य येनाङ्गेनापराधं कुर्यात्तेद्वास्य शातयेत्। विष्णुधर्मसूत्र V. 19.

619. राजदण्डभयादेके पापं पापं न कुर्वते। यमदण्डभयादेके परलोकभयादपि। परस्परभयादेके पापाः पापं न कुर्वते। ... दण्डस्यैव भयादेते मनुष्या वर्त्मनि स्थिताः ॥ शान्ति 15. 5–6, Vide मत्स्य for almost the same words (225. 16–17).

620. शृणुत आर्याः शृणुत। एष ... आर्यचारुदत्तो नाम। एतेन... वसन्तसेना मारिता ... तदा राज्ञा पालकेन वयमाज्ञप्ता एतं मारयितुम्। यद्यपर ईदृशमुभयलोकविरुद्धमकार्यं करोति तमपि राजा पालक एवमेव शास्ति। मृच्छकटिक X after verse 11.

committing further offences for some time at least and if he be sentenced to death or transported for life or banished, the commission of offences by him is prevented for his life-time Another purpose was that of reform or redemption of the evil-doer The punishment was deemed to be a sort of expiation, which purged the man of sinful promptings and reformed his character. Manu VIII 318 (= Vas. 19 45) states that men who are guilty of crimes and have been punished by the king go to heaven, becoming pure like those who perform meritorious deeds Medhātithi remarks on this verse that this applies only where the punishment is corporal and not merely monetary It will be seen from the early sūtras like that of Gautama and from the Manusmrti that the more ancient criminal law in India was very severe and drastic, but that from the times of Yājñavalkya, Nār. and Br. the rigour of punishments was lessened and softened and fines came to be the ordinary punishments for many crimes, as is noted by Fa Hien (399–400 A D) in relation to middle India (*Madhyadeśa*) under the Guptas apparently 'The king governs without decapitation or other corporal punishments Criminals are simply fined, lightly or heavily according to the circumstances Even in circumstances of repeated attempts at wicked rebellion they only have their right hands cut off' (Legge, 1886 p 43). This may be contrasted with the state of things depicted by Megasthenes 700 years earlier than Fa Hien: (Fragment XXVII p. 71) 'a person bearing false witness suffers mutilation of his extremities. He who maims anyone not only suffers loss of the same limb but his hand also is cut off If he causes an artisan to lose his hand and eye he is put to death'. The Daśakumāracarita (II p 56) states that the Mauryas conferred a boon on traders that for certain offences they were not to be sentenced to death, but were to be deprived of all their wealth and banished The first separate Rock Edict of Aśoka at Dhauli (Corpus I I pp. 93, 97) shows that great Emperor's anxiety that his judicial officers should strive to see that there is no undeserved fettering or no undeserved harsh treatment In India the list of capital offences at any time was much shorter than in the West. Stephens is constrained to admit that in England 'there can be no doubt that the legislation of the 18th century in criminal matters was severe to the highest degree and destitute of any sort of principle or system' (His. of Cr. Law, vol I. p 471) As stated by Dr. Hart (in 'Way to justice' p 94), at the beginning of the 19th century in England more than a hundred offences were

punishable by death. In 1832 a child was convicted at Ludgate Hill for stealing a box of paints worth two pence, was tried at the Old Bailey and hanged (vide 'In the service of youth', by Dr. J M. Brew, 1943 chap XV. p 208).

Manu VIII. 129, Yāj I 367 and Br. (S B E. 33 p. 387 verse 5), Vrddha-Hārīta (7 195) speak of four methods of punishment (*danda*) viz. by gentle admonition by severe reproof, by fine and by corporal punishment and declare that these punishments may be inflicted separately or together according to the nature of the offence.[621] The first takes the form of saying 'you have not done a proper thing', the 2nd 'fie upon you who are a wrongdoer and guilty of *adharma*' Br. lays down that preceptors, *purohitas* and sons should be sentenced to the punishment of wordy admonition, other persons who engage in disputes should be punished with reproof or fines and those guilty of mahāpātakas should be punished with corporal punishment That admonition and reproof were two modes of punishment shows that ancient writers were alive to the notion that among very sensitive persons or in a very sensitive society verbal condemnation would be enough to achieve the main purposes of punishment Br. (SBE vol. 33 p. 388 verse 8) states that the first two are within the privilege of the brāhmana (appointed as chief justice) but fines and corporal punishment are to be inflicted by the king (on the recommendation of the chief justice, *prāḍvivākamate sthitah*). The Mrcchakatika (IX) bears this out when the judge says 'We have authority only to pronounce the judgment; as to the rest the king is the final authority' (*nirnaye vayam pramānam śese tu rājā*) Gaut. XII. 51, Vas. 19 9, Manu VII. 16, VIII. 126 and Yāj I. 368 (=Vrddha-Hārīta VII. 195-196), Brhat Parāśara p. 284, Kaut IV. 10 lay down that the award of punishment must be regulated by a consideration of the motive and nature of the offence, the time and place, the strength, age, conduct (or duties), learning and monetary position of the offender and by the

621 The Daṇḍaviveka of Vardhamāna (published in Gaikwad Oriental series, 1931) deals exhaustively with the subject of punishments. न त्वयेदं सम्यक् कृतमिति निन्दा, धिक् त्वां पापीयांसमधर्मकारिणमिति निर्भर्त्सनम् । दण्डविवेक p. 20; these are respectively वाग्दण्ड and धिग्दण्ड. गुरून्पुरोहितान्पुत्रान्वाग्दण्डेनैव दण्डयेत् । विवादिनो नरांश्चान्यान्हिरण्यधनाभ्यां च दण्डयेत् ॥ महापातकयुक्ताश्च वधदण्डेन दण्डयेत्। बृह. q. by स्मृतिच. II. p 126 and व्यव. नि. p. 528.

fact whether the offence [622] is repeated. This provision means that the dharmaśāstras did not hold that the same punishment must be meted out for the same offence irrespective of the antecedents, characteristics or physical and mental condition of the offender. They always took extenuating circumstances into account. Kaut (I. 4), differing from the view of the ācāryas that there is nothing like danda for bringing under one's complete control all beings, gives his own opinion that, as a king whose control and punishments are most severe makes the subjects disgusted with him and as the king who deals mild punishments is disregarded by the people, the king should distribute punishments according to the deserts of the offenders and would then command respect [623] One reason why some of the works on dharmaśāstra prescribe mild punishments is the doctrine of *karmavipāka* (a man committing certain sins is born in the next life afflicted with certain diseases or bodily deficiencies or is born as a low or filthy beast or bird) Vide Manu XI 49-52, Yāj III 207-216, Visnu Dh. S 44-45. This doctrine will be dealt with later on under *pātaka* and *prāyaścitta*. Gaut. XII. 48 first provides that the king must take into account, when awarding punishment to the criminal, his physical or monetary circumstances, the nature of the crime, the fact of repetition of the crime and then adds that the king should award punishment after consulting an assembly of learned brāhmanas The Dandaviveka (p. 36) quotes a verse in which the considerations that should weigh in awarding punishment are brought together viz. the offender's caste (as in Manu VIII. 337-338 for theft), the value of the thing, the extent or measure (as in Manu VIII 320), use or usefulness of the thing with regard to which an offence is committed (as in Manu VIII 285), the person against whom an offence is committed (such as an idol or temple or king or brāhmana), age, ability (to pay),

622 पुरुषं चापराधं च कारणं शुरुलाघवम्। अनुबन्धं तदात्वं च देशकालौ समीक्ष्य च। उत्तमापरमध्यत्वं प्रदेष्टा दण्डकर्मणि। राज्ञश्च प्रकृतीनां च कल्पयदण्डतान्वित॥ कौ. IV. 10; दण्डस्तु देशकालधर्मवयोविद्यास्थानविशेषैर्हिंसाक्रोशयोः कल्प्यः। वसिष्ठ 19. 9; पुरुषशक्त्यपराधानुबन्धविज्ञानाद्दण्डनियोगः। अनुज्ञानं वा वेदविस्मवायवचनात्। गौ. XII 48-49, अनुबन्धं परिज्ञाय देशकालौ च तत्त्वतः। सारापराधौ चालोक्य दण्डं दण्डेषु पातयेत्॥ मनु 8 126, on which मेधातिथि makes the striking remark that this is the fundamental verse about all offences 'उक्तानुक्तदण्डेष्वपराधेषु मातृकाश्लोकोयम्। एतदर्थानुसारेण सर्वदण्डकल्पनैः कर्तव्या॥'

623. न ह्येवंविधं वशीपनयनमस्ति भूतानां यथा दण्ड इत्याचार्याः। नेति कौटिल्यः। तीक्ष्णदण्डो हि भूतानामुद्वेजनीयः। मृदुदण्डः परिभूयते। यथार्थदण्डः पूज्यः। सुविज्ञातप्रणीतो हि दण्डः प्रजा धर्मार्थकामैर्योजयति। अर्थशास्त्र I. 4. Vide Manu VII 103 (=Śānti 140. 8) which appears to be of the same opinion as the ācāryas.

qualities, time, place, the nature of the offence (whether it is repeated or is a first offence). The Rājatarangiṇī (VIII. 158) provides that in disputes where parties are in doubt as to their rights it is proper to award punishment with forbearance but where a man starts on an evil path of set purpose (the king and officers) must award severe punishment. In modern times there are controversies among several schools of criminology. Some hold that every man has freedom to act criminally or not or to act in the way he does and that each man has complete moral responsibility for his own acts. On the other hand there are some who go to the other extreme and propound that a so-called criminal act is mostly due to biological, physiological, pathological or sociological conditions, to the upbringing and environment of the person charged with crime. They favour determinism The ancient Indian writers do not enter into these speculations. But when they said that regard must be paid to time and place and other considerations they were faintly conscious of or were groping towards the ideas of the 2nd school.

Fines are either fixed or not fixed (i. e. variable). They range from a *kākiṇī* to the confiscation of all wealth; fixed fines were of three kinds called *prathama sāhasa*, *madhyama sāhasa* (middling amercement) and *uttama sāhasa* (highest). These are variously defined. According to Śankha-Likhita the first[624] amercement is fine from 24 panas to 91, the middling one is from 200 to 500 panas and the highest is from six hundred to 1000

624. चतुर्विंशतिरेकनवतिः प्रथमसाहसः । द्विशतं पञ्चाशतं चैव मध्यमसाहसः । षट्शतं सहस्रं चोत्तमः । यथासारापकारम् । शङ्खलिखित q. by वि. र p 664, दण्डविवेक p. 23.

There was great divergence of views about the metal in which the fines were to be paid. According to Vijñāneśvara the figures of fines in such verses as Manu VIII. 378 (where no metal is specified) the *panas* are those of copper, while according to Bhārnchi (quoted in S. V. p 150) they are of gold. The S V. remarks that local usage is to be followed. The V. Mayūkha (p. 255) states that in all texts (about fines) the mention of a number without specifying the object to which it refers is to be deemed to refer to panas, that pana is a copper piece one *karsa* in weight and that karsa is one fourth of a pala. Br. (q. by Sm C. II p. 99) states that the tables in Manu (VIII 132–136) beginning with the dust particle in a beam and ending with kārsāpana is to be followed in ordeals and fines. An interesting sidelight is shed on crimes and their punishments in the Inscription of Cālnkya Vikramāditya V (dated *śake* 934) from Gadag which provides that the fines for abuse, assault, for drawing out a dagger, for stabbing and for adultery by a bachelor were respectively 2 panas, 12 panas, 3 gadyāṇas, 12 gadyānas and 3 gadyāṇas (vide E. I. vol. 20 p. 64.)

in proportion to the value of the matter in dispute or the injury caused Manu VIII. 138 (=Visnu Dh S. IV. 10) states that the first, middling and highest fines are respectively 250, 500 and 1000 panas, while Yāj I. 366 puts these respectively at 270, 540 and 1080. The Mit explains that the lesser figures of Manu represent the fines to be awarded for offences committed without set purpose. Nār. (sāhasa, verses 7-8) prescribes that 100 panas is the lowest limit of fines for the lowest kind of *sāhasa*, 500 is the lowest for middling sāhasa, 1000 is the lowest fine in what is called the highest amercement (and might include death penalty, forfeiture of all property, banishment, branding and cutting off of a limb). Fines were supposed to be lesser than corporal punishment. Kāt (490-493) lays[625] down the following rules: Whatever figure of fine is prescribed in the smrti texts for a wrong it is to be paid to the king in panas of copper or their equivalent. Where the fine is said to be one-fourth or one half of a māsa, there it is a golden māsa that is meant; when the fine is declared in māsas, they are to be understood as those of silver and where the fine is declared in krsnalas the same is to be understood; a māsa is $\frac{1}{16}$th of a kārsāpana ' The general rule that lesser punishment is to be inflicted on women is stated by Kāt. (487) ' In the case of all offences, women are to suffer half of the fine in money which is prescribed for a male offender (of the same kind) and when the punishment is death for a male, the punishment for a woman would be the excision of a limb.'[626] Kaut (III. 3) provides. ' a woman attains ability to enter into transactions on completion of 12 years and men when they are 16; if they disobey after that (i e after attaining majority) the woman shall be fined twelve panas and a man twice that amount.'[627] Angiras quoted by the Mit (on Yāj.

627 द्वादशवर्षा स्त्री प्राप्तव्यवहारा भवति षोडशवर्षः पुमान् । आ उत्तमसाहसाद्दा- दशपण. स्त्रिया दण्ड· पुंसो द्विगुणः ॥ कौ III. 3.

III. 243) states that[628] an old man over eighty, a boy below ixteen, women and persons suffering from diseases are to be given half prāyaścitta and Śankha quoted by the Mit. (on the same verse) that a child less than five commits no crime nor sin by any act and is not to suffer any punishment nor to undergo a prāyaścitta[629]. Under the Indian Penal Code, sec. 82, nothing is an offence which is done by a child under seven years of age The severity of punishment depended on caste also. In the case of theft, Gaut. XII. 15–16, Manu VIII 338–39 prescribe that a vaiśya, a ksatriya and a brāhmana should respectively be fined twice, four times and eight times of the fine to be imposed upon a sūdra for a theft, since each of these is deemed more and more aware of the heinousness of the crime. Kāt (485) and Vyāsa state this as a general rule for all offences[630]. In the case of abuse and defamation the scales are turned in favour of the higher castes as regards fines. Gaut. XII 1, 8–12, Manu VIII. 267–268 (=Nār. pārusya 15–16), Yāj II. 206–207 prescribe that a ksatriya or a vaisya or a śūdra abusing or defaming a brāhmana was to be respectively punished with the fine of 100 panas, 150 panas and with corporal punishment (cutting off the tongue), while a brāhmana defaming a ksatriya, vaiśya or śūdra was to be fined 50, 25 or 12 panas respectively (nothing in the last case acc to Gaut. XII. 13). In the case of adultery and rape the caste of the offender and of the woman concerned made great difference in the punishment awarded For adultery with a woman of the same caste Yāj II. 286 prescribed the highest amercement, the middling one when the paramour was of a higher caste, but if the male be of a lower caste than the woman, the male offender was sentenced to death and the woman had her ears cut off. Corporal punishment assumes (as pointed out by the Dandaviveka p. 20) various forms according as it is meant to cause only harassment (pain) or is

630. येन दोषेण शूद्रस्य दण्डो भवति धर्मतः। तेन चेत्क्षत्रविशाणां द्विगुणो द्विगुणो भवेत् ॥ कात्या. 485 q by स्मृतिच II 127, परा मा III 211 (ascribes to पितामह), प्रायश्चित्त च दण्डं च शौच चातो यथाक्रमम्। कल्प्यमुत्कृष्टमुत्कृष्टे मध्यं मध्येऽधमेऽधमम् ॥ व्यास q. by विश्वरूप on या. I. 17.

carried out by cutting off (or destroying) a limb or to cause death. Harassment or pain may be inflicted by imprisonment, beating, putting fetters, by making ridiculous (by the complete shaving of the head, declaring the offence by beat of drum in the presence of the convict, parading him through the streets on an ass) and marking him with signs indicative of offences like theft. Manu (VIII. 125) provides that punishment may fall upon any one (or more) of ten places in the case of the three higher castes, viz. the private parts, the belly, the tongue (either whole or half), the hands, the feet, the eyes, the nose, the ears, wealth and the whole body; but a brāhmana shall depart unhurt from the country (i. e. he is to be only banished). Br. (SBE 33 p. 388 verses 9–10) speaks of fourteen places of punishment adding the neck, the thumb and index, the forehead, the lips, the hind part, hips, one half of the feet (to Manu's ten) and omitting wealth and the whole body therefrom. Gaut. XII. 43, Kaut. IV. 8, Manu (VIII. 125, 380–381), Yāj. II. 270, Nār. (sāhasa, 9–10), Visnu V. 1–8, Br. (SBE. vol 33 p. 388 verse 11), Vrddha–Hārita VII. 191 prescribe that a brāhmana was not to be sentenced to death or corporal punishment for any offence whatever, but if he were guilty of an offence deserving the death penalty, he was to be punished by ordering his entire head to be shaved, he might be banished from the country (from the city acc. to Nār.), a mark appropriate to the grave sin committed by him might be branded on his forehead and he might be paraded on an ass.[631] Yama,[632] quoted by Sm. C. and V. P., while providing that a brāhmana was to be free from undergoing corporal punishment, allows

631. वधार्हते ब्राह्मणस्य न वधं ब्राह्मणोर्हति । शिरसो मुण्डनं दण्डस्तस्य निर्वासनं पुरात् । ललाटे चाभिशस्ताङ्कः प्रयाणं गर्दभेन च ॥ नारद (साहस 9–10). In these days of fasts as part of the technique of *satyāgraha* for redress of grievances or for justice pursued by Mahātmā Gāndhi and some of his ardent followers it is interesting to note that the widow of the murdered brāhmana referred to on p 397 had been undergoing voluntary starvation (prāyopavesa) for four days for securing punishment of her husband's murderer (who she believed was a wizard) and that the king himself being unable to prove the guilt of the accused began to starve himself and found proof by supernatural means (Rājatarangini IV 82–105).

632. न शारीरो ब्राह्मणस्य दण्डो भवति कर्हिचित् । मुखे तु बन्धने कृत्वा राजा भक्तं प्रदापयेत् । अथवाप्यधनं रक्षाकर्म वा कारयेन्नृप· । मासार्धमास कुर्वीत कार्यं विज्ञाय तत्त्वतः । यथापराध विधं तु विकर्माण्यपि कारयेत् । अवध्या ब्राह्मणा गावो लोकेस्मिन्वैदिकी श्रुति ॥ यम quoted by स्मृतिच. II. p. 317, व्य. म. p. 393 (only the first).

the king to keep a brāhmana offender in confinement in a secret place and give him bare maintenance or the king may make him do the work of guarding cattle for a month or a fortnight or make him perform other work not fit for a decent brāhmana. The Mit. on Yāj. II. 270 explains that the mark of female private parts for violating *guru's* bed, of a tavern for drinking the liquor called *surā*, a dog's foot for theft, of a headless corpse for brāhmaṇa murder (as laid down by Manu IX. 237 and 240, Visnu Dh S. V. 4) is to be made on the forehead only if the offender (whether a brāhmana or not) did not perform *prāyaścitta* for those grave sins. Branding with marks appropriate to the crime committed were in vogue in Rome and in Britain up to 1699 (such as the mark of the letter M for murderers, T for thieves &c.). Vide Barnes' 'Story of punishment' p. 62. The Rājatarangiṇī (IV. 96–106) refers to a case in the reign of king Candrāpīda of Kashmir when a brāhmana guilty of the murder of a brāhmana was exempted from death sentence because of the smrti rule. Manu IX. 241 gives option that a brāhmana (unintentionally) guilty of grave offences may be punished with the middle amercement or he may be banished from the realm keeping all his wealth. The punishments for a brāhmana offender, according to Gaut. XII. 44, were preventing him from doing the same thing again, depriving him of all wealth, taking sureties from him, proclaiming him as a thief in the city banishment, putting on his forehead the mark indicative of his crime. Āp. Dh.S. (II. 10 27. 16–17)[633] lays down that a brāhmana guilty of murder, theft, forcible seizure of another's land was to have his eyes covered over with cloth for the whole of his life (while a śūdra guilty of any of the three was to receive the death sentence). Vṛddha-Hārīta (VII.209–210) says that a brāhmana should be branded on the body for all those offences that entailed corporal punishment for other offenders, that he should have his head shaved, that he should be deprived of all his property and banished from the realm. The force of popular feeling on the point of exempting a brāhmana offender from the death sentence was so great that Elphinstone (Governor of Bombay) in Regulation 14 of 1827, sec. IV (cl. 5) exempted brāhmaṇas and women from death sentence even for murder where public feeling would

633. पुरुषवधे स्तेये भूम्यादाने इति स्त्र्यादाय वध्यः चक्षुर्निरोधस्त्वेतेषु ब्राह्मणस्य। आप ध सू II. 10. 27. 16–17.

be shocked[634]. It is not to be supposed that this exemption of the brāhmana from the death sentence was unanimous or universal Kāt. (806) contains this remarkable statement.[635] 'Even a brāhmana deserves to be killed if he be guilty of

---

634. यत्तु शङ्खेनोक्त 'अदण्ड्यौ मातापितरौ स्नातकपुरोहितौ परिव्राजकवानप्रस्थौ जन्मकर्मश्रुतशीलाचारवन्तश्च' इति, यद्यपि कात्यायनेन 'आचार्यस्य पितुर्मातुर्बान्धवानां तथैव च। एतेषामपराधेषु दण्डो नैव विधीयते' इतितच्छारीरार्थदण्डयोर्निषेधार्थं न पुनर्दण्डमात्रस्य। स्मृतिच II p 126 Medhātithi on Manu VIII 125 makes it clear that the absence of a fine occurs only in the case of a brāhmana who was a first offender, who did not commit the offence with forethought and who was endowed with learning, good family and character The Sm C II p 124 relying on Manu IX 236 says that a brāhmana could be imprisoned but he could not be subjected to such corporal punishment as cutting off a limb or whipping The Smrtis openly regarded the brāhmana's person as sacred and so saved his body The smrtis endeavoured to reach the ideal of the rule of law and succeeded to a great extent in doing so They held that every man, whatever his rank or condition, was subject to the ordinary law of the realm and amenable to the jurisdiction of the ordinary tribunals The only differential treatment that we find is in the appointment of judges (pp. 272-273), in the order of taking up causes of litigants (p 298), in the punishment for perjury (Manu VIII 123–124), in the matter of corporal punishment, in abuse, defamation and assault (pp 395–397), in punishment for adultery, in the repayment of debts and in the punishment for theft, which was severer for a brāhmana It will be shown below that from the 13th century, as indicated by the Sm C, S. V. and Madanaratna, differential punishments had gone out of vogue The smrtis did not, like some modern freedom-loving people, declare the equality of all before the law on paper and in practice indulge in lynching. Further the smrtis required all offenders of whatever caste to be brought before the same tribunals Manu VIII. 335 and Yāj. I 358 emphasize that there is none who is exempt from punishment in the king's court whether the person be the king's father or teacher or friend or mother or wife or a son or a family priest or brother or father-in law or maternal uncle Śankha-Likhita and Kāt (481) on doubt say that a king should not punish his parents, his family priest, teacher, near relatives, forest hermits, ascetics But, as the Sm C. II. p. 126 explains, the real meaning is not that the king is to allow these to escape scot-free, but that he should not inflict corporal punishments or fines on these, but should employ admonition or severe reprof towards them The smrtis do not contain rules like those in the Indian Criminal Pro. Code entitling Europeans and Americans in India to claim a jury preponderantly composed of their countrymen and claiming trial only by the High Court or like the privileges of the English Peers to be tried only by the House of Lords for felonies or the doctrine of the benefit of clergy abolished in 1827. Vide H. of Dh vol II. pp. 140–143 and 147–152 about certain privileges of brāhmanas

635 गर्भस्थ पातने स्तेनो ब्राह्मण्यां शस्त्रपातने। अदुष्टा योषित हत्वा एतावपो ब्राह्मणो पि हि॥ कात्या q. by विश्वरूप on या. II. 281.

causing abortion, if he be a thief (of gold) or if he kills a brāhmana woman with a sharp weapon or if he kills a chaste woman'. Kautilya (IV. 11) prescribes that a brāhmana who aims at the kingdom or who forces entrance into the king's harem or who incites wild tribes or enemies (against his king) or who foments disaffection (or rebellion) in forts, the country or the army should be sentenced to death by drowning.[636] The fact that Cārudatta, a brāhmana, is represented as having been condemned to death by king Pālaka in the Mrcchakatika indicates that the sentence of death against brāhmanas was not entirely unheard of. It appears from Fick's 'Social organisation' &c p. 212 that in many Jātaka passages the execution of brāhmanas is referred to.

The Śāntiparva chap. 268 contains an interesting dialogue between king Dyumatsena and his son prince Satyavat on the subject of the punishment of death, which contains some of the arguments forcibly urged in these days by those that are opposed to capital punishment altogether. The prince pleads that punishment should be light even for grave offences, that when the sentence of death is carried out in the case of robbers,[636a] several innocent persons (such as the wife, the mother, the son of the condemned man) suffer great loss (and they may die also), that if offenders give themselves up to priests, swear before them that they will never commit sin, they may be let off after undergoing penance, that if great men go astray their punishment should be proportionate to their greatness The king replies that in former ages when people were most truthful, soft-hearted, and not hot-tempered the punishment of saying 'fie on you' sufficed, then vocal remonstrances and upbraidings sufficed, but in the later ages (of Kali) corporal punishment and death sentence have to be resorted to and that some people are not deterred even by the fear of death sentence.

A few remarks will be made on each of the several modes of punishment The sentence of death was, acc. to Kām XIV. 16, Śukra IV. 1 93, to be avoided even in the gravest offences

---

636 राज्यकामुकमन्तःपुरप्रधर्षकमदण्ड्यमित्रोत्साहकं दुर्गराष्ट्रदण्डकोपकं वा शिरोहस्तमादापिकं घातयेत्। ब्राह्मणं तमपः प्रवेशयेत्। अर्थशास्त्र IV. 11

636a दस्यूंश्चिदन्ति वै राजा भूयसोऽधाप्यनागसः। भार्या माता पिता पुत्रो हन्यते दण्डपेण वै॥ न मूलघातः कर्तव्यः &c. शान्ति 268 10-11.

except for the offence of subverting the state.[637] Viṣṇu Dh. S V. 1 provides that all persons except brāhmaṇas guilty of the mahāpātakas may be sentenced to death. But Manu IX. 236 says that this extreme penalty was to be awarded only if they performed no prāyaścitta. Kaut (IV. 11) prescribes death sentence for causing the death of any one with a sharp weapon. Vṛddha-Hārīta (VII. 190) prescribes it for incendiaries, poisoners, murderers, robbers, bad characters, rogues and those guilty of grave sins. The death sentence was carried out in various ways such as by giving poison or by trampling at the feet of an elephant, or by a sharp weapon (like a sword), by being burnt or drowned[638]. Impalement was a punishment prescribed by Manu IX. 276 for thieves guilty of housebreaking by night (after first cutting off their hands), by Yāj II. 273 for those who made another a captive or stole horses and elephants or killed another by the use of force and by Vṛddha-Hārīta VII. 202 for the murderer of a brāhmaṇa or for one who killed a woman, a child or a cow. Death sentence by being trampled under the feet of an elephant continued up to the times of the Marathas. The Daśakumāracarita 4th Ucchvāsa shows that a thief could be trampled upon by an elephant by way of punishment. Vide 'Selections from Peshwa's Daftar' (edited by Mr. G. S Sardesai) vol. 43 No. 143 p 114 (dated 7-9-1775 A. D.), where out of seven dacoits of the *Berad* caste two were ordered to be trampled to death at the feet of an elephant[639] and five were ordered to be simply beheaded Death sentence is said by the Daṇḍaviveka (p. 20) to be simple *śuddha*), which is of two kinds, *avicitra* when the offender is beheaded (with a sword), and *citra* or *vicitra* (when the offender is impaled or burnt) and it is *miśra* (when his hands or feet or other limbs are cut off and then he is killed)[640]. Simple death

637. महत्स्वप्यपराधेषु दण्डं प्राणान्तिकं त्यजेत् । ऋते राज्यापहारात्तु युक्तदण्डः प्रशस्यते ॥ काम XIV. 16 This is q. by सुध p 61 verse 346

638 विषेषु (?) वृन्तिमुजगशस्त्रानलजलादिभिः । पापानां प्राणहरणं वधदण्डः प्रकीर्तितः ॥ मानसोल्लास II 20, verse 1287, p 144

639. In 'Pandyan Kingdom' by Prof. K A Nilkant Sastri p. 224 the sentence for the murderer of a brāhmaṇa is shown to have been that of being tied to the leg of a he-buffalo and being dragged by it

640. The word 'śuddha-vadha' is used by Manu IX 279 and the words 'śuddha' and 'citra' occur in Kauṭilya IV. 11 and also in Śānti 85 22 राज्ञो वध विकीर्षेद्यस्तस्य चित्रो वधो भवेत् । आदीपकस्य स्नेनस्य वर्तनद्वारिकस्य च ॥

is prescribed by Manu IX. 271 for those who abet thieves by giving them subsistence, instruments of house-breaking or asylum. If a man of a low caste had sexual intercourse with a woman of a higher caste (with or without her consent) or kidnapped a maiden he was to be sentenced to death (Manu VIII. 366, Yāj. II. 286–288, 294) Vas. XXI. 1–5 prescribed for a śūdra, vaiśya or ksatriya guilty of adultery with a brāhmana woman the horrible punishment of being burnt to death after being respectively covered with *vīraṇa* grass, with red *darbhas* and *śara* leaves respectively and similar punishment for a śūdra paramour of a ksatriya or vaisya woman and for a vaiśya paramour of a ksatriya woman. The consenting woman (adulteress) was, acc. to Vas. XXI 1–3, to be shaved, to have her head anointed with clarified butter and to be paraded naked on an ass and left to die on the Great Journey, while, acc. to Gaut. XXIII. 14 and Manu VIII. 371, an adulteress, vain of her charms or the wealth of her parents, was to be openly devoured by dogs, if her paramour was a man of lower caste. Śaṅkha[641] prescribes this punishment (of being devoured by dogs) for a woman's paramour of a lower caste and for the erring woman death by burning. Vrddha-Hārita VII. 192 prescribes that in the case of a woman who is a confirmed adulteress, or who destroys her foetus, her husband should have her ears, nose and lips cut off and then she should be banished and verses 220–221 prescribe death by being burnt with grass (katāgni) for those guilty of incest. These severe penalties for adultery were very much relaxed and softened by later smrti writers as is shown in H. of Dh. vol II. pp. 571–573. A man who made a breach in the embankment of a lake or tank (and thereby caused it to become dry) may be sentenced to death by drowning (Manu IX. 279) or a woman who was extremely wicked (such as one who killed her own child in the womb) or who murdered a man or who destroyed the embankments of a tank may have a stone tied round her neck and be drowned, provided she be not pregnant at the time of the sentence (Yāj. II. 278). Yāj. II. 279 (=Matsyapurāna 227. 200) prescribes death by being gored by the horns of bulls (after the nose, lips, ears and hands are cut off) for a woman who is guilty of poisoning (the food or drink of another) or who is guilty of incendiarism or who kills her husband, elders

641. श्रेयसः शयनशायिनं राजा बद्ध्वा स्वभिः खादयेत्काष्ठैश्चैनां दहेत् । शङ्ख quoted by वि. र. p. 396.

or her own child (provided she is not pregnant)[642]. Yāj II 282 provides death by being burnt with the fire of straw for those who set fire to growing crops, houses, forests, village, pastures and threshing floors or who approach the queen Nār. (pārusya, verse 31) prescribes that one who strikes with a weapon the king, even though the latter be at fault, should be impaled and roasted in fire. These examples are enough to convey an idea of the crimes for which the sentence of death was provided in some of the ancient smrtis. Manu VIII 272, Nār (pārusya 24), Visnu Dh. S. V. 24 prescribe the pouring of boiling oil in the mouth and ears of a śūdra who through insolence tries to expound dharma to brāhmanas. Cutting off limbs as a punishment (particularly hands and feet or fingers) was common in the case of thieves, pickpockets and cut-purses (Manu IX. 276-277, Nār., pariśista verse 32, Yāj II. 274). Excision of the tongue was the sentence when a śūdra abused a brāhmana or a ksatriya by falsely charging him with some grave sin (Āp. Dh. S. II. 10. 27. 14, Manu VIII. 270, Nārada, pārusya 22), when a śudra loudly repeated the Veda along with twice-born persons (Gaut XII. 4), when a person abused the king (Nār., pārusya 30), when a person repeatedly proclaimed what was disliked by the king or divulged the secret policy of the king (Yāj. II. 302). Excision of the male organ was prescribed for a śūdra who sexually approached a woman of the three higher varnas (Gaut XII. 2), for any one guilty of the rape of another's wife (Vrddha-Hārīta VII. 201 and also confiscation of all property), for any one guilty of incest or intercourse with mother, mother's sister, paternal aunt, sister,

642 The general rule was that women were not to be killed on any account. Vide H of Dh. vol II. pp. 575, 593-94. Certain offences were exceptions. Even as to them Vas. XXI. 10 and Yāj I. 72 suggest another and very mild alternative viz abandonment (*tyāga*), when a woman conceives from intercourse with a man of lower varna or when a woman was guilty of killing her husband or foetus Acc to the Mit on Yāj III 268 the king appears to have had to undergo some expiation for ordering the death of a guilty woman. In the 18th century the famous judge of the Peshwa's court, Rāmśāstri Prabhune, ordered a woman guilty of a brāhmana's murder to undergo only the expiation of circumambulating the holy shrine and hill of Tryambakeśvara near Nasik ('Selections from Peshwa's Daftar', vol. 43 No 156 pp. 121-122) Under sec 382 of the Indian Criminal Procedure Code 'if a woman sentenced to death is found to be pregnant, the High Court shall order the execution of the sentence to be postponed and may, if it thinks fit, commute the sentence to transportation for life'.

the wife of an uncle, friend or pupil, daughter, daughter-in-law, teacher's wife, a woman come for refuge, the queen, an ascetic woman, a wet-nurse and any chaste woman or a woman of a higher varna (Nār., strīpumsayoga 73–75) The nose, the ears and the hands were cut off in the case of an offender guilty of selling false gold or forbidden flesh such as that of a dog (Yāj. II. 297). For branding, vide Gaut. XII. 44, Baud. Dh. S. I. 10. 19, Nār. (sāhasa 10), Manu XI. 237 (=Matsya 227. 16), Visnu Dh. S. V. 3–7. The Daṇḍaviveka (p. 47) states that branding was to be resorted to if the proper penance was not performed and if the offence was intentional. Yāj II. 202 provides branding for a gambler using false dice and (II. 294) for persons of the three higher *varnas* having intercourse with a very low caste woman and Daksa VII 33 prescribes it for an ascetic giving up his duties. The Rājatarangiṇī mentions (VI. 108–112) that king Yaśaskara (939–948 A. D) of Kashmir branded on a brāhmana's forehead the mark of dog's foot. Keśavapandita in his Daṇḍanīti-prakarana (p. 6) quotes the author of the Vaijayantī (Nanda-pandita) to the effect that the making of marks was to be effected with the juice of the marking nut in the case of brāhmanas and with a red-hot iron *śalākā* in the case of others In England about a hundred years ago branding for desertion from the army was practised. Manu VIII. 370 prescribes the shaving of the head as a punishment for a woman who pollutes a maiden, Nār. (śāhasa 10) prescribes it for a brāhmana who is not sentenced to death on account of his caste, Śankha-Likhita (q. by Aparārka p 807) for one who abuses officers, brāhmanas and elders. Megasthenes (Fragment XXVII. p. 72) notes 'If one is guilty of a very heinous offence the king orders his hair to be cropped, this being a punishment to the last degree infamous'. Imprisonment for life is prescribed by Visnu V. 71 for striking out both eyes of a man and by Śukra IV. 1. 88 (for repeating an offence more than three times) For imprisonment with labour, vide Śukra IV. 1. 92 and 108–109. Flogging was prescribed[643] by Vishnu Dh S. V. 105 for a woman.

643. The punishment of whipping is allowed in England for several offences; vide 'Laws of England' (ed. by Lord Hailsham, vol. IX, pp. 229–230). In India under the Prisons Act (IX of 1894) by section 46 whipping is allowed for certain prison offences and under the Whipping Act (IV of 1909) whipping is awarded for certain offences such as theft, house-breaking, dacoity, rape and for juvenile offenders. In modern times many persons interested in criminology and penology condemn most strongly the stentences of death and whipping परतन्त्रास्तु ये केचिद् दासत्वे ये च संस्थिता । अनीशास्ते तु निर्दिष्टास्तेषां दण्डस्तु ताडनम् । स्त्रीबालोन्मत्तवृद्धानां दरिद्राणां तु रोगिणाम् । शिफाविदलरज्ज्वाद्यैर्विदध्यान्नृपतिर्दमम् ॥ कात्या. q. in स्मृ. चं. pp. 531–532.

in her monthly course touching intentionally members of the higher castes. It was also prescribed for offenders who were slaves or who were dependents and for women, minors, lunatics, old men, poor men and those suffering from diseases (Kāt). The punishment of banishment was prescribed for brāhmanas guilty of the gravest offences meriting death sentence (Gaut XII. 44, Manu IX. 241, VIII. 380, Visnu Dh S V. 3 and 8, Baud Dh. S. I. 10. 19, Yāj. II. 270). It was often associated with branding. Banishment is also prescribed by Yāj I 339 for officers taking bribes (and also confiscation of all wealth), for a perjured brāhmana witness (Yāj II. 81), for one who embezzles the money of a corporation or transgresses the conventions agreed upon by a guild or village &c (Yāj. II. 187, Manu VIII. 219, Visnu Dh S. V. 167-168), for playing with false dice (Yāj. II. 202 and Nār., dyūtasamāhvaya 6), for a brāhmana guilty of very heinous offences[644] (Śānti 14 116) Śukra (IV. 1. 98-108) contains a long list of offenders that deserve to be sentenced to banishment. Confiscation of all property was the punishment for several offences such as the commission of the *mahāpātakas* by persons other than brāhmanas, provided they committed them unintentionally (Manu IX. 242), for perjury, for taking bribes by *sabhyas* (Visnu Dh. S V. 179-180) Nār (prakīrnaka 10-11) provides a humane rule that even when the king orders the confiscation of all the property of an offender he should not deprive the offender of the tools of his trade or the tools of his craft, such as arms in the case of a soldier, materials of art in the case of artisans, ornaments of courtezans, musical instruments of musicians Śaṅkha-Likhita[645] quoted by V. R p 656 contain a similar provision Enhanced punishment was prescribed for committing an offence again. Visnu Dh. S. III. 93 holds that a king should never pardon or let off a man who is guilty of a second

644. महासाहसिकं विप्रं कृताङ्कं विप्रवासयेत् । शान्ति 14. 116

645. शिल्पिनः कारवः शूद्रास्तेषां स्वभिचारेष्वपि शिल्पोपकरणानि रक्षेत् । तुलामानप्रतिमानसमुत्थानि वणिक्पथानां, क्षेत्रबीजभक्तपोशकटफर्षकद्रव्याणि कर्षकाणां, शस्त्रास्त्रभाण्डाबद्धारवासांसि रङ्गोपजीविनां, मृदङ्गवाद्यद्धारवासांसि वेश्यानां, शस्त्रास्त्रि भाण्डोपकरणी-विनां सर्वेषां कारणद्रव्याणि नाहार्याणि राज्ञा । अथाभिक्रेण हि कृत्वा पापमुत्साद्यादिपापाश्च भवन्ति तेभ्यः पापाद्भागराजा तस्मात्साधनाजानुपकरणान्न कुर्यात्तन्मूला हि वृत्तिर्भवति । वृत्तिमूलो निवासः । सैनिकस्य हि स्त्रीतं राष्ट्रमुच्यते । शङ्खलिखित ग by वि र. p. 656, which explains 'स्वभिचारेषु सर्वस्वापहारयोग्येषु अपराधेषु ... अस्त्र कृषिसिद्ध्यर्थमस्त्रं कर्षणद्रव्यं इत्यादि'. *Compare* section 60 (a, b, c) of the Indian Civil Pro. Code for the property which is not liable to attachment and sale in execution of a decree.

offence (though a first offender may be let off with a mere admonition). Kaut. IV. 10 states that when a person is a first offender as to theft at a holy place or as a pickpocket or house-breaking from the roof, his thumb and index finger may be cut off or he may be fined 54 panas, for a second offence all fingers may be cut or a fine of 100 panas may be levied; for a third offence the punishment is cutting of the right hand or a fine of 400 panas and for the fourth death in any way the king may direct Manu IX. 277, Yāj II. 274, Visnu Dh. S. V. 136 contain a similar rule Vide Āp Dh. S. II. 10. 27. 11-13 for adultery. If several people conspire together and kill or injure a single man the punishment was to be double of what a single man committing the same offence would receive (Kaut. III. 19, Yāj. II. 221, Visnu Dh. S. V. 73). As indicative of the superstitions of ancient (and even modern) times punishment for witchcraft may be mentioned. Kaut. IV. 4 prescribes[646] the employment of spies to find out those who profess to use charms for securing illicit love and banish them and adds that persons who are engaged in witchcraft to injure others may be similarly dealt with. In the times of the Peshwas wizards[647] and raisers of ghosts appear to have been frequent and were severely dealt with by the people themselves by being put to death, but the State generally confiscated the property or cut off the alleged wizard's finger. Up to the beginning of the 18th century even in England wretched old women were frequently convicted as witches and hanged[648]

646 यं वा मन्त्रयोगमूलकर्मभिः इमाशानिकैर्वा सवनकारकं मन्येत तं सत्री ब्रूयात् असुष्य भार्यां स्नुषां दुहितरं वा कामये सा मा प्रतिकामयतामयं चार्थः प्रतिगृह्यतामिति । स चेत्तथा कुर्यात्सवनकारक इति प्रवासयेत । तेन कृत्याभिचारशीलौ व्याख्यातौ । कौटिल्य IV 4.

647. Vide 'Selections from Peshwa's records' vol 43 pp. 25–26 about frequent witchcraft in Kolhapur territories (and a wizard of the *mang* caste being impaled), p. 32 (for a woman who was killed as a witch by the Patils without Government orders) and Rao Bahadur Wad's extracts from Peshwa's Diaries vol II p. 7 (for confiscation of Vatan and razing to the ground the house of a ghost-raiser) and vol. VIII p. 147 (for cutting off a finger).

648. Vide e. g 6 State Trials p 647 (a trial of witches held in 1665 A D. before Sir Matthew Hale C. B. who condemned them to death) and 8 State Trials p. 1017 (in 1682) and Stephens' 'History of Cr. Law of England' vol. II. p 435 for numerous cases of trials for witchcraft between 1653 to 1712 A D. Vide Lea's 'Superstition and force' (ed. of 1878) p. 425 as to torture of heretics for extracting confessions expressly allowed by Papal Bulls and pp. 506–507 for torture being allowed in sorcery and witchcraft cases in England up to the 17th century. Vide a very discerning and interesting paper on 'Witchcraft in Ancient India' by Dr. Winternitz in Indian Antiquary, vol. 28 pp. 71–83.

Manu IX. 290 (=Matsya 227. 183) prescribes the very mild punishment of the fine of 200 panas for all incantations intended to destroy life, for magic rites and various kinds of raising ghosts and goblins. Medhātithi and Kullūka say that if the magic rites are successful the punishment would be that for murder. Br. (S B E. vol. 33 p. 361 verse 16) provides banishment for those who practise incantations with roots.

Kaut. in II 5 prescribes[649] that a jail should be constructed in the capital provided with separate accommodation for men and women kept apart and well guarded at the entrances. He further provides[650] that among the duties of the *nāgaraka* is to let out of the jail on the day of the festival of the birth constellation of the king and on the full moon day (of every month) such persons as are young, very old, suffering from diseases and helpless, or those who are charitably disposed may pay the fines or others bind themselves by an agreement to pay in cash the fines for the offences for which the prisoners are jailed (and then the prisoners may be released). The persons jailed may be set free on their working every day or once in five days or by undergoing corporal punishment (whipping &c.), paying fines in cash. Prisoners may be released from jail (as a favour) on the conquest of fresh territory or on the coronation of the Crown Prince or on the birth of a son to the king. In the Delhi Topra Pillar Edict No. IV (Corpus I. I vol. I. p. 123 and E. I. vol. II. pp. 253-54) Emperor Aśoka promulgates that he gives three days' respite to prisoners on whom judgment has been passed and who have been condemned to death and in the 5th Pillar Edict of Delhi Topra (Corpus I. I. vol. I p. 126-128 and E I. vol. II. pp 258-259) he says that he let off prisoners 25 times in 26 years (which is in conformity with Kautilya's dictum cited above). In the first separate Edicts at Dhauli Aśoka addresses his officers of justice in the capital (*Nagaravyāvahārikāh*) that they should so act that even a single person should not unnecessarily suffer imprisonment or pain. In spite of this if we are to believe Yuan Chwang, Aśoka in his early career was most cruel and had constructed a jail

649. विभक्तस्त्रीपुरुषस्थानमपसारतः सुगुप्तकक्ष्यं बन्धनागारं कारयेत्। कौटिल्य II 5.

650 बन्धनागारे च बालवृद्धव्याधितानाथाना च जातनक्षत्रपौर्णमासीषु विसर्गपुण्यशीलाः समयाद्धबद्धा वा दोषनिष्क्रय दद्युः। दिवसे पञ्चरात्रे वा बन्धनस्थान् विशोधयेत्। कर्मणा कायदण्डेन हिरण्याङ्गग्रहेण वा॥ अपूर्वदेशाधिगमे युवराजाभिषेचने। पुत्रजन्मनि वा मोक्षो बन्धनस्य विधीयते॥ कौटिल्य II 36.

that was called Hell-prison of Aśoka (vide Watters, vol. II. pp. 88–90). Manu IX 288 requires that all jails should be so built as to abut on the royal road where the offenders suffering pain and in bad condition would be seen by all (in order to deter others from committing offences). The Śilappadikāram, one of the earliest works in Tamil, mentions the release of prisoners on the king's birthday and at the founding of a temple (pp. 38–39 of Mr Dikshitar's translation). Kālidāsa in the Mālavikāgnimitra[651] (Act IV) makes the Vidūsaka report to the king, 'the astrologers think that, as the constellation on which Your Majesty was born is in evil aspect now, let all prisoners be released'. Kālidāsa (in Raghu 17. 19) alludes to the release of prisoners and the commutation of death sentences at the time of the coronation of king Atithi. The Brhat-Samhitā (47·81) states that when the king takes the *Pusyasnāna* (ceremonial bath on the day on which the moon is in conjunction with the Pusya constellation in the month of Pausa or every month) he may order release except as to those prisoners who were convicted for offences connected with his own person or with the harem.[652] In the Mṛcchakatika (Act X) also various occasions for the release of prisoners are mentioned by the executioner. The Harsacarita[653] (II. 2nd para) refers to the usage of releasing prisoners at the time of a coronation and on the birth of Harsa (IV.). The prisoners are described in the latter passage as having long beards and as darkened by the accumulation of dirt on their bodies.

Manu IX. 243 enjoins upon the king not to appropriate to himself the property of a man guilty of the mahāpātakas (by way of fine or confiscation) and warns that if he takes it out of greed he is tainted by the guilt of the offender. Manu (IX. 244–45) recommends that such fine may be cast into water as an offering to Varuna (the Lord of waters) who wields sceptre even over kings or may be bestowed on learned and virtuous

653. अभिनन्दितश्च सर्वस्या पृथिव्यां सकलकुलक्षमबन्धनमोक्षमकरोत्मपन्नुष्णसमय. । हर्षचरित II. para 2, प्रलम्बश्मश्रुजालजटिलाननानि बहलमलपङ्ककलङ्ककालकायानि नश्यतः कलिकालस्य बान्धवकुलानीवाकुलान्यधावन्त शुक्तानि बन्धनवृन्दानि । हर्षचरित IV.

brāhmanas, that are lords of the whole world Manu (IX. 246–247) further states that in the country where the king avoids taking the property of very wicked sinners men become long-lived, crops spring up, there is no infant mortality &c.

Generally no one was allowed to take the law into his own hands except as to recovery of debts (which will be discussed below). But Nār. (pārusya[654] 11–14) contains the following remarkable passage: 'If a *śvapāka*, a *meda*, a *caṇḍāla*, one devoid of a limb, one gaining livelihood by killing animals, an elephant driver, *vrātya* (i. e. deprived of caste for non-performance of *upanayana*), a slave, one who disregards his elders or spiritual teacher—if these should transgress the limits they must observe towards their superiors, they should be punished then and there by the person offended and the person so doing is not regarded as committing an offence (equal to theft) Should any such low person insult another (who is his superior) that man himself shall punish him and the king has nothing to do with the punishment. These people are like the refuse (dregs) of humanity and their property also is impure. The king is entitled to inflict bodily punishment (whipping), but he should not inflict fines on them'. The Mit. on Yāj. II. 270 quotes a text of Vrddha-Manu of similar import and explains that the words 'the king should avoid taking fines' refer to cases of grave offences[655].

Something must be said about the law of Limitation. In the smrtis and digests rules of Limitation play very little part for several reasons. As on spiritual grounds, which will be set out under the title of rnādāna, not only the debtor, but also his sons, grandsons and great-grandsons were liable to pay a debt (Mit. on Yāj. II. 50), there was no scope at all for prescribing any period of limitation so far as recovery of debts was concerned Unpaid purchase money was treated as a debt. In other matters also the smrtis and dharmaśāstras, under the influence of religious and other-worldly considerations always lean against

654. श्वपाकमेदश्चण्डालव्यङ्गेषु वधबन्धिषु। हस्तिपव्रात्यदासेषु गुर्वाचार्यार्तिगेषु च ॥ मर्यादातिक्रमे सद्यो घात एवाशुशासनम्। न च तद्दण्डपारुष्यं स्तेयमाहुर्मनीषिणः ॥ धनेन हीते मनुष्येषु धनमेषां मलात्मकम्। अपि ताभ्यातयेद्राजा नार्थदण्डेन दण्डयेत् ॥ नारद (पारुष्य 11–14). For श्वपाक, मेद, चण्डाल and व्रात्य vide H. of Dh. vol. II pp. 97, 92, 81, 378 respectively.

655. यत्पुनर्वृद्धमनुवचन 'अन्यायोपात्तवित्तस्वाद्धनमेषां मलात्मकम्। अतस्तान् घातयेद्राजा नार्थदण्डेन दण्डयेत् ॥' इति तदपि महापराधविषयम्। मिता. on याज्ञ. II. 270.

allowing mere lapse of time to prevent a man from asserting his just rights But rarely there were writers who were more secular and laid down periods of limitation. For example, Kaundinya[656] (quoted in V. Mātrakā p. 341) holds that a debt not claimed for ten years cannot be recovered except when the creditor was a minor or very old or was a woman or was suffering from disease or there was confusion due to invasion or (the creditor or debtor) had left the country. Some important rules on the law of Limitation are set out here in one place:

1. Manu VIII. 148, Yāj II. 24, Gaut. XII. 35, Vas 16. 17, Nār. IV. 79 and others state that enjoyment of immovable property in the presence of the real owner without protest from him causes loss of ownership and ten years' enjoyment of movables under similar circumstances leads to the same result. There are various views on the subject which have already been indicated above (on pp. 322–325).

2. An exception to the above rule is stated to be that no limitation applies to pledges boundaries, deposits, and to the property of minors, idiots, the State, women and brāhmanas learned in the Vedas. Vide Gaut. XII. 35–36, Vas. 16. 18, Manu VIII. 149, Yāj. II. 25, Nār. IV 81, Br. (S. B. E. vol. 33 p. 312 verse 21).

3 As the rules about deposit are extended by Nār. (upanidhi verse 14) to articles borrowed or given to artisans for being worked, and to *anvāhita*, *nyāsa* and *pratinyāsa*, in the case of these also there would be ordinarily no bar of limitation. Vide Manu VIII. 145–146, Yāj II. 58, Visnu Dh. S. VI. 7–8. Here also there are dicta to the contrary. Marīci (q. in Sm C II. p 69 quoted above on p. 326) says that cows, beasts of burden, ornaments and the like borrowed in a friendly way would have to be returned (at the latest) in four or five years, otherwise they are lost. Acc. to Vyāsa[657] this rule would not apply to what is lent to

---

656 दशवर्षोपेक्षितमुण न ब्राह्मणस्यत्र बालवृद्धव्याधितयोर्विद्देशत्यागपरचक्रविभ्रमेभ्यः। कौण्डिन्य quoted in स्म. मा p. 341; compare the very similar words of कौटिल्य (III 16) 'यस्त्व द्रव्यमन्यैर्भुज्यमानं दशवर्षाण्युपेक्षेत हीयेतास्य अन्यत्र बालवृद्धव्याधितव्यसनिभ्योविद्देशत्यागराज्यविभ्रमेभ्यः। पिंशतिवर्षोपेक्षितमनुवासितं वास्तु न.नुयुञ्जीत'। Is कौण्डिन्य a misreading for कौटिल्य in the व्यवहारमातृका ?.

657. याज्ञावल्क्येन यद्भुक्तं श्रोत्रिये राजपूरुषे । सुहृद्भिर्बान्धवैर्वापि न तद्भोगेन हीयते व्यास in स्मृतिच० II p 69

friends, relatives, brāhmanas and the servants of the king on their request

4 It appears that a period of twenty years was prescribed for avoiding a document on the ground of patent defects by one who had seen it and was affected by it Vide Kāt 298-300 Similarly when a thing is enjoyed for twenty years on the basis of a writing in the presence of an opponent able (to challege the enjoyment and the writing) then the writing becomes unassailable (even if the witnesses are all dead or there is no other document for comparison). Vide Kāt (299)[658].

5. A deed settling a boundary dispute becomes unassailable after twenty years Vide Kāt. (301).[659]

6 No suit can lie on a document executed beyond thirty years, which has never been seen by any body nor read out (by the creditor to any body) even though the attesting witnesses may be living Vide Br. (S. B. E vol. 33 p. 308 verse 29)[660].

In the preceding pages we have passed in review the law of judicial procedure, evidence and limitation A careful perusal will convince any unbiassed reader that the Dharmaśāstras evolved during the course of centuries an indigenous system of judicial procedure of a high order Nārada, Brhaspati and Kātyāyana represent the high water mark of ancient Indian adjective law These writers flourished before 600 A. D and the first two of them are probably older by several centuries than that date They present an orderly system providing for the appointment and duties of judges, proper pleadings, the law of evidence and limitation, decrees and their execution, crimes and punishments. This system compares most favourably with any system of judicial procedure prevalent anywhere in the West up to the 18th century A. D.

CHAPTER XVI

CONTRACTS

There are only three titles of law, viz. recovery of debts, the relation of husband and wife (*strīpuṁsayoga*) and partition of wealth (*dāyabhāga*) that are of importance to modern Hindus, since to a very large extent they are even now governed in these matters by the ancient Hindu Law as interpreted by the commentators. These three topics therefore have to be described in detail while other titles will not and cannot be allowed to occupy much space. In almost all smṛtis and digests of Hindu Law *ṛnādāna* (recovery of debts) is treated of first Therefore here also that subject will be taken up first. A good deal of the matter falling under the title of the relation of husband and wife has already been dealt with in the 2nd volume of the History of Dharmaśāstra pp. 427–636. The topic of *dāyabhāga* will be dealt with last of all, the other topics being taken up in the same order as in Manu. Many of the *vyavahārapadas* are concerned with the law of contracts in various aspects, viz. the contract of debt, of pledge or mortgage, of bailments, of sale, of partnership, of hire and service.

Our writers do not set out with an analysis of the conception of contract in general. They had before them the ancient 18 titles of law, many of which related to various kinds of contracts and therefore they take up one title after another, in the order contained in Manu or in Nārada (as the Sm. C II. p. 206 expressly says). But it is not to be supposed that they did not evolve certain general principles about contracts. They do say a good deal about the competence of persons to enter into contracts, about fraud vitiating all contracts, about damages for breach of contract &c. Similarly the dharmaśāstras do not lay down a general Code of rules applicable to all transfers of immovable property, nor do they treat of transfers by way of sale, mortgage or gift in separate sections What they have to say on these transfers is tacked on to some *vyavahārapada* e. g. they speak about sales and exchanges of land under asvāmi-vikraya and sīmāvivāda, about gifts under dattāpradānika and about mortgages under ṛnādāna. As this work has to represent what the ancient law was like the same

arrangement has been followed here. Similarly the law of crimes is not to be found in one place. It is scattered under different titles of law such as vākpārusya, dandapārusya, sāhasa, strīsangrahana and steya; nor is there a complete analysis of intention or motive or of the right of private defence, although all these subjects are briefly dealt with in the smrtis in different places

A great deal has been said by ancient writers about what persons are competent to enter into transactions (vyavahāra) The Arthasāstra (in III. 1)[661] has a lengthy disquisition on it. Briefly, it holds that dependent persons, minors, extremely old people, those charged with grave sins, *sannyāsins*, persons who are devoid of a limb and those who are addicted to vices (like drinking and whoring) are incompetent and agreements made with such people are invalid. Among dependent people Kautilya mentions a son when the father is alive (and manages the affairs), a father when he has a son (who manages the family affairs), a brother who has left the family, a younger brother whose share has not been separated, a woman whose husband or son is alive, a slave or a hired servant. He states that these may enter into binding agreements if those on whom they are dependent authorize them to do so. He further says that contracts made by persons that are at the time of making them intoxicated or are under the influence of wrath or are distressed or are of unsound mind or under duress (imprisoned or confined) are invalid. Yāj (II. 31-32) concisely puts down the same propositions by saying that all transactions brought about by force or fraud should be declared (by the king) to be unenforceable, so also those entered into by women or the other persons specified above or entered into at night, or in the interior of the house or outside the town or village (in a forest &c.) or with one's enemy or by persons unconnected with or unauthorized by the persons who are to be bound by them[662] Manu (VIII 165 and 168) also declares that all transactions (such as sale, mortgage, gift) brought about by force or fraud are

661. अपाश्रयबन्धिश्च कृता, पितृमता पुत्रेण, पित्रा पुत्रवता, निष्कुलेन भ्रात्रा, कनिष्ठेनाविभक्तांशेन, पतिमत्या पुत्रवत्या च स्त्रिया, दासाहितकाभ्याम्, अप्राप्तव्यवहारव्यम्, अभिशस्तमव्रजितव्यङ्गव्यसनिभिश्चान्यत्र निसृष्टव्यवहारेभ्यः। तत्रापि क्रुद्धेनातेन मत्तेनोन्मत्तेनापगृहीतेन वा कृता व्यवहारा न सिध्येयुः। अर्थशास्त्र III. 1.

662. It should be noted that the rules of Kaut and Yāj are in remarkable agreement with sections 11 to 19 of the Indian Contract Act (IX of 1872)

null and void. Nār. IV. 26-42 treat this subject[663] exhaustively. Some of Narada's dicta are interesting. He says: 'in this world three are independent viz. the king, the Vedic teacher and the head of the house in his own house (32). Wives, sons and slaves are not independent; the head of the house has independent power as to what belongs to him by inheritance (34).' Kāt. (497) also prescribes that one should not give a loan to women, minors or slaves. When the texts say that women are incompetent to make contracts, what is meant is that they cannot make contracts binding on their husbands or family or against the family property. Women are not inherently incompetent to deal with their own separate property except that the husband has some control (these matters will be discussed at length later on under stridhana). Another proposition laid down by Yāj II 23, Nār. IV. 97, Kāt. (517) and others[664] is that in all transactions relating to a debt or any other title of law the last act is the deciding factor; but in the cases of gift, pledge or purchase each prior transaction (of gift &c.) is of superior efficacy to the succeeding one.[665]'

After the establishment of British rule in India during about 150 years numerous publications dealing with Hindu customs and usages and the Hindu law of debts, contracts, adoption, family rights, partition and inheritance have been published. It is impossible to give an exhaustive list of these nor is it necessary to do so. Most of them have now only an academic or historic interest. But a few of them must be mentioned for their worth, for purposes of study and for a knowledge of the modern Hindu Law as administered by the British Indian courts They are: Bannerjee's 'Hindu Law of Marriage and stridhan'

---

663 The Vyavahāramātrkā p 288 quotes five verses as from Kaundinya which are almost the same as Nārada IV. 29, 30, 39, 34, 40 respectively. The learned editor does not notice this

664 यद्दानादिषु सर्वेषु बलवत्युत्तरा क्रिया। प्रतिग्रहाधिकीतेषु पूर्वा पूर्वा बलीयसी॥ नारद IV 97, आधिनैकं द्वयोर्यस्तु कुर्यात्का प्रतिपद्यते। तयोः पूर्वकृत ग्राह्य तत्कर्ता चोत्तरदण्डभाक्॥ कात्या 517 q by स्मृतिच II. p. 144, वि र p. 35, स. वि p 237

665. For example, if A establishes that he lent a sum to B but if the latter establishes that he repaid the amount, this later fact of repayment is decisive of the dispute if A files a suit for recovery of the money. If A mortgages a field to B for a loan and then mortgages the same field to C, the mortgage of B, being prior is superior to that made in favour of C The same principle is laid down in section 48 of the Transfer of Property Act (IV of 1882).

(5th ed. of 1923); Colebrooke's Digest of Hindu Law, which is a translation of Jagannātha's Vivādabhangārnava (3rd ed. of 1864, Madras); the several volumes of the Bombay Gazetteer and the Gazetteers of the other provinces and the Imperial Gazetteer of India; A. Ghosh's 'Law of endowments' (*2nd ed.*, 1938); Dr. Jolly's Tagore Law Lectures on Partition, Inheritance and Adoption and *Recht* und *Sitte* translated by Prof. Batakrishna Ghosh (1928)); Mayne's Hindu Law (10th ed. of 1938), Mulla's Hindu Law (9th ed. of 1940), K L Sarkar's 'Mimansa rules of interpretation'; G. C. Sarkar's Hindu Law and Hindu Law of Adoption (2nd ed. 1916); Rajkumar Sarvadhikari's 'Principles of the Hindu Law of Inheritance' (2nd ed. 1922), Dr. P. N. Sen's 'General Principles of Hindu Jurisprudence' (1918); Steele's Law and custom of Hindu castes' in the Deccan (London, 1868), Stoke's Hindu Law Texts (a work constantly quoted by the Courts and the Privy Council) containing English translations of the Mitāksarā, the Dāyabhāga, the Vyavahāramayūkha, the Dattakamīmāmsā, the Dattakacandrikā, the Dāyakramasangraha; West and Buhler's Digest of Hindu Law.

The idea of the liability to pay off one's debts was developed in India in the most ancient times. In Ṛg VIII. 47. 17[666] the poet exclaims 'Let us drive away the evil effects of bad dreams as we pay off debts'. In Ṛg X 34. 10 (the gambler's lament) it is stated that the gambler, because he owes a (gambling) debt, is afraid and approaches the houses of others at night, desiring wealth'.[667] This indicates that a debtor was afraid of being detained by his creditor in those days Ṛg. VIII. 66. 10 indicates that money-lenders made a stipulation to receive double of what they lent, 'Indra strikes by his power all *panis* who make representations of taking double'.[668] The Ait Br 33 1 (*rnam-asmin san-nayati*)[669] employs the very verb '*san-nayati*' which occurs in Ṛg. VIII. 47. 17. The Atharvaveda VI 117. 3 and Tai Br III 7. 9. 8 contain the same verse about a man being free from the obligations of this world, the next

666 यथा कलां यथा शफं यथ ऋणं सञ्जयामसि । एवा दुष्वप्न्यं सर्वमाप्ये स नयामस्यमेदसो व ऊतयः सुऊतयो व ऊतय ॥ ऋ. VIII 47 17

667. ऋणावा बिभ्यद्धनमिच्छमानोऽन्येषामस्तमुपनक्तमेति । ऋ X 34 10.

668 इन्द्रो विश्वान् बेकनाटाँ अहर्दृशं उत क्रत्वा पणींरभि ॥ ऋ VIII 66 10 The word बेकनाट is very like a *prākrit* word

669 जायमानो वै ब्राह्मणस्त्रिभिर्ऋणवा जायते ब्रह्मचर्येण ऋषिभ्यो यज्ञेन देवेभ्यः प्रजया पितृभ्य एष वा अनृणो यः पुत्री यज्वा ब्रह्मचारिवासी । तै स VI 3 10 5, ऋणमस्मिन् संनयत्यमृतत्वं च गच्छति । पिता पुत्रस्य जातस्य पश्येच्चेज्जीवतो मुखम् ॥ ऐ. ब्रा. 33. 1.

world (of pitrs) and the third world (the world of gods).[670] The Tai. S. (III. 3. 8. 1-2) uses the very word 'kusīda', which occurs[671] in the Dharmasūtras and smrtis (for money-lending) when it says, 'O Agni! whatever debt has not been paid back by me, the tribute that I owe to Yama, here do I make return of it; may I be freed from that debt!'. The Śat. Br. XIII. 4 3. 11 associates *kusīdin* with black magic in the Pāriplava. The Nirukta (VI. 32) while commenting on Rg. III. 53. 14 explains the word 'Pramaganda' occurring therein as 'one who is born of a family that is extremely usurious'.[672] Pānini employs the technical word 'uttamarna' (creditor) in his sūtra 'dhārer-uttamarnah' (I. 4. 35), he speaks of 'ādhamarnya' (the position of a debtor) in II. 3. 70 and the word 'pratibhū' occurs in Pānini II. 3. 39, the word 'vrddhi' (interest) in V. 1. 47. Pānini (IV. 4. 31) derives the words 'kusīdika' and 'kusīdikin' It is noteworthy that Pānini does not derive or mention the word *vārdhusika*, which is employed by even Āp. Dh. S and Baud. Dh. S and which is derived by Kātyāyana (the grammarian) in Vārtika 3 on Pānini IV. 4. 30, in which Pānini refers to such words as 'dvaigunika' or 'traigunika' which were applied to people that carried on the condemned methods of money-lending viz. extorting twofold or threefold of the money lent (the sūtra is 'prayacchati garhyam'). Brahmanaspati is spoken of as 'one who recovers a debt (*rnam-ādadhih*) in Rg II. 24. 13 and the Ādityas as those 'who, themselves being the observers of *rta* (the universal Law of Right), collect[673] debts' (Rg. II. 27 4) In Rg. VIII 32. 16 it is said that those priests who extract (and offer) Soma juice do not indeed owe a debt (to the gods) Divodāsa is said in Rg VI 61. 1 to have been the gift of Sarasvatī to Vadhryaśva as a son to pay off debts (*rnacyutam*)[674] These passages certainly establish that in the remote ages of the

670. अनृणा अस्मिन्ननृणाः परस्मिन् तृतीये लोके अनृणाः स्याम । ये देवयाना उत पितृयाणाः सर्वान्पथो अनृणा आ क्षीयेम ॥ तै. ब्रा. III 7 9. 8, अथर्ववेद VI. 117. 3 (with very slight variations)

673. दीर्घाधियो रक्षमाणा असुर्यसृतावानश्चयमाना ऋणानि । ऋ II 27 4

674 इयमददाद्रभसमृणच्युत दिवोदासं वध्र्यश्वाय दाशुषे । ऋ. VI. 61. 1

Rgveda it was a firm belief that men were under obligations to gods and pitṛs, which could be fulfilled only by worship (yajña) and by the birth of a son. These passages contain the germ of the doctrine of the three religious and spiritual debts that a man owed to gods, Manes (*pitṛs*) and sages, which he paid off by sacrifices, by the birth of a son and by vedic study (vide Tai. S VI 3 10. 5, Śat. Br. I. 7. 2. 11 and Ait. Br. 33. 1 quoted in H. of Dh vol II. pp.270, 560 notes 621 and 1302 and above n 669). Gradually further universal obligations came to be added to this theory of spiritual debts The Ādiparva (120. 17–20) holds that men owe four debts, viz the three vedic ones and the fourth to humanity in general (which is paid back by goodness to all) and Anuśāsana 37. 17 raises them to five (adding brāhmaṇas and guests to the well-known three)[675]. It appears to me that this theory of spiritual debts being already in the air, the same sanctity came gradually to be transferred to one's promises to repay monetary debts and carry out other secular engagements The word *ṛṇa* had been applied both to spiritual and secular debts. It is on account of this that the son was not only desired for repaying the spiritual debt owed to one's ancestors, but he was also expected to free his father (if the father could not himself repay the monetary debt) from the liability he incurred to his creditor Nār. IV. 5–9 puts this clearly and most emphatically: "fathers desire to have sons for their own benefit thinking in their heart 'he will release me from liability to creditors and debtors' (or probably 'from high or low debts' i. e spiritual and earthly debts). Three deceased (ancestors) must be honoured (by a man) and he must subsist on three (descendants) that come after him. These (the first three) series of ancestors rely (for repayment) of their twofold debts (spiritual and secular) on the fourth in descent If a man fails to pay on demand a debt or promised gift that sum (by the addition of interest) goes on growing till it amounts to a hundred crores and when a hundred crores are reached he is born again and again in the house of his creditor as a slave in order to repay the debt (by his labour). If an ascetic or a brāhmaṇa perpetually keeping the sacred fire (*agnihotra*) dies

675 ऋणैश्चतुर्भिः संयुक्ता जायन्ते मानवा भुवि। पितृदेवर्षिमनुजैर्देयं तेभ्यश्च धर्मतः॥ .. यज्ञैरग्नु देवान् प्रीणाति स्वाध्यायतपसा मुनीन्। पुत्रै श्राद्धैः पितॄंश्चापि आनृशंस्येन मानवान्। आदिपर्व 120 17–20, ऋणमुन्मुच्य देवानामृषीणा च तथैव च। पितॄणामथ विप्राणामतिथीनां च पञ्चमम्। अनुशासन 37. 17

without discharging his debts, the whole merit due to his austerities and the perpetual tending of fire belongs to his creditors".[676] Kāt. (551, 591) expresses the same idea but adds that a debtor who has not repaid money borrowed may be born as a slave, a servant, a woman or a beast in the house of his creditor. It was this belief that led to the doctrine of the pious obligation of the son to pay off his father's debts even if he received no property from the father.[677]

Nārada IV. 98 defines '*kusīda*' in a rather obscure verse as 'the receiving of money paid in consequence of the original (amount advanced) and the profit (agreed to be paid) thereon and those are called *kusīdin* who maintain themselves by this occupation'. Brhaspati (S. B. E 33 p. 320 verse 2) derives[678] *kusīda* as 'that is called kusīda, which is taken fourfold or (even) eightfold without any qualm (by a person) from a wretched man who is sinking (or distressed)'. Nār IV. 110 defines *vārdhusa* as the interest (in kind) on grain,[678a] but Āp. Dh S I. 6. 18. 22 and Baud. Dh. S. employ the word 'vārdhusika' and Āp. Dh. S. I. 9. 27. 10 has a verse in which the word *vrddhi* occurs. Vas (II. 41–42 = Baud. Dh. S I. 5. 93–94) quotes

---

676 पूजनीयास्त्रयोतीता उपजीव्यास्त्रयोऽग्रतः । एतदुक्थसन्तानसूणयो· स्याच्च· तुर्थके ॥ तपस्वी चाग्निहोत्री च ऋणवान् म्रियते यदि । तपश्चैवाग्निहोत्रं च सर्वं तद्धनिनां धनम् ॥ नारद IV 6 and 9 ; पितृणां मुह्यभिर्जातैर्दानेनैवाधमाद्भूणात् । विमोक्षस्तु यतस्तस्मादिच्छन्ति पितर. सुतान् ॥ उद्धारादिकमादाय स्वामिने न ददाति य·। स तस्य दासो भृत्यः स्त्री पशुर्वा जायते गृहे ॥ कात्या. 551, 591, quoted by Sm' C pp 168 and 161, परा. मा III. pp 261 and 263, व्य प्र p 277. Dr Jolly's translation of Nār IV 6 (S B E 33, p 43) 'three must be reverenced before the rest' does not seem to be correct What Nār. means is that a man has to offer worship in śrāddha to three ancestors while he himself depends upon (*upajīvyāstrayaḥ*) his three descendants for the pinda (they offer) Upajīvya does not mean 'to be reverenced' but 'to be subsisted on'. The Sm C II p 161 notes that the verse 'tapasvī &c' (Nār IV 9) occurs in a Purāna

677. स्थानलाभनिमित्तं हि दानग्रहणमिष्यते । तत्कुसीदमिति प्रोक्तं तेन . वृत्तिः कुसीदिनाम् ॥ नारद IV. 98, The वि चि explains: स्थानमवस्थानं मूलधनस्य तस्मिन्सत्येव लाभो वृद्धिस्तदर्थं दानग्रहणम् ।; 'देयमस्यं दीयत इति दानं इति व्युत्पत्तेः तस्य ग्रहणमधमर्णेन' विवादचन्द्र p 2

678 कुत्सितात्सीदनश्चैव निर्विशङ्कै प्रगृह्यते । चतुर्गुणं चाष्टगुणं कुसीदाकथमतः स्मृतम् ॥ बृहस्पति Q. by व्य म. p 167, मदनरत्न

678a. वृद्धिस्तु प्रोक्ता धान्यस्य वार्धुषं तदुदाहृतम् । नारद IV. 110.

two verses: 'a vārdhusika (usurer) is one who taking cheap grain lends it on condition of receiving a quantity of grain of high price and is condemned among the *brahmavādins* (students of the veda) Brāhmana murder and usury were weighed in a balance; the murderer of a brāhmana rose to the top while the usurer trembled'. Here usury of the type of the one described in Vas. II 41 (and not all lending of money at interest) is condemned as a great sin Gaut. XII 26, Vas II 50, Kaut III 11, Manu VIII. 140–141 and others declare it righteous (dharmyā) moneylending when an 80th part is stipulated as the interest per month.[679]

Megasthenes (fragment XXVII B p. 72) states: 'The Indians neither put out money at usury nor know how to borrow,' but he is under some misapprehension, for he again says (p 73) 'one who is unable to recover a loan or deposit has no remedy at law. All the creditor can do is to blame himself for trusting a rogue'.

Nār. IV. 1 states that the principal topics under the title of *ṛṇādāna* are seven: what debts must be paid and what not; by whom, where and in what manner (they are to be paid); and the rules about advancing the loan and receiving it back The first five of these relate to the debtor and the last two to the creditor Brhaspati (S. B E. 33 p. 320 v 4) says that interest (*vrddhi*) is described to be of four kinds by some, of five kinds by others and of six kinds by still others Nār. (IV 102–104) names four kinds and defines them, viz *kārita* (interest that is stipulated by the debtor himself), *kālika* (interest accruing and payable every month), *kāyika* (interest of a *pana* or quarter *pana* to be paid every day without the principal being liable to be reduced, whatever interest may have been recovered), *cakravṛddhi* (interest on interest called compound interest). Manu VIII 153 mentions these four and commentators thereon give varying interpretations Brhaspati (S B E. 33 p 321 verse 6) and Vyāsa (q by Sm C II p 154) define *kāyikā* as interest received from the body i e. milk received from a cow pledged or the work put in by a slave or by a bull pledged Br (S B. E vol 33 p 321 verses 7–8)

679 कुसीदवृद्धिर्धर्म्या विंशति. पञ्चमापिकी मासम् । गो XII 26, सपादपणा धर्म्या मासवृद्धि. पणशतस्य । कौटिल्य III. 11.

adds two more varieties viz. *śikhāvrddhi*[680] (hair-like interest i e. interest payable every day and so growing every day, just as the top-knot on one's head grows every day) and *bhogalābha* (profit by enjoyment i e. making use of a house or taking the produce of a field in lieu of interest in the case of a mortgage). Gaut. (XII. 31–32) mentions the six, but instead of *bhogalābha* he uses the word '*ādhibhoga*', which is defined by Kāt. (501) as a transaction in which the complete enjoyment of the thing pledged or mortgaged is to be the interest Kāt. (498–500) defines kāritā, śikhāvrddhi and bhogalābha

Br. (S B E 33 p. 319 verse 1) states[681] that the creditor should always advance a loan after taking an adequate pledge or a deposit (with a mutual friend) or a reliable surety and after committing the transaction to writing or making the loan in the presence of witnesses. The interest may be either stipulated (*kṛta*) at the time of the loan or not stipulated (*akṛta*), as indicated in Visnu VI. 4. Yāj. II 38 and Visnu Dh. S. VI. 3 state the general rule that debtors of all castes may pay to creditors of all castes the interest settled by mutual agreement and the rate of interest stipulated may be with reference to an

682 भोगो यद्द्विगुणात्पूर्वं चक्रवृद्धिश्च गृह्यते । मूल च सोदय पश्चाद्धार्युस्य तच्च गर्हितम् । गृह्य quoted by वि चि p 6 which says द्विगुणाधिकवृद्धिग्रहण वृद्धेर्वृद्धिग्रहण वृद्धया तए मूलमेकीकृत्य मूलत्वेनैव तद्ग्रहण एतत्त्रय निन्दितमिति गृहस्थरत्ना-कर. Vide p 445 of गृह र This verse occurs in वि र p 14 which says that such actions are condemned, but if a Shylock insists on his agreement he can and does recover compound interest and so on, 'तद्धार्युस्य विगर्हितम्, अधर्मोय तन्द्धगति न तु भोगाधिक तच्च लभते एव तल्लाभस्य तैस्तैर्वाक्यैर्बोधनात्' This shows that the ancient sages were quite alive to the hardships of debtors and the evils of usurious interest. They condemned usury as a greater sin than even the murder of a learned brāhmana Vide Baud Dh. S I 5. 93 and Vas II 40-42 quoted above on pp 417-418

683. कुसीदवृद्धिर्धर्म्या विंशतिः पञ्चमाषिकी मासम् । गौ XII 26, पञ्चमाषस्तु विंशत्या एवं धर्मो न हीयते। वसिष्ठ II 50, वैश्य. कुसीदमुपजीवेत् । पञ्चविंशतिरत्वेव पञ्च-माषकी स्यात् । बौ ध सू I 5. 90-91, पुराणपञ्चविंशत्या मासे अष्टपणा वृद्धि । एव षड्भिर्मासैश्चतुर्भिर्वत्सरद्विपर्यागत सन्तिष्ठते । एषा धर्मवृद्धिर्नानया धर्माच्च्यवते । हारीत q by गृह र p 447, which explains पुराणमिह षोडशपणा पण काकिणीचतुष्टयम् । Should we not read एवं सष्टिमासकै in the quotation from Hārīta? 'Gaut and Vas provide that five māsas were the interest on 20 *panas* per month and if we are to suppose that they accepted the rule that 1/80 of the prin-cipal sum was the proper rate of interest (as ascribed to Vasistha by Manu VIII 140, Nār IV 99 and others), then the pana, acc to those two, must be equal to 20 māsas (i e 100 *raktikās*), while acc to Baud the pana would be equal to 16 māsas When Hārīta says that 8 panas are the monthly interest on 25 *purānas* (which were silver coins and each of which weighed 32 *raktikās*) and that in 4 years and 2 months the interest on 25 purānas at 8 panas per month came to be as much as the principal, it follows that a raktikā of silver was 40 times as valuable as a raktikā of copper ($8\times80\times50$ =32000 divided by 800) But this does not agree with what Sukra states (note 162 above) Probably the relative values of gold, silver and copper varied from age to age, according to the supply of some or all of these metals from foreign countries

that double the interest stated above may be taken when there is nothing pledged to secure the debt. Yāj and Vyāsa provide that this rate is the proper one when some thing is pledged or mortgaged by way of security. Yāj. II. 37, Manu VIII. 142 (=Nār IV. 100), Visnu Dh S VI. 2 provide an option that two, three, four or five per cent per month may be charged as interest in the order of the *varnas*[684] (i. e 2 per cent per month for a brāhmana debtor and so on) Yāj. II. 37 allows these rates only if there is nothing pledged by way of security Vyāsa[685] (in Par M. III. p 221) provided that the monthly rate of interest was $\frac{1}{60}$th of the principal lent when a pledge or mortgage was given as against the loan, $\frac{1}{80}$th when only a surety was offered and two per cent per month when money was lent on personal security. The Anuśāsanaparva 117.20 condemns to Hell those who take exorbitant interest. Kaut. prescribed (as stated in n. 688) fines for taking heavier interest than that allowed by him Kāt (498) provides that if a debtor himself stipulates a higher rate of interest than is allowed by the sāstra in times of difficulty (in order to induce the creditor to part with his money) that stipulated interest must be paid but a rate of interest imposed by the creditor otherwise (by force &c.) should not be enforced by the Court[686] It is probable that these rates are specified because of the economic conditions of those times which proved too much even for the ancient sages or different mercantile usages about interest prevailed in different countries at different times, as expressly stated by Nār. IV 105-106 that[687] these high rates (including eight per cent per month) had to be paid according to the law merchant in different countries Manu VIII. 141 (=Nār. IV. 100) holds that to take two per cent per month (on unsecured debts) is not improper In medieval times also the rate of interest was rather high e g interest at 25 per cent is said to have been

charged on a deposit of six *gadyānas* kept with the *mahājanas* of Śivapura (vide Yewur Ins. in E. I XII. p. 273) Yāj. II. 38 provides that those debtors who carry on trade by traversing dense forests and those who are sea-faring traders should respectively pay 10 per cent and 20 per cent per month and the Mit adds that these exorbitant rates are allowed because of the great danger of the loss of even the principal as the debtors may perish by ship-wreck or from the attacks of robbers and wild beasts. Manu VIII. 157 leaves the rate of interest in the case of seafaring merchants to those who are clever in these matters and who know the proper time and place Kaut. (III. 11) states[688] that the prescribed (*dharmya*) rate of interest is 1¼ *pana* per cent per month, but in transactions (or in commercial usage) it is five panas per cent per month (as the highest, it appears), that those who traverse forests and those who carry on maritime trade should pay respectively ten and twenty per cent per month, that those who exceed or induce creditors to exceed these rates should be punished with the first amercement, that each of the witnesses to such usurious transactions should be punished with half of the above fine

Other rules laid down in the smṛtis relate to the maximum that can be recovered by a creditor from a debtor at one time All are agreed that the creditor cannot recover at one time from the debtor for principal and interest more than double of the money lent Vide Kaut. (III 11), Manu VIII 151, Gaut XII. 28, Yāj II 39, Viṣnu Dh VI 11, Nār IV. 107, Kāt (509) This is called the rule of *dvaguṇya*[689] in the smṛtis and of *dāmdupat* in modern times It will be explained in detail a little below As regards the interest in kind on articles lent there is some difference of opinion, which need not be gone into in great detail Manu VIII. 151 and Gaut XII 33 state that on loans of grain, fruits, wool and beasts of burden, and products like ghee and milk had from cattle the total recoverable cannot exceed in any case five times of what is lent Yāj II 39 states

688 सपादपणा धर्म्या मासवृद्धि. पणशतस्य । पञ्चपणा व्यावहारिकी । दशपणा कान्तारकाणाम् । विंशतिपणा सामुद्राणाम् । तत परे कर्तु कारयितुश्च पूर्व. साहसदण्ड. । श्रोतृणामेकैक प्रत्यर्धदण्ड. । अर्थशास्त्र III 11

689 चिरस्थाने द्वैगुण्यं प्रयोगस्य । गौ XII 28. हिरण्यस्य परा वृद्धिर्द्विगुणा । विष्णुध. VI. 11. चिरप्रवास. संस्तम्भमविष्टो वा मूल्यद्विगुण दद्यात् । कौटिल्य III 11. कुसीदवृद्धिर्द्वैगुण्यं नात्येति सकृदाहृता । मनु VIII 151 There is another reading सकृदाहिता

that in the case of cattle and female slaves when loaned their progeny is the profit, in the case of liquids (like oil and ghee) when loaned the maximum recoverable is eightfold and in the case of clothes and grain it is respectively four and three times Vas. II. 44–47 says the maximum recoverable at one time in the case of grain, flowers, roots, fruits and fluids (like oil) is three-fold and eight-fold in the case of things that can be weighed Vide Visnu Dh. S VI. 12–15 Visnu VI 17 (*amukhānām dvaguṇā*) provides that where no special rule is laid down the maximum recoverable is to be only double of what is lent Kāt. (570–572) states[690] that the maximum recoverable in the case of precious stones, pearls, corals, gold, silver, fruits, silk, wool is double of what is loaned; of oils, liquors, ghee, raw-sugar and salt and land eight-fold, of baser metals five-fold Vide Br. (S B E vol. 33 p. 322 verses 13–16) and V Nirnaya p 229 (quoting Bharadvāja) for similar provisions.

The rule of what is called *dāmdupat* in modern times expressed laconically by Manu VIII. 151 and Gaut XII. 28 is this that 'the amount of principal and interest recoverable at one time in a lump sum cannot be more than double of the money lent' As a debt was recoverable not only from a man himself but also from his three descendants and as therefore there was practically no period of limitation for bringing a suit for money lent, creditors had great temptations to allow interest to go on increasing Therefore the sages who condemned the profession of usury and particularly waiting long for the increase of interest[691] laid down that whatever the length of time during which the principal was at interest and whatever the rate of interest might have been, the creditor could recover by suit in a lump sum only double of the money lent This acted as a great

check on the creditors' rapacity. Several propositions are laid down in the Mit.,[692] the Vyavahāramayūkha and other digests that graft exceptions on the general rule, and that flow from the interpretation of Manu VIII. 151 in both readings. The first modification is that if interest is received every day, month or year and is not claimed in a lump sum at one time then the total interest received by a creditor may be even several times more than the principal lent Br. provides (S B E. vol 33 p. 321 verse 11) that every day interest or bodily interest and *bhogalābha* may be taken by the creditor (irrespective of the question of *dvaiguṇya*) as long as the principal is not paid[693] (2) Further, if after the interest has accumulated for some time, there is a fresh agreement with the same debtor whereby the sum lent together with interest due is taken as the principal and interest is agreed to be paid on the amount so arrived at, then the total recoverable after this fresh agreement may exceed double the original sum lent. Manu (VIII 154-155) and Br (S. B. E vol. 33 p 331 verse 60) allow such a fresh agreement. But if the debtor does not make a fresh agreement then the rule of *dāmdupat* would apply. (3) If after the sum due to the creditor has become double of the principal lent, the creditor accepts another man as the debtor (who takes the liability on himself), then the creditor may recover from the substituted debtor after the lapse of years an amount which may be more than double of the sum originally lent (4) If the debtor pays a part of the principal or if the creditor makes a concession (called '*reka*' in the Mit on Yāj II 39) and reduces the total recoverable or if the debtor receives an additional amount of money (called '*seka*' in the Mit) and it is added to the original amount borrowed and a fresh agreement is made between the parties to put the whole to interest, then the rule of dāmdupat would not apply

693 शिखावृद्धिं कायिकां च भोगलाभं तथैव च। धनी तावत्समादद्याद्यावन्मूलं न शोधयेत् ॥ बृह. q. by स्मृतिच० II. p 161, परा मा III. p. 230, विवादचन्द्र p. 2.

The rule of *dāmdupat* has been acted upon by the courts in India in modern times[694]. Though under the Transfer of property Act before its amendment in 1929 there was a conflict of decisions, since 1929 it is settled that the rule of dāmdupat does not apply to mortgages governed by the Transfer of Property Act. But the rule is so reasonable and humane that the Deccan Agriculturists' Relief Act (XVII of 1879) has made (by sec. 13) the rule of dāmdupat applicable to all agriculturists as defined by the Act, whether Hindus or non-Hindus; and the Bombay Agricultural Debtors Relief Act (of 1939), sec. 42, the Madras Debt Conciliation Act (XI of 1936, sec. 16) do the same.

A loan has to be returned on demand if no time is fixed for repayment or on the expiry of the time (if one has been fixed by the parties) or when interest ceases on account of becoming equal to the principal (Br. in S. B. E. vol. 33 p. 328 verse 47) Interest stops when on the debtor offering to pay the loan the creditor refuses to accept it and the debtor deposits the money in the hands of a third person (Gaut. XII. 30, Yāj. II. 44). With Yāj. II. 44 section 84 of the Transfer of Property Act (IV. of 1882) may be compared. Vas. II. 49 states the remarkable rule that interest stops the moment the king dies and begins to run only after the coronation of the successor.[695] Nār. II 39

694 Vide *Balkrishna* v *Gopal* I L R 1 Bom. 73 (where it was held that the rule of dāmdupat should not be exteoded to apply to the amount recoverable in execotion of the decree of a civil court), *Nanchand* v *Bapusaheb* I L. R 3 Bom. 131 (held that the rule of dāmdupat does not apply wheo the defendant is a noo-Hiodu), *Gopal* v *Gangaram* I L. R 20 Bom. 721 F B (the rule is excluded from mortgages the terms of which oecessitate the existence of an accouot hetweeo the mortgagor aod the mortgagee in possession ahout the rents and profits), *Sundarabai* v *Jayawant* 1 Bom L.R. 551, 555 (rule applies between all Hindu debtors and creditors both in respect of simple as well as mortgage debts), *Khimji* v *Chunilal* 21 Bom. L R. 419 (by agreement interest which does oot exceed the principal may be capitalized) It is interesting to find that in aocieot Egypt the legal maximum rate of interest was thirty per cent and it was forbidden to allow interest to iocrease heyond the double of the principal Vide Wilkioson's 'Maoners and Customs of the aocient Egyptians' (First Series), 1842, vol. II p. 50. Usory was coodemned io aocieot Egypt, amoog the Jews (vide Psalm XV. 5, Ezek XVIII 8 and 17, Lev XXV. 36-37) and by the aocieot smrtis (as more heioous than even the morder of a brāhmana, H. of Dh. vol. II. p 124 n 269).

695. राजा तु मृतभावेन द्रव्यवृद्धिं विनाशयेत् । पुना राजाभिषेकेण द्रव्यमूलं च वर्धते ॥ वसिष्ठ II. 49.

(S. B. E. vol. 33 p. 33) provides that no interest runs on the price of commodities, on wages, on a deposit, on a fine, on what has been idly promised (to bards and the like) and on the stake won in gambling, unless there is a special or express agreement to pay interest.[696] Kāt. (508) has a similar verse,[697] but adds hides, crops, liquor, bride-price and suretyship debts to some of those mentioned by Nār Kaut. (III. 11) provides that no interest runs where the debtor is a person engaged in a Vedic sacrifice of long duration, or is suffering from a disease or is staying at his teacher's house (*gurukula*) for study or is a minor or is a man without any substance As regards some cases where originally a thing is lent to a person out of friendship or because he asked a loan of it, Nār. (IV. 108) and Kāt (502–505) lay down certain rules which are quoted in the Mit. (on Yāj. II. 38) and other works Nār. (IV. 108) prescribes[698] that no interest ever attaches to things loaned through friendship, unless there is an express stipulation to that effect; but even in the absence of a stipulation interest starts running after the expiry of six months. Nār. IV. 109 and Kāt. (505) both lay down that a loan (of money or an article) made through friendship cannot begin to earn interest as long as no demand is made for its return. If the debtor refuses to return it after it is demanded interest begins to run at the rate of five per cent. Kāt (502–504)[699] lays down three propositions about *yācitaka* (a temporary loan of money or of an article) · (1) When a person takes such a loan and goes to another country without

returning it, that loan begins to acquire interest after a year from the date of the loan (though no demand be made); (2) if a person after taking a loan goes to another[700] country without returning it even when pressed by the lender to return it that loan begins to acquire interest three months (after demand); (3) when the borrower of a thing does not return it even though he is pressed to return it, the king should make him pay interest from that day (i. e. day of demand), though it was not agreed upon, though he remained in the country and though he be unwilling to pay interest. The Madanaratna says that in these cases where no interest is settled beforehand and where the texts do not specify the rate (as Kāt. 505–506 do viz. what is lent through friendship, a deposit, balance of interest, unpaid purchase money, if not returned on demand, begin to carry interest at five per cent per month), the rate of interest would be the one stated by Yāj. II. 37 (viz. 1/80th per month) and Visnu VI. 4. (*akṛtāmapi vatsarātikramena yathāvṛhtām*).

Ādhi[701] means pledge of a movable or mortgage of immovable property. Nār. IV. 117 remarks[702] that in lending money an *ādhi* and surety are the two sources that inspire confidence (in the creditor that his money will be safe) and a document and witnesses are the two modes of proof that will establish (the existence of a debt). An *ādhi* is so called because the creditor is authorised to wield power over it or it is placed within his power (Nār. IV. 124 and Mit. on Yāj. II. 58)[703]. The

700. Compare Visnu Dh S. VI. 4 with the first proposition. Pānini (IV 4. 21) derives *yācitaka* (in the sense 'yācitena nirvrttam') In *Saundanappa* v. *Shivbasawa* 31 Bom. 354 Mr. Justice Chandavarkar translates (at p. 361) Nār IV. 108 and Kāt (502–504), discusses the explanations of those passages by the Mit on Yāj II 38 and holds that these incidents are even now applicable to contracts of debts by Hindu debtors and that neither the Interest Act (XXXII of 1839) nor the Indian Contract Act affects the ancient Hindu Law. It should be noted that 31 Mad 250 and 53 Mad 549 at p 579 dissent from this view.

701. For an illuminating discussion on pledges, vide Dr Sen's 'Hindu Jurisprudence' chap VI pp. 176–206

702 विश्रम्भहेतू द्वावत्र प्रतिभूराधिरेव च । लिखितं साक्षिणश्चेह प्रमाणे व्यक्तिकारके ॥ नारद IV 117.

703. आधिर्नाम गृहीतस्य द्रव्यस्योपरि विश्वासार्थमधमर्णेनोत्तमर्णोऽधिक्रियते आधीयत इत्याधिः । यथाह नारदः—अधिक्रियत इत्याधिः—इति । मिता. on या. II. 58.

word ādhi occurs in Āp. Dh. S I. 6 18. 20[704] (which includes among those who are unfit to be invited at a śrāddha 'one who subsists on ādhi'). Gaut. XII. 29 also refers to *ādhi*. Kaut (III. 12) briefly deals with *ādhi* and after stating some rules extends the principles of *upanidhi* (deposit) and debt to it. Manu VIII. 165 employs the word 'ādhamana' in the sense of 'mortgage'. According to Br.[705] (S B E. vol. 33 p. 323 verse 17) an ādhi is of four kinds viz. of movable property, of immovable property, *gopya* (to be kept in custody of the pledgee only), *bhogya* (to be enjoyed). Nār. IV. 124 first divides ādhi into two sorts, viz. one that is to be redeemed within a certain time fixed (by agreement at the time of contracting the debt) or to be retained till the debt is paid off and Nār. IV. 125 again subdivides each of these two into *gopya* and *bhogya*. This latter division was known to Gaut. XII. 32, Manu VIII. 143, Yāj II. 59, Kāt. (576). The subdivisions of ādhi are made from several points of view viz. the nature of the property, the form of the pledge, the mention or non-mention of a period and the evidence to establish it. The Mit. on Yāj. II 58 explains[706] that the first kind of ādhi mentioned in Nār. IV. 124 contains the conditions that the money will be repaid at a fixed time and that if the money be not so paid at the time fixed the thing pledged or mortgaged will belong to the creditor. Yāj. II. 58 sets out three provisions viz. (1) when a time is fixed for payment, the thing pledged or mortgaged is lost to the debtor if the time fixed is allowed to pass without there being any repayment (whether it be an ādhi that is to be merely kept or whether it is one to be enjoyed); (2) but if no time be fixed the thing given as security is not lost

704. ये च शस्त्रमाजीवन्ति । ये चाधिम् । भिषक् । वार्धुषिकः । आप. ध सू I. 6 18 19–22 हरदत्त explains आधि here 'as rent of a house,' because वार्धुषिक occurs a little later. But that sense is very rare and besides hardly any smṛtikāra has condemned the letting out of one's house for rent. It is better to take ādhi as pledge or mortgage and hold that vārdhuṣika refers only to those who lend corn in order to take 1½ times as much (or more) after the rainy season as defined by Nār IV. 110 quoted above (on p. 417).

705. आधिर्बन्धः समाख्यातः स च मोक्षश्चतुर्विधः । जङ्गम- स्थावरश्चैव गोप्यो भोग्य- स्तथैव च ॥ बृह. q. by व्यव. नि. p. 233, व्य. म. p 171; अधिक्रियत इत्याधिः स त्रिज्ञेयो द्विलक्षणः । कृतकालोपनेयश्च यावद्देयोद्यतस्तथा ॥ स पुनर्द्विविधः प्रोक्तो गोप्यो भोग्यस्तथैव च । नारद IV 124–25.

II 58.

to the debtor at all, when it is an ādhi that is to be enjoyed; (3) if no time is fixed and the ādhi is only to be kept (*gopya*) then it is lost to the debtor only if it is not redeemed even when the debt has grown to double of the principal by non-payment of the interest agreed upon. There is a period of fourteen days' grace after this, as stated by Br. (S. B. E [707] vol. 33 p 324, verses 27-28) that when the principal has been doubled or the stipulated period in the case of a pledge delivered for a certain time only has expired, the creditor becomes the owner of the pledge, after waiting for a fortnight during which the debtor may repay the debt and redeem his property. Gaut. XII. 29, Manu VIII. 143, Yāj. II. 58, Visnu Dh S. VI. 5 provide that an ādhi which is mortgaged with the condition that the fruit or profits are to be enjoyed bears no interest nor can the creditor, even after keeping such an ādhi for a long time, make a gift of it or sell it Medhātithi on Manu VII. 143 holds that a mortgagee with possession who is to enjoy the produce cannot, by virtue of the last quarter of Manu VIII. 143, make a sub-mortgage (called *anvādhi*). Kullūka on [708] the other hand says that it is common practice in all countries for a mortgagee to execute a sub-mortgage of land and the like and that Manu VIII. 143 does not forbid it. Prajāpati [709] (q. by Par. M. III. p. 242) defines a deed of sub-mortgage: 'if the creditor pledges to another the thing already pledged to him for the same amount (for which it was pledged to him) he should pass a fresh deed of pledge (or mortgage) and should hand over the former deed to his own creditor.' It appears that sub-mortgages came to be recognized rather late. Bharadvāja states that if a sub-mortgage be effected without the mortgagor's consent, the mortgagee would lose his money.

III p 242; स्वामिना चागतज्ञात आधेरार्धिं करोति चेत् । स्वधनात्स तु हीनः स्यात्करोत्यापदि पूर्ववत् ॥ भरद्वाज in स. चि. pp. 234-235.

The general rule was that an ādhi (whether of movable or immovable property) that was *bhogya* carried no interest but the profits were to be taken in lieu of interest (vide Kāt 516)[710] and the debtor would in this case get back his property on paying the principal Kaut (III 12) states[711] that immovable property mortgaged may be such that it can be enjoyed only by expending labour over it or without expending one's own labour the creditor may enjoy the fruits or income thereof But as noted by Vyāsa and Bharadvāja[712] the stipulation about a *bhogya ādhi* may be that the income from the property is to be taken as in payment of the whole interest and part of the principal This latter is called *sapratyaya-bhogyādhi* and the other variety where the income is taken in lieu of interest only is called *apratyaya-bhogyādhi* The Mit. on Yāj. II. 64 after citing a text of Brhaspati refers to these two varieties (though it does not use these terms) and adds that if the income is not sufficient to meet the interest wholly then the debtor may have to pay the principal and the unpaid part of the debt before redeeming his property. The Mit. (on Yāj. II. 64) states that the appropriate name 'ksayādhi' is given by the people to what is called (above) as *sapratyaya-bhogyādhi* Bharadvāja states that on taking an account (where there is an agreement to apply the income towards interest and reduction of the principal) if the creditor has been overpaid he is to restore the overpaid amount to the debtor and that if a portion of the principal remains unpaid the debtor has to repay it.

If a man first mortgaged his property and then sold it, the purchaser took it subject to the rights of the mortgagee (Vasiṣṭha quoted by Sm. C II. p 145) If a person executed a mortgage, a sale and a gift of the same thing on the same day, then the

710. द्रव्यं गृहीत्वा वृद्ध्यर्थं भोगयोग्यं ददाति चेत् । जङ्गम स्थावरं वापि भोग्याधिः स तु कथ्यते ॥ मूल्य तदखिल दत्त्वा स्वक्षेत्रादिकमाप्नुयात् ॥ कात्या. 516 q. by व्यव. नि p. 242, स वि p. 234, which says that this is अप्रत्ययभोग्याधि.

711. स्थावरस्तु प्रयासभोग्यः फलभोग्यो वा । कौटिल्य III. 12.

712. अत्र भोग्यो द्विविधः सप्रत्ययभोग्याधिः अप्रत्ययभोग्याधिश्चेति । तत्रर्द्धिक मूल्यापाकरणार्थौ यः स सप्रत्ययभोग्याधिरित्युच्यते । वृद्धिमात्रापकरणार्थो य. सोऽप्रत्ययभो ग्याधिरित्युच्यते । तत्र सप्रत्ययभोग्याधिमाह व्यास· । कांक्षिद्वृद्धिं समाभाद्य द्रव्यमादाय तथत· । मत्क्षेत्रं भुक्त्व वृद्ध्यर्थमधिकं मूलनाशनम् । द्रव्याधि प्रत्ययाधिः स्याद्वृद्धेर्दुग्धे निष्क्रयो भवेत् । ... अत्र भरद्वाजः । ... यत्तु तत्राधिकं वृद्धेर्दैयं तद्धनिने पुनः । हीनं यावत्तु तद्वृद्धे तावत्सम्पूरयेद्ऋणी ॥ स. वि. pp. 233–234, vide व्यव नि pp 242–243 from which S V. appears to have borrowed.

donee would take one-third of the thing and the mortgagee and purchaser would share the remaining two-thirds in proportion to the money paid by each[713]. If a person was liable to pay several debts, some secured by a pledge or mortgage and some taken on personal security, the latter were to be paid first and redemption of the mortgage was to be ordered afterwards, according to Bharadvāja (q. by Vy. Nir p. 245).

The restriction that more money should not be taken from the sub-mortgagee than what was advanced to the mortgagor was for the benefit of the latter. The Par. M. (III. p. 242) provides that a sub-mortgage can be made only when the amount due has risen to double the principal, but that if the owner consents a sub-mortgage may be made even before that contingency arises.

Kāt. (522) requires that an ādhi becomes valid when such particulars as the boundaries of the field or house and the village (in which it is situated) are specified[714]. Kāt. (518) further provides that a writing of pledge or sale or gift is superior to a similar transaction made in the presence of witnesses only. If the same field or other thing is mortgaged or pledged to two persons separately, Visnu Dh. S. V. 185[715] and Bṛ. (S. B. E. 33 p 326 verse 34) prescribe[716] that the one who got possession first (without force) is entitled to preference. This shows that under ancient Hindu Law possession was nine points of law and that hypothecation without delivery of possession was known to Kāt. and other smrti writers, even if earlier smrtis did not recognise an hypothecation without possession. Yāj. II. 60 and Nār. IV. 139 emphatically assert that a pledge or mortgage becomes perfect or effective only if there

is enjoyment and not otherwise. This is to be taken along with Yāj. II. 23 and so the first in time shall prevail only if the first is accompanied with possession If a sale or mortgage be made before witnesses to one man and in writing to another, the latter prevails over the former[717]. If a debtor were to pledge or mortgage the same thing to another after pledging it to one and without redeeming the first debt, Viṣnu Dh. S. (V. 181–182) prescribed[718] the drastic measure of corporal punishment (whipping or imprisonment) if the land mortgaged was a *gocarma* or more in extent or a fine of 16 *suvarnas* if it was less. Kāt (517) in similar circumstances made the debtor liable to the fine imposed on a thief Kāt. (519–521 q. in Sm. C. II pp 144–145 and V. P. pp. 240–241) states that in a competition between a document of pledge which does not give particulars of the thing pledged or which refers to a thing not existing at the time and a document in which the thing pledged is described with particulars or in which the thing existed at the time the deed was executed, the latter is entitled to preference; similarly the pledge of a thing specifically described is superior to a prior pledge of all the debtor's property mentioned in general terms

If an *ādhi* deteriorates[719] in value (i e. becomes inadequate to meet principal and interest) or if it be lost or destroyed though proper care be taken thereof by the creditor, then the debtor must either pledge another adequate thing (in substitution) or the debtor should return the amount due (Yāj II. 60, Kāt 524) The Mit on Yāj. II. 60 remarks that it follows from this that it is the duty of the pledgee to take proper care of the thing pledged. Br. (S B E 33 p. 323 verse 19) expressly says

719. आधीकृतं तु चल्किंचिद्विनष्टं दैवराजतः । तत्रर्णी सोदयं दाप्यो धनिनामधमर्णिक ॥ न चेद्धनिकदोषेण नियतेद्वा ह्रियेत वा । आधिमन्यं स दाप्यः स्याद्दर्शनान्मुच्येत नर्णिकः ॥ कात्या 523, 524 q. by स्मृतिच० II. pp. 137, 138, वि र p. 26–27.

that the pledge has to be kept carefully like a deposit, as otherwise interest is forfeited in case of its being damaged. If a pledge which is to be kept only is enjoyed by the creditor, then the interest stops and if it deteriorates or is lost the creditor has to restore it to its former condition or substitute another of equal value; if a pledge to be enjoyed is lost or deteriorates by use then also the interest stops; and the creditor has to restore it, otherwise he will lose his principal (Yāj II. 59 and the Mit thereon, Nār. IV. 125, 127) If a pledge is lost without any fault or negligence of the creditor, but through fate (i. e accidents like fire or flood) or the action of the king, the debtor has to furnish another pledge or to pay the amount due (Kāt. 523, Nār IV. 126, 130, Yāj. II. 59, Visnu Dh S VI 6, Gaut. XII. 39, Br., S. B E 33 p 323 verse 21). From the time of Gautama[720] (about 500 B. C) onwards the rule about the care required of a pledgee, bailee, depositee was the same viz that he is to take of another's property kept with him as much care as he would take of his own Nār. (*nikṣepa* 14) and Yāj II. 67 lay down the same rule for all kinds of bailments Manu VIII. 189 (=Nār., *nikṣepa*, verse 12) illustrates what is meant by accidental loss.

The debtor cannot redeem the pledge or mortgage before the time fixed by mutual agreement, but by mutual agreement he can redeem even before (Br. S. B. E. p 325 verses 32–33). If the creditor does not allow redemption when the debtor has a right to redeem and is ready to do so, the creditor may be liable to be fined as a thief (Yāj. II. 62). Acc. to Kaut (III. 12) the fine is 12 panas[721].

It has already been stated above (p 429) that in certain cases (i.e. when it is a *gopya ādhi*) the ownership is lost to the mortgagor (i. e. in the language of modern law there is a foreclosure), if the amount has risen to double of the money lent without payment (even after the period of grace) or if the period fixed has passed away without there being repayment (whether the

720. निक्ष्यन्वाधियाचितावक्रीताधयो नष्टा. सर्वाननिन्दितान्पुरुषापराधेन । गौ XII. 39, on which हरदत्त says. पुरुषापराधस्तु यदि धारयितारः स्वद्रव्यवन्न रक्षयेयुः, यद्यग्निभयादौ स्वद्रव्यं गृहीत्वा निक्ष्याद्युपेक्षेरन् स्वद्रव्यं वा गुप्तं निधाय बहिर्निर्ह्याद्दि स्थापयेयुः । एतस्मिन्पुरुषापराधे सति दद्युरेव ॥; दैवराजोपघातेन यदि तन्नाशमाप्नुयात् । ग्रहीतृद्रव्यसहितं तत्र दोषो न विद्यते ॥ बृह q by स्मृतिच्च II p 179, व्य म p. 192, अराजदैविकेनापि निक्षिप्तं यत्र नाशितम् । ग्रहीतुः सह भाण्डेन दातुर्नष्टं तदुच्यते । कात्या q by स्मृतिच्च II. p. 179. 721. उपरियतस्याधिमप्रयच्छतो द्वादशपणो दण्डः । अर्थशास्त्र III. 12.

amount has risen to double of that lent or not, acc. to Mit on Yāj. II. 58) But if at the time of contracting the debt the stipulation is to repay the sum lent with interest and there is no stipulation about loss of the ownership of the thing mortgaged (i. e it is like a simple mortgage of modern times), then there is no loss of ownership There is then only a power of sale in the mortgagee So also in the case of a *bhogyādhi* the mortgagor or his heirs can redeem the property at any time by paying the principal and there is no loss of ownership to the mortgagor According to Yāj II. 63 and Br.[722] (S B E vol 33 p 325 verse 29) the creditor can sell in the presence of (the debtor's relatives) and witnesses the ādhi, when the amount has grown to double of that lent or when the period fixed has passed, if the debtor has not redeemed and is absent or dead After meeting his own dues the creditor has, as said by Kāt. 529, to hand over the balance of the sale price to the king (i e probably to the court of the locality) Kaut.[723] (III. 12) provides that if the debtor is present and the creditor is afraid of the loss of his money because it may exceed the market value of the ādhi he may sell it with the permission of the judges (*dharmastha*) or he may demand a surety for assurance It appears from these passages that a sale through court and a right of private sale were both recognised in the case of mortgages in ancient India (as in modern times under sections 65 and 69 of the Transfer of Property Act).

There were two other special kinds of ādhi described in Yāj. II. 61 viz. *cāritrabandhaka*[724] and *satyaṅkāra*. The first

724 चरित्रबन्धककृतं संवृद्ध्या दापयेद्धनम्। सत्यङ्कारकृत द्रव्य द्विगुण प्रतिपादयेत्॥ या II 61, on सत्यंकारकृत the मिता. says सत्यस्य कार सत्यकार.-कारे सत्यागदस्य इति घुस्। सत्यंकारेण कृतं सत्यंकारकृतम्। Two meanings are given of चरित्रबन्धककृत and सत्यंकारकृत 'कारे सत्यागदस्य' is पाणिनि VI 3 70.

occurs either when the creditor being known to be very honest the debtor gives as security a property of very great value for a small debt or where a debtor being known to be very honest a property of very small value is accepted as security for a large debt. In such a case there is no forfeiture or foreclosure of the property in any case but the king (or judge) should award only double the principal lent Another meaning is that in a *caritrabandhaka* it is the merit (*apūrva* or *punya*) arising from bathing in the Ganges or from performance of *agnihotra* that is given as security (i. e. he will forfeit merit on non-payment). In this case the creditor will receive double and there is no loss or forfeiture of ādhi. A pledge made with *satyaṅkāra* occurs when at the time of making a pledge the stipulation is 'I am liable to pay only double but there will be no loss of the thing pledged' or (a second meaning of) satyaṅkāra is that 'when an earnest (a ring or the like) is given at the time of a sale and the vendor breaks the promise he has to pay double of the earnest'.

If the mortgagee is dead or absent abroad, and the debtor wants to redeem he may take back the ādhi after paying the amount due to the family i. e. to his sons and other agnatic relations or to his cognates and in the absence of these (if the creditor be a brāhmana) to other brāhmanas (and if no brāhmanas be available) he may cast the money into water (Yāj. II. 62 and Nār. IV. 112–113) The Kauśika-sūtra[725] (46. 36–40) contains provisions about casting the debt in the cemetery or where four roads meet if the creditor is dead and there are no heirs. The Sangraha says that it may be thrown into water with a palāśa leaf to the accompaniment of Tai S. III. 3 4 1–2 quoted above (n 671) Another alternative is that the debtor may have a valuation of the ādhi made at the time when he wants to redeem (and the creditor is absent), and allow it to remain with the creditor but without interest (and redeem it at the valuation when the creditor comes or secure the price from the creditor if the ādhi be afterwards lost or destroyed, acc. to Mit. on Yāj II. 63)

Prabhū A *prabhū* or *lagnaka* (Br. quoted in n. 681 and Kāt. 530) means 'surety'. *Prākbhāvya* (being a surety) was known to Gautama (XII 38) and *prabhū* was known to Pānini

725. उत्तमर्णे मृते तदपत्याय प्रयच्छति । सगोत्राय । श्मशाने निवपति । चतुष्पथे च । कक्षानादीपयति । कौशिकसूत्र 46 36–40.

(II. 3. 39). Suretyship requires the concurrence of three persons viz. the creditor, the borrower (called the principal debtor) and the person who agrees, for inspiring confidence in the creditor[726], to pay or indemnify if the principal debtor commits default Manu VIII. 160 speaks of surety for appearance and for repayment of debt. According to the purpose of the transaction a surety is of three kinds (Yāj. II. 53 = Visnu Dh. S VI 41 and Nār. IV. 118) viz for appearance, for payment and for honesty The first undertakes to produce a person before a court and assures the court that the person concerned will not abscond from the country; the surety for payment agrees that in case the debtor does not pay the principal and interest, he will himself pay both; the surety for honesty assures the employer or other person with whom another man deals that the latter is an honest and good man, that he would not deceive and that reliance may be placed on him (vide Mit. on Yāj II 53 and Sm. C II. p 148 for these explanations). Br (S. B. E [727] vol. 33 p. 327 verses 39-40) speaks of four (including the three of Yāj II. 53), his fourth being one who promises to deliver or restore the assets that are with the debtor (such as household furniture or ornaments). Yāj. and Nār. must be deemed to include this last under the surety for payment. Kāt. (530)[728] says that a surety (*lagnaka*) may be caused to be given for repayment (of a debt), for appearance (*upasthāna*), in lawsuits, for honesty and for taking oaths (or ordeals). Acc. to Hārita a surety is taken for five purposes viz. for keeping the peace (*abhaya*),

Code and Cr. Pro. Code, chap. VIII, sec 426, 499 &c in criminal matters.

for honesty, for repayment of debt, for delivering the debtor's property to the creditor, for appearance V. P. p 248 quotes Vyāsa (who mentions seven kinds of sureties) and remarks that all can ultimately be reduced to three varieties.

If the surety for appearance cannot produce the person at the time and place agreed upon, he should in that case pay to the creditor what he has bound himself to pay except where the debtor is prevented from appearing by act of God or of the king. But a period of a fortnight, a month or three fortnights at the most should be allowed to the surety to find out the absconding person[729]. If he can produce him within that time the surety would be free from liability (Kāt 531, 532, Br. in S. B E vol 33 p. 327 verse 42). If the surety for appearance cannot (even after time is given) produce the debtor or the debtor dies then the surety has to pay from his own pocket the money due from the debtor (Manu VIII. 158 and Kāt. 532–33). All this is subject to the proviso of the act of God or of the king.

Sureties of all kinds are personally liable to make good the loss arising from the non-appearance of the debtor, or from his dishonesty or non-payment (Yāj. II. 53, Visnu VI. 41, Br. in S B. E 33 p. 327 v. 41); but the sons of the surety for appearance or honesty were not liable, if the surety died[730]. Yet if the surety for appearance or honesty stood surety only after taking some security from the debtor for so doing, then even the son would be liable to reimburse from such security the person losing. The liability of sons and grandsons for the suretyship debt of the father or grandfather will be discussed a little later on. If there are several sureties, then each will have to pay a proportionate part of the debt; but if each of the sureties has undertaken the whole liability of the debtor (i e. if the liability of all is joint and several) then the creditor may at his will recover the whole debt from any one of the several sureties

729. नष्टस्यान्वेषणे कालं दद्यात्प्रतिभुवे धनी। देशाद्धरूपतः पक्षं मासं सार्धमथापि वा॥ बृह ; नष्टस्यान्वेषणार्थं तु देयं पक्षत्रयं परम्। यद्यसौ दर्शयेत्तत्र मोक्तव्यः प्रतिभूर्भवेत्। काले प्रतीते प्रतिभूर्यदि तं नैव दर्शयेत्। स तमर्थं प्रदाप्यः स्याल्लेते चैव विधिः स्मृतः॥ कात्या ; both q by स्मृतिच. II. p 149, व्य म. p 249, मिता on या II. 57.

730. आद्यौ तु वितथे दाप्यौ तत्कालावेदितं धनम्। उत्तरौ तु विसंवादे तौ विना तत्सुतौ तथा॥ बृह. q by स्मृतिच. II p. 150, व्य म p 250; गृहीत्वा बन्धकं यत्र दर्शनेऽस्य स्थितो भवेत्। विना पित्रा धनात्तस्माद्दाप्य स्यात्तद्धनं सुतः॥ कात्या. 534 q by मिता on या II 54, अपरार्क p. 656, व्य म p. 251.

(Yāj II 55, Nār. IV. 120) Kāt 538 states[731] a special rule that whichever out of several sureties that have incurred joint and several liability is found present at the place (of the agreement) should be made to pay the debt, if such a surety has gone abroad his son may be made to pay the whole, but if the surety be dead the son should be made to pay only the share of his father (there being several sureties) If a surety being pressed or harassed by a creditor pays openly (before all people) the debt (wholly or in part)[732] then the debtor will be made to pay after three fortnights double of what the surety has to pay (Yāj II. 56, Nār. IV. 121, Viṣnu Dh S. VI. 44, Kāt 539) But if the surety pays without being pressed he would get only what he paid and if the debtor reimburses the surety without loss of time then he has not to pay double These rules apply to money lent, but in the case of grain, clothes and liquids the debtor must pay to the surety three, four or eight times respectively (Yāj II 57) Who could not be accepted as sureties has already been stated (on pp. 291–292).

Several were the modes of the recovery of debts Manu (VIII. 47–48) requires the king to make the debtor repay his debt to the creditor in whatever way he can do it There is a difference in the modes of recovery according as the liability is admitted by the debtor or not. If liability is denied then the only method is to file a suit for the recovery of the debt. But if the liability is admitted by the debtor, then Manu VIII 49 (=Nār IV 122), and Br (S B E vol 33 p 329 v. 54) mention five means of recovery viz *dharma* (persuasion), *nyayahāra* (legal proceeding), *chala* or *upadhi* (trick), *carita* (sitting down at his door) or *bala* (compulsion to do work or confinement) It appears from Āp Dh S (I. 6 19 1) that the method of sitting at the door for recovery of debts was known to Āp (the creditor so doing is designated *pratyupavista*). In a Marwad Inscription

731. बहवश्चेत्प्रतिभुवो दृश्यस्तेऽर्थं यथाकृतम्। अर्थेऽविशेषिते ह्येषु धनिनश्छन्दत: क्रिया। नारद IV. 120, विष्णु VI 42, एकच्छायामविष्टाना दाप्यो यस्तत्र दृश्यते। मोचिते तत्सुत सर्वे पित्रंशं तु सूते समम्॥ कात्या 538, q by मिता on या II 55, व्य म p 251 एकच्छायाश्रित or एकच्छायामविष्ट is a technical expression meaning the same as 'undertaking joint and several liability' and is explained by the मिता as 'एकस्याधमर्णस्य छाया सादृश्यं तामाश्रिता एकच्छायाश्रिता अधमर्णा यथा कृत्स्नद्रव्यदानाय स्थितस्तथा दाने प्रतिभुवोऽपि प्रत्येकं कृत्स्नद्रव्यदानाय स्थिता:'.

732 प्रतिभाव्यं च यो दृष्ट्वात्पीडित. प्रतिभावित। त्रिपक्षात्परत: सोऽर्थं द्विगुणं दण्डमर्हति॥ कात्या 539, q by अपरार्क p 657, परा मा III p 252, वि र p 45, व्य म p 253 ascribes it to both कात्यायन and बृहस्पति

dated *saṁvat* 1198 (1141–42 A. D.) this practice is called *kāya-vrata* (*yadi brāhmaṇaḥ kāyavrataṁ kṛtvā mriyate*). Vide E. I. vol. XI p. 37 at p 40 These modes of recovery except vyavahāra are explained by Bṛhaspati as follows:[733] The method of dharma consists in sending messages (to the debtor) from his friends and relatives, in persuading him to pay with sweet words, by following the debtor (i. e. by persistent dunning) and by frequent requests. Trick consists in the creditor borrowing from the debtor some ornament or other article under the pretext of its being required in a festival and not returning it or in retaining what the debtor has handed over to the creditor for being delivered to another, that is compulsion when the debtor is brought to the creditor's house, is then confined or beaten and thus induced to repay the debt; that is *āvaruta* where the creditor keeps tied his own wife or son or cattle at the debtor s house or sits down at his door (fasting) All these methods could not be employed in the case of all debtors Kāt. (477–480) has already been cited (on p. 383) to show how the king is to employ the various methods in the case of brāhmaṇas, traders &c. If the creditor employs any one of the methods (other than vyavahāra) and harasses a debtor when the latter claims judicial investigation and there is a doubt or dispute between the two as to the amount, the rate of interest, the liability to pay, the creditor would lose his claim and would have to pay a fine equal (to the claim)[734] Kāt 589 and Br[735] (S. B E vol 33, p. 331 verses 63–65) lay this down But when the debtor admits his liability and yet does not pay and when the creditor therefore employs one of the means (other than a suit) appropriate to the caste and position of the debtor, then, if the debtor complains to the king

against the creditor, the debtor would be compelled by the king to pay the debt and a fine for unnecessary complaint (Yāj II 40, Manu VIII. 176, Viṣnu Dh S VI 19) Kāt (580–584) provides that where[736] it is the custom of the country, the creditor may hold the debtor in restraint openly before an assembly of people until he pays what is due, that when a man so restrained has an inclination to answer calls of nature, he should be followed behind by the creditor or he should be allowed to go alone but fettered, that he should be allowed to go home for his meals and at night if he furnishes a surety, and that the surety will have to remain in restraint (while the debtor is absent), that if the debtor cannot secure a surety or does not accept the proposal of furnishing one he should be confined in jail or should be kept guarded by men, but that a respectable man who is trust-worthy and pure in conduct should not be put in jail, that he should be allowed to go without fetters or after being bound by an oath. Manu VIII 177, Yāj II. 43, Nar. IV 131 lay down that if a debtor is unable to pay a debt then he should be made to do work suitable to his caste in the house of his creditor of the same or higher caste in order to gradually liquidate the debt (but without detriment to his own family) and a brāhmana debtor should be made to pay by easy instalments[737]. Kaut. III. 11 provides[738] that agriculturists and king's servants should not be seized (for debts) at the time when it is the season for them to work, nor a woman for her husband's debt unless she has promised to repay her

husband's debt, but wives of cowherds and those who take a lease of lands for half produce may be arrested for non-payment by the husband. As compared with the harsh legislation against debtors in most ancient and medieval systems of jurisprudence the rules laid down by the smrtis are very mild and humane[739]. If there were several creditors there was priority among them i. e. the earlier debt prevailed over the later one; a brāhmana creditor however (whatever the date of his advance) was preferred to a ksatriya or other creditor (Yāj II. 41, Kāt. 514). Kaut[740] states that the debts owed to the Crown and a śrotriya take precedence over other debts and that unless the debtor is going to abscond several creditors should not simultaneously proceed against one debtor. Section 56 of the Bombay Land Revenue Code makes Government assessment a paramount charge on the land. But acc. to Kāt. (513) if several debts were contracted in writing on the same date, they should all be treated as equal and paid off *pro rata* from the debtor's assets if insufficient; but, if a creditor established that a particular article belonging to a debtor was manufactured by the debtor with his money only, that creditor alone got the money recovered by sale of the article (Kāt. 515). Bharadvāja states[741] that if a debtor has no cash then the creditor should be paid by sale of the debtor's other property in order viz. grain, gold, iron, cattle, clothes, land, slaves, and conveyances, (in the absence of fields) his garden and lastly his house and in the absence of even a house time should be granted to debtors of the three higher castes.

---

739. Under the law of the Twelve Tables in Rome a creditor could put the debtor to death or sell him to a stranger beyond the Tiber or, if there were several creditors, they could divide the body of the debtor among themselves after the third market day (Table III in Ortolan's Roman Law p 106). Vide Sen's 'Hindu Jurisprudence' pp 316-17 for later Roman and Irish rules

740. नानर्णसमवाये तु नैकं द्वौ युगपदभिवदेयातामन्यत्र प्रतिष्ठमानात् । तत्रापि गृहीतानुपूर्व्या । राजश्रोत्रियद्रव्यं वा पूर्वं प्रतिपादयेत् । कौटिल्य III. 11, नानर्णसमवाये तु यत्पूर्वकृतं भवेत् । तत्तदेवाग्रतो देयं राज्ञः स्याच्छ्रोत्रियादृते । कात्या. q. by स्मृतिच. II p. 167, स वि p. 255.

741. ऋणिकस्य धनाभावे देयोन्योर्थस्तु तत्क्रमात् । धान्यं हिरण्यं लोहं वा गोमहिष्यादिकं तथा ॥ वस्त्रं भूर्दासवर्गं च वाहनादि यथाक्रमम् । धनिकस्य तु विक्रीय प्रदेयमनुपूर्वशः । क्षेत्राभावे तथारामस्तस्याभावे गृहक्रय. । द्विजातीना गृहाभावे कालहारो विधीयते ॥ भरद्वाज q. by व्यव नि. p 254, परा मा III. 259, व्यवहारसार p. 116. In view of this passage the remark of Mr. Golap Chandra Sarkar in his 'Hindu Law' (7th ed. of 1933) p 432 'Hindu Law nowhere contemplates a compulsory sale of immovable property in execution of decrees' seems hardly correct.

When a debtor was not able to return the entire debt in a lump, he should write on the back of the document of debt the sums paid by him from time to time or the creditor may pass a receipt (*upagata* or *praveśapatra*, as the Mit designates it) to the debtor signed by himself (Yāj II 93, Nār IV. 114, Visnu Dh S VI. 26). If the creditor, though requested by the debtor, would not pass a receipt he was to lose the balance of his debt (Nār. IV. 114) Nār. IV 115 and Br (S B E vol 33 p 332 verse 66) further provide that if the creditor does not write down (either on the bond itself or in a separate document) the money recovered by *dharma* or some other method then the debtor himself will be entitled to interest on the amount paid by him [741a] When the whole debt is paid off, the creditor should tear off the bond of debt or he may execute another document in order to show that the debtor is freed from the debt (if the original is lost or is not within easy reach) and when a debt is borrowed in the presence of witnesses, it should be returned in the presence of the same or other witnesses (Yāj II. 94, Visnu Dh S. VI. 24–25) Nār IV 116 requires the creditor to return the document when the whole debt is paid off or to announce openly to others that it has been paid [742]

It has now to be seen who (other the man himself) are liable to pay a man's debt The liability to pay another's debt may arise on three grounds, (1) religious, (2) equitable and moral, (3) legal, such as agency (express or implied) or authority. That the sons and grandsons of the original debtor are liable to pay on religious grounds the debt of the father is expressly stated by numerous writers such as Kaut [743] III. 11, Yāj. II 50, Nār. IV. 4, Br. (S. B. E vol 33 p. 328 verse 49), Kāt (560), Vrddha-Hārita VII. 250–51, Visnu Dh. S VI. 27.

The important question is whether the smrtis declare the liability of the great-grandson. It is clear that smrtis like that of Br. expressly say that the great-grandson is not liable to pay his great-grandfather's debt. The Visnu Dh. S. VI. 28 says that the descendants beyond the grandson need not pay if they are unwilling to pay Others like Nār IV. 4 and Kāt. say that the obligation to return a debt ceases from the fourth. The question is what is meant by the fourth i. e. is it meant to exclude, in calculating, the original debtor or to include him ? It is possible to hold (particularly because the great-grandson is not expressly mentioned in most smrtis) that the fourth means 'inclusive of the original debtor'. But this appears to be in conflict with the rule in Manu IX. 137 (which is the same as Baud Dh. S. II 9. 6, Vas. 17. 5, Visnu Dh. S. 15. 46) that the son, grandson, and great-grandson confer the greatest spiritual benefit on the ancestor, the rule (Manu IX. 186, Nār. IV. 6) that *piṇḍas* (in *śrāddha*) are to be offered by three persons in descent and the general rule that whoever takes the inheritance must offer the pinda and pay the debts of the ancestor (Gaut. XII. 37, Yāj. II. 51, Nār. IV. 23, Visnu Dh. S XV. 40 and VI. 29). Therefore, following the canons, viz. the rights to property are co-extensive with the liability to perform śrāddha and to pay off debts (which is quite logical and reasonable), that the texts relating to the same subject matter must be harmonized and reconciled as far as it is reasonably possible[744] to do (*ekavākyatā-nyāya*), that apparently conflicting texts are to be assigned their appropriate spheres (*viṣayavyavasthā*), and that a direct conflict (and so an option) is to be presumed only if no other recourse is open, the Mitāksarā and other commentators put forward the interpretation that the texts stating that the great-grandson is not liable to pay the great-grandfather's debt apply only to cases where the great-grandson inherits no ancestral property, but that he *is liable* if he takes ancestral property. Dr. Jolly in his note on Nār. IV. 6 (in S. B E. vol. 33 p 44) remarks: "the doctrine, viz. the liability to pay debts contracted

---

744 This principle is stated by the मिता on या I 4–5 as 'एतेषां (मन्वादीनां) प्रत्येकं मामाप्येषि साकाङ्क्षाणामाकाङ्क्षापरिपूरणमन्यत. क्रियते विरोधे विकल्पः ।.' मेधातिथि on मनु XI. 216 puts it in the same way 'एकशास्त्रत्वात्सर्वस्मृतीनामसति विरोधे समग्र योज्यं विरोधे तु विकल्पः'. This view is based on जैमिनि II. 1 46 अर्थैकत्वादेकं वाक्यं साकाङ्क्ष चेद्विभागे स्यात्. The word एकवाक्यता occurs in Vedāntasūtra III. 4. 24. In *Vithal v. Prahlad* 39 Bom 373 at p. 379 this principle has been judicially recognized

by an ancestor extends to the great-grandson, is opposed to the teaching of such an eminent authority as *Vijñāneśvara, who maintains in the Mitāksarā that the great-grandson*[745] *is not liable for debts contracted by his great-grandfather*, and conversely that he does not inherit his property' He makes similar remarks in his Tagore Law Lectures for 1885 (on 'adoption, partition' &c. p. 171). Dr. Jolly is under some misapprehension since the Mit. in two places deals with this matter and expressly states that the great-grandson is liable to pay debts contracted by his great-grandfather if he has taken ancestral estate but not otherwise. The following propositions are deducible from the smrti texts and authoritative commentaries like the Mit and the Vīramitrodaya (Vyavahāraprakāśa). The[746] first proposition is that the debts of a man must be paid by his three descendants (son, grandson and great-grandson) if they have ancestral estate in their hands (Mit on Yāj II. 51 quoted in note 745, Sm. C II. p 171, V. P. p. 264). The 2nd proposition is that even when no ancestral estate was taken by the descendants the son was liable to pay his father's debts with interest, the grandson was liable to pay his grandfather's debt but without interest and the great-grandson was not liable to pay even the principal, if he was unwilling to pay. This proposition is enunciated by Visnu Dh S VI. 27–28, Br. (S. B. E. vol. 33 p. 328

---

745. On ऋणमात्मीय &c. of बृहस्पति referred to above the मिता (on या II 50) remarks, 'सम यावद्गृहीतं तावदेव देय न वृद्धिः । तत्तुतस्य अपौत्रस्य अदेयमगृहीतधनस्य । एतच्चोत्तरश्लोके स्पष्टयिष्यते' On the words पुत्रहीनस्य रिक्थिनः (on या II. 51) the मिता explains इत्येतदपि पुत्रपौत्रहीनस्य प्रपौत्रादयो यदि रिक्थं गृह्णन्ति तदा ऋणं दाप्याः नान्यथेत्येवमर्थम् । पुत्रपौत्रौ च रिक्थग्रहणाभावेपि दाप्यावित्युक्तम्।'. Dr Jolly probably misunderstood 'अगृहीतधनस्य' and held it to mean 'that a great-grandson does not take the ancestral estate', but it really means 'if he has not taken &c' The स्मृतिच. II. p 171 says, 'एव च अपितामहादिकृतर्णापकरणानधिकारो चतुर्थादेरगृहीतरिक्थस्यैव न पुनर्गृहीतरिक्थस्येत्यवगन्तव्यम् । .. गृहीतरिक्थाना तु पौत्राणामधिकारो वृद्धिसाहितऋणापाकरणे। देय पैतामह सममित्यस्यागृहीतरिक्थविषयत्वात्।'

746 The first proposition is followed by modern decisions in British India Vide *Lachman Das v Khunnu* 19 All. 26 (F. B) which holds that the mortgagee of a man who had mortgaged joint ancestral property can enforce his mortgage against the grandson of the mortgagor for the realization of *interest* as well as principal, *Ladu Narain v. Gobardhan* 4 Patna 478, *Masit Ullah v. Damodar Prasad* 48 All. 518 (P. C) where the Privy Council held that the great-grandson is liable for the debts of his great-grandfather as much as he is liable for those of his father or grandfather In all these cases passages from the smrtis of Yāj , Nār. and Br and from the Mit. and the Vīramitrodaya are quoted and discussed.

v. 49 referred to on p. 443) and Kāt. 556[747]. In *Narasimharav v. Antaji* 2 Bom. H. C R. 61 it was held (probably following Brhaspati, though not quoted in the judgment) that the grandson was liable to pay the debt of his grandfather without interest even if there was no ancestral estate. This was felt to be a great hardship on heirs (taking no ancestral estate) and in order to remove it Bombay Act VII of 1866 (the Hindu Heirs' Relief Act) was passed whereby it is provided that a son or grandson is not liable to be sued for the debts of his deceased ancestor merely by reason of his being such a son or grandson and that the son, grandson or other heir shall be liable only to the extent of the assets that come to his hands. The same is the law laid down in other parts of India by judicial decisions. Br. (S B. E. vol. 33 p. 328 verse 48) recommends that the father's debt must be paid first of all and after that one's own debt; but a debt of the grandfather must always be paid even before the preceding[748] two kinds of debt. These two propositions of Hindu jurists are very lucidly, but succinctly, set forth by the Vīramitrodaya quoted below[749]. The third proposition (which is an exception to the above two) is that even a son is not liable to pay certain illegal and immoral debts of his father This proposition will be discussed a little further on A fourth proposition is that even when the father is not dead, the son, grandson or great-grandson may be liable to pay the father's or other ancestor's debt under certain circumstances. Yāj. II. 50 provides that sons (and grandsons) must pay the debt of the father when he is dead or has gone to a distant country or is afflicted with an incurable disease. Nār.[750] IV. 14, Visnu VI. 27, Kāt.

747. पैतामहं तु यत्पुत्रैर्न दृत्तं रोगिभिः स्थितैः । तस्माद्वेवंविधं पौत्रैर्देयं पैतामहं समम् ॥ कात्या 556 q. by स्मृतिच. II. p 170 and वि र p 48.

750. धनग्राहिणि प्रेते भग्नजिते द्विदशसमाः प्रवासिते वा तत्पुत्रपौत्रैर्धनं देयम् । विष्णु. VI. 27, विद्यमानेपि रोगार्ते स्वदेशात्प्रोषितेपि वा । विंशात्संवत्सरादेयमृणं पितृकृतं सुतै ॥ व्याधितोन्मत्तवृद्धानां तथा दीर्घप्रवासिनाम् । ऋणमेवंविध पुत्राञ् जीवतामपि दापयेत् ॥ सांनिध्येपि पितुः पुत्रैर्ऋणं देयं विभावितम् । जात्यन्धपतितोन्मत्तक्षयश्चित्रादिरोगिणः ॥ कात्या० 548-550 q by अपरार्क p 650, वि. र pp 50-51, परा मा III 264, स्मृतिच II. p. 169. व्यव नि pp. 255-56 Some of these ascribe the last to बृहस्पति The first and third verses of Kāt are quoted in *Peda Venkanna v. Srcenivasa* 41 Mad. 136 at p 149. The व्यव. नि. (p 256) remarks that these texts indicate that during the father's lifetime only the sons are liable for the father's debts and not the grandsons, but if no sons are alive then even grandsons will be liable.

548-550 state that when the father, though living and near, becomes an ascetic (acc. to Visnu), is afflicted with such diseases or calamities as blindness from birth or loss of caste (due to grave sins), lunacy, tuberculosis, leprosy and other (incurable) diseases or when he has left his country or has gone on a long journey or is very old (above 80) the son will have to pay the debt of the father after the twentieth year (from his going abroad). Acc. to V. R. (p 50) if the father's disease was incurable or if it was certain that he would not return from his journey then the son was bound to pay at once and was not entitled to wait for 20 years Kāt (552-553) introduces [751] a further restriction that even when the father is dead, if the son has not attained years of discretion (i e. if he is a minor) he need not pay the debt of his father during his minority; but when the proper time to pay arrives he must pay the debt, otherwise the (ancestors) may remain in hell. Thus the son's liability during the father's lifetime or absence was not absolute but limited according to the smrtis and digests; judicial decisions, however, have brushed all this aside and the son's liability to pay his father's debts during the latter's lifetime is now as absolute as after his death. This will be discussed further on.

According to all smrti writers even the son, though he may have taken the ancestral estate, is not liable to pay certain debts of the father which are compendiously described as 'illegal or immoral' in the decisions of courts. Gaut, [752] XII.

38, Kaut. III. 16, Manu VIII. 159-160, Vas 16. 31, Yāj. II. 47 and 54, Nār. IV. 10, Br. (S. B. E. vol. 33 p 329 verse 51), Kāt. (564-565), Uśanas and Vyāsa provide that the son is not bound to pay the following debts of his father viz. those incurred as a surety (for honesty or appearance), for drinking or in gambling, those arising from idle promises (to bards, wrestlers and the like), debts for promises made under the influence of wrath or illicit love to women, the balance of a fine or toll and those that are not *vyāvahārika*. A debt arising from wrath is explained by Kāt as one where the father causes physical injury to another or destroys another's property through anger and then promises something to pacify the person wronged. As regards the suretyship debts of the father, Yāj. II. 54, Vyāsa and Kāt. (561) provide that when the father was a surety for payment, then the son was bound to pay the principal of the debt for which the father stood surety, but the son of the son was not liable at all to pay the suretyship debt of his grandfather even when the latter was a surety for payment[753]. These verses about the debts which the son was not bound to pay have been quoted and explained in numerous decisions of the courts. But as this work does not profess to be a treatise on modern Hindu Law those cases are passed over here. What is meant by 'debts that are not vyāvahārika' has presented the greatest difficulty to the medieval commentaries and digests and also to modern courts as noted below[754]. Kāt. 534 further notes that

753 ऋणं पैतामहं पौत्राः प्रतिभाव्यागतं सुतः । समं दद्युरसत्सूनुना तु न दाप्यावितिनिश्चयः ॥ व्यास q by the मिता on या II 54; प्रतिभाव्यागतं पौत्रैर्दातव्यं न तु तत्कश्चित् । पुत्रेणापि समं देयमृणं सर्वत्र पैतृकम् ॥ कात्या q by अपरार्क p 656, वि र p. 44.

754. यच्च न व्यावहारिकं न देयमित्यर्थः । अपरार्क p 658, 'सौरिकम्' स्मृतिच II p. 170; न व्यावहारिकं सुरापानादिनिमित्तम् । व्य. प्र p. 265: न कुटुम्बोपयोगीत्यर्थः । बालम्भट्टी; व्यवहारबहिष्कृतम् । वि चि p 17. Colebrooke translates न व्यावहारिकं as 'debt for a cause repugnant to good morals'; other renderings are 'which as a decent and respectable man the father ought not to have incurred' (32 Bom. 348 at p. 351); 'not lawful, usual or customary' (39 Cal. p 862 at pp. 868-869), 'not supportable as valid by legal arguments and on which no right could be established in a court of justice in the creditor's favour' (37 Mad, 458 at p 460); vide *Bai Mani v Usafali* 33 Bom. L. R 130 (at p 133) and *Bai v. Maneklal* 56 Bom 36 where the various meanings of 'avyāvahārika' and the conflict of judicial decisions are set out (at pp 50-53) In the latter case the wide meaning of the words given in 32 Bom 348 has been disapproved of (at p 53) In *Govindprasad v. Raghunathprasad* I. L. R. (1939) Bom. 533 a Full Bench has dealt with the meaning of 'avyāvahārika'. In *Hemraj v. Khemchand* 1 L R. (1943) All. 727 the Privy Council state the various renderings of avyāvahārika given by different authors and judges and hold that Colebrooke's rendering makes the nearest approach to the real meaning of the word as used in the smṛtis and that it is the character of the debt that is to be looked to and not the actions of the father.

where the father became a surety for appearance (or honesty) after receiving a pledge from the person whose surety he became, then the son of the surety may be made to pay the money due from that pledge in case the father is dead or has gone abroad[755].

The case law on the subject of the father's debts and the son's liability to pay them has assumed enormous proportions. This is not the place to discuss the case-law. But as the courts in India profess to follow the Hindu Law of the sages and medieval digests, it is necessary to examine some of the principles laid down by the latest decision of the Privy Council. In *Brij Narain* v. *Mangla Prasad* 51 I. A. 129 (=46 All. 95) the following five propositions are laid down by the Privy Council (at p 139): (1) the managing member of a joint undivided estate cannot alienate or burden the estate *qua* manager except for purposes of necessity; (2) if he is the father and the other members are the sons, he may, by incurring debt, so long as it is not for an immoral purpose, lay the estate open to be taken in execution proceeding upon a decree for payment of that debt; (3) if he purports to burden the estate by mortgage then, unless that mortgage is to discharge an antecedent debt, it would not bind the estate; (4) antecedent debt means antecedent in fact as well as in time, that is to say, that the debt must be truly independent and not part of the transaction impeached; (5) there is no rule that this result is affected by the question whether the father, who contracted the debt or burdened the estate, is alive or dead. It

755. गृहीत्वा बन्धकं यत्र दर्शनस्य स्थितो भवेत् । विना पित्रा धनं तस्माद् दाप्य स्यात्तद्दर्शनं श्रुतं ॥ कात्या 534, q. by the Mit. on Yāj II 54, अपरार्क p 656. Vide *Choudhuri Govind Chandra* v *Hayagriba* 10 Patna 94, where it was held that when a father stood surety for the honesty or good behaviour of another as guardian for a minor's property, the son was not bound to pay the suretyship debt of the father. In *Kottapalli* v *Kanuparti* 58 Mad 375, where the father executed a surety bond that a certain judgment debtor would file an insolvency petition within a specified period and the debtor failed to do so, it was held that the guarantee was one for confidence or honesty and that the sons were not liable on the father's death Similarly in *Dhir Narain* v *Shiva Sahay* A. I R. 1935 Patna 127 it was held that sons are not liable under Hindu Law where the father stood surety for appearance only In *Narayan* v *Venkatacharya* 6 Bom L. R 434 it was held that under the law of the Mitāksarā a grandson is not liable to pay a debt which his grandfather contracted as a surety unless the latter in accepting the liability of a surety received some consideration for it.

is necessary to see how far these principles agree with or deviate from the law of the *smṛtis* and the digests. The first proposition is in consonance with the law of the smrtis and of the commentaries like the Mit. Yāj. II. 45 provides[756] that whatever debt is contracted by the head of the joint family for the necessities of the family has to be paid by the members who take the ancestral estate when the head is dead or goes to a foreign country. The Mit. on Yāj II. 114 quotes and explains a smrti text, " Even one (the head or manager of a joint family) can make a mortgage, sale or gift of immovable property in a time of distress, for the necessities of the family and particularly for religious and charitable purposes.". What is meant by 'debts in times of distress' and 'kuṭumbārthe' is explained by Kāt (,542–43) quoted in n. 756. This has been the foundation of numerous cases, the first and the most important of which is that of *Hunoomanpersaud* v. *Mussumat Babooee*[757] 6 Moore's Indian Appeals p. 393 (P. C.). The 2nd proposition laid down

---

756 अविभक्तैः कुटुम्बार्थे यद्दत्तं तु कृतं भवेत् । दद्युस्तद्विभक्तिनः प्रेते प्रोषिते वा कुटुम्बिनि ॥ या II 45, कुटुम्बार्थमशक्तेन गृहीतं व्याधितेन वा । उपप्लवनिमित्तं च विद्यादापत्कृते तु तत् ॥ कन्यावैवाहिकं चैव प्रेतकार्यं च यत्कृतम् । एतत्सर्वं प्रदातव्यं कुटुम्बेन कृतं प्रभोः ॥ कात्या q by अपरार्क p. 647, परा मा III p 268 Nār. IV. 3, Manu VIII 166, Visnu Dh S. VI. 39 contain similar provisions, all of them employing the word कुटुम्बार्थे (for the purposes or benefit of the family).

757. At pp 423 and 424 of 6 Moore's Indian Appeals the Privy Council employ the following words that have become classical: 'The power of the manager for an infant heir to charge an estate not his own is under the Hindu Law a limited and qualified power. It can only be exercised rightly in a case of need or for the benefit of the estate. The actual pressure on the estate, the danger to be averted or the benefit to be conferred upon it in the particular instance, is the thing to be regarded....They think that if the lender does inquire and acts honestly, the real existence of an alleged sufficient and reasonably credited necessity is not a condition precedent to the validity of his charge and they do not think that under such circumstances, he is bound to see to the *application* of the money'. The words 'the actual pressure, the benefit to be conferred' and the remarks about inquiry by the lender are a prolific source of litigation and have given rise to a mass of case law In L.R 5I I A 129 at p. 137 the Privy Council themselves say that the distinction made between secured and unsecured debts of the father is anomalous They give an instance 'A father who is manager borrows a like sum from A and B. To A he gives a mortgage on the family estate containing a personal covenant. To B he gives a simple acknowledgment of loan B sues and gets a decree, on this decree execution can follow and the estate can be taken. A, suing on his mortgage, cannot recover' (because the debt was not antecedent).

above also follows from several smrtis (such as Yāj. II. 5[illegible] Visnu Dh S. VI. 35, Nār. IV. 2, 4, 6) and the rules abou immoral debts cited above. But it is difficult to understand why the Privy Council make a distinction between a simple personal money debt of the father and a debt secured by mortgage (as in propositions 2 and 3). The ancient texts and commentaries make no such distinction. Vide 42 Mad 711 at p. 731, 26 Bom. 206 at pp. 217–219 (F. B.) and 60 Bom. 311 (F. B., where this is pointed out. With the greatest respect it must be said that the distinction is not only without dharmaśāstra authority, but is also anomalous. The distinction between 'antecedent debt' and a debt contracted at the time of executing a mortgage is unknown to the smrtis or digests. The Privy Council had used for the first time in a very early case (viz. *Suraj Bunsi* v. *Sheo Proshad* 6 I. A. 88 at p. 106 = 5 Cal. 148, 171) the words 'antecedent debt'[758] for which there is nothing corresponding in the Sanskrit authorities and round which elaborate arguments came to be centred in numerous later cases. According to the Privy Council (proposition 5) the son's pious duty to pay his father's debt is as absolute during the father's lifetime as after his death. It has been shown above that the duty was not absolute but qualified and limited during the father's life according to the smrtis.

Yāj. II. 52, Kaut. (III. 11) provide[759] that husband and wife, father and son and brothers cannot, as long as they are undivided, stand sureties for each other or be debtors and creditors of each other or be witnesses for each other. The Mit. has a long note on Yāj. II. 52. It shows that a wife may be divided as to estate from the husband if the latter desires (as laid down in Yāj. II. 114) and that in that case there may be the relation of debtor and creditor between them.

---

758 The proposition laid down in 6 I. A. at p. 106 is 'where joint ancestral property has passed out of a joint family, either under a conveyance executed by a father in consideration of *an antecedent debt* or in order to raise money for an *antecedent* debt or under a sale in execution of a decree for the father's debt, his sons, by reason of their duty to pay their father's debts, cannot recover that property, unless they show that the debts were contracted for immoral purposes and that the purchasers had notice that they were so contracted'.

759. भ्रातॄणामथ दम्पत्योः पितुः पुत्रस्य चैव हि । प्रातिभाव्यमृणं साक्ष्यमविभक्ते न हि स्मृतम् । या II 52, दम्पत्योः पितापुत्रयोः भ्रातॄणां चाविभक्तानां परस्परकृतमृणसाक्ष्यम् कौटिल्य III. 11.

The Mit. further explains the sūtras of Āpastamba[760] (Āp. Dh. S. II. 6. 14. 16–19) which lay down 'there can be no division between husband and wife, for since the day of marriage they have to perform religious rites together, they also participate together in the rewards of merit arising from religious rites and also in the wealth acquired; for this reason when the husband has gone abroad if the wife spends on necessary occasions (out of the family wealth) it is not declared to be theft'. The Mit. explains that the absence of division between husband and wife is restricted to religious rites performed with *śrauta* fires or *smārta* fire and in the rewards of meritorious acts and not in all actions or as to all property. Therefore in other charities where no sacred fire is required (*pūrta* acts such as constructing a well or a public park) they have separate rights. Vide S. V. pp. 353 for various explanations of Bhāruchi and others on Āp. Dh. S. and V. P. pp. 255–56.

The father is not bound to pay his son's personal debt; the husband is not liable to pay the wife's debt, nor the wife her husband's or son's But in all these cases if the debt is incurred for the benefit or purposes of the family by the son, the wife or the husband then the father, husband or wife respectively would be liable (Yāj II. 47, Nār. IV. 10–11, Kāt. 545, 579)[761]. If the father promised to pay his son's individual debt or if he approved or acquiesced in it he was liable to pay it. Manu VIII. 167, Yāj II. 45, Nār. IV. 12, Bṛ. (S. B. E. 33 p. 329 v. 50), Kāt. (545) provide that a debt incurred for the purposes of the family by any one such as the son, brother, uncle, the wife, the mother, the pupil or a servant or a slave even without the consent of the head of the family when he has gone abroad, should be paid by the head of the family. This liability and the liability when the manager of a family contracts a debt for the benefit or necessities of the family arise from agency (*implied*) or authority. Kaut. (III. 11) holds that the husband may be seized (for work)

760. जायापत्योर्न विभागो विद्यते । पाणिग्रहणाद्धि सहत्वं कर्मसु । तथा पुण्यफलेषु द्रव्यपरिग्रहेषु च । न हि भर्तुर्विप्रवासे नैमित्तिके दाने स्तेयशब्दप्रदिश्यते । आप. ध. सू. II. 6. 14. 16–19.

761. शोचितव्यामतेनापि कुटुम्बार्थभृणं कृतम् । दासस्त्रीमातृशिष्यैर्वा दद्यादप्रेण वा भृशः ॥ कात्या (545) q. by अपरार्के p. 648, परा. मा. p. 268, वि. र. 56. अपरार्के reads दासस्त्रयमात्यशिष्यैर्वा. अमात्य would mean agnates residing in the house. This verse is quoted in *Viraswami* v. *Appaswami* 1 Mad. H. C. R p 375, 379n. पितुर्भ्रातुसुतस्त्रीदासशिष्यानुजीविभिः । यद् गृहीतं कुटुम्बार्थे तद् गृही दातुमर्हति ॥ बृह. q. by स्मृतिच. II. p. 174.

if he starts to go abroad without providing for the return of the debt contracted by his wife [762]

The general rule that the husband was not liable to pay the wife's debt had an exception viz the husband was liable for the debts of the wife in the case of cowherds, vintners, actors, washermen and hunters (and the like) whose income depends on their wives and whose household expenses are defrayed by their wives (Yāj II. 48, Viṣnu Dh S VI. 37, Nār IV. 19) Similarly the rule that the wife was not liable for the husband's debt had certain exceptions, viz a debt of the husband which she promised to pay because he was dying or going abroad or which was contracted jointly with her husband[763] (Yāj II 49, Nār IV 16–17) The Mit. on Yāj. II. 49 answers the objection raised by some that, as according to Manu VIII. 416 (=Udyogaparva 33. 64) the wife, son and slave are without property and whatever they earn is acquired for him to whom they belong, the wife would not be able to pay anything at all. The reply is that this verse of Manu does not mean that a wife or son can own no property at all, but all that it declares is that they have no independent power to dispose of their property.

The order in which persons are liable to pay a man's debts after his death is declared by Yāj II. 51, Nār IV. 23, Br. (S B E. vol. 33 p. 329 verse 52), Kāt. (562, 577), Viṣnu[764] VI. 29–30.

Whoever takes the wealth of the deceased (whether a son or a collateral heir) is primarily responsible to pay the debts of the deceased; but if the deceased died without leaving any property, then he who takes his wife has to pay the deceased's debts; if there be no wealth or taker of the deceased's widow, then the son even if he succeeds to no wealth has to pay. This liability may be said to be based on the equitable and moral principle that whoever takes the wealth of the deceased or his widow (over whom the deceased had a sort of dominion) was bound to pay his debts. There appears to be some conflict between the texts; but it is more apparent than real Verses (like Kāt 577) where the son is placed after the taker of wealth and before the taker of the widow refer to a son who has separate and independent wealth of his own and is more wealthy than the taker of the widow (though he himself being disqualified did not succeed to, ancestral wealth) When there is no wealth and there are several sons one of whom is congenitally blind or otherwise incompetent to succeed then the other sons are liable. From the fact that the taker of the widow is made liable for the debts of the first husband it should not be supposed that the ancient sages approved of widow-remarriage. On the contrary they condemned it (vide Manu V. 162), but, as the Mit. (on Yāj. II. 51) remarks, remarriages took place by custom among certain castes and nothing could prevent persons from taking widows as kept mistresses Therefore as the wife was half of the husband (acc. to Vedic and other passages q. in H. of Dh. vol. II. pp. 428, 584 n.) she was practically the husband's wealth (Nār. IV. 22 expressly says so)[765] and so the taker of the widow was saddled with the obligation to pay the debts of the deceased. This sentiment continued to modern times and in the Bombay Presidency the Legislature had to declare (by Bombay Act VII of 1866, sec 4) that 'no person who has married a widow shall merely by reason of such marriage, be liable for any of the debts of any prior husband of such widow'. The Vaijayanti on Visnu Dh. S. VI 30 quotes Yāj. II. 51 and Nār. IV. 23 and

765. अधनस्य ह्यपुत्रस्य मृतस्योपैति यः स्त्रियम् । स अभजेद्ऋणं वोढुः सैव तस्य धनं यतः ॥ नारद् IV 22; योषिद्ग्राहो यद्यपि शास्त्रविरोधेन न संभवति तथाप्यतिक्रान्तनिषेधः पूर्वपतिकृतर्णापाकरणाधिकारी भवत्येव । योषिद्ग्राहो यश्चतसृणां स्वैरिणीनामन्तिमा गृह्णाति यश्च पुनर्भुवां तिसृणां प्रथमाम् । मिता. on या II. 51. Then नारद् (स्त्रीपुंसयोग) verses 45–53 are quoted by the Mit.

explains them differently. According to it the word 'putra' (in Yāj II. 51) is qualified by all the three adjectives viz 'rikthagrāha', 'yosidgrāha' (one who is married) and 'ananyāśritadravya' (one who has no wife nor child and one who has taken no ancestral wealth, either because he does not desire it or because none exists). Therefore according to it among sons, the son that takes ancestral wealth has to pay the debts of the father, on failure of such a son when some of the sons are married and some are not, the married ones have to repay ancestral debts and lastly when there are no married sons the one that is wifeless, childless and also without wealth has to pay them.

Niksepa (deposit). The words *nikṣepa*, *upanidhi* and *nyāsa* are sometimes said to be synonyms (as done by Amara)[766], though several ancient works define them separately. According to Yāj II. 65 *upanidhi* is the deposit of an article enclosed in a box or the like made with another without telling him of the contents of the box. Yāj II. 67 holds nyāsa and niksepa to be different from upanidhi. Nārada[767] as quoted in the Mit. on Yāj. II. 65 defines upanidhi as the deposit of an article in a sealed receptacle without counting it in the presence of the person to whom it is entrusted and without telling him what the receptacle contains, while a niksepa is a deposit entrusted to a man after counting the articles in his presence. Manu VIII 149 (=Vas. 16. 18), Kaut. III. 12 hold niksepa and upanidhi to be distinct. A verse quoted by Kṣīrasvāmin on Amara defines nyāsa as an open deposit and niksepa as the delivery of some goods to an artist or craftsman for being worked up or manufactured. Nār. (V. 1 and 5) defines niksepa as the deposit of one's articles with another through confidence, while upanidhi is defined in the same way as Yāj II. 65. Viśvarūpa[768] defines nyāsa as an open deposit for safe custody and niksepa as delivery of one's article to another for handing over to a

third. Kāt. (592) makes[769] *upanidhi* a generic term for all bailments such as a sold article remaining in the hands of the vendor, a deposit, a pledge, bailment to one for delivery to another, loan of article for temporary use, goods handed over for sale to an agent. The Mit. on Yāj. II. 67 defines nyāsa as handing over to some member in the house an article in the absence of the head of the house for delivery to the head of the house and nikṣepa as a deposit in the presence of the depositee himself. The V. P. p 280 briefly distinguishes the three as noted below.[770]

Nikṣepa or *upanidhi* was a bailment made in trust and differed from an *ādhi* in this that the former was not given by way of security for a debt or for collecting interest but in confidence for safe custody.[771] Br. (SBE vol. 33 p. 332 verse 2) says that such a deposit is made with another when one is leaving one's home, or through fear of the king or for depriving one's kinsmen.[772] Manu VIII 179 (=Nār. V. 2) says that one should entrust a deposit to a person who is born of a good family, is well-conducted, knows *dharma*, speaks the truth, has a large family, is wealthy and straightforward. The person with whom a deposit is made generally receives no personal benefit from it; hence the smṛtis (such as Br. in SBE 33 p. 333 verses 6-8) extol the holder[773] of a deposit made in trust to be as meritorious as one who makes gifts of gold or other inferior

metals or clothes and condemn the misappropriation of a deposit or the losing of it through negligence as very sinful The idea is that no one is bound to accept a deposit, but when a person accepts it, his primary duty is to preserve it with care and the next duty is to return it at the time agreed or on demand. The obligation arises from the trust reposed in a person. The rights of the bailee are limited as compared to those of the mortgagee or pledgee, but the very fact of his custody in trust clothes him with certain rights The amount of care required of the depositee is the same as in the case of an *ādhi*, viz he is to take the same care of it as he takes of his own goods and is not liable if the deposit is lost (along with his own property) through act of God or the king or is stolen by thieves (Manu VIII. 189, Yāj. II. 66, Nār. V. 9 and 12, Br. in S.B.E 33 p. 333, verse 10, Kāt. 593).[774] In the Mrcchakatika Cārudatta accepts liability for the loss of the ornaments deposited with him by Vasantasenā, though they were stolen, because of his high sense of chivalry and of his idea that proper care was not taken by him or his friend. But Nār V 9 is careful to add that the loss through *vis major* or through theft must be real and not fraudulently brought about[775] Nār. V. 6 and Br (in SBE 33 p. 334 verse 14) state that a deposit may be made in the presence of witnesses or without them, that it should be returned in the same way and condition in which it was made and that if there is a dispute, it may be settled by ordeal (when there are no witnesses)[776] The article deposited must be returned in the same condition (as regards seal &c.) in which it was handed over (Yāj II. 65). It must also be returned to the man himself who made the deposit and not to his co-owners (Manu VIII 185, Br. in SBE 33 p 333 verse 9).[777] He is estopped

from recognising the title of any one except the depositor, as in section 116 of the Indian Evidence Act. But if the bailor be dead the bailee can return it of his own accord without demand to the co-owners (Manu VIII. 186 = Nār. V. 10). In doing so however he must not return it to one of several heirs, but to all or in the presence of all. The loss of a deposit may be due to the fact that the bailee consumes it by using it, or to the bailee's negligence or to his ignorance. In these cases the bailee was made to reimburse the bailor for the loss. But Kāt. (597)[778] makes a difference, viz. when a bailee consumes the deposit by use he should be made to pay the price with interest, when he loses it through negligence he is to pay only the price (but without interest) and if he loses through ignorance, then he is to pay a little less (i. e. less by one-fourth) than the price. Vide Br. (S B E vol. 33 p. 333 verse 11) and Nār. V. 8. If a bailor knowing the proposed bailee to be a careless man deposits his goods with him, the bailee is not liable even if the goods are lost from any cause whatever (Kāt. 599).[779] If immediately on demand by the depositor the bailee does not return the thing deposited or it is lost after demand from any cause whatever (including act of God or king), the bailee has to return the thing or the price of the thing (when lost) and also is liable to be fined by the king in the same amount (Yāj. II. 66, Nār. V. 7). If the bailee makes use of the article bailed without the permission of the bailor, he should be fined by the king and should be made to return the thing bailed with interest (Yāj. II. 67, Nār V. 8). In the Rāj. T. (VIII. 124–157) occurs the story of a person who had deposited one *lakh* of *dīnāras* with a merchant and had withdrawn some money from time to time. It further states that, when the balance was demanded, the merchant furnished a statement of accounts giving a list of

779. ज्ञात्वा द्रव्यवियोगं तु दाता यत्र विनिक्षिपेत् । सर्वोपायविनाशेपि ग्रहीता नैव दाप्यते ॥ कात्या. q by स्मृतिच. II. p. 179, पराः मा. III. p. 283, वि. र. 89, व्य. प्र. p. 282.

fictitious items of withdrawals for many years with interest and showing that very little of the deposit was left. The king brought home the fraud to the merchant and ordered that the original deposit being used by the merchant should bear interest.

Kāt. (506) provides that when a deposit, a balance of interest, purchase price (not paid though the article be delivered to vendee), or sale price (article sold being retained by vendor though price is paid) is not returned or paid when demand is made, it carries interest at 5 per cent (from the date of demand).[780] Manu VIII. 191 (which is almost the same as Nār. V. 13) provides that where a bailee does not return the deposit though demanded or where a person without making a deposit claims it from a person, both are to be punished as a thief by the king and to be made to pay a fine equal in amount to the price of the bailed article (claimed). The deposit has to be taken back at the proper time by the depositor and the bailee has to avoid returning it at an improper time; if the latter returns at an improper time he should be made to pay a fine double of the value of the thing[781] (Kāt. 601).

Yāj. II. 67, Nār. V. 14, Br.[782] (S. B. E. vol. 33 p. 334 verse 15) extend these rules about *nikṣepa* to other kinds of bailments viz. to *yācitaka* (an article such as an ornament borrowed from a man on a festive occasion), *anvāhita* (what is handed over to a third man and is the property of another and has been pledged with a man), nyāsa, upanidhi, *tulpnyāsa* (giving an article such as gold to an artisan like a goldsmith for preparing an ear-ring or the like), *pratinyāsa* (mutual deposit). Some of the rules about yācitaka are stated above

782. अन्वाहिते याचितके शिल्पिन्यासे सबन्धके । एष एवोदितो धर्मस्तथा च शरणागते ॥ बृह. q. by स्मृतिच. II. p. 182, व्य. म. 287.

(pp. 426-427). Kaut.[783] III. 12 states that a *yācitaka* or *avakrīta* (lent on hire) article should be returned in the same condition in which it was received. If lost through act of God or king or through theft (after taking proper care) the depositee would not be liable. Kāt. (610) provides[784] that he who having taken the loan of an article for use does not deliver it even on demand should be restrained (by the owner) and forcibly made to return it and fined by the king if he does not return it; he should be made to pay the price with interest (if the thing be lost after demand). If the loan of an article was taken for a specified period or for a particular occasion or purpose and a demand for return be made in the middle and the article is not returned when demanded, the person taking the loan would not be made to pay the price: but if a person who has taken on loan an article does not return it after the period fixed has expired or the purpose is served, the borrower must offer to the owner the price if the article be destroyed or lost and if he does not return even after demand (when the period has ended) the borrower would have to pay the price with interest.

Kāt. (609) states a reasonable counter-exception to the rule in 606 viz. 'when the owner of an article borrowed by another is likely to sustain loss if the article borrowed were not returned on demand, then the borrower should be made to deliver it even though the time fixed has not ended or the purpose of the loan was only half fulfilled'.

There are some special rules about *tilpnyāsa* also. Kāt. (603-604) provides that if an artisan or craftsman retains an article delivered to him beyond the time that was settled (or

783. यान्चितकमवक्रीतकं वा यथाविधं गृह्णीयुस्तथाविधमेवार्पयेयुः । क्षेपोपनिपाताभ्यां देशकालोपरोधि दग्धं नष्टं विनष्टं वा नाप्नुयुरेवः । शेषमुपनिधिना व्याख्यातम् । अर्थशास्त्र III 12 On अन्वाहित there is difference between the digests The मिता. defines 'यदेकस्य हस्ते निक्षिप्तं द्रव्यं तेनाप्यन्यहस्ते स्वामिने देहीति निहितं तदन्वाहितम् ।' and is supported by कात्यायन (611 q. by वि. र p 84) 'अनुमार्गेण कार्येषु अन्यस्मिन्वचनान्मम । दद्यास्त्वमिति यो दत्तः स इहान्वाधिरुच्यते ॥.' The व्यवहारसार p 144 quotes the very words of the मिता. स्मृतिच्च II. p 182 and व्य. म. p. 287 define अन्वाहित as 'स्वस्मिन्द स्थितं परधनमन्यहस्ते कृतम्,' 'प्रतिन्यासस्य च परस्परप्रयोजनापेक्षया त्वयेदं मदीयं रक्षणीयं मयेदं त्वदीयं रक्ष्यते इति न्यस्तस्य ग्रहणम् ।' मिता on या II 67

784. यो याचितकमादाय न दद्यात्प्रतियाचितः । स निगृह्य बलाद्दाप्यो दण्ड्यश्च न वदाति च. ॥ कात्या 610 q by अपरार्क p. 664, स्मृतिच्च. II. p 184, वि र. p. 92. This shows that he could at once resort to the remedy of बल.

agreed) for finishing the work he should be made to pay (its price) even if the article was lost through act of God, but the artisan shall not be liable to pay the price if the article were to be lost through defects in the article itself; if (however) what is delivered for being worked or polished is destroyed through the fault of the artisan he should be made to pay the price[785].

From the fact that Kāt. 596 (quoted above in n. 778) employs the expression '*dāpyaḥ sa eva tat*' (he alone who misappropriates or causes loss of a deposit by negligence), the words of Gaut. XII 39 (quoted above under *ādhi*) and the fact that nikṣepa is a title distinct from *rnādāna* (under which alone the liability of sons, grandsons, and great-grandsons is expressly declared) it follows that sons are not liable for the misappropriation or loss of a deposit or article bailed to their father or other ancestor provided they have not themselves joined or helped in the embezzlement or loss This is made clear by Haradatta on Gaut. XII. 39, the Vivādacintāmani and the Vivādacandra quoted below[786].

It is interesting to note that Nār.[787] V. 15 places on the same level (as to liability for loss) with the depositee and the like the man who takes in his charge a minor that has a good deal of wealth i.e the person undertaking the position of the guardian of a minor's property has to take as much care of it as of his own and is liable in the same circumstances as a

depositee would be for loss of the minor's property. Vide section 27 of the Guardian and Wards Act (VIII of 1890) for the care required of a guardian [788].

---

788. The British India Courts have been very much exercised over the question of the liability of ancestral property in the hands of the son for the obligations incurred by the father by his misconduct or embezzlement either as agent or manager for another or as guardian of a minor's property. It would follow from the passages quoted in n. 786 that ancestral property in the hands of the sons is not liable, acc. to some of our digests, if the father used or lost a deposit or loaned article by his negligence or mismanaged a minor's property It is firmly established that the son is not liable for a debt incurred by the father in circumstances which would render the father liable to a criminal prosecution. Vide *Toshanpal Singh v District Judge of Agra* 61 I. A 350. In the latest case on the point, *Govindprasad v. Raghunathprasad* 41 Bom L. R. 589 (F. B) the exemption is carried further and it is recognized that as to the exemption of the son for '*avyāvahārika*' debts of the father, there are many cases which cannot be reconciled, that it is repugnant to good sense to construe ancient texts in the light of a system of criminal Jurisprudence developed long after and that the correct rule is to hold that 'the son can claim immunity when he proves that the debt of the father was of a character which was illegal, dishonest or immoral (p 602)' though difficult cases may arise in the application of this rule It would be far beyond the scope of this work to cite or discuss the other numerous decisions.

CHAPTER XVII

ASVĀMIVIKRAYA (sale by one not the owner).

The different modes of the sources of ownership have already been referred to (H. of Dh. vol. II. pp. 130 ff) and will be referred to again under *dāyabhāga*. According to Nār. VII. 1 and Br. (SBE vol. 33 p. 335 verse 2) when[789] a person, who holds an open deposit, a sealed deposit, an article bailed for delivery to another, stolen property, an article borrowed for some festival, a pledge, or property lost by a stranger and found (by him), sells it in secret (or behind the back of the owner) it is to be considered as a sale by one who is not the rightful owner. Vyāsa has a similar verse. The word 'sells' is only illustrative and includes gifts and pledges. Similarly as most sales by one not the owner are clandestinely brought about, Br. employs the words 'in secret' but even if the sale is effected openly the same consequences may follow. The same rules will apply to an article lost by the owner and found by a stranger. Kāt. (612) provides[790] that a sale, gift, or pledge, made by one who is not the owner, should be rescinded (by the king or judge), Manu VIII. 199 and Nār. (q. by Sm. C. II. p. 213, V. P p. 291) and others say the same thing. Yāj. II. 168, Nār. VII. 2 provide that the owner is entitled to recover his property from the person that purchases from one who is not the owner. If the buyer purchases an article not in the open market, then he is liable for punishment; if he purchases from one who could have no means of possessing the thing sold (such as a slave without the master's consent) or for a very inadequate price or at a very unusual hour (at midnight or

789 निक्षिप्तं वा परद्रव्यं नष्टं लब्धापहृत्य वा। विक्रीयतेऽसमक्षं यद्विज्ञेयोऽस्वामिविक्रयः॥ नारद VII 1; निक्षेपान्वाहितन्यासहृतयाचितबन्धकम्। उपांशु येन विक्रीतमस्वामी सोऽभिधीयते॥ बृह q by स्मृतिच्च II p 213 व्य. म. p 290. याचितान्वाहितन्यास हृत्वा दान्यस्य यद्धनम्। विक्रीयते स्वाम्यभावे स ज्ञेयोऽस्वामिविक्रयः। व्यास q by व्य. म. 195, व्य म. p 290.

790 अस्वामिविक्रयं दानमाधिं च विनिवर्तयेत्। कात्या 612 q by the मिता. on या. II 168, परा मा p. 291, वि र p 104. The व्य म p 291 takes अस्वामिविक्रयं as one word 'अस्वामिना कृतं विक्रयम्। अस्वामिकृतत्वं दानाद्योरपि तत्साधर्म्यात्'; while व्य म. p 195 says अस्वामि is a separate word and an adverb. he latter had to explain in this way in order to directly connect the absence f ownership with all the three kinds of transactions.

the like) or from bad characters then he is to be punished as a thief (Yāj. II. 168, Viṣṇu Dh. S. V. 166, Nār. VII. 3, Manu VIII. 202, Br. in SBE vol. 33 p. 336 verse 11). Such a sale is a fraudulent one If the buyer purchases (through ignorance) in market overt from one who is not the owner, he incurs no blame (no punishment), but he may have to hand over the article to the real owner (Viṣnu Dh. S. V 164–166).[791] The purchaser from one not the real owner can free himself by producing the vendor (called *mūla* in Manu VIII. 202, Bṛ. and Kāt.) and should not attempt to conceal from whom he came by the thing, otherwise he would be liable to be punished equally with the vendor as a thief (Nār. VII. 4). Br. (SBE 33 p. 335 verse 3), Manu VIII. 201 and Yāj. II. 170 say that when the vendor has been produced by the vendee, then the latter is not to be proceeded against, but the vendor has to litigate with the real owner who has lost his property and when the vendor loses the suit he has to pay the price to the buyer and a fine to the king and the owner gets his property back.[792] If the vendor has gone abroad adequate time should be granted to the purchaser to produce him (Kāt. 615). The purchaser in order to escape blame (punishment) has to produce the vendor and if that cannot be done owing to the vendor's absence he has to prove that he purchased[793] openly (Bṛ. in SBE 33 p. 335 v. 4, Manu VIII. 202, Kāt. 615, 618–619). If he cannot do any of these two, then the purchaser would be liable to pay the price to the real owner as claimed and a fine to the king. Manu VIII. 198 prescribes that one who sells without being the owner but being a member of the owner's family should be fined 600 paṇas, while a vendor unconnected with the real owner's family should be dealt with as a thief. The same rule applies to a

vendor selling another's article through ignorance or mistake and one doing so with full knowledge. The person who has lost a chattel and claims it from the finder is described as *nāsthika*[794] in Kaut III. 16, Manu VIII. 202, Kāt. (614) and elsewhere, the word being derived from *nasta* (what is lost). The idea is that openly purchasing an article in the presence of a number of people for an adequate price negatives fraudulent intent and leads to the inference of a purchase in good faith and such a purchaser even though he may have to part with the chattel to the real owner when the latter proves his title, incurs no blame and is entitled to recover from the vendor, if he has to surrender the article, the price paid by him. When a person claims a lost article as his he has first to prove his title and possession by evidence (such as that of his kinsmen or a document &c.) and that he had not sold or donated or abandoned it;[795] after he has proved his title the purchaser is called upon to prove his purchase as honest by evidence i. e. by producing the vendor or by showing that he purchased openly and for adequate price (Kāt 613, Yāj. II. 170). When this is done the purchaser escapes blame but has to surrender the article to the true owner. Kāt. (616) adds[796] that in the case of 'asvāmi-vikraya' no other means of proof whether divine or human (except the evidence of witnesses such as kinsmen) is declared to be proper. Acc to the V. P p 293 other evidence and even ordeals may be admissible in sale without ownership, but the Sm. C. p. 216 and the Madanaratna say that on account of the express words of Kāt. this is not possible. If the owner who alleges the loss of an article fails to prove his title and prior possession he has to pay a fine to the king equal to $\frac{1}{8}$th of the price of the article. Kāt. (620) and Kaut. (III. 16) state that on failure to prove his title the person claiming[797] the article as his should be fined as a thief, in order to deter (others) from taking undue advantage (i e. preferring false claims). Kaut[798] III. 16 and Yāj. II. 169

provide that when the real owner finds his lost article in the hands of a stranger he should get him apprehended by the royal officers (such as *chauroddharaṇika*, acc. to Mit.), but that if the owner thinks that much time will be lost or distance will have to be traversed (for going to officers) he should himself seize the person and bring him before the court The Mit explains that the buyer should have the seller arrested and, if the seller is dead or gone abroad, that he should hand over the article to the real owner. Where a purchase has been made in the midst of a row of traders to the knowledge of the king's officers, but from a vendor whose habitation was unknown or where (after the purchase) the vendor dies, the real owner (of the thing sold by one not the owner) will recover his own property after paying half the price to the purchaser, since the rule of justice in such a case so requires, because to purchase from one (whose habitation is) not known is a fault (in the purchaser) and not taking proper care (of one's goods) is also a fault in the real owner (Br. in S B. E. vol. 33 pp. 335–36 verses 7–9 or Kāt 621–623)[799]. Marīci (q by Aparārka p. 775, Sm. C. II. p. 217) has similar provisions. Br. (S. B. E. vol. 33 p. 335 verse[800] 6) provides that in a suit where there is no evidence the king shall take into consideration the character of the litigants and give a decision according as the credibility of the parties is equal, greater or less.

As regards articles lost and found by the king's officers, vide above (pp. 175–176).

CHAPTER XVIII

SAMBHŪYA-SAMUTTHĀNA [801]

(A joint undertaking, partnership)

Where traders or others (like actors, musicians or artisans) carry on a business jointly it is termed a partnership (Nār. VI 1 and Kāt. 624).[802] Br (SBE vol. 33 p. 336 verses 1-2) says that a man should carry on a joint business with other persons of good family, that are clever, active, intelligent (or educated), familiar with coins, skilled in (controlling) expenditure and income, honest and valiant (or enterprising) and that joint undertakings like trade should not be carried on by prudent men with persons (partners) who are weak or lazy or afflicted with disease or are unlucky or destitute (of money).[803] The meaning is not that all the above qualities must exist in all partners, but that according to the nature of the undertaking some of these qualities will be absolutely necessary Nār. VI. 2-3, Yāj. II. 259, Br. (SBE vol 33 pp. 336-337 verses 3 and 4) prescribe that the expenses, loss, profit or work of those who jointly lend gold, grain or liquids shall be according to the capital put in by each.[804] The duty of each is to act honestly towards the others, whether they are present or absent,

---

801 सम्भूय is the indeclinable past participle of the root भू with सम् and means 'having formed together or come together' and समुत्थान means 'undertaking'. So the two words mean 'undertaking in which are joined together' (labour, capital or both)

802 समवेतास्तु ये केचिच्छिल्पिनो वणिजोऽपि वा। अविभज्य पृथग्भूते प्राप्ते तत्र फलं समम् ॥ कात्या 624 q by अपरार्क p 832, परा मा III. p 304.

804 प्रयोगं कुर्वतो ये तु हेमधान्यरसादिना। समन्यूनाधिकैरंशैर्लाभस्तेषां तथाविधः ॥ समो न्यूनोधिको वांशो येन क्षिप्तस्तथैव सः। व्यय दृष्ट्वात्कर्म कुर्याल्लाभं गृहीत चैव हि ॥ बृह. q. by. स्मृतिच II p. 185, व्य प्र p. 298 अपरार्क p 832 ascribes the first to कात्यायन.

in sales or purchases of various commodities.[805] Br. (SBE vol 33 p 337 verses 5–7) provides that whatever[806] property one partner may give (or transfer), being authorised to do so by the rest, or whatever document (or transaction) he may cause to be executed, all that is to be deemed as done by all partners; the partners themselves are declared to be the judges (the deciding persons) or witnesses among themselves in a doubtful case and in case of fraud, provided they are not already at feud among themselves. It follows from this that by entering into an agreement of partnership, each partner agrees that he submits to the decision of the other partners in cases of doubt If any one from them is found out to have practised fraud on the others in sales or purchases he should clear himself by special oaths or ordeals. Yāj II. 260, Nār. VI. 5,[807] Br. (SBE vol. 33 p. 337 verse 9) provide that each partner is responsible to make good what has been lost through his negligence or in consequence of his acting against the instructions of the others or of his acting without their authority or consent. If any one of the partners saves partnership property from act of God or the king or thieves (or similar calamity) by his own exertions he is to be awarded (as his special share) one tenth of the property saved (Yāj II. 260, Kāt 631,[808] Nār VI. 6) If any partner is crooked or fraudulent the rest may expel him without giving him any profit; a partner who is incompetent to work (personally) should get the partnership business done through another (Yāj II. 265) Yāj. II. 264 and Nār VI. 7 and 17–18 state that if one partner

807. प्रमादाच्चाशितं द्राव्यः प्रतिषिद्धकृतं च यत् । असन्दिष्टश्च यत्कुर्यात्सर्वंसम्भूयकारिणः ॥ नारद VI. 5.

808 चोरतः सलिलाद्ग्नेर्द्रव्यं यस्तु समाहरेत् । तस्याशो दशमो देयः सर्वद्रव्येष्वयं विधिः ॥ कात्या 631 q. by परा. मा III. 305, वि. र. p. 114.

goes to a foreign country and dies, his share should be taken by his heirs (son &c.) or by his agnates or cognates ; in default of these the other partners may take it and in default of them the king may take it after waiting for ten years to see whether any heir or claimant turns up. Kātyāyana[809] states that in the case of artisans who together carry out some work, those among them who are directors of new methods get four shares, those who are adepts in the craft three shares, those who have studied the craft two shares and the apprentices only one share Whatever is given to strangers by all together (i. e. by the partnership firm) should be claimed back by the firm as such ; any single partner should not claim it ; if he does so he will lose his share of the profit[810]. Some rules are prescribed by Br that among dancers, singers and musicians, the singers get equal shares, while those who beat the tune only get half share each; similarly in the joint construction of a mansion or a temple the head of the artisans gets two shares. An artisan[811] (*śilpin*) is one who manufactures or works upon gold, silver, yarn, wood, stone and hides or one who has mastered one of the (64) arts. If a king has ordered a band of adventurers from among his subjects to make a plundering expedition in enemy country, Br. (in V. R p. 125) and Kāt. (633–635)[812] prescribe that the king gets one tenth ($\frac{1}{8}$ acc. to Br.), the leader gets four shares in the remainder, the valiant among his followers three shares, the more capable two shares and the rest one each and that if any one of them is caught the money for his ransom should be contributed by all according to their shares. When no agreement is made as to shares in property by traders, husbandmen, thieves and artisans similar rules apply[813].

It is interesting to note that the ancient Dharmasūtras of Gautama, Āpastamba and Baudhāyana are silent about partnerships, that Manu (VIII. 206–210) lays down rules about the distribution of fees among the priests at a sacrifice and that in one verse (VIII. 211) he remarks that the same principles are to be applied in all matters where men work conjointly (i. e. each is to be paid according to the importance and volume of the work he does). The rules about sacrificial priests in Manu are: If a priest chosen to do work in a sacrifice abandons his work a share only of the fee in proportion to the work (done) shall be given to him by those conjointly working with him; if a priest leaves after the fees are distributed (as at the time of midday extraction of Soma in the great sacrifices like Jyotiṣṭoma) then he keeps the whole of it and shall cause the remaining work to be performed by another (who will be paid by the sacrificer, acc. to Medhātithi) When specific fees are prescribed to be paid to individual priests at the performance of the several parts in a complicated sacrifice, the individual priests are to receive them and all are not to participate; as for example, the adhvaryu takes the chariot, the brahmā priest takes the horse in Agnyādhāna, the hotr also takes the horse and the udgātṛ the cart used in purchasing the soma plant. The four chief priests are entitled to one half of the fees, the first group of their assistants will get half of what the chief ones get, the 2nd group ⅓ and the fourth ¼. Nār. VI. 10 and Br (in V. R. p. 120) state that sacrificial priests are of three kinds viz. one hereditary and honoured by the ancestors of the sacrificer, one appointed by the sacrificer himself and one who performs the functions of his own accord through friendship and that (VI. 9 and 11) if an officiating priest forsakes a sacrificer who is free from any fault and who has caused no harm or if a sacrificer abandons a priest who is faultless, they both shall be punished but this does not apply to the third kind of priest. Śankha-Likhita, as quoted in V. R. pp. 117 and 120–121 and Sm. C. II. p. 188, give elaborate rules about sacrificial priests dying or leaving work and the fines to be imposed on them. Kaut. III. 14 lays down rules for the receipt of fees by priests when they leave off at different stages of such solemn sacrifices as the Agnistoma and also when the sacrificer dies without completing the sacrifice. The Vy. Nir. (pp. 284–285) quotes a few sentences from Kaut. III. 14.

The above shows that in the times of the ancient sūtras, secular partnerships had not attained sufficient importance and

CHAPTER XIX

DATTĀNAPAKARMA (resumption of gift).

This title is also called *dattāpradānika*[815] (lit that which is concerned with the non-delivery or resumption of a gift). Nār. VII. 1 defines it as that title where a man desires to resume what has been given by him because it has been improperly (in a manner opposed to law) given by him Nār. (VII. 2) divides this title into four topics viz what may not be given, what may be given, what are valid gifts and what are invalid gifts. Nār. VII. 3–5 and Br (SBE vol. 33 p. 342 verse 2) state that there are eight things that cannot be given (*adeya*) viz an *anvāhita*, a deposit, *yācitaka*, a pledge, property jointly owned with others, a deposit, son and wife, the entire property in the case of one who has offspring, and what has been already promised to another. Vide Kaut. III. 16, Yāj. II. 175[816] for a similar but more compendious statement, and Kāt. 638. These cannot be given either because they are not one's absolute property or because the gift of them is forbidden by the sages. In the case of even those who hold that one has ownership over one's son or wife, the gift of them is not possible because it is forbidden, just as though one owns rice, *yavas* and *māṣa* beans, one cannot make offerings of māsa because the veda prohibits their use in the words 'ayajñiyā vai māsāh' (q by Śabara on Jai. VI. 3. 20). So son and wife cannot be given on account of the prohibition in the smrtis. The general rule of what may be given is stated

---

815 मेधातिथि on मनु VIII. 214 explains it as अपक्रिया क्रियायाः तस्य तत्रामतिषेध. । दानमेवं न चलितं भवति । एवैव दाने स्थितिरिति यावत् । कथं प्रतिश्रुत्यादीयमाने धर्मो न नश्यतीति नैषा शङ्का कर्तव्या । एष एवात्र धर्मो यक्त दीयते दत्तं च प्रत्यादीयते । So acc. to this दत्तस्यानपाकर्म means 'not improper abstraction of what is given or promised to be given' The मिता on या II. 175 explains both दत्तामदानिक and दत्तानपाकर्म as follows : दत्तस्य अप्रदानं पुनर्हरण यस्मिन्दानाख्ये तद् दत्तामदानिकं नाम व्यवहारपदम् । .. दत्तस्य अनपाकर्म अपुनरादानं यत्र दानाख्ये विवादपदे तद्दत्तानपाकर्म. Acc to this दत्तानपाकर्म means 'that in which what is donated cannot be taken back because the gift is according to law' (also impliedly the converse of it)

816 सर्वस्वं पुत्रदारमात्मानं प्रदायानुशयिनः प्रपद्येत । अर्थशास्त्र III. 16 सामान्यपुत्रदाराधिसर्वस्वन्यासयाचितम् । प्रतिश्रुतं तथान्यस्मेप्यदेयं त्रिष्टधा स्मृतम् ॥ बृह. q by स्मृतिच्च II. 189, व्य. प्र p. 306; similar verses of Nār. VII 4–5 and Dakṣa III. 19–20 have been quoted in (H. of Dh. vol II. p 850 n. 2005).

by Yāj II 175, Nār. VII. 6 and Br. (SBE 33 p 342 verse 3), Kāt 640 viz. whatever is absolutely one's own excepting that required for the maintenance of one's family may be given [817] Manu (XI. 9-10), Nār. VII. 6 and Br. (quoted in H. of Dh. vol II pp. 850-851 n. 2007) condemn those who stint their family or servants in order to be charitable to others and say that he who does so would incur sin. Manu XI. 7 (=Nār. VII. 7), Vas VIII. 10, Yāj I. 124, Visnu Dh S. 59.8 prescribe that he alone who has property sufficient to provide for three years' maintenance for those whom he is bound to maintain or has more wealth than that may drink *soma* i. e. may engage in a soma sacrifice (which costs much)

Nār. VII. 8 states that there are seven kinds of *datta* gifts, i e gifts or transfers that cannot be resumed because they are made by a person in full possession of his faculties and of things that belong to him absolutely and are not forbidden They are: the price paid for goods bought, wages, what is paid for pleasure (derived from dancing, singing, wrestling), a gift through affection, a gift made in gratitude, money paid to a bride's kinsmen, and gifts for spiritual or charitable purposes Acc. to Br.[818] (SBE vol. 33 p. 343 verse 8) there are eight kinds of valid gifts. Nār. VII 9-11 mentions sixteen kinds of invalid gifts, which have already been set out (in H. of Dh. vol. II. p. 887 where Gaut. V. 22 that specifies some invalid gifts has also been cited). Vide Kāt. 647. The difference between gifts of *adeya* and *adatta* gifts is this. In the first class of cases, the gifts being forbidden are entirely null and void, while *adatta* gifts are those that are voidable and may be set aside by the court on the application of the donor himself, because, of the incapacity of the donor due to intoxication, lunacy, old age, minority, mistake etc. Kāt 646 and Kaut (III. 13) state

817. सर्वस्वं गृहवर्जं तु कुटुम्बभरणाधिकम् । यद् ह्यन्यं तत्स्वकं देयमेव स्यादृतोऽन्यथा ॥ कात्या. 640 q. by परा. मा III. 214, वि. र p 129, स वि p 283 Kāt. prohibits the gift of a house if a man owns only one

818. भूत्वा हृत्वा पण्यमूल्यं क्षीणोत्कहृपकारिणे । अज्ञातग्रहणं प्रीत्या दृत्तमष्टविधं विदुः ॥ बृह. q by स्मृतिच. II. p 193. कात्यायन 644-645 explain भूति and मूल्योपकार occurring in नारद and बृह., the first being a reward for finding out a lost article or an unknown offender and the second being a reward for protecting a man from danger or for guarding the donor's property when he was a minor or effecting some object desired by the donor (such as his marriage &c)

that if a man[819] is in danger of life and promises the gift of all his property to whomsoever may save him, he may resile from the promise and pay only what an expert or arbitrator may award. Kāt. (650–651) defines *utkoca* (bribe)[820] as what is obtained in these ways viz. by giving (or threatening to give false) information about a person as a thief or a felon, or as one who breaks the rules of decent conduct, or as an adulterous person, or by pointing out those who are of bad character or by spreading false reports about a person. He further provides that a person offering the bribe should not be fined, but the intermediary may be fined and if the person accepting the bribe has been appointed to an office by the king he should be made to return the bribe and pay a fine eleven times as much to the king. But Kāt. adds that where a person not holding a public appointment obtains some gratification for work done, he would not be held guilty and would not have to return what he received as a reward or in gratitude. Hārita holds out[821] other-worldly evil consequences for not actually delivering what is promised or for resuming what has been already delivered as a gift viz the person doing so falls into Hell and is born as one of the lower animals and adds that what is promised as a gift for a religious purpose in so many words but is not actually delivered becomes a debt in this world and the next i. e. the king should make the promisor give the

II. p. 192, which remarks 'ऋणवदित्यभिधानेन अर्थादप्रदायको दाप्यो दण्डश्चेत्युक्तम्' स. वि p 285 ascribes the first verse to कात्या. and reads 'कल्पकोटिशतं मर्त्यस्तिर्यग्योनौ०'.

promised gift and should inflict a fine. Kāt. (642) provides[822] that a man who having voluntarily promised a gift to a brāhmana does not deliver it should be made to render it as a debt and should be awarded the lowest amercement and further (verse 566) that if a man promises a gift for a religious purpose whether in good health or in disease, his son (or other heir) should be made to pay it if the promisor died without actually delivering it These verses show that in two cases gifts though not completed by delivery of possession were enforced by ancient Indian courts viz. when the gift was promised to a brāhmana or when the gift was declared to be made for a religious and charitable purpose. The last verse contains the beginnings of the idea of a will, since the mere declaration of the intention of a man to give for a religious purpose is made enforceable after his death against his son or heir. But this germ could not evolve into a full-fledged law of testamentary succession on account of the practice of adoption, the requirement that a gift must be accompanied by present possession and the incidents of the joint family on account of which no single member could alienate family property except for legal necessity and which involved the doctrine that on the death of a member his rights ended and passed by survivorship to other members. Br. expressly states this.[823] But a gift though promised need not be paid or carried out if the promisee turns out to be an irreligious man (Gaut. V. 21). Nār. VII. 12 and Br. provide that he who enjoys an invalid gift and he who makes a forbidden gift are both to be punished by the king.[824]

In H. of Dh. vol. II. p. 841 it has been stated that gift consists in the cessation of the ownership of the donor in a thing and creating ownership in another. This latter is effected by acceptance (*svīkāra*) by the donee. Acceptance may be made mentally, vocally or physically. For the formalities accompanying a gift such as sprinkling water on the thing donated and the

offering of a *dakṣiṇā* to the donee, vide H. of Dh. vol. II. p. 855. Some writers like Jīmūtavāhana dispute the statement[825] that acceptance is necessary to constitute a gift The Dāyabhāga states that by the mere relinquishment of a thing by the donor (i. e. by the activity of the donor himself) the ownership of the thing passes to the person intended as the donee, that the ownership of the other man does not arise by acceptance, that though ownership in the donee does arise by the mere activity of the donor, yet acceptance (svīkāra) which is an activity of the donee makes the thing donated capable of being disposed off by the donee as he likes on account of his idea 'this is mine' The Dāyabhāga indulges in casuistical reasoning in support of its view, which it is not necessary to set out here. But the remarks of the Dāyabhāga are not satisfactory, since it does not adequately explain what is to happen if the intended donee refuses the gift On its hypothesis ownership has passed to the donee without acceptance being necessary. If the donee refuses, or dies without accepting, who is the owner? Can it be said that the thing becomes the property of whosoever first takes it up and that the donor cannot prevent a third person taking it up? The V. P. pp. 426–428 severely criticizes the Dāyabhāga for its views

CHAPTER XX

VETANĀSYĀNAPĀKARMA, ABHYUPETYĀŚUŚRŪSĀ AND SVĀMIPĀLAVIVĀDA

(Non-payment of wages, non-rendition of service, dispute between master and herdsman).

The question about the payment or non-payment of wages to those whose services are hired for work is dealt with under this title (Nār IX. 1) According to Br. there[826] are three titles of law in which the question of hiring enters, viz. *abhyupetyāśuśrūsā*, *vetanasyānapākarma* and *svāmipālavivāda*. Manu and Kaut. do not treat of the first of these three Here *vetanasyānapākarma* will be first dealt with, then *abhyupetyāśuśrūsā* and *svāmipālavivāda* will be separately treated of. All these three topics are concerned with masters and servants or employers and employees The rules are different according as the contract of service is for a fixed term or for an indefinite period or is for executing a definite piece of work and according as the rate of wages or the hire is fixed beforehand or is not fixed. We have further to remember that the rules are spread over a large period i. e from about 6th century B C. to about 500 A. D. (from Gaut. and Āp. to Br. and Kāt) The rules deal with the liabilities of both masters and servants Nār. IX. 2 states that the wages agreed upon may be paid at the beginning, in the middle or at the end of the work undertaken. But when no wages are settled beforehand Nār. IX. 3, Yāj II. 194, Kaut. III.[827] 13 provide that the (agent of a) trader, the cowherd, the husbandman should receive a tenth part respectively of the profit, of the milk and of the crops. This latter according to the Sm. C. II p. 201 holds good where the crops are raised easily But Br.

826. अतेऽयादिकमाख्यातं भृतानामुच्यते विधिः । अशुश्रूषाभ्युपेत्यैतत्पदमादौ निगद्यते ॥ वेतनस्यानपाकर्म तदनु स्वामिपालयोः । क्रमशः कथ्यते बादौ भृतभेदत्रय स्थितम् ॥ बृह. in वि. र p 139, वि चि p. 41.

827. कर्मकालाद्यरूपमसम्भाषितवेतनः । कर्षक सस्याना गोपालक सर्पिषां वैदेहक पण्यानामात्मना व्यवहृतानां दशभागमसंभाषितवेतनो लभेत ॥ अर्थशास्त्र III 13, भृतावनिश्चितार्थां तु दशभागं समाप्नुयुः । लाभगोबीजसस्यानां वणिग्गोपकृषीवलाः ॥ नारद IX. 3 This is ascribed to कात्या. by स. चि p 298

S. B. E. vol. 33 p. 345[828] verse 13) lays down the rule that if the employer supplies food and clothing to the servant, the latter should get a fifth part of the crops (if no wages are settled) or a third part if the servant is given no food nor clothing by the employer. When no wages are settled Vṛddha-Manu prescribes that proper wages will be determined by experts in carrying[829] maritime trade (and other traders) who take into consideration the time, the place and the purpose Even when the wages were settled the employer could give less or more according to his pleasure in certain cases viz when a servant or agent acts against the restrictions of time and place prescribed by his employer and consequently the profit is much less, the employer may give less than what is agreed but if the agent brings more profit (than expected) he may give more (Yāj II. 195). When two or more employees undertake to finish a work but cannot finish it (owing to ill-health or similar obstacle) each of them should be given the wages appropriate to the portion done by each (as settled by an arbitrator), but if the whole work is finished by them the agreed wages must be paid to all of them together (Yāj. II. 196). Yāj. II. 193, Nār. IX. 4 and[830] Br. state that it is the duty of the employed or servant to take as much care of the utensils supplied by the employer as he would take of his own, and that he should not act in that respect wantonly (or crookedly) and that if he did so his wages would become less. If a hired servant, after receiving his wages, does not do the work agreed to be done though able to do so, he should be made to repay to the employer the wages received and a fine equal to double of the wages and if he had not received wages but left the work without cause he should be made to pay to the employer

an amount equal to the wages (Yāj II 193, Nār. IX. 5, Br. in SBE vol. 33 p. 345 verse 15). Kaut (III. 14) prescribes a fine of 12 panas for a hired servant who does not do the work undertaken even after receiving the wages and that he should be compelled to do the work. Nār. IX. 5 and Kāt. 657 provide that that the king should compel him to do the work and then the agreed wages may be paid to him ; but if he does not do it he should be fined [832] The fine in such cases acc to Vrddha-Manu was 200 panas. Manu VIII. 215 and Br. (S. B. E. 33 p. 345 verse 16) and Matsya 227. 9 provide that a hired servant, who though not ill, does not arrogantly do the work agreed should be fined eight *krsnalas* and would not get wages at all. This applies where a substantial portion is left undone, but where only a little of the work undertaken is left undone then the servant is not to be fined, but he would lose all the wages (Manu VIII. 217). But if a servant falls ill, then he may do the work after he becomes well and would get the agreed wages even if a long time may have elapsed (Manu VIII. 216). Kaut. (III. 14) also provides that if the servant suffers from illness or is overwhelmed by a calamity, concession may be given to him or he may offer a substitute. The Āp. Dh. S. (II. 11. 28. 2–4) prescribes that if a husbandman who is not a slave but is hired for work) gives up the work or a cowherd acts similarly he should be punished with flogging and the animals handed over to the cowherd should be taken back from him. This may have been the ancient law, but it was modified in later ages. Kaut. (III. 13) states that if the employer does not pay the wages he should be fined six panas or a tenth part of the proper wages or the wages agreed upon and if the hired person denies the receipt of wages (though he really received them) he should be fined twelve panas or a fifth part of the wages [833] Kaut. (III. 14) further provides that in the contract of service it may be provided that the master is not to employ

another servant or that the servant is not to work for another master during the period fixed.

Yāj. II. 197, Nār IX. 9, Kāt. 659, Visnu Dh. S.[834] V. 155–156 provide that if through the fault of a carrier (and not through act of God or the king) goods entrusted to him for carrying are lost or become deteriorated, he should be made to pay for the loss. Vrddha-Manu specifies that if the goods are lost through the negligence of the servant he has to pay only the price, but if through spite then he should be made to pay double the price. If a hired servant (such as a palanquin-bearer or an armed guard) causes obstruction (by refusing to work) at the time of starting for an auspicious matter (such as a marriage), he should be made to pay double the amount of the wages agreed upon and another servant may be engaged (Yāj. II. 197, Nār. IX. 8, Kāt. 658, Vrddha-Manu in V R. p. 163). Yāj. II. 198, Nār. IX. 7 provide that if a servant abandons his work (as a bearer or guard) after a start is made (when not seized by illness) he should be made to pay $\frac{1}{5}$, $\frac{1}{4}$ or the whole of the wages according to the distance traversed and a master abandoning a servant in similar circumstances should be made to pay similarly.

If a servant agrees to take a lump sum for some work to be done for a certain period and leaves the work before the period elapses he would lose all the wages, but if he leaves in the middle of the period through the fault of the employer (such as scolding without any fault of the servant) he would be entitled to receive a proportionate part of the wages (Nār. q. by V. R. p. 161).[835] Visnu Dh. S V. 153–154 and 157–158 provide that in the same circumstances the servant would have to pay a fine

The provisions for breach of contract of personal service during a journey and the like set out here are very mild as compared with the severe punishment provided for it under section 490 of the Indian Penal Code (repealed in 1925).

835. कालेऽपूर्णे त्यजन् कर्म भृतेर्नाशमवाप्नुयात्। स्वामिदोषादपक्रामन् यावत्कृतमवाप्नुयात्॥ नारद q. in वि र p. 161, व्य म p 326. त्यजेत्पथि सहायं यः आन्तं रोगार्तमेव वा। प्राप्तुयात्साहसं पूर्वं ग्रामे त्यहमपालयन्॥ कात्या 660 q. by वि. र. p. 665, अपरार्क p. 800.

of 100 panas and that if the employer abandone the eervant before the period fixed has expired he would have to pay the whole of the wages to the servant and a fine of one hundred panas (except in the case of act of God and the king). Kāt (660) provides that a master deserting on a journey his servant that ie tired or falls ill should be fined the first amercement if he doee not wait for three days in the village. If a trader after engaging a vehicle or draught animals for carrying his merchandise for hire, doee not employ them to carry his goods he should be made to pay a fourth of the hire settled and the whole of it if he discharges them when only a part of the journey has been made (Nār. IX. 7) If the merchandise be attached[836] (by the king'e officers for toll &c.) or be etolen the servant engaged to carry the goods will receive a proportionate amount (out of the lump sum agreed to be paid for a certain journey) according to the distance travelled (Kāt. 661) If the employer doee not pay the wagee of a servant even though the latter hae done his work the king should make him pay the wagee and also a proper fine (Br in S. B. E vol. 33 p 346 verse 18). If a man[837] having hired elephants, horses, bulls, assee or camele does not return them even though the work (for which he hired them) is finished he should be made to restore them together with the hire (up to the day of return) The same rule applies to a man taking on rent a house or water (reservior) or a market and not giving it up at the time fixed (Kāt. 662–663) Nār. (IX. 20–21) provides that if a person builds a house on another's land by paying rent (*stoma*) for the land, he may take away when vacating the land the bricks, the timber and grass (thatch) of the house built by him, but if a man builds a house on another'e land without paying rent and against the owner'e wish then he has to leave

836. यदा च पथि तद्भाण्डमासिध्येत क्रियेत वा । यावानध्वा गतस्तेन प्राप्नुयात्तावतीं भृतिम् ॥ कात्या 661 q by स्मृतिच II 204, वि र p 164, कृते कर्मणि च, स्वामी न दद्याद्वेतनं भृते । राज्ञा दापयितव्य. स्याद्विनय चाप्युरूपत ॥ बृह in स्मृतिच II p 204, वि र p 165

837. हस्त्यश्वगोखरोष्ट्रादीन् गृहीत्वा भाटकेन या. । नार्पयेत्कृतकृत्यार्थं स तु दाप्य सभाटकम् । गृहवार्यापणादीनि गृहीत्वा भाटकेन यः । स्वामिने नार्पयेद्यावत्तावद्दाप्य सभाटकम् ॥ कात्या 662–663 q by स्मृतिच II p 205, वि र pp 168–169, परा मा III pp. 330–331. The word भाटक (which corresponds to the word भाडें in Marathi and other vernaculars) appears to be a *prākrit* equivalent of the old Sanskrit word भृति treated again as a Sanskrit word In Sanskrit वेतन or वृत्ति is used for wages, while भाटक or स्तोम means rent of a house or land or the like

the materials of his house to the owner of the land when he has to give up the land. An important rule is stated by Br. (S. B. E. vol. 33 p. 346 verse 17) that when a servant[838] employed by an employer does some improper act (such as a theft) to another for the benefit of his master, the latter would be held responsible for the loss. The Matsyapurāna says that if a teacher having agreed to teach a lore or craft for money which he receives fails to do so, he should be fined the whole of the amount[839] of the fee.

From the above it will be clear that contracts of service and letting on hire are lumped together under one head by the smrtis.

Kaut. III. 14 provides that persons may be paid wages by a guild or corporation of workers of which they are members. The earnings of such guilds may be divided equally among all workers or as agreed upon among themselves. Yāj. II. 265 also refers to the fact that rules similar to those of partnerships may apply to guilds of husbandmen and artisans.

Certain rules are laid down in Nār. IX. 18, Yāj. II. 292 and Matsyapurāna 227. 144–146 about the monetary liabilities of prostitutes and persons visiting them. Vide H. of Dh. vol. II. pp. 638–39 above. The Matsyapurāna (227. 144–146) states that a brāhmana who visits a prostitute should be fined as many panas as he paid to her, that if a prostitute after receiving her fee does not receive the visitor and goes elsewhere she should be made to pay to the visitor double of the fee and a similar sum as fine to the king, and that if one, after telling a prostitute that she is to visit a certain person, takes her to a different person, he should be fined one gold māsaka.

The Matsyapurāna (227.147) further states that a visitor who has had sexual intercourse with a prostitute and yet has not paid her fee should be made to pay double the (agreed) fee to her and a similar sum as fine to the king. Nārada provides that the chief prostitutes and the voluptuaries that stay with them

should help in deciding monetary disputes in which prostitutes are concerned[840] (q in Sm. C. II. p. 206 and others). Nār. (IX. 18-19) prescribes the payment of eight times the fee and a similar fine in the case contemplated in Matsya 227. 147.

Abhyupetyāśuśrūṣā (non-rendition of service after making a contract to serve or obey)[841]. Nār VIII. 1 defines it as the title in which after having undertaken to serve or obey one does not act up to it. The ancient dharmasūtras mention only two kinds of servants viz. agricultural labourers and herdsmen Vide Āp Dh. S. II. 11. 28. 2-3 and Gaut. XII. 16-17[842]. Acc. to Nār. VIII. 2 and 3 there are five kinds of servers (or attendants) viz. four that are called *karmakara* (performers of labour) and the fifth class comprehends slaves of fifteen kinds; and the four *karmakaras* are pupil (*śisya*), apprentice (*antevāsin*), a hired servant (*bhṛtaka*) and one who supervises hired servants (*adhikarmakṛt*). Not being free to do as they like is the common attribute of these five kinds of attendants, but there is a distinction among them due to their castes, their peculiar actions and their mode of maintaining themselves (Nār VIII. 4). A śisya (pupil) is one who desires (from his teacher) instruction in Vedic learning, an antevāsin is one who receives instruction in some craft such as goldsmith's work or dancing, a hired servant is one that does some work for wages, an adhikarmakṛt is one who supervises hired servants. Work is of two kinds, *śubha* (i. e. pure, done by the four kinds of karmakaras) and *aśubha* i. e impure (done only by slaves). Aśubha acts comprise[843] (Nār. VIII. 6-7 and Kāt. 720) sweeping the doors of houses, pits in which leavings of food are thrown, roads, rubbish heaps; scratching or shampooing the private parts (of the masters); collecting and throwing away leavings of food, ordure and urine and making use of one's limbs (hand &c) at the master's desire for wiping off the master's private parts, all other actions are pure Karmakaras do work for securing Vedic learning or *vijñāna* (art or craft), some desire or money. The

843. विण्मूत्रोन्मार्जनं चैव नग्नत्वपरिमर्दनम् । प्रायो दासीसुता कुर्युर्गवादिग्रहणं च यत् । कात्या 720 q. by वि र p. 144

duties of a vedic student are described by Nār. VIII. 8-15 and have been set out above in H. of Dh. vol. II. pp. 305-312 viz. to wait upon the teacher, his wife and son, to beg for food, to sleep on the ground, to do the bidding of the teacher, to learn the vedas, to offer fee to the teacher at the end of vedic study. An apprentice is distinguished in his actions and mode of maintenance from a śiṣya. The antevāsin, acc. to Yāj. II. 184, Nār. VIII. 16-21, Br. (S. B. E. vol. 33 p. 344 verse 6) and Kāt. 713, resides with a master craftsman to learn some[844] art or craft (such as goldsmith's work, singing, dancing, house-building), agreeing to work under him for a stated period, the master craftsman gives him food and teaches him in his own house, does not put him to any other work; if the apprentice leaves the teacher even though the latter is willing to teach him, he (the pupil) should be made to stay with the teacher and may be whipped or confined; the pupil even though he may have become an adept has to stay with the master till the end of the agreed period and the teacher appropriates the fruits of the apprentice's labour. If the master does not instruct the apprentice in the craft and makes him do other work, he would be liable to pay the first amercement and the pupil may leave him[845].

Hired servants have different grades among them arising from the work they do, the wages they receive and the period for which they are employed and they are distinguished from apprentices in these respects and not as regards caste or mode of maintenance. According to Nār. VIII. 22-23 and Br. (S. B. E vol. 33, p 344 verse 8) a hired servant is of three kinds and his wages depend on the work he does and his ability to do it. The three kinds are the highest (viz a soldier), middling (an agriculturist), the lowest[846] (a porter) A hired servant may

be engaged for a day, a fortnight, a month or for longer periods, should perform the work undertaken and get the wages agreed upon.' He may be paid in cash or by giving him a share of crops or a share in the milk of the cattle he tends[847]

A person who is employed and given authority over all servants and also one who looks to the affairs (expenditure &c.) of the household is called 'adhikarmakrta (or-krt), acc. to Nār. VIII. 24. All these four are called workers in clean occupations, while the fifteen kinds of slaves are employed in the lowest and dirtiest work (Nār. VIII. 25) The difference between the hired servants and slaves is this that the latter surrender all their freedom and themselves entirely to another, while the former, though dependent to some extent, do retain some freedom (Kāt 715), but a brāhmana was not to be a slave[848]. In very ancient times the master's liability for the acts of his servant does not seem to have been recognized. For example, Gaut XII 17 states that if cattle entrusted to a herdsman cause loss to crops, then the herdsman is to be held responsible (and not the owner who employs the herdsman). But Manu VIII. 243, Yāj. II. 161, Nār XIV. 29 appear to hold the master liable to make good the loss caused by the herdsman's default Vide Br. quoted above under *vetanasyānapākarma.*

The kinds of slaves and the incidents of slavery have been already dealt with in H. of Dh. vol. II pp 180–189. A few matters not referred to there may be dealt with here 'Buddhist India' p. 55 (by Rhys Davids) shows how slavery in the Buddhist period was not as miserable as under the Greeks The Rājatarangini IV 39 states that king Vajrāditya of Kashmir (in the 8th Century A D.) sold many men as slaves to Mlecchas. One cannot help blaming the British Indian Government for the Assam Labour and Emigration Act (VI of 1901) whereby a modified form of serfdom or slavery was legalised for the benefit of the tea planters of Assam, Bengal and other provinces and by sections 168–169 of which poor indentured labourers who were induced to labour on the sumptuous monthly wages of five rupees were liable to be sentenced to fine or in

default to imprisonment, if they left off the work to which by agreement they were tied down in unhealthy districts and unhealthier surroundings.

Kāt. (725) provides that[849] if a woman who is not a slave marries a slave she becomes a slave since her husband is her lord and is dependent on his master. If a person buys or sells a brāhmana woman[850] as a slave the king should annul that transaction and all persons (concerned in it) should be fined by him and the same holds good in the case of a woman of a respectable family who took shelter with a person and was made a slave by him or transferred by him to another as a slave (Kāt. 726–727). The punishment of first amercement is prescribed for a person who has sexual intercourse with the nurse of his child or with another woman who is not a slave and the wife of his attendant as if she were a slave; and a fine of two hundred panas is provided in case a master who is not in difficulties and is well-off desires to sell a female slave who is faithful and weeps bitterly (being unwilling to leave him). Nār. VIII. 40 provides that if a slave leaves his master and goes over to another saying 'I am your slave' that would not help the slave, as his former owner would be entitled to claim him back. Uśanas states[851] that a *guru* (elderly person), a *sapiṇḍa*, a brāhmaṇa and persons of the lowest castes (cāṇḍālas &c.) cannot be made slaves, nor can any one (of the higher castes) who is superior in learning be the slave of one of the same caste.

CHAPTER XXI

SAMVID-VYATIKRAMA AND OTHER TITLES

(Violation of compacts or conventions)

Nār. (XIII. 1) employs the expression *samayasyānapākarma*, Manu VIII. 5 employs the first expression. Manu (VIII. 218-219) has both names in view, when he says 'I shall now declare the rules applicable to those who violate *samayas* (conventions) He who having entered into a compact (*samvid*) under (the sanction of) an oath with the inhabitants of a village or a district or with a group of traders or other persons breaks it through greed should be banished from the kingdom by the king.' In Āp. Dh. S. I. 1. 1. 2 and II 4, 8 13 the word 'samaya' [852] is employed in the sense of 'convention or accepted doctrine'. The same word is also used in the sense of 'agreement' as in Yāj. I 61 (*gāndharvah samayānmuthah*) In this title it means 'the acceptance of a certain rule or convention arrived at by many', as explained by [853] Medhātithi on Manu VIII. 219. It signifies a local or caste usage or convention made by groups of people (such as guilds and corporations) binding on all members that form or join the several groups. The Amarakosa holds that *ācāra* and *samvid* are among the several meanings of *samaya* Medhātithi explains that, if the inhabitants of a village come to a decision that they would oppose the inhabitants of a neighbouring village who were indulging in grazing their cattle in the pastures of the former village or diverting the watercourses and that if in doing so there was a riot or a suit were filed before the king, all should

853 समयसिद्धि (समय सिद्ध ?) सङ्केत इदं मया भवतामनुमते क्रियतां इत्यभ्युपगम । मेधा on मनु 8. 219. समया. शपथाचारयोलसिद्धान्तयोश्च । अमरकोश Medh on Manu VIII 220 takes the word 'saṅgha' by itself and [illegible] (S B E vol 25 p 293) is misled (probably by some corrupt [illegible] translating as 'belonging to a corporation inhabiting a village or a [illegible] मेधा says 'स्वं ग्राममुदायो देशसघ (देश सङ्घ) एकधर्मानुष्ठाना सजातीयानाजातीयानामपि प्राणिनां समूहो यथा मिक्षणां सङ्घो वणिजां सङ्घ इत्यादि सङ्घ इति ।'

be of one mind, that any one of those who encouraged this decision would be liable to be punished if he backed out of it through some inducement offered by the headman of the other village. Nār. XIII. 1 explains that *samaya* means the rules (or conventions) settled among heretics, *naigamas*[854] and the like. Yāj II. 192 and Nār. XIII. 2 provide that the conventions of guilds, *naigamas*, heretics, śrenis, pūgas, ganas and in towns and districts should be enforced by the king and their traditional mode of conducting their business should be protected Some remarks have already been made on guilds and corporations above (pp. 156-57 notes 196-198). Vide also H. of Dh. vol. II. pp. 66-69 for the guilds and corporations and the meanings of words like *śreni*, *pūga*, *gana* etc. Some further information is added here. The Sm. C. (II. p. 223) has a very[855] interesting note illustrating the various conventions of several groups and its remarks are copied *verbatim* by the V. P. pp. 332-333. It says: 'Even heretics have certain rules made for the benefit of their monasteries Among naigamas there is a practice that those who disregard messages brought by servants wearing a specific jacket (as a uniform) should be fined. Śreṇis are guilds of craftsmen such as weavers. They have rules that certain articles are to be sold only by a certain guild and by no other. Pūgas are groups of elephant riders and horse riders.' Vrāta is defined by Kāt. as a body of persons armed with various weapons, while the Mahābhāsya on Pānini V. 2. 21 (*vrātena jīvati*) explains it as a 'group of men of several castes and several occupations who make a living by relying on their formidable bodies'. Acc to the Mit. heretics are those like the Bauddhas who do not regard the Veda as authoritative. Gana means, acc.

---

854 नैगम is defined by पद्मत्रिंशन्मत as follows. पौरुषेयतया वेदं प्रामाण्य (वेदप्रामाण्य ?) प्रवदन्ति ये। तेषा वैशेषिकादीना नैगमाख्या प्रकीर्त्यते॥ q by व्यव नि p 13 But this sense is not appropriate here The same work (p 14) quotes कात्यायन's definition which is more appropriate 'नानापौरसमाजस्तु नैगमाख्यः प्रकीर्तित॰ ।'

855 पूगव्राते चान्योन्यमुत्सृज्य समरे न गन्तव्यमित्यादयः सन्ति समया । गणे तु पञ्चमेद्धि पञ्चमे वाद्दे कर्णवेध कर्तव्य इत्येवमादिरस्ति समय । गणादिशब्देन ब्रह्मपुरीमहाजन. परिगृहीतः । तत्र गुरुदक्षिणाद्यर्थमागतो माननीय इत्यादिसमयोस्ति । दुर्गे तु धान्यादिकं गृहीत्वा अन्यत्र यात्यतो न तद्विक्रेयमित्यस्ति समय. । जनपदे तु क्वचिद्विक्रेतृहस्ते दशबन्धग्रहण कार्य क्वचित्कोतृहस्ते इत्यादिकोस्त्यनेकविध समयः । जनपदे तथेत्यत्र तथाशब्दोऽनुक्तधान्यघोषगुरुादीना प्रदर्शनार्थ. । तत्र न गोमच्चारस्थाने क्रातव्यमित्यादिकोस्ति ग्रामे समयः। आभीरस्त्रीपुरुषव्यभिचारे न दण्ड इत्यादिकोस्ति घोषे समय· । स्मृतिच II p 223 on नारद XIII 2 'पाषण्डिनैगमश्रेणीपूगव्रातगणादिषु । सरक्षेत् समय राजा दुर्गे जनपदे तथा॥'.

to Mit 'an assemblage of armed persons subsisting by following one occupation', while Kāt (680) says it is a corporation of brāhmaṇas. In the Rājat II. 132 reference is made to corporations of purohitas at temples and tīrthas (sacred places). The Sm. C states that among pūgas and vrātas there is a convention that they must go to battle all *together* and not separately. Among ganas there is a usage that the lobes of the ear (of a child) are to be pierced on the 5th day or in the fifth year from birth. Among *mahājanas* in a settlement of brāhmaṇas there is a convention that a brāhmaṇa repairing to them for collecting fees to be paid to his teacher (at the close of Vedic study) should be honoured (i e. should be paid some contribution). In certain districts there is a usage that either the seller or the buyer should keep in his hand $\frac{1}{10}$ of the price (probably for finding out whether the article is useful for the purpose in hand and resiling from the bargain if it is not). In forts or capitals there is a rule that corn taken out of it by a person with him when going out elsewhere should not be sold by him. In villages there is a rule that in pastures no digging would be allowed. In the hamlets inhabited by ābhīras there is a convention that for adultery by a male or female there is to be no fine. It does credit to the ancient writers on dharmaśāstra that they were tolerant enough to require the king, whatever his own religious persuasion might be, to honour and enforce the usages of even heretics among themselves. The only requirement was that the enforcement of their usages must not be opposed to the interest of the country or the capital and must not cause commotion and must not be plainly immoral[856] (Nār XIII. 4-5 and 7 and Medhātithi on Manu VIII. 220) Yāj (II. 188-192) lays down the following rules: there should be a committee (of two, three or five, acc. to Br.)[857] to look after the business of the guilds &c (called *kāryacintaka*) who should be religious, pure, not covetous and all members should carry out what they decide upon; when the committee members approach the king on some business of their guild he should bestow on them gifts and

857. द्वौ त्रयः पञ्च वा कार्या समूहहितवादिनः । कर्तव्य वचन तेषा ग्रामश्रेणिगणादिभिः ॥ बृह q in स्मृतिच II. p 224, व्य म p 334 For the qualities of the committee members (similar to Yāj II. 191) vide Br (S. B E vol. 33 [illegible] by व्य. म p. 334.

honour them. Whatever is obtained by any one sent on the business of the group must be handed over by him to the heads of the group (also Br. in S. B E. vol. 33 p. 349 verse 22)[858] and if he does not do so he should be fined eleven times as much. Whoever goes against the heads of the group that are working for its benefit should be punished in the first amercement (by the group itself, acc. to Sm. C. II. p 224). Kāt. (677) states the general rule that whatever is obtained (by the committee or advisers of the group) or is saved by them or whatever debts are incurred by them for their group and whatever they obtain through the king's favour should be shared equally by all (members of the group). Kāt. (674–675) provides that whatever debt was professedly incurred by the committee for the group but was misappropriated by them or applied to their individual purposes must be paid by them and that those who subsequently join the groups already formed become equally entitled to the property and liable for the debts previously acquired or incurred. Manu VIII. 220 and Br. (S. B. E. vol. 33 p. 348 v. 14) provide a fine of six *niskas* of four suvarnas each (or six niskas and four suvarnas) for him who falls out with his associates. Kāt (671) provides that that member (of a group) who opposes what is reasonable, who gives no scope to (i. e obstructs or persistently interrupts) a speaker (in a meeting of the group) or who speaks absurdly should be made to pay the first amercement. Yāj. II. 187 prescribes forfeiture of all property and banishment for him, who misappropriates the property of the group or corporation or who violates the conventions made by the group (or the king). As stated by the Mit this and other sentences depended upon the nature and gravity of the offence and the capacity of the offender[859].

Krayavikrayānuśaya (repentance after purchase or sale). Manu VIII. 222 and Kaut. III. 15 regard this as one title of law. But Nār. (XI and XII) splits this into two titles viz. *vikrīyāsampradāna* (non-delivery of a thing after it is sold for a price) and *krītvānuśaya* (repentance after buying) Manu states the general rule that whenever a person after buying

or selling anything repents of having done so, he may return or take back that thing within ten days Nār XI 2 states that property is of two kinds in this world viz movable and immovable and that all property is designated as *panya* (saleable) in rules about purchase and sale. According to Yāj II. 254, Nār XI. 4-5, Visnu Dh S. V 127 [860], if a man sells property and does not deliver it to the purchaser, he should be made to deliver it to the purchaser together with profits (between the time of sale and delivery) and if it is movable together with the price of profits arising [861] from it (such as milk in the case of a cow) Visnu Dh S V 128 prescribes a fine of 100 panas against the vendor. Kaut III. 15 prescribes a fine of 12 panas against the vendor who after selling a thing does not deliver it and also against a buyer who having purchased does not take delivery of it, except when the thing itself is defective or is lost by act of king or theft or by fire or flood or unless the transaction was for inadequate price or brought about in distress [862] If the article sold is not delivered by the vendor after demand by the vendee and it is injured, destroyed by fire or stolen, the loss will fall on the vendor (Nār. XI. 6, Visnu Dh. S V. 129, Yāj II. 256). These rules apply when the vendor does not feel repentance for having sold the thing, but if he feels repentance then Manu VIII. 222 will apply and the vendor may pay back the price and recover the article within ten days [863] from the sale Kāt. (684) provides the same rule. No one, either buyer or vendor, can rescind the sale after ten days and if any one uses force in

860 विक्रीय पण्य मूल्येन क्रेतुर्यो न प्रयच्छति । स्थावरस्योदयं दाप्यो जङ्गमस्य क्रियाफलम् ॥ नारद XI 4 The मिता on या II 254, विवादचन्द्र (p 50), व्य प्र. p 342 and others read स्थावरस्य क्षयं and explain 'विक्रयानन्तरं जात उपभोग क्षय·' (व्य प) and 'क्रिया वाहनादिका फलं बुध्यादि । समाहारोयम्' (विवादचन्द्र p 50)

861 'Udaya' in Nār and Yāj may mean either the profits from the property that the vendor enjoyed or the difference in price between the date of sale and the date of delivery if the property became less in value. This applies when both parties are inhabitants of the same place, but if the purchaser is one who comes from another country then he may be awarded the profit that he would have made in the other country by selling it if it had been delivered to him at once

862. क्रीतमक्रीणतो या हानि· सा क्रेतुरेव स्यात् । विष्णुधर्मसूत्र V 129, विक्रीय पण्यमप्रयच्छतो द्वादशपणो दण्डोऽन्यत्र दोषोपनिपातादिवक्षोभ्य· क्रीत्वा पण्यमप्रतिगृह्णतो द्वादशपणो दण्डोऽन्यत्र दोषो · क्षोभ्य । कौटिल्य III 15.

863. एवं धर्मो दशाहात्तु परतोऽनुशयो न तु । कात्या 684 q. by स्मृतिच्च II p. 218, वि र p 192, परा मा III p 367

recovering the article sold or bought after that period the king should fine him 600 panas Manu VIII 228 extends these rules about repentance and recovery within ten days to all transactions whatever. Kāt. (685) prescribes that the period of ten days for repentance is allowed to vendors and vendees only in the case of land, and that the period is 12 days when the parties to sale of land are sapiṇḍas of one another and that in other cases the period is even shorter.[864] Yāj. II. 257, Nār. XI. 7-8, Br. (S. B. E. vol. 33 p. 350 verse 4) provide that when a vendor having sold a thing to one man for a price received sells it to another or having concealed the defects of an article sells it as free from defects he should be made to return double the price to the purchaser and a fine equal to double the price to the king.[865] The above rules apply where the purchaser has paid the price, but if there is a mere agreement and no price is paid, then the vendor or vendee is guilty of no wrong if he resiles from the bare agreement to sell or buy unless they have made an express stipulation that the agreement cannot be rescinded (Nār. XI. 10). When at the time of the agreement for sale, the vendee pays something by way of earnest, then if the sale goes off through the fault of the vendor, the latter has to return to the vendee double of the earnest;[866] but if the purchaser does not finally take it he loses the thing and also the earnest. Nār. XII. 1 prescribes that when a vendee after having purchased a thing for a price repents of the purchase that is the title of law called 'resoission of purchase.' Nār XII. 2 prescribes that if the purchaser thinks that he has made a bad bargain he may return the thing purchased to the vendor on the same day in an undamaged condition (and may receive back the price paid); but if he returns it on the 2nd or 3rd day after the purchase (including the day of purchase) he will have to lose respectively one-thirtieth or one-fifteenth of the price and after the third day he cannot return the thing at all (Nār XII. 3). But Yāj. II. 177 and Nār. XII. 5-6 lay down

the following periods for examination of things purchased, viz one, three, five, seven, ten days, half a month and one month respectively in the case of iron (and clothes), milch cattle, beasts of burden, jewels (precious stones, pearls and corals), all sorts of grain, a male slave and a female slave It must be supposed that these verses contain exceptions to the general rule in Manu VIII 222 cited above. Kaut. (III. 15) allows only one night, three nights, five nights and seven nights for repentance to traders, husbandmen, cowherds, the mixed castes and higher castes and provides that where the articles sold are perishable a very short time only may be allowed. The above rules apply only when the purchaser made no examination at the time of purchase Nār.[867] XII 4 and Br. (S. B. E vol 33 p. 350 verse 3) recommend that a purchaser should himself closely examine an article before buying it and also show it to others in order to find out its defects and good qualities and provide that when he has approved of an article after close examination he cannot return it to the vendor Vyāsa provides that hides, fuel, bricks, yarn, grain, intoxicants, fluids, gold, inferior metals (like lead and tin) and other wealth should be carefully examined then and there i. e. when once bought after close examination none of these can be returned even if some defect[868] is found therein Nār. (XII. 5-6) cited above contains exceptions to this Nār XII. 7 gives an example of a purchase being not liable to be rescinded when a defective article is purchased with open eyes viz. a worn garment which is soiled with dirt and is in ragged condition cannot be returned to the vendor if it was in that state at the time of the purchase i e the maxim '*caveat emptor*' applies. If a purchaser does not take delivery of the thing sold to him, the vendor may sell it again to another[869] and if the thing is lost through act of God or the king the loss falls on the buyer alone (Yāj. II. 255, Nār XI 9) Kāt (692) provides[870] that what has been sold by a lunatic or an intoxicated

person or through intimidation or for an inadequate price or by one who is dependent or by an idiot should be relinquished by the purchaser; it still belongs to the seller Kāt. (705–706) lays down a novel rule to find out what is adequate or inadequate price What[871] is decided by the neighbours assembled together, who know (the land &c and its value) and who are afraid of committing sin, as the price of fields, gardens, houses and the like, of bipeds and quadrupeds, is declared to be the proper price; a price which is less or more than it by one-eighth is declared to be improper; what is sold for an improper price may be annulled even after a hundred years Kāt. (704) states that when the owner of a field absconds together with the surety[872] for the payment of the land tax, the judges of the court may order a sale for recovery of the tax and that such a sale may be set aside up to ten years and a compromise or exchange up to three generations, if it is inequitable Bhāradvāja provides that when taxes are not paid both by the tax-payer and his surety even when called upon to do so, then the king may order a charge on the land or sale of the land.

Uktalābha is defined as a conditional sale, where a man borrows only a portion of the proper price of a land and stipulates that he would return the money on a certain day and that if he did not do so his ownership over the land would come to an end[873] Kāt (711) adds that a sale of the uktalābha kind will be valid if it is for more than half (the proper price of the land), provided more than ten years have elapsed (after

873 किञ्चिच्च द्रव्यमादाय काले दास्यामि ते क्वचित् । नो चेन्मूलमिद त्यक्त केदारस्येति य. क्रय. । स उक्तलाभ इत्युक्त उक्तकालेऽप्यनर्पणात् । भारद्वाज q by व्यव नि p 351, स वि p 324. This is similar to the mortgage by conditional sale defined in section 58 of the Transfer of Property Act.

the period fixed for repayment) An *avakraya*[874] becomes valid after possession for over three generations and a (regular) purchase by mutual agreement becomes valid at once Kāt. (712) further[875] prescribes that the unpaid purchase money carries compound interest after demand if no time is fixed for payment, but, if a time is fixed, then only the balance has to be paid up to the end of that period Br provides that in all sales, the sale deed should mention the wells and trees (on the land), the water and ways and that the crops, trees and fruits, wells, tanks and house standing on the land sold would belong to the vendor if they are not put down in the deed of sale.[876] According to Hārīta the rules of sales are to be extended to exchanges.[877]

From the Rājatarangiṇī VI. 41 it appears that a fraudulent purchaser, who, by means of the heavy bribe of 1000 *dināras*, induced the officially authorized scribe to include a well in the sale of a house when it was intended to be excluded from it, was banished from the country by the king, his property being confiscated and given over to the cheated vendor.

874. अर्धाधिके क्रय· सिध्येदुक्तलाभो वृशाद्धिक.। अवक्रयस्त्रिभोगेन सद्य एव रुचिक्रय.॥ कात्या. (711) q by व्यव नि. p 349 (which reads ऋणक्रिया at the end, that makes hardly any sense) and स वि p 326 The word अवक्रय is explained in various ways The Mit on Yāj. II. 238 defines it as a transaction whereby a bailee (e g a washerman) transfers an article bailed to him (for washing &c.) to another for hire Pāṇini IV 4 50 employs the word 'avakraya', but the Siddhāntakaumudī explains it as the due to be recovered by a king from a market (or the like). Gaut XII 39 employs the word 'avakrita' which is explained by Haradatta as meaning 'what is purchased, but the price of which is unpaid or only partly paid' This last seems to be the sense intended by Kāt. who provides that a sale of land, the price being wholly or partly unpaid, would become indefeasible only after enjoyment for three generations सुमन्तु as quoted in S V p 321 defines अवक्रय as 'अर्धदत्तमदत्तं तु क्रयमाहुरवक्रयम्। अवक्रयो निवर्तेत यदि काले न दीयते॥'

877 मत्तमूढानभिज्ञातभीतैर्विनिमय कृत। यच्चान्युचितमूल्य स्यात्सर्वं तद् विनि-वर्तते॥ हारीत q by स वि p 326. Compare sec 118 of the Transfer of Property Act.

The Vyavahāranirnaya, after quoting Br. and Vyāsa, very lucidly explains what is meant by sale, purchase, exchange &c. Gold and the like which a man desires to render or pay is called price, while land, house and the like are said to be 'panya' (saleable thing) Purchase means acceptance of a thing preceded by the offering of a price (either paid or agreed to be paid); sale is the acceptance of a price preceded by the offering of a saleable thing *Parivarta* or *parivartanā* is the acceptance of an article for an article of the same kind; if there is a disparity in value between the two articles exchanged the exchange is called '*avakraya*'; when there is an exchange of two articles of different kinds but of the same value it is called *vimmaya* [878] The Vyavahāranirnaya makes elaborate provisions for sale of land at the order of the king for non-payment of land tax It quotes Prajāpati (p. 350) to the effect that the purchaser at such a sale must offer half or at least one-fourth of the real price of the field and that the original owner could get back his property sold for the royal dues by paying the full price to the purchaser up to three generations. Other elaborate rules on the same subject are passed over here for reasons of space These provisions indicate that ownership in cultivated fields belonged to individuals and that the State had only the right to levy taxes Vide H of Dh. vol. II pp 865–869 and Kāt quoted above (on p. 196) for a discussion of the theory of the State's ownership of all lands. Taking into consideration the Pūrvamīmāmsā texts, the Vyavahāramayūkha and the verses of Kāt, and others it appears that the State was deemed to be the owner of all lands as a general proposition, but that where individuals or bodies of persons had been in long possession of lands that they cultivated, the ownership of the State was qualified and restricted only to the recovery of a tax or share

of crops and that individuals and groups that had cultivated lands in their possession were regarded practically as owners of the land subject to the liability to pay land tax and to the right of the State to sell the land for non-payment of tax. The Vyavahāranirnaya quotes Br and another smrti text that śūdras, persons excommunicated for grave sins (*patita*), cāndālas and desperate characters cannot be allowed to possess the lands of a brāhmana by sale, partition or in lieu of wages,[879] the same work further quotes Vyāsa, Bhāradvāja and Br. that when land is sold there is a right of pre-emption in favour of full brothers, sapindas, samānodakas, sagotras, neighbours, creditors and one's co-villagers in order.[880]

Gifts of immovables were looked upon in very ancient times with disfavour, though they were made even in the times of the Upanisads Vide H. of Dh vol II. pp 740–41 But sales of land must have been rarer still in ancient times owing to the patriarchal and joint family systems. The Mit on Yāj II 114 quotes a verse forbidding the sale of immovable property;[881] but sales of lands are mentioned in many copperplate grants. Vide Paharpur plate grant of Gupta year 159 i e 478–79 A. D. in E. I. vol 20 p. 59 (where one kulyāvāpa of land is stated to have been sold for two *dīnāras* to a brāhmana and his wife named Rāmī by the city council for the provision of the worship with sandal-wood paste &c of the divine *arhats* at a *vihāra*), E. I. vol 17 p 345 (grant of the time of Kumāragupta I in Gupta year 113), the Damodarpur plates (E I vol. 15 p 113), Faridpur plates (Ind Ant. vol. 39 p 193), E I vol 18 p 74 From these records of the 5th and 6th centuries A. D. it appears that land was owned by private individuals or by

880 व्यास । ज्ञातिसामन्तधनिका क्रमेण क्रयरक्षिण । तत्रासम्भवतः पूर्वे सपिण्डाश्च क्रये मता ॥ बृहस्पति । सोदकाश्च सपिण्डाश्च सोदकाश्च समाश्रिण । सामन्ता धनिका मार्गा सर्वेते भूक्रये मता ॥ q by व्यव नि pp 355–56

881 स्थावरे विक्रयो नास्ति कुर्यादाधिमनुज्ञया । q. by मिता on याज II 114

joint families or by the village community or by the king and there was a fixed procedure when land was to be sold, that the purchaser approached the District Officers who consulted the *pustapālas* that kept a record of titles and that the villagers and headmen were consulted and asked to mark off the land to be sold. It appears that the smrtis recommended that sales should be clothed in the formalities of gifts, probably because gifts were frequent and sales were not A smrti quoted by the Mit (on Yāj. II 114) states 'land passes (i. e. is transferred) with the assent of the villagers, the agnatic relations, the neighbours, the co-sharers and with the offering of gold and water' The Mit explains that these[882] are not absolutely necessary formalities of a sale, but that they are recommended for the sake of greater caution and convenience, that the assent of the villagers is to be secured for the publication of the transaction of sale, as a text says that acceptance, particularly of immovables, should be made openly, that the neighbours' assent should be secured for preventing boundary disputes, that the assent of agnates and co-sharers is desired for making it easy to complete the transaction, that it does not follow that without the assent of these the sale of land is not valid or complete. Water and gold are to be offered because gifts being highly commended, a sale should be clothed outwardly with the same formalities. Vide Dr. P. N. Sen's 'Hindu Jurisprudence' pp. 76–78 for the opposite procedure of the ancient Roman Law that gifts were to be clothed with the formalities of sale. For water and gold in the case of gifts vide above under *dattāpradānika*.

Svāmipālavivāda (disputee between the owner of cattle and herdsman who is engaged to look after them) In ancient times this must have been a prominent source of litigation in a predominantly agricultural country like India Nār. appears to have included this title under *cetanasyānapākarma*. Yāj. II. 164, Nār. IX. 11 provide that the cowherd has to bring back to the owner in the evening the cows (and other domestic animals) handed over to him in the morning by

882. यद्यपि-स्वग्रामज्ञातिसामन्तदायादानुमतेन च। हिरण्योदकदानेन बहुभिर्गच्छति मेदिनी॥ इति तत्रापि ग्रामानुमतिः-प्रतिग्रहः प्रकाशः स्यात् स्थावराय (स्थावरस्य?) विक्रयत इति स्मरणात् व्यवहारप्रकाशनार्थमेवापेक्ष्यते न पुनर्ग्रामानुमत्या विना व्यवहारासिद्धिः। विक्रयेऽपि कर्तव्ये सहिरण्यमुदकं दत्त्वा दानरूपेण स्थावरविक्रयं कुर्यादित्यर्थः। मिता on या II. 114, प्रतिग्रहः &c is या, II 176

the owner, after grazing them in the pastures and making them drink water. Manu VIII. 230 says that during the day the responsibility for the safety of the cattle rests on the herdsman and during the night on the owner provided they are in the latter's house. When there is no express agreement as to wages Nār IX. 10 and Br (S. B. E. 33 p. 346 verse 19) prescribe that a cowherd[883] will get as his wages all the milk of the cows tended by him on every eighth day plus a heifer (two years old) every year out of every one hundred cows tended by him or a milch cow with her calf every year for every two hundred cows looked after by him Manu VIII 231 provides another method when no wages are fixed by agreement viz. a hired herdsman, who is paid with milk, may milk as hire the best cow out of ten with the consent of the owner It is the duty of the cowherd to struggle as much as in him lies to protect the cows from accidents and if he is unable to do so he must quickly inform the owner (Nār. IX. 12). Br (S B. E 33 p 346 verse 20) states[884] that the cowherd shall save cattle from the danger of worms (or reptiles), robbers, tigers and from caverns and pits and that he should try to protect them to the best of his ability, should call out for help or inform his master. If the herdsman does not struggle to protect the cows, nor raise a hue and cry nor inform his master he must make good the value of the cow lost and must pay a fine to the king (Nār. IX. 13) Manu VIII 232 and 235, Yāj II 164–165, Visnu Dh S V[885] 137–138, Nār (IX. 14–15) provide that if a cow or other domestic animal strays or is killed by worms (or reptiles) or slain by dogs (and wild animals) or dies by falling into a pit or by any negligent act of the herdsman, he himself shall make good the loss, if he did not exert himself to prevent this happening or if goats and sheep are surrounded by wolves and carried away while the herdsman does not hasten to their help he shall bear the responsibility for the loss In these cases the herdsman has also

to pay a fine of 12½ panas[886] to the king (Yāj. II 165) Ap. Dh. S II. 11. 28. 6 makes[887] the herdsman liable to pay the price if an animal in his charge dies or is lost (by theft &c). Manu VIII. 233, 236, Nār IX 16, Vyāsa state exceptions to the above viz where an animal is carried away[888] by robbers though the herdsman raised a cry, he would not be liable to make good the loss provided he gave information to his master at the proper time (immediately after the animal is carried away) and proper place; or when the herdsman himself is seized or the village is attacked or the country is invaded, the herdsman would not be liable for loss or seizure of any animal under his charge; and also where, while the herd is grazing in a proper order near a forest, a wolf suddenly kills an animal. Manu VIII 234, Nār. IX. 17 state that when cattle die through act of God or king or die without any fault of his while in charge of a herdsman, he has to free himself from liability or from the suspicion of himself having[889] carried away surreptitiously the animal by producing before his master their ears, skin, tails, bladders, tendons and yellow bile or by showing their limbs (viz. their characteristic marks). Vyāsa states that if a herdsman, who has received his wages, abandons cattle in an untenanted forest and moves about in the village he should be fined by the king.[890]

Yāj. II. 166 provides that a portion of land should be set apart at the discretion of the villagers or that of the king as pasture for cows Manu VIII. 237, Yāj. II. 167 prescribe

that on all sides round a village, a *khaṭvāta* and a town an uncultivated space for pastures (between it and the fields) shall be kept respectively of 100, 200, 400 *dhanus*[891] in extent. Kāt (666) prescribes that the owner of a field (which is near a forest) should construct a high paling before the crops have grown, for animals (or deer) when they have once tasted the sweet[892] (crops) can be warded off with difficulty. Manu VIII. 239 = (Matsya 227 25), Nār. XIV 41 prescribe that a hedge should be constructed for a field that is near a public way so high that a camel cannot look inside over it or a horse or cattle cannot jump over or so thick that a dog or boar should not be able to thrust its head inside it through holes. Manu VIII. 238 (= Matsyapurāna 227 26), Yāj II. 162, Nār. XIV 40 provide that if a field situated near a village or a pasture or near a public road is not protected by a hedge and cattle straying into it cause loss, the herdsman is not to be held guilty. It is provided by Āp. Dh. S II. 11 28 5, Manu VIII. 240, Nār. XIV. 28, Kāt 664-665 that if cattle enter into fields,[893] parks or pastures that are situated near a village or a public road and are enclosed by a hedge, they may be seized or beaten off, the herdsman is to be fined (a hundred panas). Yāj II. 159-161, Manu VIII. 241, Nār. XIV 28-29, Kāt. 667 and others lay down that where cattle enter fields (not near a village or road) and cause loss, the herdsman is to be fined or whipped, the owner of the cattle is to make good the loss and

---

891 A धनु is 4 cubits (or about 6 feet). Manu VIII 237 ordains having a space of 300 *dhanus* round a city, it also says that the space round a village for pastures should be three throws of *śamyā*. Āp. Dh. S I 3 9 6 and 23 employ the expression शम्यामात्र for stating distance. शम्या means yoke-pin (युगकीलक). Vide p 145 note 185 above for *dhanus* and other measures of distance. In E I vol I. pp 154-155 a पारमेश्वरीय हस्त (the king's hand) is mentioned in an inscription dated *saṁvat* 933 at Gwalior. A दण्ड was 4 हस्तs but there were दण्डs of 7 or 10 hastas. Vide मिता on या II 106. It was but natural that in ancient times man relied upon his own fingers or hand or height as a measure of length. Vide H. of Dh vol II p 209 n 485 and n 2021 (for हस्त, दण्ड and निवर्तन), p 1034 (for Vedi being as much in length as the height of the sacrificer) and purusa as a measure of length in तै स V 2 5 1 and कात्यायनश्रौत 16. 8. 21-25. Vide also H. of Dh vol II p 989 n.

pay the fine prescribed and the fines vary e g Yāj II. 159 prescribes fines of 2, 4 and 8 māsas respectively when a goat or a cow or a she-buffalo strays and causes loss of crops, while Śāt. (667) prescribes only ¼ pana in the case of cows and sheep and ½ in the case of she-buffaloes Vide Gaut. XII 19–22 and Kaut III. 10 also. Those who purposely set cattle to eat or destroy crops were to be punished as thieves (Nār XIV. 34)

Ancient India entertained tender feelings for certain animals and in certain circumstances Nār. XIV 30, Yāj II. 163, Manu VIII. 242, Kaut III 10[894] and Uśanas provide that cows within ten days after calving, a stud bull, a horse, an elephant, animals let loose in honour of ancestors or deities, and cattle that have strayed from the herd or that have no herdsman to look after them and have met with an accident are to be warded off when causing harm to crops, but the owner is not to be fined. Uśanas[895] states that the reason for this leniency is that horses and elephants are protectors of people Aparārka (p 771) explains that this exemption applies only to the king's horses and elephants. Uśanas adds that (owners of) cows should not be fined when they cause some loss at the time of festivals and śrāddhas. The great veneration for cows led Uśanas to lay down that he who requires the owner of a cow to re-imburse the loss of crops that are eaten up or destroyed by a cow will find that his *pitṛs* and the gods do not receive the offerings made[896] by him This is explained by the Par. M. III. p 385 as referring to crops in fields near a village not enclosed by a hedge and by the Madanaratna to crops eaten at the time of śrāddha Br., Yāj II. 161 and Nār. XIV. 38 require the owner of the cow to re-imburse the owner of the crops for the loss as settled by the neighbours. Vide under 'steya' for cases in which there is no offence of theft even if a person takes certain things belonging to another without his permission.

CHAPTER XXII

SĪMĀVIVĀDA (boundary disputes).

This is called *kṣetrajavivāda*[897] (disputes relating to fields) by Nārada XIV. 1, who defines it as 'dispute with regard to land in which questions about dikes or embankments, the boundaries of fields, ploughed land and fallow land have to be decided' Nārada's idea appears to be that the word 'sīmāvivāda' in Manu is only illustrative and is a compendious way of mentioning disputes about land in general According to Kāt (732) there are six causes[898] of land disputes viz claiming more land, claim that a person is entitled to less than he possesses, claim to a share, denial of a share, seizing possession when previously there was none, boundary In all these cases boundaries have directly or indirectly to be settled and therefore all these are included under the topic of *sīmāvivāda* A boundary dispute may relate to the boundaries of a district (janapada), a village, a field and a house. Boundaries, acc. to Nār., may be of five kinds.[899] They are described as follows: *dvhajnī* is what is indicated by trees which are like a flag-staff. Manu (VIII. 246-247) prescribes that trees such as aśvattha, the silk cotton, śāla, tāla (palmyra palm), that have milky juice (like udumbara) should be planted to indicate boundaries and also bamboo clumps, bushes, reeds &c A *matsyinī* (lit. having fish) boundary is provided by rivers flowing naturally and full of fish and tortoises or by tanks and reservoirs of water (Manu VIII 248) A *naidhānī* boundary is one indicated by concealed signs (just as nidhāna i e treasure is concealed in the earth), such as pots filled with chaff, coal, bricks, bones and similar things that the earth does not corrode

and are buried inside the earth Manu (VIII. 250–251) enumerates those objects that should be buried in the earth, which would serve to indicate the boundaries of a village or field and which are therefore called concealed (*upacchannā*) by him. A *bhayāvanṇā* (free from danger) boundary is settled by the agreement of the parties The fifth kind is the one that is laid down by order of the king. Bṛ (S. B. E 33 p 351 verse 2) prescribes[900] that at the time of founding a village definite boundaries should be erected or constructed by means of visible or patent (*prakāśa*) and concealed (upāmśu or upacchanna) signs and the Sm C II. 228 explains that a row of big stones should be employed to indicate the boundary. Brhaspati (S. B. E. vol 33 p 351 verses 3–7) states what patent and concealed boundary marks should be and requires elderly persons to point them out to youths and children who in their turn when old are to point out the boundaries to other youths and in this way traditional knowledge of boundaries may be kept up. Manu (VIII. 252–253) states that in disputes boundaries should be settled in accordance with the visible and concealed signs described above, by reliance on long former enjoyment and by the constant flow of water and that if there be doubt even after observing the signs then the dispute has to be decided on the evidence of witnesses. Witnesses could either depose to the marks of boundaries or to the boundaries themselves. Those who could not point out the marks but were to define the boundaries themselves were to follow a certain procedure Manu VIII. 254 states that the witnesses should be asked about the marks of boundaries in the presence of the litigating parties and groups (or families) of the villagers The witnesses on being asked were to trace, point out and settle the boundary unanimously, being clad in red garments, wearing red chaplets and being exhorted to depose truly by their spiritual merit[901] and carrying clods of earth on their heads, by reference to mounds or depressions, coals, bones and chaff (buried underground,

in a vessel), embankments, anthills, platforms of stones or bricks (Manu VIII. 255, 256, Yāj II. 151, Nār XIV 4-6). Vas 16 13, Kaut III. 9, Yāj II. 150, Manu VIII. 258, 260, Nār (XIV 2-3) prescribe that on failure of witnesses of the adjoining villages, neighbours (sāmanta),[902] old men, cowherds husbandmen who plough the fields near the one in dispute, hunters, fowlers, fishermen, snake catchers and foresters should settle the disputed boundary in the presence of the king The Mit. on Yāj[903] II. 153 quotes Kāt (743-745, 51) to show that witnesses were divided into *sāmanta*, *mūla*, *vriddha* and *uddhṛta*, each preceding group being superior to the succeeding The Mit. further says that the neighbours as witnesses are to be arranged in the form of the layers of the petals of a lotus viz. the nearest ones (*samvāsaka*) are those most preferred, (but if this group has faults) then a second but a more removed group and then a third group still more remote may be examined Sankha-Likhita and Vas.[904] 16.13-15 prescribe that in boundary disputes the decision depends on neighbours, in the case of conflict of witnesses on documents and then on the old men in the town or village and the guilds. Yāj. II. 152 and Manu VIII. 258 require that the neighbours who are to settle the boundary should be four, eight or ten (even in number) and inhabitants of the same village (if possible). Br. (S B E 33 p 352 verse 14) requires that the witnesses[905] should know the source of title (to the disputed land), the measurement (in *nivartanas*, *dandas* &c.), the length of enjoyment or possession, the names of persons (in possession) and the characteristic geography or lie of the land The general rule was (as stated by Nār XIV 9)

that a single witness however confident he might be (or however reliable) should not take upon himself to point out and settle the boundary, since this (boundary) dispute being a very important (difficult) matter, its decision should rest with many. The Mit. (on Yāj. II. 152) explains that this prohibition holds good only if the single witness is one not accepted by both sides as reliable. But Nār. (XIV. 10) and Br. (S. B. E.[906] 33 p. 352 verse 11) hold that where a single witness accepted by both sides has to settle the boundary (in the absence of more witnesses and in the absence of reliable patent or concealed signs) he should do so after placing a clod of earth on his head, after being dressed in red robes and wearing red flowers and after observing a fast. If it was a śūdra who was to trace or lay down a boundary Viśvarūpa[907] on Yāj. II. 156 quotes a prose passage of Brhaspati that he was to be decked in red pieces of cloth, his face was to be smeared with ashes from a cemetery, a mark was to be made on his chest with five fingers dipped in the blood of a goat and the entrails of the sacrificed goat were to be tied round his neck and he was to hold a clod of earth in the right hand. All this was to impress upon him the gravity of the work and the necessity of doing his best impartially. If no knowing witness or no patent or concealed signs are available the king has himself to settle the boundary between the two villages at his own discretion (Yāj. II. 153, Nār. XIV. 11, Manu VIII. 265). He may divide the land between the two villages equally and construct new marks of boundaries, but if the disputed land will be of greater benefit to one village than to the other the king may assign the whole of the disputed land to the former Manu VIII. 245 prescribes that when there is a boundary dispute between two villages the king should decide it in the month of Jyestha when the embankment (marks) become quite clear (owing to water being dried up in summer). The decision made by the witnesses or neighbours became final only after the lapse of three weeks if no calamity (from act

907. शूद्राणा तु यथाह बृहस्पति । यदि शूद्रो नेता स्यात्त क्लैव्येनालङ्कारेणालङ्कृत्य शवभस्मना मुख विलिप्याग्नेयस्य पशो शोणितेनोरसि पञ्चाङ्गुलानि कृत्वा ग्रीवायामान्त्राणि प्रतिमुच्य सत्येन पाणिना सीमालोष्ट मूर्ध्नि धारयेदिति । रक्तकर्पटवसनादि. क्लैव्योलङ्कार· । विश्वरूप.

of (God or king) befell the witnesses (Kāt 751).[908] Manu prescribes (VIII. 261) that the boundary settled by witnesses should be fixed by the king (or recorded in a document containing the names of witnesses) An ancient instance of the fixing of boundaries by two feudatory chiefs is recorded in the Bhumara stone Pillar inscription of the Parivrājaka Mahārāja Hastin and Mahārāja Śarvanātha, who erected a pillar at Ambloda to show the boundary between their territories about 510 A. D. (vide Fleet's Gupta Inscriptions No 24 p. 110). Vide also E. I. vol. 24 pp. 32-34 for inscriptional evidence about the carrying out of all the details laid down in dharmasāstra works on the settlement of boundaries. Manu VIII, 263, Yāj II. 153, Nār. XIV 7 prescribe the middle amercement for each one of the *sāmantas* that falsely settle the boundaries, while Manu (VIII. 257) and Nār XIV. 8 prescribe the first amercement only for other witnesses such as members of corporations and elderly villagers. If through friendship, greed or fear the witnesses who know the facts do not come forward to settle the boundary they are each to be fined in the highest amercement (Kāt.[909] 750).

Br. (S. B. E. 33 p. 353 verses 19-21) lays down certain interesting rules about alluvion and diluvion. Where a river is the boundary between two villages and the river carries away soil from one village and attaches it to another, the accretion belongs to the village to which it becomes attached, *but this is* so when the soil carried away has no crops growing on it; if however soil with growing crops is separated from a village and joined to another by a river in flood, the former owner can reap only the crops and the land will belong to the village or field to which it has become attached[910]

The वि र p 217 holds a different view. 'यत्र तु नदी क्षेत्रादिक सशस्यं छित्त्वा याति तत्र पूर्वग्रामस्यैव सा भूमिरित्यर्थ ।.'

Manu VIII. 262, Yāj. II. 154, Nār. XIV. 12, Kāt 749 prescribe that the decision of disputes about the boundaries of fields, wells, tanks, groves and parks, palaces, houses, cottages, temples and channels carrying rain water is to be similarly arrived at by the testimony of witnesses (*sāmantas* and others)

Several rules are laid down by Nār., Br. and Kāt. about easements and water-courses

Br. (S B. E. 33 p 354 verse 24) prescribes that no[911] interference should be caused to the manner of the enjoyment of houses (as regards doors, compounds &c.), to the enjoyment of water and markets in the way in which they had been enjoyed from the time the village or house was established or built. This means, acc. to the Sm. C. II. p. 234 and V. P. p. 363 that if a new mode of enjoyment is started in the case of these after the village was established or the house was built then interference may be allowed. Br. (S. B. E 33 p. 354 verse 25) further says that ancient windows,[912] watercourses, balconies (pegs?), raised platforms on the borders of streets, waterspouts carrying rainwater from a square of houses (and cottages) enjoyed from former days should not be allowed to be interfered with, even if they might cause some inconvenience to the neighbouring house Kāt (752-753) similarly provides 'one should not interfere with the base of the wall, a drain (or waterspout), a balcony, window, watercourse and dwelling house of another. These are not to be added to one's house after the first building of it (so as to cause obstruction or annoyance to another), one should not open a window[913] (so as to command a view) in the interior of another's house or open a spout (that will drain off

912 Compare section 15 of the Easements Act (Act V of 1882) for the acquisition by prescription of easements of light and air for a building, of support or of right of way &c

913. 'One should not open a window &c.'—This right of privacy is recognized even now by the courts as enforceable in Gujerat Vide *Nathubhai v. Chhaganlal* 2 Bom L R 454, *Manekbai v Mohanlal* 22 Bom L R 226.

water) on to another's house. One should construct places (pits) for depositing ordure, urine and filthy water, a fireplace and a pit at a distance of at least two cubits from the walls of other people (his neighbours) and should not construct these very near to another's house' (vide also Br S. B. E. vol 33 p. 354 verses 25-26).

Br. (S. B. E. 33 p. 354 verse 27) defines a *samsaraṇa*[914] as the road by which men and beasts pass to and fro without let or hindrance Kāt. (755) calls it *catuspatha* and defines *rāja-mārga* as the road by which people are allowed to pass at certain times (and not at all times). Several rules are prescribed by Kautilya and others for obviating nuisances on public roads or near private houses. Br. (S. B. E. 33 p. 354 verse 28) and Kat (756) provide that roads should not be obstructed by parking[915] carts and the like thereon, that no one should plant anything on a public road, that a man who puts obstruction on the public road, makes pits or plants trees or wilfully voids excrement thereon should be fined a *māsaka*, and one who does not give[916] precedence on the road to his *guru*, preceptor or the king should be fined. Manu IX. 282 prescribes the fine of two *kārṣāpaṇas* for voiding or dropping ordure on the public road in the absence of distress and requires the wrongdoer to clean the road, but Manu (IX. 283) makes an exception in the case of persons diseased, very old men, a pregnant woman and a child, who are not to be fined but only reproved for voiding ordure on the road. Vide Matsya 227. 175-76 for the same two verses Kaut II. 36[917] prescribes the fine of $\frac{1}{8}$ of a paṇa for throwing dust on a cart-road and $\frac{1}{4}$ for obstructing it with mud and a fine double of these

for doing the same on a royal road; prescribes a fine of one, two, three or four panas respectively for voiding ordure on or near a holy place, or a place whence water is taken, or a temple or the king's buildings and exempts from fine such persons as those mentioned in Manu IX. 283. Kāt. (758-759) provides[918] that he who defiles a tank, a garden or holy water (or *ghats*) by throwing filthy matter (ordure &c.) therein should be made to remove the filth and fined the first amercement and also one who pollutes by washing soiled clothes in holy and purifying sacred places (*ghats* &c.) established by great or saintly persons. Yāj. II. 155 prescribes the first, the highest and middling amercements respectively for making breaches in the boundary (between two or more fields), for ploughing a field beyond the boundary of one's field and for depriving a man of his field by intimidation and the like. Vide also Visnu Dh. S. V. 172 and Śankha-Likhita[919] who prescribe a fine of 1008 panas for transgressing (the whole of) the boundary (of a field). Manu VIII. 264 (= Matsya 227. 30) provides a fine of 200 panas for seizing another's field, garden or house through inadvertance, but 500 for seizing any one of these by intimidation. Nār. XIV. 13-14 and Kāt. (760-761) state[920] that the fruits and flowers of those trees that grow on the boundary between two fields should be declared (by the Judge) as joint between the owners of the two fields and that if the branches of trees growing in one man's field spread over another man's field that man should be understood to be the owner of the trees and branches (together with fruit &c.) in whose field the trees are born (have taken root). The first proposition implies that if one owner

alone takes all the fruits he is liable to be fined for taking half the fruits.

A *setu* (watercourse) is said by Nār (XIV. 18) to be of two kinds, viz that which is dug (*kheya*) into the soil in order to drain off excessive water and that which is constructed (*bandhya*) as an embankment to prevent water from flowing away. Yāj II. 156 and Nar XIV. 17 provide that a *setu* made by the owner of one field in the neighbouring field should not be forbidden by the owner of that field, if the loss of soil it causes (to the latter) is small as compared with the great benefit that it may confer Nār (XIV. 20–21) and Yāj II. 157 prescribe that one should make a dike or watercourse on another's land with the permission of that man or with the permission of the king as otherwise he cannot reap the benefit thereof. Kāt (762–63) provides a similar rule about the repairs to a house or garden or tank made by a stranger without the owner's or the king's permission It is stated by Nāi (XIV. 23–25) that when the owner of a field is unable (to cultivate it) or is dead or is not heard of, if a stranger cultivates the field without objection from any body, the stranger shall enjoy the produce of the field, that if the owner (or his *son*) returns while the field is being tilled by a stranger, he can get his field back on repayment to the stranger of all the money expended on making the land (*ready for crops*). If the owner is unable to return the expenses, the stranger may retain $\frac{7}{8}$th of the produce every year for eight years giving $\frac{1}{8}$th to the owner every year and should hand over the field to the owner when the 8th year arrives Yāj II. 158 and Vyāsa provide that if a person takes a field from the owner on rent for cultivation, but gives up the cultivation after slightly ploughing it and does not employ someone else to complete the cultivation, then he should be made to pay the produce that would have been recovered from the field if properly cultivated and also should be fined and the field may be taken from him and given to another tenant[921].

CHAPTER XXIII

VAKPĀRUSYA AND DAṆḌAPĀRUSYA

(Abuse and defamation; assault)

Vākpārusya, dandapārusya, steya, strīsangrahana, sāhasa are five titles out of 18 that are concerned with what may be called criminal matters or crimes in modern nomenclature. Vide under *sāhasa* below.

Nār. XVIII. 1 defines *vākpārusya* as 'abusive words that loudly proclaim censure of another's country, caste, family and the like and that cause mental pain or offence to that man.' Kāt. (768) defines it as[922] consisting in making the sound 'hum' (of defiance) before another or coughing before him, of imitating or uttering before another whatever is censurable according to popular notions. Nār. (XVIII. 2–3) says that abuse is of three kinds, *usthura* (reproachful such as calling a man a fool or a rogue), *aślīla* (obscene or insulting), *tīvra* (mercilessly severe such as charging a man with such grave sins as brāhmana-murder or drinking liquor) and that the punishment for each later one is more severe than for each preceding one. Examples of the abuse of country, caste and family are respectively 'the Gauḍas are quarrelsome', 'brāhmanas are extremely greedy', 'persons of the Viśvāmitra gotra commit cruel deeds'. Br. (S. B. E. vol, 33 p. 355 verses 2–4) divided vākpārusya into three kinds viz. lowest (when the country, caste or family of a person is abused or sinfulness is ascribed without specifying any definite act), middling (speaking that the abuser will have sexual intercourse with the mother or sister of the abused or ascribing the commission of *upapātakas*[923] or minor sins to the abused), highest (charging him with taking forbidden food or drink or mercilessly exposing or ascribing the grave sins to a person). Various fines are prescribed in the smrtis that depend upon the above distinctions and also on the castes of the abuser and the

922. हुङ्कारः कासनं चैव लोके यच्च विगर्हितम्। अनुकुर्यादनुब्रूयाद् वाक्पारुष्यं तदुच्यते॥ कात्या (768) q. by अपरार्क p. 805, स्मृतिच II. p 6

923. For upapātakas vide Manu XI. 59–66 (such as *govadha*, adultery), Yā. III. 234–242, Viṣnudharmasūtra (37) which contain long lists of them.

abused. For example, Manu VIII. 267 (= Nār XVIII. 15 = Matsya 227. 66) prescribes the punishments of 100 panas, 150 or 200 panas, corporal punishment respectively against a ksatriya or a vaiśya or a śūdra abusing a brāhmana and conversely Manu VIII 268 (= Nār. XVIII. 16) provides that a brāhmana calumniating a ksatriya, vaiśya or śūdra should respectively be fined 50, 25 or 12 panas. In the case of the abuser and the abused being of the same varna the fine for ordinary abuse is 12 panas, but double of this if the abuse is, according to Manu VIII. 269 (= Nār. XVIII. 17), foul (relating to mother, sister &c.). Vide Yāj II. 206–207, Visnudharmasūtra V. 35. From the remarks of the Sm. C. and the Madanaratna it appears that these discriminating provisions[924] based on the caste[925] and the ascription of minor or grave sins had become a dead letter and were not being enforced by the kings in India by the 12th century A. D. at least. One or two matters, however, may be noted. Manu VIII. 268–272 and 274 are the same as Nār. XVIII. 16–17, 22–24. Even the truth of an imputation[926] afforded no complete exemption e g. if a person angrily calls a man a thief (who was once convicted of it) or speaks of him as blind or cripple, the former would be fined at least one kārsāpana (Manu VIII. 274 = Nār. XVIII. 18). Kāut. (III 18) provides in this case three panas[927] as fine and Visnudharmasūtra (V. 27) two panas. When the

924. एव जातिगुणयोर्विधिविशेषदर्शने तथा प्रथममध्यमोत्तमभावेन विधाभिहित वाक्पारुष्यान्तर्गतभेददर्शने तथा निष्ठुराश्लीलतीव्रत्वादिवाक्पारुष्यविशेषदर्शने तथा श्रुताभिजनदेशकर्मशरीरपितृमातृदुर्वाग्विधिक्षेपविशेषदर्शने तत्रिबन्धनोच्चावचदण्डविधायिका स्मृतयो यद्यपि बच्चःसमुच्चयकारै ससुचिता अस्माभिस्तु संप्रति तदर्थानुष्ठाननिष्ठप्रजाधिक्षयाभावाद् वृथा ग्रन्थविस्तारापत्तिर्मा भूदिति न समुच्चिता । स्मृतिच II p 327 The words from श्रुताभिजन up to सम्प्रति occur also in स्मृ. चि p 479, which winds up as 'संप्रति तदनुष्ठानाभावाद् ग्रन्थविस्तरत (०र. ?) किमर्थमित्युपरतम्'; यद्यपि वाक्पारुष्य दण्डपारुष्ययोर्विषयभेदेनान्येपि दण्डविशेषा स्मर्तृभिरुपदिष्टा. सन्ति तथापीदानींतनै राजभि: प्रजाक्षोभप्रसङ्गेन तादृग्दण्डस्य कर्तुमशक्यत्वादृग्विधयोगाभावान निरर्थकग्रन्थविस्तरभयाच्चास्माभिः संगृहीता । (मदनरत्न at the end of दण्डपारुष्य)

925 Vide ताण्ड्यब्राह्मण 14 6. 6. for an abuse as to varna 'ब्राह्मण्य यदि तिथिश्च काण्यावास्ता त यस्य मेधातिथिराकोशदब्राह्मणोसि शूद्रापुत्र इति ।'

926. Compare sec 499 of the Indian Penal Code, exception one, which provides that the mere truth of an imputation does not exonerate a man from the charge of defamation, unless the imputation is uttered for the public good.

927. शरीरप्रकृतिश्रुतवृत्तिजनपदानां शरीरोपघातेन काणाद्यन्यतमादिभि मध्ये विद्ध्यं दण्ड. । मिथ्योपवादे पूर्वयणो दण्ड । शोभनाक्षिदन्त इति काणाद्यन्यतमादीनां स्मृतिलिङ्गानां द्वादशपणो दण्डः । अर्थशास्त्र III. 18.

imputation is false all provide for a fine double of that provided in case the imputation is true. Ironic praise of a man (such as describing one who is blind of one eye as one endowed with a beautiful eye) is made punishable by Kaut. (III. 18). To warn[928] a man against associating with a person who is guilty of a grave sin or of theft does not entail punishment if the truth of the imputation be established (Kāt. 776). Acc to Kaut and Kāt (775) the king was to award only half the fine prescribed if the accused said 'what I uttered in abuse was done through ignorance, carelessness, rivalry or friendship; I shall not again do so'[929]. A person who abuses a king doing his duty was to have his tongue cut off or forfeited all his property (Nār XVIII. 30, Yāj. II. 302). Āp. II. 10. 27. 14 prescribed for a sūdra that abused any one of the three higher castes leading a religious life the punishment of the cutting of the tongue[930].

Daṇḍapārusya (assault). Kaut III. 19 begins his treatment of this topic by saying that it comprises touching, threatening to strike and actually striking another[931]. Nār. XVIII. 4 defines it as injuring the limbs of another with the hand, foot, weapon or other means (such as stones) or defiling or causing pain by (bringing) ashes and similar substances in contact with another. The Mit. on Yāj II. 212 explains that even causing injury to animals and trees would fall under this title Nār XVIII. 5–6 provide that assault may be of three kinds viz. mild, middling and highly punishable according as a person merely makes preparations to assault or attacks without any qualm or causes a wound and that this crime can further be divided into three kinds according as the object attacked is low in value or middling or high A verse from the Pariśista (quoted by Sm. C. II. p. 327 and V. P. p. 370) states 'whoever causes pain or draws blood, wounds, breaks, cuts off, pierces (the limbs or bodies) of living beings is guilty of dandapārusya' According to Br. (S. B. E. vol. 33 p 357 verse

1) *daṇḍapāruṣya*[932] consists in striking (a person) with the hand, with a stone, a club, ashes, mud, dust or a weapon. The Mit on Yaj II 212 following Nār XVIII 7–12 lays down certain propositions about both abuse and assault A person who does not return abuse or does not assault when abused or assaulted, deserves to be commended, if he returns the abuse or assaults in return, the person who began the quarrel is to be dealt with more severely than the other When two persons[933] attack each other and there are no means for finding who began the quarrel equal punishment is to be awarded to both, but when two quarrel he who began the quarrel or he who persists longer than the other is to be fined more than the other party and lastly if men of the lowest[934] castes such as *śvapāka, meda, cāṇḍāla*, hunters, elephant riders, vrātyas and dāsas (slaves) assault respectable men and ācāryas then they are to be punished (whipped) by good men then and there, but if such punishment is not possible, then the king should award corporal punishment (of various kinds according to the nature of the crime) and should not take fines from them, since they are the foulest among men and their wealth also is foul. Kāt (783) and Br (S. B. E 33 p 359 verse 15) are to the same effect The several smṛtis lay down various punishments for various kinds of assaults but no useful purpose will be served by going into details Kāt[935] (786) provides that just as in abuse punishments depend on the castes of the abuser and the abused so also in assaults higher punishment is to be awarded if the attacker is of a lower caste than the person attacked or lower punishment if the person attacked is of a lower caste Manu VIII 286 and Uśanas[936] lay down that the punishment for the offence should be commensurate with

the pain or injury caused by the offender to a man or beast. A few examples may be set out. Probably the oldest reference to fines for assault in Sanskrit literature is contained in the Taittirīya Saṃhitā[937] II 6 10. 2. 'He who threatens to strike a brāhmaṇa shall be fined with a hundred (cows or niṣkas?), he who strikes a brāhmaṇa shall be fined with a thousand, he who draws blood from him shall not behold the *pitṛs* for as many years as there are particles of dust mixed with the blood that falls on them'. This passage is interpreted in Jai III [938] 4 17 as being a recommendatary injunction (*puruṣārtha*) to all at all times to desist from assaulting a brāhmaṇa. Gaut (21 20-22) and Manu XI. 206-207 appear to take the Tai. S passage differently and refer the figures of 100 and 1000 to years. Kaut III 19 prescribes various fines for various kinds of assaults. Br (S. B. E 33 p 357 verses 2, 3 and 7) says that if a person throws ashes or the like at another or beats him with the hand the fine should be one *māṣa*, but if he strikes with a brick, stone or stick the fine should be two māsakas; this however applies when both are of the same caste, but if he assaults a woman who is another's wife or a person of a higher caste, the fine may be higher and higher. For one who bruises the skin of another or draws blood by assault the fine is one hundred panas, and for him who causes a wound by removing some flesh the fine is six māsakas and he who causes breaking of bones should be banished (Manu VIII 284 = Nār XVIII 29). Kāt prescribes the highest amercement for cutting off the ear, the lip, the nose, the foot, the eye, the tongue, the penis, the hand, and the middle amercement for causing injury (or wounding). Gaut XII 1, Kaut III 19, Manu VIII [939] 279, Yāj II. 215, Br provide the punishment of the cutting of that limb with which a śūdra strikes a person of the three higher castes. And the Mit on Yāj II 215 applies by analogy the same rule to a vaiśya striking a kṣatriya. Manu VIII. 280 extends the same punishment to a śūdra for

merely raising the hand or a club to strike one of a higher caste. Manu VIII 281-283 (=Nār. XVIII 26-28) provide that a person of a low caste defiantly sitting on the same seat with one of a higher caste was to be first branded on the waist and then banished or his hips were to be gashed (in such a way that he might not die), that a śūdra defiantly spitting on the body of a brāhmana had his lips cut off or a śūdra voiding urine or fæces on a brāhmana had those offending limbs cut off, or a śūdra defiantly seizing a brāhmana by the hair or the feet or beard or neck or testicles would have both his hands cut off If several conspire and strike a person who is alone, each one was to be sentenced to twice the punishment prescribed for the offence (Yāj II. 221, Kaut[940] III 19, Visnu Dh. S. V 73) Kaut. III. 19, Manu VIII. 287, Yāj II. 222, Br., Kāt 787, Visnu Dh S. V. 75-76 provide that the king should make an offender pay a fine and also the expenses of medical treatment and diet till the wound is healed up and the person attacked is able to do his usual work (vide note 613 above) For mischief to property[941] and for killing or maiming animals, Kaut., Manu, Yājñavalkya and others provide various fines. For example, Kaut. III. 19 prescribes that when property of small value is destroyed by a man he should be punished with fine equal to the value of the article and should be made to restore the article or its value to the owner; but in the case of articles of substantial value the fine is double of the value. Manu VIII 288 is of similar import. Yāj II. 223 provides varying fines if a person wrongfully causes damage to a wall by knocking it (with a club), or pierces it or divides it into two or demolishes it and makes the offender pay to the owner the cost of restoring it Manu. VIII. 296-298, Yāj II 225-226 prescribe fines for causing death or injury to animals of small value (such as goats) and big animals like elephants, horses and cows Yāj II 227-229, Kaut III 19, and Kāt 793 provide fines for causing loss by injuring or felling trees, shrubs and creepers Yāj II. 214 holds[942] that if a person throws mud,

940 महाजनस्यैक घ्नतो प्रत्येक द्विगुणो दण्डः । अर्थशास्त्र III 19.

942 हीनेष्वर्धदमो मोहमदादिभिरदण्डनम् । या II. 214, हीनेष्वर्धदण्डा परस्त्रीषु द्विगुणा । प्रमादमदमोहादिभिरर्धदण्डा । अर्थशास्त्र III 19.

dust or saliva or filthy things on another or strikes with his feet, he should not be fined if he is under the influence of intoxicants at the time or is not in his right mind or does it through mistake, while Kaut. III 19 prescribes half of the usual fine in such cases.

An important question is how far the right of private defence of person or property was recognised by the dharma-śāstra works. This subject has partly been dealt with in H. of Dh. vol. II. pp. 148–151 in connection with an *ātatāyin* (a desperate man) who is an incendiary or a poisoner or is armed with a weapon, is a robber, one carrying away another's wife or seizing by force (a field). Although there is great diversity of views about killing a brāhmana *ātatāyin*, there is no difference of opinion as to repelling with force culminating even in death an *ātatāyin* of any other caste. Gaut. VII. 25 allows even a brāhmana to arm himself when his life is in danger.[943], Baud. Dh. S. II.[944] 2. 80, Manu VIII. 348–349 lay down that brāhmanas and vaiśyas may oppose with force when they are prevented from doing their religious duties by felons or when there are disturbances caused by invasion or the like, for saving their own lives, for preventing the seizure of their cows or other wealth or for protecting women or brāhmanas. The Mit.[945] on Yāj. II. 286 remarks that these rules of Manu are applicable when there is no time to report to the king or when delay in opposing violence will mean loss or ruin. According to Kāt.[946] (800) no blame attaches to a man who kills wicked men that are about to kill another, but when they have desisted from their attempt, they should be arrested and not killed. Aparārka (on Yāj. III. 227) remarks that persons are to be regarded as *ātatāyin* while they are about to set fire or to kill or they are in the act of setting fire or killing and the like, that where it is not possible to prevent them from doing what

they intend to do except by killing them there only the texts allow killing; but that where it is possible to prevent them by merely wounding them with a weapon or stick, killing them would be an offence [947] Medhātithi[947a] on Manu VIII 348 differs from this and allows the killing of a desperado even after he has carried out his purpose and not only when he is about to carry it out or is in the act of carrying it out The view of the Mit on Yāj II 21 is that one has a right to oppose and kill another in self-defence, in defence of women and other weak people, who cannot defend themselves against a murderous or violent attack and that even if a wrongdoer of the brāhmaṇa caste was killed in the exercise of such right there is no punishment at the hands of the king and the prāyaścitta (for killing a brāhmaṇa) is a light one Similarly a man can kill with impunity animals having claws, horns or fangs or horses or elephants if they attack a person (Kāt. 805 q by Sm C II. p 316)

CHAPTER XXIV

STEYA (theft).

In the Rg. there[1] is frequent mention of *taskara*, *stena* and *tāyu* In Rg. VI. 28 3 the sage[948] says 'may the cows not disappear from us, may a thief not injure them'. In Rg. VIII 29. 6 it is said 'Pūsan guards the ways and knows of concealed treasures as a thief does' From Rg X. 4 6 it appears that thieves were desperate and bound people with ropes and (from Rg I. 191 5) that thieves (*taskaras*) appeared at night. *Tāyu* (thief) occurs in Rg I. 50 2, IV. 38. 5, VI. 12 5 and is an Indo-Iranian word. The word 'stena' occurs in Rg. VI 28. 7 and means 'one who is a cattle-lifter'. Rg. VIII. 67 14 indicates that a *stena* was bound with ropes (when caught). In Rg VII. 55. 3 the dog is asked to run after a *stena* and a *taskara*, the first being probably a thief (who secretly carries away property) and the second a thief who openly carries it away. In the Vāj[948a] S XI. 79 (=Tai. S. IV. 1. 10 2) we have the *malimlu* in addition to *stena* and *taskara*. Atharvaveda IV. 3 contains charms against wolves, tigers and thieves (*taskaras*).

Steya is distinguished from *sāhasa* in Manu VIII. 332, Kaut III. 17, Nār. XVII. 12 and other works as stated under sāhasa below Kāt 810 defines[948b] it as 'depriving a man of his wealth either clandestinely or openly and either by night or by day'. Nār XVII 17 defines it as 'deprivation of wealth by various means from people that are asleep, careless or intoxicated'. It may be of three kinds according to the value of the thing stolen viz. trifling (when earthen-ware, seats, cots, wood, hides, grass, beans in pods or cooked food is stolen) or middling (when the theft relates to clothes except silken

948 न ता नशन्ति न दभाति तस्करो नासामामित्रो व्यथिरा दधर्षति । ऋ. VI. 28 3. पथ एक पीपाय तस्करो यथाँ एष वेद निधीनाम् ॥ ऋ VIII. 29 6. तनूत्यजेव तस्करा वनर्गू रशनाभिर्दशभिरप्यधीताम् । ऋ. X 4. 6 (explained in निरुक्त III. 14).

948a ये जनेषु मलिम्लव. स्तेनासस्तस्करा वने । ये कक्षेष्वघायवस्तांस्ते दधामि जम्भयो ॥ वाज. स XI 79. The com. on Tai. S explains. 'स्तेना: गुप्तचौरा: तस्करा. प्रकटचोरा अतिप्रकटा निर्भया ग्रामेषु वन्दिकरा: मलिम्लुव: '.

948b प्रच्छन्नं वा प्रकाशं वा निशायामथवा दिवा । यत्परद्रव्यहरणं स्तेयं तत्परिकीर्तितम् ॥ कात्या. 810 q by व्यवहार VI. 9, p. 224.

ones, animals except cows and bulls, metals except gold, rice and barley), grave or high (when gold, jewels, silken cloth, women, men, cattle, elephants, horses and the wealth of brāhmaṇas or temples is stolen) Vide Nār. XVII 13-16 and Yāj II 275. Thieves are either *prakāśa* (open or patent) or *aprakāśa* (secret) acc to Manu IX 256, Br [949] (S B E 33 p 359 v 2) Acc to Manu IX 258-260, Nār. (pariśista 2-3) and Br (S B E. 33 p 360 verses 3-4) patent thieves are traders who employ false weights and balances, gamblers, quacks, bribers of *sabhyas*, prostitutes, those who profess to arbitrate, those who manufacture imitation articles, those who subsist by prognosticating good fortune or portents or by magic or palmistry, false witnesses &c Manu (IX 261-266) states that in order to find out such thieves the king should employ spies in various disguises at various places such as meeting halls, refreshment rooms, brothels, wineshops, theatres &c The concealed thieves are those who move about with tools for house-breaking without being observed and whose residence is not known, they are principally [950] of nine kinds viz. one who quietly relieves a man of his money when the latter is attending to something else, a house-breaker, a highway robber (who robs travellers), a cut-purse, one who steals (or kidnaps) a woman or a man, cattle, horses and other animals. Yāj II. 266-268 and Nār. (pariśista 9-12) indicate the various ways in which thieves may be detected and caught viz by the (police) officers recovering a part of the booty from a man or by tracing foot-steps, or by seizing one who has been often found to be a thief, or by finding out that the man suspected cannot state his place of residence; and they recommend that on suspicion others may be caught, if on being questioned they attempt to conceal their caste or name or if they are found addicted to gambling, wine and women or if their mouth becomes dry or their voice changes or if they spend lavishly though they have no ostensible means of earning, or those who sell lost or second-hand goods or who move about in disguise or who are found making inquiries about others' houses

or wealth The Mit. on Yāj [951] II. 268 quotes Nār and gives the warning that the king must carefully examine whether the man caught is really the thief and should not convict merely on suspicion, since even an innocent man may have stolen property near him or betray some of the signs noted above. When property alleged to be stolen is found with a man, it may be that the articles came to his hands from another's hand or he may have taken it up when it lay unclaimed on the ground or he may have taken it as a thief; liars often have the appearance of honest men and *vice versa* (Nār I 71)[952] Nārada's dictum (I. 42) that one who is not a thief may be held to be a thief as in the case of Māndavya has already been quoted above (p 357n 549). Vide Manu IX 270 (= Matsya 227. 166) cited on p 355 above When a person is seized on suspicion of being a thief he could not be acquitted on his mere denial of the offence He had to prove innocence by ordinary evidence (such as proof that he was elsewhere when the theft was committed) or ordeals (Yāj II. 269) The general rule about the punishment of patent thieves was that the punishment was to be proportionate to the lightness or gravity of the crime and not to their wealth (Vyāsa)[953] Br. (S B E 33 p 361 verses 10 ff) quoted in Par. M. III pp. 439–440 and V P pp 387–88 prescribes various punishments for particular kinds of patent thieves e g. sabhyas giving wrong decisions (for bribes) or those who deceive by betraying the trust imposed in them are to be banished Manu IX 292 (= Matsya 227 184–185) holds that the goldsmith is the worst of all deceitful persons (*kantakas*) and if he is found committing fraud his limbs should be cut off bit by bit.

As regards the concealed thieves the texts lay down special rules Nār XVII 21 extends to theft of the three kinds mentioned above the same punishments that are awarded in the three kinds of sāhasa Manu VIII 323 prescribes death sentence for kidnapping men of good family and particularly women

953 नैगमाद्या भूरिधना दण्डया दोषानुरूपत। यथा ते न विनश्यन्ति तिष्ठन्ति समये तथा॥ व्यास q by स्मृतिच II p 317, व्य प्र p 387

and for theft of costly jewels; while Vyāsa prescribes death by burning on red-hot iron bed for kidnapping women and mutilation of hands and feet for kidnapping a man Yāj II 273 provides impalement for those who confine others as captives, for those who steal horses and elephants and who strike others with violence, while Manu IX. 280 prescribes death for those who break royal store-houses and armoury, the inner shrine in a temple and who steal horses, chariots and elephants For him who commits theft by housebreaking at night Manu (IX 276) and Br. (S B E 33 p 361, verse 17) provide impalement[951] after cutting off his hands. Yāj. II. 274, Manu IX 277, Visnu Dh S. V 136 prescribe for the cut-purse the punishment of the cutting of the thumb and index finger for the first offence, the cutting of the hand and foot if it is the second offence and death if he repeats the same offence a third time Not only was the thief made to undergo punishment but he was also liable to make good the loss of property to the person robbed (Manu VIII 320, Yāj. II 270, Visnu Dh S V. 89, Nār. parisista 21) According to Nār (parisista 22-24) for thefts of articles of small value the fine was five times their price, while Manu (VIII. 326-329) said it was twice as much as the price. Gaut XII. 12-14,[955] Manu VIII. 337-338, Nār. (parisista 51-52) lay down that the fine for theft is higher in the case of the higher castes i e. if the śūdra thief is fined eight times of the value of the article stolen, the vaiśya, ksatriya and brāhmana thieves were respectively fined 16, 32 and 64 times the price of the article, as each is deemed to know better owing to his higher status and culture. Manu VIII. 380 lays down the general rule that a brāhmana offender was not to be killed whatever the offence might be but he was to be banished from the country allowing him to take with him all his wealth. But there were other provisions and exceptions also. Kāt[956] (823) states that

the school of the Mānavas declared that thieves caught with the stolen things on them should be at once banished but that the school of Gautama disapproved of this mode, since it is condemned because it entails loss (reduction) of people in the country The V. R. p. 332 explains this verse as referring to a learned brāhmana. Two more verses of Kāt. (824–825) are quoted by V. R p. 332 and V. C. p 92 the first of which provides that a brāhmana who is not learned whether caught with booty or not should be branded (with the appropriate signs) and deprived of all his property, provided his guilt is brought home with certainty and the second provides that a brāhmana thief who is neither learned nor rich but is strongly built should be kept under guard with fetters on his feet, should be fed on meagre food and made to do hard labour for the king till his death Gaut. XII. 46–48, Nār. (parisista 13–14), Manu IX. 271 and 278, Kāt (827) hold that the punishment for those who knowingly give food, fire (when they feel cold), water or asylum to thieves or who receive or purchase stolen property or who conceal them are to be punished like the thieves themselves [957] Yāj II. 276 prescribes the highest amercement for any one who knowingly gives help to a thief or murderer in the above ways or by directions or by supplying tools or money wherewith to go to a place for committing the offence.

In certain cases a person could take without being liable to be punished as a thief certain things belonging to another even if he had not the latter's permission Gaut XII.[958] 25, Manu VIII 339 (= Matsya 227. 112–113), Yāj II. 166 allow a person of the three higher castes to take grass, fuel-sticks, flowers of trees and plants for feeding cows and for the worship of fire from any place as if they belonged to himself and also fruits of trees that were not enclosed In such cases he would not be liable to a fine nor does he incur sin (Kullūka on Manu VIII. 339). A smrti passage stating that if a man takes

958. गोऽन्यर्थं तृणमेधान्वीरुद्वनस्पतीना च पुष्पाणि स्वयदाददीत फलानि चापरिवृतानाम्। गौ XII 25 अपरार्क p 773 remarks that this is so only when there is difficulty in getting these (आपदि) यत्पुनरुक्तम्-तृण वा यदि वा काष्ठं पुष्पं वा यदि वा फलम्। अनापृच्छन्हि गृह्णानो हस्तच्छेदनमर्हति। इति-तद् द्विजव्यतिरिक्तविषयमनापद्विषय वा गवादिव्यतिरिक्तविषय वेति। मिता on याj II 166, अपरार्क p 774 says तदनापद्गतशूद्रादिविषयम्'.

grass or fuel or flowers or fruits without permission deserves to have his hand cut off is explained by the Mit. (on Yāj 166), Aparārka p. 774 and others as meant to apply to persons other than *dvijas* or as meant to refer to a case where they are taken by a person who has really no difficulty in securing these or where these are not taken for the use of cows or for worship. This matter had been a subject of discussion from ancient times. Āp. Dh S [959] (I 10 28 1-5) contains a discussion from which it appears that Kautsa, Hārīta, Kānva and Puskarasādi were of the opinion that whatever (however trifling or in whatever circumstances) a man took without the consent of the owner, he became a thief, that Vārsyāyani held that there were exceptions to this rule viz. that owners should not forbid the taking (of a small quantity of) grain in pods (such as *mudga* or *māsa*) or grass for bulls yoked to carts, but that if large quantities even of these were taken there would be theft. Śānti 165. 11-13, Manu XI. 16-18 and Yāj III. 43 state that when a brāhmana or other person has fasted for three days because he has had no grain with him, he may on the 4th day take grain for one day's meal from anywhere he can get, whether from a threshing floor or from a field or a house, and that if the owner questioned he should declare to him the reason, but a person of a lower caste should not in this way take grain belonging to one of a higher caste, unless the latter pursues a sinful course or does not perform the duties of his caste. Vyāsa quoted by Sm. C. I. p. 175 allows a man to commit even theft, when he is in distress for food, first from a person of a lower caste, then from one of the same caste and then from one of a higher caste Manu VIII. 341 (= Matsya 227. 110, 114), Nār (prakīrnaka 39), Śankha and Kāt (822A) state that a traveller whose food has run out may take from another's land without being liable to punishment two sugarcane stalks, two *mūlakas* (esculent roots), two cucumbers or melons, five mangoes or pomegranate fruit

and a handful of dates and of such corn as rice, wheat, gram &c [961]

Sāhasa (crimes of violence). Manu VIII 332, Kaut III 17, Nār. XVII 1, Yāj II. 230, Kāt. (795–796) define sāhasa[962] as any act which is done with violence in defiance of or in spite of the presence of royal officers or guards or people The word sāhasa is a derivative from 'sahas' meaning 'force' (Nār XVII 1). Sometimes it is distinguished from theft (as in Manu VIII. 332, Kaut III. 17 and Nār. XVII. 12) by saying that theft consists in depriving a person of his wealth stealthily (without force), while in sāhasa there is the use of force or violence[963]. Nār. XVII. 2 and Br (S B. E. vol 33 p. 359 verse 1) state that sāhasa[964] is of four kinds viz manslaughter, theft, violence to the wives of others, and the two kinds of *pārusya* (treated as one head). Although these topics can be comprehended under sāhasa, they are generally dealt with separately in the smrtis and digests as a matter of convenience and in order to provide heavier punishment for crimes of violence[965], since a man guilty of a crime of violence is a worse sinner than one guilty of abuse, theft or assault (Manu VIII. 345 and Mit. on Yāj. II. 230) and Manu VIII 244 enjoins upon the king not to tolerate for a moment a man guilty of violence The

V May. (text p 2) says that in differentiating *steya* from *sāhasa* the maxim of 'cows' and 'bulls' is applicable[966].

Sāhasa is divided by Nār. XVII 3-6 and Br (S B E 33 p 363 verse 24) into three varieties, viz. the lowest (destruction, abuse and trampling of fruits, roots, water, agricultural implements), middling (destruction &c of clothes, food and drink, household utensils), highest (killing with weapons or poison, violence to others' wives and whatever causes pain to sentient beings) These three kinds are respectively punished with the three kinds of punishments described above (pp. 393-94) The principal crimes included under sāhasa in its narrow sense are homicide, rape and robbery Rape will be dealt with under *strīsaṃgrahaṇa* Br.[967] states the general rule that one guilty of murder by violence should be punished with death and not with fines (S B. E 33 p. 363 v 29) To this the brāhmaṇa offender was an exception (Manu IX. 241), who was only to be banished Manu IX 242 introduces another exception viz. persons other than brāhmaṇas when guilty of the great sins (specified in IX 235) through negligence should be only deprived of all their property but if they murder a man intentionally then only are they to be sentenced to death. Manu IX. 232 and Viṣnu Dh S V 9-11 provide the punishment of death for those who fabricate false royal edicts, or who tamper with the loyalty of the elements of the State or who kill women, children and brāhmaṇas Baud Dh S I 10. 20-21, Br and Vyāsa prescribe[968] that if a brāhmaṇa is killed by a kṣatriya, vaiśya or śūdra, the king should sentence

966 स्त्रीसंग्रहणवाक्पारुष्यदण्डपारुष्याणा साहसभेदत्वेपि पृथङ्निर्देशो गोबलीवर्द्दन्यायेन। व्य मयूख p 2 When a man says गाव आनीयन्ता बलीवर्दाश्च the separate mention of *balīvardas* (bulls) that can be included under the word 'gāvaḥ' is due to the fact that bulls, being more intractable than cows, special attention must be paid to manage them. अपरार्क p 1048 (on Yāj III 230) employs the same maxim in a similar connection 'गोबलीवर्द्दन्यायेन च पौनरुक्त्यपरिहार'

967 साहसं पञ्चधा मोक्त वधस्तत्राधिक स्मृत। तत्कारिणो नार्थदमै शास्त्या हन्या प्रयत्नत ॥ बृह q by वि चि p 105 The word 'vadha' has two senses, (1) death and (2) corporal punishment Here वध means death

968 क्षत्रियादीना ब्राह्मणवधे वध सर्वस्वहरण च तेषामेव तुल्यापकृष्टवधे यथाशास्त्रमनुरूपान्दण्डान् प्रकल्पयेत्। यौ ध I 10 20-21, ज्ञात्वा तु घातक सम्यक् ससहाय सबान्धवम्। हन्याच्चित्रवधोपायैरुद्वेजनकरैर्नृप ॥ व्यास q by स्मृतिच II 312 and व्य म. p 394, प्रकाशघातका ये तु तथा चोपाशुघातका। ज्ञात्वा सम्यग्वधन हत्वा हन्तव्या विविधैर्वधै ॥ बृह q by स्मृतिच p 312 and व्य म p 394 वि चि p 105 reads राज्ञा सम्यग्वधै हित्वा हन्तव्या. and explains 'सम्यग्वध सकृच्छिरश्छेद, विविधो वध अङ्गशास्तिपूर्विका प्राणशास्ति'.

the offender to death in various ways and confiscate all his property, but if a man kills another of his own caste or of a lower caste then the king may punish the offender with some punishment appropriate to the crime and the strength of the offender In IV. 11 Kaut. provides sentences of death in various ways for murder following ancient śāstras, but remarks that if murderers have not been guilty of cruelty they should simply be sentenced to death without torture or the like[969]. One special rule deserves notice Gaut 22 12, Āp Dh. S. I. 9. 24 6–9, Manu XI. 87, Vas 20 34, Yāj III 251 prescribe the same prāyaścitta for murdering a brāhmana woman who is an *ātreyī* as for one who kills a brāhmana male. The different meanings of 'ātreyī' given from ancient times are noted below[970]. Texts

---

969 गते शास्त्रेष्वलुगता क्लेशदण्डा महात्मनाम्। अक्लिष्टानां तु पापाना धर्म्यः शुद्धवधः स्मृतः ॥ अर्थशास्त्र IV 11, last verse.

970 आत्रेय्याश्चैवम्। गौ 22 12. आत्रेयीं च स्त्रियम्। आप ध सू I 9 24 9. आत्रेयी is variously explained The word occurs as early as the Sat Br I. 4, 5, 13 where in explaining why the offerings to Prajāpati are made in a low tone a legend about the goddess 'Vāc' is narrated and it is said that in having sexual intercourse with an ātreyī, a man incurs sin' (तस्मादप्यात्रेय्या योषितैनस्वी). Here the word appears to mean a woman who is in her monthly illness Vas (20 35–36) defines ātreyī as a woman who has taken the purificatory bath on the 4th day after her monthly illness begins and derives the word from अत्र 'आत्रेयीं वक्ष्यामः रजस्वलामृतुस्नातामात्रेयीमाहुः। अत्र ह्येष्यदपत्य भवतीति.' Vasistha either cites or summarises a Vedic passage (as stated by Viśvarūpa) which means 'here (i e in the womb of this woman) a child is to come'. In SBE vol. 14 p 107 the same is translated as 'if the husband approaches her at that (time) he will have offspring' But this is not correct 'Esyat' qualifies 'apatyam' and is not in the masculine. Vas derives the word from अत्र and the root इ Visnu Dh S 36 1 and 50 9 appear to hold that ātreyī means a woman of the Atrigotra Haradatta on both Gaut. and Āp explains ātreyī as Vasistha does and states that others interpreted it as 'अत्रिगोत्रा', on या. III 251 (तथात्रेयीनिपूदक') विश्वरूप explains आत्रेयी as a woman within 16 days from the beginning of the monthly illness and quotes वसिष्ठ 20 36 and also says 'आत्रेयीं अत्रिगोत्रा वर्णयन्ति। तदपि युक्तमेव। तथा चाम्नायः ततोऽत्रिः सम्बभूवेत्युक्त्वा तस्मादप्यात्रेय्या योषितैनस्विनमाहुः। तेनोभे सम्यग्व्याख्याने एव।'. From Sabara on Jai VI 1 7 it appears that some derived the word as 'अत्र कुक्षावस्या विद्यत इत्यात्रेयी', while Śabara himself preferred the meaning 'अत्रिगोत्रा' and regarded the prohibition to kill an ātreyī as simply meant for praising that gotra 'तथा गोत्रप्रशंसार्थं आत्रेय्या अवधसङ्कीर्तनम्। न चापन्नसत्त्वा आत्रेयी। गोत्रं ह्येतत्। न हि अत्रशब्दादयं तद्धित उत्पन्नः। समर्थाना हि तद्धित उत्पद्यते। न च अत्रशब्दस्य सामर्थ्यमस्ति' (on जै VI. 1. 9) यम quoted by परा मा II 1 p 103 gives two meanings 'जन्मप्रभृति संस्कारै संस्कृता ब्रह्मचर्यया। गर्भिणी वाथ वा या स्यात्तामात्रेयीं विनिर्दिशेत्॥' The अमरकोश gives आत्रेयी as a synonym of रजस्वला

like Āp I 9 24. 1-5, Gaut XXII prescribe different prāyaścittas for murder depending upon the castes and sexes of the murderer and the murdered These will be briefly dealt with under prāyaścitta later on In certain cases acc. to Manu VIII 291-292, Yāj II 298-299, Kaut IV 13, though death or injury to persons or loss of property results, no punishment was prescribed viz when the nose-string of bulls yoked to a cart snaps, when the yoke breaks, when the cart swerves on one side owing to the unevenness of the ground, when the axle or wheel breaks or when the leather thongs with which the several parts of the cart are tied give way, or when the rope cast round the necks of bulls or the reins break or when in spite of the driver loudly calling upon a person to move aside from the way an accident occurs But Manu VIII. 293, 294 (=Matsya 227. 95-96) provide that where through the want of skill of the driver knowingly engaged by a master the cart is overturned and injury is caused, the master should be fined 200 panas, but if the driver employed be known to be skilful, then when injury is caused the driver should be fined (and not the employer) Further if the driver, though seeing that the road is blocked by cattle or other carts, rashly drives and kills men and animals he should be punished (Manu VIII. 295) It is stated by Nār (pārusya 33, S B. E vol 33 p 212) that the father is not liable for his son's offence, nor is the owner of a horse, dog or ape liable to punishment (for injury caused by any of these) provided they are not set up (to do harm) by the owner. If a driver kills a man by rash or negligent driving he is to be punished like a thief, if he kills any one of the larger animals (such as a cow, a horse, a camel or elephant) the punishment would be half of the preceding, if he kills one of the inferior animals, the fine would be two hundred Kaut III 19, Manu (VIII 285), Yāj. II 227-229 and Visnu Dh S. V 55-59 prescribe graduated fines for the destruction of trees, plants and branches, flowers and fruits according to their usefulness and sanctity The smṛtis made a distinction as regards punishments between crimes of violence and crimes due to negligence or mistake For example, Manu VIII 264 (=Matsya 227 30) prescribes a fine of 500 panas for depriving a man of his house, garden or field by threats of violence, but only prescribes a fine of two hundred if a man deprives another of his house &c by mistake

Various rules were laid down about inciters or abettors Yāj II. 231 and Kaut [971] III. 17 prescribe for the man who incites another to crimes of violence double the punishment to be inflicted on the perpetrator himself and four times for one who incites another by assuring him 'I shall give as much money as will be required'. Kāt. (798) and Br [972] (S. B E 33 p 363 vers 31) prescribe that if several violently beat a man to death, he who gives the fatal blow on a vital part is declared to be the murderer and is to suffer the full punishment for murder. Kāt (832–834) [973] and Br. (S B E. 33 p. 364 verse 32) provide that he who commences a crime of violence, who is a helper, who gives advice as to the way (in which *sāhasa* is to be carried out), who gives refuge (asylum) to the offender or supplies weapons, who gives food to wrongdoers, who incites (offenders) to put up a fight, who shows how the person (killed) is to be destroyed, who connives (at the commission of an offence), who exposes the faults (of the person killed), who gives his approval (to the offence), who though able does not forbid or prevent the commission of the offence—all these are (practically) perpetrators of the crime and the king should award punishment according to their ability and their guilt. Vide also Āp Dh. S. II. 11 29. 1 [974] For those who begin an offence or abet its commission Br (S B. E. 33 p. 364 verse 32) prescribes half the punishment prescribed for the wrongdoer. [975] Yāj. (II. 232–242) enumerates several kinds of offences as allied to *sāhasa* and prescribes punishments therefor, such as breaking a house that is closed under seal, causing harm to neighbours and *kulikas*

(one's agnates), abandoning one's parents or sons or brothers or sisters even though they be not *patita*, sexual intercourse with a widow, (intentional) defilement of the higher castes by cāndālas, making counter-feit coins or false weights and measures, giving quack medicines to royal officers or other men These are all passed over here.

CHAPTER XXV

STRĪSAṄGRAHAṆA (Adultery or unlawful intercourse with a woman).

The Mit. (on Yāj. II.[976] 283) states that *saṅgrahaṇa* means the unlawful coming together of a man and a woman for sexual enjoyment. Br. (S B. E. 33 p 365 verses 1–2) says that sinful[977] *saṅgrahaṇa* is of three kinds, viz. brought about by force, deceit or sensual passion. The first (which is rape) occurs when intercourse is had in a secluded place against the will of a woman, or with a woman who is intoxicated or is disordered in mind or is under a mistake or when she raises a cry; the second occurs when a woman is brought to one's house by some trick or pretence, an intoxicant (such as *Dhatura*) is administered to her or her mind is brought under control (by chants or otherwise) and sexual intercourse takes place; the third occurs when intercourse takes place by conveying (passion) to each other by means of the eyes (glances) or by employing a go-between and when the parties are drawn to each other by the temptation of beauty or of wealth This last is again of three kinds acc to Vyāsa and Br. (S. B. E. 33 p. 365–66 verses 6–8 q. by Sm. C. II. p. 8) viz. trifling, middling and grave The first is characterised by winking at a woman, smiling at her, sending a go-between, touching her ornaments or clothes; the second by the sending of flowers, unguents, fruits, incense, food, clothes, and indulging in private talks; the third is characterised by lying on the same bed, dalliance, kissing and embraces. Strisangrahana by force (that is rape) is really included under

II p. 8, व्य. म p 397, वि. र. p. 379, परा मा III p. 462. There are many various readings The स्मृतिच explains कार्मण as कर्मणा वशीकरणम् Compare section 375 of the I. P. C with the first kind, sec. 493 with the 2nd kind and sections 497, 498 with the 3rd kind.

sāhasa,[978] as stated by the Madanaratna, the V. P. pp. 396-397 and others The punishments for rape were very heavy. Br (S B. E[979] 33 p 366 verse 10) states that if a man commits rape on a woman of the same caste, he was to forfeit all his property, to have his penis and testicles cut out and was to be paraded on the back of an ass, that if the woman raped was of a lower caste, then half of this punishment was to be awarded and if she was of a higher caste, he was to be sentenced to death together with confiscation of all property Kāt (830) prescribes that when[980] a man has forcibly had sexual intercourse with a woman capital punishment is to be inflicted inasmuch as it is a violation of (proper) conduct When sexual intercourse was had by deceit the man was punished with confiscation of all property, with branding on the forehead of the sign of the female private parts and banishment from the town (Br. in S. B E 33 p. 366 verse[981] 11) Here also the rule of Br cited above (about the reduction of sentence according to the caste of the woman concerned) applies. In the case of rape and sexual intercourse by deceit the woman was not at all punished[982] but she had to undergo a penance (prāyascitta) of *krcchra* or *pan ūka* for contact with a male other than her husband and till she performed the prāyascitta she was to be kept well-guarded in the house, was to remain dirty (i. e

not to deck herself or apply or use perfumes &c.), to lie on the ground (not on a bed-stead or couch), was to receive bare maintenance. After performing prāyaścitta she was restored to her former position. Acc. to Yāj. II. 286 and Br (S. B. E. 33 p. 366 verse 12), for adultery (in which there is consent) the highest fine is prescribed for the male in the case of a woman of the same caste, half of this in the case of a woman lower in caste (than the paramour), but when adultery is committed with a woman of a higher caste the male shall be put to death and the woman shall have her ears and the like cut off. Vide Shakespeare's Othello IV. 1, where Othello exclaims 'I see that nose of yours but not that dog I shall throw it to' There were other sages who were humane and opposed to the punishment of disfigurement by way of the cutting of the ear or the nose. Yama[982a] states that in the case of a woman guilty of adultery at her will, there was to be no punishment of death or disfigurement, but only abandonment. Kāt (487) lays down the general rule that in all offences women should be sentenced to half the fine in money which is prescribed for a male and that when the punishment is death for a male the punishment for a woman would be cutting off a limb (vide note 626).

Nār. (XV. 73-75) holds[983] that sexual intercourse with the step-mother, mother's sister, mother-in-law, the paternal or maternal uncle's wife, father's sister, a friend's or pupil's wife, sister, sister's friend, daughter-in-law, daughter, the wife of one's vedic teacher, a woman of the same gotra, a woman that has sought protection, with the queen or an ascetic woman (*prawrajitā*) or a wet-nurse or a virtuous wife (*sādhwī*) or a woman of a higher caste is incestuous and the punishment to be prescribed for this crime is the excision of the penis and no less. Vide Manu XI. 170-71, Kaut IV. 13,[984] Yāj III. 231-233, Matsya-

purāna 227 139–141, which latter (three) prescribe excision of the penis and death by way of punishment (except for a brāhmana) and expiation and for the woman (if she was a consenting party) death sentence Brhad-Yama III 7, Āp (in verse) IX. 1 (Jivananda ed.) and Yama (Ānandāsrama) 35 prescribe that there is no expiation except that of entering fire for incest with mother, teacher's wife, sister or daughter It is remarkable that Kaut.[985] and Yāj (*II* 293) prescribe only a fine of 24 panas for adultery with a female ascetic, while Nār XV. 74 and Matsya 227. 141 deem it a most heinous offence The explanation probably lies in the fact that Kaut and Yāj refer to female ascetics of the lowest castes not following the orthodox religion, while Nār. refers to nuns of a higher order Vide Manu VIII. 363 also. For forcible intercourse with a prostitute against[986] her will Kaut. IV. 13 and Yāj II 291 prescribe a fine of 12 and 24 panas respectively For unnatural offences or offences against the order of nature, Kaut IV 13, Yāj. II 289, 293, Visnu Dh S V. 44, Nar. XV. 76 provide fines of 12, 24, 100, 500 panas[987]

Manu IV. 134 (= Anusāsana 104. 21 = Mārkandeya-purāna 34. 62–63) forbids a man to have sexual intercourse with another's wife and states that there is nothing so detrimental to long life as that There are stray indications in the Vedic literature about sexual intercourse outside marriage. Vide H. of Dh. II pp. 637–639 In Rg. I 92. 4 (*adhi peśāmsi vapate nṛtūriva*) there appears to be a reference to a dancing girl or *hetaira*. Wives hating (or proving false) to their husbands are believed to go to Hell in Rg IV. 5 5 (*patiripo na janayo durevāh*) In Rg II. 29 1 the sage prays to the Ādityas 'remove away from me sin as a woman who gives birth to a child in secret removes it' (*āre matkam rahasūr-vāgah*). The gambler (in Rg X. 34 4) states 'others have intercourse with his wife' (*anye jāyām pari marśantyasya*). The word *pumścalī* occurs in Vāj. S XXX 22. We have already seen (H. of Dh II. pp 576, 1098) how in the Varunapraghāsa (one of the Cāturmāsyas) the wife of the sacrificer had to confess if she had a lover and how even after

987. स्त्रियमयोनौ गच्छत. पूर्वं साहसदण्ड. पुरुषमधिनेहतश्च । मैथुने द्वादशपणानि. मैन्योनिष्वनात्मनः । अर्थशास्त्र IV 13.

she confessed to having had one she was allowed to co-operate in the sacrifice on undergoing an expiation After a man performed the solemn sacrifice called Agnicayana he was enjoined (Tai. S. V. 6. 8 3)[988] not to approach a śūdra woman and after he performed Agnicayana twice he was not to approach another's wife (H of Dh vol. II. p. 1255).

The punishment for sangrahana (rape and adultery) varied according to the caste of the man and the woman, according as the woman was married or unmarried and according as she was guarded (*guptā*) or unguarded. Vide Gaut. XII. 2, Vas XXI. 1–5, Manu VIII. 359, Visnu Dh. S V. 41, Yāj. II. 286, 294, Nār. XV 70 (as to higher or lower caste of offender), Gaut. XII. 3, Manu VIII. 374–378, 382–385, Kaut. IV. 13 (about offence against guarded or unguarded woman), Manu VIII. 364–370, Yāj. II 285, 287, Kaut IV. 12, Nār. XV. 71–72 (about maidens). Further the ancient sūtras and smrtis prescribe more severe sentences than later smrtis. Details of these matters are passed over here for want of space and as being now of academic interest only. But some examples may be noted. Gaut. XXIII. 14–15 and Manu VIII. 371 prescribe for an adulteress death by being devoured by dogs, but Yāj II. 286 softened the rigour of this Āp. Dh. S. (II 10. 26. 20–21) prescribed the penalty of cutting the penis and testicles for the male if guilty of adultery with a married woman, but only confiscation of all property if he committed adultery with an unmarried woman. But Yāj. II. 288, Manu VIII. 366, Nār. XV. 72 went so far as to say that if a man had sexual intercourse with a maiden (of the same caste) who encouraged his advances, then there is no offence punishable by the king, but he was to bestow ornaments on her, honour her and must marry her

It has further to be noted that Yāj. II. 290 and Nār. (XV 79)[989] make it punishable to visit a dāsi kept by a man in his own house or outside and Yāj prescribes the fine of 50 panas for so doing. Vide H of Dh. vol. II. pp. 637–639 about prostitutes. But Manu VIII 362 states that the rules making conversation with others' wives in lonely places punishable does not hold good in the case of the wives of actors, singers

988. नाग्नें चित्वा रामासुपेयादयोनौ रेतो धास्यामीति न द्वितीयं चित्वान्यस्य स्त्रियमुपेयान्न तृतीय चित्वा का च नोपेयात् । तै सं V 6. 8 3–4.

989. आस्वेव तु भुजिष्यासु दोष. स्यात्परदारवत् । गम्या अपि हि नोपेया यत्ता परपरिग्रहा ॥ नारद् XV 79.

and those who live on the earnings of their wives, since they themselves introduce their wives to others and make them mix among men (while they themselves remain concealed)

Strīpundharma (duties of husband and wife). Most of the matters falling under this head have been dealt with in H of Dh, vol. II. pp. 556–592. The liability of the husband or wife for the debts of the other has been already dealt with under *ṛṇādāna* The rights of partition, inheritance and maintenance will be discussed later on under *dāyabhāga* Nār. XV. 1 defines this title of law as that in which the rules of the marriage of women and men and other related matters are described Under this head Nār. speaks of the essential ceremonies of marriage, the rules about selecting a bride and a bridegroom, restrictions as to the caste of the bride, the guardians for marriage, faults or defects in a proposed bride or bridegroom, the forms of marriage, women called *punarbhū* and *svairiṇī*, the practice of *niyoga*, illicit sexual intercourse, punishment of women for adultery, re-marriage, *varnasankara*, mixed castes. In IX 1 Manu promises that he will dilate upón the obligatory duties of man and wife, whether they are staying together or apart. Manu IX. 2 holds that the first duty of the husband and the males in his family is to keep women dependent and under their control if they become attached to a life of pleasure and Nār. XVI. 30 states that even women of good family come to ruin by independence The next most important matter acc to Manu IX. 5 and Br. (S B. E. 33 p 367 verse 2)[990] is to guard women against improper attachments however trifling, since if they go astray they bring sorrow to both families (of the husband and of the father). Acc to Hārita,[991] Śankha-Likhita,[992] Manu (IX. 7, 9) and others the husband has to guard the wife from the approaches of other men in order to ensure the purity of the issue and by guarding her the husband guards his reputation, family, soul and his *dharma*,

990 सूक्ष्मेभ्योपि प्रसङ्गेभ्यो निवार्या स्त्री स्वबन्धुभि । श्वश्रूादिभि गुरुस्त्रीभि पालनीया दिवानिशम् ॥ बृह. q. by स्मृतिच्च II p. 239, व्य म p 405, वि र p 411

992 यस्मिन्भावोऽर्पितः स्त्रीणामार्तवे तच्छीलं पुत्रं जनयन्ति यथा नीलवृषेण नीलवृष-वत्सप्रभव· श्वेतेन श्वेत एव जायते । एवं योनिरेव चलवती यस्माद्दूर्णा सकीर्यन्ते । शङ्खलिखित q by वि र. p 414, स्मृतिच्च. II. p 241, व्य म p 408 (at p 405 reads तादृश तन्तु जनयन्ति)

since a woman gives birth to a son similar to the male with whom she consorts or on whom she sets her heart during the days after the monthly illness. Here there is some anticipation of modern Eugenics. Manu IX. 10 was quite clear that women could not be completely guarded by confining them with force in seclusion, that their minds must be occupied in family work as stated by him in IX 11 and by Br. (S. B. E. 33 p. 368[993] verse 4), that the husband must try to deserve her regard and affection and show her honour (Manu IX. 22–24, 26, Yāj. I. 82). Divorce has been already dealt with in H. of Dh. vol. II. pp 619–623 Vide 'Selections from Peshwa's *daftar*' vol. 43 p. 112 where the divorce of a woman (*ghatasphota*) is ordered because the husband was really a converted Mahomedan who had been illegally admitted to caste after an incorrect method of expiation

CHAPTER XXVI

DYŪTASAMĀHVAYA

(Gambling and prize-fighting)

Manu IX. 223, Nār. XIX. 1 and Br. (S B. E. 33 p. 385 verse 3) define *dyūta* (gambling) as that sport which is carried on with inanimate objects such as dice, pieces of leather, ivory and the like and in which there is a stake, while sport carried on with animate objects such as cocks, pigeons, rams, buffaloes and wrestlers is called *samāhvaya* The attitude of Manu towards gambling was uncompromising. Manu (IX 221–222, 224–226) calls upon the king to suppress gambling and prize-fighting in his country as they cause the destruction of the State; he states that gambling is open theft and therefore the king should endeavour to put it down and that the king should punish with corporal punishment all those who engage in gambling or who induce or help others to gamble, and that he should banish gamblers from the city because gamblers residing in the country harass wellconducted subjects by their deceitful tricks. Manu IX. 227 (= Udyogaparva 37. 19) states that in ancient times gambling engendered great enmities and therefore a wise man should not resort to it even for amusement or in jest. Kāt (934) is to the same effect Yāj II. 203 and Kaut. III. 20[994] allowed gambling in a central place under State supervision as it led to the detection of thieves Br[995] (S B. E. 33 p. 385 verse 1) refers to this divergence of views: 'Gambling that causes loss of truth, purity and wealth was forbidden by Manu, but others allowed it because it led to the detection of thieves, provided it was carried on in the presence of a master of the gambling hall and provided it yielded revenue to the king' The person who was in charge of the

gambling hall which gamblers made their haunt and who supplied the dice and other instruments of gambling was called *sabhika* and the stake or money agreed to be paid by the defeated gambler to the winning gambler was called *pana* or *glaha* (Yāj II 199) Nār. XIX. 8 provides an optional method viz. instead[996] of gambling in a hall presided over by a sabhika, gamblers may give the king his share in the stakes, then indulge in gambling openly and if they do so they incur no punishment. Acc. to Yāj. II. 199 as interpreted by Par. M. III p. 574 and V. P. p 565 the sabhika was to receive five per cent or $\frac{1}{20}$th part when the stake was 100 panas or more and 10 per cent or $\frac{1}{10}$th when the stake was less than 100 panas. Aparārka (p. 802) explains that the sabhika was to receive as his fee five per cent from the victorious gambler and ten per cent from the losing gambler. Nār XIX. 2 prescribes a flat rate of ten per cent on the stake as the fee of the sabhika, while Kaut.[997] III 20 lays down the fee as five per cent and allows the sabhika to charge hire for supplying gambling accessories (such as dice, leather pieces) and for supplying water and accommodation The sabhika receiving protection from the king was to pay to the king the tax agreed upon by him, was to recover from the defeated gambler the stake (by means of confinement or restraint order) and pay it over to the victor and was to be honest and forbearing[998] (Yāj. II 200, Kāt 940, Nār. XIX 2) Kāt (937) states that the sabhika[999] may give to the winner the money won out of his own pocket and may recover from the losing gambler within three fortnights or at once if there is fear of losing the money. Kāt (935)[1000] holds that if gambling was to be allowed it must be carried on openly with an arch constructed near the door in order that respectable people might not be misled (about its real nature) and it should yield revenue to the king If the sabhika is

unable to make the defeated gambler pay the stake to the victor, the king would make the former pay to the latter provided the gambling was done openly in the presence of the sabhika and a group of gamblers and the king's dues were paid by the sabhika, but not otherwise (Yāj II 201). Nār. XIX 6-7 and Yāj II 202 provide that when gambling is carried on secretly and without the king's permission or with false dice or other deceitful tricks, the gamblers and the sabhika would not be able to gain their object (i e. recovering bets won or the fee) and would be liable to punishment, viz. branding on the head (with dog's foot and the like) and banishment Nār. XIX. 6 adds that the banished gamblers would have wreaths of dice tied round their necks. Kāt. (941) and Br. (S B. E. 33 p. 386 verse 7) state that a person ignorant of gambling should, if defeated in gambling in private, be released from his liability, but one who is an adept in gambling should not be relieved when defeated, but even an adept in gambling if he has lost the whole of his wealth as a stake should not be made to pay the whole.[1001] In disputes among gamblers, in deciding on victory or in the matter of gain to the winner, and as regards the question of false dice the keeper of the gaming house, if honest, is the final authority[1002] (Kāt. 942). Nār. XIX. 4, Yāj. II. 202, Br (S B. E 33 p. 386 verse 6), Kāt. (943) provide that when there is a dispute as to success or defeat the king should appoint gamblers to decide the dispute and gamblers will also be the witnesses in such a dispute (in spite of the rule stated above on p. 335 that gamblers are not competent witnesses), but if the gamblers are alleged to be inimical to the disputants the king may then[1003] himself decide the matter. Yāj. II 203 extends all the rules about gambling to *samāhvaya* Br. (S. B. E. 33 p 386 verse 4) notes that the stake is to be paid by the owner of the animal that is defeated.[1004] The S. V. (p. 487) quotes a text of Visnu and a (Bhāruci's?) gloss

thereon that the king gets one-fourth of the stake from each of the owners of the fighting animals and that the animal that is defeated (except a wrestler or a buffalo) is to be made over, whether living or dead, to the owner of the winner. The Mānasollāsa (vol. III. p 229) contains an elaborate description of a king's amusements by way of wrestling matches, cock-fights &c. The Daśakumāracarita makes frequent reference to gambling In Uochvāsa II. (p. 47) we are told that there are 25 kalās on which gambling depends, that legal proceedings between gamblers were decided by reliance on the sabhika and that out of a stake of 16000 *dīnāras*, the successful gambler took half and distributed the other half among the *sabhika* and the denizens of the gambling hall

Gambling is one of the most ancient vices. Rg. X. 34 is a hymn which contains the lament of a gambler. Elsewhere also in the Rg. gambling is referred to Vide Rg. I. 41. 9 (explained in Nirukta III. 16), VII. 86 6 (where it is said that dice made of Vibhīdaka tree are one of the sources of sin), Rg X. 42. 9, X. 43 5. In the Atharvaveda also dice and *glaha* occur frequently. Vide Atharva IV. 16 5, IV. 38 (a hymn for good luck in gambling) In Vāj. S. 30. 18 we have the words 'aksarājāya kitavam'. In certain solemn sacrifices like the Rājasūya dice play was an important item. Vide H. of Dh vol II. p 1219. Pānini teaches the formation of many words relating to gambling In II.[1005] 1. 10 he teaches the formation of *Avyayībhāva* compounds like 'aksapari' or 'salākāpari' in the sense 'that loss was caused by one dice being cast in a way different from the way in which it was cast in a prior game'. In IV. 4. 2 he teaches that 'āksika' means one who uses dice in gambling or wins by using[1006] dice and in IV. 4 19 he states that 'āksadyūtika'[1007] means '(enmity) brought about by using dice in gambling'. Vide also Pān. II 3. 57–58 Āp. Dh. S. II.[1008] 10 25 12–13 prescribe that in the

midst of the sabhā (hall) having raised a table for playing dice one should place thereon dice even in number and made from the vibhītaka wood and that players should be men of the three higher castes, pure and devoted to truth. In the Mahābhārata Yudhiṣṭhira[1009] is made to say that it was his vow not to refuse dice play when he was challenged to it. It was well-known that gambling affects the minds even of the good, while in the case of those who were not ordinarily good it led to dissensions and calamities Many modern people justify the action of Yudhiṣṭhira on the ground that the code of ksatriya chivalry and morality of those ancient days required that he should not be afraid to play with dice when challenged by an adversary Conceding for the sake of argument that indulgence in gambling even on the part of such a virtuous, noble and philosophic warrior as Yudhiṣṭhira was justified or at least excusable, there is nothing to show that the code of ksatriya chivalry permitted him to gamble away his own spirited, devoted and virtuous queen and his four valiant brothers It appears that the real aim of the great author of the Mahābhārata is to emphasize that gambling is such a reprehensible pastime and so ruinous and degrading that even the greatest and the best, when once they indulge in it, lose all sense of duty, morality and of the claims of love and affection. It has already been seen how gambling was looked upon as a great vice in the king by writers on politics and also on dharmaśāstra Even the Purāṇas here and there condemn gambling For example, the Brahmapurāṇa (171. 29-38) condemns it in strong language It says that the gambler's wife is always in distress and the gambler on seeing the condition of his wife is also worried (this is in almost the same words as Rg X. 34 10-11), that the Veda condemns gambling and that there is no sin comparable to gambling

CHAPTER XXVII

DĀYABHĀGA

(Partition of wealth)

The word *dāya* has been used even in the oldest period of the Vedic Literature Rg. II. 32 4 (*dadātu vīram śatadāyam-ukthyam*) has already been quoted above (on p. 388) In Rg X. 114 10 (*śramasya dāyam vibhajantyebhyaḥ*) the meaning of the word seems to be 'a share' or 'reward'. In the Tai S and the Brāhmanas the word dāya appears to be employed in the sense of 'paternal wealth' or simply 'wealth' In the story of Nābhānedistha[1010] it is stated that Manu divided his *dāya* among (for) his sons' (Tai S III 1 9 4) That 'dāya' here stands for 'dhana' follows from another passage of the Tai S. (II. 5 2 7) 'Therefore they distinguish (or establish) the eldest son by wealth'. In the Tāndya Brāhmana[1011] 16. 4 3-5 also it is said 'Therefore whoever among (a man's) sons secures the best or major portion of wealth as *dāya*, him they regard as the son who would be the lord of all'. Another word viz. *riktha* occurring in the sūtra and smṛti literature is also employed in the Rgveda[1012] III 31 2 'the son of the body does not give to his sister the ancestral wealth, but makes her the receptacle for the son of her husband' The word *dāyāda* (meaning a co-sharer, one who takes a share) occurs frequently in the Vedic Literature In the Tai. S VI. 5 8. 2[1013] it is said 'Therefore women being destitute of strength take no portion (of Soma)

1010 मनु पुत्रेभ्यो दाय व्यभजत् । तै स III 1. 9 4, तस्माज्ज्येष्ठ पुत्र धनेन निरवसाययन्ति । तै स. II. 5 2 7 आप ध सू (II 6 14. 11-12) quotes both these texts when combating the view that the eldest son gets the entire ancestral wealth For the story of Nābhānedistha with slight variation, vide Ait Br 22 9, which is an attempt to explain the obscure hymns Rg X 61-62

1011 तस्माद्य पुत्राणा दायं धनतमामिवोपैति तं मन्यन्ते यमेवेद भविष्यतीति । ताण्ड्य 16 4. 3-4

1012 न जामये तान्वो रिक्थमारैक् चकार गर्भं सनितुर्निधानम् । ऋ III 31 2 This is explained in the Nir (III 6) as 'न जामये भगिन्यै तान्व. आत्मज· पुत्र: रिक्थं मारिचत् प्रादात् । चकार गना गर्भनिधानी सनितुर्हस्तग्राहस्य'.

1013 तस्मात्स्त्रियो निरिन्द्रिया अदायादीरिपे पापात्पुस उपस्तितरं वदन्ति । तै स VI 5 8 2 दायाद is derived as दायमादत्ते (from दा with आ)

and speak more weakly than even a wretched (low) man'. In the Atharvaveda V 18 6 Soma is said[1014] to be the *dāyāda* of the brāhmanas Viśvāmitra invites Sunahśepa to share in the spiritual wealth (dāya) belonging to him (Ait Br 33 5), calls upon his sons to follow him and states that he (Śunahśepa) would accept them, his wealth (dāya) and his learning[1015] The Nir III 4 quotes or summarizes other Vedic passages in which the words dāya and dāyāda occur. In Pāṇini II. 3 39 and VI. 2. 5 the word dāyāda occurs.

The principal heads discussed under the *vyavahārapada* called *dāyabhāga* are two, viz partition and inheritance. For at least a thousand years there have been two schools that widely differ on these two heads, they are respectively known as the school of the Mitāksarā and that of the Dāyabhāga on account of the pre-eminent position of these works in the respective schools The latter school is predominant in Bengal while the former prevails in the whole of India excepting Bengal. But even in Bengal there are in modern times families governed by the law of the Mitāksarā This work in intention and scope does not profess to be a treatise on modern Hindu Law. It concerns itself with pointing out what the law of the Smrtis and writers of medieval digests was and has to eschew an exhaustive discussion of the modern case-law and legislative enactments that have made the Hindu Law appear in many respects to be entirely different from the law of the commentaries and digests Generally speaking, only very important divergences made by legislation and case law in the ancient and medieval Hindu Law can and may be pointed out here

The principal Sanskrit works of the Dāyabhāga school are three viz. the Dāyabhāga of Jīmūtavāhana, the Dāyatattva of Raghunandana and the Dāyakramasangraha of Śrikrsna Tarkālankāra The Mitāksarā school is subdivided into four sub-schools in which besides the Mitāksarā, the supreme authority, other works are referred to as supplementary to it and as modifying some of its doctrines viz the Benares school (which regards the Viramitrodaya as of high authority), the

1014. न ब्राह्मणो हिंसितव्योऽग्नि प्रियतनोरिव । सोमो ह्यस्य दायाद इन्द्रो अस्याभिशस्तिपाः । अथर्व V. 18 6

1015. उपेया देव मे दायं तेन वै त्वोपमन्त्रय इति । ते ब्रा. 33 5; एष व कुशिकां वीरो देवरातस्तमन्वित । युष्माश्च दाय म उपेता विद्या पाशु च विद्मसि । ते ब्रा. 33. 6.

Mithilā school (which relies on the Vivādaratnākara, the Vivādacandra and the Vivādacintāmani), the Mahārāstra or Bombay school (where the Vyavahāramayūkha is of the highest authority in Gujerat, Bombay Island and Northern Konkan even superseding the Mitāksarā in some matters and the Viramitrodaya and the Nirnayasindhu are also relied upon), the Dravida or Madras school (where the Smrticandrikā, the Vyavahāranirnaya of Varadarāja, the Parāśara-mādhavīya and the Sarasvatīvilāsa are also works of authority) In spite of some differences in the rules accepted in different provinces in all of which the Mitāksarā is of high autbority, all the provinces except Bengal are held to be governed by one school. Vide *Ambabai* v. *Keshav* I. L. R. (1941) Bom. 250.

The words *dāya* and *vibhāga* have been variously defined in the digests Nār. (*dāyabhāga*, verse 1) defines the vyavahārapada dāyabhāga as one in which sons arrange for the partition of their father's wealth. The Madanaratna as noted by the V. Mayūkha (text p. 94) reads 'arthasya pitryādeh' (wealth of the father and others) for 'pitryasya' in Nārada's verse The Smrtisangraha quoted in the Sm. C. and other works states that the word dāya applies to wealth that comes to a man through the father or the mother and the Nighantu defines dāya as the paternal wealth that is to be divided.[1016] The Dāyabhāga, the Mit. and others explain that the words 'pitryasya' (father's) and 'putraih' (by the sons) in Nār. are only illustrative, the real meaning being that the word 'dāyabhāga' applies wherever the wealth of a relative (father, grand-father &c) is distributed among his relatives (sons, grandsons &c) simply on account of their relation to the deceased[1017] owner This is borne out by the fact that Manu and Nārada both speak of the distribution of the mother's wealth also under dāyabhāga The Mit while introducing Yāj II. 114 says that the word *dāya* means the wealth which becomes another's property simply by reason of the fact of his relation to the owner. The V. Mayūkha (p. 93) defines dāya as that wealth which is to be divided and which is not the wealth of re-united members.

1016. विभक्तव्य पितृद्रव्यं दायमाहुर्मनीषिणः । निघण्टु q by स्मृतिच II. p 255, व्य म. p 93, पितृद्वारागत द्रव्य मातृद्वारागतं च यत् । क्वचित् दायशब्देन तद्विभागोधुनोच्यते ॥ स्मृतिसग्रह q by स्मृतिच II p 255, व्य म p 93

1017. विभज्येति पुत्रैरिति च द्वयमपि सम्बन्धिमात्रोपलक्षणं सम्बन्धिमात्रेण सम्बन्धिमात्रधनविभागेपि दायभागपदप्रयोगात् । दायभाग I. 3; तत्र दायशब्देन यद्धन स्वामिसम्बन्धादेव निमित्तादन्यस्य स्वं भवति तद्धुच्यते मिता : असहद्भि विभजनीयं धनं दाय । व्य म p 93.

The word 'dāya' though derived from the root 'dā' (to give) does not apply to 'heritable wealth' in the literal sense (of gift)[1018] The word dāya is rather conventionally used, though derived from the root 'dā'. In a gift (as stated in H. of Dh. vol II p. 841) there are two chief ingredients viz. 'abandoning one's ownership over a thing' and 'bringing about the ownership of another in that thing'. But in the case of dāya the deceased does not of his own accord abandon his ownership with the idea of creating ownership in another The two (dāna and dāya) are analogous in this that in both there is cessation of the ownership of a man in a thing.

The Mit., the Par. M., the Madanaratna, the V. Mayūkha, the V. P. and other works that follow the doctrines of the Mit. divide dāya into two varieties viz. *apratibandha* (unobstructible)[1019] and '*sapratibandha*' (obstructible). The first occurs in the case of sons, grandsons and great-grandsons, who, by the very fact of their being the sons or grandsons, obtain ownership in the (ancestral) wealth held by the father or the grandfather. In this case the existence of the father or grandfather presents no obstacle (*pratibandha*) to the son's or grandson's taking an interest by the very fact of his birth in the family property that is in the hands of the father or grandfather. Therefore this is called *apratibandha dāya*. But when a man takes the wealth of his paternal uncle or a father succeeds to the wealth of his son because the uncle or the son dies issueless, it is *sapratibandha dāya*, as in these cases the nephew or the father has no right in the uncle's or son's property as long as the uncle or the son is alive or as long as the uncle or son has a son or grandson That is, the life of the owner or the existence of a son presents an obstacle to the nephew's or father's succession. Hence it is *sapratibandha dāya*.

It is to be noted that the Dāyabhāga, the Dāyatattva and a few other works do not divide dāya into two kinds According

---

1018 दीयत इति व्युत्पत्त्या दायशब्दो द्रव्यातिप्रयोगश्च गौण, मृतप्रव्रजितादिस्वत्वनिवृत्तिपूर्वकपरस्वत्वोत्पत्तिफलसाम्यात् । न तु मृतादीना तत्र त्यागोस्ति । ततश्च पूर्वस्वामिसम्बन्धाधीन तत्स्वाम्योपरमे यत्र द्रव्ये स्वत्व तत्र निरूढो दायशब्द । दायभाग 1 4-5. Vide दायतत्त्व pp 161, 163 for almost identical words The व्य म (pp. 411-12) quotes these words and criticizes them

1019 अयं च दायो द्विविध सप्रतिबन्धोऽप्रतिबन्धश्चेति । यद् द्रव्यं स्वामिनस्तत्पुत्रादेरप्यभावे स्व भवति स सप्रतिबन्धो दाय । यथा पित्रादीना पुत्रादिधनम् । यत्पुत्रपौत्रयोः पितृपितामहधन जन्मन आरभ्य स्व भवति सोऽप्रतिबन्धो दाय । तत्र स्वामितत्पुत्रसन्ताबस्थाप्रतिबन्धकत्वात् । मदनरत्न (व्य. folio 89)

to them, all dāya is *sapratibandha* i e. ownership arises in another only on the death of the previous owner[1020] or on the cessation of the latter's ownership owing to his becoming *patita* or a *sannyāsin* (ascetic).[1021] The doctrine of this school is called *uparamasvatvavāda* (ownership arising on death), while the school of the Mit. holds the view of *janmasvatvavāda*. This is the great difference between the school of the Dāyabhāga and that of the Mitāksarā. The former does not recognise that the son, grandson or great-grandson acquires by birth any right of ownership in the ancestral property held by the father or other ancestor.

The two words '*sva*' and '*svāmin*' are correlative, the idea underlying both is the same and they are two aspects of the same question. 'Sva' means 'what belongs to a person' i. e. 'property'. It has direct reference to a thing and indirect reference to the owner of the thing. 'Svāmin' means 'master or owner' and directly refers to the person owning and indirectly to the thing. Vide Salmond's Jurisprudence, chap. XII. pp. 339–340 (9th ed. of 1937) for the idea of ownership. According to Śiromanibhattācārya *svatva* is a separate *padārtha* (category) by itself, while others say that it is a capacity.[1022]

1020. अतो जीवतोः पित्रोर्धने पुत्राणां स्वाम्यं नास्ति किं तूपरतयोरिति ज्ञापनार्थं मन्वादिवचनम् । एकः शब्दोऽपरश्चार्थ । न चोपरममात्रमेव विवक्षितं किंतु पतितप्रव्रजितत्वाद्युपलक्षयति स्वत्वविनाशहेतुतासाम्यात् । दायभाग I. 30–31, p 18, the वि. ता (folio 99) says 'ते (जीमूतवाहनादयः) सर्वत्र सप्रतिबन्धस्यैव दायस्य सत्त्वात् रिक्थसंविभागयोर्भिदाभावात् पूर्वोक्तयुक्तिविरोधान्मूर्खा एव'.

1021. It is to be noted that becoming *patita* entailed loss of the ownership of wealth, even according to Indian writers, only if the proper prāyaścittas were not performed For example, the V P. (p 429) states 'पातित्ये न प्रायश्चितानाचरण एव स्वत्वनाशो विभागानर्हता च । अन्यथा द्रव्यसाध्यं प्रायश्चित्तमपि पित्रोः स्वद्रव्येण न स्यात् ।' Ancient and medieval Hindu jurists were very considerate if one compares their prescriptions with the harsh laws against Non-conformists and Roman Catholics prevalent only about a hundred years ago in England and Ireland as briefly disclosed in Pollard's work 'Conscience and Liberty' pp 46–48 The Caste Disabilities Removal Act (XXI of 1850) provides that so much of any law or usage in force in British India, which inflicts on any person forfeiture of rights of property or may be held to impair or affect any right of inheritance by reason of his renouncing or having been excluded from the communion of any religion or being deprived of caste, shall cease to be enforced as law in British India This act, therefore, did away with the effects of being *patita* without undergoing *prāyaścitta* or of being excommunicated by a caste for some grave lapse.

1022 स्वत्वं पदार्थान्तरमेवेति शिरोमणिभट्टाचार्याः । स्वमिति व्यवहारविषयत्वं शक्ति विदोषो वेत्यन्ये । तच्च स्वगम्यमिति केचित् । वि. ता. (ms.) folio 96.

Since in defining dāya the idea of *svatva* (ownership) was brought in, many of the digests enter upon a learned disquisition on the question whether *svatva* is to be understood from the *śāstra* alone or is a matter of popular understanding. There is also an ulterior purpose in the minds of some writers in this discussion, viz that of denying that *svatva* can arise by mere birth. The reasoning of those who say that *svatva* is to be understood from śāstra alone is as follows Gaut (X 39-42) lays[1022a] down five sources of ownership common to all viz *riktha* (inheritance), purchase, partition, seizure, finding (of treasure and the like) and further states that in the case of brāhmanas acceptance of gifts is an additional source of ownership, conquest in the case of ksatriyas, gain by agriculture and service in the cases of vaiśyas and śūdras respectively. If ownership were to be apprehended from means other than śāstras, then this text of Gautama laying down sources of ownership that are common to all varnas and that are peculiar to each of the several varnas would serve no useful purpose and would be superfluous. Further Manu (VIII. 340) states that if a brāhmana seeks wealth even by teaching or officiating as a priest for a man whom he knows to be a thief, he would be punishable like a thief. If *svatva* is a matter of popular understanding then this is not proper, since the priest or teacher who obtains the wealth from one who is in possession of stolen things would have to be regarded as guilty of no offence as he merely pursues the methods of earning wealth specially prescribed for him by the smrti texts Further, if *svatva* is not to be apprehended from śāstra, such complaints as 'a thing that belongs to me has been stolen by this man' would not be possible, as svatva being a purely secular matter the thief would himself be (or would have to be deemed to be) the owner of the thing, because the latter is in possession of it. Thieving is forbidden by śāstra and so on the view of svatva being apprehended from śāstra alone, such a complaint is understandable[1023]. Besides eminent

1023 वर्तते यस्य यद्धस्ते तस्य स्वामी स एव न । अन्यस्वमन्यहस्ते तु चौर्यादौ किं न दृश्यते । तस्माच्छास्त्रत एव स्यात्स्वाम्य नानुभवादपि । अस्यापह्नतमेतेन न युक्त वक्तुमन्यथा । विहितोर्थागम शास्त्रे यथावर्णं पृथक् पृथक् । न च स्वमुच्यते तद्यत् स्वेच्छया विनियुज्यते । विनियोगोत्र सर्वस्य शास्त्रेणैव नियम्यते । सग्रह q by स्मृतिच II pp 256-257, मदनरत्न (folio 89), व्य म p. 416 The last notes that 'तथावर्णं पृथक् पृथक् is the reading of the मदनरत्न, but in my ms of the मदनरत्न the reading is as in the स्मृतिच.

works and writers like the Smrtisangraha and Dhāreśvara[1024] support the view Those who hold that svatva is known only from śāstra explain that riktha in Gautama's sūtra means simply dāya and samvibhāga means partition of dāya which establishes the separate ownership of a person on a portion of dāya (vide V. P. p. 415)[1025] They further urge that Gautama's text does not specifically mention birth as a source of ownership.

Others headed by the Mit. hold that *svatva* is apprehended from worldly usage and not from śāstra Their reasoning is: (1) just as rice effects an ordinary worldly purpose, so svatva brings about worldly transactions such as sale. What is not owned by a man does not enable him to effect such worldly objects and transactions as sale or mortgage. Such matters as the Āhavanīya fire that are prescribed by the śāstras are not useful in effecting secular purposes, but only śāstric ones. The Āhavanīya fire may be used in cooking rice, but that is in virtue of its ordinary nature as fire and not in its śāstric nature of being the Āhavanīya fire.[1026] (2) Even among Mlecchas and lowest peoples who are quite innocent of the knowledge of śāstras, the ideas of ownership arising from transactions of sale and the like do exist. Further (3) learned men well-versed in

1024 एतत्सग्रहकारमतं धारेश्वरभट्टेनाप्याश्रितम् । मदनरत्न (folio 90); यपञ्चितं चैतद्धारेश्वरसूरिणा । स्मृतिच II. p 257 It is somewhat strange that Dhāreśvara who is no other than the celebrated king Bhoja of Dhārā should be styled *bhatta* by the Madanaratna and *ācārya* by the Mit (on Yāj. III 24) and the V Mayūkha (p. 89)

1025 When a man dies his wealth is the dāya which several persons may inherit In their case, it becomes their joint property. So their ownership, being joint, is denoted by the word 'riktha' The joint owners become exclusive owners of definite parts of the dāya by partition, thus partition is a source of ownership (in this case exclusive ownership of distinct parts by several) But if there is a single heir then there can be no *samvibhāga* (partition) and so the source of his ownership is *riktha* and not samvibhāga. When there are several heirs riktha is on this view a source of joint ownership only It must be said that on the hypothesis of Jīmūtavāhana, *riktha* and *samvibhāga* rather coalesce with one another and cannot be distinguished so well as on the theory of the Mit

1026. *Vide* the Mit (on Yāj II 114), V P pp 419–422, V. Mayūkha pp 89–90, Par M. III. pp 482–483 for elaboration of this view. The S. V. p 396 ff while accepting the view that svatva is *laukika* does not accept the reasoning of the Mit , particularly with regard to the Āhavanīya fire.

the Mīmāṁsā such as Prabhākara[1027] (on Jaimini IV. 1. 2) and

1027. The Mit (on Yāj. II 114) quotes a passage of Prabhākara on the *lipsāsūtra* and explains it. Jaimini's sūtra (IV. 1. 2) is चस्मिन्नीतिः पुरुषस्य तस्य लिप्सार्थलक्षणाऽविभक्तत्वात् In this sūtra the word *lipsā* occurs Therefore this is called *lipsāsūtra*. The words अर्जनं त्वन्यं नापाहयतीति विप्रतिषिद्धं occur in the Dāyabhāga also (*II. 67 p 49*) and in Medhātithi on Manu VIII 417. These words are quoted in the Mit. as taken from Prabhākara (called *Guru*) and so it follows that even Medhātithi quotes from Prabhākara. The earliest extant commentary of Sabara offers three explanations of this sūtra, which deals with the question of what is *kratvartha* and what is *puruṣārtha* The third explanation concerns itself with the rules about acquiring wealth (which is necessary for performing every sacrifice) such as acceptance of gifts in the case of brāhmaṇas The question is whether these rules about the means of acquiring wealth are kratvartha or puruṣārtha If they are the former (i. e , if they are meant to be directly connected with the sacrifice) then a sacrifice performed with wealth not acquired according to the rules of śāstra will be defective or a nullity. But if the rules are puruṣārtha (i e addressed to the sacrificer only or to his conscience and sense of dharma) then even if the sacrifice is performed with wealth not acquired in accordance with śāstra there will be no defect in the sacrifice itself, only the acquirer will be at fault and may have to perform prāyaścitta. Says Śabara. सर्वं वा द्रव्यार्जनमुदाहरणम्। इह द्रव्यार्जनं तैस्तैर्निर्वर्त्यते. श्रूयते । ब्राह्मणस्य प्रतिग्रहादिना राजन्यस्य जयादिना वैश्यस्य कृष्यादिना । तत्र सन्देहः किं क्रत्वर्थो द्रव्यपरिग्रह उत पुरुषार्थ इति ।.

The Mit. points out that in the plausible view (pūrvapakṣa) and the established conclusion (siddhānta) it is assumed that acquisition of wealth by acceptance of gift is a matter known from worldly usage (*lokasiddha*). The comment of Prabhākara (called *Guru*) on this sūtra is not yet available in print The Sm. C. II pp 257–258, the Madanaratna, and V. P. p 420 quote a passage from the Nayaviveka of Bhavanātha on the same subject and explain it. The मदनरत्न says 'इत्थं चैतन्नयविवेके प्रामाकरमतानुसारेण भवनाथेन । लोकसिद्धं हि अर्जनं जन्मादि । अत एवानिर्दृष्टमलोकधीविषयतया नित्ये नित्यन्यनार्थो (=विधिपरतया स्वरूपेणानिबन्धनार्थो ?) स्मृतिर्न्यायकरणादिस्मृतिवत् ' The passage as printed in V. P. p 420 (अत एवानिर्दृष्टं मयनलोकधीविषयत्वव्यवहितं शक्तिमन्यनार्थो स्मृति) is corrupt and hardly makes any sense. The V. Mayūkha simply refers to Bhavanātha without quoting him. The वि रा (folio 98) remarks 'मीमांसकरप्युक्तं प्रतिग्रहादिनियमानां पुरुषार्थत्वं तेन विना अर्जितद्रव्यं पुरुषस्यैव दोष क्रतुसिद्धिर्भवत्येव ।.' Vide H. of Dh vol II pp 129–130 for quotations from several smṛtis laying down various means of livelihood Manu X. 115 enumerates seven sources of wealth as sanctioned by śāstra viz. finding (*of treasure*), *dāya* (inheritance), purchase, conquest lending for interest, work (agriculture and trade), acceptance of a gift from a worthy person and in X. 116 mentions ten means of maintaining oneself (in distress). The Mahābhāṣya (vol I. p 483) on Pāṇ II 3 50 states that a thing becomes one's own *in four* ways viz by purchase, by seizure, by begging or by exchange 'चतुर्भिरेतत्कारणैर्भवति क्रयणात्प्रहरणाद्याचनाया विनिमयादिति.' It must be remembered that the enumeration of the means of acquiring property in the dharmaśāstra works is not exhaustive but only illustrative.

Bhavanātha, author of the Nayaviveka, hold that ownership which springs from certain fixed sources only (such as purchase) is a matter of worldly usage or experience. Bhavanātha says: the sources of acquisition such as birth and purchase &c. are known from the world. The conception about the sources of ownership was not started for the first time by the śāstra, but such sources have been known from times immemorial (long before the smṛtis). That is, the recognition of the sources of ownership is prior and śāstra only systematises them subsequently. Therefore the smṛti of Gautama (X. 39) only assigns their proper spheres to the several sources of ownership that are already well-known (viz. five are common to all, acceptance of gifts is peculiar to brāhmaṇas and so on). In this respect it is like the grammar of Pāṇini. Pāṇini does not create or lay down new words but he takes the words already current in the language and introduces a system about their formation. Similarly Gautama only voices a certain fixed system among the several sources of ownership. The Mit. and its followers say that Gautama simply repeats the several sources of ownership known in ordinary worldly life (as the V. Mayūkha says 'lokasiddhakāraṇānuvādakam)'. The Mit, Par. M. III. p. 481, S V. p 402 and others hold that riktha and saṃvibhāga in Gautama's sūtra stand for apratibandha dāya and sapratibandha dāya respectively.[1028] The Mit. meets the other arguments of its opponents by replying that in the first place that even ordinary popular usage does not recognise that the thief becomes the rightful owner by simply possessing the thing stolen and that in the case where a person says 'this man has stolen my property' there is doubt and dispute whether the man charged has got ownership by purchase or the like.

The purpose of this discussion of the topic whether ownership is only known from śāstra or is a secular matter is, according to the Mit., as follows:—Manu XI. 193 (= Viṣnu Dh. S 54. 28) states that when brāhmaṇas acquire wealth by reprehensible actions (such as accepting a gift from an unworthy person or engaging in the sale of articles which he should not sell)

1028. The word *riktha* is often used in the sense of sapratibandha dāya also as in Gaut XII. 37 (rikthabhāja rnam pratikuryuḥ) and Yāj II. 51 (rikthagrāha rnam dāpyaḥ), Baud (riktham mṛtāyāh kanyāyāh) q. by the Mit. on Yāj II. 146. Vide *Bai Parson v Bai Somli* 36 Bom 424 at pp. 428–434 for an exhaustive exposition of the basic principles underlying the two kinds of dāya in the Mit. and the Vyavahāra-mayūkha).

they are purified from the sin by abandoning that wealth, by repeating the sacred texts (like the Gāyatrī) and by austerities If ownership springs from śāstra alone, what is earned by a person in ways condemned by śāstra cannot become the property of that man and so his sons cannot divide what is not his property. But if ownership is deemed to be a secular matter (*laukika*) then even what is obtained by condemned means becomes the property of that man, his sons incur no blame (though the acquirer may have to perform penance) and can divide that wealth (which is dāya), since Manu X. 115 enumerates dāya among the seven approved sources of wealth. The Madanaratna does not approve of this. Its reason briefly is that Manu XI. 193 simply lays down a penance, but does not say that wealth so obtained does not become the acquirer's property, that it is on account of this that Manu does not prescribe any special fine or punishment for one who acquires wealth by means of a bad gift, as he prescribes for a thief and that what is acquired by theft does not become the property of the thief and his sons cannot divide it and would incur punishment if they do so. V. P. (pp. 423-424) refers to the views of the Mit. and the Madanaratna and approves of the views of the former.

This discussion leads on to the next question, viz. whether ownership arises from partition or whether partition takes place of what already belongs to oneself (by birth) This subject has exercised the minds of writers on Dharmaśāstra from very ancient times. It should be noted that the difference of opinion relates only to the case of sons, grandsons and great-grandsons All writers are agreed that persons other than these have no rights by birth in the wealth of their relatives Those who oppose the view that sons acquire right by birth argue as follows:—

If sons have ownership by birth in ancestral property, then, on the birth of a son, the father cannot enter upon such religious duties as conseorating Vedic fires (which entail the expenditure of ancestral wealth) without the consent of the son. This would be opposed to the Vedic injunction "a man, whose hair is yet dark and who has had a son, should consecrate the sacred Vedic fires" Further, Smrti passages stating that a gift made by the father to one out of several sons as a favour (Nār. dāyabhāga 6) or by the husband to his wife out of affection is not liable to partition would be meaningless, since such gifts cannot be made without the consent of the sons (on the

theory that sons acquire property by birth). Besides, there are smrti texts like those of Devala[1029] which expressly negative the son's ownership during the father's lifetime. Manu IX. 104 and Nār. (dāyabhāga 2) enjoining that sons should divide wealth after the father goes to heaven (because the sons are not masters when the parents are alive, as Manu says) indicate that sons have no ownership by birth Moreover *svatva* is apprehended only from śāstras (like Gautama), which do not expressly enumerate birth as a source of ownership along with purchase and the like. Therefore the ownership of the son or sons arises on the cessation of the ownership of the previous owner (by his death or by his becoming *patita* or becoming an ascetic). When there is a single son, he inherits on the death of the father and there is no necessity of a partition But when there are several sons, they jointly inherit paternal wealth and can become exclusive owners of separate parts of the paternal wealth by partition alone As this last is the most usual case, it is said that *svatva* arises from partition (*vibhāgāt svatvam*). If this doctrine that ownership arises by partition alone were literally interpreted, then an only son inheriting his father's property will have no ownership as urged by the Vyavahāra-nirnaya, since there can be no partition in his case[1030].

The arguments advanced by those who hold that ownership in ancestral wealth arises by birth are as follows.—

It has been established that ownership is a matter of ordinary worldly usage. It cannot be denied that it is quite well-known to all ordinary people that sons acquire ownership by birth. Besides there is the text of Gautama[1031] "the ācāryas hold that one acquires ownership by birth itself" Moreover there are numerous smrti passages like those of Yāj. II 121,

1029. पितर्युपरते पुत्रा विभजेयुर्धन पितुः। अस्वाम्य हि भवेद्देषा निर्दोषे पितरि स्थिते॥ देवल q by दायभाग I 18, p 13, दीपकालिका (on या II 114), वि र p 456, परा मा III. p 480

1030 तथा विभागात्स्वत्वपक्षे एकपुत्रस्य मातापित्रोरूर्ध्वं विभागाभावात् स्वत्व न स्यात् तेन कुलमर्यादेव पितृपैतामहद्रव्येपि पुत्रस्य स्वाम्यमस्त्येव। व्यव नि p. 412

1031 तथा 'उत्पत्त्यैवार्थस्वामित्व लभेतेत्याचार्या.' इति गौतमवचनाच्च। मिता on या II 114 This is variously read by the digests and commentaries. The Madanaratna, Sm C. II. p. 258 and Dāyatattva p 162 read उत्पत्त्यैवार्थ स्वामित्वाल्लभेतेत्याचार्या The व्य म p 89 reads लभन्त इत्याचार्याः, while स वि reads 'उत्पत्त्यैवाय स्वामित्व लभत इत्याचार्या.' (p 402) Both Sm C. and S V. explain 'उत्पत्त्यैव मातृगर्भे शरीरोत्पत्त्यैवेत्यर्थ.', while the सुबोधिनी and the बालम्भट्टी on the मिताक्षरा explain उत्पत्त्यैव as जन्मनैव.

Br (S B E. 33 p 370 verse 3), Kāt. (839), Vyāsa and Visnu Dh.[1032] S. XVII. 2 which expressly state that in the paternal grandfather's wealth, the father and the son have equal ownership (and so the right of the son must be by birth). Those who uphold the son's ownership by birth repel the arguments advanced in favour of the opposite theory as follows:—The Vedic text enjoining consecration of Vedic fires at a certain age indicates that the father has the power to spend for religious rites from ancestral wealth even after the birth of a son. Similarly as head of the family and its manager, the father has independent authority to spend ancestral wealth (except immovable property) for indispensable acts of religious duty expressly enjoined by Vedic and Smrti texts and for making gifts of affection, for maintenance of the family and for ridding the family of distress. Further the father or the manager of the family can dispose of even immovable property by mortgage or sale in a season of distress or for the benefit of the family and for necessary religious purposes (such as śrāddhas[1033] etc.)

Ownership has to be distinguished from possession and custody. Further ownership is of various kinds, such as corporeal and incorporeal, sole ownership and joint ownership, ownership as trustee and beneficial ownership, vested and contingent. Even Western writers on Jurisprudence like Austin, Pollock and Salmond, find it difficult to define the exact meaning of ownership. Austin (Lecture XLVII) defines

This is the basic passage of the Mit. on which innumerable decisions have been given in the law reports, one of the latest and most authoritative being *Brij Narain v Mangla Prasad* L. R. 51 I. A 129 quoted on p. 448 above

property or dominion as the right to use or deal with some given subject in a manner or to an extent, which though not unlimited, is indefinite. Pollock defines ownership as the entirety of the powers of use and disposal allowed by law. But the idea of ownership does not require, according to Sanskrit works on Dharmaśāstra, that the owner should always be able to do with his property as he pleases. On the contrary the śāstras lay down restrictions on the owner, enjoining upon him not to make gifts to the detriment of his family (vide Yāj. II. 175 "*svam kutumbāya nodhena deyam*" and the verse of the Smṛti-sangraha "*na ca svamucyate*" quoted in note 963 above). Therefore property does not comprise only what one can dispose of at one's sweet will, but what is capable (in appropriate circumstances only) of being disposed of as one[1034] likes. A person may be prevented from dealing with his property as he likes by the king or by the rules of śāstra, by public opinion, by his own inclinations and by the pressure of those around him. But what he owns is theoretically capable of being disposed off by him as he likes. The Madanaratna puts forth the illustration that seeds kept dry in a granary do not sprout, yet they have the capacity of sprouting and so are as well denominated seeds as others that sprout. There are various grades of the limitations on property, such as the father's power, the widow's power and so on. What a person earns should belong to him, should be his property. But there are passages like Manu VIII. 416 and Nār. (abhyupetyāśuśrūsā, verse 41) that state[1035] "three are declared to be without wealth viz. the wife, the son and the slave; whatever they earn is for him to whom they (wife, son and slave) belong". It has been stated

1034. न च यथेष्टविनियोज्यत्व स्वत्वामिति वयं ब्रूम किं तर्हि यथेष्टावीनियोगयोग्यत्वम्। तच्च शास्त्रे कुटुम्बभरणादिविनियोगनियमनेन विनियोगान्तरविषयतामलभमानस्याप्यजितत्वमयुक्तमस्त्येव। यथा कुतश्चिद्धेतोरद्य कुरोत्पादनमकुर्वतोपि कुशूलादिस्थितस्य बीजस्य बीजत्वमयुक्तमद्य कुरोत्पादनयोग्यत्वम्। उक्त च नयविवेके। तच्च तस्य तदर्हं येनार्जितमिति। तदर्हं यथेष्टविनियोगार्हम्। भट्टमतानुसारिणि तन्त्ररत्नेपि। यथेष्टविनियोज्यत्व हि स्वत्वं केवलक्रत्वर्थत्वेऽन्यत्राविनियोगाद्यथेष्टविनियोज्यत्वाभाव (विनियोज्यत्वाभावात्स्वत्वाभाव?) इति। विनियोज्यमत्र विनियोगार्हं 'अर्हे कृत्यतृचश्चेति' पाणिनिस्मरणात्। मदनरत्न. 'अर्हे कृत्यतृचश्च' is पाणिनि III 3. 169. The passage यथेष्टविनि ... त्वाभाव इति occurs in the तन्त्ररत्न (सरस्वतीभवन series) part 1 p. 19. Vide व्य. म p. 416 for a similar statement and p. 422 for the illustration of seed in the granary

1035 भार्या पुत्रश्च दासश्च त्रय एवाधना. स्मृताः। यत्ते समधिगच्छन्ति यस्य ते तस्य तद्धनम्॥ मनु VIII. 416, उद्योगपर्व 33 64 reads त्रय एवाधना राजन् भार्या दासस्तथा सुतः। यत्ते &c., नारद (अम्यु 41) is अधनास्त्रय एवोक्ता भार्या दासस्तथा सुतः। यत्ते &c

by such an ancient writer as Śabara-svāmin[1036] that this passage does not deny the ownership of the wife or son in what she or he earns, but is only intended to lay down that the wife or son cannot independently (without the consent of the husband or father) dispose of what she or he earns. This view of the text of Manu is accepted by the Dāyabhāga as well as by the Mitākṣarā School. The latter holds on the analogy of the interpretation of Manu VIII. 416 that the texts of Devala, Nār and Manu IX. 104 which apparently deny ownership (*svāmya*)[1037] to the son during the father's lifetime over property in the hands of the father are to be interpreted only as denying the son's power of independent dealing with such property during the father's lifetime or as referring to the self-acquisitions of the father On the other hand the Dāyabhāga and the Dāyatattva try to explain away such passages as those of Yāj II. 121, Viṣnu and others (quoted above) that speak of the son's ownership by birth The Dāyabhāga offers two explanations of Yāj II.121.[1038] The first explanation offered by it and taken from Udyota is — If A has two sons B and C of whom C dies first, leaving a son D and then A dies, then Yāj says that both B (son of A) and D (grandson of A) will be equally entitled to the wealth left by A and not B alone, though he is nearer to A than D, because both B and D offer pindas of the same efficacy to A in the pārvana-śrāddha and so there should be no difference between the two. The words "sadṛśam svāmyam" refer to this equality of the son and grandson. The 2nd explanation is that of

1036 On जै VI 1 12 शबर says 'एवं स्मरति। भार्या दासश्च पुत्रश्च निर्धना सर्व एव ते। यत्ते. तद्धनमिति।' Then on जै. VI 1. 14 he remarks 'यत्तूच्यते भार्यादयो निर्धना इति। स्मर्यमाणमपि निर्धनत्वमन्याय्यमेव श्रुतिविरोधात्। तस्मादृत्वातन्त्र्यमनेन प्रकारेणोच्यते संव्यवहारमसिद्ध्यर्थम्।'.

1037. यत्तु देवलोपि पितर्युपरते. स्थिते इति अत्रास्वाम्यवचननस्वातन्त्र्यप्रतिपादनार्थमिति मन्तव्यम्। स्मृतिच II 256, vide also अपरार्क p 718, व्यव नि p 412, परा मा III. p 480 for similar remarks 'देवल पितर्युपरते.. इति तत्पित्रर्जित स्वातन्त्र्यनिषेधार्थं न पैतामहे' वि ता folio 96

1038 यत्तु याज्ञवल्क्यवचनं 'भूर्या पितामहोपात्ता.. चोभयो' इति तस्य निरवद्य-विद्योद्योतेन द्योतितस्तत्त्वतोऽयमर्थः। यत्र द्वयोर्भ्रात्रोर्जीवत्पितृकयोरप्यासभागयोरेक पुत्रमुत्पाद्य विनष्टोऽन्यो जीवति अनन्तर पिता सुत तत्र पुत्र एव तद्धनं यास्यति अतिसन्निकर्षात् तदर्थं सदृश स्वाम्यमिति वचनम्। यथा पैतामहधने पितुः स्वाम्यं तथैव तस्मिन्मृते तत्पुत्राणामपि न तत्र सन्निकर्षविप्रकर्षाभ्यां कोपि विशेषः पार्वणविधिना पिण्डदानेन द्वयोरपि तदुपकारकत्वाविशेषादित्यभिप्राय। दायभाग II 9, p 29 Here the Dāyabhāga appears to refer to a very learned predecessor called Udyota, who is styled निरवद्यविद्य (of unblemished learning) From the व्यवहारनिर्णय (pp 78, 455) it appears that उद्योतन was an ancient author on vyavahāra spoken of in the same breath with धारेश्वर and असहाय

Dhāreśvara viz. that when the father desires to make a partition, he may distribute his self-acquired property as he likes among his sons, but as to the property he got from his own father (i. e the grandfather of his sons) he has the same ownership that sons have and he cannot make an unequal division at his sweet will. The Dāyabhāga[1039] rejects the view that Yāj. II. 121 enables the son to demand partition of the grand-father's property from the father even against the will of the latter or that father and son have equal shares in the grandfather's property The same remarks apply to the texts of Visnu and others viz. that in the grandfather's property father and son are equally owners and that the words "tulyam svāmyam" or "samamamśitvam" do not mean that father and son take the same share therein

From the above discussion it will be clear that the two schools of the Dāyabhāga and of the Mitāksarā were not started by them for the first time, but each had respectable antiquity behind it. Smrtis like those of Manu, Nārada and Devala and eminent authors like Udyota and Dhāreśvara had put forward the doctrine of *upaiama-svatvavāda*, while the Smrtis of Yāj., Visnu, Br. espoused the doctrine of *janmasvatvavāda* Viśvarūpa who commented on Yāj (in the first half of the 9th century) holds that ownership arises by birth[1040]. The Mitāksarā further supports that theory by citing a sūtra of Gautama (*utpattyava* etc.) which is not found in the extant Gautama-dharma-sūtra. This sūtra does not occur in Aparārka and several other works and is stated by Śrīkrsna Tarkālankāra (on Dāyabhāga I. 21 p 14) to be not authoritative (*amūla*). These facts emboldened Dr. Jolly to go so far as to make the facile suggestion that it was fabricated by Vijñāneśvara or his predecessors (Tagore Law Lectures p. 110). We have seen that so early a writer as Visvarūpa was excited over the question whether ownership arises on partition or by birth The learned Doctor has failed to note that the ancient commentator Medhātithi (about 900 A D.) favoured the view of ownership by birth and quotes (without name) the sūtra in a slightly different form (on Manu

---

1039 अत: पितापुत्रयो: पैतामहधने समविभागार्थं सदृशं स्वाम्यमिति वचनं पुत्राणां वा विभागस्तात्पर्यार्थमिति मतद्वयमपि हेयम्। दायभाग II. 18 p 31.

1040 या त्विच्छया विभागस्मृति: सा स्वयमुपात्तद्रव्यतो द्रष्टव्या। अत स्वत्वे सति विभाग इति सिद्धम्। विश्वरूप on 'भूर्या पितामहोपात्ता' (या II. 124).

IX. 156).[1041] So it was not necessary for Vijñānesvara to fabricate a sūtra nor for any one else, for even in the absence of Gautama's sūtra the texts of Yāj and others were quite capable of the *interpretation* put on them by the Mitāksarā. It has to be noted that the Dāyabhāga[1042] does admit that in some (texts?) ownership is stated to arise by birth itself (*kvacit janmanaiveti*) and it explains that the words are not to be taken literally but that birth is said to be the source in an indirect way, as the relation of father and son is based upon birth and on the death of the father the son's ownership arises (therefore though ownership directly arises on death, birth may be said to be the source of it as the son is the first heir because of his being born as a son to the father). The Dāyatattva does not say that the sūtra of Gautama is not authoritative, but explains it away on lines similar to those of the Dāyabhāga. It may be stated here briefly that the Dāyabhāga differs from the Mitāksarā in four main points:—(1) The Dāyabhāga denies the theory that property is by birth, while the Mit. accepts it; (2) the Dāyabhāga lays down that the right to inherit and the order of heirs is determined by the principle of religious efficacy, while the Mit. school holds that blood relationship is the governing factor in this matter; (3) the Dāyabhāga holds that members of a joint family (such as brothers or cousins) hold their shares in quasi-severalty and can dispose of them even when there is no partition by metes and bounds; (4) the Dāyabhāga holds that even in an undivided family the widow succeeds

to her husband's share on his death without male issue, while the Mit school holds that she does not do so.

Various attempts have been made to explain why in Bengal alone the laws of succession and inheritance should diverge materially from the laws prevailing in the rest of India. In two learned papers 'on the origin and development of the Bengal school of Hindu Law' contributed to the Law Quarterly Review (vol. XXI for 1905 pp. 380–392 and vol. XXII for 1906 pp 50–63) Mr. Justice Saradacharan Mitra tries at some length to advance a theory of his own: 'The commercial spirit of the newly formed nation in the eastern corner of the Indian peninsula with its deltaic character and nearness to the sea, the new ideas which other nations trading with it were bringing in every day, the necessary admixture of races in some parts of the country, the religion of Buddha which for centuries was here the religion of the sovereign as well as of the people and the influence of the Buddhistic *tantras* combined to bring about a law of property dissimilar in material respects from the rules propounded by Brahmanical sages of old and explained and commented upon in the Mitāksarā and the books based on the same'. His idea is that, as Buddhism profoundly affected the position of women and as tantras like the Mahānirvāna subscribed to the exaltation of the feminine element in nature, the ancient law of property, particularly in relation to women, came to be affected and conceptions of individual ownership, of freedom from restrictions on alienation and of the rights of females arose in Bengal which were incorporated by Jīmūtavāhana in his Dāyabhāga. With the greatest respect to the learned writer, it must be said that the grounds he urges are far from convincing. A thorough examination of his thesis cannot be undertaken here for want of space. But a few remarks must be made. As regards maritime activity the West coast of India was far more in touch with seafaring and commerce with the West than even Bengal, as the mention of the ports of Barugaza (Broach) and Kalliéné (modern Kalyan) by Greek writers, the finding of hoards of Roman coins and the existence of Syrians on the West Coast clearly establish. Buddhism had spread to central and western India as early (if not earlier than) the period when it could have spread to Eastern Bengal and Assam. Sanchi, Bhilsa, Bharhut, the Nasik and Karla caves bear eloquent testimony to the influence of Buddhism in central and western India for centuries before and after the Christian era. Besides as Mr. Justice Mitra himself

admits 'Buddhism had not its own law of property' (Law Quarterly Review vol. XXI p. 388) Buddhist countries like Burma themselves borrowed their laws of succession and inheritance from the Manusmrti. Vijñāneśvara is far more liberal to women than Jīmūtavāhana, who does not allow any woman to succeed as heir unless she is expressly mentioned as an heir in the smrti texts. The Mahānirvāna-tantra treats a sister and stepmother as near heirs and allows even a paternal uncle's widow and son's daugther to succeed, but under the Dāyabhāga these are not at all heirs. One branch of the Mitāksarā school, viz that of the V. Mayūkha in Western India is far more liberal about the claims of women than any school. The Marumakkatayam and Aliyasantan law in force in some districts of South India and among certain communities like the Nambudri brāhmanas and Nairs go to the other extreme in their regard for women but no one has so far traced that law to Buddhist or Tantric influence. The peculiarity of the Dāyabhāga, viz the principle of religious efficacy is far more remote from rules of affinity given in the Mahānirvāna-tantra than the principle of consanguinity espoused by the Mitāksarā school. Mr. Justice Mitra is wrong in his estimate of the age of Jīmūtavāhana. As stated above (on p. 557) Jīmūtavāhana relies on authors like Udyota and the smrtis of Devala and others It is best to admit that no satisfactory explanation can be given of the peculiar doctrines of the Dāyabhāga. They have an indigenous and independent origin and growth.

Vibhāga (partition) is defined by the Mit. [1043] as the allotment to individuals of definite portions of aggregates of wealth over which many persons have joint ownership The Dāyabhāga found several faults with this definition, the principal criticism being that it is cumbrous and farfetched to assume that the (joint) ownership of several (sons and the like) is first produced in the entire wealth of the father and then to hold that this joint ownership is subsequently destroyed Its own definition is: "*Vibhāga* means the indication of the ownership (of one out of many) by the casting of a ball or pebble (on a definite part of the land or cash), which (ownership) arises with

1043. विभागो नाम द्रव्यसमुदायविषयाणामनेकस्वाम्यानां तदेकदेशेषु व्यवस्थापनम्। मिता on या II 114, व्यवहारतार p 212, अपरार्क p 729 is almost the same, एकदेशेऽपि तस्यैव भूहिरण्यादावुत्पन्नस्य स्वत्वस्य विनिगमनाभमाणाभावेन वैशेषिकव्यवहारानर्हतया अव्यवस्थितस्य गुटिकापातादिना व्यञ्जन विभागः। विशेषेण भजनं स्वत्वज्ञापन वा विभाग। दाय भाग I. 8-9, p. 8.

reference to a portion only (of the heritage of land and cash), but which is indefinite because it is not possible (for one man) to deal specifically with a particular portion (of the heritage) since there is nothing to show for certain what portion belongs to whom". The Dāyabhāga denies that ownership jointly arises in all co-sharers (before partition) over every portion of the heritage and states that it arises in portions of it but there is no certain indication to show which part belongs to whom and that the portion of each is made definite and ascertained by partition effected by casting a ball or pebble on a portion (saying 'this is A's exclusive portion' etc.). The Dāyatattva[1044] (p. 163) criticizes this definition. If before partition each of the co-heirs has ownership in part only of the entire heritage, what assurance is there that the allotment of a part to one co-heir by means of casting a ball will be as to the same portion over which his ownership arose before the partition? The Dāyatattva, though differing[1045] from the Mit. as to the doctrine of ownership by birth, agrees with it as to the definition of vibhāga. The differing definitions of vibhāga given by the Mit. and the Dāyabhāga lead to different results. Under the Mit when there is a joint family of father and sons or grandsons, all these are coparceners and the ownership of the coparcenary property is in the whole body of coparceners i. e. there is unity of ownership while the family remains joint, no coparcener can say that he is owner of a definite share, one fourth or one fifth etc. A coparcener's interest is fluctuating, is capable of being enlarged by deaths and is liable to be diminished by births. It is only on partition that a coparcener becomes entitled to a definite share. On the other hand according to the Dāyabhāga there is no ownership by birth, the sons on the father's death constitute a coparcenary but the ownership of the family property is not in all the sons as a body. Every son takes a defined share, the moment the ownership of the father ceases (owing to death etc). The share so taken does not fluctuate with births and deaths. The sons are coparceners in the sense that their possession of the property

inherited from the father is joint i e. there is *unity of possession*, though there is no *unity of ownership*.

According to the Mitāksarā sons take by birth an interest in ancestral estate. Suppose A is sole owner of an ancestral estate and has no issue. In that case there is no coparcenary. But the moment a son is born to him, a coparcenary is started. That is, under the Mitāksarā the birth of a son starts a coparcenary. Under the Dāyabhāga there is no coparcenary between father and sons as the latter acquire no rights by birth even in ancestral property but it may subsist between brothers or uncles and nephews Under the Dāyabhāga, the *death* of a man may start a coparcenary among his sons (who will be brothers).

Partition has two senses, (1) division by metes and bounds and (2) separation or severance in interest. Under the Mitāksarā it is possible to have partition in both these senses The members of a coparcenary may define, at a particular moment, the shares that each would be entitled to; but the actual division of property by metes and bounds may be postponed to a future date and in the intervening period they may enjoy the property in common as before. This is clearly brought out by the Vyavahāramayūkha[1046] when it says " even in the absence of joint (family) property severance (of interest) takes place also by a mere declaration in the form 'I am separate from thee'; for severance is merely a particular mode (or state) of the mind and this declaration merely manifests that (state or mode of the mind)". The S. V. (p. 347) has a similar passage. It is here stated that an unequivocal declaration of intention to separate effects the severance of a member from the joint family and that it is not absolutely necessary that there should be any joint property or that the property be divided by metes and bounds. This last follows as a matter of course when there is a severance of interest This proposition has been accepted by the Privy Council[1047] and this passage of the Vyavahāra-

1046 द्रव्यसामान्याभावेपि त्वत्तोऽहं विभक्त इति व्यवस्थामात्रेणापि भवत्येव विभाग । बुद्धिविशेषमात्रमेव हि विभागः । तस्यैवाभिव्यक्तिकेयं व्यवस्था (व्य म p. 94, अनेन ज्ञापते परिभाषा विना सङ्कल्पमात्रेणापि विभागसिद्धिः । स वि p. 347.

1047. Vide *Pandit Suraj Narain* v. *Iqbal Narain* 40 I A p. 40 (=15 Bom. L R 456) for this proposition and *Soundararajan* v *Arunachalam* 39 Mad. 159 (F. B.) at pp 174-175, 185 and *Giryabai* v *Sadashiv* 43 I A 151 at p. 160 (=18 Bom L. R. 621) for citation of the above passage of the V. Mayūkha.

mayūkha has been quoted in several cases. What constitutes an unequivocal declaration of intention to separate has as usual given rise to a good deal of case law which has to be passed over here. Under the Dāyabhāga heirs succeed on the death of the previous owner in certain definite shares and therefore partition has ordinarily only the first sense viz. assigning to the coparceners specific portions of the property inherited. Another way of separating a member[1048] is also mentioned by Manu IX. 207 and Yāj II. 116, viz. that when a member of the family is able to fare for himself and does not desire to have a share in the family property, he should be separated by giving him some trifle (as a token). The Mit. adds that the trifle is given as a piece of evidence to prevent his sons claiming a share later on.

The principal matters to be discussed under *Dāyabhāga* or *Dāyavibhāga* are, as stated by the Sangraha and the Mit., four, viz. the time of partition, the property liable to partition, the mode of partition and the persons entitled to partition[1049].

Time for partition. The evolution of the son's right to demand a partition has been a process of ages. It would not be out of place to say a few words on this topic here. In most primitive societies where the patriarchal family system prevailed, the father had absolute power over the son, it was the son's duty to obey the father, alienation of family property was not allowed, the father had power over the acquisitions of all persons including the son and women were incompetent to hold property. Faint traces of these can be detected in the Vedic literature. The legend of Sunahśepa narrated in the Ait. Br. (33 1 ff), where we are told that Ajigarta sold his son for being offered as a victim to Varuna, that Viśvāmitra adopted Śunahsepa as his son, though he had already a hundred and one sons, and that he cursed and disinherited his fifty sons for their disobedience to

II. 116 and मनु IX. 207 differently (taking अनीहमानस्य as meaning 'who does not work though able to do so') 'प्रकाशकारस्तु यो भागिषु धनार्थं व्यापृतेषु प्रमादालस्यादिना नेहेत न व्याप्रियेत साहाय्यं न कुर्यात् स्वकर्मणा स्वव्यापारेण शक्त साहाय्यकर्मणि क्षमोपि सन् स स्वकादंशात् स्वव्यापारजनिताद्धनाद् बहिः कार्यः किञ्चिदुपजीवन दत्त्वा मूलधनमात्रभागीकरणीय इति।'. अपरार्क p 719 gives both these meanings.

1049. यस्मिन्काले यया भङ्ग्या यैरेव क्रियतेपि च। याद्दशस्य च दायस्य यथाशास्त्रं प्रदृश्यते। संग्रह q. by स्मृतिच II. p. 255, स. वि. p. 349, इदमिह निरूपणीयम्। कस्मिन्काले कस्य कथं कैश्च विभागः कर्तव्य इति। मिता on या. II. 114.

his order, indicates that in the days of the Ait Br. it was believed that in hoary ages long before it, the father's power over his sons was absolute. But a caution is necessary. It is possible to over-emphasize the legend of Śunahśepa; it has to be remembered that it is a mere legend and that the Ait Br. itself shows that the conduct of Ajigarta was condemned as most unworthy of a decent man even according to the legend.[1050] In modern times there are rare instances where parents insure their children and then poison them or maim them for earning the insurance money. But no one says that this is usual or that modern law allows it. In Rg. I. 117. 17 it is stated that the eyes of Ŗjrāśva were put out by his father because the former gave a hundred rams to a she-wolf. This is a solitary instance and it is probable that the verse has some esoteric meaning or refers to some terrestrial or celestial phenomenon. In the Kāthaka Samhitā XI. 4 it is said "the father rules over the son" (*pitā putrasyese*). But it must be said that ideas about the father's absolute power over the sons lingered on in historic times. The Nir. (in III 4) puts forward the argument of some predecessors that daughters did not succeed to the father's wealth because women could be donated, sold or abandoned and not men, while others said that males also were liable to the same treatment as evidenced by the story of Śunahśepa.[1051] Vasistha (XV. 2) states that[1052] father and mother have power to make a gift or sale of the son or to abandon him. We saw above (n 1035) that Manu stated that a son's earnings belonged to his father. The Āp. Dh. S. (II. 6. 13. 10–11) emphatically says that the right to give away or sell one's child is not recognized and that the word "sale" used in connection with a bride is used only metaphorically. About the word "sale" in relation to marriage vide H. of Dh. vol. II. pp. 503–506.

On the other hand even in the Rg. we find that sons divided the father's property during his lifetime when the father grew old. "O Agni! men worship you in many places in various ways; they take (from you) wealth as from an aged father"

1050. स होवाच शुन शेपो य सकृत्प्रापक कुर्यात्कुर्यादिनस्तनोऽपरम् । नापागा. शौद्रान्न्याय।दसन्धेयं त्वया कृतमिति । ऐ ब्रा 33. 5.

(Rg. I. 70 5).[1053] In the Ait Br. (22. 9) the story of Nābhānedistha[1054], the youngest son of Manu, shows that the elder brothers divided all the father's property among themselves, and excluded Nābhānedistha during the father's lifetime apparently without any protest from him or in spite of it In the Tai S. III. 1. 9. 4–5[1055] the version of the same story is different, since it is there said that Manu himself divided his wealth among his sons and did not give any share of the paternal wealth to Nābhānedistha who was away at a teacher's house as a vedic student In the Gopatha Brāhmana (IV. 17) it is said "therefore in their childhood sons subsist on their father, while in his advancing years the father subsists on the son". In the Śat.[1056] Br (S. B. E. vol. 44, p. 157) we read "whence in early life the sons subsist on the father...whence in later life, the father subsists on his sons". In the Kausītaki Br. Upanisad (II. 15) after describing the symbolical handing over to the son of all his physical and mental powers by a father who is expecting death it is said that if after this rite the father recovers he has either to remain under the son's dominion or go out as a wanderer (a *sannyāsin*)[1057] From some of the above passages, it appears that in rare cases sons divided paternal wealth even during the lifetime of the father and against his will. The remark of Dr Jolly that "it may be unhesitatingly set down as a fact that in the earliest period of Indian Law, partition of property was an entirely unknown proceeding" (Tagore Law Lectures p. 90) goes too far and is not fully warranted by Vedic texts Just as the Tai. S. (III. 1. 9. 4)[1058] narrates that Manu distributed his wealth among his sons, it also speaks of the eldest son being established with ancestral

wealth. The Āp. Dh. S. (II. 6. 14. 6 and 10–12) refers to both these passages of the Tai. S. but concludes that equal division among sons is the proper mode and that giving a major part of the estate to the eldest alone is forbidden by the śāstras[1059]. These lead to the conclusion that equal distribution among all sons was believed to be the rule and giving the major portion to the eldest son was an exception (and a rare case) even in the Vedic age. The Ait. Br. (19.3) speaks of the right[1060] of Indra to primogeniture (jyaisthya) and pre-eminence (śraisthya) This right of the eldest son to special treatment at the time of partition persisted in the times of Manu (IX. 112 ff) and Yāj (II. 114) also and even in modern times it is recognized to some extent in the case of impartible estates and even in ordinary families on the ground of custom or from the nature of the grants made by the former Governments or the British Government (such as Jaghirs and Saranjams). Both Kaut. and Kāt. declare that customs of countries, castes, villages and groups varying rules of partition and inheritance should be enforced by the king[1061]. Dr. Jolly (ibid. p. 98) further relies on the fact that the Āpastamba-dharmasūtra mentions no other kind of partition than that made by the father. But this is far from conclusive. Āpastamba was a great purist and idealist. He ignores several matters which are wellknown to have existed long before his time. For example, he takes no notice of the several kinds of secondary sons and he does not allow a brāhmana to take up a weapon even for examining it except when he is murderously attacked (I. 10. 29 7–8), while Manu (VIII. 345–349), Gautama VII. 6 and 25 and others allow a brāhmana much greater latitude. Therefore Āpastamba's silence cannot lead to the positive conclusion of the absence of any other method of partition. As a matter of fact, Gautama (15. 19) who is generally regarded as prior to Āpastamba states that brāhmanas that had separated from their fathers against the latter's will were not fit to be

invited for dinner at a śrāddha [1062] That shows that partition of sons from the father against the father's will was wellknown long before Gautama. Dr. Jolly also (ibid p. 90) relies on an anonymous smrti text (quoted by the Mit in its introduction to Yāj. II 114) which absolutely prohibits the sale of land. But this is irrelevant The text could not be taken literally when we have seen that sales of land have been taking place for at least two thousand years. All that the text means is that a sale should be clothed in the form of a gift [1063]. Similarly the few smrti passages that include lands and houses among indivisible properties are to be explained as having in view the fragmentation of a field into small uneconomic plots or holdings or the division of a single small house among numerous co-sharers. It is impossible to believe that the texts meant that houses could never be partitioned among co-heirs. All that we can reasonably infer is that as a general rule such partitions were looked upon with disfavour by society. One may concede that this sentiment continued long after even Gautama and Āpastamba and even in the 20th century a Hindu son suing his father for partition incurs great opprobrium.

Apart from the inference to be drawn from some of the Vedic passages quoted above, it follows that partition did take place, though probably rarely, during the father's lifetime and even against his will, as indicated by Gautama's dictum. It is now to be seen what the smrtis and the medieval writers say about the time of partition. One time was when the father divided the property among his sons during his lifetime as evidenced by the Tai. S. III. 1 9. 4, Āp Dh. S. II. 6. 14. 1, Gaut. 28 2, Baud Dh.S. II. 2.8, Yāj II. 114, Nār. dāyabhāga 4. Another time was after the death of the father (Gaut 28. 1, Manu IX. 104, Yāj II 117, Nār. dāyabhāga 2). The Dāyabhāga [1064] admits only these two times for partition viz. on the cessation of the father's

1063. हिरण्योदकदानेनेति स्थावरे विक्रयो नास्ति कुर्यादाधिमद्वारया इति स्थावरस्य विक्रयमतिषेधात् 'भूमिं यः प्रतिगृह्णाति यश्च भूमिं प्रयच्छति । उभौ तौ पुण्यकर्माणौ नियतं स्वर्गगामिनौ' इति दानमहांसादर्शनाच्च । विक्रयेऽपि कर्तव्ये सहिरण्यमुदकं दत्त्वा दानरूपेण स्थावरविक्रयं कुर्यादित्यर्थ । मिता. on या II 114 The दायतत्त्व quotes this view of the मिताक्षरा and remarks 'वस्तुतस्तु स्थावरविक्रयनिषेधोऽविभक्तस्थावरविषय. ।' Vide n. 882 above.

1064. तदेवं पितृस्वत्वापगम एक कालोऽपरश्चानपगत एव पितु. स्वाम्ये पितरिच्छयेति कालद्वयम् । दायभाग I 38, तस्मात्पतितत्वनिसृहत्वोपरमैः स्वत्वापगम इत्येकः कालोऽपरश्च सति स्वत्वे तादिच्छान इति कालद्वयमेव युक्तम् ॥ दायभाग I. 44.

ownership (by death or renunciation of the world as an ascetic or because he has lost all desires) and during the father's lifetime at his own desire. The V. P. (pp. 429 and 434, 435) strongly criticizes the Dāyabhāga as to these two. Some writers like Jimūtavāhana went so far as to hold that even though the father be dead there *should* be no partition among the sons during their mother's life[1065]. The Mit (following Gaut. 28. 1–2) indicates three principal times for partition,[1066] viz (1) at the father's desire during his lifetime, (2) when the father has lost all desire for worldly goods, desists from sexual intercourse and the mother is past the age of child-bearing, partition may take place at the desire of the sons even against the wish of the father (Gaut. 28. 2, Nār. dāyabhāga 3, Br S B E. 33 p 369 verse 1); (3) after the death of the father. The Mit relying on Śankha's[1067] text adds that even though the mother may not be past child-bearing, yet the sons can partition at

1065 पित्रोरिति द्विवचननिर्देशात्सोदरभ्रातृणा पितृधनविभागोपि मातृरभाव एव कार्य· । दायभाग II. 5, p 27 श्रीकृष्ण was constrained to explain कार्य· as प्रशस्त· thereby showing that this was only recommendatory V P (p 436) strongly criticizes this view of the Dāyabhāga pointing out that Manu IX. 104 mentions the father and mother separately and indicates that partition of mother's wealth takes place after her death Vide दायभाग III 9, p 60 also 'अत एकस्मिन्नपि जीवति विभागो न धर्म्य किन्तु उभयोरभावे ।'. The दायतत्त्व also (p 170) says मातरि जीवन्त्या सोदराणा विभागो न धर्म्य· । यथा शङ्खलिखितौ रिक्थमूल हि कुटुम्बमस्वतन्त्राः पितृमन्तो मातृरप्येवमवस्थितायाः ।

1066 निवृत्ते रजसि मातुर्जीवति चेच्छति । गौ 28. 2 (this refers to two times); मातुर्निवृत्ते रजसि प्रत्तासु भगिनीषु च । निवृत्ते वापि रमणे पितर्युपरतस्पृहे ॥ नारद (दायभाग 3). This verse is variously read and explained by the commentators V R. (p 462) notes that Prakāśa read either निरपेक्षे च रमणे or निरस्ते चापि रमणे The Dāyabhāga (I 32–33 p 18) reads विनष्टे वाप्यशरणे and explains विनष्टे पतिते अशरणे गृहस्थाश्रमरहिते The व्य म (p 433) reads निवृत्ते चापि रमणात् and हलायुध also read it so (V R p 462) The दायभाग (I 47, p 24) says दृत्तासु भगिनीषु चेति न कालार्थं किं तु तासामवश्य दानार्थम्

1067 यथाह शङ्ख. अकामे पितरि रिक्थविभागो वृद्धे विपरीतचेतसि रोगिणि च । मिता. on या.II 114, मदनरत्न; पितर्यशक्ते व्यवहाराऽज्येष्ठ· प्रतिकुर्यादनन्तरो वा कार्यज्ञस्तदभुमतो न त्वकामे पितरि रिक्थविभागो वृद्धे विपरीतचेतसि दीर्घरोगिणि वा ज्येष्ठ एव पितृवदर्थान् पालयेदितरेषा रिक्थमूल हि कुटुम्बमस्वतन्त्रा. पितृमन्तो मातृरप्येवमवस्थिताया । दायभाग I 42, p. 23 (q as शङ्खलिखितौ and adds अतो न त्वकामे पितरि इत्येतदेव कार्याक्षमे पितरि रिक्थविभाग इति भ्रान्तलिखितम् It will thus be seen that the two schools read the passage of Śankha-Likhita differently. The व्य. मयूख (p 90) omits the words काम दीने &c. The मदनरत्न has the words काम दीने चिन्तयेत् The V. R (p 460) has the same passage of हारीत (as in the Dāyabhāga) with slight variations, viz. जीवति पितरि पुत्राणामर्थादानविसर्गविभागाक्षेपेष्वस्वातन्त्र्य काम दीने प्रोषिते आर्ते गते वा ज्येष्ठोर्थांश्चिन्तयेत् । हारीत q. by दायभाग I. 42 p 23.

their desire, even against the father's will if the father pursues an immoral or irreligious mode of life or is afflicted with a chronic disease or is very old. Nār. (dāyabhāga 16) is similar. It should not be supposed that the Mit. holds that there are only three times for partition; according to it there are other times also (as in the text of Śankha quoted by it). This is made clear by the V. P. p 434. The Dāyabhāga reads the text of Śankha-Likhita differently and takes it to mean that as long as the father is alive there can be no partition against his will even if he be very old or suffering from a chronic disease or has not all his wits about him, and that in such a contingency the eldest son or with his consent the next younger brother who is capable may manage the family affairs. The Dāyabhāga quotes a similar passage of Hārita (which is also quoted by the Madanaratna, the Vyavahāramayūkha and other digests). On account of the remarks of the Mit. some works like the Madanapārijāta (pp. 645 ff) speak of four times for partition, viz. during the father's lifetime at his choice (Yāj. II. 114), even against his will when the mother is past child-bearing and the father is free from all sexual desires and does not care for wealth (Nār. dāyabhāga 3), when the father is old or follows the path of *adharma* or suffers from an incurable disease then even against his will (relying on Śankha as quoted in the Mit.), and after the father's death. The V. Nir. (p. 408) is almost of the same view.

The Mitāksarā is quite clear on the point that the son has an absolute right of partition of ancestral property during his father's lifetime even against the father's wish. The discussion in the Mitāksarā may be briefly set out here In Yāj. II. 120 (latter half) it is stated that in the case of grandsons the partition is according to (or through) the fathers i. e it is *per stirpes* and not *per capita*. The text of Yāj (*anekapitṛkāṇām*[1068] *tu pitṛto bhāgakalpanā*) is explained by the Mitāksarā in this way that although sons and grandsons have rights of ownership by birth in the grandfather's property, yet when each of several sons dies leaving a differing number of sons (one leaves two, another three and so on) or when some sons are alive and others die leaving their own sons, then partition takes place *per stirpes* i e. the grandsons born of a particular deceased son

1068 It may be noted that the Bālambhāttī (p 150) and V. P. (p. 449) support the reading प्रमीतपितृकाणां तु instead of अनेकपितृकाणा तु in या. II. 120.

get among themselves the share which their deceased father would have got if living i. e. grandsons appear to get partition of property through the son (their father) and not directly by themselves On this a doubt arises as follows:—If the father of several sons is separated from his brothers as to the grandfather's property or if the father has no brother and is joint with his father (i. e. the grandfather of the grandson) the grandson cannot demand a share in the grandfather's wealth (since Yāj II. 120 has been explained as meaning that when the father is dead then the assignment of shares among grandsons is according to the share of the father) Another doubt is — even if a partition can be had by the grandsons in these cases it will be only if the father so desires To this the Mit replies emphatically[1069] that in the grandfather's property the ownership of father and son is wellknown in the world and therefore *partition* (in the above two cases of doubt) does take place. The Mit. further on expressly says that even when the mother is not past child-bearing and the father still cares for wealth and worldly affairs, partition of grandfather's wealth does take place at the desire of the son even if the father is unwilling. The Mit. makes it clear that the rule of division *per stirpes* is a special rule laid down by the texts (*vācanikī vyavasthā*) for a special case and that in other cases the primary rule of ownership by birth applies. From Manu IX. 209 the Mitāksarā further draws the inference that even against the father's wish a son can demand partition of property acquired by the grandfather. This is the modern *Hindu Law* in the Mitāksarā school generally recognised by the Courts in British India. In *Apaji Narhar*[1070] *v. Ramchandra* a majority of the Full Bench of the

1069. नष्टानामपि पुत्रा पित्र्यानेवांशाँल्लभन्त इति वाचनिकी व्यवस्था। अधुना विभक्ते पितर्यविद्यमानभ्रातृके वा पौत्रस्य पतामहे द्रव्ये विभागो नास्ति अधियमाणे पितरि पितृतो भागकल्पनेत्युक्तत्वात्। भवतु वा स्वार्जितवत् पितुरिच्छयैवेत्याशङ्क्याह । भूर्णा पिता० (याज्ञ II 122) ... तत्र पितुः पुत्रस्य च स्वाम्य लोकप्रसिद्धमिति कृत्वा विभागोऽस्ति। तस्माच्च पितुरिच्छयैव विभागो नापि पितुर्भागद्वयम्। तथा च सरजस्कायां मातरि सस्पृहे च पितरि विभागमनिच्छत्यपि पुत्रेच्छया पैतामहद्रव्यविभागो भवति । मिता. The बालम्भट्टी (pp. 151-152, of Gharpure's edition) very clearly explains this passage. The व्य. म (p 460) also says अत्र च पुत्रेच्छया यो जीवद्विभागो यश्चाजीवद्विभागः स एकेच्छयापि भवत्यविशेषात्। . अथ च पुत्राणा विभाग पुत्रपौत्रप्रपौत्रपर्यन्त समो नान्योन्यचित्तः प्रत्यासत्तिक्रमेणाधिकारक्रम । पुत्रादीनां त्रयाणामेव पार्वणे पिण्डदानाधिकारात्। vide स्मृतिच II. p 279 for a similar passage

1070. Vide 16 Bom 29, where Telang J., who was great as a Sanskrit scholar as well as a judge, differed from three learned judges On pp. 43-51 Telang J. gives a very lucid explanation of the words of the Mit.

Bombay High Court held that a son cannot in the lifetime of his father sue his father and uncles for a partition of the family property and for possession of his share therein, when the father does not assent to such a suit, although the son has a right by birth in ancestral property. The other High Courts have dissented from this view of the majority of the Bombay Full Bench and have followed the dissenting judgment of Telang J.[1071].

When the son's right of ownership by birth in ancestral property came to be recognised by such smrtis as that of Yāj., it followed as a logical consequence that any person who acquires a right by birth can demand partition and separate possession of his share at any time It has been already seen that even before Gautama sons separated from their father against his will, but this was condemned by the sages and obloquy and infamy attached to such conduct. Some of the smrtis recognised the son's right to partition even in the father's lifetime under great restrictions More than fifteen centuries passed (from Gautama to the Mitāksarā) before the son's right to separate from his father during the latter's lifetime and against his desire was clearly, ungrudgingly and emphatically recognized The Viramitrodaya also clearly recognizes this right of the son. But even among writers that generally follow the Mit. there were some that could not bring themselves to admit this right of the son. For example, the Madanapārijāta (p. 662) asserts that merely at the will of the son there can be no partition. Under the Dāyabhāga, these questions cannot arise, as the son has no right by birth in ancestral property.

This evolution of the son's right to demand partition even during the father's lifetime received a fillip from certain religious sentiments entertained in ancient times. Gaut. (28 4) remarks that if, instead of remaining united, brothers separate there is increase of spiritual merit (*vibhāge tu dharmavrddhih*). Manu IX. 111 states "they (the brothers) may stay united or may stay separate if they desire an increase of *dharma*; by living separate *dharma* increases; therefore separation is meritorious".[1072]

1071. Vide *Jagul Kishore* v *Shib Sahai* 5 All 430 (F B.), *Rameshwar* v *Lachmi* 31 Cal 111, *Subba* v *Ganas*, 18 Mad. 179, *Digambar* v. *Dhanraj* 1 Patna 361.

1072. मनु IX. 111 is quoted as प्रजापतिः by व्यव. नि. p 408. The मदनरत्न regards मनु and प्रजापति as different 'पृथग्दैवयज्ञकर्मकरणाद्भेदबुद्धिमपेक्षमाणा विभजेयुरित्याहतुर्मनुप्रजापती एवं सह वसेयुर्वा etc).

This shows that there was an option either to remain joint after the father's death or to become separate. Śankha-Likhita say that brothers may stay together since being united they will prosper (materially).[1073] Br. provides that in the case of members of a joint family that live together and have a common kitchen the worship of gods, Manes and brāhmanas is single for all, while when they become separate such worship will be separately carried on in each house.[1074] Nār. (dāyabhāga 37) lays down that when brothers are undivided the performance of religious acts is single for all of them but when there is a partition, the religious acts are separately performed by each Dharma means here mainly such religious acts as the performance[1075] of the five great daily sacrifices (*pañca mahāyajñas*). When the family is joint, worship of gods, Vaiśvadeva, honouring of family guests are only single for the whole family and all participate in the spiritual benefits derived from such acts, but when the members become separate, each performs these religious acts separately. Manu III. 67 lays down that each householder has to perform with the *grhya* fire kindled at the time of marriage all grhya rites such as morning and evening offerings, the five great sacrifices and the daily cooking of food. The Sangraha seems to have held that *dharma* refers to the performance of *agnihotra*, but the Sm. C. II. p. 259 and V. P. (437-438) do not accept this and hold that even when joint any coparcener can perform all śrauta and smārta rites like agnihotra with the help of the undivided joint estate and so *dharma* means only the worship of gods and Manes and the honouring of guests. Vyāsa[1076] also has a verse similar to Nār. and Br.

Partition was generally made when all the coparceners were major,[1077] but from Kaut (III. 5), Baud Dh. S. (II. 2 42) and Kāt. (844–45) it appears that the minority of a coparcener did not operate as a bar to partition. Kaut. (III. 5) says 'partition takes place when the persons separating have attained majority; but (the separating coparceners) should keep in the custody of the mother's relatives of those coparceners who are minors or of the elders of the village the share of the minors after all debts of the family are paid off, till the minor coparceners attain majority. The same rule applies to a member (of a joint family) that has gone abroad'. Baud. employs almost the same words. Kāt. provides "partition is ordained among coparceners who have attained (years of) understanding of worldly affairs and in the case of males they attain this understanding at the 16th year. The property (share in joint family estate) of those who have not attained years of discretion, being made free from expenses (debts etc.), should be kept (by the other major coparceners) with the relatives or friends of the minor members. The same should be done to the share of those who have gone abroad." This shows that partition could take place even when some members of the family were minors and even a single member could demand at his will a partition of his share as expressly stated by the Dāyabhāga (III. 16–17), the V P. and other works[1078]. There is a controversy among commentators whether minority terminated at the beginning or end of the 16th year. Nār. IV. 35 states[1079] that a person is a minor (*bāla*) till the 16th year. From a verse (attributed to Angiras by Mit. on Yāj III. 243 and quoted without name by Haradatta on Gaut. II. 6) it appears that one was to be regarded as a *bāla* till

---

1077. प्राप्तव्यवहाराणां विभागः। अप्राप्तव्यवहाराणां देयविशुद्धिं मातृबन्धुषु ग्रामवृद्धेषु वा स्थापयेदुरात्यवहारप्रापणात् मोचितस्य वा। अर्थशास्त्र III 5, तेषामप्राप्तव्यवहाराणामक्षान् गश्च विधीयते। पुंसां च षोडशे वर्षे जायते व्यवहारिता॥ अप्राप्तव्यवहाराणां च धनं व्ययविवर्जितम्। न्यसेयुर्बन्धुमित्रेषु मोचितानां तथैव च॥ कात्या 844–845 q by अपरार्क p 722, दायभाग (III 17 p. 72) and व्य. प्र. p 460 (last two have verse 845 only) The विवादचन्द्र (p. 63) quotes the verse समाप्त॰ for the proposition that there is to be no partition with a minor 'बालेन सम न विभागः समाप्त॰ इति वचनात्'

1078 अत्र च पुत्रेच्छया यो जीवद्विभागो यश्चाजीवद्विभागः स एकेच्छयापि भवत्यविशेषात्। अत एव विभाग प्रक्रम्य यत्कात्यायनेनोक्तं—अप्राप्त॰, इति तदपि सङ्गतम्। अन्यथा तदनुमतिमन्तरेण विभागाभावे तद्धनस्य बन्धुमित्रेषु न्यासविधानमनुपपन्नं स्यात्। व्य प्र p 460.

1079. बाल आ षोडशाद्वर्षात्पौगण्ड इति शब्द्यते। नारद (ऋणादान 35)

the beginning of the 16th year.[1080] A verse of Kāt appears to hold that minority ends at the beginning of the 16th year; many commentators also hold this view, but several such as Haradatta (on Gaut X. 48), V. R p. 599, V. P p. 263 expressly state that minority ends at the end of the 16th year.[1081] It may be stated that according to Gaut X. 48-49, Manu VIII. 27, Vas. 16. 8, Visnu Dh. S. III. 65 the king was to guard the property of minors, women and helpless people In modern times under the Indian Majority Act (Act IX of 1875) the age of majority is 18 (or 21 in certain cases only) except in matters of marriage, dower, divorce and adoption. In these last matters the ancient Hindu Law will apply to Hindus[1081a]. Similarly a partition could be made even though the wife of a coparcener was pregnant It was therefore that Vas. 17. 41 advised postponing partition till the delivery of the pregnant wives of coparceners, or Yāj. II. 122 and Manu IX. 216 provide for a son born after partition between father and sons

The next question is what property is liable to be partitioned. A few preliminary remarks on property must be made here Property is generally divided by most smrtis into two kinds, *sthāvara* (immovable, such as lands and houses) and *jangama* (movable) For example, Br. (S. B E. vol. 33 p 323 verse 17) and Kāt (516) speak of both kinds of property as subjects of pledges or mortgages. There is another classification in Yāj, II. 121 and a few other smrtis viz. property is of three kinds.

1082. दत्त्वा भूमिं निबन्ध वा कृत्वा लेख्यं तु कारयेत् । आगामिभद्रनृपतिपरिज्ञानाय पार्थिव. ॥ याज्ञ. I. 318. The व्य मयूख p 27 states that it occurs in बृह. also. In कात्या (882) we have उदक चैव दासश्च निबन्धो यः क्रमागत· (q by अपरार्क p. 725, वि. र. p 504) 'निबन्धो वाणिज्यादिकारिभि. प्रतिवर्ष प्रतिमास वा किञ्चिद्धनमस्मै ब्राह्मणायास्यै देवतायै वा देयमित्यादि प्रभुसमयलभ्योऽर्थः । स्मृतिच्च II p 55, निबन्धः आकरादौ राजादिदत्तं नियतलभ्यम् । व्य मयूख p 28 and दीपकालिका (reading नियतद्रव्यम्); दायतत्त्व p 166 states that this was the explanation given by कल्पतरु. निबन्धो राज्ञाऽकस्यैकस्मिन् पर्णभरकक्रमुकभरकादावियन्ति पर्णादीनि देयानीति शासनरूपतया यद् वृत्तित्वेन दीयते तदुच्यते । व्य प्र p 445

The word "nibandha" means a periodic payment or allowance in cash or kind permanently granted by a king, a corporation or a village or a caste to a person, a family, a *math* or a temple. The Mit (on Yā) I 318 and II 121) explains it as a delivery or payment of so many leaves (of betel or the like) on each bundle of leaves or so many rupees on each load of merchandise or so many betelnuts on each load of betelnuts; the Sm C. explains it as the wealth to be obtained under the order or direction of a king or other authority that dealers in commodities should pay every year or month a certain amount to a certain brāhmana or shrine, the V. Mayūkha (p 28) explains "what is granted by a king or the like, to be obtained at fixed times from mines and the like" and on p 131 paraphrases it as "vrtti". Nibandha is rendered as corrody by Colebrooke in his Digest, but as observed by the Privy Council in *Pattehsangji v. Desai Kalianrayji* L. R 1 I A. 34 at p 51 it is not a very happy rendering In *Ghelabhai v. Hargovan* 36 Bom 94 (at p. 101) the explanation of *nibandha* by the V. Mayūkha is construed as conveying that it is not the king alone who can make a grant of a nibandha and it is held that the office of a hereditary priest (*yajamāna-vrtti*) is a nibandha and ranks as immovable property. Bombay Regulation V of 1827, section 1, clause 1 includes hereditary offices among immovable property Vide *Collector of Thana v Krishnanath* 5 Bom 322 at pp 331-32 (for a discussion of what is included in *nibandha*), *Collector of Thana v Hari* 6 Bom 546 (F. B.) at pp 555-559, *Lakshmandas v Manohar* 10 Bom 149, *Jatindra Mohan v. Ghanashyama* 50 Cal 266 at p 271 (for various definitions of *nibandha* and for the view that an annuity in favour of the settlor's daughter for her life and then to her son charged on and payable out of the settlor's estate was a nibandha). With Vijñānesvara's examples of nibandha one may compare an inscription of *śake* 1088 (1167 A D.) from the Ron Taluka of Dharwar District in E. I. vol. 20 p. 109 at p. 121 ('the income granted by the dealers in betel leaves, a hundred leaves for one cart load, a hundred for a bullock load, fifty for a man's load')

may be divided into two classes, (1) joint family property, (2) separate property. Joint family property is either ancestral property or property jointly acquired[1083] with or without the aid of ancestral property or property acquired separately but thrown into the common stock (Manu IX. 204) The Mit on Yāj I 120 states 'among unseparated brothers, if the common stock be improved or augmented by one of them through agriculture, trade or similar means, an equal distribution nevertheless takes place and a double share is not allotted to the acquirer.' This contains the doctrine of merger of estate by blending. Vide *Shibuprasad v Prayag Kumari* L. R 59 I. A. 331 = 34 Bom. L. R. 1567. Ancestral property (*apratibandha dāya*) is all property inherited by a male from his father, paternal grandfather or paternal great-grandfather, in which according to the Mit. School, the sons, grandsons and great-grandsons[1084] of the person who inherits it acquire an interest *by birth*. Separate property also includes what is called self-acquired property (*svārjita*), which will be discussed a little later on If a person obtains a share of ancestral property on partition, it has been held that it is his separate property if he has no son, grandson or great-grandson, but if there be any of these then it is ancestral property in his hands so far as he and any of his male descendants are concerned. Under the Dāyabhāga, as the son does not acquire ownership by birth in ancestral property, there is hardly any distinction between ancestral property and separate property so far as the father's powers of alienation are concerned A few of the outstanding features of the Dāyabhāga system have already been set out above and some may be discussed later

---

1083 सामान्यार्थसमुत्थाने विभागस्तु समः स्मृत । या. II 120, समवेतैस्तु यत्प्राप्त सर्वं तत्र समांशिनः । तत्सुता विषमसमाः पितृभागहराः स्मृताः ॥ बृह. q by अपरार्क p 727, व्यव. नि p 424, वि. र p 481, भ्रातॄणामविभक्तानां यद्यत्थान भवेत्सह । न पुत्रभाग विषम पिता दद्यात्कथंचन ॥ मनु IX 215 (= अनुशासनपर्व 105 13).

1084. The Mit. speaks only of the son's and grandson's right by birth in ancestral property and does not expressly mention the great-grandson. But other writers like the author of the Viramitrodaya quoted above in note 1069 mention the great-grandson as having a right by birth and this has been accepted by the courts The words 'ancestral property" have a *technical* sense viz it is *paitāmaha* i e. paternal grandfather's or great-grandfather's property. Vide *Muhammad Husain v Kishwa Nandan* 64 I A 250 where this is made clear In a recent case from Patna, 23 Patna 599 (F B), it has been held that, where a grandfather makes a gift of his self-acquired property to his son (the father), the son or sons of the latter can treat it as ancestral property and take an interest in it by birth unless the gift makes it clear that it was made exclusively for the donee's benefit only.

A person while he is a member of a joint Hindu family under the Mit and has an interest in joint family property may have separate property of his own acquired in various ways. The different sources of ownership have been already mentioned above (pp. 317 and 548) The different kinds of separate property are mainly these: (1) property taken as obstructed heritage, that is, property inherited from any person other than the father, father's father or father's father's father (such as a brother, uncle etc.)[1085]; (2) a gift of a small portion of ancestral movable property made through affection by the father to his issue (smrti quoted by Mit.)[1086], (3) gift or bequest of separate property made by the father[1087] to his sons; (4) gifts and bequests made by other relations and friends and gifts at the time of marriage; (5) ancestral property lost to the family and recovered from a stranger by a member of a joint family with his own efforts without assistance from joint family property; (6) separate earnings and gains of learning or science (*vidyādhana*). A few remarks will be made on some of these in the sequel.

It is a remarkable fact that the smrti texts on separate property do not expressly mention gifts received from strangers by a member of a joint family as the separate property of that particular member The only gifts mentioned are those from friends, or those received at the time of marriage (called *audvāhika* in Yāj. II. 118 and Manu IX 206) or at a *madhuparka* in

---

1085 A decision of the P C. from Madras held that property inherited by two brothers living as members of a joint family from their maternal grandfather became joint property in their hands with rights of survivorship Vide *Venkayyamma v. Venkataramanayamma* L. R 29 I A 156 See 27 Mad 300 (F B) and 29 All 667 for the difficulties caused by L. R 29 I A. 156 But it may be taken that even in Madras such property inherited from the maternal grandfather will now be held to be the separate property of the two brothers Vide *Muhammad Husain Khan v Kishva Nandan Sahai* L R 64 I A 250 which explains away (on pp 264–265) the case of L. R. 29 I. A 156

1086 शौर्यभार्याधने क्षेत्रे पञ्च विद्याधन भवेत् । श्रीण्येतान्यविभाज्यानि प्रसादो पत्र्र पैतृकः ॥ q by मिता. in intro. to या. II. 114; व्यव. नि p 443, वि र. p. 501 ascribe it to Nārada (it is नारद, दायभाग 6).

1087. In Bombay, Allahabad and Oudh such gifts by the father of his separate property are held to be separate property of the son or sons Vide *Jugmohandas v. Sir Mangaldas* 10 Bom 528, 579 But in Calcutta they are held to be ancestral (*Hazari Mall v. Abannath* 17 C W. N. 280) and in Madras it is a question of intention (*Nagalingam v. Ramchandra* 24 Mad. 429.)

honour of a learned man, a priest etc. It is probable that gifts from strangers to a member of the joint family that did not fall within the several classes of separate property mentioned above belonged to the whole family The concept of the separate property of a member of a joint family was of slow growth. Originally all property however acquired by any member might have been held to belong to the whole family. This is indicated to some extent by Manu VIII. 416, which was (as shown above on pp. 555–556) however interpreted by Śabara, Medhātithi, the Dāyabhāga and others in subsequent times, as meaning that the acquirer (son or wife) had no independent power of disposal though he or she was owner of what was earned by him or her It is noticeable that so late a writer as Haradatta[1088] relies on this verse of Manu and remarks that while the father is alive whatever is earned by a member, whether learned or not, belongs to the father (on Gaut 28 29) The Dāyabhāga[1089] (II. 66–72) quotes a text of Kāt. (851) "the father gets two shares or half of the wealth acquired by the son" and explains it in two ways. If the son acquires wealth with the help of ancestral funds, the father takes half of it, the acquirer gets two shares and the other sons one share each. if the son acquires wealth without using ancestral funds, the father and acquirer take two shares each and the others take nothing Another meaning is that if the father is learned he takes half, but if he is not so, he takes only two shares. The V P. (pp 444–45) severely criticizes the Dāyabhāga for these remarks The first inroad on the conception that the earnings of all in the family belonged to the head of the family was made in the times of the sūtras by the recognition of *udyādhana* as separate property. Manu[1090] IX. 208 (= Viṣnu Dh. S. 18. 42) states that what one (member of a joint family, a brother, etc.) may acquire by his own labour without using (or without detriment to) paternal estate he shall

1090. अनुशासन 105. 12 closely resembles मनु IX 208 It is 'अनुपघ्नन् पितुर्दायं जङ्घनश्रमफलोच्चय. । स्वयमीहितलब्धं तु नाकामो दातुमर्हति॥'

not share with others if he does not desire to do so, because that acquisition was made by his own activity. Manu IX. 206 mentions besides *vidyādhana*, gifts from friends, gifts at the time of marriage and at *madhuparka* as the separate property of a person Yāj. (II. 118–119) prescribes: 'whatever is acquired by a person himself without detriment to or expenditure of paternal wealth, gifts from friends, gifts at marriage, these are not liable to be divided among a man's coparceners; similarly he who recovers ancestral property lost to the family (and not recovered by the father and others) would not have to share it at a partition with his coparceners nor his gains of learning'. The construction to be put on these words was a bone of contention even before Viśvarūpa. The Mit. understands that the words 'whatever is acquired without detriment to the paternal wealth' are to be understood as qualifying each of the following four kinds of property.[1091] The result is that if a gift is acquired by a member from a grateful person who was placed under obligation by spending family wealth, if property was acquired by gift from a father-in-law who was paid from the family property some wealth for securing the bride for that member (as in an *āsura* marriage) or if the property lost to the family was recovered with the help of paternal estate or if a man learnt at the expense of the family and made gains from that learning, then these kinds of properties were liable to be partitioned among all members. The result of taking the first half of Yāj II 118 as a qualification of the subsequent four kinds of property (as done by the Mit) is that if a man receives a gift from a stranger even without detriment to the paternal estate the gift was liable to be divided among all members. The reason of the Mit is that, if the first half of Yāj II. 118 is not a qualifying clause of the four kinds of property, then the following four kinds need not be expressly mentioned at all. If whatever is acquired by a member himself without

---

1091. अत्र च पितृद्रव्याविरोधेन यत्किञ्चित्स्वयमर्जितमिति सर्वशेष: । . . तथा पितृद्रव्याविरोधेनेत्यस्य सर्वशेषत्वादेव पितृद्रव्याविरोधेन प्रतिग्रहलब्धमपि विभजनीयम् । मिता on या. II. 118–119. The word शेष is used here in the technical sense of Jaimini III 1 2 (śesah parārthatvāt) on which Sabara says 'यस्तु अत्यन्तं परार्थस्तं स्वयं शेष इति क्रमः' विश्वरूप is opposed to this 'पितृद्रव्योपघातेनापि मैत्राद्यविभाज्यमेव, आरम्भसामर्थ्यात् । अन्ये तु मैत्रादिकमेव पितृधनानुपघातार्जितमविभाज्यमिच्छन्ति.' On या. II 118 the दायभाग remarks मैत्रादिग्रहणं मदर्शनार्थम् and again (VI. 1. 39 p 115) तस्मात्साधारणधनोपघातार्जितं धनं विभजेदिति विधि. । शौर्यादिपदं च वाक्येषु मदर्शनार्थम् ।

detriment to paternal or joint estate is by itself separate property then the following four will only be particular illustrations of the proposition contained in the first half of Yaj II 118 It would be opposed to the usage of *śiṣṭas* to say that gifts from friends or gifts at the time of marriage or gains of learning acquired at the expense of the family estate become the separate property of a person and, as to *vidyādhana* acquired from learning at the expense of the family, opposed to the express text of Nār. (dāyabhāga 10) " when one brother maintains the family of another brother who is engaged in studying the śāstras, he shall receive a share of the wealth gained by that study, though he (the supporting brother) be ignorant himself ". Further, if the first half of Yāj II. 118 were taken as a separate and independent clause by itself then it would follow that what is acquired by *pratigraha* (as a gift to a learned brāhmana) without detriment to the paternal estate would be indivisible but the usage of the *śiṣṭas* is the opposite of this That there was such a usage about *pratigraha* is admitted by the Dāyabhāga (VI. 1 54 p 121) It must be stated however that this view of the Mit. about the first half of Yāj II 118 is not shared by several writers and works such as the Dāyabhāga VI. 1. 8 p. 106, Dīpakalikā, Viśvarūpa, V. R p 501, Aparārka p. 723.

As regards family property lost to the family by the adverse acts of a stranger but recovered by a member with his own efforts without using ancestral estate, certain provisions deserve notice Manu IX. 209 (= Visnu Dh. S. 18 43), Br. (S. B. E 33 p 371 verse 12) and Kāt [1092] (866) lay down the special rule that if the father recovers property lost to the family, whether movable or immovable, with his own effort without using joint family funds, he may retain the whole of it as his self-acquisition The rule of Yāj. II 119 applies only where the property lost and recovered by one member (not the father) with his own effort and without assistance from joint estate is movable (which then becomes wholly his self-acquisition), but if the property so recovered by one member (who is

not the father) is land, then the recoverer gets one fourth of it as his reward (according to Śankha)[1093] and the remainder is divided equally among all members of the family including the recoverer. These rules have been followed in modern times by the British Indian Courts[1094].

Vidyādhana (gains of learning) has undergone the greatest changes of fortune since the earliest times to modern days. It was probably the first kind of self-acquisition recognised in very early times Though the Āp. Dh S and Baud. Dh S. say nothing about it, yet Gaut [1094a] (28. 28–29) lays down that all members (of a joint family), if not learned, should divide equally whatever is earned by them (by agriculture etc.) but what a learned man himself acquires by his learning he may not share with his unlearned brothers if he so desires. Haradatta says that this applies only between brothers that are joint. Vasistha 17. 51 appears[1095] to give two shares to the acquirer of wealth at a partition among brothers and his rule probably represents a very early stage when the acquirer could not retain the whole of his self-acquisition but got only two shares

1095. येन चैवां स्वयमुपार्जित स्यात्स व्यंशमेव हरेत्। वसिष्ठ 17 51 (which reads स्वयमुत्पादित स्यात्) मिता on या. II 119 and स्मृतिच. II. p 275 read as above, दायभाग II. 41 p 42 as समुत्पादितं, परा. मा III 560 'यदुपार्जितं'.

in it and the rest of the joint family members took one share each in it. Manu IX. 206, Yāj. II. 119, Nār (dāyabhāga 11), Kāt [1096] (868) and Vyāsa say generally that *vidyādhana* is not liable to be divided at a partition. Among writers of smrtis Kāt contains the most elaborate treatment of vidyādhana and of self-acquisitions in general. It will be set out in the sequel. But some of the smrtis point out that even vidyādhana is partible, if learning was acquired at the expense of the family funds (as in Nār dāyabhāga 10 referred to above) or when the learning was acquired in the family house itself from the father or an elder brother (Kāt [1097] 874). The Dāyabhāga (VI 1 42–49) discusses at great length the views of Śrīkara on Yāj II. 118 and Manu IX. 208 and dissents from them and states his conclusion as follows· A man since his birth depends upon his family for food and maintenance and so if the words "without expending ancestral estate" were literally and widely interpreted, hardly any man can say that no paternal wealth was expended on him and so earnings of whatever kind would have to be deemed to be partible and there would be no propriety or purpose in the words of Manu IX. 208. Therefore it must be understood as done by Viśvarūpa that the detriment meant is not the expenditure of food in maintaining a person in the house from infancy, but that when a member acquires estate by his learning or in any other way without giving or spending paternal wealth for acquiring that, then only it becomes his self-acquisition [1098].

1096. उपन्यस्ते तु यल्लब्धं विद्यया पणपूर्वकम् । विद्याधनं तु तद्विद्याद् विभागे न विभज्यते ॥ कात्या. 868 q. by अपरार्क p 724, कुल्लूक on मनु IX 206, दायभाग VI 2 1 p 122 , विद्याप्राप्त शौर्यधनं यच्च सौदायिक भवेत् । विभागकाले तत्तस्य नान्वेष्टव्यं स्वरिक्थिभि. । व्यास q by अपरार्क p 725 स्मृतिच II. p 274.

Kāt. (867–873) defines[1099] and illustrates vidyādhana as follows :—

That wealth is said to be the gains of *vidyā* which is acquired by means of learning received from another while subsisting on food furnished by others, when a matter (a doubt or difficult point) has been placed (before an assembly of learned men) with a wager, whatever is gained by (the display of) one's learning is known as *vidyādhana*, which is not divided at a partition. What is acquired from a pupil (i. e. by following the profession of teaching), by performing the work of a priest at a sacrifice, by propounding a question, by solving a doubtful point, by exhibiting one's knowledge, by disputation with a rival, what is gained by deep learning–all these are declared to be *vidyādhana*, which is not divided at a partition. The same is the rule in the case of artisans and as to whatever is obtained (as a reward) over and above the proper price of an article (which surplus becomes the self-acquisition of the member selling it) After vanquishing a rival in a wager whatever is obtained by (superior) knowledge should be known as vidyādhana and it is not liable to be partitioned. This is the view of Brhaspati. What is earned by an assertion of one's learning, what is obtained from a pupil (i e. by teaching) and what is acquired on the analogy of priests officiating at a sacrifice–all these are known as vidyādhana, according to Bhrgu. What is obtained by the superiority of one's learning and from a sacrificer and from a pupil–all this is declared to be vidyādhana; acquisitions other than these are common (i. e. jointly owned) with others.

Kāt distinguishes between *śaurydhana* (reward given by the king or a master when pleased with a soldier or servant

1099. परभक्तोपयोगेन विद्या मात्सान्यतस्तु या। तया प्राप्तं धनं यत्तु विद्याप्तं तदुच्यते॥ उपन्यस्ते तु यल्लब्धं विद्यया पणपूर्वकम्। विद्याधन तु तद्विद्याद्विभागे न विभज्यते॥ शिष्यादाऋत्विज्यतः प्रश्नात्सन्दिग्धप्रश्ननिर्णयात्। स्वज्ञानशंसनाद् वादाल्लब्ध प्राध्ययनाच्च यत्। विद्याधनं तु तत्प्राहुर्विभागे न विभज्यते। शिल्पिष्वपि हि धर्मोर्थं मूल्याद्यच्चाधिकं भवेत्॥ परं निरस्य यल्लब्धं विद्यया पणपूर्वकम्। विद्याधन तु तद्विद्याच्च विभाज्यं बृहस्पतिः॥ विद्यामतिज्ञया लब्धं शिष्यादाप्तं च यद्भवेत्। ऋत्विङ्न्यायेन यल्लब्धमेतद्विद्याधनं भृगुः॥ विद्याबलकृत चैव याज्यतः शिष्यतस्तथा। एतद्विद्याधन प्राहुः सामान्य यदतोन्यथा॥ कात्या 867–873 q by अपरार्क p 724, वि र. p 502, व्य. म p 125, व्यव. नि. (pp. 444–45) quotes all except पर निरस्य, the first is quoted by the मिता on या II 118–119, all except the first and last are quoted in the दायभाग VI. 2 1-14 which remarks at the end तदयमर्थो यया कयाचिद् विद्यया यल्लब्धमर्जकस्यैव तत्, नेतरेषाम्। प्रदर्शनार्थं तु कात्यायनेन विस्तरेणोक्तं श्रीकरादिभ्रमनिरासार्थम्। अत. स्वज्ञानख्यापनादिना यत् प्रतिग्रहलब्धं तदपि विद्याधनमेव विद्यैव विदुषे प्रतिग्रहदानात्।

who putting his life in danger did an act of valour) and *dhanajāhṛta* (what is recovered in a battle after putting one's life in danger of death and after putting to flight the army of the adversary) Nār (dāyabhāga 6) and Br (S B E vol. 33 p. 381 verse 78) appear to put both under *saṃyadhana*. Kāt divides the *bhāryādhana* of Nār and Br into two, viz *kanyāgata* (what is obtained at the time of marriage with a maiden of the same caste) and *sanāhika* (wealth that comes with one's wife) So it is the same as the *sanāhika* (of Manu IX 206) and the *audvāhika* (of Yāj II 118). Vyāsa mentions[1100] a limitation that even wealth acquired by valour does not become the exclusive property of the acquirer if he used a horse and weapons belonging to the joint family; in such a case the acquirer gets two shares and the other members of the family one share each

In modern times vidyādhana has been a fruitful source of litigation The first verse of Kāt quoted above has been cited in several cases such as *Durga Dat v. Ganesh Dat* 32 All. 305 at p 312, where it is said that Kātyāyana's definition of vidyādhana is not exhaustive, but only illustrative (the same is the view of the Dāyabhāga)

The leading cases that discuss the texts and lay down propositions are noted below[1101].

Two propositions were well established by the cases, viz (1) that money earned by a member of a joint Hindu family by the practice of a profession requiring special training was joint family property, provided such training was imparted at the expense of joint family property; (2) that gains made by personal labour and without the use or help of joint family funds by a member of a joint Hindu family, who was maintained out of joint family funds and received no more than an elementary or ordinary education suitable to his position as a member of that particular family were the self-acquisitions of such member. But all doubts and disputes are now set at rest by the Hindu

Gains of Learning Act (Act XXX of 1930) which provides that, notwithstanding any custom, rule or interpretation of Hindu Law, no gains of learning (i. e. education whether elementary, technical, scientific, special or general and training of every kind which enables a person to pursue any trade, industry or avocation), whether made *before* or *after* the commencement of the Act, shall be held not to be the exclusive and separate property of the acquirer merely by reason of his learning having been wholly or in part imparted to him by any member, living or deceased, of his family or with the aid of the funds of the joint family or of any member thereof or by reason of himself or his family having, while he was acquiring his learning, been supported wholly or in part by the joint funds of the family or the funds of any member thereof. This Act is thus retrospective

All property of a joint family other than the separate property of individual members is liable to partition, i. e as stated by Kāt., property of the grandfather, of the father and whatever is acquired by each member (by the use of joint funds[1102] is so liable). Separate property is said to be impartible (*avibhājya*) on account of the source from which or the manner in which it is acquired. But there are certain kinds of property which from their very nature are not allowed to be partitioned and have to be enjoyed in common or by turns.

The oldest provision on this point is contained in Gautama[1103] (28. 44–45) that water (well), (property set apart or destined for) pious uses or sacrifices and food prepared (for festivals etc.) shall not be divided nor women connected with individual

1102 पैतामहं च पित्र्यं च यत्किञ्चित्स्वयमर्जितम् । दायादानां विभागे तु सर्वमेतद् विभज्यते ॥ कात्या. q by दायभाग VI 1 1 p 105, स्मृतिच. II p 273, व्यव नि p 446, परा मा. III. p 556 'स्वयमर्जितं पित्राद्यविभक्तद्रव्योपयोगेन' स्मृतिच.

1103. उदकयोगक्षेमकृताश्चेष्वविभाग । स्त्रीषु च संयुक्तासु । गौ 28 44–45. This applies, acc to Haradatta, to the concubines not only of the father but also to those of any member of the joint family. Vide *Nagubai v. Monghibai* 53 I. A 153, 159–160 where Gaut. and Mit are quoted.

members of the family (as concubines). Śankha-Likhita[1104] forbid the partition of a building,[1104a] water vessels, ornaments and clothes that are daily worn by the respective members Similarly Uśanas says[1105] "there is no partition among agnates even up to the thousandth generation of what is acquired by officiating as priests, of a field, of vehicles, prepared food, water and women". Prajāpati (quoted by Sm. C. II p 277) asserts that there is no partition of houses, fields and temples (*yājya*), gifts made through favour by the father or mother. The prohibition against dividing a house or a field is explained in three ways. The Mit. on Yāj. II. 119 explains that it has in view a brāhmana's son from a wife of the ksatriya or vaiśya class, when the brāhmana acquired it as a religious gift made to him for his learning, since Br. (S. B. E. 33 p. 374 verse 30) states "land bestowed[1106] as a gift on a brāhmana should not be given to the son (of the brāhmana) from a wife of the ksatriya caste; even if the father gives it to the son of the ksatriya wife, after the father's death, the son of the wife of the brāhmana class

Three explanations are given in the व्य म p 130 ' वास्तुक्षेत्रयोरविभाज्यत्वमाहुस्तद्धर्मवास्तुगोमत्रारक्षेत्रादिपरम् । प्रतिग्रहोपात्तयोस्तयोः क्षत्रियादिविभागप्रतिषेधपरं पूर्वोक्तनिषेधात् । अल्पमूल्ययोर्मूल्येन विभागो न स्वरूपत इत्येवंपरं वा '. पितरि जीवति यस्मिन्वास्तौ येन गृहेद्यानादिकं कृत तत्तस्याविभाज्य पितुरप्रतिषेधेनानुमतत्वात् । दायभाग p 128

1106. न प्रतिग्रहभूर्देया क्षत्रियादिसुताय वै । यद्यप्येषा पिता दद्यान्मृते विभासुतो हरेत् ॥ q. by मिता. on या. II 119 (without name), ascribed to बृह. by मेधा० on मनु. IX. 153. व्यव नि. p. 431, व्य. म. p 103.

may take it away". Another explanation is that the prohibition refers to a site or dwelling for religious purposes and to a field that is meant for grazing cows. The third explanation is that the prohibition implies that when the house or field is of small value it should not be partitioned by metes and bounds, but there should be partitioning of the price only. The Dāyabhāga gives yet another explanation (VI. 2. 30 p. 128) that if during the father's lifetime any of the sons builds a house or lays out a garden on a family site, then it should not be divided at a partition but assigned to him only.

The basic verse on things impartible from their very nature is Manu IX. 219[1107] (=Visnu Dh. S. 18. 44) which says "clothes, vehicles, ornaments, cooked food, water (well etc), women, *yogaksema* and ways—these are declared to be impartible". All commentators explain that clothes ordinarily worn by the several members are impartible, provided they are more or less equal in value but not costly ones nor new ones. The same remark applies to vehicles and ornaments. *Pracāra* means either "ways leading to the house, garden and the like" (Mit, Aparārka, and V. P.) and also 'ways and pasture lands for cows and the like' (Sm. C. II. p. 277, Kullūka). The Mit. (on Yāj II. 118–119) states a special rule from Br. that[1108] the clothes and ornaments worn by the father, the bed and the vehicle used by him should on his death be donated to the brāhmana invited at the father's śrāddha. As to ornaments, the Mit. following Manu IX. 200 says that those ornaments that are ordinarily worn by the respective members or their wives should not be divided, but those that are not so used everyday should be divided. A well is to be enjoyed by turns and not to

1107. वस्त्रं पत्रमलङ्कारं कृतान्नमुदकं स्त्रियः। योगक्षेमं प्रचारं च न विभाज्यं प्रचक्षते॥ मनु IX, 219, विष्णु reads न विभाज्य च पुस्तकम्. The express mention of books in Visnu Dh S is an indication of its posteriority to Manu Several meanings are assigned to पत्र, योगक्षेम and प्रचार by different writers All commentators of Manu except Nandana explain पत्र as vehicle (i. e a horse, cart &c.), while नन्दन reads पात्र (water vessel) and अपरार्क p. 725, वि. र. 504, मद. पा. p 685 explain पत्र as document evidencing a debt.

1108. पितृधृतवस्त्राणि तु पितुरूर्ध्वं विभजता श्राद्धभोक्त्रे दातव्यानि। यथाह बृहस्पति। वस्त्रालङ्कारशय्यादि पितुर्यद्वाहनादिकम्। गन्धमाल्यैः समभ्यर्च्य श्राद्धभोक्त्रे समर्पयेदिति। मिता. on या. II. 119.

be partitioned by valuing it.[1109] If there be a single female slave (not a concubine) she was to be made to work for the divided members by turns, but if there be several slaves they could be assigned to each or their price could be divided. The expression "*yogaksema*" has been variously explained from very ancient times. Laugāksi (quoted by the Mit.) states "those who know the truth say that 'yoga' means 'sacrifices' and ksema means *pūrta* (i. e. works of charity like wells). They both (i. e the money set apart for these or the merit derived from these) are impartible, as are also the bed and the (wooden) seat (used by the father or other member)." From this verse the Mit. concludes that *yogaksema* means sacrificial acts performed with śrauta or smārta fire and charitable gifts such as constructing a tank or park etc. For ista and pūrta vide H of Dh. vol. II pp. 147, 843–844 and pp. 914–915 n. 2112 for the Mit. on yogaksema. The words "yoga" and "ksema" occur even in the Ṛgveda VII. 86. 8, X. 89 10, X. 166. 5 and in Tai Br III. 9. 19. 3 and Ait. Br. 37. 2. Even though joint family funds are spent for these still they are impartible. The Mit. further states that according to some *yogaksema* means[1110] "royal ministers and purohita" who bring about the welfare of people, while others hold that the word means "umbrella, *chowrie*, weapons, shoes, and the like". From Gaut IX. 63 and XI. 16 it appears that *yogakṣema* came to mean even before Gautama's time "comfortable life" or "easy and happy way of maintenance" (particularly for a learned brāhmana). The V. R. p 504 tells[1111] us that,

---

1109 Vide *Shantaram v. Waman* 47 Bom 389 for the proposition that, both according to the Mit. and the Vyavahāra-mayūkha, a piece of land reserved as a common passage at the time of partition cannot be subsequently divided and *Nathubhai v Bai Hansgavri* 36 Bom 379 and *Govind v Trimbak* 36 Bom 275 for the propositions that rights of way and rights to wells and water belonging to a joint family are, if numerically unequal, indivisible, that there is a presumption that they continue joint and undivided even after partition, unless it is proved that at the partition a right of way or to water was exclusively allotted to a single member (at p. 277 and p 282 the texts about water are quoted)

1110. योगक्षेमशब्देन योगक्षेमकारिणो राजमन्त्रिपुरोहितादय उच्यन्त इति केचित्। छत्रचामरशस्त्रोपानत्प्रभृतय इत्यन्ये। मिता on या II 119 Vide *Parthasarathy v. Tiruvengada* 30 Mad 340, 343–44 for yogaksema in the Mit

1111 योगक्षेमं पितृक्रमेण राजकुलादाद्युपजीव्यमिति प्रकाशः। हलायुधस्तु योगो योगहेतुर्नौकादि क्षेमः क्षेमहेतुर्दुर्गादीत्याह। वि.र p 504 The meaning given by Prakāśa appears to be the one intended in some medieval grants called *yogaksema* grants, for an instance of which *vide Vaman v. the Collector of Thana* 6 Bom. H C. R. (A. C. J.) p. 191 at p. 196.

according to Prakāśa, yogaksema means "maintenance or annuity descending from the father (to the son) at a royal palace" and that Halāyudha explained yoga as meaning a ship or the like and ksema as fort. The Sm. C. II p. 277 after quoting Laugāksi gives an alternative explanation that yogaksema means the wealth gained by a learned brāhmana resorting to a rich man for his maintenance.[1112]

Kaut. (III. 5) states[1113] the view of the ācāryas that those who are poor may divide even their water vessels and Kaut. adds that this dictum is fallacious or contradictory. Kāt. (882–884) brings together several things that are impartible[1114] "money that is entered in a document and is set apart for a religious purpose, water, women, a *subandha* (periodic gain) that descends hereditarily, clothes worn (on the body every day), ornaments, whatever else that is not fit to be divided—these should be so employed by co-sharers that they may be enjoyed (in common by all) at the proper time. A pasture for cattle, ways, clothes worn on the body (every day), money lent and what is set apart for religious purposes—these should not be divided This is the view of Brhaspati."

Brhaspati (S B. E. 33 p. 382 verses 79–84) has a good deal to say about things impartible. He finds fault with Manu IX. 219 for his somewhat wide proposition that clothes, ornaments

1112. अथवा योगक्षेमार्थमुपात्तेश्वरसकाशाद् यो रिक्थानां लाभः स एवात्र योगक्षेमशब्देनोच्यते। स्मृतिच्च II. p. 277. गौ. IX 63 and विष्णुधर्मसूत्र 63, 1 prescribe योगक्षेमार्थमीश्वरपार्श्वगच्छेत्.

1113. उदपात्राण्यपि निष्किञ्चना विभजेरन्नित्याचार्याः। छलमेतदिति कौटिल्यः। अर्थशास्त्र III 5 For the meaning of छल, vide न्यायसूत्र I 2. 51 कौटिल्य means that if a man has at least water pots he is not निष्किञ्चन so far, as, if he is really निष्किञ्चन, he can have no water pots even.

1114 धन पत्रनिविष्टं तु धर्मार्थं च निरूपितम्। उदकं चैव दाराश्च निबन्धो यः क्रमागतः॥ धृत वस्त्रमलङ्कारो नाद्यरूपं तु यद्भवेत्। यथा कालोपयोग्यानि तथा योज्यानि बन्धुभिः॥ गोमचारश्च रथ्या च वस्त्र यच्चाङ्गयोजितम्। प्रयोज्यं न विभज्येत धर्मार्थं च बृहस्पतिः॥ कात्या 882–884 q by अपरार्क pp 725–726, वि र pp 504–505. स्मृतिच्च II. p 277 refers to the first and last, दायभाग VI. 2 27 p. 127 has the verse गोमचारश्च &c and reads प्रयोज्य and शिल्पार्थं for धर्मार्थम् दाराश्च is probably a misreading of दासश्च. The first half may be split up in two 'bond debts and what is set apart for a religious purpose' (देवाराधनाय घण्टादि—says वि. र p 505); 'प्रयोज्य प्रयुक्तमूषणमिति हलायुधः, प्रयोज्यं प्रयोगार्हं पुस्तकादि तच्च विभज्येत मूर्खादिभिरिति पारिजातः' वि. र. p. 505.

and the like are impartible. He says[1115] "those who declared that clothes and the like are impartible have not given proper thought. In the case of the rich, their wealth may consist of (valuable) clothes and ornaments. If these (clothes and ornaments) be kept joint (i. e undivided) they cannot yield subsistence nor can they be assigned to one alone (out of many co-sharers) They should therefore be distributed with skill, otherwise they will become useless Clothes and ornaments may be divided by selling them (i. e. by dividing the proceeds of sale), debt consigned to writing is divided after recovering it (i. e. the bond itself is not divided), cooked food (may be divided) by exchanging it for uncooked food. The waters of wells that have flights of steps and of other wells is to be enjoyed by drawing it out according to the needs (of the co-sharers); in the same way a field or a water course is to be enjoyed according to respective shares; a single female slave is to be made to work in the houses of the co-sharers according to their shares; if there be several female slaves, they are to be allotted in equal shares (to the sharers); this very rule applies to male slaves also; the income derived from a yogaksema grant is to be equally divided and pasture lands (or ways) are to be used by the co-sharers according to their respective shares."

The next points to be dealt with are what persons are entitled to partition and what is the mode of partition But before doing so some preliminary remarks must be made on the expressions coparcenary and 'joint family', which occur at every step in modern works on Hindu Law. In the smrtis and commentaries we come across the words *kutumba* (Nār., dattāpradānika 6 or Yāj II 175), or *avibhakta-kutumba* (Yāj. II. 45). A joint Hindu family consists of all males lineally descended from a common male ancestor and includes their wives and unmarried daughters. A daughter on marriage ceases to be a member of her father's

---

1115 वस्त्राद्योऽविभाज्या यैरुक्तं तैर्न विचारितम् । धनं भवेत् समृद्धानां वस्त्राद्यूहार-संश्रितम् ॥ मध्यस्थितमनाजीव्य दातुं नैकस्य शक्यते । मुख्यो विभजनीय तदन्यथानर्थकं भवेत् ॥ विक्रीय वस्त्राभरणमृणमुद्ग्राह्य लेखितम् । कृताकृ चाकृताक्षेन परिवार्य विभज्यते । उद्धृत्य कूपवाप्यम्भस्त्वनुसारेण गृह्यते । तथा भागानुसारेण क्षेत्रदेयं विभज्यते ॥ एकां स्त्रीं कार्येत्कर्म यथाक्षेन गृहे गृहे । बहूनां समांशतो देया दासानामप्ययं विधिः ॥ योगक्षेमवर्तं लाभः समत्वेन विभज्यते । प्रचारश्च यथांशेन कर्तव्यो रिक्थिभिः सदा ॥ बृह q by अपरार्क p 726, स्मृतिच. II. 277, वि र pp 505-506 Br. generally holds Manu in the highest veneration as he says वेदार्थोपनिबन्धृत्वात् प्राधान्यं हि मनोरयम् । मन्वर्थ-विपरीता या स्मृति सा न प्रशस्यते ॥ (q by अपरार्क p 628 and कुल्लूक on मनु I 1), but here he criticizes Manu IX. 219.

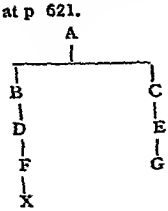
family and becomes a member of her husband's family. Under the Mitāksarā a Hindu coparcenary strictly so called is a much narrower group than the joint family. It comprises only those males who take by birth an interest in the joint or coparcenary property i. e. a person himself and his sons, son's sons and son's grandsons form for the time being a coparcenary. The diagram and the note below[1116] will explain the limits of a coparcenary.

A coparcenary is purely a creation of law; it cannot be created by act of parties, except by adoption. In order to be able to claim a partition, it does not matter how remote from the common ancestor a person may be, provided he is not more than four degrees removed from the last male owner who has himself taken an interest by birth.[1117]

Some characteristic features of the Mitāksarā coparcenary may be briefly stated. There is in the first place *unity of ownership* i. e. the whole body of coparceners is the owner and no individual member can say, while the family is undivided, that he has a definite share, as his interest is always fluctuating, being liable to be enlarged by deaths and diminished by births in the family. There is also unity of possession and enjoyment i. e all are entitled to possession and enjoyment of the family

---

1116 Vide *Commissioner of Income Tax v Laxminarayan* 59 Bom. 618 at p 621.



Here all are to be assumed to be males A and his sons B and C may form a coparcenary. So also, if B and C have each a son, then A, B, C, D, E, will form a coparcenary. If D and E have respectively F and G as sons, all persons from A to G will form a coparcenary But here the limit is reached If X is born during the lifetime of A, he being the son of the great-grandson of A takes no interest by birth and is outside the coparcenary during A's lifetime But if X is born after the death of A, then he forms a coparcenary with B, D, F. Snppose that B dies before A. That will not however introduce X into the coparcenary of which A is the head, as X being the son of A's great-grandson F takes no interest by birth in ancestral property held by A. Suppose that B C D E F and G all die in the lifetime of A, then A becomes the sole surviving coparcener and X is not a coparcener along with A, because he is 5th in descent (counting both A and X) from A. Snppose A the only surviving coparcener dies Then X will take A's property as an heir and not by survivorship as a coparcener.

1117. Vide *Moro v. Ganesh* 10 Bom. H C. R p 444, pp 461-468 where Mr Justice Nanabhai Haridas very lucidly explains by several diagrams the limits of a coparcenary and what persons are entitled to demand a partition and from whom.

property and the possession of one is ordinarily possession on behalf of all Further, while the family is joint and some coparceners have many children and others have few or none or some are absent, they cannot complain at the time of partition about some coparceners having exhausted the whole income and cannot ask for an account of past income and expenditure Kāt. (888) expressly states so [1118] Moreover, the joint family property devolves by survivorship i e on the death of a coparcener his interest lapses and goes to the other coparceners, subject to this that if the deceased has left a son, grandson, or great-grandson, the latter represents and occupies the place of the deceased coparcener when a partition takes place A female cannot be a coparcener (even if she be the wife or the mother) Another characteristic is that each coparcener has a right to enforce a partition. The affairs of the family are managed by the father and if he be very old or dead, by the senior brother or member or by any other member with the consent of the senior member (Nār., dāyabhāga 5 and Śankha quoted above in note 1067). The manager is called *kartā* in modern times though the smṛtis and digests employ words like *kutumbin* (Yāj II. 45), *gṛhin*, *gṛhapati*, *prabhu* (Kāt 543) and not *kartā*. He has special powers of disposition (by mortgage, sale or gift) of family property in a season of distress (for debts), for the purposes and benefit of the family (maintenance, education and marriages of members and other dependents) and particularly for religious purposes (śrāddhas and the like).[1119] The father has the same powers as manager and certain other special powers, which no other coparcener has The father can separate his sons from himself and also among themselves if he so desires, even if they do not desire to separate[1120] (Yāj. II. 114); while an ordinary

1118 बन्धुनापहृतं द्रव्यं बलात्त्वैव प्रदापयेत् । बन्धूनामविभक्तानां भोग नैव प्रदापयेत् ॥ कात्या. q by दायभाग XIII 7 p 222, वि र, p. 526 The दायभाग explains 'सामादिना दाप्यो न बलात् अविभक्तेन तु यदधिक भुक्त तदृसौ न दाप्य ' and वि. र, 'तद्विभागकाले नासावधिकोपभोक्ता च भोग दापयितव्य इत्यर्थः' The दायतत्त्व p. 183 says 'अत्रापहृतपद भाक्तम्'.

1119. एकोपि स्थावरे कुर्याद्दानाधमनविक्रयम् । आपत्काले कुटुम्बार्थे धर्मार्थे च विशेषतः ॥ इति । अस्यार्थः । अप्राप्तव्यवहारेषु पुत्रेषु पौत्रेषु वानुज्ञादानादावसमर्थेषु भ्रातृषु वा तथाविधेष्वविभक्तेष्वपि सकलकुटुम्बव्यापिन्यामापदि तत्पोषणे वावश्यकर्तव्येषु च पितृभ्रात्रादिषु स्थावरस्य दानाधमनविक्रयमेकोपि समर्थः कुर्यात् । इति । मिता on या II. 114. The verse एकोपि is ascribed to व्यास by व्यव नि p 411.

1120. This power of the father has been recognized even in modern times. Vide *Kandasami v Doraisami* 2 Mad 317, 321–322, *Nirman v Fateh* 52 All 178. But it has been held that the grandfather has no power to separate his grandsons *inter se*. Vide A I R. (1945) Mad. 327.

coparcener can only separate himself from the family. The father can make within reasonable limits gifts of ancestral movable property without[1121] the consent of his sons for performing indispensable acts of duty and for purposes laid down by the texts, such as gifts through affection (to wife, daughter, son or the like), the support of the family and relief from distress. The father can make a gift of even immovable property within[1122] reasonable limits for pious purposes only (such as to a family idol or to an idol in a temple at the time of obsequies). The father can sell or mortgage the joint family property to pay off an antecedent debt contracted by him for his own personal benefit, provided it is not illegal or immoral (vide p. 448 above). No coparcener (except the father or manager as stated above) can dispose of his undivided interest by gift, sale or mortgage according to the strict theory of the Mitāksarā except with the consent of the other coparceners. This right to object to alienations made without consent or made without legal necessity is another characteristic of the joint Hindu family under the Mitāksarā. Br. (S. B. E. 33 p. 384 verse 93) says[1123] "whether kinsmen are joint or separate they are alike as regards immovable property, since a single one from among them has no power in any case to make a gift, sale or mortgage of it." But in modern times the courts in Bombay, Madras and the Central Provinces have loosened this strict rule by holding that

1121 मणिमुक्ताप्रवालानां सर्वस्यैव पिता प्रभुः। स्थावरस्य तु सर्वस्य न पिता न पितामहः॥ पितृप्रसादाद् भुज्यन्ते वस्त्राण्याभरणानि च। स्थावरं तु न भुञ्जीत प्रसादे सति वैतृके॥ both quoted by the मिता. on या. II 114, परा. मा III.484, (the first) by दायभाग II. 22 p 33 (attributing it to या.) and the first is ascribed to व्यास by व्यव नि. p 411 and to विष्णु by विवादताण्डव folio 100. Vide note 1033 above

1122 Vide *Ramalinga v. Sivachidambara* 42 Mad 440, *Gangi Reddi v. Tammi Reddi* 54 I A. 136, 140, *Sri Thakurji v. Nanda* 43 All 560 for the validity of gifts of small immovable property by the *kartā* for religious purposes. But in *Jinnappa v. Chimmava* 59 Bom 459 a gift of a small portion of joint family immovable property by the father to his daughter on the ground that she looked after him in his old age was set aside at the suit of his grandsons

1123. यत्तु बृहस्पतिवचन-अविभक्ता विभक्ता वा सपिण्डा स्थावरे समा। एको ह्यमीक्ष. सर्वत्र दानाधमनविक्रये-इति तदपि अविभक्तेषु द्रव्यस्य मध्यस्थत्वादेकस्यानीश्वरत्वात्सर्वाभ्यनुज्ञाद्वयं कार्या। विभक्तेषूत्तरकालं विभक्ताविभक्तसंशयच्छुदासेन व्यवहारसौकर्याय सर्वाभ्यनुज्ञा न पुनरेकस्यानीश्वरत्वेनातो विभक्तानुमतिव्यतिरेकेणापि व्यवहार. सिध्यत्येवेति व्याख्येयम्। मिता on या II. 114. The स्मृतिच. II p 309, the व्य म p 136 and some others read दायादाः for सपिण्डाः; दायभाग II 27 p 34 reads विभक्ता अविभक्ता वा सपिण्डाः and attributes it to व्यास; अपरार्क p 757 attributes विभक्ता वाविभक्ता वा to कात्या.

a coparcener may sell, mortgage or alienate for *value* his undivided interest in coparcenary property without the consent of the other coparceners[1124] and the courts have allowed the undivided interest of a coparcener in joint family property to be attached at the instance of a creditor for the individual debts of a coparcener. This is one of the most serious departures from ancient and medieval Hindu Law made by the Courts on the ground of equity. One more right of all members of the joint Hindu family is the right to be maintained from the property and income of the joint family Such matters as the remedies of the purchaser or mortgagee from an individual coparcener are here left out of consideration as appropriate only in a treatise on modern Hindu Law.

The conception of a coparcenary under the Dāyabhāga system is entirely different from that of the Mitāksarā. Under the Dāyabhāga, sons do not acquire any interest by birth in ancestral property, but the son's rights arise for the first time on the father's death and the sons take as heirs and not by survivorship There is hence no coparcenary in the sense of the Mitāksarā between a father and his sons The father has absolute power to dispose of all kinds of ancestral property by sale, mortgage, gift, will or otherwise in the same way ae he can dispose of his separate property. The son has no right to demand a partition during his father's lifetime. A coparcenary starts on the death of the father between the latter's sons or grandsons i. e. between brothers, uncles and nephews, or between cousins. If a coparcener dies without male issue, there is no right of survivorship in the other coparceners but the deceased member's widow or daughter may succeed to his share and thus even females may become members of a coparcenary under the Dāyabhāga. Each coparcener takes a defined share under the Dāyabhāga (not an indefinite one as under the Mitāksarā) Any coparcener under the Dāyabhāga can sell, mortgage, or dispose off by gift or will his share (Dāyabhāga II. 28-31) [1125]

1124. Numerous cases lay down this proposition , vide, for example, *Vasudeva v Venkatesh* 10 Bom. H C R p 139 which was approved of by the Full Bench in *Fakirappa v. Chanapa* 10 Bom H C R. p. 162, *Vitla Butten v. Yamenamma* 8 Mad. H C. R 6

1125. On विभक्ता ... एको द्वयोश्च etc. the दायभाग (II. 28-30 p 34-35) remarks 'व्यासवचनं तु स्वामित्वेन दुर्वृत्तपुत्रगोचरविक्रयदानादिना कुटुम्बविरोधाद्धर्म-भागिताज्ञापनार्थं निषेधरूपं न तु विक्रयाद्यनिष्पत्त्यर्थम् । एव च स्थावर द्विपद् ... विक्रय — इत्येवमादिकं तदप्येवमेव वर्णनीयम् । .. तेन दानविक्रयकर्तव्यतानिषेधात् तत्करणाद् विध्यति-क्रमो भवति न तु दानाद्यनिष्पत्तिः । वचनशतेनापि वस्तुनोऽन्यथाकरणाशक्तेः ।

Every coparcener is entitled to a share on partition. It has been already stated (on pp. 570–571) how in Bombay a son is not entitled to a partition if the father is *joint* with his own father, brothers or other coparceners and does not assent to the son's claim. There is a volume of case-law about a suit for partition brought on behalf of a minor, but it has to be passed over here, as there is hardly anything corresponding to this in the works on dharma-śāstra. The texts provide for the case of a son who was in the mother's womb at the time of partition but was born after it. If A and his sons B and C, who are members of a joint family, come to a partition and take one third each of the family property and six months later A's wife gives birth to a son D, then the partition has to be reopened and D will get $\frac{1}{4}$ ($\frac{1}{5}$ if the mother is given a share) of the family property that will remain after meeting all proper charges since the first partition and taking into account all income and accretions during the interval. The same rule applies to a partition among brothers, when the widow of a predeceased brother gives birth to a posthumous son conceived before the partition but born after it. Vide Yāj.[1126] II. 122 and Viṣṇu Dh. S. 17. 3. Vasiṣṭha (17. 40–41) therefore recommends that when it is known that the wives of some brothers (predeceased) are pregnant the other brothers should postpone partition till the delivery of those women. Where a son is born as well as conceived after partition between a father and his sons the rights of the afterborn son are declared by Gaut.[1127] 28. 27, Manu IX. 216, Yāj II. 122,[1128] Nār (dāyabhāga 44), Br. (S B. E 33 p. 372 verses 17 and 19) that he takes the share allotted to the father and also all the self-

1126. पितृविभक्ता विभागानन्तरोत्पन्नस्य भाग दद्युः । विष्णुधर्मसूत्र 17 3. दृश्याद्वा तद्विभाग. स्यादायव्ययविशोधितात् । या II. 122, on which the मिता. remarks 'एतच्च विभागसमयेऽप्रजस्य भ्रातुर्भार्यायामस्पष्टगर्भायां विभागादूर्ध्वमुत्पन्नस्यापि वेदितव्यम् । स्पष्टगर्भायां तु प्रसवं प्रतीक्ष्य विभागः कर्तव्य. । यथाह वसिष्ठः । अथ भ्रातृणा दायविभागः । याश्चानपत्या स्त्रियस्तासा पुत्रलाभात् । इति ।'

1127. विभक्तजः पितृपक्षेव । गौ 28. 27; भ्रातृभिः सह विभक्तेन पित्रा यत्स्वयमर्जितम् । विभक्तजस्य तत्सर्वमनीशा. पूर्वजाः स्मृताः ॥ बृहस्पति q. by मिता. on या II 122, हरदत्त on गौ 28 27, स्मृतिच्च II p 307, दायभाग VII, 6 p 131, व्य म p 104.

1128 There is great divergence among commentators about Yāj. II. 122 विभक्तेषु सुतो जात सवर्णायां विभागभाक् । दृश्याद्वा तद्विभागः स्यादायव्यय-विशोधितात् ॥.

acquisitions of the father made after the partition.[1129] The Mit understands that the first half (of Yāj. II. 122) refers to a partition during the father's lifetime and provides that if a son was conceived and born to the father after partition he took the share allotted to the father and all the self-acquisitions of the father made after partition (*tathā vibhāgottarakālam pitrā yat kiñcit arjitam tat sarvam vibhaktavyasyaiva*) and the Mit. relies on Manu IX. 216 and Br. for this. The Mit. takes the 2nd half of Yāj. II 122 as referring to a partition made after the father's death and states that, if a son was in the mother's womb when the brothers separated after the father's death and was born subsequently, the posthumous son would be entitled to reopen the partition and would get a share out of the property (not as it stood at the date of partition) that would be there after allowing for proper expenditure (e. g. payment of debts etc.) and accretions. The Mit. extends the same rule to a posthumous son born after partition to the widow of a brother who died before the partition and

---

1129. In *Nawal Singh v. Bhagwan Singh* 4 All. 427, where after the father separated from his three sons he married a second wife, had a son from her and died leaving certain property inherited by him from a third person, it was held, relying on Manu, the Mit , Br. and the Viramitrodaya, that the son born after partition was entitled to the whole of the property acquired by the father to the exclusion of the three sons that had separated from him In *Chengama v. Munisami* 20 Mad 75 (where a father partitioned his ancestral property half and half between his two sons, reserved no share for himself and subsequently another son was born to him) it was held that the subsequently born son was entitled to one-third by partition not only in the property as it stood at the date of partition, but also in the property acquired by the two sons by means of the produce of that property (relying on the words of Yāj. II 122 "*āyavyayaviśodhitāt*") The dates of the partition and of the birth of the son are not clear from the report. In *Ganpat v. Gopalrao* 23 Bom 636 (where in 1875 a father separated his son born of his first wife by giving him one third of the estate and gave two thirds to his two minor sons from the second wife and lived with them and another son was born to him in 1880, who sued in 1894 claiming one-fourth of all property) it was held that the one third given to the son by the first wife could not be affected and the plaintiff was only entitled to claim a share in the property given to the other two sons, and further that the texts of Viṣnu and Yājñavalkya are somewhat vague and are applicable only to the case of posthumous sons who have no provision made for them. Vide also *Shivajirao v. Vasantrao* 33 Bom 267 for further limitations on this rule in favour of the after-born son.

when the fact of the pregnancy was not known to the separating brothers. Viśvarūpa regards the whole verse as laying down one proposition, the first half declaring that if a son (who had been already conceived) were born to the father after partition with the sons, he would be entitled to the share taken by the father, while the 2nd half declares that if the father took no share then the son so born would be entitled to reopen the partition and take a share of the property remaining after taking into account accretions and expenses. The Dīpakalikā seems to be of the same opinion as Viśvarūpa, but it adds that Manu IX. 216 provides for the case where the son is both conceived and born after partition The Sm. C. (II. pp. 306–307) holds that when in the father's lifetime partition takes place the sons separating should give a share to the after-born son, but the father should retain his, while the whole of Yāj. II. 122 applies to the case where partition is made after the father's death and a posthumous son is born to the mother or to the widow of a brother dying before partition. In such a case the partition should be reopened and a share given out of the property as it stood at the first partition or out of the property as found to exist at the reopened partition after allowing for accretions and proper expenses (for payment of debts, for saṁskāras of brothers and sisters); vide V. P. p. 463 for explanation of 'dṛśyād' etc. The Vyavahāra-mayūkha (p. 105) follows the Sm. C. and V. R. (p. 539) in explaining the whole of Yāj II. 122 as referring to the case of a posthumous son conceived before partition made on the father's death but born after partition from the mother or step-mother of the separating brothers or from the wife of a brother dying before partition.

An adopted son, if adopted by a coparcener in a joint family or by a sole surviving coparcener, becomes under the Mitāksarā law a member of the coparcenary from the moment of his adoption and has the same rights to demand a partition as an *aurasa* son has. Under the Dāyabhāga even an aurasa son cannot claim partition during his father's life and so an adopted son would be in no better position. If after a person adopts he has an aurasa son, the adopted son's share becomes reduced according to most commentators, but this subject will be dealt with later on under adoption.

The smṛtis and some of the medieval and later digests ever enter into elaborate discussions about the rights of a son or sons born from wives of classes lower than that of the father. Vide

Gaut 28. 33–37, Baud. Dh. S. II. 2. 10, Kaut. III. 6, Vas 17. 48–50, Manu IX. 149–155, Yāj. II. 125, Visnu Dh. S. 18. 1–33, Nār. (dāyabhāga 14), Br. (S. B. E 33 p 374 verses 27–29), Śankha (quoted in V R. p. 531) It is not necessary to deal in detail with the varying provisions made in these works, as marriages with women of a lower class have not been in vogue for several centuries; but a few remarks will have to be made. Manu IX. 153 and Yāj. II. 125, Br. (S. B. E. 33 p. 374 v. 27) clearly state that if a brāhmana has sons from wives of the four classes, the whole property should be divided into ten parts which should be distributed as follows:—four for the son of the wife of the brāhmana caste, three for the son of the ksatriya caste wife, two for the son of the vaiśya caste wife and one for the son of the śūdra class wife Manu IX. 154 (almost the same as Anuśāsana 47 21) further provides that whether a brāhmana leaves sons or no sons born (of wives of the three twice-born classes) the heir shall give, according to the law, to the son of a sūdra class wife no more than a tenth part of his estate. V. P. p. 487 and the Mit (on Yāj. II. 133) after quoting Manu, make this quite clear. But as remarked by the Mit on Yāj II. 125 the son of a brāhmana from a wife of the ksatriya or other lower class was not to share in land obtained by the brāhmana by way of gift (vide Br. quoted in note 1106 above) though he could share land acquired by purchase or the like. A verse (attributed to Br. by Dāy IX 22 and V. R. p. 534 and to Devala by V. P. p. 466) denies altogether a share in land to a sūdra class wife's son of a brāhmana, while Manu IX. 155 (the son of a person of the three higher classes from a śūdra woman gets no share in the paternal wealth) is variously explained, the Mit saying that it applies only where the son has already got some property from his father while the Mayūkha and some others say that it applies to the son of a śūdra woman who is not married to the person of higher caste but is only a mistress Kaut III 6 and Br (quoted by V. R p. 534) provide that the *pāraśava* son gets $\frac{1}{3}$ of his father's estate and the nearest sapinda gets the remaining two thirds. Śankha-Likhita (quoted by Medhātithi on Manu IX. 155) have the same rule as in Manu IX. 155 It is remarkable that early medieval writers like Vijñānesvara (about 1100 A. D.) or even later ones like Mitramisra (first half of 17th century) in V. P. pp 464–466 enter with zest into elaborate explanations of Manu IX. 153 and Yāj. II. 125 and never expressly state that these [illegible] had ceased to be applicable in their days, though there

are a few other medieval works like the Sm. C. II. pp. 288-289 and the Madanaratna[1130] that either do not explain these verses at all or say that these verses are applicable to a different age. According to Manu (IX. 178, 160) the son of a brāhmana from a śūdra class wife is called śaudra or pārasava, while according to Yāj I. 91 he is called both nisāda and pārasava (vide H. of Dh. vol. II. pp 86-87 for nisāda and pārasava). But he is one of the secondary sons (*gauna-putra*) according to Manu (IX. 180), Vas. 17. 38 and others. Writers from Aparārka downwards quote certain[1131] verses from Śaunaka on matters forbidden in the Kali age (*kali-varjya*) one of which is the acceptance of sons other than aurasa and dattaka.[1132]

1130. असवर्णेषु पुत्रेषु गुणवत्त्वनिर्गुणत्वादिकृतो यो विशेषः स कन्यानामसवर्णानां विवाहश्च द्विजन्मभिः-इति आदिपुराणे कलिवर्ज्यप्रकरणे असवर्णापरिणयस्य निषेधात् सांप्रत मूर्धावसिक्तादीनां प्रचाराभावेन नेह प्रपञ्चितः। समयनिर्णयोद्द्योते कलिवर्ज्यप्रकरणेऽस्मा-भिरुद्दाहृतेन दत्तौरसेतरेषां तु पुत्रत्वेन परिग्रहः-इति वचनेन कलौ युगे दत्तौरसपुत्रिकापुत्र-व्यतिरिक्तानां क्षेत्रजादीनां गौणपुत्राणां निषेधात् सांप्रतं तेषां प्रचाराभावेन तद्विभागविषय-विशेषो नात्र निरूप्यते। मदनरत्न (folio 93a); अत एवास्माभिरसवर्णपुत्राणां दत्तके-तरेषां गौणपुत्राणां पुत्रिकापारतन्त्र्यतस्तस्य च भागविधयो न निबध्यन्ते। संप्रत्यननुष्ठीयमानत्वाद् वृथा च ग्रन्थविस्तारापत्तेः। स्मृतिच. 1132 In *Natha v. Chotalal* 55 Bom. 1 the son of a brāhmana from a śūdra wife was held entitled to a tenth share in the estate of his father and uncle and that the remaining nine-tenths would go to the nearest agnate, and Manu and Yāj are relied upon. But this would be opposed to the view of the Mayūkha that secondary sons are not allowed now and is also against the spirit of the warning given by the Privy Council to Judges of modern times over 75 years ago in *Collector of Madura v Mootoo Ramlinga* 12 Moo. I. A 397 at p 436 "the duty of an European Judge who is under an obligation to administer Hindu Law is not so much to inquire whether a disputed doctrine is fairly deducible from the earliest authorities, as to ascertain whether it has been received by the particular school which governs the district with which he has to deal and has there been sanctioned by usage For *under the Hindu system of law, clear proof of usage will outweigh the written text of the law*' This passage (omitting the word "European") is quoted by the P. C. in *Atmaram v. Bajirao* 62 I. A 139 where it is further held that in a conflict between smrti texts and commentators the opinion of the latter prevails in the provinces where their authority is recognized *Natha v. Chotalal* 55 Bom. 1 purports to follow *Bai Gulab v. Jivanlal* 46 Bom 871 In both cases the parties came from

(*Continued on the next page*)

An illegitimate son has in certain circumstances rights of partition in the property of his putative father. An illegitimate son may be a son by a concubine who is a *dāsī* (i e. who is in exclusive and continuous keeping) or he may be the son of a woman who is not a *dāsī*. The first is called *dāsīputra*[1133] and the second is hardly ever dealt with in dharmaśāstra works[1134]

(*Continued from the last page*)

Gujerat where the Vyavahāramayūkha is of paramount authority In both cases not a word is said about the proof of the usage of marriages between a brāhmana and a śūdra woman taking place in Gujerat but reliance is placed solely on the recognition of *anuloma* marriages by Manu and Yājñavalkya, the strong condemnation of pratiloma marriages by both and the inference drawn from the comment of Vijñāneśvara and the remarks of Nīlakantha that anuloma marriages are not prohibited With the most profound respect for the learned Judges who decided those two cases, it has to be said that they took up the position of legislators and did not merely interpret the Hindu Law in accordance with usage and ignored the text of the Mayūkha itself stating that all secondary sons (among which the son of a brāhmana from a śūdra caste wife is included by Manu) except aurasa son (who is defined by Yāj II. 128 himself and the Mit. as the son of a *wife of the same class*) and dattaka are forbidden in the present age The decision in *Bai Gulab v Jivanlal* was opposed to the considered view expressed by Chandavarkar J. in *Bai Kashi v Jamnadas*, 14 Bom. L R 547 at p 552 ' From this gloss of the Mitāksarā from which Nīlakantha expressed nowhere any dissent it is reasonable to infer that, according to the leading authorities on Hindu Law as recognised in this Presidency, a shudra wife is not permitted to a brahmin, a kshatriya or a vaishya " and to the decisions of some other High Courts in India (vide 28 All 458 for example) It should not be supposed that the present writer is entirely against such marriages What he is concerned to emphasize is that the Legislature should deal with these matters, that Judges should not assume the role of legislators and give rise to conflict of laws which are inevitable if the same kind of marriage is held valid by the Bombay High Court and invalid by the Allahabad or Madras High Court

1133 Dāsīputra occurs in the story of Kavasa Ailūsa in the Aitareya and Sānkhāyana Brāhmanas 'माध्यमा. सरस्वत्या सत्रमासत तद्धापि कवषो मत्रं निषसाद त हेमे उपेदुर्दास्या वै त्वं पुत्रोसि न वयं त्वया सह भक्षयिष्याम इति'। शां. ब्रा. XII 3, ऋषयो वै सरस्वत्या सत्रमासत ते कवषमैलूषं सोमादनयन्दास्याः पुत्रः कितवोऽब्राह्मणः कथं नो मध्येऽदीक्षिष्टेति । ऐ ब्रा. 8 1 Vide note 925 for śūdrāputra in the Tāndya Br 14. 6. 6

1134. Yāj II 290 appears to distinguish between a dāsī in general and one who is *avaruddhā* (in the exclusive and continuous keeping of a man) " अवरुद्धासु दासीषु भुजिष्यासु तथैव च । गम्यास्वपि पुमान्दाप्यः पञ्चाशत्पणिक दमम्' For the com. of the Mit vide n 1595 below

From ancient times it had been settled that the dāsīputra of a person belonging to the twice-born classes is not entitled to a share on partition or to inherit, but is entitled to maintenance only Gaut 28 37 provides[1135] that even the son of a brāhmana who is issueless from a śūdra woman (a concubine) should receive the means of maintenance provided he is obedient in the manner of a pupil Br. (S B. E. vol. 33 p. 374 verse 31) contains a similar rule for the maintenance of an illegitimate son born of a śūdra woman after the father's death. But as regards the son of a śūdra from a *dāsī* Manu IX. 179 provides that such an illegitimate son may take a share in the father's property if the father allows him to do so. The classical passage on the rights of the illegitimate son of a śūdra from a dāsī is Yāj II. 133–134 which verses are introduced by the V. Mayūkha[1136] with the words "Yāj declares a special rule as regards one begotten by a śūdra on a woman (of the same caste) not married to him" and which may be rendered thus "even a son begotten by a śūdra on a dāsī may partake of a share at the choice (of his father). But, when the father is dead, the brothers should make him the recipient of a half share". This passage and the comments of the Mit., the V. Mayūkha, the Dāyabhāga have been cited and explained in numerous cases The following propositions as deduced from the texts and the case-law may be set out here:—(1) the illegitimate son of a śūdra even under the Mit. does not acquire by birth any interest in the estate held by the father and so cannot enforce a partition in his father's lifetime, but the father may give him a share in his lifetime, which may even be equal to that of a legitimate son (4 Bom. 37, 44–45, 23 Mad 16); (2) on the father's death an illegitimate son of a deceased śūdra

1136 शूद्रेणापरिणीतायामुत्पन्ने विशेषमाह याज्ञवल्क्यः। जातोऽपि दास्यां शूद्रेण कामतोंऽशहरो भवेत् । सुते पितरि कुर्युस्त भ्रातरस्त्वर्धभागिकम् । अभ्रातृको हरेत्सर्वं दुहितृणां सुतादृते ॥ व्य मयूख pp 103–104, अत्र च शूद्रग्रहणाद् द्विजातिना दास्यामुत्पन्नः पितुरिच्छयाप्यंशं न लभते नाप्यर्धं दूरत एव कुत्सनम्। किन्त्वनुकूलश्चेज्जीवनमात्रं लभते। मिता.; विश्वरूप quotes a prose text of Brhaspati to the same effect 'यथाह बृहस्पतिः' कामतश्च शूद्रावरोधजस्य भ्रातुरंश समानमात्र मेते पितरि दद्युः शुश्रूषुश्चेत् । इति In *Rahi v Govind* 1 Bom 97 at p 113 and in other cases the word 'aparinītāyām' in the V Mayūkha has been wrongly translated as meaning 'an unmarried woman', when it really means 'a woman not married (to the śūdra)'.

becomes a coparcener along with the legitimate sons and the former is entitled to seek partition (4 Bom. 37 F. B.); (3) on a partition the illegitimate son takes only one half of what he would have taken[1137] if he were a legitimate son i. e. if there be one legitimate and one illegitimate son, the latter would take one-fourth and the former three-fourths, (4) if no partition takes place and the legitimate son or sons all die without partition, the illegitimate son would take the whole as the last survivor of the coparcenary (L. R 17. I. A. 128); (5) if there be no legitimate sons, grandsons, or great-grandsons of the śūdra father, the illegitimate son takes the whole estate ;[1138] (6) as the text of Yāj refers only to a son, an illegitimate daughter is not entitled to any inheritance or even to maintenance (32 Bom. 562); (7) if the śūdra father be joint with his collaterals such as brothers, uncles or nephews, the illegitimate

---

1137. The decisions establish that *dāsī* is not to be taken in the strict literal sense (a female slave), but means a woman kept as a concubine, the connection being continuous, exclusive and lawful. In order that the illegitimate son of a śūdra may take a share or inherit, it must be shown that the connection between the śūdra man and the woman was not incestuous or adulterous or though adulterous at the beginning had ceased to be so when the illegitimate son was born Vide *Rahi v Govind* 1 Bom. 97 at p 110, *Sadu v. Baiza* 4 Bom. 37 (F. B.) at p 44, *Vithabai v. Pandu* 28 Bom. L R 595, *Soundararajan v Arunachalam* 39 Mad. 136 (F. B.) pp. 152–159, *Tukaram v. Dinkar* 33 Bom. L. R 289 But even the son of an adulterous intercourse has been held entitled to maintenance (1 Mad 306, 34 Mad. 68, 47 Bom. L. R. 5 F. B.). The earlier cases in Calcutta (as in 1 Cal. 1, 19 Cal 91, 28 Cal. 194), held that dāsī meant only a female slave and as slavery was abolished in India, there could be no *dāsīputra* strictly so called. But in *Rajaninath v. Nitai* 48 Cal 643 (F. B) the former Calcutta decisions were overruled and the Bombay High Court's interpretation of dāsīputra has been accepted. The passage of the Dāyabhāga (IX. 29 p. 143) which was to be correctly interpreted in the Calcutta cases runs " शूद्रस्य पुनरपरिणीतादास्यादिशूद्रापुत्र· पितुरुक्तमत्या पुत्रान्तरतुल्यांशहर· । तदाह मनु· । दास्या वा० (मनु IX. 179) । अनुमतिमन्तरेण स्वर्धांशहर· । तदाह याज्ञवल्क्य· । जातोपि० (या. II 133–34) The Dāy. passage is quoted on pp 680 and 723 of 48 Cal. 643 (F B)

1138. अत्र बहुवचनात्सर्वे स्वस्वभागावृधं वृथ्वारिति न भ्रमितव्यम् । तथा सति बहुभ्रातृकस्य ततोप्यतिबहुधनत्वापत्तेरव्यवस्था स्यात् । किं त्वेकपुत्रस्य यावान्भागस्तदर्धभाग शूद्रापुत्रा लभन्ते । ... परिणीतशूद्रापुत्रतत्पुत्राद्यभावे तु दासीपुत्रोऽपि कृत्स्नं शूद्रस्य वित्तर्धनं लभत इत्यर्थाद् गम्यते । व्य म pp. 487–488 विश्वरूप on या II 138 (Trivedi edition) quotes the view of some expressed by बृहस्पति in a prose aphorism according to which the illegitimate son succeeds, when there is no legitimate son, grandson or great-grandson, to the whole estate with the king's permission. 'अनन्वयिन सर्वं राजा हरेत् तदनुज्ञया वावरोधज इत्येके'.

son cannot demand a partition of the joint family property though he is entitled to maintenance as a member of the family provided the father left no separate estate (L. R. 58 I. A. 402). It has been held that if a śūdra keeps a woman of the brāhmana caste as his exclusive mistress and has a son from her, he is not a dāsīputra (but acc. ancient works a cāndāla) and is not entitled to inherit the estate the śūdra father as an illegitimate son Vide *Ramchandra v. Hanamnaik* 37 Bom L. R. 920 followed in 18 Lucknow 585. Further rules about the inheritance of the illegitimate son when in competition with the widow, legitimate daughter or legitimate daughter's son will be dealt with later on (vide n. 1356 below).

An absent coparcener stood on the same footing as a minor (vide note 1077 above); in modern times he would be subject to the law of Limitation (Articles 127 and 144 of the Indian Limitation Act of 1908)

The wife cannot herself demand a partition, but if the husband himself separates his sons during his lifetime or if the sons claim a partition during the father's lifetime, the wife was entitled to a share equal to that of a son, according to Yāj II. 115. If there be several wives each gets a share equal to that of a son. There is a proviso that the wife or wives must not be in possession of *stridhana* property given by the husband or by the father-in-law and that if there is stridhana, then only as much more will be allotted to her as will make her share equal to that of a son (as stated in Yāj II. 148). The Mit. on Yāj. II. 52 states that at the husband's will the wife also gets a share of the family wealth but not by her own will[1139]. The Madanaratna explains that the meaning[1140] is simply this that the

father when separating from the sons should take for each of his wives a share equal to that of each son, but it is not meant that the husband is to carve out separate portions of the joint property and hand them over to his wives, since such a procedure would be opposed to the *dictum* "there is no partition between husband and wife". The V P (pp 441-42) after quoting this view of the Madanaratna refutes it by saying that Yāj is not here speaking of the partition between husband and wife but between the father and sons and that the husband assigns to the wife a share as he may give a gift of affection to his wife It deserves to be noted that the ancient commentator Viśvarūpa (on Yāj II 119 of Trı edition) anticipates modern legislation as he states that the widows of pre-deceased sons and grandsons also should be given the shares that would have been taken by their husbands if living along with his own wives by the father at the time of partition with his sons Recently by the Hindu Women's Rights to Property Act (Act XVIII of 1937 as amended by Act XI of 1938), it is provided that when after the Act comes into force a Hindu governed by the Dāyabhāga School dies intestate or where a Hindu governed by any other school dies living separate property, his widow will be entitled to the same share as that of a son and the widow of a pre-deceased son or grandson shall inherit in the same manner as a son or grandson and further where a Hindu governed by any school other than the Dāyabhāga dies having an interest in joint family property his widow will succeed to a Hindu widow's estate as regards the interest he himself had This last provision brings the law of the Mitāksarā into line with that of the Dāyabhāga and makes the widow of a deceased coparcener a member of the coparcenary and at one stroke does away with the fundamental doctrine of the Mit about

refers the sūtras जायापत्योर्न विभागो विद्यते पाणिग्रहणाद्धि सहत्व कर्मसु to गौतम. It further says that the wife's ownership in the husband's property is only technical and not real and that when the husband dies and his ownership in joint family estate lapses her technical ownership comes to an end 'पाणिग्रहणाद्धि ग्रहेषु चेति गौतमवचनात्पत्न्या अपि तद्भागेऽविभिक्तेपि स्वत्वसद्भाव तत्राश· किमिति तत्सत्त्वे कल्प्यत इति चेन्न । औपपत्तिकोऽस्ति न तु तात्त्विक । पत्न्या· पतिद्रव्ये स्वत्वं नीरक्षीरवदेकलोलीभावापन्न सहाधिकारिकमोपयोगि न तु भातृणामिव पररपरम् ।' व्य म p 510 , समांशदानपक्षे प्रमीतभर्तृका· पुत्रपौत्रपत्न्य· स्वपत्न्यश्च भर्तृभागार्हा· कार्या· । विश्वरूप on या II 119

male coparceners alone taking by survivorship joint family property.[1141]

The mother (or step-mother) also, when the sons come to a partition after the father's death, is entitled to a share equal to that of a son in the coparcenary property.[1141a] But she cannot compel a partition so long as the sons choose to remain joint But her share is liable to be reduced on account of her possession of stridhana as in the case of the wife Vide Yāj II. 123, Visnu Dh. S. 18. 34 and Nār. (dāyabhāga, 12) The Mit. (on Yāj II 135) combats the view of some predecessors that the mother does not take a share but only as much wealth as would be necessary for her maintenance, by relying on the words "equal share" occurring in Yāj, Visnu, and Nār which would be meaningless on that view It also refutes another view that the mother takes an equal share with the sons when the ancestral property is small, while she takes only as much as would be necessary for her maintenance when the property is large, by stating that this view is liable to the fault of *vdhvau ūpya* according to the conclusion established in the Pūrvamīmāmsā, that is, here the same sentence will be interpreted as laying down two different propositions in different sets of circumstances, which is not a legitimate or reasonable way of interpretation. The Sm C (II p 268) held the same view about the mother having no right to a share and was criticized by the Madanaratna (by name) Several works like the Vyavahārasāra (p 225) and the Vivādacandra (p 67)[1142] hold the

1142 स्त्रीणां सर्वासामनंशत्वमेव । यत्वाप्यंशश्रवण पितुरूर्ध्वं विभजतां मातापर्यंशं समं हरेदित्यादौ तत्रापि किञ्चिद्दान विवक्षितम्। अर्हति स्त्रीत्यनुवृत्तौ न दाय निरिन्द्रिया अदाया पि स्त्रियो मता —इति चौधायनवचनात् । निरिन्द्रिया नि सत्त्वा इति प्रकाशः । अदाया अनंशा इत्यर्थः । विवादचन्द्र p 67 The स्मृतिच (II p 267) also relies on चौधायन The चौ ध. सू after the verse पिता रक्षति .. न स्त्री स्वातन्त्र्यमर्हति has the sūtra निरिन्द्रिया ह्यदायाश्च स्त्रियो मता इति श्रुतिः (II. 2. 53). In the तै सं. VI. 5. 3. 2 we have the words 'तस्मात्स्त्रियो निरिन्द्रिया अदायादीरापि पापात्पुस उपस्तितरं वदन्ति।' Vide Bühler's note in S. B. E vol 14 p. 231 on the confusion about this text of Baud मनु IX 18 is 'निरिन्द्रिया ह्यमन्त्राश्च स्त्रियोऽनृतमिति स्थिति ॥ on which मेधातिथि explains 'इन्द्रियं वीर्यं तेनयन्त्राबलादि'.

view that no woman (whether wife or mother) should get a share of the ancestral wealth but only as much wealth as is necessary for maintenance and rely on the words of Baudhāyana "there is a Vedic text that women are devoid of strength and take no share", which refers to a passage in the Tai S. VI 5 8 2, occurring in the context of the ritual of the Soma sacrifice "therefore women being destitute of strength take no portion (of Soma drink) and speak more weakly than even a wretched (low) man". Manu IX 18 also contains an echo of this passage of the Tai S and of Baud Dh. S. There was an intermediate stage in the evolution of the rights of the wife or mother. The highest she could get in the husband's wealth was two thousand panas, according to Vyāsa,[1143] which is variously read and explained, the Sm. C. (II p 281) saying that it means as much wealth as would every year yield an income of 2000 panas

In modern times some High Courts such as those at Bombay[1144] and Calcutta allow wives and mothers to have a share when the husband or the sons divide ancestral estate by metes and bounds, while in Southern India the practice of allotting shares to them has gone out of vogue long since and the Madras High Court does not allow a share to the mother but only maintenance The Dāyabhāga seems to have[1145] held that a step-mother who was herself sonless was not entitled to a share when her step-sons came to a partition, but was only entitled to maintenance (vide *Srimati Hemangini v. Kedarnath* L. R. 16 I A. p. 115 at p 117)

(1942) Nag p 24 where it was held that the mother gets only maintenance when there is only a severance of interest between father and sons but no partition by metes and bounds

1145. पितरि चोपरते सोदरभ्रातृभिर्विभागे क्रियमाणे मात्रेऽपि पुत्रसमांशो दातव्यः। समांशहारिणी मातेति वचनात्। मातृपदस्य जननीपरत्वात् न सपत्नीमातृपरत्वमपि सकृच्छ्रुतस्य मुख्यगौणत्वानुपपत्तेः। दायभाग III. 29-30 p. 67.

If a person had several wives and several sons from each wife, some of the texts prescribed from very ancient times that the sons should divide according to the wives or mothers (i e. *patnibhāga*, or which is practically the same thing, *mātṛbhāga* was recommended), though the generally recognized rule formerly as well as now is to divide according to the number of sons i. e *putrabhāga* (ignoring the fact of their being born from[1146] different mothers). For example, Gaut 28 15 recommends that partition should be made by grouping the sons according to their mothers and then allowing a special share to the eldest among each group of sons Both Br. (S. B E 33 p 372 verse 15) and Vyāsa[1147] lay down that if there be many sons sprung from the same father, who are equal in caste and number but who are the sons of different mothers, a division according to mothers may be legally made Such a partition on the basis of mothers is recognized in rare cases even now on[1148] the ground of custom in certain places and among certain castes

A paternal grandmother or step-grandmother cannot herself demand a partition, but when a partition takes place between her son's sons, her own son being dead or when it takes place between her son and the sons of a deceased son she is entitled to a share A text of Vyāsa says[1149] "the childless wives of the father are declared to be entitled to a share equal (to that of a son) and all grandmothers are declared equal to the mother". The Allahabad and Bombay High Courts hold that the grandmother is not entitled to a share when a partition takes place between her son and his sons, while the High Courts

of Calcutta and Patna hold that she is entitled to a share even in this last case [1150]

On account of certain bodily, mental or other defects and certain conduct also persons were excluded in ancient India from demanding a share on partition and also from taking by inheritance Gaut 28 41, Āp Dh. S. II 6 14 1, Vas. 17 52-53, Visnu Dh S 15 32-39, Baud Dh S II 2. 43-46, Kaut III 5 speak [1151] of various grounds of exclusion from partition (and inheritance) such as lunacy, idiocy, impotence, excommunication for grave sins or lapses of conduct, blindness, incurable disease, entering a different āsrama (viz that of forest hermit or *sannyāsa*). These grounds of exclusion probably arose from the fact of the persons labouring under them being regarded as incompetent to perform religious acts and from the close connection between property and its use for religious purposes Jaimini [1152] (VI. 1. 41-42) lays down two propositions, viz that one who is suffering from an incurable or irremediable bodily defect is not entitled to undertake vedic rites, such as Agnihotra, but that one who has some defect which is remediable may engage in them and Sabara gives a blind man, a deaf man and a cripple as persons who are incompetent to engage in Vedic rites The story of the brothers Devāpi and Śantanu (vide

1152. अङ्गहीनश्च तद्धर्मा । उत्पत्तौ नित्यसंयोगात् । जै. VI 1 41-42.

H. of Dh. vol. II. p. 109) as narrated in the Brhad-devatā[1153] states that the elder brother Devāpi suffered from a skin disease and so refused the kingdom which went to his younger brother Śantanu. We know from the Mahābhārata that Dhṛtarāstra who was blind from birth, though elder, had to give up the kingdom in favour of his younger brother Pāndu[1154]. The Mit. (on Yāj. II. 135) energetically combats the view put forward by some predecessors that all wealth is meant for sacrifices. They relied on two smṛti passages[1155] "all *dravya* (all kinds of wealth or movable property) has been created for the sake of sacrifice; therefore all those who are not competent to perform sacrifices are not entitled to share ancestral wealth but are only entitled to food and raiment. Wealth has been created for sacrifices; therefore one should employ it (or spend it) on purposes of dharma and not on women, fools and irreligious people". Kāt. (852) and Br (S. B. E. 33 p 371 verse 10) contain similar remarks. The Mit. does not accept this proposition, which argues that on that hypothesis no gifts (apart from sacrifices) that are recommended by the śāstras will be possible, nor can one accomplish two of the *puruṣārthas*[1156] viz. *artha* and *kāma* (as required by Gaut. IX. 46, Yāj. I. 115) and that the verses quoted above only mean that whatever wealth is collected for sacrifices should be spent only for that purpose even by the sons of the man who collected it, since a smṛti text condemns generally everyone who does not spend wealth collected for a sacrifice for that purpose to becoming a crow or a *bhāsa* (a cock or water fowl) in the next life The Mit. further argues that the view would be opposed to the conclusion of Jaimini III 4. 20–24 that the Vedic injunction "one should wear gold on one's person" is merely *puruṣārtha* and not '*kratvartha*'. Aparārka

In नारद, the मिता., दायभाग, अपरार्क, दायतत्त्व and व्य प्र. read औपपातिक (which means 'one guilty of उपपातकs') Vide मनु XI 59-66 and विष्णुधर्मसूत्र chap. 37 for long lists of उपपातकs such as गोवध, पारदार्य, अयाज्ययाजन &c. The स्मृतिच. II. p 270 reads अवपातिक and explains अवपातिक. अवपातित . . अवपातितस्य महापराधेन बन्धुबहिष्कृतस्य and quotes शङ्खलिखितसूत्र in support 'आवपातिकस्य रिक्थपिण्डोदकानि निवर्तन्ते' which is read as अपपात्रितस्य by the दायभाग V 3. p 100. and अपरार्क p 720. The मदनरत्न and व्य मयूख p 163 read अपपात्रित in नारद, while कल्पतरु read अपपात्रित and explained it as 'राजवधादिदोषेण बान्धवैर्यस्य घटापवर्जन कृतम्' (vide दायतत्त्व) The मदनरत्न gave this very explanation for अपपात्रित The वि र reads अपपात्रित (p 489) and gives the same explanation of it as the कल्पतरु The व्य मयूख p. 163 says it is better to explain अपपात्रित (derived from पात्रा meaning 'sea voyage') differently, disapproves of the explanation of अपपात्रित given by the मदनरत्न on the ground that for one guilty of sedition or high treason the breaking of a jar or of excommunication is not prescribed and that अपपात्रित means 'one who goes to another continent or country by sea in a vessel for trade and the like' Constantly engaging in sea voyage was one of the matters forbidden in the Kali age, *vide* 'द्विजस्याब्धौ तु नौयातु शोधितस्याप्यसग्रह.' quoted by नीलकण्ठ, which verse is quoted as from आदित्यपुराण by हेमाद्रि vol III. 2 p. 667. नीलकण्ठ is wrong about high treason गौतम (20 1–4) declares that one should desert even one's father who is guilty of regicide and describes a ceremony in which an unclean vessel is brought by a slave or servant from a dust heap and is filled with water from a jar carried by a female slave and then the vessel is struck with the foot and emptied with the words 'I make so and so one who will get no water from me.'

entitled to no share". Yāj II. 140 declares that the impotent, the outcast and his son, a lame man, a mad man, an idiot, a blind man and one afflicted with an incurable disease are not entitled to a share. It will be noticed that Yāj. expressly excludes the son of an outcast, as do also Baud. and Devala. Nār. (dāyabhāga 21–22) says 'one hostile to his father, an outcast (*patita*), an impotent person, one who goes to another continent by sea (from India)—these even though they be *aurasa* sons shall not get a share; how can a ksetraja (a son of the wife raised by another person by appointment) get a share (if he has these defects) and persons afflicted with long standing (like phthisis) and severe diseases (like leprosy), persons who are either idiots, insane or lame—these must be maintained by the family, but their sons are entitled to a share'. These verses of Manu, Yāj and Nār. have been quoted and explained in numerous decisions of the courts in India, but all such cases are mostly of academic interest now since the passing of the Hindu Inheritance (Disabilities Removal) Act of 1928 and hence need not be dwelt upon here. The Act (XII of 1928) applies to the whole of British India except to persons governed by the Dāyabhāga school and provides that no person governed by the Hindu Law, other than a person who is and has been from birth a lunatic or idiot, shall be excluded from inheritance or from any right or share in joint family property by reason only of any disease, deformity or physical or mental defect. This Act is not retrospective and does not confer on any person any right in respect of any religious office or service or any right to the management of any religious or charitable trust which he would not have had before the Act. Therefore under the Act the only defects that would disqualify a person governed by the Mitāksarā school from claiming partition or inheritance are congenital lunacy and congenital idiocy. Under the Dāyabhāga school the grounds of exclusion will still remain as before except as modified by judicial decisions and by other Acts. An important question under the Mit school arises in this way. What is the exact position of a son that is congenitally idiotic or insane Both Manu (IX. 201 and 203) and Yāj (II 140, 141) declare that they are *anamsa* or *nirāmśaka* (not entitled to a share of the ancestral estate), but must be given maintenance and if maintenance be not given by those who are liable to give it, they would incur sin (as Manu IX. 202 expressly says) and that the sons of disqualified persons take a share, if they are themselves free from defects. If A has a son B who is congenitally idiotic, is B still a copar-

cener of A (though not entitled to a share or to claim partition) so that A cannot make a gift of the whole or a portion of the property or a bequest thereof to his widow? This question arose in *Amirthammal v. Vallimayil* I L R (1942) Mad. 807 (F. B.), where it was decided that, when A made a will in the above circumstances bequeathing all family property absolutely to his widow and two sons were born to the disqualified man B after A's death, the father had no power to make a will as the disqualified member B was still a coparcener (though not entitled to a share) and that he transmitted the heritage to his sons The chief ground of the decision was a passage of the Sarasvativilāsa (explained on pp. 817 and 828–830) which is quoted below[1159].

The grounds of disqualification apply to males and females alike, as stated by the Mit. on Yāj II. 140[1160]. A few remarks will be made on *patita* and his son The commission of every sinful act did not make one *patita* as the word was technically understood. There were various grades among sins, which will be described in the section on *pātakas* The grave sins were differently enumerated by different ancient writers In explaining[1161]

1159. अनंशौ क्लीबपतितावित्युक्त्वा दायार्हभ्रातृभिः रिक्थग्राहैर्वा योषिद्ग्राहैर्वा पोष्यौ। जात्यन्धबधिराविति द्वित्वोक्त्या तयोरशोरत्वेव किं त्वशक्तावपि पोष्यौ विवाहसंस्कार-सद्भावात्। तथाशब्दभयोगेण षड्त्वादयः विवाहसंस्कारार्हाश्चेदृशहरा. पोष्याश्चेति रहस्यम्। उन्मत्तजडमूकाश्चेति समुच्चयोक्त्या तेपि भर्तव्या एव नाशहराः। विवाहार्हा न चेदिति शेषः। स वि p 364 The S V does not appear to be laying down any novel proposition All that this passage appears to mean is that though these disqualified persons cannot themselves enjoy a share, yet they do have a share (in theory) and if they can marry or are eligible for marriage their sons that are free from defects do take a share and that one cannot lay down a sweeping proposition that all congenitally dumb or insane persons or idiots can marry, but that there are degrees in these defects and in certain extreme circumstances these disqualified persons cannot marry Vide Madras Law Journal for 1942 (Jonrnal portion pp 63–82) for a reasoned criticism of the F B. case.

1160 पतितादिषु तु पुंलिङ्गत्वमविवक्षितम्। अतश्च पत्नीदुहितृमात्रादीनामप्युक्तदोष-दुष्टानामनशित्व वेदितव्यम्। मिता on या II 140

1161 सप्त मर्यादाः कवयस्ततक्षुस्तासामेकामिदभ्यंहुरो गात्। ऋ X 5 6; सप्त एव मर्यादाः कवय ततक्षुः त्वक्षुः। तासामेकामपि अधिगच्छन्न अहस्त्वान् भवति। स्तेयं तल्पारोहण ब्रह्महत्यां भ्रूणहत्या दुष्कृतस्य कर्मणः पुनः पुनः सेवा पातके अवृतोद्यामेति। निरुक्त VI 27. The meaning of this Rgveda verse is doubtful The Nir distinguishes between ब्रह्महत्या and भ्रूणहत्या. For the various meanings of भ्रूण, vide H. of Dh vol II p. 131 n 290 and p 148 n 334. In the Nir. भ्रूण probably means 'foetus', as it does in Gaut XXI. 9 'भ्रूणहनि हीनवर्णसेवायां च स्त्री पतति'. Vas 20 23 (भ्रूणहनं वक्ष्यामो ब्राह्मणं हत्वा भ्रूणहा भवत्यविज्ञात च गर्भम्) appears to give two senses to 'भ्रूणहा' (killer of a brāhmana or killer of a foetus when its sex is not known)

Rg. X. 5 6 "the wise made seven boundaries (restrictions) by transgressing even any one of which a man becomes sinful", the Nirukta VI 27 enumerates the seven sins as "theft, violating the bed (of the *guru*), murder of a brāhmana, murder of a bhrūna, continual performance of sinful acts, telling a lie as to a sinful matter". In the Tai. S. II. 5 1. 1., Śat. Br. XIII. 3 1. 1. and other Brāhmana texts, the murder of a brāhmana seems to have been regarded as the gravest of all sins (vide H of Dh. vol II p 147 and *n* 333) In the Chāndogya[1162] Up. V. 10. 9 the five great sinners are declared to be the thief of gold, the drinker of liquor, the violator of the guru's bed, the murderer of a brāhmana and one who associates with them. Gaut (XXI. 1-3) declares that the murderer of a brāhmana, the drinker of liquor, one guilty of sexual intercourse with the wife of his *guru* (elder or teacher) or with women who are the sapindas of his father or mother, a thief (who steals a brāhmana's gold), an atheist, one who continually does forbidden acts, one who does not abandon a *patita* (son or the like through affection) and one who deserts his relations though they are not *patita* are *patitas* and so is one who incites another to commit a grave sin and also one who associates with a *patita* for a year (as regards a vehicle, a seat and bed). Āp. Dh. S (I. 7. 21. 8-11) contains a longer list of grave sins (*patanīya*). Vas (I. 19-21) states that there are five grave sins (*mahāpātakas*) viz. violating the bed of the *guru*, drinking liquor, murder of a learned brāhmana, robbing a brāhmana of gold and contact with a *patita* by being his teacher or pupil or priest or by contracting a matrimonial alliance with him. The Baud. Dh. S II. 1. 50-56 has a somewhat different list of *patanīya* actions viz. sea voyage, robbing a brāhmana of his wealth and misappropriating a deposit, perjury for land, trading in (forbidden) articles, service under a sūdra and having a child from a śūdra woman. Manu XI 54, Yāj III. 227 and Visnu Dh. S 35 1 enumerate the five well-

1162. स्तेनो हिरण्यस्य सुरां पिबंश्च गुरोस्तल्पमावसन्ब्रह्महा चैते पतन्ति चत्वारः पञ्चमश्चाचरंस्तैरिति । छान्दोग्योप. V 10 9, बृह उप IV 3 22 mentions as great sinners the thief and the भ्रूणहा. Though some later smṛtis employ the word स्तेय, it is always restricted by the commentators (e. g Mit on Yāj III. 227) to the theft of brāhmana's gold. Vide *H. of Dh.* vol II p 580 for ancient texts asking a person to desert one's father who is *patita* or a regicide &c., but never his mother even though she be *patita*. Vide विष्णुधर्मसूत्र 57 1-5 'अथ त्याज्या । बाल्यः । पतिता । स्त्रियुपद मातृत. पितृतश्चाशुद्धा । सर्व एवाभोज्याश्चामतिग्राह्याः ।'

known mahāpātakas, viz. murder of a brāhmana, drinking of liquor, theft, incest and continuous association for a year with these. Association with any sinner of any sort for one year made the associater guilty of the same sin (Yāj. III. 261). *Samsarga* or *samyoga* (contact or association) was of various kinds. Manu XI 180 (= Śānti 165.37 = Baud. Dh. S. II. 1. 88= Vas. 1. 22) states that a person who associates with a *patita* for a year as regards using the same vehicle or seat or taking food with him in the same row becomes patita; but he becomes patita at once by being his sacrificial priest or by being his teacher of the Veda or by entering into[1163] a matrimonial alliance with him. Vrddha-Brhaspati[1164] (quoted by Mitāksarā on Yāj III. 261) states that association (*sankara*) with a *patita* is of nine kinds viz. occupying the same seat or bed, taking dinner in the same row with him, cooking food in his cooking pots, partaking of cooked food prepared by him, being a sacrificial priest or employing him as a priest, being his teacher of the Veda or making him one's teacher of the Veda, giving him one's daughter in marriage or taking his daughter in marriage, taking food with him in the same pot. Devala[1165] declares that sin is passed on from one man to another by conversation (with a sinner), by touching him, by his breath (coming in close contact with one's nose), by occupying the same vehicle (horse) or seat, by eating (in his company), by being a priest for him or by making him one's priest, by being his teacher of Veda or making him one's teacher or by matrimonial alliance. The same causes that led to a male being patita operated in the case of a woman to make her *patita*; there was one additional cause viz a woman became *patita* by sexual connection with a male of a lower class than herself (Gaut 21 9, Yāj III. 297 and Śaunaka[1166]) The ancient sages were very considerate even

1163. सवत्सरेण पतति पतितेन सहाचरन् । एकयानभोजनासनशयनैः । यौनसांवत्सरैः सम्बन्धैरतु सख एव । विष्णु 35 3-5 'सांवत्सरशब्देन याजनमभिधीयते मौख्य(मुख्य)शब्देन सुखभवत्वेनाध्यापनम्' मिता on या III. 261

1164 यथाह वृद्धबृहस्पतिः-एकशय्यासन पङ्क्तिभाण्डपक्वान्नमिश्रणम् । याजनाध्यापने योनिस्तथा च सहभोजनम् । नवधा सङ्कर प्रोक्तो न कर्तव्योऽधमै सह । मिता. on या III. 261 (printed text reads पक्त्यन्न for पक्वान्न, but this seems to be wrong if we look at the explanation), अपरार्क p. 1086, गृह्य र p 587 (both ascribe to बृह.) These verses are ascribed to देवल in दीपकलिका p 99.

1165. सलापस्पर्शनिःश्वाससहयानासनाशनात् । याजनाध्यापनाद्योनात्पाप सङ्क्रामते नृणाम् ॥ याजन योनिसम्बन्धं स्वाध्यायं सहभोजनम् । कृत्वा सख पतत्येव पतितेन न संशयः ॥ देवल q by मिता on या. III. 261, अपरार्क p 1087

1166 यथाह शौनक । पुरुषस्य यानि पतननिमित्तानि स्त्रीणामपि तान्येव । ब्राह्मणी हीनवर्णासेवायामाधिकं पततीति । मिता. on या III. 261

to fallen women. They provide that even women that are *patita* and have not yet performed the proper penance were not to be cast on the streets, but they were to be given a hut (near the house) for residence and bare maintenance that would keep body and soul together and were to be guarded against further lapses (Yāj. III. 296). Vide H. of Dh. vol. II pp. 571–573.

How far unchastity will debar a female from inheritance will be discussed a little later on. Adultery in general was an upapātaka only according to Manu XI. 59 and the ordinary penance for it was *cāndrāyana* or *govrata* (Manu XI. 117). But if the adultery was with a person of low caste, the woman became *patita* and would not have been entitled to a share on partition (as a wife or mother) under the old Hindu Law.

In the case of those guilty of grave sins who did not perform the prāyaścittas prescribed for such sins there was a peculiar procedure called *ghatasphota* prescribed for excommunicating them and severing all connection with them and treating them as dead, which has been described in H. of Dh. vol. II p. 388. Vide Gaut. 20. 2–7, Manu XI. 182–184, Yāj. III 294. But when the sinner performed the appropriate prāyascitta (penance), the smrtis declare that he became fit to be associated with (*vyavahārya*), he was to be welcomed by his relatives who were to take a bath along with him in a holy river or the like and who were to throw in the water an unused jar filled with water, he should offer grass to cows in the midst of his relations, they were not to find fault with him later on. Vide Manu XI. 186–187, Yāj III. 295, 299, Vas. 15. 20, Gaut 20. 10–14 (which prescribes the recital of certain Vedic mantras and the offering of clarified butter into fire). Ap Dh. S. I. 9. 24. 24–25 and I. 10. 29. 1–2 prescribe for the sinner who kills a *guru* or a *śrotriya* that has performed *soma* sacrifice or a *bhrūna* certain observances till death, but declare that such a person can never get rid of the loss of the right of association with all people, that there is no return for him to his relatives.[1167] In the Nirnayasindhu (III Uttarārdha pp. 567–68) and in the Dharmasindhu (III Uttarārdha pp. 453–54) the rite of *ghatasphota* for a *patita* and the rite for taking him back are concisely described.[1168]

The smrtis state that when a man knowingly committed a sin, penances did not necessarily remove the otherworldly con-

1167 गुरुं हत्वा श्रोत्रियं वा कर्मसमाप्तमेतेनैव विधिनोत्तमाङ्गच्छ्वासाञ्चरेत्। नास्यास्मिंल्लोके भत्यापत्तिर्विद्यते फलमर्थं तु निर्हण्यते। आप. ध सू I 9 24. 24–25.

1168. Vide Appendix.

sequences of the sin altogether but the sinner became fit to be associated with (Yāj. III. 226). In the case of the *patita*, even his son born after he committed a grave sin was held to be patita by most writers of smrtis (Yāj II. 140, Visnu Dh. S. 15. 35-36, Kaut III. 5)[1169]. But in the case of the daughter a difference was mercifully made. Vas. (13 51-53)[1170] states "the sages say that one born of a patita becomes a patita, except a female child, since she is to go to another (person as his wife); one may marry her without accepting any wealth (of her *patita* father) along with her ". Yāj III. 261 also says that the daughter of a patita may be married after making her fast and after making her leave everything (belonging to the patita father) in her father's house. Viśvarūpa (on Yāj III. 257) quotes a prose passage from Hārīta to the following effect : the daughter of a patita should have fasted one day and night, should take a bath without clothes, should put on white and new garments in the morning, should loudly repeat thrice 'I do not belong to him (my patita father) nor is he anyone to me ' and then she may be married at a sacred place (river etc.) or in one's (the bridegroom's) house.

These *rules* about a patita led to this result that if a Hindu changed his religion or was excommunicated or was made an outcast for some lapse that his caste looked upon with great disfavour, he was deemed to have lost his rights of partition or inheritance. The Caste Disabilities Removal Act (XXI of 1850) abrogates these rules of the ancient[1171] Hindu Law

1169 तेषां चौरसाः पुत्रा भागहारिण । न तु पतनीयस्य पतनीये कर्मणि कृते त्वनन्तरोत्पन्ना । विष्णुधर्मसूत्र 15. 34-36. On या II. 140 the मद. पा 681 explains: तज्जः पतितावकृतमायश्चित्तादुत्पन्नः

1170. पतितेनोत्पन्न· पतितो भवतीत्याहुरन्यत्र स्त्रिया । सा हि परगामिनी । तामरिक्थाद्युपेक्षात् । वसिष्ठ 13 51-58; कन्या समुद्वहेद्येषां सोपवासामकिंचनाम् । या III 261, तथा च हारीत. । पतितस्य तु कुमारी विवक्षामाछाद्याहोरात्रोपोषिता प्रात स्नुक्लेनाहतेन वाससाच्छाद्य नाहमेतेषा न ममैत इति त्रिरुच्चैरभिधाय तीर्थे स्वगृहे वोद्वहेत् । विश्वरूप on या. III 257. The मिता on the same verse of या quotes this passage (with slight variations) as from वृद्धहारीत

1171. Vide *Khunni Lal v. Gobind* L. R. 38 I. A. p 87 where A and B, being father and son and forming a joint family and A becoming a convert to the Moslem religion, it was held that A did not forfeit his interest in the joint family property and that the only effect of the conversion was that it operated as a severance of A from the family and that one half of the property immediately vested in A and the other half in B. Vide p. 101 where the P C. say that the Legislature virtually set aside the provisions of the Hindu Law. The Act of 1850 is felt by many Hindus as a great hardship and should be removed from the statute book In England the Blasphemy Act of 1698 is still in force.

All the smrtis say that those who are deprived of their rights to partition on account of the several defects mentioned are entitled to maintenance out of the family property as long as they are alive (Gaut. 28. 41, Vas. 17. 54, Visnu Dh. S. 15. 33, Manu IX. 202, Yāj. II. 140 etc.). If the disqualified persons want to marry or are married, then their sonless wives that are chaste should be maintained (Yāj. II. 142), but those that are unchaste should be driven out and so also those wives that are hostile to the family; but the Mit. adds that even hostile wives of disqualified heirs must be maintained provided they are chaste. If the disqualified person has an *aurasa* son or *ksetraja* son[1171a] who is free from the defects mentioned above (such as impotence) he becomes entitled to a share of the joint family property and the daughters of disqualified persons are entitled to be maintained in the family and provision must be made for their marriages (Manu IX. 203, Yāj. II. 141). It follows that disqualified heirs could not adopt, since Yāj II. 141 mentions only aurasa and ksetraja sons. Many of the smrtis did not allow even maintenance to the *patita* and his son (vide Baud. Dh. S. II. 2. 46, Kaut. III. 5, Devala, Visnu Dh. S. 15. 35-36). Coparceners were prevented from claiming a share at a partition if at the time of the partition they were labouring under the defects mentioned above. But if after partition[1172] the defect which disqualified a member be

1171a. तत्र क्लीवस्य क्षेत्रजः पुत्रः सम्भवत्यन्येषामौरसा अपि। **औरसक्षेत्रजयोर्ग्रहण-मितरपुत्रव्युदासार्थम्**। मिता on या. II. 141. In former ages a क्षेत्रज son was possible in the case of an impotent person. The अर्थशास्त्र also (III. 5) states सति भार्यार्थे तेषामपत्यमतद्विधं भागं हरेत्। ग्रासाच्छादनमितरे पतितवर्जाः। तेषां च कृतदाराणां सुते भजनीये सति। **दुजेयुर्बान्धवा· दुर्जास्तेषामंशं प्रकल्पयेत्** ॥. मनु IX 203 allows even impotent persons to marry, though he appears to have disapproved of it. A क्लीव is indicated, acc to वात्स्यायन, by the following signs: '**न मूर्ध्नि फेनिलं यस्य विड्वा चाप्सु निमज्जति। मेढ्रश्चोन्मादशुक्राभ्यां हीनः क्लीबः स उच्यते** ॥ कात्या. q by दायभाग V. 8. p 102. नारद (क्लीबसंयोग 9-10) states the signs of a potent man and in verses 11-13 speaks of 14 kinds of impotent persons. The अर्थशास्त्र in III 18 declares that the means of judging about impotence are women, froth of urine and the sinking of the fæces in water (**क्लीबभावे स्त्रियः मूत्रफेनमप्सु विड्वानिमज्जनं च**). The close agreement between Kaut. and Vāt. may be noted.

1172. एतेषां विभागात् प्रागेव दोषमात्रावगमेऽप्यनुपपन्नं न पुनर्विभक्तस्य। विभागोत्तरकालजन्योपधादेना दोषनिर्हरणे भागमात्रिरस्येव। विभक्तेषु सुतो जातः सवर्णायां विभागभाग्नित्यस्य समानन्यायत्वात्। मिता. on या.II. 140. Vide *Deo Kishen v. Budh Prakash* 3 All. 509 (F. B) and *Abilakh v. Bhekhi* 22 Cal. 864 for cases respectively of insanity at the time of inheritance barring succession and supervening insanity not divesting a person.

removed by medical treatment or the like then the disqualified member was entitled to reopen the partition on the analogy of a posthumous son born after partition. So also if a person is quite free from defect when he takes at a partition a share in joint family property or inherits, subsequently supervening defect does not divest the property once vested in him.

Some of the smrtis contain rules that appear to be only recommendatory. Āp. Dh.[1173] S. II. 6. 14. 15 says that if even the eldest son or brother were to waste joint wealth in immoral or improper ways he should be given no share (by the father or brothers at a partition). To the same effect are Gaut. 28. 38 and Manu IX. 214.

Gaut. 28. 43 and Visnu Dh. S. 15. 37 provide[1174] that the sons of *pratiloma* unions (i. e. of a man with a woman of a higher class) are to be dealt with like the sons of a brāhmaṇa from a śūdra woman i. e they would be entitled to maintenance from their father, though pratiloma unions were condemned. Kāt. (862–864) provides that the son of a woman married out of her order, one who is born of a *sagotra* union and one who is an apostate from the order of ascetics do not obtain ancestral wealth; but the son of a woman married in the wrong order takes the ancestral wealth if he is of the same class as his father, and the son of a woman who is not of the same caste as the husband (but of a lower caste) and is married in the proper order takes the wealth of the father. But the son of a woman

1173. यद्यवधर्मेण द्रव्याणि प्रतिपादयति ज्येष्ठोपि तमभागं कुर्वीत । आप. ध. सू. II. 6, 14. 15; सवर्णापुत्रोप्यन्याय्यवृत्तो न लभेतैकेषाम्। गौ. 28 38.

1174. शूद्रापुत्रवत्प्रतिलोमासु । गौ. 28. 43 , प्रतिलोमासु स्त्रीषु चोत्पन्नाश्चाभागिनः । विष्णुधर्मसूत्र 15. 37; अक्रमोढासुतश्चैव सगोत्रायास्तु जायते । प्रव्रज्यावसितश्चैव न रिक्थं तेषु चार्हति ॥ अक्रमोढासुतस्त्वृक्थी सवर्णश्च यदा पितुः । असवर्णमसूतश्च क्रमोढाया च यो भवेत् ॥ प्रतिलोमप्रसूता या तस्याः पुत्रो न रिक्थभाक् । ग्रासाच्छादनमत्यन्तं देयं तद्बन्धुभिर्नृतम् ॥ बन्धूनामप्यभावे तु पित्र्यं द्रव्यं तदाप्नुयात् ॥कात्या. (862–864) q. by दायभाग V. 14 p. 103, वि. र. p. 491, वि. चि. pp 133–134, व्य. मयूख pp 163–164. The word अक्रमोढासुत is interpreted in two ways: (1) If a brāhmaṇa married a ksatriya girl first and then married a brāhmaṇa girl, both women became अक्रमोढा (as the procedure was against Manu III 12) The son of the ksatriya woman in such a case did not take the wealth of his father but only the son of the other woman took it. The other interpretation (given by the व्यवहारमयूख) is based upon the doctrine of परिवेदन, for which vide H. of Dh vol. II. pp 546–549 and Manu. III. 172. The son of a younger sister married before her elder sister and of the latter married after a younger one were both excluded from inheritance to their father. Kāt. (862) is quoted in *Natha* v. *Chotalal* 55 Bom. 1 at p. 8.

united with a man in the reverse order of castes does not take the ancestral estate; but the approved view is that he should be given food and raiment till his death by the kinsmen. In case there are no kinsmen such a son takes the whole wealth of his father and if the father left no wealth kinsmen are not bound to maintain him.

Provision must also be made before ordering partition in a suit for partition by a brother for the marriage expenses of the unmarried sister or sisters of the brothers Here there has been a great divergence of views among the writers of digests and commentaries. Kaut. III.5 (quoted below in *n* 1181), Visnu Dh. S.18. 35 and 15. 31 and Br. simply state that wealth for the marriage expenses of the unmarried sisters must be set apart. But Manu IX. 118, Yāj. II. 124 and Kāt. (858)[1175] state that the brothers should get their unmarried sisters married by giving them one fourth share. The Mit. explains[1176] that this does not mean that each brother is to give one fourth of his share to the sister (for in that case if there are five brothers and one unmarried sister she may get more than each brother) but that the unmarried sister is to get one fourth of what she would have got if she were a male and that if a person has sons and daughters from wives of different classes then the unmarried daughter of the wife of each class will take one fourth of what her brother from the same mother would have taken. The Mit. further adds that one should not explain that the word " one fourth " is not to be taken literally and that the unmarried sister gets only as much as is necessary for her marriage, since such an explanation is opposed to the express words of Manu IX. 118 and since Manu declaress sinfulness as the consequence of not giving one fourth share. The Mit. informs us that its explanation was the same as that of Asahāya and Medhātithi and that Bhāruci gave another explanation (viz. that an unmarried sister was entitled to as much wealth as would be necessary for her

---

1175. कन्यकानामदत्तानां चतुर्थो भाग इष्यते । पुत्राणां तु त्रयो भागाः स्वार्थं स्वल्पधने स्मृतम् ॥ कात्या. q. by व्यवहार III. 35 p 69, स्मृतिच्च II p. 268, वि र p. 494. This text is cited in 53 Mad. 84 at p. 97.

1176. निजादंशाच्चतुर्थमंशं दत्त्वा । अनेन दुहितरोपि पितुरूर्ध्वमंशभागिन्य इति गम्यते । न च निजादंशाद् दत्त्वांशं तु तुरीयकामिति तुरीयांशाविवक्षया संस्कारमात्रोपयोगि द्रव्यं दत्त्वेति व्याख्यानं युक्तं मनुवचनविरोधात् 'स्वेभ्योंशेभ्यस्तु ... पतिताः स्युरदित्सवः ॥' ... पतिता स्युरदित्सव इत्यकरणे प्रत्यवायश्रवणाद्दत्वर्थं दातव्यता प्रतीयते । मिता on या. II. 124.

marriage and not to a definite share). The Dāyabhāga held the opinion[1177] that if ancestral wealth was small, the provision for the marriage of the unmarried daughter should be made by giving her a fourth share but if the wealth was ample then she should get only as much as was necessary for her marriage. The Sm. C., V. R. p 494, V. C. p. 134 follow the view of Bhāruci, while the V. M. (p. 106), Madanaratna and V. P. (p. 456 ff) follow the Mit. The former group particularly relies on the texts of Devala[1178] (wealth necessary for marriage should be given to unmarried daughters from the paternal estate), Sankha (when partition of heritage takes place the unmarried daughter takes the maidenly trinkets, wealth for her marriage expenses and stridhana) and Visnu Dh. S. 15. 31. In modern times the Courts allow no share to unmarried daughters but only provision for marriage expenses and this too is restricted to the unmarried sister of a person who requires or sues for partition and does not hold good as to the daughters of brothers or other collaterals[1179]. In *Bhagavati Shukul* v. *Ram Jatan* 45 All. 297 it was held (at p. 299) that "quarter share" in the text means as much money as will suffice for marriage expenses and that where the daughter was a cripple and blind and all the property was worth Rs 500 an alienation of the whole of it by the widowed mother for raising a dowry for the daughter was justifiable.

1177. अल्पधने पुत्रैः स्वात्स्वादंशादाकृष्य कन्याभ्यश्चतुर्थांशो दातव्यः । यथा मनुः स्वेभ्यः० । .. एवं च बहुतरधने विवाहोचितधनं दातव्यं न चतुर्थांशनियम इति सिध्यति । दायभाग III. 36, 39 pp 69–70. The दायतत्त्व p 171 says, एवं तुरीयाशदानमतिपादकमपि विवाहोचितद्रव्यदानपरम् ।

1178 कन्याभ्यश्च पितृद्रव्यं देयं वैवाहिकं वसु । अपुत्रकस्य स्वं कन्या धर्मजा पुत्रवद्धरेत् ॥ देवल q by स्मृतिच. II p 268, व्यव. नि p 451, परा मा III p 510; विभज्यमाने दायाद्ये कन्यालङ्कारं वैवाहिकं स्त्रीधनं च कन्या लभेत । शङ्ख q. by स्मृतिच. II. p 269, वि र. p. 495, परा. मा III. p 511; अदद्ताना स्ववित्ताद्यनुरूपेण संस्कार कुर्यात् । विष्णुधर्मसूत्र 15. 31.

1179. Vide *Subbayya* v. *Anant* 53 Mad. 84, where A had a son S by one wife and a son S1 and three daughters D1, D2, and D3 by another wife and S sued A and S1 for partition and D1 was married after the institution of the suit, one-third of the marriage expenses of D1 were deducted from the one-third share of S1 and as regards one-third of the marriage expenses of D2 and D3 (which were yet to be incurred) his share (one-third) was charged with one-third expenses of marriage, but it was held that he was not liable for the marriage expenses of the daughter of his brother S 1.

Mode of partition and allotment of shares.

Before allotting shares provision must be made out of the joint family property for the payment of joint family debts[1179a], for the personal debts of the father that are not immoral or illegal, for small gifts of affection made by the father, the maintenance of disqualified coparceners and female dependent members and for marriage expenses. Vide Manu VIII. 166 (as to family debts), Yāj II. 117, Nār. (dāyabhāga 32) and Kāt. 850 (for payment of father's debts and gifts of affection) and 542–43 (for the various legal necessities[1180]) If brothers want to separate and some of them are already married and others are unmarried then provision must be made for the samskāras (such as marriages) of the latter from the joint family property. Even Kautilya makes provision for the marriage of unmarried brothers and sisters[1181]. Yāj II 124, Nār. (dāyabhāga 33), Br. (S. B. E. 33 p. 373 verse 21) lay down that the *saṁskāras* (upanayana, marriage &c) of younger brothers must be provided for out of paternal wealth[1182].

1179a. ऋणरिक्थयोः समो विभागः। अर्थशास्त्र III. 5; ऋणं प्रीतिमदानं च दृष्ट्वा शेषं विभाजयेत्। कात्या. 850 q by स्मृतिच. II p. 273, व्यव. नि. p. 446 (reads रिक्थं for ऋणं). The verse is quoted in *Ponappa v Pappuvayyangar* 4 Mad. 1 (F. B) at p. 49.

1180. कुटुम्बार्थमशक्तेन गृहीतं व्याधितेन वा। उपग्रहनिमित्तं च विद्यादापत्कृतं तु तत्॥ कन्यावैवाहिकं चैव मेतकार्यं च यत्कृतम्। एतत्सर्वं प्रदातव्यं कुटुम्बेन कृतं प्रभोः॥ कात्या. 542–543 q by अपरार्क p. 647, स्मृतिच. II pp 174–175, वि. र. p. 56 प्रभोः means प्रभुणा

1182. This rule, according to Yāj. II 124, was restricted to brothers only and was not to be extended If, for example, there is a joint family consisting of several cousins with their sons and the marriages of some of the sons of the cousins are performed at the expense of the joint family, then when a suit is filed for partition no provision can be made for the marriages of other sons of the cousins. Vide *Ramlinga v. Narayan* L. R. 49 I. A. 168 In *Jairam v. Nathu* 31 Bom. 54, it was held that in a partition suit

(Continued on the next page)

It has already been seen that a father could during his life time separate his sons from himself and also among themselves[1182a] and that he could assign shares of property to his sons. This power of the father is indicated even in the Tai. S. III. 1. 9. 4 (quoted above in note 1055) which refers to the story of Manu having distributed his wealth among his sons. It is argued by Āp. Dh. S. II 6. 14. 11 that, as this Vedic text (Tai. S.) does not expressly state that any difference was made by Manu as to the shares of his sons, the division must have been equal, that therefore the preference of the eldest son is forbidden by the śāstras and that when the Tai. S. II. 5. 2. 7 states that "they distinguish the eldest by (a larger share of) the wealth" that is not a rule, but a mere *anuvāda* (a statement of fact) and the Vedic passage only recites what some people do in spite of the rule of the śāstras. The general rule, in the absence of express provision to the contrary, is equal distribution, as stated in Jai. X. 3. 53 (*samam syād-aśruteḥ*) which is relied upon by the prima facie view in Mit on Yāj. II. 265. From the Tai S. it appears that both practices viz. equal division of property among all sons and giving a larger share to the eldest were wellknown in those far-off ages. Āp II. 6.

(*Continued from the last page*)

between father and sons, a minor son is entitled to have provision made for his thread, betrothal and marriage ceremonies out of the joint family property before the property is partitioned. In *Sundrabai v Shiv Narayan* 32 Bom. 81 it was held that marriage is one of the samskāras which both Yāj and Nārada refer to. In 38 Mad. 556 the same principle was established But in *Venkatarayudu v Sivaramkrishnayya* 58 Mad. 120 and in *Pranjivan v Motiram* 29 Bom L R 1412 it has been held that the decisions in 38 Mad. 556 and in 31 Bom. 54 must be regarded as overruled by the P. C decision in L R 49 I A. 168, and in 58 Mad 126 it was held that an unmarried brother is not entitled to have provision made for his marriage in a decree for partition. It is submitted with great respect that these Madras and Bombay decisions are wrong so far as unmarried brothers are concerned, that they go against the express texts of several writers like Kautilya, Nārada, Br., Viśvarūpa, Madanapārijāta (p 648) and that the Privy Council in 49 I. A 168 was dealing with the provision for marriages of the children of coparceners and not of brothers

1182a. It has been held in *Ekallu Subharamu v. Ekallu Chenchura ghavan* (1945) 1 M L J. p 151 that the paternal grandfather has no power to separate his grandsons among themselves and that it is only the father who has this power.

14. 7 clearly[1183] states that in some countries gold or black corn or black produce of the earth is the (special) share of the eldest. Almost all the sūtras and smṛtis prescribe the rule of equal division among the sons of wives of the same class as the father (vide Āp. Dh. S. II. 6. 14. 1, Baud. Dh. S. II. 2. 2–3, Manu IX 156, Yāj. II. 117, Viṣnu Dh. S. 18. 36, Kauṭ. III. 5, Br. S. B. E. 33 p. 371 v. 10, Kāt. 838). Some of these no doubt refer to the special share or provision given to the eldest (called *uddhāra*). Kaut. says "the father in a partition during his own life should not give a special share to one out of several sons, nor should he deprive a son of a share without any cause[1184] (such as blindness etc.)." Kāt. 843 says the same thing in almost the same words. But from certain passages when construed literally (such as Yāj. II. 116, Nār. dāyabhāga 15) it appears that the early Indian father often distributed the ancestral wealth among his sons just as he pleased. Nār (dāyabhāga 15)[1185] says: "When a father has distributed his property amongst his sons that is a lawful distribution for them (and cannot be set aside), whether the share of one be less or greater than or equal to the shares of the rest; for the father is the lord of all". To the same effect is Br. (S. B. E. vol. 33 p. 370 v. 4) who adds that if they try to alter the arrangement (made by the father) they shall be punished. But later on these passages were either held to apply to former ages (V. Mayūkha p. 99 says so) or to the self-acquired property of the father (Mit. on Yāj. II. 114) or were so interpreted as to mean that the partition made by the father could not be annulled if it was legal, but if illegal it could be set aside (Mit. on Yāj. II. 116, Madanaratna, Madanapārijāta p. 646). Nār. (dāyabhāga 16) himself denies authority to the father to give shares to the sons as he pleases

when he is suffering from diseases, is angry (with a son or sons), or is engrossed in pleasures or pursues paths opposed to śāstras.

The eldest son has received special treatment in all ages down to modern times (vide p 566 above). That treatment took various forms Sometimes the texts say that the eldest son took the whole estate. Āp. II. 6. 14. 6, Manu IX. 105–107, Nār. (dāyabhāga 5) refer to this view. Manu (IX 105–107) allows the eldest son to take the entire paternal estate, provides that the other sons should depend for their maintenance on the eldest son as on the father, remarks that the eldest by the mere fact of his birth enables the father to free himself from the debt to the ancestors and that therefore he (the eldest) deserves to get from the father the entire estate.[1186]

Another mode of dealing with the privileges of the eldest son was to give him some excellent or valuable article and then to distribute the rest equally. The Tai S. II 2. 2. 7 seems to have been understood by Āp. Dh. S. II. 6. 14. 1 and Baud. Dh. S. II. 2. 2–5[1187] in this sense. Manu IX 114 says that the eldest may get the best of all the items of wealth, whatever is the most eminent and the best of a group of ten cattle. Br. (S. B. E 33 p. 371 verse 8) is to the same effect. Kaut. III. 6 points out that according to Uśanas among the sons born of the same mother, goats shall be the special share of the eldest among brāhmanas, horses among ksatriyas, cows among vaiśyas and sheep among śūdras, that if there be no quadrupeds the eldest was to take an additional share of one-tenth of the whole property excepting precious stones, since he releases his father from fetters (of Hell) by offering śrāddha. Kaut. himself holds that the eldest should get the vehicle and ornaments of his father (after the latter's death); the middle-most his bed, seat and the bronze plate from which the father took his meals; and the youngest should get black grain (like sesame),

1186. Compare the Vedic passages about the three debts owed to gods, ancestors and sages quoted in H. of Dh. vol. II. pp 270 (n 621), 425 (n. 1008), 560 (n. 1302).

1187. मनुः पुत्रेभ्यो दायं व्यभजदिति श्रुतिः। समश्न सर्वेषामविशेषात्। वरं वा ज्येष्ठपुत्रायोद्धरेज्ज्येष्ठः। तस्माज्ज्येष्ठ पुत्रं धनेन निरवसाययन्तीति श्रुतिः। बौ. ध सू. II 2. 2–5 निरवसाययन्ति is explained as तोषयन्ति by स्मृतिच. II. p 260 and आप also (II 6. 14. 1) employs the words एकधनेन ज्येष्ठ तोषयित्वा (having satisfied the eldest by giving him an excellent article of wealth). वि. र. p. 467 explains ज्येष्ठं पुत्रं धनेनोद्धरणलक्षणेन निरवसाययन्ति इतरपुत्रेभ्यः पृथक् कुर्वन्ति.

iron, domestic utensils and the bullock cart. Hārīta[1188] says: "at a partition the eldest should get a bull, the most precious wealth, the images for worship and the ancestral house, the other brothers should go out and build new houses or if there be a single house the eldest should get the southern (or best) portion". This special allotment to the eldest is called *uddhāra* (lit. what is first taken out) in Manu IX. 115–116 and Visnu Dh. S. 18. 37, and Baud. employs the form "uddharet". There were other methods also prescribed for special distribution of wealth. Gaut. 28. 5 says that the eldest should get one-twentieth of the whole as a special share, a bull and a cow, a cow, a chariot to which horses, asses or mules are yoked and a bull. Manu IX. 112 provides that the special share of the eldest was one-twentieth of the whole property and whatever was the most valuable out of the ancestral property, the middlemost son should get half of this (i. e. one-fortieth part) and the youngest one-fourth of this (one-eighteth of the whole). Manu IX. 117 states that when no valuable items are taken out for the eldest the latter should get two shares, the son next to him one share and a half and the other sons one share each. Vas. 17. 42, Nār. (dāyabhāga 13), Br. (S. B. E. vol. 33 p. 371 verse 9) also give two shares to the eldest, the latter[1189] making it to depend on the possession of learning and good qualities by the eldest. Similarly Nār (dāyabhāga 12), Br. (S. B. E. vol 33 p. 370 verse 5) provide[1190] that when the father makes a division during his lifetime he may retain two shares for himself. Śankha-Likhita allowed this right to the father only when he had an only son [1191]

1188. विभजिष्यमाणे गवां समूहे वृषभमेकधनं वरिष्ठं वा ज्येष्ठाय दद्युर्देवतां गृहं च इतरे निष्क्रम्य कुर्युः। एकस्मिन्नेव दक्षिणं ज्येष्ठायाल्पपूर्वमितरेषाम्। हारीत q by वि र p. 471 Vide *Damodardas* v. *Uttamram* 17 Bom 271, 288, for the eldest son being given the custody of the family idol and the property appertaining to it.

1189 जन्मविद्यागुणज्येष्ठो ज्यैष्ठं दायादवाप्नुयात्। समांशभागिनस्त्वन्ये तेषां पितृसमस्तु सः॥ बृह. q by दायभाग II 42 p 42, वि र. p 480, स्मृतिच. II. p. 266, परा मा III. p 490 व्यवहारसार quotes first half as कात्यायनस्य (p. 218).

1190 जीवद्विभागे तु पिता गृह्णीतांशद्वयं स्वयम्। बृह. q. by दायभाग II. 35 p. 36, स्मृतिच II. p. 261, व्यव नि p. 414, व्य म p 444, वि. र p 465.

1191. स यद्येकपुत्रः स्याद् द्वौ भागावात्मनः कुर्यात्। शङ्खलिखित q by वि र. pp. 465, दायभाग II. 59 pp 47–48, अपरार्क p 717 (attributes to शङ्ख). The दायभाग does not take the word एकपुत्र as a बहुव्रीहि but explains it as meaning एकस्य पुत्रः (i e औरस and not क्षेत्रज), while स्मृतिच. explains it as गलितवयस्क वि. र p 466 says 'पारिजातस्तु एकपुत्रः ज्येष्ठपुत्र इत्याह। भाष्यकारस्तु पुत्रशब्दं न पठितवान्। यद्येकाकी स्यादिति पठितवान्। यद्येकाकी पत्नीविरहितोपि स्यात्तदाप्यशद्वयं गृह्णीयात्। सपत्नकिश्चेत्तामप्यपरेणाशेन तोषयेत्।' The भाष्यकार seems to be that of the शङ्खलिखितसूत्र The मदनरत्न (folio 91 b) refers to पारिजात's explanation (एकशब्दोऽत्र श्रेष्ठवाची) The व्य. म p 444 criticizes दायभाग.

In course of time there was a revulsion of popular feeling against allowing a special share to the eldest son and even to the father. Kāt. (838)[1192] states that where the parents and brothers divide the whole joint property in equal shares that is a just (or legal) division. Br. (S. B. E. 33[1193] p. 370 verse 2) declares that the father and sons are entitled to equal shares in lands and houses that are ancestral, but in property acquired by the father the sons cannot claim a share against the will of the father. The V. M (p. 95) remarks on this that it follows impliedly that in the wealth acquired by the grand-father or other (remoter) ancestor, the sons can demand a partition even against the father's desire.

According to Manu IX. 125,[1194] if all wives of a person are of the same caste, then the son who is born first (even from a wife who is junior i e married later) is the eldest son and that among twins the one that is born first is the eldest (verse 126), just as in the Subrahmanyā[1195] texts the invocation of Indra is made by the name of the first-born. But if he has wives of different castes then the son of the wife of his own caste is the eldest (though born later) and the son of a wife of a lower caste though born first would be postponed. Devala[1195a] quoted in V. R. p. 477 and V. C. p. 128 says the

1194. सदृशस्त्रीषु जातानां पुत्राणामविशेषत. । न मातृतो ज्येष्ठ्यमस्ति जन्मतो ज्येष्ठता सता ॥ मनु IX 125, the वि. चि. p. 128 after quoting this verse remarks 'तेन नानावर्णासु भार्यासु पतिसवर्णाया पश्चाज्जातो ज्येष्ठ इत्यर्थः' and निर्णयसिन्धु III. पूर्वार्ध p 251 says 'तेन कनिष्ठाया पूर्वजात एव ज्येष्ठो न ज्येष्ठाया पश्चाज्जात इत्यर्थ '.

1195 For Subrahmanyā invocation, vide H of Dh vol II pp. 1144–45 and note 2550 as to how the names of descendants by the seniority of birth are included in that invocation.

1195a. बहिर्वर्णेषु चारित्र्याद्यमयो· पूर्वजन्मत । यस्य जातस्य यमयो पश्यन्ति प्रथम मुखम् । सन्तान· पितरश्चैव तस्मिञ्ज्यैष्ठ्यं प्रतिष्ठितम् । देवल q by वि र 477, वि चि p. 128, निर्णयसिन्धु III पूर्वार्ध p 251 The वैजयन्ती on विष्णुधर्मसूत्र 18 37 correctly points out that the word द्वौ तदा भवतो गर्भौ स्मृतिवैशविपर्ययात् are quoted by Śridhara (in his comment on the भागवत).

same as Manu IX. 125. Manu IX. 123 and Gaut. 28. 16 appear to conflict with Manu IX. 125 and probably refer to some other ancient text or opinion The V. Mayūkha (pp. 97–98) notes that in some medical works and in the (commentary on the) Bhāgavata Purāna III 17. 18, it is said that among twins the one born later is deemed to be the elder, but that this, being opposed to the indications contained in the Vedic Subrahmanyā formula and in Manu IX. 126, has no bearing here (but only in medical matters). The Nirnayasindhu (III Pūrvārdha p. 251) makes a reference to the Bhāgavata.

General feeling went so much against allowing a special share to the eldest or allowing the father to make an unequal division among his sons, that such action was condemned in the same breath with *niyoga*,[1196] or the sacrifice of the cow called Anubandhyā. It is very instructive to follow the agruments of the Mit. and other writers on this point The oldest extant commentator, Medhātithi, on Manu IX. 112 shows that even before his time there were writers that held that the texts of Manu on *niyoga* and on the special share to the eldest at a partition were in vogue only in bygone days and not in their days, that the rules of the smrtis were conditioned by time and country, just as *sattras* of long duration, though declared in the Vedic texts committed to memory by Vedic students, were not being performed and just as Manu (I. 85) declares that the dharmas were different in different *yugas*. But Medhātithi[1197] does not accept this reasoning, denies that different dharmas are prescribed for different *yugas* and holds that there is no restriction as to the dharmas to be performed in a country. Though sattras may not be performed now still it is possible to perform them. The argument of the Mit. on Yāj.

1196. For *niyoga* vide H. of Dh vol II pp. 599–607. The anubandhyā (or anūbandhyā, a barren cow) was sacrificed after the *Udayanīyā isti* performed at the end of the Agnistoma Even in the times of the sūtras (such as Āp Srauta XIII 24 10 and Kāt Srauta X. 9. 14–15) *āmiksā* (curds mixed in heated milk) was optionally offered. Vide. H. of Dh vol. II pp. 1200–1201.

1197. इमशुद्धारनियोगस्मृतिरतिक्रान्तकालविषया न लभ्यते । अनुज्ञेये नियतकालत्वात्स्मृतीनामिति केचित् । ... तस्मादुद्धारनियोगगोवधस्मृतय उपदिष्टा नानुज्ञेयाः । तदेतदपेशलम् । मेधातिथि on मनु IX. 112.

II. 117 is briefly as follows[1198]:—Unequal division though found in the śāstras (e. g. Manu IX. 105, 112, 116, 117, Yāj. II. 114) should not be practised because it has come to be condemned (or has become hateful to) by the people, since there is the prohibition (in Yāj I. 156) that an action, though prescribed in the śāstras, should not be performed when it has come to be condemned by the people, since such an action does not lead to the attainment of Heaven. For example, though Yāj. I. 109 prescribes the offering of a big ox or a goat to a learned brāhmana guest, it is not now practised because people have come to hate it; or just as, although there is a Vedic text laying down the sacrificing of a cow "one should sacrifice a barren cow called anubandhyā for Mitra and Varuna", still it is not done because people condemn it. And it has been said "just as the practice of *niyoga* or the killing of the anubandhyā cow is not now in vogue, so also division after giving a special share (to the eldest son) does not now exist". Āpastamba also (II. 6. 14. 1–14) prescribes equal division, refers to the view of some that the eldest takes the whole estate, shows that allotting a special share to the eldest is the view of some and refutes it as opposed to the śāstras by quoting the Vedic text "Manu divided his wealth among his sons". Therefore unequal division though found in the sāstra should not be practised as it is opposed to popular sentiments and to the Veda and so Yāj. (II. 117) gives the restrictive rule that in partitioning there must be equal division. The Sm. C. (II. p. 266) tells us that Dhāreśvara also did not discuss passages like Manu IX. 112 since he said that the practice (of uddhāravibhāga) had been altogether given up by the people[1199].

1198 अयं विषमो विभाग: शास्त्रदृष्टस्तथापि लोकविद्विष्टत्वान्नानुष्ठेय: । अस्वर्ग्य लोकविद्विष्टं धर्म्यमप्याचरेन्न तु-इति निषेधात् । यथा-महोक्षं वा महाजं वा श्रोत्रियायोपकल्पयेत्-इति विधानेपि लोकविद्विष्टत्वादनुष्ठानम् । यथा वा-मैत्रावरुणीं गां वशामनुबन्ध्यामालभेत-इति गवालम्भनविधानेपि लोकविद्विष्टत्वादनुष्ठानम् । उक्त च—यथा नियोगधर्मो नो नानुबन्ध्यावधोपि वा । तथोद्धारविभागोऽपि नैव सम्यति वर्तते ॥-इति । ... तस्माद्विषमो विभाग: शास्त्रदृष्टोपि लोकविरोधाच्छ्रुतिविरोधाच्च नानुष्ठेय इति सममेव विभजेरन्निति नियम्यते । मिता. on या. II. 117. The verse यथा नियोग० is attributed to the स्मृतिसंग्रह by the मदनरत्न (folio 92a) and व्य. प्र p 443 and to the संग्रह by स्मृतिच II p. 266 which reads धर्मोद्य and explains अद्यसंप्रतिशब्दौ कलियुगमभिसन्धायोक्तौ. The व्यव. नि. p 414 ascribes it to प्रजापति; the परा. मा. III 492, व्यवहारसार p. 219, and others attribute it to संग्रहकार.

1199. एतदेव धारेश्वरेणोक्तम् । ज्येष्ठस्य विंश उद्धार इत्येवमादीनि वाक्यानि न विचार्यन्ते लोकेनात्यन्तपरित्यक्तत्वात् । कलाविति शेष: । द्वापरादावनुष्ठेयत्वेनात्यन्तपरित्यागाभावात् । स्मृतिच. II. p. 266.

The Sm. C. finds fault with Viśvarūpa for saying that just as the offering of an ox or a goat to a learned brāhmana is not practised because the practice of the śistas is against it, so *uddhāra* is not practised. It says that when there is a conflict between a smrti text and *śistācāra*, the latter is the weaker (of the two) and cannot refute the smrti text as laid down by Vas. I. 4–5. Further not offering a bull cannot be said to be śistācāra, but it is really the absence of śistācāra. The Sm. C. finds fault with the Mit. for saying that people have come to condemn a special share for the eldest. It says that, on the contrary, if a special share is given to the eldest who is endowed with learning, good qualities or holy actions then people commend such a procedure. The Madanaratna[1200] quotes the verse "yathā niyoga &c.," and a verse from the Ādipurāna The V. P.[1201] (pp 442–443) generally follows the Mit., but criticizes it by saying that there is no real *śruti-vrodha* (opposition to a Vedic text). If that were so, as śruti (the Veda) is promulgated for all ages, unequal division would be forbidden in all ages and it would follow that the particular śruti passages speaking of

1200. एवमादीनि विषमविभागप्रतिषाधकानि मन्वादिवचनानि कलियुगव्यतिरिक्त-विषयाणि। अत एव कलौ विषमविभागनिषेध आदिपुराणे। ऊढायाः पुनरुद्वाहं ज्येष्ठांशं गावधं तथा। कलौ पञ्च न कुर्वीत भ्रातृजाया कमण्डलुम्॥ ज्येष्ठांशं 'जन्मविद्यादिकृतज्यैष्ठ्यनिबन्धन-मंशम्। स्मृतिसंग्रहेपि। यथा नियोगधर्मो ... संप्रति वर्तते॥ इति। संप्रति कलियुगे। मदनरत्न (folio 92 a). The verse ऊढायाः is quoted in the Sm C (II. p 266) also from a पुराण (without naming it) Rao Bahadur Rangaswami Aiyangar (In Introduction to V Nir XLIX–LI) wrongly thinks that by स्मृतिसंग्रह is meant the व्यव नि of वरदराज which quotes the verse यथा नियोगधर्मो नो from प्रजापति. He failed to note that the verse यथा नियोगधर्मो नो &c is quoted by the Mit. on Yāj. II. 117, the Mitāksarā being one of the authorities quoted in the V. Nir. Therefore the स्मृतिसंग्रह from which the verse is said to have been taken is the work of that name also called संग्रह.

1201. अस्वर्ग्यं लोकविद्विष्टं धर्म्यमप्याचरेन्न तु। इति योगीश्वरवचनात्। अत्र लोक-पदेन युगमुच्यते। युगान्तरे धर्म्यमपि युगान्तरे यद्विद्विष्टं प्रतिषिद्धं तन्नाचरेदित्यर्थः। अन्यथा धर्म्यत्वास्वर्ग्यत्वयोर्व्याघातः। शास्त्रविहिते तदभिज्ञविद्वेषो बाधित एव। तदनभिज्ञपामरजन-विद्वेषस्तु नास्वर्ग्यत्वापादकोऽग्नीषोमीयादिहिंसादावतिप्रसङ्गादित्यादि दूषणं स्यात्। व्य. प्र. p 442. It should be noted that विश्वरूप reads the verse of Yāj. as अस्वर्ग्यं लोकविद्विष्टं and takes अस्वर्ग्य as (अ + सु + अर्ग past p participle of अर्ज्) 'अस्वर्ग्यम् असुगतम्। असुपरिनिश्चितमित्यर्थः'. He then notices another reading अस्वर्ग्यं which means अशोभनान्तम् (not bringing about welfare in the end). He further explains 'लोकं कर्मसाध्यं ये जानन्ति ते लोकविदो मन्वादयः तैर्द्विष्टं नाचरेत्।'.

unequal division are without authority, since it (unequal division) could not have been practised in other ages also (but as a matter of fact it was); besides Baud. sets out another Vedic text which mentions unequal division. The V. P. desiring to guard against the rather wide statement that whatever is condemned by the people should not be practised holds that the word "loka" in Yāj. I. 156 means "yuga"; otherwise there would be confusion about what is proper conduct and what does not lead to Heaven. The condemnation by low or ordinary people who are quite innocent of śāstras cannot make an action incapable of leading to Heaven, since such people might condemn the *hiṃsā* (slaughter) of the animal offered to Agni and Soma. The above discussion illustrates how practices once recognized by Vedic passages and by the people gradually fell into disuetude and how reason and the common sense of ordinary people asserted themselves even against Vedic and smṛti texts. The Mit. is very clear in its statement that whatever comes to be hated by the people in general should not be practised, even though it was once practised and has the support and authority of Vedic and smṛti texts behind it. Those who desire change in social customs and the practices of the people in various directions rely on this text of Yāj. and on similar texts[1202] of Manu IV. 176 and Viṣṇu Dh. S. 71. 85 and on the Mit. for authority. Orthodox writers like Mitramiśra therefore have to twist plain words like "loka", since they cannot tolerate the idea that common people can have anything to say in what these writers believe to be the injunctions of the śāstra. Instead of candidly saying that ancient practices came to be modified by common people, writers like Mitramiśra say that common people should not be listened to in these matters, that each *yuga* has its own peculiar practices and that common people have no authority to change śāstric practices prescribed by the texts for a particular age. It is sheer quibbling to say that not offering a bull is not śiṣṭācāra, but absence of śiṣṭācāra; what is clear is that common people abhorred the practice of niyoga and the killing of a cow in a sacrifice and writers of sūtras and *smṛtis* fell into line with them and prohibited such practices in the

1202. परित्यजेदर्थकामौ यौ स्यातां धर्मवर्जितौ । धर्मं चाप्यसुखोदर्कं लोकविकुष्टमेव च ॥ मनु IV. 176, धर्मविरुद्धौ चार्थकामौ । लोकविद्विष्टं च धर्ममपि (परिहरेत्) । विष्णुधर्मसूत्र 71. 84-85; जनवादे सति क्षुद्रकर्म न कुर्यात् । बार्हस्पत्य-अर्थशास्त्र I. 95

Kali age, though they were either permitted or (even) enjoined by the Vedic texts; that is, the voice of the common man or his revolt was allowed to prevail over the word of the sacred Veda.

Though the assignment of a larger share to the eldest son or giving him the whole property ceased to be generally prevalent, vestiges of it are still found. There are certain estates in the nature of *zamindaries* or a *rāj* that are impartible and descend by the rule of primogeniture to a single heir. Vide *Baboo Gunesh Dutta v. Maharaja Mohesh* 6 Moo. I A. 164, *Neelkisto v. Beer Chunder* 12 Moo. I. A. 523, *Mohesh v. Sahughan* 29 I. A. 62, *Ram Nundun v. Maharani Janki* 29 I. A. 178, for examples of impartible estates. Sometimes by custom certain estates such as Deshmukh and Deshpande *vatans* have been held to be impartible. Vide *Ramrao v. Yeshvantrao* 10 Bom. 327 and *Gopalrao v. Trimbakrao* 10 Bom. 598. In certain other cases a larger share (called *jyeṣṭhāṁśa* or *motap*) has been allowed by custom to the eldest son at a partition. Vide *Manikchand v. Hiralal* 20 Cal. 45 (P. C.), *Prithusingji v. Umedsingji* 6 Bom. L. R. 98, *Malubhai v. Sursangji* 7 Bom. L. R. 821.

The following propositions may be laid down about the allotment of shares on a partition: (1) When there is a partition between a father and his sons each son takes a share equal to that of the father; (2) where the partition is only between brothers all of them share equally; (3) on the death of a member leaving male issue his right to a share on partition passes to and is represented by his male issue; (4) when there is a partition among members who are uncles and nephews or cousins, the allotment is *per stirpes* (according to the stock) as regards each branch and *per capita* among the members of the same branch. This rule is expressly laid down[1203] by Kaut-

(*Continued on the next page*)

III. 5., Yāj. II. 120, Br. (S. B. E. 33 p. 372 v. 14) and Kāt. (855-56). This last rule requires to be explained and illustrated. Yāj. II. 120 concisely states: "in the case of those who claim through different fathers, the assignment of shares is according to the fathers". Kāt. says: "if an undivided younger brother dies, he (the elder brother or the other brother) should make the son of the former a partaker of the ancestral wealth, when he has not obtained from his grandfather livelihood (i. e. share of heritage); he should obtain from his paternal uncle or the uncle's son the share which his father would have got (if alive); that very share would be the share according to law of all the brothers (who are the sons of the deceased brother). Or even a son (of that son of the brother dying) would obtain that share; beyond this (i. e. beyond the grandson of the deceased brother) there is cessation (of the right to demand a share)". It was stated that in the ancestral property (*paitāmaha dravya*) sons and grandsons equally have rights by birth, but in the case of the grandsons assignment of shares is made to them through their

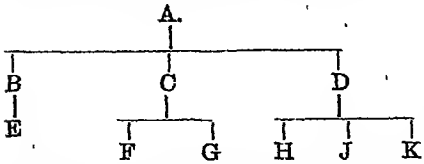
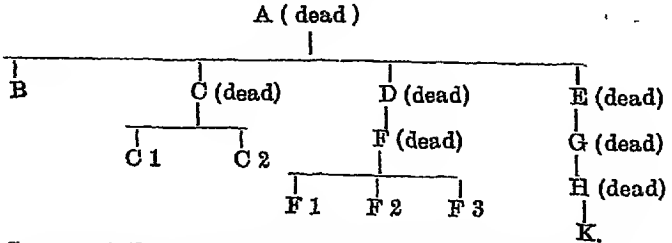
lucidly explained in *Moro v. Ganesh* 10 Bom H. C R. 444 (at pp 461, 466-67) and are quoted in *Debi Parshad v. Thakur Dial* 1 All 105 (F B.) at p 111 On these verses of कात्यायन the व्य मयूख (p. 101) says that they do not refer to undivided coparceners, but rather to those who are re-united Why it says so is not clear The first verse of Kāt. starts with the words अविभक्तेषुजे and therefore the topic is that of undivided family and there is no express indication that it has changed to reunion in the following verse. The reason appears to be that नीलकण्ठ takes the verse of देवल 'अविभक्तविभक्तानां कुल्याना वसता सह । भूयो दायविभाग· स्यादाचतुर्थादिति स्थिति· ' as referring to re-union on account of the word भूयः in it. The words आचतुर्थात् (in देवल) and निवृत्ति परतो भवेत् (in कात्यायन) mean the same thing and so नीलकण्ठ probably thought that they referred to the same subject. The interpretation of देवल (by नील०) is forced and is opposed to the explanation of most works like the विवादरत्नाकर (p 482) and व्य म. p. 449, स्मृतिच. II p. 279 They take अविभक्तविभक्ताना as a *dvanda* compound meaning 'those who are undivided' and 'those who are divided', while नील० takes that word to mean 'those who being once undivided are divided' (i. e. as a कर्मधारय) सह वसता—acc to the other digests means either 'who dwell together' (in the case of the undivided) and 'who reunite' (in the case of the divided) 'अविभक्तानामेव वा विभक्ताना सह वसतां संयुक्तानां या पुनर्विभागो भ्रातृतत्सुततत्सुतपर्यन्तमेव तत्सुताच्चतुर्थाच्निवर्तत इति' वि र p 482, पीजिचतुर्थमभिव्याप्य दायभाग इत्यर्थ । विभक्तानामपि संसर्गादिना सहवासे सति इय व्यवस्था। वसता सहेति वचनात् । व्य. म p 449. Vide *Moro v Ganesh* 10 Bom. H C R. p. 444 at pp 465-468 for several objections to the explanation of Devala's verse offered by Nilakaṇṭha.

fathers and not in their separate individual capacity. This may be illustrated by some examples.



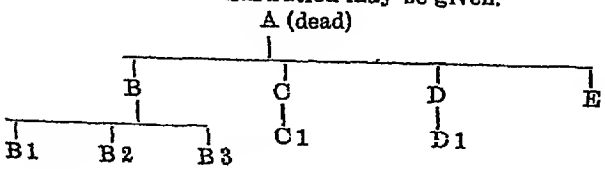
Suppose A, B, C, D, E, F, G, H, J, K formed a joint family and that A, B, C, D all die without making a partition, B leaving one son E, C leaving two sons F, G, and D dying leaving three sons H, J, K. If E, F, G, H, J, K want to partition, then these six will not take one-sixth each, but the partition will be through their fathers i. e. E the only son of B will take one-third, F and G (the two sons of C) will take one-third (i. e each will take one-sixth) and H, J, K will together take one-third (i. e. one-ninth each) The same will be the result if only A, B, C die, leaving D to K. Here D, the uncle of E, F, G, along with his three sons H, J, K will take one-third only.

To take another example.



Suppose A the head of the joint family dies leaving a son B, two grandsons C1 and C2, three great-grandsons F1, F2, F 3, and one great-great-grandson K. Here K cannot demand a share, as he is beyond 4th from A the common ancestor A that died last. Therefore the joint property will be divided *per stirpes* into three parts, B taking one-third, C 1 and C 2 together taking one-third and F 1, F 2, F 3 together taking one-third

One more illustration may be given.



Suppose A, the head of a Hindu joint family, dies leaving four sons, B, C, D, E and five grand-sons, B 1, B 2, B 3, C 1, D 1 and then B dies. Then B3 receives his share, which is one-third of one-fourth (=one-twelfth), goes out of the family and the rest continue joint Then C dies, then D, then E, and then B 2. Then B 1 sues C 1 and D 1 for his share. Here if we again apply the rule of *per stirpes* division, the property that remained at the date of the suit of B 1 will be divided into three parts and B 1, C 1 and D 1 (who represent three stocks, B, C, D) will each get one third of that property. This was so decided in *Pranjivandas v Ichharam* 39 Bom. 734. The Madras High Court, however, holds that the rule of *per stirpes* applies only when all the coparceners desire a partition at the same time and that if only some members separate at one time and others on a later occasion, regard should be had to the share allotted at the first partition in computing the share to be allotted at the second partition That is, according to the Madras High Court in the above case B 1 will be entitled to one-third minus one-twelth (which latter was allotted to B 3 when he left the family). The Madras High Court says that its views are based not on strict principles of Hindu Law, but on necessary considerations of equity Vide *Manjanatha v Narayana* 5 Mad. 362 and *Narayana v Shankar* 53 Mad. 1 (F B at p. 6).

Manu (IX. 47) emphatically states:[1203a] " once is a partition made, once is a maiden given in marriage, once does a man say 'I shall make a gift of this or that'; these three are done only once by the good ". This means that a partition once made is final and cannot ordinarily be reopened But there are exceptions to this rule. One viz. about the posthumous son born after partition has already been mentioned above (pp. 595–597). Br.[1204] (S. B E 33 pp 373–74 verses 24–26) says, " If a man

1204. गोत्रसाधारणं त्यक्त्वा योन्यदेश समाश्रित. । तद्वश्यस्यागतस्यांश प्रदातव्यो न संशय: ॥ तृतीय. पञ्चमश्चैव सप्तमो वापि यो भवेत् । जन्मनामपरिज्ञाने लभेताशं क्रमागतम् ॥ यं परम्परया मौला: सामन्ता: स्वामिनं विदु. । तद्न्वयस्यागतस्य दातव्या गोत्रजैर्मही ॥ बृह q by दायभाग VIII. 2-3, स्मृतिच II pp. 307-308, वायतत्त्व p 180, वि. र. pp. 540-541. The वि चि. p 132 seems to ascribe these to कात्यायन. For मौला: vide ये तत्र पूर्वं सामन्ता: पश्चाद्देशान्तरं गता: । तन्मूलत्वात्तु ते मौला ऋषिभि: संप्रकीर्तिता: ॥ कात्या q by मिता. on या II. 151, अपरार्क p. 760 Kāt. derives मौल from मूल and states that they were once neighbours but later migrated and hence they are so called.

leaving the country common to himself and his co-sharers goes to another country, his share must undoubtedly be given to his descendant when the latter comes back to the original country. Whether he (the descendant) be the third or fifth or even seventh in descent (from the man who left the country) he would get the share that descends hereditarily provided his birth and family name are ascertained. The *gotrajas* (agnatic members of the family) should allow (a share in the ancestral) lands to the descendant of a man whom the *maulas* and neighbours know to be a co-owner (in the lands) by descent, when he comes (after a partition) to demand his share". The V. R. explains[1205] that the rule of Devala (given above) about a claim to a share being allowed up to the fourth applies when all the members stay together in the same place or country, while the above rule of Br. allowing even the seventh in descent to claim his share after a partition has taken place applies where such descendant and his forefathers had migrated to a distant land. These rules of Br. indicate that, even after a long time, a descendant could claim his share in a joint family estate and no bar of limitation was allowed.

Another rule is that where some property of the joint family had been fraudulently concealed by one member and was discovered afterwards, or where some property was left out from partition either through mistake or accident, such property should be divided according to their shares among the persons who made the first partition. In this case there is no reopening of the partition once made, but there is another partition. Manu IX. 218, Yāj II. 126, Kaut. III. 5 and Kāt 885–86 lay down[1206] this. Kāt. says: 'If (joint) wealth was concealed, but

II pp 308–309, दायभाग XIII 4 p. 221, वि र 526 विभजेरन्निति वदता येन दृश्यते तेनैव न ग्राह्यमिति दर्शितम्। मिता. on या II. 126; पूर्वं यथा यस्य विभागकल्पना कृता तत्समानैव कार्या न पुनरपहर्तृरपहर्तृतया अल्पभागो दातव्यो न दातव्य एव वेति समता नयेदित्यस्यार्थं। दायभाग XIII 2.

is afterwards discovered, the sons should divide it equally with their brothers in the absence of the father (i. e. even after his death). Whatever is concealed from each other (by the co-sharers) or what was divided in an unjust manner and whatever was recovered (such as debts) after (partition) should be partitioned in equal shares. This is the view of Bhrgu '.

In the Ait Br. (VI. 7)[1207] it is said 'He who deprives a person entitled to a share of his share, him he (who is deprived) punishes (or destroys). If he does not punish (or destroy) him (the depriver), then he punishes his son or grandson; but he does punish him'. Manu IX. 213 declares that even the eldest brother who through greed deprives his younger brothers (of their shares) ceases to be the eldest (i. e. forfeits his position as the oldest), is deprived of his (special) share (as eldest) and should be punished by the king. From these passages it follows that fraudulently concealing joint property or depriving a person of his share is condemned. This leads on to a divergence of views among commentators and digests. If a man conceals joint property at a partition, is he a wrongdoer or not? What he conceals is partly his own. Therefore the Dāyabhāga[1208] (XIII. 8) holds that there is no theft in this case, since a thief is commonly understood to be one who knowing that some thing belongs to another, makes it his own without any ground for so doing; while a co-sharer cannot be said to be no owner at all of the joint property. The Dāyabhāga (XIII. 11-12) says that Viśvarūpa and Jitendriya both held the same opinion that even if technically it may be called theft, still there is no sin attaching to it as smrtis allow him also who conceals joint property to share in it at the subsequent partition. The Vivādaratnākara (p. 526) states that Halāyudha also held the opinion that in suppressing some joint property the co-sharer did not incur the sin of theft. On the other hand the Mit., Aparārka (p. 732), V. P. p. 555 hold that in view of Manu IX. 213

1207 यो वै भागिन भागान्मुदते चयते वैनं स यदि वैनं न चयतेऽथ पुत्रमथ पौत्रं चयते इत्येवैनमिति । ऐ ब्रा. VI 7. This is cited as गौतम's in the मिता on या. II 126, in the व्य म p. 131. The परा मा. III. p. 566, स. वि p 438, व्य म' 555 correctly refer to it as श्रुति.

1208 तदुक्तं विश्वरूपेणापि । अतस्तस्करदोषो नास्तीति वचनारम्भसामर्थ्यात् स्तेनधात्वर्थानिष्पत्तेरित्यभिप्राय. । .. सत्यपि वा स्तेयेऽपहर्तुरपि विभागवचनदर्शनाच्च स्तेयदोषः । अन्यथा सुवर्णादिनिह्नवे पतितस्य भागो न स्यात् । दायभाग XIII. 11 and 13 pp. 224-225

(which declares even the eldest as punishable by the king if he deprives his younger brothers of their due share) and the Ait. Br. there is the fault of theft in case a co-sharer fraudulently conceals joint property. The Mit. and V. P. further rely upon an example derived from the Pūrvamīmāmsā in support of their view. When a *caru* (boiled food) of *mudga* pulse is prescribed and mudgas are not available, some substitute must be employed just as when rice is not available *nīvāra* grain may be employed. The parts of māsa resemble those of mudga and some one may plausibly say that in the absence of mudgas, a caru of māsas may be used. To this Jai. VI 3 20[1209] replies that, since *māsas*, *vaṭakas* and *kodravas* are forbidden as being unfit for use in sacrifices, one cannot take parts of māsas as substitute for parts of mudgas though both may be so similar as not to be easily distinguishable. So the general prohibition against depriving another of his wealth holds good even in the case of goods that belong jointly to oneself and to others. The Dāyabhāga (XIII. 16 pp 227–228) tells us that a predecessor of it named Bālaka relied on this very *nyāya* of Jaimini and finds fault with him It should be noted however that Kāt. (888) recommends that the king[1210] even if a complaint be lodged about fraudulent suppression by a co-sharer should not use force against the fraudulent suppressor but should make him give up the concealed property by persuasion or trick. Br. and Kāt.[1211] declare that if there is a suspicion that some joint wealth has been concealed by a co-sharer, the *kośa* ordeal may be resorted to.

1209. प्रतिषिद्ध चाविशेषेण हि तच्छ्रुतिः । जै. 1210 बन्धुनापहृतं द्रव्यं बलात्कारेण प्रदापयेत् । कात्या q. by दायभाग XIII 7 (p 222), दायतत्त्व p. 183, वि र. p. 526, व्य. प्र 556 which says 'राज्ञे तु भागिभिर्न निवेदनीय राज्ञे निवेदितमपि तेन सामादिनैव दापनीयमिति प्रीत्यविच्छेदादिदृष्टप्रयोजनकमेव'.

1211. गृहोपस्करवास्त्राद्यं दोह्याभरणकर्मिणः । दृश्यमाना विभज्यन्ते कोशं गूढेऽन्यवीक्ष्य तु ॥ कात्या. 842 q by स्मृतिच्च II. p. 273, वि र p. 498. The स्मृतिच. quotes a very similar verse of बृहस्पति (on the same page) viz. गृहोपस्करवास्त्राद्यं दोह्यालङ्कारकार्मिणः । .. गूढे कोशो विधीयते ॥

If there was a dispute whether a partition had already taken place, Yāj. II 149 mentions some of the indications that lead to the inference or proof of partition viz. 'the determination of the dispute follows from the testimony of kinsmen, cognates (like maternal uncle), other witnesses, a deed (of partition) and by (the fact of) houses and fields being separately held ' Nār. (dāyabhāga 36–41) gives more [1212] elaborate rules on the subject viz. that the status of division can be determined from the fact of their transactions (agriculture &c) being separate, that the separate performance of religious rites is another indication of separation 'Receiving and returning a debt, the beasts (kine &c), food, houses and fields and servants must be separate in the case of those who are divided, as also cooking food, performance of religious rites, income and expenditure. It is only divided persons (and not undivided ones) that can become in respect of each other witnesses, sureties or debtors and creditors People should regard them to be divided even though there be no deed of partition, in whose case these transactions are entered into openly with their co-sharers' Yāj II. 52 also declares that between brothers, husband and wife, father and son there cannot be, as long as they are undivided, the relationship of being sureties or witnesses for each other or of being debtor and creditor. Nār. (dāyabhāga 41) and Kāt (893) state that when for ten years brothers (and other members of a family) reside (separately) doing religious observances separately and have separate transactions, they should be known as separate so far as the ancestral estate is concerned [1213] It is on account of these passages that the courts say that presumably every Hindu family is joint in food, worship [1214] and estate and 'that cesser of commensality is an *element* which may properly be considered in determining the question whether there has been

1213. वसेयुर्दश वर्षाणि पृथग्धर्माः पृथक्क्रियाः । भ्रातरस्तेपि विज्ञेया विभक्ता. पैतृकाद्धनात् ॥ कात्या. q by स्मृतिच्च II p 311, स वि p 348, अपरार्क p. 757 (reads वसेयुर्वै दशाब्दानि and पैतृके धने) नारद (दायभाग 41) is वसेयुर्ये दशाब्दानि. . । विभक्ता भ्रातरस्ते तु विज्ञेया इति निश्चय ॥ *In Lalubhai v Bai Amrit* 2 Bom 299 (at p 309) the verse of Kāt. is referred to.

1214 Vide *Sri Raghunadha v. Sri Brozo Kishoro* L. R. 3 I. A. 154 at p. 191

a partition of joint family property, but it is *not conclusive*'.[1215] Br. says that where there are no witnesses nor a document to prove partition, a conclusion may be arrived at by inference.

A few words may be said about the self-acquired property of the father or grand-father. According to the strict theory of the Mit the son[1216] acquires by birth an interest even in the self-acquired property of the father, but the Mit. makes it clear that the son has no power to prevent his father from disposing of his own self-acquisitions, but has to give his approval to his father's alienations of his self-acquisitions. The Mit sets out two smrti texts viz. 'though immovable property and bipeds may have been acquired by the father himself, there can be no gift nor sale of them without (calling together or) consulting all the sons. Those that are born, those that are unborn and those that are in (their mother's) womb expect maintenance (and therefore) there can be no gift nor sale'. But these have been treated by the Mit. and the Dāyabhāga also as more or less recommendatory If the father alienates his self-acquisitions without his son's consent he may be held guilty of transgressing a smrti precept but the transaction does hold good and is valid,[1217] since a fact cannot be altered by even a hundred texts (as the Dāyabhāga puts it). It should not be supposed that the Mit. was the first to propound this right as to self-acquisitions. Centuries before, the Visnu Dh. S. 17. 1 expressly declared that as regards self-acquired property the father has absolute discretion to divide it as he pleases.

1215 Vide *Ganesh Dutt v Jewach* L. R 31 I. A 10 at p. 13. साहसं स्थावरं न्यासः स्त्रीविभागश्च रिक्थिनाम् । अनुमानेन विज्ञेयं न स्यात्र पत्रसाक्षिणौ ॥ बृह. q by दायभाग XIV. 8, p 231, स्मृतिच II p. 310 (reads स्थावरस्वाम्यं), व्य. म. p. 564.

1216. तस्मात्पैतृके पैतामहे च द्रव्ये जन्मनैव स्वत्वम् । ... स्थावरे तु स्वार्जिते पित्रादिप्राप्ते च पुत्रादिपारतन्त्र्यमेव । स्थावरं द्विपदं चैव यद्यपि स्वयमर्जितम् । असम्भूय सुतान्सर्वान्न दानं न च विक्रयः ॥ ये जाता येऽप्यजाताश्च ये च गर्भे व्यवस्थिता । वृत्तिं च तेभिकाङ्क्षन्ति न दानं न च विक्रयः ॥ द्रव्यादिस्मरणात् । मिता on या. II 114. The first is q by the दायभाग II. 29-30 (for which see note 1125). The first is ascribed to बृह. by व्यव नि. p. 411.

1217 पैतृके पैतामहे च स्वाम्यं यद्यपि जन्मनैव तथापि पैतृके पितृपरतन्त्रत्वात् पितुश्चार्जकत्वेन प्राधान्यात् पित्रा विनियुज्यमाने स्वार्जिते द्रव्ये पुत्रेणानुमतिः कर्तव्या । पैतामहे तु द्वयोः स्वाम्यमविशिष्टमिति निषेधाधिकारोस्तीति विशेषः । मिता. on या. II. 121.

Kāt. (839) also says that the son has no ownership in the father's self-acquisition.[1218] When Yāj. II. 114 allows the father either to give the best share to the eldest son or to make an equal division among all sons, the Mit. explains that this unequal division holds good only as to the self-acquisitions of the father. Similarly when Nār. (dāyabhāga 12) or Śankha-Likhita say that the father may take two shares for himself, that is with reference to self-acquisitions, acc. to the Mit. Manu IX. 104 stating that sons have no power over property during the life of the parents refers to the self-acquisitions of the parents In modern times courts have followed the view that a Hindu father (or any Hindu person whatever) may give, sell or bequeath by will his self acquired property (whether movable or immovable) to any body he likes (vide *Rao Balwant Singh v Rani Kishori* 25 I. A. p. 54 at pp. 67-68 where the two verses cited by the Mit were held to contain only a moral precept and not a rule of law capable of being enforced).

Mr Kishori Lal Sarkar in his Tagore Law Lectures on the Mīmāmsā rules of interpretation states (p 21) that 'Mitākṣarā bears the impress of Buddhistic influence'. For this proposition he advances hardly any substantial evidence that will bear scrutiny. His reasons are mostly subjective and he refers to no ancient or medieval Buddhistic texts that elaborate the principle of taking property by birth or the rule of propinquity in deciding questions of inheritance, which two are the most fundamental tenets of the Mitāksarā system It appears that the evolution of the son's right to partition, of his equality with his father, of the absolute rights of a person to his self-acquisitions was a gradual indigenous growth and had nothing to do with Buddhistic thought. Buddhists had hardly any independent set of juristic ideas or works different from those of the Brahmanical jurists and in medieval times countries like Burma professing Buddhism turned to Brahmanic codes like that of Manu for regulating succession, inheritance and allied

1218. पैतामह समान स्यात्पितु. पुत्रस्य चोभयोः । स्वयं चोपार्जिते पित्रा न पुत्र. स्वाम्यमर्हति ॥ कात्या. q. by स्मृतिच. II. pp. 279-280, व्यव. नि. p. 410.

matters.[1219] Vide pp. 559–560 about the origin of Dāyabhāga doctrines.

In the preceding pages reference has been frequently made to sons, to their rights in ancestral property by birth and to their shares on partition. It is now time to refer to the various kinds of sons, principal (*mukhya*) and *gauṇa* (subsidiary or secondary).

In H. of Dh. vol. II. pp. 560–561 passages from the Ṛgveda, the Tai. S, Śat. Br., Ait. Br., the sūtras and smṛtis emphasizing the importance of a son for the spiritual welfare of a man have been cited. The principal purposes served by the birth of a son are succinctly stated in the Ait. Br. 33. 1. viz. the son enables the father to pay off the debt he owes to his ancestors, to secure immortality (*amṛtatva*) and heavenly worlds These were the main purposes deemed to be served by a son in most remote times. Manu (IX. 106–107) and Yāj I. 78 also mention these benefits. The desire was to continue and perpetuate the family (*vaṃśasya avicchedah* as the Mit. has it) and to provide for the performance and preservation of religious *sacra* and offerings. This desire was common in ancient societies almost everywhere. The Śat. Br. XII. 4 3. 1 (S B. E. vol. 44 p 157) states 'the father in later life subsists on the son and the son in early life subsists on the father'. The Nirukta[1220] (III. 4) quotes a *ṛk* verse,' thou

1219. Vide 'Notes on Buddhist Law' by John Jardine and 'Principles of Buddhist Law' by Chan-toon (Rangoon, 1894) for the *Dhammathats* (Dharmaśāstras), their origin from Indian Codes and works and contents and *Mah Nhin Bwin v. U. Schwe Gone* L. R. 41 I A. 121 pp. 131–139 for detailed remarks on the 36 Dhammathats of which the Manu Kyay is the most important and which were derived in their remotest origin from the laws of Manu. In 'Champā' by Dr. R C Majumdar in Inscription No 65 of Jaya-Indravarman II dated śake 1010 it is said 'He followed 18 titles of law prescribed by Manu ('Manumārga') Manu VIII. 3 employs the words अष्टादश मार्गेषु निषद्धानि Vide also 'Indian influence on the Literature of Java and Bali' by Himansu Bhushan Sarkar pp 93–94 and 104 for the influence of Manu on Javanese and Balinese codes and Dr. Majumdar on 'Suvarnadvīpa' part II pp. 1–23

1220. तदेतदृक्श्लोकाभ्यामभ्युक्तम् । अङ्गादङ्गात्संभवसि हृदयादधिजायसे । आत्मा वै पुत्रनामासि स जीव शरदः शतम् ॥ निरुक्त III. 4 This verse is found in कौषीतकि आरण्यक 4 11 and is prescribed as a *mantra* in the Āp. Mantrapāṭha II. 11. 33 for recital in *jātakarma*, in आश्व गृ 1. 15 11 and मानवगृह्य I. 18. 6 Vide H of Dh vol II p 235 n 537. It occurs also in कौ. ध सू II. 2. 15–16 (as a quotation) and in शङ्खलिखित (q by वि र. pp 554–555). The first half occurs in बृह. उप. VI 4 9 in another connection and the whole of it in आदिपर्व 74. 63.

art born from each of the limbs, from the heart (of the father), thou art indeed one's own self called son; mayst though live for a hundred autumns!'. Gradually the idea arose (probably suggested by etymologists) that the son saved the father from the Hell called *put*,[1221] as stated by Manu IX. 138 (= Ādiparva 229. 14 = Visnu Dh. S. 15. 44). The son's close connection with the offering of pindas to the ancestors is not much emphasized in the oldest works. But in the sūtras, in Manu and the other smrtis this aspect of the benefits derived from the son is far more prominent than the others. In speaking of the putrikā-putra Manu (IX 136) declares 'he should offer pinda' (to his maternal grandfather) and take the latter's wealth. As three descendants (son, grandson and great-grandson) presented pindas to the ancestor, all three had extravagant praises bestowed on them Manu IX. 137 says: 'a man secures the (higher) worlds through (the birth of) a son, he obtains permanence (in those worlds) through a grandson, through the son of a grandson he wins the world of the Sun'[1222]. The Visnudharma-sūtra 85. 67 declares[1223] 'A man should desire to have many sons (with the thought) that some one out of them may go to Gayā or offer the Aśvamedha sacrifice or let loose (in honour of the deceased father) a dark bull'. Br (q. in Par M. I. 2 p. 305) states: 'the pitrs afraid of falling into Hell desire to have sons; (they think) one of them may go to Gayā and that one will save us; he will set at liberty a bull, he may perform sacrifices and execute works of public utility (like tanks, temples and parks), he will take care of us in our old age, he will offer śrāddha day by day'. The Matsyapurāna 204 (3-17) contains verses (that are called *pitrgāthās*, verses sung by pitrs) which breathe the hankerings of deceased ancestors after what

1221 The कौ. गृह्यपरिभाषा I 2 5 quotes 'पुरिति नरकस्याख्या दु खं च नरक विदु । पुदि त्राणासत. पुत्रमिहिच्छन्ति परत्र च ॥'; शङ्खलिखित q by वि. र p 555 state आत्मा पुत्र इति प्रोक्तः पितुर्मातुरुद्धयहात् । पुन्नाम्नो नरकात्त्रायते यस्मात्पुत्रस्तेनासि संज्ञितः ॥

1222. पुत्रेण लोकाञ्जयति पौत्रेणानन्त्यमश्नुते । अथ पुत्रस्य पौत्रेण ब्रध्नस्यामोति विष्टपम् ॥ मनु IX. 137. This verse occurs in Vas 17. 5, कौ. ध सू. II 9. 7 (reads last pāda as नाकमेवाधिरोहति), विष्णुध सू. 15. 46

1223 एतस्या बहव' पुत्रा यद्येकोपि गया व्रजेत । यजेत वाश्वमेधेन नील वा वृषमुत्सृजेत् ॥ विष्णुधर्मसूत्र 85 67 = मत्स्यपुराण 22. 6=वायु 150 10 = ब्रह्मपुराण 220 32-33 (which reads गौरीं वाप्युद्वहेत्कन्यां नील &c. मत्स्य (207 39-40) calls this verse an ancient गाथा and reads as in ब्रह्मपुराण. Compare अत्रिस्मृति verse 55 for almost the same verse कांक्षन्ति पितर पुत्राञ्जरकापातभीरवः । गया यास्यति यः कश्चित्तोस्मान्सन्तारयिष्यति । करिष्यति वृषोत्सर्गमेडापूर्तं तथैव च । पालयिष्यति वृद्धत्वे श्राद्धं दास्यति चान्वहम् । बृह. q. by परा. मा. I. 2, p. 305.

they expect their descendants to do such as offering water in holy rivers, śrāddhas, going to Gayā, gifts of various kinds, construction of tanks, &c.

It is not, however, to be supposed that purely secular benefits to be derived from sons were not thought of at all. People were alive to them but those benefits were submerged under the flood of extravagant ideas about the spiritual benefits derived from sons. For example, the Br.[1224] Up. I. 5. 16, after mentioning the three worlds of men, *pitṛs* and gods, declares that the world of men can be won only through the son (while in I. 5. 17 there is eulogy of the son and instruction to him that he is Brahma, he is yajña, he is the heavenly world). Nār. IV 5 says[1225] "fathers wish to have sons on their own account thinking in their hearts 'He will free me from low and high debts'". Kāt. (551) has a similar verse and makes the meaning of Nār. clear[1226]. Vide above (under ṛnādāna pp. 416–417).

Besides the *aurasa*, eleven or twelve kinds of subsidiary sons are mentioned by most ancient smṛti writers. Āp. Dh. S. does not recognize any son except the *aurasa*. Āp. quotes certain verses which express the view of an ancient sage called Aupajanghani and which are also quoted by the Baud. Dh. S. according to which the aurasa was to be recognized as the only son (vide H. of Dh. Vol. II. p. 602 n 1417 for the quotation) Āp. II. 5. 13 10 emphasizes that there can be no real gift or sale of one's child (*dānam krayadhaḥ maścāpatyasya na vidyate*). But Āp. Dh. S. clearly shows that it knew that ksetraja sons were

raised and forbids that practice. In II. 6. 13. 1–5[1227] it states, 'sons begotten by a man, who approaches in the proper season a woman of equal caste that has not belonged to another man (as wife) and that has been married to him according to the śāstras, have the privilege to follow the occupations (peculiar to their castes) and to inherit property; if a man has sexual intercourse with a woman who had been married before to another or was not married legally to him or belongs to a different caste, they both incur sin and through that (i. e their sinfulness) the son also becomes sinful'. In II. 10. 27. 2–6 Āp. condemns the practice of *niyoga* 'a husband (or his elders) shall not appoint a wife who occupies the position of a *sagotra* to others (who are not sagotra), for they declare that a bride is given to the family (of the husband and not to the husband alone). This (practice of appointment) is forbidden (now) on account of the weakness of (men's) senses The hand of even a sagotra is (deemed in law to be) that of a stranger, as well as that of any other person (except the husband) If the marriage vow is violated, both (husband and wife) go to Hell.' Gaut. 28. 30–31, Baud. Dh S II. 2. 14–37, Vas 17. 12–38, Arthaśāstra III. 7, Śankha-Likhita (q by V. R. p 547), Hārita (q by V. R. p. 549), Manu IX. 158–160, Yāj. II. 128–132, Nār. (dāyabhāga 45–46), Kāt (q. by V. Nir pp. 434–435), Br. (S. B. E. vol 33 pp. 375–376 verses 33–35, 39–41), Devala (q by Haradatta on Gaut. 28. 32, Dāyabhāga X. 7–8 p 147, V. R p 550), Visnu Dh. S. 15 1–30, Mahābhārata (Ādiparva 120 31–34), Brahmapurāna (q. by Aparārka p. 737), Yama (q. by V. R p. 147 and D. C. pp. 80–81) enumerate the several *sons* in different sequences and sometimes under different names also Taking the order in the Manusmrti as the basis, the following table will, it is hoped, convey some idea about their number, rank and importance.

1228. The औरस is called स्वयंजात in आदिपर्व 120 33 I understand प्रणीत, परिक्रीत and स्वैरिणीपुत्र in the आदिपर्व to be the same as पुत्रिकापुत्र, क्षेत्रज and गूढज respectively. स्वयंजातः प्रणीतश्च परिक्रीतश्च यः सुत·। पौनर्भवश्च कानीन. स्वैरिण्यां यश्च जायते। दत्तः क्रीतः कृत्रिमश्च उपगच्छेत्स्वयं च य· । सहोढो ज्ञातिरेताश्च हीनयोनिधृतश्च यः। पूर्वपूर्वतमाभावं मत्वा लिप्सेत वै सुतम् । उत्तमाद्वेवरात्पुंस· काङ्क्षन्ते पुत्रमापदि । आदिपर्व 120. 33-35. I take ज्ञातिरेता· as an adjective of सहोढ and हीनयोनिधृतः as शौद्र It has to be noted that the अनुशासनपर्व (49 3-11) mentions 20 sons in all and employs a peculiar terminology in several cases, viz औरस (also called अनन्तरज), निरुक्तज (for क्षेत्रज), प्रसूतज (meaning अनियोगोत्पन्न), पतितात्स्वभार्यायां जात, and speaks of दत्त, क्रीत, अध्यूढ (=सहोढ), 6 अपर्यंसजs (i e अनुलोमs), कानीन and 6 अपसदs (चाण्डाल, व्रात्य, वैद्य, मागध, वामक and सूत). The Anusāsana (49. 11) expressly states that it is not possible to deny altogether the status of sonship to these sons (पुत्रा ह्येते न शक्यन्ते मिथ्या कर्तुं नराधिप) . It then says (49. 20-21) that when a boy is abandoned by his parents and he is brought up by another and his natural parents are not known, he belongs to the caste of the man who brings him up and that even for कानीन and अध्यूढ (सहोढ) sons samskāras are to be performed as if they were one's sons (49 25-26)

Viṣnu Dh. S. (15. 27) mentions 'yatra-kvacanotpādita' (procreated anywhere) as the 12th and last The com. Vaijayanti explains it in two ways: (1) procreated by a person on a woman, regardless of whether she is his own or another's wife or whether she is of the same caste or not, whether she is married or unmarried, whether her marriage has been consummated or not; (2) the son of a man from a śūdra woman not married to him. Even in the last sense he cannot be called *śaudra* (whom Manu IX. 178 and Yāj. I. 91 define as the son of a śūdra *wife* from a brāhmaṇa). Hārīta as quoted in the V R p 549 mentions a son called 'sahasā dṛsta' (seen by chance), who seems to be probably the same as kṛtrima The śaudra is omitted by several writers (even ancient ones) like Gautama, Kauṭilya and Hārīta Manu speaks of only twelve sons (IX. 158) and does not enumerate the putrikāputra among them, though he speaks of the putrikā (IX. 127 and 134 and elsewhere) as equal to the son It is therefore that Br. (S. B E. 33 p 375 verse 33) states that of the thirteen sons mentioned in succession by Manu the legitimate son of the body (*aurasa*) and the *putrikā* (the daughter appointed as a son) continue the family. Vas. 17. 12 emphatically declares (*dvādaśa ityeva putrāḥ purāṇadṛṣṭāḥ*) that only twelve sons have been noticed by the ancient (sages) and it is no doubt true that most writers generally enumerate twelve. A smṛti text quoted by Haradatta on Gautama and by the Dattaka-mīmāṃsā mentions 15 kinds of sons. Vide note below[1229]. The number is arrived at by counting the putrikā

1229 औरस· पुत्रिका बीजिक्षेत्रजौ पुत्रिकासुतः । पौनर्भवश्च कानीन सहोढो गूढसंभव· । दत्तः क्रीतः स्वयंदत्त. कृत्रिमश्चापविद्धकः । यत्र क्वचोत्पादितश्च पुत्रारण्या दश पञ्च च ॥ स्मृति q by हरदत्त on गौ. 28 32, दत्त मी. p 68. The compound बीजिक्षेत्रजौ is to be taken as बीजिज and क्षेत्रज. The word *bījin* is the epithet of the man who is appointed to beget issue in the practice of *niyoga*, the बीजिज being the son begotten by such a man, who (the son) is deemed by some to be the son of both (of the begetter and of the husband of the wife). Dr Jolly in Tagore Law Lectures on partition &c. p 146 is wrong in taking 'bījin' as 'the son procreated with another man's wife', 'Bījin' is employed by Gaut. IV 3 and Manu IX 51–53 in the sense given above Vide H. of Dh II p 599 n. 1409 for bījin, kṣetra (meaning wife) and *kṣetrika* तद्वत्परस्त्रियाः पुत्रौ द्वौ सुतौ कुण्डगोलकौ । पत्यौ जीवति कुण्ड. स्यान्मृते भर्तरि गोलक ॥ औरसः क्षेत्रजश्चैव दत्त· कृत्रिमकः सुतः । दद्यान्माता पिता वापि स पुत्रो दत्तको भवेत् ॥ पराशर IV. 23–24. Laghu-Āśvalāyana (21 14–15) says that though certain sages provide that the Kuṇḍa and Golaka sons should have the saṃskāras performed on them, that was the practice in other ages and that it is prohibited in the Kali age.

(daughter appointed as a son) and the putrikāputra (the son of the appointed daughter) as two, dividing the ksetraja into two viz. as the son of the begetter (*bījin*) and as the son of the wife (i. e. of the husband of the wife) and the son produced anywhere (as mentioned by Viṣṇu Dh. S.) is 15th and the last. The Parāśarasmṛti (IV. 23–24) mentions, besides Kuṇḍa and Golaka, only five kinds of sons.

It is necessary, before proceeding further, to give brief definitions of the twelve or thirteen kinds of sons from Manu and other writers The legitimate son (aurasa) is one begotten by a man on his own wedded wife of the same caste. The putrikāputra [1230] is of two kinds; (1) a sonless man may appoint his daughter as his son (she is then called *putrikā* and treated as a son); (2) or she may be given to a person in marriage with the stipulation 'I give you in marriage this brotherless girl decked with ornaments; the son born of her will be my son'. In this case the son born of the daughter so given becomes the son of his maternal grandfather. The *ksetraja* (the son of the wife) is one who is begotten on a man's wife (or widow) by a *sagotra* (agnatic kinsman) or by one not of the same gotra, according to the rules of *niyoga*, when the man himself is either dead or impotent or suffering from (an incurable) disease. That is the son given (*dattaka* or *dattrima*) whom his father or mother gives as a son affectionately in a time of distress with water and who is of the same caste (as the adopter). He is the son called *krtrima* (made) whom a man makes his son, the latter being of the same caste, being clever in distinguishing between right and wrong and being endowed with the qualities a son should possess He is the son born secretly (*gūḍhotpanna or gūḍhaja* as he is called by Baud. and Yāj), who is born in a man's house, it being not known who is his begetter; and he belongs to him of whose wife he is born. He is the son called *apaviddha* (cast off) whom a man receives as his son after he has been abandoned by his parents or by one of them. The *kānīna* (maiden's son) is one whom a maiden bears secretly in the house of her father and he belongs to him who marries her afterwards.

1230 पुत्रिकासुतो द्वेधा। तत्राद्यमाह वसिष्ठः (१७. १७)—अभ्रातृकां प्रदास्यामि तुभ्यं कन्यामलङ्कृताम्। अस्यां यो जायते पुत्रः स मे पुत्रो भविष्यति ॥ इति । अन्त्यमाह स एव—तृतीयः पुत्रिकैव—इति। अस्मिन्पक्षे कन्यैव पितुरौर्ध्वदेहिकादि कार्यम्। व्य. मयूख p. 107 In the first sense mentioned above in the text the word पुत्रिकापुत्र is dissolved as पुत्रिका एव पुत्रः (a कर्मधारय) and in the 2nd as पुत्रिकायाः पुत्रः (a तत्पुरुष compound). The मिता. on या II. 128 gives the same explanation.

The *sahodha* (received together with the bride) is the son born of a woman who was pregnant at the time of marriage, whether that fact was known or unknown (to the person marrying her) and he belongs to the person who weds the (pregnant) woman. The *krīta* (son bought) is one who is bought by a person from his father and mother for making the boy his son, whether the boy be equal or unequal (in qualities) The *paunarbhava* (the son of a remarried woman) is one to whom a woman, being abandoned by her husband or being a widow, gives birth after she contracts a second marriage of her own accord. He, who, having lost his parents or being abandoned by them without proper cause, gives himself to a man (as a son) is called *svayaṁdatta* (a son self-given). The son whom a brāhmana begets through lust from a śūdra wife is called pāraśava (or śaudra), since he, though living, is (like a) corpse.

The list of twelve or thirteen kinds of sons looks rather formidable, has puzzled and misled even great scholars into making all sorts of sweeping assertions and putting forward untenable theories about the origin and necessity of so many sons. For example, Dr. Jolly in his '*Recht und Sitte*' (English tr. p. 156) observes 'The twelve kinds of sonship, which to some extent are based on the illicit connection of the mother and for the greater part have nothing to do with the blood-relationship of the son with the father, are probably the most striking feature of Indian family law. The cause of this abnormal importance being attached to male issue is to be sought, according to the smrtis, in the offering of sacrifices to the *manes* which depends upon the male issue; yet, however, originally an economic motive was perhaps a more important factor in it—to get for the family as many powerful workers as possible' The learned writer appears to hold that the smrtis regarded all the secondary sons as equally competent to confer spiritual benefit and that at one and the same time a man could have all or most of them as sons. But he is mistaken in both these respects. The very definition of putrikāputra, ksetraja[1231] and dattaka given by many of the smrtis show that one who has already an aurasa

1231 अपुत्रोऽनेन विधिना सुता कुर्वीत पुत्रिकाम् । मनु IX. 127, पितोत्सृजेत्पुत्रिकामनपत्योऽपि प्रजापतिं चेद्दत्वाऽस्मादधंमपत्यमिति सवाच्य । गौ 28. 16, देवराद्वा सपिण्डाद्वा स्त्रिया सम्यङ्नियुक्तया । प्रजेप्सिताधिगन्तव्या सन्तानस्य परिक्षये ॥ मनु IX, 59, अपुत्रेणैव कर्तव्य पुत्रप्रतिनिधि. सदा । पिण्डोदकक्रियाहेतोर्यस्मात्तस्मात्प्रयत्नत. ॥ अत्रि 52 q. by दत्त. मी. p. 3 and दत्त. च. p. 2.

son, grandson or great-grandson could not have a putrikāputra, a ksetraja or an adopted son. If the definitions of all the 12 or 13 kinds of sons are carefully analysed, it will be quite apparent that the long list is due to the ancient writers' great *penchant* for divisions and sub-divisions based upon very slight differences of circumstances The several kinds can be classified into three or four groups as done by Devala.[1232] All the five sons called *dattaka, krīta, krtrima, svayamdatta* and *apaviddha* are sons who are affiliated by a person under various circumstances. There is no tinge of any illicit connection of the mother in any one of these, the one thing common to all of them being that they are the sons of one man and are treated by another as his. Similarly the *paunarbhava* and *śaudra* are the legal sons of the man himself, but there is opprobrium attaching to them, because in the first case the mother contracted a remarriage (which was very much condemned by the smrtis) and in the other a brāhmana married a śūdra woman (which also was looked down upon, if not absolutely forbidden as done by Yāj. I. 56) The *paunarbhava* son of a *dvija* is still called a dvija by Manu III. 181, but Manu only provides that he is not fit to be invited at a śrāddha. The putrikā (the daughter appointed as a son) is the man's own child and the putrikāputra also is the man's own grandchild and both these are special cases of adoption and no question of mother's illicit connection arises in these. So out of 13 kinds of sons, nine were entirely free from any taint of illicit connection. There remain only the four viz. ksetraja, gūdhotpanna, kānina, sahodha. The ksetraja was in a class by himself and was a survival of an ancient practice prevalent in many countries all the world over, which had been condemned in India by Āp. (as shown above on p 644) and his predecessors several centuries before the Christian era. It may, however, be pointed out that some medieval writers held the view that several secondary sons like the dattaka, krīta &c. could be had by a man having no aurasa son,[1232a]

1232 एते द्वादश पुत्रास्तु सन्तत्यर्थमुदाहृताः । आत्मजा. परजाश्चैव लब्धा याद्दच्छिकास्तथा ॥ देवल q by दायभाग X. 7 p. 147, वि. र. p. 550, हरदत्त on गौ 28. 32. The औरस, पुत्रिका, पौनर्भव and शौद्र would be आत्मज, the क्षेत्रज would be परज, the कृत्रक, कृत्रिम, क्रीत, स्वयंदत्त and अपविद्ध would be लब्ध (and also परज) and गूढज, कानीन and सहोढ may be called याद्दच्छिक.

1232a. Vide the वृत्तसिद्धान्तमञ्जरी of बालकृष्ण (D. C. Ms. No. 203 of 1886-92, folio 11b) 'तस्मादुक्तमकारेणोक्तविधेः काम्यत्वप्रसाधनद्वारा यावत्कामनासिद्धिपर्यन्तं पुत्रान्तरग्रहणस्य शास्त्रसिद्धत्वयोक्तं वृत्तादिभिः पुत्रैर्बहुपुत्रत्वं पितुः समर्थनमेवेति सिद्धान्तः ।

The chief concern of the *smṛtis* as shown clearly by the Anuśāsanaparva (*chap.* 49 quoted above on p. 645) and the com. of Nīlakaṇṭha was to provide for the maintenance and the performance of the saṃskāras of those children that may be either abandoned by their parents or may be under the cloud of illegitimacy.

There is great confusion and contradiction among the sūtras and smṛtis about the place of the several kinds of sons and about their rights. For example, Gautama (probably the most ancient among extant *sūtrakāras*) assigns the 10th place to the putrikāputra, while Baud., Kaut., Yāj, Bṛ. and Devala give him the 2nd place and Vasiṣṭha, Śaṅkha-Likhita, Nār, and Viṣṇu put him 3rd. The *datlaka* is placed very low in the list by most works except by Manu, Gaut, Baud., Br. and Brahmapurāṇa (which put him 3rd or 4th). The 12 kinds are put in two groups by some works. Gaut. (28. 30-31) provides that the aurasa, kṣetraja, datta, kṛtrima, gūdhotpanna and apaviddha are *rikthabhājaḥ* (take the wealth) and also belong to the *gotra* of the man whose sons they are, while the other six take only the gotra but not the wealth. Baud. Dh. S. (II. 2. 36-37) employs the same words *rikthabhājaḥ* and *gotrabhājaḥ* but differs from Gaut. in including putrikāputra among 'rikthabhājaḥ' and omitting him from the group of 'gotrabhājaḥ'.[1233] Another division (each having six kinds) is into *bandhu-dāyāda* or *dāyādabāndhava* (Manu IX. 158-159 and Nār. dāyabhāga 47) and *adāyādabāndhava* (Manu IX. 160, Vas. 17. 38, Nār. dāyabhāga. 47) The first group, acc. to Manu, comprises aurasa (also putrikā), kṣetraja, datta, kṛtrima, gūdhotpanna and apaviddha They are so called because they take the wealth of their father and also of his kinsmen (in the absence of nearer heirs), while the members of the 2nd group (which acc. to Manu IX. 160 comprises kānina,

1233. पुत्रा औरसक्षेत्रजकृत्रिमगूढोत्पन्नापविद्धा रिक्थभाजः। कानीनसहोढपौनर्भव-पुत्रिकापुत्रस्वयंदत्तक्रीता गोत्रभाजः। गौ 28 30-31; एते गोत्रभाजो गोत्रमेव केवलं भजन्ते न रिक्थम्। पूर्वे तु रिक्थभाजो गोत्रभाजश्चौरसेन सहाभिधानात्। सर्वे चैते सजातीयाः। हरदत्त. What is meant by रिक्थभाजः is not quite certain. *Does it mean* 'they take the wealth of their father and of his kinsmen' *or does it mean* 'they take the wealth of their father alone and of no *one else*' देवल appears to hold that बन्धुदायाद has the first sense तेषां बन्धुदायादाः पूर्वेषां पितुरेव यद्। देवल q. by दायभाग X 7 p 147 Both the मिता on या II 132 and the दायभाग explain बन्धुदायाद in the first of the two senses set out above. 'औरसादयः यद् न केवलं पितुर्दायहराः किन्तु बन्धूनामपि सपिण्डादीनां दायहराः। अन्ये परभूताः पितुरेव पर दायहरा न सपिण्डादीनाम्। दायभाग X. 8 p. 147. स्वयजातः पितृबन्धूनां च दायादः। परे जातः संस्कर्तृरेव न बन्धूनाम्। अर्थशास्त्र III. 7.

sahodha, kṛita, paunarbhava, svayamdatta and śaudra) are only bāndhavas (i. e belong to the gotra of their father), but cannot succeed to the wealth of their father's kinsmen. Here also there is no agreement among the smṛtis. Vas. (17. 5–25), Śankha-Likhita (q. in V R p 247), Nār. dāyabhāga 47 and Hārīta include in the first group aurasa, kṣetraja, putrikāputra, paunarbhava, kānīna and gūdhaja and the rest in the 2nd group. Kaut asserts that only the aurasa son succeeds as heir to the kinsmen of his father while the others (that are not procreated by him) succeed only to the father who brings them up, but not to his kinsmen Yāj II. 132 states that each of the twelve kinds mentioned by him takes the wealth of the father and offers *piṇḍa* to him in default of the preceding one and further requires that this is so only if it is certain that the sons are of the same caste as that of the father. Gaut. 28. 32 states that[1234] the kānīna and the other sons called *gotrabhājah* (in 28. 31) take only one fourth of the estate of the father if no aurasa nor any of the other sons called *rikthabhājah* exists (and the rest of the estate is taken by the sapindas), while Kaut, Devala and Kāt. (857) state that the dattaka, kṣetraja and other kinds of sons are entitled to one third share only if an aurasa is born provided they are of the same *varṇa* and that if they are of a different caste, they are only entitled to food and raiment. If a man, having no son, made his daughter a putrikā or thinking himself to be impotent had a kṣetraja son or adopted a son and then an aurasa son was born, difficult questions of the distribution of his property arose on which there was no unanimity. Manu IX. 163 says that only the aurasa son is entitled to all the paternal wealth and all the other kinds should be given maintenance in order to avoid the fault of being cruel. But as regards the case where a putrikā is first made and then an aurasa is born Manu (IX. 134) prescribes that these two should divide the paternal estate equally,[1235] while

1234. चतुर्थांशिन औरसाद्यभावे । गौ. 28 32 ; तेषां सवर्णा ये पुत्रास्ते तृतीयांशभागिनः । हीनास्तदुपजीवेयुर्ग्रासाच्छादनसभृता. ॥ देवल q by दायभाग X 7. p 147, उत्पन्ने त्वौरसे पुत्रे चतुर्थांशहरा· स्मृता· । सवर्णा असवर्णासु ग्रासाच्छादनभाजनाः ॥ कात्या. q. by मिता. on या II. 132 दायभाग X. 13 p. 148 and वि. चि p 150 read तृतीयाशहरा· in कात्या. ; औरसे तूत्पन्ने सवर्णास्तृतीयाशहरा· । असवर्णा ग्रासाच्छादनभागिनः । अर्थशास्त्र III. 7. The मदनरत्न (folio 93*b*) says कल्पतरु read 'तृतीयांशहराः'

1235 बृहस्पति appears to combine Manu IX 163 and 134 'एक एवौर पित्र्ये धने स्वामी प्रकीर्तितः । तद्वृत्त्या तु स्त्रियः सर्वा भर्तव्यास्त्वपरे स्मृताः ॥ q. by वि. p. 541, स्मृ. चं. p. 427, मदनरत्न, folio 93b)

Manu IX. 164 asks the aurasa to give 1/5 or 1/6 of the paternal wealth to the ksetraja This confusion and contradiction about the places and the shares of the several sons leads one to infer that the institution of several kinds of sons was not very common or generally recognized, was rather confined to some localities or communities and was dying out even in the times of the ancient smrtis, if it ever existed in full force at all at any time.

As regards gūdhaja, kānIna and sahodha there is this to be said. They were the result of illicit connection; but some one had to maintain them, to bring them up and be their guardian. The smrtis when they assign these as the sons of the husbands of the women of whom they are born are really providing for these matters of maintenance and guardianship. Br. says that dattaka, apaviddha, krIta, krta, and śaudra, if of pure caste and pure actions, are middling, while the ksetraja, paunarbhava, kānIna, sahodha and gūdhaja are condemned by the good (S B. E. 33 p. 376 verses 40–41).[1236] The kānIna was to be under the guardianship of the father of the girl (Yāj. II. 129) till she remained unmarried, but when she married the damsel's son came under the dominion of the person who married her (Manu IX. 172). The very fact that the kānIna was assigned to the husband who married the girl shows that this was done because it was deemed that by marrying such a girl the husband condoned her past lapses. Similarly in the case of *sahodha*, it was deemed that either the child must have been procreated by the husband himself before marriage or that he condoned the conduct of the wife. It appears to have been thought that when the husband (the party most concerned) did not openly object it was not open or allowable for any one else even by proof that the child was kānIna or sahodha to call

1236. वृत्तोपविद्धः क्रीतश्च कृतः शौद्रस्तथैव च। जातिशुद्धाः कर्मशुद्धा मध्यमास्ते स्मृता मताः॥ क्षेत्रजो गर्हितः सद्भिस्तथा पौनर्भवः स्मृतः। कानीनश्च सहोढश्च गूढोत्पन्नस्तथैव च॥ बृहद्. q. by वि. र. p 552; हारीत (q by वि र. 552) designates क्रीत, स्वयंदत्त and शौद्र as काण्डपृष्ठ शूद्रापुत्राः स्वयंदत्ता ये चैते क्रीतकास्तथा। सर्वे ते शौद्रिकाः पुत्राः काण्डपृष्ठा न संशयः॥ स्वकुलं पृष्ठतः कृत्वा यो वै परकुलं व्रजेत्। तेन दुश्चरितेनासौ काण्डपृष्ठो न संशयः॥ The 2nd verse is quoted by अपरार्क p 455 नारद IV 60 calls a ब्राह्मण who persists in the profession of arms after a season of distress is over काण्डपृष्ठ. The अनुशासनपर्व 23 22 has that word. कुल काण्डमिति ख्यात यस्माद् बाणाः ते जहुः। तत्र ज्येष्ठतरो य. स्यात् स वै काण्डं विनिर्दिशेत्। यम q by व्य म. p 486 which also quotes the verse स्वकुल° from यम and हारीत both separately काण्डपृष्ठ literally means one who carries on his back arrows' (i. e probably a brāhmaṇa whose profession is that of a soldier).

for the abandonment of the child. Similar remarks apply to the gūḍhaja As shown in H. of Dh vol. II pp. 571–573 if the wife was guilty of adultery the husband had certain powers of correction over the wife, but if he chose to be complaisant, then the smṛtis did not compel him to disown or abandon the child. These very smṛtis (like Gautama, Vas , Nār.) that are very harsh on women for adultery allow the gūḍhaja, kānīna and sahoḍha to be secondary sons. So the only way in which these two attitudes can be reconciled is by holding that when the husband condones moral lapses on the part of the woman whom he had accepted as his wife the smṛtis provide for the maintenance, guardianship and succession of such offspring of illicit connection. Even among medieval commentators there was divergence about paunarbhava, kānīna, sahodha and gūḍhaja; Medhātithi on Manu IX. 181 holds that they are entitled to nothing but food and raiment in any case, while the Mit. (on Yāj. II. 132) holds that even the kānīna and the rest take the father's wealth in default of aurasa and the other kinds of sons. The Mit. (on Yāj. I. 90) however holds that kānīna, sahodha and gūḍhaja being the outcome of adultery cannot be savarna with the husband of their mother, are really different from savarna sons and even anuloma and pratiloma sons.

A good deal can be said about the spiritual benefit supposed to be derived from secondary sons.

The high eulogy bestowed on the son in the Vedic and smṛti literature has reference only to the *aurasa* son. Manu IX. 180 asserts that the eleven kinds of sons viz. kṣetraja and the rest (except aurasa and putrikā) are merely substitutes for the real son, admitted to prevent the cessation of religious rites and in IX. 181 Manu states the final conclusion that such sons as the *kṣetraja* that are procreated from the seed of others really belong to him from whose seed they spring and not to the other man (who takes them up). Br [1237] (S B E. 33 p. 375 verses 35–36) declares: 'thirteen sons were enumerated in

1237. पुत्रास्त्रयोदश प्रोक्ता मनुना येऽग्रपूर्वशः । सन्तानकारणं तेषामौरसः पुत्रिका तथा ॥ आज्ये चिना यथा तैल सन्निधिः प्रतिनिधि स्मृतम् । तथैकादश पुत्रास्तु पुत्रिकौरसयोरिना ॥ बृहस्पति q. by अपरार्क p 735, व्यव. नि. p. 439. The 2nd is attributed to बृहद्बृहस्पति by कुल्लूक on मनु IX. 181 The कृत्यरत्नाकर (p. 73) quotes मैत्रायणीयपरिशिष्ट as follows 'आज्याभावे तैलं प्रतिनिधिरलाभे दधिपयसी तदलाभे तण्डुलपिष्टानि वान्द्रि संसृज्याज्यार्थे कुर्वन्ति ' The सन्यासाष्टकभाष्यतत् III 1 provides: यथा दुग्धलाभे सर्पिषोऽभावे तैलम्

order by Manu, out of whom only the aurasa and putrikā are the cause of propagating the line. Just as oil is declared by the good to be a substitute (in sacrifices) in the absence of clarified butter, so the eleven kinds of sons in the absence of *aurasa* and *putrikā*[1238] (are admitted merely as substitutes and not the real thing).' Although Yāj. II. 132 declares that each succeeding one out of the twelve kinds of sons takes the estate in the absence of each preceding one and offers *piṇḍa* to the deceased owner, yet the efficacy of the pindas offered by the several sons was deemed to differ very much. Manu leaves no room for doubt on this point when he says (IX. 161) 'a man desiring to cross beyond the gloom (of bad worlds, hells) through (or with the help of) bad sons (such as the *kṣetraja*) secures a result similar to what a person crossing (a sheet of) water in a leaking boat secures'. The idea is that secondary sons cannot confer the same spiritual benefit as the *aurasa* son can Medhātithi on Manu IX. 166 and the D. M. explain this very clearly. An aurasa son confers the highest spiritual benefit. The substitute sons (as indicated by the very use of the word *pratinidhi*) confer a much less benefit. Even a man's widow can perform his śrāddha if he be sonless, but as she could not offer the *pārvaṇa śrāddha* her act was not deemed to be as efficacious as a *śrāddha performed by a son.*[1239] Jaimini devotes several sūtras to the subject of *pratinidhi* (a substitute) in VI. 3. 13-41. The main conclusion established is that generally speaking there can be no substitute as regards the *devatā* (the deity to which a particular offering is directed by the Veda to be offered in a particular sacrifice), the fire (āhavanīya and other consecrated fires), the *mantra* (which is to accompany a particular offering) and certain rites specifically prescribed to be done in a sacrifice (such as 'samidho yajati' in Darśa-pūrṇamāsa) and the *svāmin* (the sacrificer) On Jaimini VI.

1238. कानीनसहोढपौनर्भवगूढोत्पन्ना न रिक्थभाजः दत्तकादयस्तु रिक्थभाजोऽस्यौरसे कानीनादयश्च सत्यौरसे न पितृधनहराः ग्रासाच्छादनभाजः केवलं सत्यसति चौरसे। मेधा. on मनु. IX. 181; औरसाभावे तु कानीनादीनामपि सकलपित्र्यधनग्रहणमस्त्येव। पूर्वाभावे परः परः—इति वचनात्। मिता. on या II. 132.

1239. यद्यपि पुत्राभावे तु पत्नी स्यादित्यादिना पत्न्यादीनामपि क्रियाधिकारः श्रूयते तथापि नापुत्रस्य लोकोऽस्तीत्यादिश्रवणात् पुत्रकृतक्रियाजन्या लोका न कयादिकृतक्रियया जन्यन्त इत्यवश्यं वाच्यम्। ... उक्तं च मेधातिथिना। यद्यौरसस्य प्रथमकालिपकत्ववचनं तत्र व्यवहारोपयोगि किं तु उपकारातिशयाय। यथौरसो भूयांस शक्नोत्युपकारं कर्तुं न तथेतर इति। उपकारापचयाभिप्रायश्च प्रतिनिधिष्वपहार इति। दत्त. मी. pp. 38-39 The passage quoted from मेधा occurs in his भाष्य on मनु IX. 166 (with slight variations)

3. 35 Śabara makes[1240] it clear that in employing a *pratinidhi* the vedic rite becomes deficient and does not yield the full reward of the religious act. The Satyāsāḍha Śr S. III. 1. asserts[1241] that there can be no substitute for the sacrificer, the wife, the son, the place, time &c. (prescribed by the Vedic texts for any rite) Therefore it is clear that there was difference of view among very ancient writers about the spiritual benefit to be derived from substitute sons. The natural human tendency to simplify matters and water down strict injunctions prevailed and it began to be thought that even subsidiary sons conferred some spiritual benefit (though not as much as the aurasa son) For about two thousand years the ksetraja and other sons have been prohibited by the smrtis. For example, Br states that Manu first describes the procedure of *niyoga* and then forbids it, that it is impossible to practise *niyoga* in the *dvāpara* and *kali* ages owing to the deterioration in man's knowledge and *tapas* (vide H. of Dh vol. II. p. 603 n. 1418 for the quotation). The passage from Śaunaka forbidding sons other than *aurasa* and *dattaka* in the Kali age quoted by Aparārka and others has been cited above (n. 1131).

A few remarks will be made on each of the several sons.

Aurasa. Baud. Dh. S. II. 2. 14, Manu IX. 166, Vas 17. 13, Visnu Dh. S. 15 2, Kaut. III. 7 and others define the aurasa as the son procreated by a man himself from his wife married acc. to sacramental forms prescribed by the śāstra From Āp. (quoted above in n. 1227) and Baud it follows that the aurasa is only the son procreated on a wife of the same varna as that of the husband; but this was the purists' view. Others including

1240 अभावे हि श्रुतस्यानुकल्पः प्रतिनिधिः। श्रुते हि सकला व्यक्तयः। प्रतिनिधौ विकलाः। शबर on जै VI 3 35.

1241 न स्वामित्वस्य भार्यायाः पुत्रस्य वेशस्य कालस्याग्नेर्देवताया. कर्मणः शब्दस्य च प्रतिनिधिर्विद्यते। सत्याषाढश्रौत III. 1 The D. M. (pp 33-34) explains this sūtra about there being no प्रतिनिधि in place of a son by saying that it is restricted to certain śrauta matters only such as the 'Pitāputriya sāman', or the uttering of a benediction in the words 'tantave jyotismatīm &c' and that if the sūtra were taken as forbidding a substitute for a son everywhere, it would be opposed to Manu (IX. 180 पुत्रप्रतिनिधीनाहु) and Atri यद्यपि 'न स्वामित्वस्य .. प्रतिनिधि.' इति सत्याषाढवचनेन पुत्रप्रतिनिधिनिराकरणं तत् 'तन्तवे ज्योतिष्मती तामाशिषमाशासते' इत्यादौ अपुत्रस्य पुत्रप्रतिनिधिं कृत्वा आशीराशंसननिवृत्त्यर्थम्। अत एव श्रुतिः यस्य पुत्रो जातः स्यात् तन्तवे ज्योतिष्मतीमिति ब्रूयात्। ... न पुन सर्वथैव पुत्रप्रतिनिधिनिराकरणार्थम्। पुत्रप्रतिनिधि कर्तव्य· पुत्रप्रतिनिधीनाहुरित्यादिस्मृतिविरोधात्। वृत्त. मी. pp. 33-34. Vide तै सं. I. 5. 8.

such medieval works as the Mit. (on Yāj II. 133), the Pārijāta and Aparārka hold that even the son procreated on a wife married in the anuloma order[1242] (e. g. the son of a brāhmana from a ksatriya wife or of a ksatriya from a vaiśya caste wife) was also *aurasa* The exception was the son of a brāhmana from a śūdra wife, who was called *śaudra* or *pārasava* and distinguished from the technical aurasa. From the definition of aurasa given by all smrti writers (and the dicta of such commentaries as the Mit) it follows that in order to be an aurasa the procreation and the birth of the son must both be after the marriage But the Privy Council held long ago in *Pedda Amani* v *Zemindar* of *Marungpuri* (1 I. A. 282, 293) that procreation after marriage is not distinctly necessary for legitimacy as a son even according to the ancient texts, that to hold so would be an inconvenient doctrine and that the Hindu Law is the same in that respect as the English Law.[1243]

From the times of the Rgveda people prayed for the birth of an *aurasa* son and did not like to adopt the son of another. A Rgvedic poet exclaims (VII. 4. 7-8) 'As the wealth (son)

1242 स्वयजातः कृताक्रियायामौरसः । अर्थशास्त्र III 7, सवर्णायां संस्कृतायां स्वयमुत्पादितमौरस पुत्रं विद्यात् । बौ. ध. सू. II 2 14, 'सवर्णा हिजस्य द्विजा, शूद्रस्य शूद्रा, न तु ब्राह्मणस्य ब्राह्मणी क्षत्रियस्य क्षत्रिया, अन्यथा ब्राह्मणपरिणीतक्षत्रियापुत्रादेर्द्वादशपुत्रान्तर्भावो न स्यादिति पारिजात । वि र. p. 554, 'तथानुलोमजाना मूर्धावसिक्तादीनामौरसेष्वन्तर्भावात्तेषामप्यभावे क्षेत्रजादीना दायहरत्वं बोद्धव्यम् । शूद्रापुत्रस्यौरसोऽपि कृत्स्न भागमन्यभावेपि न लभते । यथाह मनु (९ १५४) । मिता on या II 133, अन्येष्वनुलोमजेष्वौरसेषु सत्सु न प्रतिनिधिरस्ति । अपरार्क p 740 Vide मद् पा p 651 for the same views The मदनरत्न (folio 93a) however remarks, 'सांप्रत मूर्धावसिक्तादीनां प्रचाराभावेन नेह प्रपञ्चित' Vide *n* 1130 above The position of the Mit is somewhat remarkable The Mit. admits that niyoga is not allowed in the present Kali age (vide above p 628) and it quotes a smrti text to that effect, but it allows the sons of anuloma marriages to be aurasa and to succeed before every other kinds of sons Therefore it follows that the Mit. either did not know the passages of Saunaka and of the Nāradiyapurāna (pūrvārdha 24 13) which forbade marriage with *asavarna* girls for the twice-born classes in the Kali age or did not hold them to be authoritative द्विजानामसवर्णासु कन्यासूपयमस्तथा । एतान्धर्मान् कलियुगे वर्ज्यानाहुर्मनीषिणः ॥ बृहन्नारदीयपुराण (पूर्वार्ध 24. 13 and 16)

1243 As this is a decision of the highest tribunal for British India it must be taken to be the law The Privy Council was probably influenced by the description of such secondary sons as the sahodha The decision is in accordance with English Law and section 112 of the Indian Evidence Act. Vide Dr Bannerjee's 'Marriage and stridhana' p. 177 for criticism of the P. C. decision

of another (who is unconnected) is to be avoided, so may we be masters of wealth of our own (i. e. son of our body); O! Agni, the child of another cannot be one's offspring; it may be so in the case of the fool; do not spoil our path. A stranger, born of another's loins, though very pleasing, should not be taken, should not be even thought of in the mind (as one's son). Then he goes back to the same house (from which he came); may a vigorous, victorious, newly born son come to us!"[1244]

In modern times the courts generally recognize only two kinds of sons, viz *aurasa* and *dattaka*, the other kinds of sons being held to be long since obsolete. Vide *Nagindas v. Bachoo* 43 I. A. 56, 67. But two more kinds of sons have been recognized in modern times in certain provinces only, viz. the kṛtrima in Mithilā (modern Tirhoot) and the putrikāputra among the Nambudri brāhmaṇas of Malabar, both of which will be dealt with below.

Putrikāputra. The two meanings of this word given by the Mit. and others relying on Vas. have been stated above (p. 647) Kaut III. 7, Yāj. II. 128, Manu IX. 134 declare the putrikā or putrikāputra to be equal to the aurasa son. The conception underlying the putrikā has a hoary antiquity. There are traces of the putrikā in the Ṛgveda itself. Vas[1245] XVII. 16 refers to

1244. परिषद्यं ह्यरणस्य रेक्णो नित्यस्य रायः पतयः स्याम । न शेषो अग्ने अन्यजात-मत्यन्तचेतानस्य मा पथो वि दुक्षः ॥ न हि ग्रभायारणः सुशेवोऽन्योद्यौर्यो मनसा मन्तवा उ । अधा चिद्दोकः पुनरित्स एत्या नो वाज्यभापाळेतु नव्यः ॥ ऋ. VII 4. 7-8. The verses are rather obscure, particularly the first one The meaning given above is that of such an ancient writer as Yāska in Nir. III 1-3 He says that these two verses support the view that the son belongs to the begetter (and not to the adopter): 'तद्यथा जनयितुः प्रजा एवमर्थीये ऋचावुदाहरिष्याम । परिषद्य० ।.' Compare आप. ध. सू. II 6 13. 5 'उत्पादयितुः पुत्र इति हि ब्राह्मणम्। The निर्णय-सिन्धु says that the verse (न हि ग्रभाय) does not really mean to prohibit the adoption of sons but is intended to extol the aurasa, as otherwise it would be opposed to the indications contained in the story of the acceptance of Śunaḥśepa as a son and to the words of the latter 'may I become your son', योपि न हि ग्रभाया . . मन्तवा उ—इति श्रुतौ दृत्तकनिषेध. सोप्यौरसातिशयार्थ', अन्यथा शुन शेपादिप्रतिग्रहश्रौतलिङ्गविरोधापत्तेः । उपेयां तव दृत्ताभिरित्युक्तेः । नि. सि. III पूर्वार्ध p 250 उपेयां तव दृत्ताम् are the words of शुन.शेप in ऐ. ब्रा. 33. 5

1245. विज्ञायते अभ्रातृका पुंसः पितॄनभ्येति प्रतीचीनं गच्छति पुत्रत्वम् । वसिष्ठ 17 16: अभ्रातेव पुंस एति प्रतीची गर्भाऋंगिव सनये धनानाम् । जायेव पत्य उशती सुवासा उषा हस्रेव नि रिणीते अप्स ॥ ऋ. I. 124. 7. the निरुक्त (III 5) comments 'अभ्रातृकेव पुंस' पितॄनेत्यभिप्रेत्य सन्तानकर्मणे पिण्डदानाय न पतिम् । ... उषा हसना इव दृन्तान् विद्यु-एते रूपाणि ।'. अमूर्या यन्ति योषितो हिरा लोहितवाससः । अभ्रातर इव जामयस्तिष्ठन्ति एतवर्त्तवे ॥ अथर्ववेद 1 17. 1. The निरुक्त III. 4 reads अभ्रातर इव योषास्तिष्ठन्ति एतवर्त्तवे, and explains अभ्रातृका इव योषास्तिष्ठन्ति सन्तानकर्मणे पिण्डदानाय एतवर्त्मानः। इति अभ्रातृकाया अनिर्वाद औपमिकः ।

Rg. I. 124. 7 in connection with putrikā. That verse contains four similes in describing the advent of *Uṣas* (Dawn) 'As a woman that has no brother comes back to (her) male relations,... like a smiling damsel the Dawn unmasks objects (or her beauty)'. The Nirukta (III. 5) explains the first quarter as meaning that a brotherless maiden (after marriage) comes back to her paternal line for continuing that line and for offering *piṇḍas* (to her paternal ancestors) and does not go to her husband's line. The Rg. in several places refers to the difficulty of getting brotherless maidens married and to the fact of their remaining in their father's house as old maidens; vide Rg II. 17. 7 '*amājūr-iva pitroḥ sacā satī*' and IV. 5. 5. The Atharvaveda I. 17. 1 states 'like brotherless sisters let these stand still with their splendours gone'. Yāska explains that, as brotherless maidens, when married, bar the way to the continuance of the family of their husbands and to offering of pindas (through their son), so are these red arteries &c. Yāska (Nirukta III. 4) relies for the appointment of a brotherless daughter as a son upon another very obscure verse of the Rg. (III. 31. 1)[1216] 'the husband declares (or promises) that the father may regard (the daughter's son) as his son's son'. The Nirukta[1217] (III. 5) quotes a Vedic text 'one should not marry a brotherless (girl), for she becomes (her father's) son' and holds that it expressly prohibits marriage with a brotherless maiden and also declares that such a girl becomes a son to her father. The brotherless maiden is appointed as a son by express agreement, but according to Gautama 28. 17 the opinion of one school (which he does not approve) was that a brotherless girl became a putrikā by the mere unilateral intention of the father and therefore one should not marry a brotherless maiden for fear that the father (without expressly stipulating so) might intend her to be putrikā. Manu III. 11 contains a similar caution. This recommendation not to marry a brotherless maiden continued down to the days of Yāj. (I. 53 'arogiṇīm bhrātṛmatīm'), though in modern times many would prefer to marry such a girl, provided the father was well-off. Manu IX. 140 states that the

1246. शासद्वहिर्दुहितुर्नप्त्यं गाद्वेः ऋतस्य दीधितिं सपर्यन् । पिता यत्र दुहितुः सेकमृञ्जन् स शम्भ्वैन मनसा दधन्वे ॥ ऋ III 31 1. The निरुक्त III 4 explains प्रशास्ति वोढा सन्तानकर्मणे दुहितुः पुत्रभावम् । . नप्तारमुपागमद् दौहित्रं पौत्रमिति ।.

1247. नाभ्रातृकां पश्येच्छ्रोत्रियस्य तद्धवति—इति अभ्रातृकाया उपयमनप्रतिषेधः प्रत्यक्षः पितुश्च पुत्रभावः । निरुक्त III 5 विश्वरूप on या I. 53 states that नाभ्रातृकाम् &c. is a text of the Bhāllavins मेधा० on मनु IX 132 quotes नाभ्रातृकां ... तद्धवति. अभिसन्धिमात्रात्पुत्रिकेत्येकेषाम् । तत्सशयाकोपयच्छेदभ्रातृकाम् । गौ. 28. 17-18.

three pindas that the putrikāputra offered were respectively to his mother, to the mother's father and to the mother's paternal grand-father.

The putrikāputra is no longer recognised anywhere in India except among the Nambudri brāhmanas of Malabar. Vide *Tnakoor Jeebnath v. Court of Wards* 2 I. A. 163, 167, *Babu Rita v. Babu Puran* 1 Pat. L. J. 581, *Kumaran v. Narayanan* 9 Mad. 260, *Chemnauth v. Palakuzhu* 25 Mad. 662, 31 Mad. 310. It appears that even a Madras authority like the Smrticandrikā[1248] was not aware of the prevalence of the putrikāputra in Malabar.

Ksetraja This kind of son arose from the practice of *niyoga*. The origin of this practice and the limitations under which it was allowed have been dealt with at length in H. of Dh. vol. II pp 599–607. One matter not mentioned therein is this that the Brahmapurāṇa states that ksetraja sons were very common among ksatriyas since they had no progeny either because they were cursed (by sages for their misdeeds) or because they were constantly engaged in war.[1249] The Baud. Dh. S. II. 2. 21–23 and Kauṭ. III. 7 declare the ksetraja to be the son of two fathers, to have two *gotras* and to offer pindas to both fathers (provided there is no aurasa son born subsequently) and to take their wealth and that in offering each pinda they have to associate it with two names.[1250] It is to be noted that the Mit. on Yāj. II. 127 introduces the ksetraja as dvyāmusyāyana, although that word, as will be seen later on, has another significance also. The Madanapārijāta (p. 651) also regards ksetraja and dvyāmusyāyana as synonyms. The Vivādatā..dava (folio 122) states that the dvyāmusyāyana and sons of intercaste marriages being forbidden in Kali it does not enter into any discussion about the rules of allotting shares to them.

1248 अत्र एवाद्यानभिसम्बन्धेनोक्ताः। वृत्तक्षेत्रेषां गोणपुत्राणां पुत्रिकायास्तत्सुतस्य च भागविधयो न निरूप्यन्ते संप्रत्यननुष्ठीयमानत्वाद् वृथा च ग्रन्थविस्तारापत्तेः। स्मृतिच. II. p 289. Vide n 1130

1250 स एव द्विपिता द्विगोत्रश्च द्वयोरपि स्वधानिरूपभाग्भवति। अथाप्युदाहरन्ति। द्विपितृ पिण्डदान स्यात् पिण्डे पिण्डे च नामनी। त्रयश्च पिण्डा पञ्चमं स्वरेण कुर्वन्ति सूरयः इति। या ध सू II 2. 21–23. जनयितुरन्यस्मिन्क्षेत्रे स एव द्विपितृको द्विगोत्रो वा द्वयोरपि स्वधानिरूपभाग्भवति। अथशब्द III 7, 'द्वयोर्मुख्यायणस्य विजातीयानां च विभागे विशेषः कालायनकोऽभिधीयते' वि. ता. folio 122.

Dattaka. This will be dealt with separately later on.

Kṛtrima—(or *krta*, as in Nār. dāyabhāga 46). According to Manu IX 169, Yāj. II. 131, Baud. Dh. S II. 2 25 and the Mit. and other works a krtrima is a person (of the same caste as the adopter) who has no parents and who is adopted with *his own consent* by the tempting offer of wealth He is distinguished from the *dattaka* by the fact that he is not given by the father or mother and by the fact that his own consent is necessary (so that he must be major according to the ancient Hindu Law). Such a son is recognized in modern times only in Mithilā (Tirhoot) and the adjoining districts and among the Nambudri brāhmanas of Malabar (as held in *Vasudevan v Secretary of State* 11 Mad. 157). Considerable case law exists about the krtrima adoption, for which Mulla's Hindu Law pp 563-564 (9th ed) and Mayne's Hindu law (10th ed.) pp 293-294 may be consulted.

Gūḍhaja. There is probably a reference to such a son in the Ṛg. II 29. 1[1251] 'O! Ādityas, that uphold the moral law, that are always active, keep away from me sin as a woman giving birth to a child in secret (removes it)'.

Kānīna. This word is derived from the word 'kanyā' (a maiden). Pānini IV. 1 116 (*kanyāyāḥ kanīna ca*) derives the word in the sense of "child of a maiden" and the Kāśikā gives Karna and Vyāsa as instances of kānīna sons The word kānīna occurs in the Atharvaveda V. 5. 8 and *kumārīputra* occurs in the Vājasaneyasamhitā 30. 6. Nār. (dāyabhāga 17)[1252] says that the kānīna, sahodha and gūdhaja are the sons of the man who marries the mother of these and they take the wealth of the husband of their mother. The Pārijāta (q by V. R. p. 565) states that the kānīna and sahodha become the sons of their mother's father if the latter is sonless, but if he has a son then they become the sons of the husband of their mother and if both have no sons then they become the sons of both.

Krīta—(the son bought). Vas. (17. 30-32) states that Hariścandra purchased Śunahśepa from Ajīgarta and that

---

1251. धृतव्रता आदित्या इषिरा आरे मत्कर्तं रहसूरिवागः। ऋ II. 29 1.

1252. कानीनश्च सहोढश्च गूढाया यश्च जायते। तेषां वोढा पिता ज्ञेयस्ते च भागहराः स्मृताः॥ नारद, दायभाग 17, on this वि र p 565 states 'अथापुत्रो यदि मातामहस्तदा तस्य पुत्र. कानीनः सहोढश्च। सपुत्रश्चेत्तदा वोढु', उभयोरपुत्रत्वे चोभयोरिति पारिजात'।. The मद्. पा p 562, however, says about कानीन 'तत्र वोढुरित्युपादानाद्विवाहिता चेत्तदा वोढुर्नो चेन्मातामहस्येत्येतदवगम्यते'.

Śunahśepa was a krīta son. *Svayaṁdatta*—Vas. (17. 33–35) says that Śunahśepa became the svayamdatta son of Viśvāmitra as stated in the Ait. Br. (referred to above in n. 1244). *Paunarbhava* (the son of a *punarbhū*)—vide H. of Dh. vol. II. pp. 608–610 for the meaning of punarbhū and the remarriage of widows (pp. 611–621).

CHAPTER XXVIII

DATTAKA (adopted son)

No branch of Hindu Law in modern times has been so fruitful in litigation as adoption. There are instances, where, fifty years after a point in the law of adoption was deemed to have been settled by a Full Bench decision, the Privy Council intervened and overruled the Full Bench decision in spite of its usual practice to follow the rule of *stare decisis*. The medieval digests are full of varying interpretations of the same smrti texts and the law of adoption differs from province to province according to the authoritative medieval works and modern case law. Voluminous works like those of Shastri Golapchandra Sarkar and of Mr. Kapur have been written on the subject of adoption in all its details. There is so much bewildering confusion and so much case law on the several aspects of adoption that it is only legislation that can resolve the tangled skein of the modern law of adoption. In this section an attempt will be made to present the law of adoption as evolved by the smrtis and medieval works and only some important cases bearing in various ways on the ancient law will be cited.

It has been shown above (pp. 641,657) how even in the times of the Ṛgveda the son of the body was eagerly sought for and how the adoption of another man's son was declared to be not worthy of being thought of. Even so late an author as Śukra (II. 31) says that the adopted and other secondary sons should never be thought as one's sons, since on seeing a rich man they desire to be adopted[1252a]. Yet Vedic Literature contains some references to adopted sons. In the Tai S. VII. 1 8 1 we come across the the story of Atri,[1252b] who gave an only son in adoption to Aurva in these words: 'Atri gave his son in adoption to Aurva

1252a. मनसापि न मन्तव्या वृत्तायां. स्वसुता इति । ते वृत्तकात्वमिच्छन्ति दृष्ट्वा पतुं धनिक नरम् । शुक्रनीति II 31.

1252b अत्रिरृद्धावौर्वाय प्रजां पुत्रकामाय । स रिरिचानोऽमन्यत निर्वीर्यं किंचिलो वातयामा स एतं चतूरात्रमपश्यत्तमाहरत्तेनायजत ततो वै तस्य चत्वारो वीरा आजायन्त जुहोता ध्रुवता स्वध्वर्यु तसभेयः । तै स VII. 1. 8. 1. For चतूरात्र, vide काल्या. श्रौ 23. 1. 7 and आश्व. श्रौ. XI 1. 16-26.

who desired to have a son. He (Atri), having become empty (as it were, by giving away his only son), thought himself to be destitute of strength, to be weak and worn out (lit. stale). He (Atri) saw this *catūrātra* (a sacrifice of that name lasting for four days). He made preparations for it and performed that sacrifice. Then he had four valiant sons born to him, a good Hotr, a good Udgātr, a good Adhvaryu and a good *sabheya* (skilful speaker in an assembly)'. The story of Sunaḥśepa in the Ait. Br. (33) shows that Viśvāmitra, though he had already one hundred and one sons, adopted Śunaḥśepa under the name Devarāta, with the consent of his fifty-one sons (with Madhucchandas[1253] at their head), though the elder 50 sons disobeyed their father. It must be supposed that the later rule allowing only a sonless man to adopt did not apply to Viśvāmitra.

The sūtras and smṛtis contain hardly anything about the dattaka except his name (among the 12 kinds of sons) or the definition, as in Baud. Dh. S. II 2. 24, Manu IX 168, Yāj. II. 130, Visnu Dh. S 15 18-19, Nār. (dāyabhāga 46) The Vas Dh. S is an exception. It not only gives a definition (in 17 28-29), but is one of the earliest smrti texts to dilate on the rules about adoption (in 15. 1-9). What it says may be set forth in one place. "Man produced from seed and blood owes his birth to his mother and father. (Hence) the mother and father have power to give, to sell or to abandon him. But one should not give or accept an only son, for, he is required to continue the line of his ancestors. A woman should neither give nor receive a son (in adoption) except with the permission of her husband. One about to take a son in adoption should, after having invited his kinsmen, having informed the ruler (of the intended adoption) and having performed in the middle part of his house a *homa* with the *vyāhṛtis*, take only him who is closely related and who is a kinsman not remote (in habitation and speech) If a doubt arises (as to the family of the person to be adopted) he (the person desiring to adopt) should treat one whose kinsmen are in a remote place as if he were a śūdra; for it is declared (in the Brāhmana or Vedic works) 'by means of one (son, aurasa or adopted) he (the adopter) saves many.' If, after a son is taken (in adoption), an aurasa is born (to the adopter) the adopted son shall be the recipient of a fourth

1253. सहोवाच मधुरछन्दा॰ । पञ्चाशता सार्धं यवः पिता सजानीते तस्मिन्निदमाह्वे वयम् । पुरस्ता सर्वे कुर्महे त्वामन्दक्षो वयं रमसि । इति । ऐ ब्रा 33, 6 This is q. by the वृत्त. नी. p. 17

share"[1254]. Manu IX. 141 refers to the adoption of a son who is not of the same gotra as the adopter and IX. 142 sets out the results of adoption. The other principal ancient texts quoted by the D. M. and V. Mayūkha are those of Atri, Śaunaka,[1255] Śākala and the Kālikāpurāṇa. The Mit. does not contain more than a few lines on the *dattaka*. It is only in such late works (belonging to the 17th century and later times) like the V. Mayūkha, the Dattakamīmāmsā, the Samskāra-kaustubha, the Dattakacandrikā, that the dattaka receives an elaborate treatment. In modern times the D. M. and D C (which is branded as a forgery by some Bengal writers)[1256] have been regarded by

---

1254. शुक्रशोणितसम्भवः पुरुषो भवति मातापितृनिमित्तकः । तस्य प्रदानविक्रयत्यागेषु मातापितरौ प्रभवतः । न त्वेक पुत्रं दद्यात्प्रतिगृह्णीयाद्वा । स हि सन्तानाय पूर्वेषाम् । न स्त्री पुत्रं दद्यात्प्रतिगृह्णीयाद्वान्यत्राज्ञज्ञानान्नृतुः । पुत्र प्रतिग्रहीष्यन् बन्धूनाहूय राजानि च निवेद्य निवेशनस्य मध्ये व्याहृतिभिर्हुत्वा अदूरबान्धवं बन्धुसंनिकृष्टमेव प्रतिगृह्णीयात् । सन्देहे चोत्पन्ने दूरेबान्धवं शूद्रमिव स्याद्यतेत् । विज्ञायते लोकेन बहूञ्जायत इति । तस्मिन्नेवमतिगृहीत औरसः पुत्र उत्पद्येत चतुर्थभागभागी स्याद्दत्तकः । वसिष्ठ 15. 1–9 The Band. Grhyaśesasūtra II 6 has the first five and the last sūtras out of these. In Aparārka pp. 737–738, V R. p 568, the V. Mayūkha p 112, V. P pp. 477–478 and in the D M this passage is quoted The V Mayūkha reads स हि त्रायते पुरुषं for स हि .पूर्वेषाम् , while the वि ता. (folio 124) reads स हि ..पूर्वेषाम्. The Mit on Yāj II 130 quotes a portion of this passage. On स हि सन्तानाय the V R p. 569 explains 'सन्तानोऽर्थे हि पिण्डोदकक्रियानिवृत्तिर्महान्दोष इति प्रकाशः' Aparārka pp 737 and Sm C II. p 192 read असंनिकृष्टमेव and explain respectively 'असम्बन्धिनमेव' and 'संनिकृष्टभ्रातृपुत्रादिव्यतिरिक्तमेव गृह्णीयात्', but these explanations are not good, since the brother's son is recommended as the best for adoption according to others Therefore the explanation of V R. p 569 that असंनिकृष्टमेव means असनिकृष्टमपि is preferable. The whole of this passage of Vas except the last sūtra is quoted in *Ganga Sahai v. Lekhraj* 9 All 253 at p 300 and the first five sūtras in *Tulshi Ram v. Behari Lal* 12 All. 328,338 and *Jogesh Chandra v Nrityakali* 30 Cal 965 at p 972.

1255 Vide Appendix for Saunaka's verses on adoption and for Band grhya-śesasūtra

1256 As to the tradition among Bengal Pandits that the Dattakacandrikā was fabricated by a pandit called Raghumani to support the claim of an adopted son to a *Rāj*, vide Golapchandra Sarkar's Tagore Law Lectures on adoption (2nd. ed. of 1916 pp. 122–126) It may, however, be noted that in *Bhagwan v Bhagwan* 17 All. 294, 313 Mr. Justice Banerji refused to place any reliance on the tradition.

the Privy Council as of the highest authority in matters of adoption. In *Collector of Madura v. Mootoo* 12 Moo. I. A. 397 at p. 437 the P. C. observe: 'Of the Dattakamīmāṁsā of Nanda Pandita and the Dattaka. Candrikā of Devanna Bhatta, two treatises on the particular subject of adoption, Sir William Macnaghten says that they are respected all over India; but that when they differ the doctrine of the latter is adhered to in Bengal and by the southern Jurists, while the former is said to be the infallible guide in the provinces of Mithila and Benares'. But Jolly (T. L. L. p. 166) gives a far more correct estimate of the value of the D. M. when he says 'It is simply a misfortune that so much authority should have been attributed in the courts all over India to such a treatise as Nanda Pandita's Mīmāmsā which abounds more in fanciful distinctions than perhaps any other work on adoption and it is high time that the numerous other treatises on adoption should be thoroughly examined and given their due weight'. In *Bhagwan v. Bhagwan* 26 I. A 153 at p. 161 the P. C. observe 'To call it (the Dattakamīmāmsā) infallible is too strong an expression and the estimates of Sutherland and of West and Buhler seem nearer the true mark; but it is clear that both works must be accepted as bearing high authority for so long a time that they have become embedded in the general law'. Yet even these works have been set at naught and departed from by Courts in India on many points as will appear in the sequel.

The principal matters to be discussed under adoption are: object of adoption, persons that may legally take in adoption, persons that may give in adoption, persons that may be taken in adoption, the requisites and ceremonies of adoption and the results of adoption.

The objects of adoption—Atri (verse 52) quoted above in note 1231 declares that that man alone who has no son should always secure a substitute for a son with all possible effort for the sake of securing the offering of pindas (funeral and śrāddha cakes) and water. The D. C. quotes this verse and also another ascribed by it to Manu[1257] in which the object of adoption is said to be twofold, viz securing spiritual benefit from the pindas and water (offered by him) and perpetuating the name and family of the adopter. In one of the latest cases on adop-

1257. तत्राद्य मनुः । अपुत्रेण सुत. कार्यो यादृक् तादृक् प्रयत्नतः । पिण्डोदकक्रियाहेतो-र्नामसङ्कीर्तनाय च ॥ वृत्त च p 2.

tion that revolutionized the law the Privy Council[1258] emphasize the peculiar religious significance that has attached to the son among all classes of Hindus, refer to the 9th chapter of Manu verses *106, 107, 137, 138* of which are instinct with this doctrine, hold that the foundation of the Brahminical doctrine of adoption is the duty which every Hindu owes to his ancestors to provide for the continuance of the line and the solemnization of the necessary rites and that in this doctrine the devolution of property, though recognized as the inherent right of the son, is altogether a secondary consideration.

Persons who can give in adoption—The primary right to give in adoption is that of the father, who can do so without consulting the mother.[1259] The mother cannot without the husband's permission give her son in adoption while the father is alive and capable of consenting. But the mother alone can (as said by Manu IX. 168, Yāj. II. 130) give her son in adoption if the father be dead or if he is incapable of giving consent or has entered the order of ascetics, provided he has not expressly or impliedly prohibited her to do so. If both parents are dead no one else, not even the paternal grand-father or the step-mother or a brother, can give a man in adoption. If A has a son B and is then given in adoption by his mother into another family, it was held in *Martand v. Narayan* that A still retained his power as father to give away B in adoption (1 L. R 1939 Bom. 586 F. B.). This decision has been dissented from by the Nagpur High Court in *Sharadachandra v. Shantabai* (I. L. R 1944 Nag. p. 544, F. B.). But the reasons given by the Nagpur High Court are not convincing and the judges seem to be influenced by the dictum of the P. C. that the adopted son is

---

1258. Vide *Amarendra Man Singh v Sanatan* 60 I A. p. 242. Though it may be conceded that in the majority of cases the object of the *adopter* is religious, the object of the *giver* and of the *person adopted* (if he is grown up) is far from religious The main object of the latter two at least in *modern* times is to secure wealth without effort and hardly any religious motives enter into their minds No one gives a son in adoption to a poor man, though a poor man has a soul to save as much as a rich man. Besides in adoption by widows, their motive is very often far from religious. They often adopt out of pique against their husband's brothers or nephews and for benefiting themselves monetarily by making agreements with the adopted sons to share the property with them.

1259. अत एव माता पिता वा दद्यातामिति मनुना मातुर्भर्त्रनुज्ञामपेक्षत्वाज्जयन्तस्वं स्वयमनुज्ञाननैरपेक्ष्यात् पितुर्मध्यमत्वं जनकतात्पर्यान्यादुभयोक्तकपत्वमभिप्रेत्य पूर्वपूर्वापेक्षया-दुत्तरोत्तरमभिहितम्। वृत्त. मी pp. 119-121.

just like an aurasa son except in a few well defined cases. It cannot be supposed that the P. C. knew all the texts of the *nibandhas* dealing with adoption. Though the Bombay High Court held in *Putalabai v. Mahadu* 33 Bom. 107 that a mother did not by her remarriage forfeit her right to give in adoption her son by the first husband, that decision was subsequently overruled in *Fakirappa v. Savitrewa* 23 Bom. L. R. 482 (F B.) which decided that after remarriage a widow has no power to give in adoption her son by the first husband. The same High Court held in *Shamsing v Shantabai* (25 Bom. 551) that a Hindu father, who, after the birth of a son, became a convert to the Moslem faith, did not by reason of his conversion lose his power of giving his son, who remained a Hindu, in adoption though the physical act of giving in adoption, being accompanied by religious ceremonies, may have to be delegated by him to a Hindu. This decision was based on the Caste Disabilities Removal Act of 1851 (for which see above p. 547, *n.* 1021). This decision is against the spirit of the ancient Hindu Law.

What persons may adopt a son.—Every male Hindu, who is of sound mind and has attained the age of discretion though he may be a minor according to the Indian Majority Act (III of 1875), can take a son in adoption provided he has no son, grandson or great-grandson, natural or adopted, living at the time of adoption The word 'aputrena' in the verse of Atri (quoted above in n. 1231) is explained by the D. M. as meaning[1260] one who had no son at all or whose son is dead and as including the grandson and great-grandson. It would appear from a Bombay decision that even if a Hindu has a son, grandson or great-grandson disqualified from inheriting on the grounds mentioned above he cannot adopt (vide *Bharmappa v. Ujjangauda* 46 Bom. 455). In the Dattasiddhāntamañjarī of Bālakrsna (folio 11b) it is stated that if the aurasa son of a person is congenitally blind, dumb or deaf he can take a boy in adoption. In *Krishnaji v. Raghavendra* I. L. R. (1942) Bom. 492 it has been held, relying upon 46 Bom. 455, that a widow

1260. अपुत्रोऽजातपुत्रो मृतपुत्रो वा। अपुत्रो मृतपुत्रो वा पुत्रार्थं समुपोष्य च—इति शौनकीयात्। ... अपुत्रेण इति पुत्रपदं पौत्रप्रपौत्रयोरप्युपलक्षणम्। पुत्रेण लोकान्नयति० (मनु ९. १३७) इति पात्रादिना विशिष्टलोकप्रतिपादनेन नापुत्रस्य लोकोस्तीत्यायलोकसाधारण्यात्। वृत्त भी p 3 and p. 18; अत्र पुत्रपदं पौत्रप्रपौत्रयोरप्युपलक्षणम्। तयोरपि पिण्डदातृत्ववंशकरत्वाविशेषात्। वृत्त च p. 3; अत एव जन्मान्धमूकबधिरौरसपुत्रवतः पितुर्दत्तग्रहण सङ्गच्छते। वृत्तसिद्धान्तमञ्जरी folio 11 b.

idea is that the permission (*anujñāna*) of the husband is not required to be given just at the time of the adoption and that it may be given long before the actual adoption. (3) In Madras a widow may also adopt without[1263] her husband's authority, provided she secures the consent of the father-in-law or (if the latter be dead) of all the co-parceners of the husband, if her husband died as a member of a joint family, and if the husband was separate at the time of his death, then the consent of the father-in-law or (if he were dead) of a substantial majority of her husband's nearest sapiṇḍas. In this view the word 'of the husband' (in Vasiṣṭha) is taken as only illustrative and not literally. (4) The Vyavahāramayūkha,[1264] the Nirnayasindhu, the Samskārakaustubha, the Dharmasindhu, that are regarded as authoritative in Bombay and Western India, hold that the passage of Vasiṣṭha refers only to a wife whose husband is alive and that a widow may adopt without the husband's authority. According to this school the husband's authority to adopt is always to be presumed, unless he has prohibited his widow expressly or by necessary implication from adopting. The D. C. appeals to the general maxim 'another's (or the opponent's) view if not dissented from may be taken as having been approved'.

1263 In *Balsubramanya* v *M Subbayya* L. R 65 I. A. 93 at p. 99 the Privy Council say. 'their Lordships are not laying down that the requisite authority must necessarily be express but they agree with the District Judge that in order to constitute an implied authority there must be circumstantial evidence of a cogent character'. Vide *The Collector of Madura* v. *Mootoo* 12 Moo. I. A. 397 pp. 435–36 where three of these four interpretations are pointed out.

1264. भर्तृज्ञा तु सधवाया एव दृष्टार्थत्वात् । विधवायास्तु तां विनापि पितृस्तद्भावे ज्ञातीनामाज्ञया भवति । .. अतो यस्यामवस्थायां भर्तृज्ञा मासा सैवात्रानूद्यते न त्वपूर्वा विधीयते । अतो विधवाया भर्तुराज्ञां विनाप्यधिकार· । व्य मयूख p. 113; तत्रैव वसिष्ठः । न स्त्रैवैकं पुत्रं . . भर्तुरिति । इदं च भर्तृसत्त्वे । अन्यथा वृद्धान्माता पिता वा यं स पुत्रो दत्रिमः स्मृत इति यत्सव्यासवचोविरोधः स्यात् । दानं प्रतिग्रहोपलक्षणम् । निर्णयसिन्धु III पूर्वार्ध p. 249, स्त्रियास्तु जीवति भर्तरि तदनुमतौ । प्रोषिते मृते वा तदनुज्ञां विनापि । यथा वसिष्ठ· । 'न स्त्री ... भर्तु·' । इति । अनुमतिश्चामतिषेधेपि भवति । अमतिषिद्ध परमतमनुमतं भवतीति न्यायात् । दत्त. च p 18, तच्छास्त्रास्त्रित्यकाम्यव्रतादिधर्माचरणे इव पुत्रप्रतिग्रहेपि नापुत्रस्य लोकोस्तीत्यादिसामान्यशास्त्रादेव विधवाया अधिकारः । उक्तविधदत्तकस्त्रीकारः पुमिरिव स्त्रीभिरपि सधवाभिर्विधवाभिश्च कार्यः । वन्ध्या वा मृतपुत्रा वा पुत्रार्थं समुपेयुष्य चेति शौनकीयवचस्यविशेषश्रवणात् । सं कौ p 160. It will be noticed that the सं कौ. reads वन्ध्या वा मृतपुत्रा वा for अपुत्रो मृतपुत्रो वा in शौनक's text which is the reading of all other works, the former being probably a fabrication inserted to support widow's claims to adopt. The D. M p. 3 notices the reading वन्ध्यो मृतमजो वापि in Saunaka's text. For the maxim अमतिषिद्धं &c. vide शाङ्करभाष्य on वेदान्तसूत्र II. 4. 12.

There is a large volume of case law about the construction of the authority to adopt, about the rights of co-widows in the matter of adoption, about the limits of a widow's power, which are deemed to be outside the purview of this work.

As regards the power of a widow to adopt in the Bombay school, when her husband was joint at the time of his death, the case law has fluctuated from time to time Only a few cases may be referred to here. In *Ramji v. Ghamau* 6 Bom. 498 (F. B.) a Full Bench of the Bombay High Court held that a widow, whose husband was a member of a joint family at the time of his death, could not adopt when she has not the authority of her husband or the consent of the husband's undivided coparceners. After this decision had stood for 50 years the Privy Council held in *Bhimabai v. Gurunathgouda*[1265] L. R 60 I. A. p. 25 that the Full Bench decision had already been overruled in *Yadao v. Namdeo* (48 I. A. 513) and that a Hindu widow can adopt without the consent of her husband's

---

1265. In Bhimabai s case the Privy Council purport to follow the case of *Rakhmabai* v. *Radhabai* 5 Bom H. C. R (A C. J) p 181. But in that case the husband was separate at the time of his death The P C. however point out that in *Yadao* v *Namdeo* (48 I A 513 at p. 529) it was said that the decision in Rakhmabai's case was not based on the fact that the husband was separate at his death or on the fact that the widow when she made the adoption had the estate vested in her and it was held that that decision was equally applicable where the husband was joint. Apart from the fact that the decision of the P. C is opposed to the general sentiment of Hindu society at present, with the greatest respect two criticisms have to be offered against the decision in Bhimabai's case The passage of the Vyavahāramayūkha relied upon in Rakhmabai's case and in Bhimabai's case has not been correctly understood. The Mayūkha was combating the view of others that a widow cannot adopt at all Therefore he tried to establish that a widow can adopt without her husband's authority But the Mayūkha did not say expressly that she can adopt without any body's authority or that she can adopt even in a joint family without the consent of the coparceners or even against their wishes On the contrary if we look at the whole context where he quotes Yāj. I 85 and a verse of Śāt. (930) it would appear that he meant to convey that the consent of the father of the husband or of his kinsmen would be necessary. Further, no one drew the attention of the P. C to another passage of the V. Mayūkha where it summarizes the rite of adoption and states 'Women whose husbands are alive are entitled to adopt with the permission of their husbands; failing the husband, a woman can adopt with the permission of the (husband's) father and the rest': 'स्त्रीणां सधवानां भर्तरनुज्ञया भर्तृभावे पित्रादीनाम्' व्य. मयूख p. 120.

co-parceners, when the husband was a member of a joint family at the time of his death. This decision was carried further by Amarendra'e oase (60 I. A. 242) by holding that when a widow, who had authority to adopt, adopted even after the estate had devolved on a male collateral heir euoh adopted son would take the estate and deprive the heir of it. Ae any widow was held to be able to adopt in Bombay without anybody's consent, hundrede of adoptions have taken place, which came and are coming before the courts. Another Full Bench caee held that when a Hindu coparcenary came to an end on the death of the last surviving coparcener and the family property became vested in his heir, a subsequent adoption by the widow of a predeceased coparcener was valid, but it did not revive the coparcenary nor did it vest the property of the former coparcenary in the adopted son (*Balu v. Lahoo* I. L. R. 1937 Bom. 508). When a co-paroenary wae broken up by partition among the members, it was held[1266] that the widow of a coparcener who died long before the partition cannot make a valid adoption and reliance was placed on a paseage of the Viramitrodaya (quoted below).[1267]

But these decieions have been dissented from in *Bajirao v. Ramkrishna* I. L. R. (1941) Nagpur 707 and in *K. R. Sankarlingam Pillai v. Veluchami Pillai* I. L. R (1943) Mad. 309 (F. B.), where it has been laid down that when the surviving coparcenere of a joint Hindu family were in posseseion of the joint family properties which they obtained in a partition among themselves after the death of a coparcener and subsequent to the partition a valid adoption was made to the deceased coparoener by his widow the adopted eon was entitled to reopen the partition. They rely by way of analogy on the provieions of Yāj that the posthumoue son can reopen a partition already made and aleo on that of the diequalified heir when the disqualification is removed and on the dicta in eome caeee that an adoption dates back to the date of the death of the adoptive father. But no emrti text and no digest has extended the exceptional rules about the posthumous son and the disqualified heir to a son

1267. अत्र मूलम् । प्रत्येकवृत्तीनि सम्बन्धाविशेषात्स्वत्वानि स्वाम्यानि च सन्त्येव। परस्परविभागाते परस्परस्वाम्यान्यदीयमृत्वे तानि नश्यन्ति । परमरणपारिव्राज्यादिनेवेति न काप्यनुपपत्ति. । व्यवस्थापनमपीदृमेव, अन्यथैकदेशे उत्पादनमित्येव वदेत् । अत एव विनाशमात्रकल्पना न तु स्वत्वान्तरोत्पादकल्पना । व्य म. pp. 431-32.

adopted after partition. Their reasoning as regards the Bombay cases is not satisfactory. It amounts to this that as between the separating co-parceners the coparcenary may be extinct but as to the subsequently adopted son it exists i. e. a co-parcenary is extinct and existing at the same time, which, to use no stronger expression, appears rather strange. Besides the general rule is that partition is made only once (Manu IX. 47). The cases of the posthumous son and of the disqualified heir are expressly provided by way of exceptions. The usual rule is that exceptions are to be strictly limited to the matters expressly stated and are not to be extended by analogy to cases not covered by the words of the exception and that other cases are governed by the general rule. It is a canon of interpretation in Hindu Law that a special text forming an exception to a general text should be construed strictly and applied only to the cases clearly falling within it (*Ganpu v. Chandrabhagabai* 32 Bom. 275, 283, *Hanmant v. Ganesh* 43 Bom. 612, 624). Further, a Hindu widow is not compelled to adopt at any particular time; she may adopt at any time during her life. In *Raje Vyankatrao v. Jayavantrao* 4 Bom. H. C. R (A. C J.) 191 it is noticed that the widow in that case adopted 71 years after her husband's death. If the reasoning of the learned Judges of Nagpur and Madras is correct then when three or four generations have succeeded to the separating coparceners, an adopted son can reopen the partition after three quarters of a century This result, to say the least, would be most unreasonable. The Nagpur High Court observes that every Hindu widow is a potential mother. This is a fiction which has been carried too far by that court and by the Privy Council A woman in the order of nature can hardly ever have an *aurasa* son beyond the age of fifty or so, but when a fiction is employed a woman can bring into existence a son even when she is 80 or 90 The Privy Council have approved of the Nagpur and Madras decisions recently in *Anant v. Shankar* 46 Bom. L. R 1. They hold that a Hindu family cannot be brought to an end while it is possible in nature or law to add a male member to it or while there is still a potential mother if that mother in the way of nature or law brings in a new member In *Ramchandra v Shankar* 47 Bom. L. R 121 (F B) the Privy Council decision in *Anant v. Shankar* has been followed and it is hald that the decision in *Balu v. Lahoo* has been expressly overruled by the Privy Council. The consequences of these latest decisions will be most disastrous for Hindus. In Amarendra's case the P. C. state that there

must be some limit to the power of a widow to adopt or some conditions in which it would be contrary to the spirit of the doctrine to admit its continuance or inequitable in the face of other rights to allow it to take effect (L. R. 60 I. A. 242 at p. 249). In *Madana Mohana v. Purshothama* L. R. 45 I. A. 156 the P. C. approving of *Ramkrishna v. Shamrao* 26 Bom. 526 (F. B) held that, when a man dies leaving a widow and a son and that son dies leaving his own son or a widow to continue the line by adoption, the power of the former widow comes to an end and cannot be revived; that is, they were prepared to hold that the grandmother succeeding to her grandson who died unmarried could not make a valid adoption and allowed the grandfather and his ancestors to remain without the religious benefits that a son adopted by the grandmother would have conferred (in spite of the 9th chapter of Manu on which they rely in Amarendra's case). According to the recent rulings any widow whose husband died a member of a joint Hindu family may adopt *at any time* even when the other members become separate and may remain separate for 50 years or more and yet a large slice of the estate may be taken away after several generations have succeeded, laboured and acquired a vast estate. Further, it is not clear how far the P. C. will go in their solicitude for the adopted son. Suppose three brothers separate and one of them sells the property that came to his share. If the partition is to be opened for the benefit of a son subsequently adopted by a predeceased member's widow, will the purchaser be affected or not (supposing the sale is within 12 years of the adoption)? Supposing that the last surviving member of a family dies leaving a married daughter and a predeceased son's widow and the daughter inherits an absolute estate (as she does in Bombay) and remains in possession for 30 years, is it meant that a son thereafter adopted by the widowed daughter-in-law can divest an estate vested for thirty years in a married daughter who is not a member of the family at all after her marriage? The recent P. C. decision in *Anant v. Shankar* appears to indicate that whatever the length of time the adopted son will oust a collateral to whom the estate may have gone by inheritance. Intending purchasers have become afraid that there is no knowing how far the P. C may go These decisions will lead on to hurried sales of joint family property at whatever price may be fetched immediately a coparcener dies leaving a widow. The result of the several decisions of the P. C has been that properties of

Hindu families in which widows of predeceased coparceners exist are not easily saleable and do not yield their proper market value. The inroads on the ancient joint family system of the Mitākṣarā have been so many that only the shell remains; the burdens are there, but the soul is gone, what with the right of each coparcener to alienate his share for consideration, the Gains of learning Act, Act 18 of 1937, the decisions of the P C. about adoption, sec 39 of the Transfer of Property Act. It would be better if the Legislature declared that the joint family system of the Mitāksarā type has been abrogated, if all the innovations introduced by legislation and judicial decisions are to be kept intact.

A widow who has attained years of discretion may adopt although she is a minor according to the Indian Majority Act (of 1875) It has been held in Bengal that an unchaste[1268] widow cannot adopt, but in the Bombay Presidency it has been held that a śūdra widow, though unchaste, may make a valid adoption.[1269] If a man dies leaving a widow D and two sons A and B, who form a joint Hindu family, and subsequently A dies leaving a widow C and his brother B, and if B dies unmarried and the mother D succeeds as heir to her unmarried son B, she has still the power to adopt a son. The duty of continuing the line was cast upon both A and B and not on A alone and therefore when A dies that duty is cast on the surviving coparcener B Therefore the proposition laid down in *Ramkrishna v Shamrao* cannot apply and the mother of B can adopt (vide *Anant v. Dnyaneshwar* 46 Bom. L. R. 353)

Who may be adopted.

The person to be adopted must be a male according to the Vyavahāramayūkha[1270] which relies on the analogy of *upanayana* (that only a male undergoes, as stated in the ancient text '*aṣṭavarsaṁ brāhmanam-upanayīta*). This has been followed by

1270 दत्तकञ्च पुमानेव भवति न कन्या । स ज्ञेयो दत्रिम. सुत (मनु ९. १६८)—इति संज्ञासंज्ञिसम्बन्धबोधकवाक्यगतेन स इति सर्वनाम्ना मातापितृकर्तृक-प्रीतिजनकगुणकापत्ति-मित्तकदानकर्मीभूतसजातीयपुंस एव—अष्टवर्षं ब्राह्मणमुपनयीत तमध्यापयीत—इति तच्छब्देनाष्टवर्ष—ब्राह्मण्यपुंस्त्वोपनयनाद्यसंस्कृतस्पेव परामर्शात । व्य मयूख pp. 108-109 For अष्टवर्षं ब्राह्मणमुपनयीत, vide आप. गृ IV 10. 2 and सुदर्शनाचार्य's gloss thereon The धर्मसिन्धु says एवं दत्तकन्याया अपि स्वीकार उक्तविधिना कार्य । तत्र परगोत्रोत्पन्नाया ग्रहणे विवाहे गोत्रद्वयवर्जनं मात्रम् । पुत्रपत्न्योरभावे दत्तकस्पेव पितृधन-भागिनी । (III पूर्वार्ध p. 162)

the Indian Courts.[1271] But the D. M. (pp 112–116), Sam. K. (p. 188) and Dharmasindhu[1272] relying upon such instances as that of Śāntā, the daughter of king Dasaratha (who was adopted by king Lomapāda) and of Prthā, who was the daughter of Śūra and was adopted by Kuntibhoja, say that even a girl may be adopted Pannalal in 'Kumaun local customs' states that a girl may be adopted as a daughter in Kumaun by custom The person to be adopted must be of the same caste as the adopting father Yāj. II. 133, providing that the twelve kinds of sons that offer the pinda and take the wealth one after another in order, applies only to sons of the same caste. Śaunaka also requires sameness of caste. Manu IX 168 employs the word 'sadṛśam', which was interpreted by Medhātithi as meaning 'similar to the adopter in qualities and not in caste'. Medhātithi[1273] expressly states that a brāhmana may adopt a ksatriya boy. But Kullūka and the other commentators of Manu, the V. Mayūkha and other works hold that the boy must be of the same caste The Sam K. p 150 and Dharmasindhu go a step further by saying that even a brāhmana should adopt another of the same country. The Vāyupurāna (99 137–139) narrates that Bharata, son of Dusyanta, adopted Bharadvāja, son of Bṛhaspati and a brāhmana, who then became a ksatriya.[1274] The courts accept the view of Kullūka and the rest. It is likely that courts may allow a boy from a subcaste of each of the four principal varnas to be adopted by a man belonging to another subcaste of the same varna.[1274a] Śaunaka and Vrddha-Yāj q by D. C. provide

1271. Vide *Gangabai v Anant* 13 Bom 690, where the Vyavahāramayūkha is expressly referred to and followed in preference to D M. and Samskārakaustubha. Vide also *In re Munshram* 12 Lahore 658 at p 661.

1274a In *Raj Nandini v Aswini Kumar* I. L. R. (1941) 1 Cal 457 the adoption of a Vaidya child by a Kāyastha was upheld in the Sylhet district, as both are now treated as śūdras

that the *dattaka* may be of a different caste, but that such a son will not take the wealth [1275] In spite of the words of Vas. 15. 3 and of Śaunaka (that one having an only son should not give him) the courts have held that even an only son may be given or taken in adoption and that the words of Vasistha are merely recommendatory. Vide *Sri Balusu Gurulingaswami v. Sri Balusu Ramalakshmamma* 26 I. A. p. 113 and *Vyas Chimanlal v. Vyas Ramchandra* 24 Bom. 367 (F. B.) In connection with the force of the words of Vas. 15. 3–4 stating why an only son should not be given or taken, Jaimini's rule contained in what is called the 'hetuvan-nigadādhikarana '[1276] (Jai. I. 2. 26–30) came in for very exhaustive discussion in *Beni Prasad v Hardai Bibi* 14 All. 67 (F. B.) and *Radha Mohun v Hardai Bibi* 26 I. A. pp. 113, 146. There are several Vedic passages like this, 'he offers the grains into the fire with a winnowing basket, for food is prepared with the help of it' (Tai Br. I. 6. 5). The question is whether such sentences put forward a reason for what is enjoined in the preceding portion or whether they are intended merely as *arthavādas* (i. e. for the praise of what is stated in the preceding part of the passage). Jaimini concludes that they are for the purpose of praise[1277] alone.

1275. यदि स्यादन्यजातीयो गृहीतोपि सुतः क्वचित् । अंशभाज न तं कुर्याच्छौनकस्य मतं हि तत् ॥... व्यक्तमाह वृद्धयाज्ञवल्क्यः । सजातीयः सुतो ग्राह्य पिण्डदाता स रिक्थभाक् । तदभावे विजातीयो वक्षमात्रकर स्मृत । आसाच्छादनमात्र तु लभते स तदिक्थिनः ॥ इति । दत्त. च. p 7, दत्त. मी. quotes the verse यदि स्यात् & as शौनक's (p 104) and also as वृद्धगौतम's(p 52)

1276 हेतुर्वा स्यादर्थवत्त्वोपपत्तिभ्याम् । स्तुतिस्तु शब्दपूर्वत्वाद्चोदना च तस्य । जै. I. 2. 26–27 ; अथ ये हेतुवन्निगदा शूर्पेण जुहोति तेन ह्यन्न क्रियत इत्येवमादयस्तेषु सन्देहः। किं स्तुतिस्तेषा कार्यमुत हेतुरिति । किं प्राप्तम् । हेतुः स्यादन्नकरण होमस्य । शबर, इह ये हेतुवन्निगद्यन्ते हिशब्दादिभिर्न च परमार्थहेतवस्ते उदाहरणम् । तन्त्रवार्तिक

1277. Nigada means 'a sentence or sacrificial formula' and 'hetuvat' means containing a word or words (like 'hi') which are generally used to indicate a reason' for a statement already made. In preparing food from grains, the śūrpa is required for winnowing them to free them from husk &c. as also are required the pan or pot for boiling the grains and a ladle for stirring the grains when they are being boiled. The *Śruti* passage provides that with the help of a śūrpa the homa is made of Karambhapātras (pots full of husked grains of *yava* slightly fried on the Daksina fire, ground and mixed with curds) in the Varunapraghāsa, one of the *cāturmāsyas*. Vide H. of Dh. vol. II. pp 1095–96 and 1098 for the śūrpa used as a *juhū* ladle. If the latter part of the passage contains a reason for the first part, then it would follow that the pot or ladle (both of which are useful in getting food

(*Continued on the next page*)

The eldest son also should not be taken in adoption, since, as the Mit. (on Yāj. II. 130) puts it, it is the eldest son alone who is the foremost in serving the purposes of a son as regards his genetive father acc. to Manu IX. 106 which says 'a man becomes one having a son (a father) by the mere fact of the birth of his (first) son and becomes free from the debt owed to

---

(*Continued from the last page*)

prepared) may equally be used instead of the śūrpa. But the object of the latter half is not to assign a reason, but rather to praise and recommend the śūrpa as the means of making the homa and so nothing but the śūrpa can be employed in making the offering. The Veda is the final authority in all matters pertaining to sacrifice; it does not stand in need of giving reasons for its prescriptions but it may enlogise an act to indnce people to perform it. Therefore in the hetuvan-nigadādhikarana Jaimini does not lay down (as thought by Mandlik and by the High Conrt in 14 All. 67, pp 73, 84, 125) that when a text is supported by a clause containing words of reason, it shonld he regarded as merely recommendatory (and not obligatory), but what Jaimini lays down is that clauses containing words generally meaning 'reason' are to be construed as *arthavādas* (praises) of the obligatory rule contained in a previous clause. Mr. Mandlik says (p 499 of his 'Hindu Law') 'It is a rule of the Pūrvamimāmsā that all texts supported by the assigning of a reason are to be deemed not as *vidhi* but simply as *arthavāda* (recommendatory). When a text is treated as an arthavāda it follows that it has no obligatory force whatever. Śabarasvāmin constructs an adhikarana on this head which he calls 'hetuman-nigadādhikarana' (quoted in 14 All. 67 at p. 73). This is entirely wrong as shown above and the adhikarana is not called 'hetuman etc' but 'hetuvan etc.'. Acc to Jaimini's rule the words of Vas 15. 3 'naikam putram' contain a vidhi (an obligatory rule), while the following clause containing the word 'hi' (indicative of a reason) '*sa hi santānāya pūrvesām*' is merely an arthavāda, which praises the vidhi hy emphasizing the importance of a son. Sarkar in his 'Mīmāmsā Rules' (pp. 175–176) correctly represents the meaning of Jaimini, though in somewhat obscure language The decisions in 14 All. 67 and 26 I A. 113 are correct so far as the Mit. and the Mayūkha are concerned, though the judgments in the former case are wrong in what is regarded to be the meaning of Jaimini's aphorisms constituting 'hetuvan-nigadādhikarana' The Privy Council in 26 I A 113 at p. 146 refer to the supposed rule of Jaimini that all precepts supported by the assignment of a reason are to he taken as recommendations only, hut they express themselves guardedly and say that the rule is rather startling and they would not admit it to be true unless they made an intimate study of the smrtis The commentaries will make the Pūrvamimāmsā position clear. अस्मत्पक्षे पुनः शूर्पं स्तूयते । तेन ह्यर्थे क्रियत इति वृत्तान्तान्वाख्यान न च वृत्तान्तज्ञानाय किं तर्हि मरोचनायैव । तस्माद्धेतुवच्चिगदस्यापि स्तुतिरेव कार्यमिति । शबर on जै. I. 2. 30. The शास्त्रदीपिका states 'न च वेदेनोच्यमानं शूर्पस्य होमसाधनत्वं हेतुमपेक्षते वेदस्यैव तत्र प्रमाणत्वात् । अर्थवादस्त्वपेक्षितः मरोचनार्थत्वेन । तस्मादर्थवादत्वम् ।'.

the *pitṛs*'. But in modern times this rule is taken to be only recommendatory and the adoption of the eldest son is held valid as also that of an only son[1278]. The V. Mayūkha (p. 108) states: acc. to the Mit. the prohibition to give the eldest son affects only the giver but not the adopter and he criticizes the Mit that Manu IX. 106 does not forbid the giving of the eldest son, but only provides that by the birth of the first son a man becomes free from debt (to pitṛs). So the V. Mayūkha goes a step further and holds that there is no prohibition at all either to give or take in adoption the eldest son, while the Mit., though it does not hold the adoption bad, seems to hold that the giver incurred blame. The Sam. K. p. 150 also does not allow the adoption of the eldest son. Two or more persons cannot adopt the same boy and if they do so the adoption by each is invalid[1279]. The Dvyāmuṣyāyaṇa adoption, to be described later on, is an exception.

The texts contain rules about preference in selecting a boy for adoption, when several are eligible The Mit.[1280] on Yāj. II. 132 declares that the verse of Manu IX. 182 stating that 'when out of several brothers who are sons of the same father one has a son all of them become, through that son persons having a son' does not provide that he becomes really the son of all but it indicates that when a brother's son is available

1278 Vide *Kashibai* v *Tatia* 7 Bom. 221, *Tukaram* v. *Babaji* 1 Bom. L. R. 144 (for valid adoption of eldest son), where at p. 152 the following passage from the Mayūkha is referred to: ज्येष्ठेन जातमात्रेण पुत्रीभवति मानव इति ज्येष्ठस्यैव पुत्रकार्यकरणे मुख्यत्वात्स न देय इत्यपमपि निषेधो दातुरेव न प्रतिग्रहीतुरित्यपि सः। स्यादयं प्रतिषेधो दातुरेव यद्येतस्य ज्येष्ठदाननिषेधकता स्यात्। न तु सास्ति। मानाभावात्। पुत्रीभवतीत्यनेन पुत्रित्वमात्रोक्त्या ऋणापाकरणोक्तिमात्रपरत्वाच्च। अत एव पितृणामनृणश्चैव स तस्मात्सर्वमर्हति—इत्युत्तरार्धं सङ्गच्छते। च्य मयूख p 108 The same passage of the Mayūkha is referred to in *Vyas Chunilal* v *Vyas Ramchandra* 24 Bom 367 (F. B) at p. 375.

1279 अपुत्रेणेत्येकत्वश्रवणाच्च न द्वाभ्यां त्रिभिर्वा एकः पुत्र. कर्तव्य इति गम्यते। वृत्त मी 'p. 25.

1280. यत्तु-भ्रातृणामेकजातानामेकश्चेत्पुत्रवान्भवेत्। सर्वे ते तेन पुत्रेण पुत्रिणो मनुरब्रवीत्—इति (मनु ९. १८२) तदपि भ्रातृपुत्रस्य पुत्रीकरणसम्भवेऽन्यथा पुत्रीकरणनिषेधार्थत्वं, न पुनः पुत्रत्वप्रतिपादनाय तत्सुता गोत्रजा बन्धुरित्यनेन विरोधात्। मिता. on या. II. 132. The same verse is वसिष्ठ 17. 10 (with variations). व्यव. नि. p. 440 quotes similar verses of हारीत and बृहस्पति Compare विष्णुध सू. 15 42 also 'भ्रात्रन्तराणां पुत्रवत्त्वोक्तिर्ग्रामस्य तात इतिवदौरसप्रशंसार्था। यत्तु संग्रहकारेणोक्तं यद्येकजाता बहवो भ्रातरस्तु सहोदराः। एकस्यापि सुते जाते सर्वे ते पुत्रिणः स्मृताः—इति तत्र ... देवस्वामिना तात्पर्यार्थं उक्तः—उभयत्रापि नान्यः प्रतिनिधिः कार्य इति ब्रुवेन। स्मृतिच. II p. 289. Vide स वि. p. 395 for quotation of this passage of स्मृतिच.

for adoption another boy should not be adopted. A similar explanation had been given by an ancient commentator Devasvāmin. The D. M., D. C. (pp. 5–6) and Sam. K. p. 150 quote passages of Śaunaka[1281] and Śākala that a man should prefer a sapinda or a sagotra to one who is not a sapinda or of the same gotra. The D. M., D. C., the Sam. K p. 150, the Dharmasindhu recommend the following order: the full brother's son, then a sagotra sapinda, then a sapinda though not of the same gotra (such as a boy from one's maternal uncle's line or a paternal aunt's descendant), then one not a sapinda though of the same gotra, then one who is neither a sapinda nor a sagotra. This order is purely recommendatory and an adoption in breach of it is quite valid. It has been recently held that an adoption is invalid if the boy adopted be congenitally and incurably deaf and dumb though not an idiot. Vide *Surendra v Bholanath* I L. R. (1944) 1 Cal. 139

As to the age of the boy to be adopted there is great divergence among the medieval writers which is also reflected in the case law. In this connection certain verses of the Kālikāpurāṇa assume[1282] great importance The V. Mayūkha and the D. C

1281. ब्राह्मणानां सपिण्डेषु कर्तव्यः पुत्रसंग्रहः । तदभावेऽसपिण्डो वा अन्यत्र तु न कारयेत् ॥ शौनक; सपिण्डापत्यकं चैव सगोत्रजमथापि वा । अपुत्रको द्विजो यस्मात्पुत्रत्वे परिकल्पयेत् । समानगोत्रजाभावे पालयेदन्यगोत्रजम् । शाकल; both q. by दत्त. मी. p. 41 and 48, and दत्त. च. pp 5–6. A comparatively late work called असपिण्डासगोत्रपुत्रपरिग्रहपरीक्षा (composed after about 1700 A. D, since it mentions the दत्तकमीमांसा and संस्कारकौस्तुभ) after an elaborate discussion of Rg. VII 4. 7–8 and the above passages of Saunaka and Sākala states the following conclusion (D C College Ms No 133 of 1886–92 folio 16 b) 'यथा ... दाक्षिणात्यैः समर्थितं मातुलकन्यापरिणयनं ... तथा असपिण्डासगोत्रपरिग्रहोऽपि यस्मिन् देशे येषां कुलेऽनादिसिद्धस्तेषामेव नान्येषामिति व्यवतिष्ठते'.

1282. पितुर्गोत्रेण यः पुत्र. संस्कृतः पृथिवीपते । आचूडान्तं न पुत्रः स पुत्रतां याति चान्यत. ॥ चूडोपनयसंस्कारा निजगोत्रेण वै कृता' । दत्ताद्यास्तनयास्ते स्युरन्यथा दास उच्यते । ऊर्ध्वं तु पञ्चमाद्वर्षान्न दत्ताद्याः सुता नृप । गृहीत्वा पञ्चवर्षीयं पुत्रेष्टिं प्रथमं चरेत् ॥ कालिकापुराण q. by दत्त. मी p 122, नि. सि. III पूर्वार्ध p 250, व्य. मयूख p. 114, दत्त. च. pp 31–33 (reads यदि स्यात्कृतसंस्कारो यदि वातीतशैशवः ग्रहणे पञ्चमाद्वर्षात् पुत्रेष्टिं), सं कौ. p 169 (reads चूडाद्या यदि and अन्यथा अदास) The cūḍā was usually performed in the third year and the locks that were kept on the boy's head depended upon the number of the *pravara* sages of the gotra of the father. Vide H. of Dh vol. II pp 260–265 for cūḍākaraṇa. So if a boy (who was असगोत्र) was adopted after cūḍā, his position would be this that some संस्कारs would have been performed with one gotra, while others would be performed with another gotra i. e. he would thus belong to two gotras. To prevent this and to complete his affiliation into the adoptive family the putresti had to be performed.

hold that the passage is of doubtful authenticity (as the verses are not found in several mss.), while the D. M. and the Nirnayasindhu hold them to be genuine and the Sam K. pp. (169-172) after referring to these views states that those verses are opposed to what is stated in the Ait. Br. about Śunahśepa who was adopted by Viśvāmitra as a son even after upanayana. The verses are. 'O King! that son, whose *samskāras* up to (including) the *cūḍā* (tonsure) ceremony are performed with the gotra of his (natural) father, does not (i. e. cannot) attain the status of the adopted son of another When the ceremonies of cūdā and upanayana are performed under his own gotra (by the adoptive father) the *dattaka* and the other kinds become (recognised as) sons (in the adoptive family); otherwise they are called *dāsa* (slave). After the fifth year the adopted son and the rest cannot be (recognised as) sons. Having taken one who is five years old, one (the adopter) should first perform the *putresti*'. These verses state four propositions: (1) If all samskāras from *jātakarma* to *cūḍā* (i. e including it) have been performed in the family of birth that boy cannot be adopted in another family; (2) if a boy's *cūḍā* and other later ceremonies are performed in the family of adoption he is fully an adopted son; (3) a boy over five years of age cannot be adopted at all, (4) a boy whose cūḍā has been performed in the family of birth may be adopted up to five years, provided the rite called putresti[1283] is first performed in the adoptive family before any other ceremony is performed on the adopted boy. The D. M. says that the best time for adoption is up to three years, then from three years to five is the next best (*gauṇa*) and that after five no boy can be adopted. The D C. (p. 36) holds that a boy of the three higher classes can be adopted up to *upanayana* and that a śūdra boy can be adopted till his marriage The Nirnayasindhu seems to be of the same opinion The V. Mayūkha[1284]

1283 About the पुत्रेष्टि, the वृत्त. मी p 132 says 'अग्नये पुत्रवते पुरोडाशमष्टाकपालं निर्वपेदिन्द्राय पुत्रिणे पुरोडाशमेकादशकपाल प्रजाकाम । अग्निरेवास्मै प्रजां प्रजनयति वृद्धानिन्द्रः प्रयच्छतीति वाक्ये प्रजाफलकत्वमिष्टे श्रूयते। तथा चान्यत्पक्षा प्रजा तत्र तदुत्पत्तिरेव भाव्या यत्र तूत्पन्ना परिगृह्यते तत्रोत्पत्तिरेवाभावात्तस्याः प्रजात्वमेव भाव्यमिति कल्प्यते प्रकृतविध्यन्यथानुपपत्तेः ।'. The सं. कौ p 173 contains the words अग्नये प्रयच्छति Vide आश्व श्रौ II. 10 'पुत्रकामेष्ट्यामग्नि पुत्री '

1284. वृत्तकरतु परिणीत उत्पन्नपुत्रोपि च भवतीति तातचरणा । युक्त चेद बाधकाभावात् व्य म. p 114 When Nilakantha says that the three verses of the Kālikāpurāna refer to the adoption of an asagotra boy, that is not his real opinion; he only concedes that that passage may, if at all, refer to the adoption of an asagotra boy. एवं च चूडाद्या इत्यतदृगुणसविज्ञानबहुव्रीहिणा द्विजातीनामुपनयनलाभः शूद्रस्य तु विवाहादिलाभ । वृत्त. च. p 36

and Sam. K. both hold that even a boy not of the same gotra may be taken in adoption after upanayana or after marriage and even when the person to be adopted has himself had a son. In Bengal, Benares[1285] and Bihar the courts hold that the boy must be adopted before *upanayana*. The same rule holds good in Madras[1286]; but there it is further held that if the boy to be adopted is of the same gotra as the adopter, the adoption may be made after upanayana but before marriage. In Bombay a person may be adopted at any age, even after marriage and even after he has had children and he may be even older than the adopter.[1287] In the whole of India, a śūdra may be adopted only before his marriage, but in the Bombay Presidency the adoption of a married man and of one having even a child is allowed also among śūdras[1288].

1285. Vide *Ganga Sahai v. Lekhraj* 9 All. 253 (at p. 306 the translations of the Kālikāpurāna verses by Sutherland and Colebrooke are quoted and at p 318 the authenticity of those verses is held to be extremely doubtful); *Raja Mukund v. Jagannath* 2 Patna 469, 477 (where the passage of the Kālikāpurāna is quoted), in which it was held that a boy may be adopted till upanayana and that it does not matter if the cūdā ceremony is performed in the family of birth and the putreṣṭi is omitted at the time of adoption; *Chandreshwar v. Bisheshwar* 5 Patna 777 at p 844 (where the passage as to five years was held not binding); vide *Surabala Devi v. Sudhirkumar* AIR (1944) Cal 265.

1286. *Viraraghava v Ramalinga* 9 Mad 148 (F B) for the validity of the adoption of a sagotra after upanayanya and *Pichuvayyan v. Subbayyan* 13 Mad 128 for the invalidity of a married man's adoption

1287. Vide *Dharma v Ramkrishna* 10 Bom 80, 84 (where it is said that though Nīlakantha's explanation that the Kālikāpurāna verses refer to an asagotra causes a difficulty, yet it does not follow that he adopts that interpretation as his own) in which the adoption of a married asagotra brāhmana was upheld; *Kalgavda v Somappa* 33 Bom. 669 where the adoption of a married man having a son was upheld, but it was decided that the son born before adoption remained for purposes of inheritance in the natural family; *Balabai v Mahadu* 48 Bom 387 (where the adopted man was older than the adopter)

1288. *Lingayya v. Chengalammal* 48 Mad. 407 where it was held that even a śūdra cannot be adopted after his marriage, (which decision follows the D. C)

Śaunaka required that the boy to be adopted must be *putracchāyāvaha*[1289] (one who bears resemblance to or is a reflection of the *aurasa* son). This has led to differing explanations by the commentators and contradictory decisions in the several Indian High Courts. The D. M. and D. C (p 21) both explain that the resemblance consists in the possibility of being procreated by the adopter himself by *niyoga* and the like. The meaning of the D. M. is: A brother's son or a sapinda's son or a sagotra's son can be adopted because the adopter could have procreated a son by the practice of niyoga on the wife of a brother or a sapinda or a sagotra (according to the rules of niyoga); but he could not have done so as regards his mother, or grandmother, daughter or sister or his mother's sister. Therefore a man cannot adopt his own brother, paternal or maternal uncle, a daughter's son or a sister's son and the like One strange thing is that, though *niyoga* had been forbidden for many centuries before the D. M., the author of it brings in the rules of the long obsolete practice of *niyoga*[1290] to find out who could or could not be adopted. But stranger things were to happen Sutherland who translated both the D.M. and the D.C explained in his notes the word 'niyogādinā' as 'by such an appointment or marriage and the like'. Vide Stoke's Hindu Law Texts p. 590 (Dattakamīmāmsa, sec. V. *placitum* 16 note). There was no warrant for introducing the word 'marriage' after 'niyoga' The rules of niyoga are different from those of marriage The judges most of whom were generally ignorant of Sanskrit and had yet to decide cases among Hindus according to Hindu Law as understood by them (vide 26 I A. 113 at page 128 about the ignorance of Sanskrit among judges) seized upon this explanation and evolved the curious rule that no one could be adopted whose mother the adopter could not have married in her maiden state (i. e the relationship has reference to a time *prior* to

---

1289. पुत्रच्छाया पुत्रसादृश्यं तच्च नियोगादिना स्वयमुत्पादनयोग्यत्व यथा भ्रातृसपिण्डसगोत्रादिपुत्रस्य । न चासम्बन्धिनि नियोगासम्भव । बीजार्थं ब्राह्मण. कश्चिद्धनेनोपनिमन्त्र्यतामिति स्मरणात् । ततश्च भ्रातृपितृव्यमातुलदौहित्रभागिनेयादीना निरास· पुत्रसादृश्याभावात् । . तथा मक्ते विरुद्धसम्बन्धपुत्रो वर्जनीय इति । यतो रतियोग सम्भवति तादृशः कार्य इति यावत् । दत्त मी. pp 144–145 and p 147. The words पुत्रच्छाया योग्यत्वं occur in दत्त. च also (p 21). The half verse बीजार्थं ब्राह्मण्यताम् is almost like आदिपर्व 105. 2

1290. For the rules of *niyoga* vide H of Dh. vol. II. pp. 599–601.

marriage). This is still the law in all Presidencies[1291] except Bombay. Although the D. M. stated that the boy to be adopted must be capable of being procreated by niyoga, at another place it remarks, after quoting verses of Śaunaka[1292] and Śākala, that a boy of another gotra may be adopted except a daughter's son, a sister's son and a mother's sister's son. The Bombay High Court holds that any one may be adopted except these three (vide *Ramchandra v Gopal* 32 Bom 619, *Walbai v. Heerbai* 34 Bom. 491 holding that a man cannot adopt his mother's sister's son, *Ramkrishna v Chimnaji* 15 Bom. L. R 824 holding the adoption of father's sister's son valid). Very strange results have followed from this viz. the Bombay High Court has upheld the validity of the adoption as a son by a man of his own half-brother (vide *Gajanan v Kashinath* 39 Bom. 410), of his own maternal uncle's son, and the adoption by a widow of her deceased husband's son-in-law (vide *Sitabai v. Parvatibai* 47 Bom 35). It should be noted that the Dvaitanirnaya or Dharmadvaitanirnaya[1293] (of Śankarabhatta, father of Nīlakantha) and the V. Mayūkha both hold after a very abstruse reasoning based on several Mīmāmsā rules, that men of the three higher classes may

1291. Vide *Minakshi v. Ramanada* 11 Mad. 49 (F B.), *Bhagwan Singh v. Bhagwan Singh* L R. 26 I. A. 153, 160, in the latter of which the texts of Saunaka and Sākala are relied upon.

1292 तथा च शौनक· । ... दौहित्रो भागिनेयश्च शूद्रैश्च क्रियते सुतः । ब्राह्मणादित्रये नास्ति भागिनेय· सुत· क्वचित् । ... तदेतत्सपटमाचष्टे शाकल· । समानगोत्रजाभावे पालयेदन्यगोत्रजम् । दौहित्रं भागिनेयं च मातृस्वसृसुतं विना । इति । एतेन भागिनेयपदं दौहित्रमातृष्वस्रेययोरुपलक्षणमिति स्पष्टमेव सिद्धम् । युक्तं चतत्, विरुद्धसम्बन्धस्य त्रिष्वपि समानत्वात् । दत्त. मी pp 80 and 101; दत्त च p 8, दत्त. च p 6 quotes शाकल's verse. The दत्त. मी elsewhere (p. 98) and the सं. कौ. p 158 read शूद्राणां विहितः सुतः and the सं. कौ p 176 reads 'दौहित्रं भागिनेयं वा शूद्राणां चापि दापयेत्,' while the धर्मद्वैतनिर्णय (p 105) and the व्य. मयूख p. 110 read दौहित्रो भागिनेयश्च शूद्रस्यापि च दीयते. वृद्धगौतम q by the दत्त. मी. p 146 reads 'ब्राह्मणादित्रये नास्ति भागिनेयः सुत. क्वचित्।'

1293. Vide the text of the V. Mayūkha p. 111 and notes pp 173–179 in my edition of the V. Mayūkha for explanation. The Dvaitanirnaya (p. 105) concludes. तेन ब्राह्मणादिभिरपि दौहित्रभागिनेयौ पुत्रत्वेन ग्राह्याविति सिद्धम् । तथा शूद्रेण सति सम्भवे दौहित्रभागिनेयावेव ग्राह्यौ. ' The V. Mayūkha p 111 follows the Dvaitanirnaya and states that usage is in accordance with its explanation ' विपूतं चैतद् द्वैतनिर्णये तात्पचरणै. शिष्टाचारोप्येवम् ।' In *Gopal v Hanmant* 3 Bom 273 at p 280 it was held that Nīlakantha also interdicted the adoption of the daughter's son and of the other two by the regenerate classes It is submitted that this view as to the position of the V; Mayūkha on this point is entirely wrong

adopt a daughter's son, a sisters's son or a mother's sister's son and that a śūdra must adopt one of these if available in preference to any one else. The Bombay High Court follows the interpretation of Śaunaka's verse given by Nandapandita in preference to Nīlakantha's, but in its turn disregards the authority of Nandapandita who forbade the adoption of a brother or uncle. It would have been far better if it had generally brushed aside everywhere the dicta of Nandapandita and preferred the interpretation of the Mayūkha. Popular sentiment is in favour of the daughter's son or sister's son being adopted, as they are the nearest and often the dearest relations, and yet the High Court shuts the door against them, while it opens it ajar for the adoption of a brother or maternal uncle or his son or one's own daughter's husband, which appears absurd to people. Besides the High Courts have recognised the adoption even of a daughter's son[1294] on the ground of custom by Deśastha smārta brāhmanas in the Dharwar District (vide *Sundrabai v Hanmant* 56 Bom. 298), by Telugu brāhmanas (*Viswasundara v. Somasundara* 43 Mad. 876). Śūdras can adopt a daughter's or sister's or mother's sister's son all over India. The D. M. went so far as to say that a widow could not adopt *her* brother's son.[1295] The D. M. ignored the fact that the widow adopts to her husband (and not to herself) who bore no relation to his wife's brother's wife and who could have himself adopted that son. The Bombay High Court and the Privy Council have discarded this absurd proposition of the D. M Pannalal in 'Kumaun Local customs'

1294 It may be noted that the question of the adoption of the daughter's son cropped up even in the times of the Peshwas. In 'Selections from Peshwa's Records' vol 43 No 146 pp 116–117 the opinion of Rāmśāstri, the Chief Justice of the Peshwa's court, is sought on the adoption of a daughter's son from the Ratnagiri District The Prthvīrāja Rāsau states that the famous Chohan hero Prthvīrāja had been adopted by his maternal grand-father Anangapāla of the Tomara dynasty of Delhi But modern historians say that this is imaginary (vide 'History of Medieval India' by Prof Ishwari Prasad p 9 n).

1295. तदाह वृद्धगौतमः। ब्राह्मणादित्रये नास्ति भागिनेयः सुत: क्वचित्। इति। भागिनेयपद् भ्रातृपुत्रस्यापुपलक्षणम्। तेन भगिन्या भ्रातृपुत्रो न ग्राह्यः। वृत्त. मी pp. 56–57. Vide *Bai Nani* v. *Chunilal* 22 Bom. 973, *Puttulal v Parbati* 42 I. A p. 155, where after admitting that the Dattakamimāmsā is embedded in law, the P C say that caution is required in accepting the glosses of Nanda Pandita where they deviate from or add to the *smrtis* (p 161).

notes that in that part of India a daughter's or a sister's son may be adopted (p. 14 para 56). It has been recently held that the adoption of the illegitimate son of a woman even among śūdras is invalid. Vide *Apya v. Ramakka* I. L. R. (1941) Bom. 350. This was relied upon for holding that a woman cannot give in adoption an illegitimate son among Lingayats in *Tirkangauda v. Shivappa* A. I. R (1944) Bom. 40.

It is now necessary to say a few words about the *dvyāmusyāyana*. A *dattaka* is of two kinds[1296], *kevala* (simple or ordinary) and *dvyāmusyāyana* (the son of two fathers). When a man gives *his only* son in adoption to another under an agreement that he is to be considered as the son of both the natural father (*janaka* or *janaka-pitṛ*) and of the adoptive father (*pālaka*), the son so given is called *dvyāmusyāyana*. The Bombay High Court has held that in order to constitute a *dvyāmusyāyana* an express agreement as stated above must be proved even when one brother adopts the only son of another[1297]. A dvyāmusyāyana inherits both in the natural and adoptive families. The word dvyāmusyāyana was employed in some of

---

1296. अथ च दत्तको द्विविधः केवलो द्व्यामुष्यायणश्च। संविदं विना दत्त आद्यः। आवयोरसाविति संविदा दत्तस्त्वन्त्यः। व्य. मयूख p 114. The दत्त. च (pp 61,66) employs the word शुद्धदत्तक for केवलदत्तक Vide *Laxmipatrao v. Venkatesh* 41 Bom 315, *Huchrao v. Bhimarao* 42 Bom 277 It has already been seen (p. 659) that the Mit employs the words dvyāmusyāyana and kṣetraja as synonyms. Nār. (dāyabhāga 23) appears to use it in the same sense, 'द्विरामुष्यायणा दद्युर्द्वार्ष्यं पिण्डोदकं पृथक्। रिक्थादर्धं समादद्युर्धीजिक्षेत्रिकयोस्तथा॥ In this verse Nār. does not employ the form dvyāmusyāyana, but the word āmusyāyana with the adverb 'dvih' meaning 'twice'. The word dvyāmusyāyana is made up of 'dvi' (two) and 'āmusyāyana' (issue of this man, issue of so and so) The word āmusyāyana occurs in the Tai Br. II 7 7. 7 (अपां य ऊर्मौ रसस्तमहमस्मा आमुष्यायणाय ओजसा वीर्याय गृह्णामि) and in the Atharvaveda IV 16 9, X. 5. 36 and 44, XVI. 7 8 in the form 'āmusyāyana amuṣyāh putra'. In the Hir gr. I. 9 19 we have इदमहमामुष्यायणस्य पाप्मानमवगृह्णामि, where Mātrdatta explains: अमुष्यायं आमुष्यायण इति. Similar words occur in the Bhāradvāja gr II. 19. Kātyāyana has vārtika 2 'आमुष्यायणामुष्यपुत्रिकेत्युपसंख्यानम्' on Pān. VI. 3 21. 'Āmusyāyana' is formed from 'amuṣya' (of this or that man) in the sense of 'apatya' acc to Pāṇini IV. 1. 99 (*naḍādibhyaḥ phak*) In the Āśv. Sr. S (Uttarasatka 6 13) the word 'dvipravācana' is employed for dvyāmusyāyana, 'अथ य एते द्विमवाचना यथैतच्छौङ्गशैशिरेय' on which Nārāyana explains, य एते द्विमवाचना ऋषिदृष्टयप्यपदेश्याः यथैते शौङ्गशैशिरा द्व्यामुष्यायणाः शौङ्गेयस्य क्षेत्रे शैशिरेयकीजोत्पन्नाः वंशाः.

1297. Vide *Laxmipatrao v Venkatesh* 41 Bom 315 and *Huchrao v. Bhimarao* 42 Bom. 277,

the smṛtis as applicable to all such sons as the dattaka, kṛita[1298]. The V. Mayūkha quotes a prose passage from Kātyāyana (which is attributed to Paiṭhīnasi in D. C) and the V. Mayūkha, D M. and D C. all quote a verse (which is ascribed to Pravarādhyāya by the first and to Pārijāta by the D. M.) that supports this. The D. M and D C. both quote two sūtras of Satyāsādha and Śabara's gloss (*bhāṣya*) thereon in which the *kṣetraja* is called *nitya dvyāmusyāyaṇa* and the dattaka and others are called *anitya* dvyāmusyāyana Yāj II. 127 and Baud. Dh. S. II. 2. 21 provide that a kṣetraja is the son of both the begetter and of the husband of the wife on whom the son is procreated. Therefore such a son is called *nitya* dvyāmusyāyana (because he is always the son of two fathers). When the kṣetraja became obsolete and forbidden, the only dvyāmusyāyana was an only son taken in adoption with a stipulation as described above. About the dattaka Manu IX. 142 states the general rule that the dattaka loses the gotra of his genetive father and assumes that of the adopter. But a dattaka belonged to two gotras according to some, if his saṃskāras up to *cauḍa* were performed in his natural family and the saṃskāra of upanayana and those that follow were performed in the adoptive family. Therefore it was not a general proposition that a dattaka always belonged to two gotras. If all the saṃskāras from *jātakarma* were performed by the adopter, then the dattaka would take the gotra of the adopter alone Hence the sons called dattaka and 'the bought' were styled *anitya* dvyāmusyāyanas (who were not in all cases dvyāmusyāyanas) The D. M. states this[1299] twofold division of dvyāmusyāyanas and employs the words *nityavat* or *nitya* and *anityavat* or *anitya*

1298 यत्तु-अथ चेद्दत्तकक्रीतपुत्रिकापुत्रा· परपरिग्रहेणानादेयास्ते द्व्यामुष्यायणा भवन्ति—इति द्व्यामुष्यायणानुपक्रम्य कात्यायन. । व्य. मयूख p. 115. वृत्त च p 46 ascribes this to पैठीनसि and reads, अथ वृत्तकक्रीतकृत्रिमपुत्रि· ग्रहेणावेण येऽन्न जातास्तेऽसङ्कृतकुलीना द्व्यामुष्यायणा भवन्तीति ।; द्व्यामुष्यायणका ये स्युर्दत्तकक्रीतकादय· । गोत्रद्वयेप्यनुद्वाह· शौङ्गशैशिरयोर्यथा । q from प्रवराध्याय by व्य मयूख p 118

to denote the two varieties and restricts the former only to a son adopted with a stipulation as stated above. The ksetraja became quite obsolete many centuries ago and the courts have held that the anitya dvyāmusyāyana is also now obsolete [1300] It is now held that every adoption is presumed to be in the simple (*kevala*) form, unless a stipulation that the boy will be the son of both is proved (when it will be a dvyāmusyāyana adoption).

When a man is adopted in the dvyāmusyāyana form, his son born after such adoption has been held to inherit as grandson to the adoptive father, if the dvyāmusyāyana son died before the adoptive father.[1300a]

Ceremonies of Adoption.—The most essential ingredient in adoption is the giving of the boy by the natural father and the taking of the boy by the adopter with the intention to transfer the boy to the family of the adopter. Another requisite (in some cases) is the homa called *dattahoma*[1301] which as described by Śaunaka and Baud. is given[1302] in the Appendix. It is not necessary that the *dattahoma* must be performed immediately after the giving and taking, but it may be performed later and its performance may be delegated to others when the giver or taker is a widow or a śūdra or is ill &c. Although in Vedic times women composed hymns and although Hārita and Yama stated that women had the upanayana performed on them and could study the Veda (H. Dh. vol. II pp. 293–295), in later times it was held that women could not study the Veda, could not repeat Vedic mantras and therefore could not perform any homa (including *dattahoma*). Therefore some writers said that a widow could not adopt at all, while others like the V. Mayūkha said that women are to be assimilated to sūdras and so just as a śūdra can get the dattahoma performed through a brāhmana, so a widow, though she cannot herself engage in homa, may employ a brāhmana to perform the dattahoma Vide H Dh. vol II. pp 365–368 (for deterioration in the

1301. तस्माद् वृत्तकादिषु संस्कारनिमित्तमेव पुत्रत्वमिति सिद्धम् । दानप्रतिग्रहहोमाद्यस्वत्वनाभावे तु पुत्रत्वाभाव एवेति । वृत्त. मी. p. 161.

1302. Vide Appendix.

position of women), and note 1262 above and V. Mayūkha quoted below.[1303] It has been held that the *dattahoma* is not[1301] necessary among twice-born classes if the boy to be adopted belongs to the same gotra as that of the adoptive father. Jolly (in T. L. L. p. 160) states that the Dattakadarpana refers to a text of Yama from the Sarasvatīvilāsa to the effect that *homa* is not absolutely essential in all cases. From Colebrooke's Digest V. 4 CCLXXIII it appears that Jagannātha held the same view The Dharmasindhu remarks that in certain countries an adoption of a sagotra sapinda boy can be validly effected with the mere assent of the giver and adopter without Vedic ceremonies There is a good deal of conflict in the case law on this point, which is passed over Among śūdras no *homa* is necessary. The ceremony of adoption as described by Baud. gr sesasūtra II. 6 4–9 (which is probably the oldest on record and which was the one to be followed by the Taittirīyas or followers of the Black Yajurveda, according to D. M., Sam K. p. 177 and the Dharma sindhu p. 161) is as follows· When about to take (in adoption) the adopter makes ready (or collects) the following viz two pieces of cloth, two ear-rings, a finger ring, an ācārya (officiating priest) who is well versed in the Veda, a bundle of kuśa grass, fuel sticks of palāśa (Butea Frondosa). Then in the midst of invited relatives, after informing the ruler, he serves food to brāhmaṇas in the assembly hall or in the middle of the house. *He (the adopter) makes (the brāhmaṇas)* pronounce the benedictions 'May the day be auspicious! May you fare well! May there be prosperity!' and performs the acts (usual in all homas) from drawing lines on the altar up to carrying forward the Prañitā water. Vide H of Dh. vol II pp 209–212 for the procedure common to all homas. Then he goes into the

presence of the giver and begs of him 'give me your son'. The other one (the giver) says 'I give'. He (adopter) then takes hold of the boy with the words 'I accept thee for the continuity (of my family)'. Then he decks (the boy) with the pieces of cloth, the ear-rings, the finger ring and performs the acts from laying fuel sticks round the altar up to the offering of oblations into fire; he offers boiled rice into fire with the mantra 'yastvā hṛdā' (Ṛg. V. 4. 10 or Tai. S. I. 4. 46 1) as a *puronuvākyā*[1305] (prayer of invitation) and with the mantra 'yasmai tvam sukṛte' (Ṛg. V 4. 11, Tai. S. I. 4. 46. 1) as a *yājyā* (prayer of worship or offering). Then having offered oblations of clarified butter with the vyāhṛtis[1306] he performs the acts from the offering to Agni Svistakṛt down to the giving of the cow and presents. He (the adopter) gives as dakṣinā (fee) to the priest these very pieces of cloth and rings (with which the boy was decked).

The procedure laid down by Saunaka, who appears to be much later than Baud., is somewhat different (though there is a good deal common to both) and is meant for the students of the Ṛgveda (acc to Sam. K. p. 175). A few salient points may be noted. The adopter should fast the previous day, he should offer *madhuparka* to the officiating priest, should perform all the details from the placing of fuel sticks on the fire up to the purification of clarified butter with the blades of kusa grass. The giver recites (when begged) the five verses beginning with 'ye yajñena' (Ṛg X 62 1-5) and the adopter holds the boy with both hands while repeating the mantra 'devasya tvā' (Āśv gr I. 20. 4), mutters the ṛk 'angād-angād' (quoted above on p 641 *n.* 1202) and smells the boy on his head The adopter offers boiled rice with Ṛg V 4 10, X. 85. 38, X. 85. 41-46. A much more elaborate procedure is set out in the V. Mayūkha (pp. 120-122 text) and the Dharmasindhu (III pūrvārdha pp. 160-161).

The results of adoption—Adoption has the effect of transferring the adopted person from his natural family into the adoptive family. Adoption confers upon the adopted person the same rights and privileges in the family of adoption as the son

1305 For the meaning of Puronuvākyā and Yājyā, vide H. of Dh vol. II. p 1060 n 2372 and pp 1058-59 respectively For the offering to Agni Svistakṛt vide H of Dh vol. II p 208 and appendix p 1257 n. 481.

1306. The vyāhṛtis are the mystic syllables *bhūḥ*, *bhuvaḥ* and *svaḥ*. The offerings will be accompanied with these syllables as follows: 'om bhūḥ svāhā', 'om bhuvaḥ svāhā', 'om svaḥ svāhā', 'om bhūr bhuvaḥ svaḥ svāhā'.

of the body (*aurasa*) except in a few well defined cases. The basic text on this point is that of Manu[1307] IX. 142 which may be literally rendered as follows: 'The son given should not take the *gotra* (the family name) and the wealth of his natural father; the pinda (the cake of boiled rice offered to deceased ancestors in śrāddhas) follows the *gotra* and the wealth (i. e. is invariably concomitant with them); of him who gives (his son in adoption) the *svadhā* (obsequial rites) ceases (so far as that son is concerned)'. The preceding verse (Manu IX. 141) states that the adopted son takes the wealth of his adoptive father and all that this verse says is that, after adoption, the son given in adoption does not take the name of his natural father and has no right in the wealth that then is the natural father's and that he does not perform the obsequial and śrāddha rites for his natural father. But from this verse a learned Hindu Judge derived the sweeping proposition that 'the theory of adoption depends upon the principle of a complete severance of the child adopted from the family in which he is born, both in respect to the paternal and maternal line, and his complete substitution into the adopter's family as if he were born in it'. There is no warrant for the idea of complete severance emphasized here. This dictum was followed in many cases and was accepted by the Privy Council[1308]. Another great Judge went so far as to

---

1307. गोत्ररिक्थे जनयितुर्न हरेद् दत्रिमः क्वचित् । गोत्ररिक्थाहृग् पिण्डो ध्वपैति वृदतः स्वधा ॥ मनु IX 142 The Mit on Yāj II 132 and V Mayūkha p. 115 read 'न भजेद् दत्रिम. सुतः'. But this reading makes no change whatever in the meaning, since in ancient sūtras and smṛtis, the roots '*bhaj*' and '*hṛ*' and derivatives from them are used promiscuously in the same sense with regard to gotra and riktha Vide the words gotra-bhājaḥ and riktha-bhājaḥ cited above (on p 650) from Baud. Dh S 11 2 36–37 and Gaut 28 30–31, the words 'riktham bhajeran' (in Gaut. 28. 19) and 'rikthabhāk' (in Gaut. 28 26), Vas 17 84 (tayoralābhe rājā haret), Yāj 11 132 (पिण्डदोंशहरश्चैषां) and II. 138 (दद्यादपहरेच्चांश), विष्णुधर्मसूत्र 15. 40 (यश्चार्थहर. स पिण्डदापी) Even 'apaharet' which ordinarily means 'should steal or take away' is used by Yāj II 138 only in the sense of 'should take or claim' Manu (IX 153 and 154) employs the words 'haret' and 'ādadyāt' in the same sense Vide also रिक्थभाक् (in Manu IX. 155) and भजेरन् (in IX. 192). Therefore the learned Judges in *Dattatraya v Govind* 40 Bom. 429 and in *Bai Kesarba v. Shivsangji* 34 Bom L R 1332 (at pp. 1340–41) unnecessarily enter into a long discussion on 'haret' and 'bhajet' and the several translations of these words by Golapchandra Sarkar and others.

1308. Vide *Uma Shunker Moitro v. Kali Komul* 6 Cal 256 (F. B.) at p 260. Vide *Kali Komul v Uma Shunkur* L R 10 I. A 138, 149 for the acceptance by the P. C.

say that 'an absolute adoption appears to operate as birth of the boy in the family of adoption and as civil death in the family of birth, having regard to the legal consequences that are incidents of such adoption'[1309]. But then the P. C felt that matters were being carried too far and administered the warning[1310] that "As has been more than once observed the expressions 'civilly dead or as if he had never been born in the family' are not for all purposes correct or logically applicable but they are complimentary to the term 'new birth'." We have to see what construction was put upon the verse of Manu by authoritative digests. The V. Mayūkha explains Manu IX. 142 and arrives at the conclusion that the four words *gotra*, *riktha*, *pinḍa* and *svadhā* are not to be taken literally but they are only used to indicate all those consequences only in relation to the natural father and the like that are brought about by their connection with the pinḍa and the verse of Manu conveys the cessation of all those consequences only. It further adds that the son on being given away in adoption ceases to have similar relationship to his brother, paternal uncle (in the family of birth). It should be noted that the V. Mayūkha does *not* say that the son given away is dead to the family of birth or ceases to have any connection whatever with the members of the family of birth, but restricts the cessation of relation to the offering of pinḍa and the taking of the estate after he is adopted. The D. M. quotes[1311] the Sm. C. (II. 289) and holds that by the gift the adopted son ceases to have the same gotra as the giver. The D. C. (pp 23–24) states[1312] the same proposition, without naming the Sm. C. The learned Judges who had to decide cases of adoption, even if they knew Sanskrit, do not generally appear to have consulted authoritative works other than the few that had been translated and were quite unaware as

to whether even the cessation of the pinda and gotra and of the right to wealth when a son was given away was so universally accepted by the leading Dharmaśāstra works as they thought. The Sarasvatīvilāsa (p. 394) quotes a text of Viṣṇu[1313] that even the adopted son should perform the obsequial rites of the natural father and explains that Manu IX. 142 applies when the natural father has no issue at the time of his death. Rudraskanda on Khādira gr. III. 5. 16 says the same. Kamalākara, the author of the Nirnayasindhu[1314] and a first cousin and contemporary of Nīlakaṇṭha expressly states that Manu IX. 142 only applies when the natural father has a son or sons (other than the one given away) and quotes Kātyāyana and Laugākṣi cited in the Pravaramañjarī (p. 146) in support. The Dharmasindhu[1315] also says that when a boy of another gotra is adopted after his upanayana is performed in the family of birth or when only the upanayana is performed by the adoptive father, the adopted boy should repeat both gotras at the time of bowing at the feet of elders or in śrāddha and other rites; but when all the ceremonies including the cūḍā are performed by the adoptive father then the adopted boy has only one gotra (viz. that of the adopter).

The plain meaning of the verse of Manu (IX 142) is that when a man gives away his son in adoption, then that son is transferred into another family, does not perform the śrāddha and similar rites for the giver and cannot claim to take the wealth of his natural father as a son on the father's death or demand a partition from his father. The other son or sons

of the giver are to perform the śrāddhas for the father and to succeed to the family wealth. But this verse has been twisted by some High Court decisions to yield another rule. Suppose A, a Hindu, has an only son B. On A's death B takes the whole ancestral property as the only surviving co-parcener and then B is given in adoption by his mother to X. Suppose B has a daughter C born to him before his adoption to X Does B forfeit the estate taken by him as the last surviving male with the result that on B's adoption to X his daughter C takes the estate (which had already vested absolutely in B) as if he was dead in the family of A. The Bombay High Court has held in two decisions that on B's[1316] adoption to X in the above illustration he loses or forfeits the property he took as the last surviving co-parcener in the family of A and his daughter C would take the estate of B as if he were then dead (though he is actually living) The result of these decisions is that the verse of Manu is construed as laying down that though a man may have been absolutely entitled to certain property as a member of one family, on his adoption into another family he loses that estate which then passes on to his heir as if he had died on the day of adoption This construction of the verse of Manu has not been accepted by the Madras and Calcutta High Courts,[1317] which hold that an adoption does not divest any property which has vested in a man previous to his adoption into another family. It may be noted that the Bombay High Court itself gave a decision[1318] which is inconsistent in principle with the two decisions

---

1316 Vide *Dattatraya v Govind* 40 Bom 429 (where Manu IX 142 is relied on for this proposition at pp 433–434) and *Manikbai v Gokuldas* 49 Bom 520

1317. Vide *Venkata Narasimha v Rangayya* 29 Mad. 437, *Behari Lal v Kailas Chunder* 1 C W N 121; *Shyama Charan v Sricharan* 56 Cal. 1135

1318 Vide *Mahableshwar v Subramanya* 47 Bom 542 In *Manikbai v Gokuldas* 49 Bom 520 (at p 525) both the cases viz 40 Bom 429 and 47 Bom. 542 are apparently quoted with approval, but it is extremely difficult to reconcile the last two cases If on adoption a separated coparcener is not divested of the estate already taken by him at a partition because the share taken by him cannot be said to be the estate of his natural father within the meaning of Manu IX 142, the estate taken by a sole surviving co-parcener also cannot be divested by his subsequent adoption, because at the adoption it had ceased to be the estate of his natural father long before the adoption, because when a co-parcener dies his rights lapse to the other co-parceners and because the root cause of being entitled to partition and taking as surviving coparcener is the same viz the birth right of a son under the Mitāksarā

cited above, when it held that where a father and his four sons partitioned ancestral family property and one of the sons was subsequently given in adoption into another family, the son so adopted was not divested by the subsequent adoption of the property already taken by the son on partition. In a still later case the Bombay High Court approves of its first decision in 40 Bom 429 and observes: [1319] 'the verse of Manu refers not only to the *riktha* of the natural father but also to the gotra of the natural father. It is quite clear that the gotra of the natural father is vested in the son by his birth. The gotra so vested in the son ceases after the son is given in adoption. It is difficult to understand why the riktha which is spoken of in the same manner as gotra in the verse should not cease by the entire cessation of connection with the natural family. The gotra and riktha are inextricably joined together in a dvandva compound and it would follow logically as well as grammatically that the adopted son must lose both together and cannot lose the former and keep the latter.' In this passage the premiss that there is entire cessation of connection with the natural family is entirely wrong as has already been shown and will be shown a little later on. The adoptee's connection with the gotra of the natural family does not cease for all purposes at all. Therefore the reasoning of the passage quoted above is entirely misconceived and is further opposed to two well known rules of the Mīmāmsā evolved for the construction of texts On the interpretation given to Manu IX. 142 by the Bombay decisions that verse lays down two rules (*vidhis*), viz. (1) a person adopted into another family will not take the wealth of his natural father or any one in that family *after* adoption; (2) that a person adopted into another family loses or forfeits on adoption wealth that he may have already taken absolutely in the natural family as a member of that family *before* adoption. These are two entirely different propositions and the rule of mīmāmsā is that one and the same sentence [1320] should not be construed as laying down two rules (*vidhis*) applicable to different sets of circumstances. To so construe a text is to be guilty

1319 Vide *Bai Kesarba v Shivsangji* 34 Bom. L R 1332 which accepts 'na haret' as meaning 'shall not take', and quotes on pp 1341–42 the D. M, D C and V Mayūkha on this verse The P C decision in *Raghu Raj Chandra v Subhadra* L R. 55 I A 139 does not approve of 40 Bom 429 as regards the exact point of decision viz the forfeiture of property already vested before adoption

1320 अनेकविधितो हि वाक्यभेद उक्तः। तन्त्रवार्तिक p. 551 on जै. II. 2 26

of the fault of *vākyabheda* (splitting up of a sentence so as to yield two distinct rules). The V. Mayūkha construed Manu IX. 142 so as to indicate only one sense and avoid the fault of *vākyabheda* on the analogy of two examples discussed in the Pūrvamīmāmsā[1321] works, but if the reasoning of the Bombay High Court were followed the same fault to avoid which Nīlakantha strives hard would be committed. There is another mimāmsā rule[1322] which will be violated by the Bombay High Court's interpretation of Manu IX. 142 viz. when an already existing thing or entity and something to be accomplished or brought about in future are spoken of together in a sentence the thing already existing or accomplished is mentioned simply for the sake of the thing to be accomplished The accomplished fact is adoption itself. Manu who mentions adoption or the adopted son which is an accomplished entity also mentions along with it the taking of property (rikthaharana); hence that taking must have reference to the future bringing about and not the undoing of rikthaharana which had already taken place long before.

That the gotra of the natural family persists in some matters even after a person is adopted is made clear by the digests. The Sam[1323] K. (p. 182) says that every dattaka must, when entering on marriage, avoid the gotra of his natural as also of his adoptive father. The Dharmasindhu (III. p. 161) says the same and states that the prohibition against marriage

IX. 1. 9 p 1652; भूतं भव्यायोपदिश्यत इति भूतं द्रव्यं भव्यां क्रियां निर्वर्तयतीति क्रियातोऽहत्वम्। तुप्टीका on जै. IV 1 18 p 1207. This is called भूतभव्यसमुच्चारणन्याय in the तन्त्रवार्तिक on III 4 24 and 11. 1 12 and it has been employed elsewhere by the व्यवहारमयूख (p. 111 text) शबर very frequently employs this maxim, vide e g on जै. II. 1. 4.

1323. विवाहे तु दत्तकमात्रेण बीजिप्रतिग्रहीत्रोः पित्र्योर्गोत्रप्रवरवर्जनं कार्यम्। प्रवरमन्त्रार्षाविनिबन्धेषु तल्लिपेधोक्तेः। सं. की p. 182; विवाहे तु सर्वदत्तकेन जनकपालकयोरुभयोरपि पित्र्योर्गोत्रप्रवरसम्बन्धिनी कन्या वर्जनीया। नात्र सासपोदकं पाञ्चपोदकमित्येवं दूरदर्शनियम उपलभ्यते। धर्मसिन्धु III पूर्वार्ध p. 161.

with a girl of the gotras of the natural and adoptive fathers is absolute and not restricted to seven or five degrees Thus if there is no total or absolute cessation of gotra relation with the *natural family* for all purposes there is no reason why in the case of wealth already taken before adoption there should be a cessation or forfeiture or why the cessation of relation as to riktha, should not be restricted to the future. As regards sapinda relationship there is some conflict among the digests The D. M.[1324] states that the *dvyāmuṣyāyana* has to observe the prohibitions against marrying a sapinda girl up to three degrees in the families of the natural father and of the adoptive father, while the simple dattaka has to observe *sapinda* relationship based upon the presentation of rice balls in the adoptive father's family for three generations (since the adopted son can generally have no particles of the body in common with the adoptive father) and in the natural family *sapinda* relationship based upon particles of the same body for seven generations. The Nirnayasindhu (III pp. 290–291) sets out the various conflicting views and gives it as its own opinion that the sapinda relationship must be looked to in marriage up to seven generations in the natural as well as in the adoptive family (in the latter it being based on the offering of balls of rice) According to the V. Mayūkha (p 119) the simple adopted son has sapinda relationship in the adoptive father's family for seven generations and in the adoptive mother's family for five generations and it seems to hold that there is no sapinda relationship in the natural family (owing to Manu IX. 142) The D. C. (pp. 61 66) appears to hold that the dvyāmusyāyana has to observe sapinda relationship (as stated in the D. M.), while as to the simple dattaka there is sapinda relationship only in the adoptive family for seven generations (as indicated by Manu IX 142) The Dharmasindhu (III. p. 161) states that sapinda relationship depends in its degrees on the question whether the adoption is made after upanayana in the natural family or before upanayana or whether all samskāras from *jātakarma* are performed in the adoptive family.

1324. यद्विद्द्व्युभयत्र त्रिपुरुषसापिण्ड्याभिधान तद् द्व्यामुष्यायणाभिप्रायेण त्रिक द्वयेन सपिण्डीकरणाभिधानाद् । शुद्धदत्तकस्य तु प्रतिगृहीतृकुले त्रिपुरुष पिण्डान्वयरूप सापिण्ड्यं जनककुले सप्तपौरुषमवयवान्वयरूपमेवेत्यत्र प्रपञ्चेन । दत्त. मी. p. 167, मम तु पालककुले एकपिण्डदानक्रियान्वयित्वरूप सप्तपौरुषमेव सापिण्ड्यं, नीजिनश्चेति गौतमोक्ते-र्जनककुलेपि तावदेव । नि. सि. III पूर्वार्ध p 291.

The Bombay High Court[1325] has held that the adopted son cannot marry within prohibited degrees in the natural family, that to that extent an adopted son cannot be considered as not to have been born in his natural family and that the sapinda relationship is recognized in both the families for the purpose of prohibition of marriage.

The Nir. S., the Dharmasindhu[1326] and the D. C pp. 48–49 declare that the adopted son can perform the śrāddha of his natural father if the latter has at his death no son or other qualified person to perform it. The Nir S. and the Sam[1327] K. (pp. 185–186) both say that the adopted son has to observe three days' mourning on the death of the natural father and *vice versa*; but the D M. and D. C (p. 68) differ and state that the simple adopted son has to observe no mourning for his natural father or other relatives in the natural family. If a married man having a son is given in adoption (which is possible in the Bombay Presidency) the son (born before the adoption) remains in the natural family and does not acquire the gotra and rights to property of the family into which his father is adopted. Yet the father who has gone into another family by adoption has been held to retain his right to give in adoption his son who was born before his own adoption and who remains in the natural family[1328].

From the above discussion it follows that the person adopted retains the tie of blood with his natural family (so that he cannot marry a girl within the prohibited degrees from that family), the samskāras already performed in the natural family are not repeated on him after adoption, he still retains the gotra so far that he cannot marry a girl having the same gotra as his natural father and further he has according to most writers to observe mourning for his natural father. Therefore it is clear that the severance from the natural family brought about by adoption is only partial and restricted to pinḍa and riktha

and connected matters and not *complete* as stated or assumed in some decided cases.

The adopted son is entitled to inherit in the adoptive family as fully as if he were a natural born son i. e. he may inherit not only to his adoptive father, but also to that father's brother or cousin if the latter have no son or no other nearer heir. The adopted son also inherits to the adoptive mother and her relations[1329], viz. her father and brother. Conversely, the adoptive mother and her relations in her father's family are entitled to inherit to him.

Vas. and Baud. both laid down that if after a son is taken in adoption an *aurasa* son is born to the adoptive father the former takes a fourth share. There is conflict among the smṛtis and the digests about the share of the adopted son when an *aurasa* is subsequently born, and about the meaning of 'a fourth share'. The Dāyabhāga (X. 13 p. 148) and V. C. p. 150 quote a verse of Kātyāyana[1330] that when an aurasa son is born, other kinds of sons, if of the same caste as the father, take only a third of the estate. It has been held in Bengal that in these circumstances the adopted son takes one third of his adoptive father's estate. In Benares and among Jains[1331] the adopted son gets one fourth of the estate. The S. V. p. 393 holds that he gets[1332] ¼th. In Bombay it[1333] has been held that the adopted son takes not ¼th of the whole estate, but ¼th of the share of the aurasa son i. e. ¼th (the aurasa son taking ¾ths). In Bombay the same rule applies among śūdras [1334] But in Bengal and Madras it has been decided, relying on a passage in the

C. is explained (at p 65) which is as follows: एवं धनिनः पुत्रान्तरसत्त्वे मृतपितृकस्य दत्तकपौत्रस्यापि दृक्चोचितांशभागित्वं तदसत्त्वे सर्वहरत्वमपीति । न च पौत्रस्य स्वपितृयोग्यांशभागित्वनियमात् दत्तकस्य ग्रहीतुः पितामहौरससत्त्वे तावद्दशपितृव्यतुल्यस्यांशस्य तद्योग्यत्वाद्दत्तकपौत्रः पितृव्यतुल्यमेवांशं लभतामिति वाच्यं, पुत्रस्य दत्तकत्वे चतुर्थांशः पौत्रस्य तु तथात्वे समानांश इति वैषम्यात् । ततश्च स्वसमानरूपस्य पितुर्यादृशांशः शास्त्रसिद्धस्तस्यैव स्वपितृयोग्यांशतेति यथोक्तमेव साधु । दत्त. च pp. 89–90.

1338a It appears to me that the V. Mayūkha went far beyond the spirit of the ancient smṛti texts and of most of the medieval digests when it allowed the adoption of a married man or even of one who had already had a son. The son to be adopted, it was declared by Śaunaka and others, should be a reflection of an aurasa son. Therefore he must be adopted at an age when by proper training and environment he will come to entertain towards the adoptive parents the same feeling that an aurasa son has. Hence it appears to me that the Legislature should intervene and provide that no one can be adopted after his upanayana, or at all events after his marriage, in the natural family. It is natural for a sonless man or a widow to feel, apart from religious considerations, the necessity of a young person as a solace, security and help in old age, and to adopt a person. Even in England by the Adoption of Children Act (16 and 17 Geo V chap. 29) the adoption of a minor is now allowed after observing certain formalities. Further, no adoption by a widow who has not become major according to the Indian Majority Act should be held valid. An agreement or a transfer of the smallest property by a person who is a minor according to that Act is held to be absolutely null and void. There is no reason why an adoption by a widow of 15 or 16 should be upheld when that adoption divests her of all (or now half of) the property of the husband held by her.

CHAPTER XXIX

ORDER OF SUCCESSION AFTER THE SON

It has been stated above that *dāya* is either *apratibandha* or *sapratibandha* and that sons, grandsons and great-grandsons take the first kind of dāya. If a man has no son either aurasa or secondary (viz. the dattaka, the other kinds of sons being now forbidden or obsolete), then his property devolves in a certain order. When a man dies sonless and is a member of a joint Hindu family then on the surviving coparceners the whole estate devolves except that after 1937 (by Act XVIII of 1937) his widow takes his place as to the joint family property. But if he dies separated and has male issue (from whom also he is separate) then his male issue will succeed to him in a body viz. his son, grandson (son of a predeceased son) and great-grandson (son of a predeceased son's predeceased son) will together take his separate property *per stirpes*. From Manu IX. 137 (which is the same as Vas. 17·5 and Visnu Dh. S. 15. 46) and 186 and Yāj. I 78 it follows that the son, grandson and great-grandson equally confer great spiritual benefit and so are the principal group of heirs. According to the strict theory of the Mitāksarā as stated above, son, grandson and great-grandson take by birth an interest even in property acquired by a man himself, but they have no power to prevent him from alienating it. If one or more out of a man's sons, grand-sons or great-grandsons are separate from him then on his death his self-acquired property will first be taken by those sons, grandsons and great-grandsons that are joint with him and if none of these is joint with him, the separated son, grandson and great-grandson will succeed *per stirpes* to his estate.[1339]

This view is at least as old as the Baud.[1340] Dh. S. I. 5. 113–115 which speak of the three ascendants of a man, of himself,

---

1339. Vide *Gangadhar v. Ibrahim* 47 Bom. 556, *Marudayi v Doraisami* 30 Mad 348 In *Ramappa v. Sithammal* 2 Mad. 182 (F. B.) a separated son was preferred as an heir to the widow of the deceased.

1340. अपि च पितामहः पितामह. पिता स्वयं सोदर्या भ्रातरः सवर्णायाः पुत्र पौत्रः प्रपौत्रस्तत्पुत्रवर्जं तेषा च पुत्रपौत्रमविभक्तदायं सपिण्डानाचक्षते । विभक्तदायानपि सकुल्यानाचक्षते । असत्स्वन्येषु तद्वामी ह्यर्थो भवति । बौ ध. सू. I 5. 113–115. The दायभाग (XI. 4, 5, 37) and दायतत्त्व p. 189 quote या, विष्णु and बौ, read 'सत्स्वङ्गेषु तद्वामी ह्यर्थो भवति' and अविभक्तदायादान् and explain बौ. at length.

of his full brothers and of his son, grandson and great-grandson from a savarna wife as one group called *ambhakta-dāya* sapindas and that in the absence of these only, the wealth of a man goes to his sakulyas.

On the succession to the property of a man dying without male issue (i. e. without son, grandson or great-grandson) the basic texts are two verses of Yājñavalkya[1341] (II. 135–136): 'The lawfully wedded wife, the daughters and (the daughter's son), the parents, the brothers, their sons, *gotrajas* (agnatic kinsmen), *bandhu* (cognatic relation), a pupil, a fellow student—on failure of each preceding one out of these each succeeding one is entitled to take the wealth of a man who is dead (lit. who has gone to heaven) and who leaves no male issue. This rule applies to all varnas'. The Visnu Dh. S. (17. 4–15) is almost to the same effect. The word 'aputrasya' in Yāj. is taken to mean one having no son, grandson or great-grandson (at the time of death) by V. C., Raghunandana and Mitramiśra[1342]. The Mit. explains the words 'to all varnas' as applying even to all that are the offspring of *anuloma* or *pratiloma* unions

We have separate rules for inheritance to the property of males and to that of females. Then there is great difference as to the rights of women as heirs. First, inheritance to the property of males will be taken up. Here again the fundamental principles are different acc. to the Mit and the Dāyabhāga

Among the heirs (apart from male issue) of a man as regards his separate property the first is the widow The wife's right to succeed to her deceased husband's estate, when he died separated and un-reunited, was acknowledged only after a long struggle extending over centuries The passage of the Tai. S. VI. 5. 8. 2 speaking of women as 'adāyādiḥ' has already

---

1341. पत्नी दुहितरश्चैव पितरौ भ्रातरस्तथा । तत्सुता गोत्रजा बन्धुशिष्यसब्रह्मचारिणः ॥ एषामभावे पूर्वस्य धनभागुत्तरोत्तरः । स्वर्यातस्य ह्यपुत्रस्य सर्ववर्णेष्वयं विधिः ॥ या. II. 135–136. The first is also लघुहारीत 64–65 Translations of these verses are cited in many cases; vide, for example, *Lallubhai v. Mankorebai* 2 Bom 388, 416

1342. अनपत्यस्य पुत्रपौत्रप्रपौत्रहीनस्य । पुत्रः पौत्रः प्रपौत्रो वा—इत्यादिना अमीषां पाठक्रमेणैव स्वधाधिकारे सिद्धे तत्समानशीलस्य रिक्थग्रहणस्यापि तथैवाधिकारसिद्धेः । वि चि p 151: अत्र अपुत्रपदं पुत्रपौत्रप्रपौत्राभावपरं तेषां पार्वणपिण्डदातृत्वाविशेषात् । दायतत्त्व p. 189; अपुत्रपद पत्नीत्यादिषु श्रूयमाणं पौत्रप्रपौत्राभावोपलक्षणम् । व्य. प्र. p. 503.

been quoted (on p. 606). The meaning of that word is somewhat dubious, as will be shown later on. The Āp. Dh. S. II. 6. 14. 2 states generally[1343] that in default of a son the nearest sapinda succeeds but does not expressly mention the wife as an heir, though it mentions (in II 6. 14 4) the daughter as a possible heir. Baud also omits the wife as an heir Vas mentions no woman as heir. Gaut 28. 19 appears to state that the wealth of one who dies without issue should be taken by his sapindas, sagotras and sapravaras or his wife (i. e. according to Haradatta, the wife takes a share only along with the nearest sapinda or sagotra and not exclusively). Haradatta himself was of this view. Manu does not declare that the wife is the heir of a sonless man and there are certain passages which impliedly exclude her, as e. g Manu IX. 185 (the father takes the wealth of a man dying sonless or his brothers take it), IX. 217 (the mother should take the wealth of a sonless man). Śankha (q. by the Mit., Dāyabhāga XI 1. 15) prescribes that the wealth of a man dying without issue goes to his brothers, failing them the parents take it or the eldest wife.[1344] Devala (q. by the Dāyabhāga XI. 1. 17–18 and V. R. p 593) arranges the heirs in order as full brothers, daughters, father, half brothers, mother and wife. It may be noticed that in the days of Kālidāsa the sonless widow did not succeed to the wealth of her deceased husband, but was only entitled to maintenance and that the estate escheated to the king. This is clear from the letter written by the minister to king Dusyanta about the wealth of a merchant who perished in a ship-wreck (Act VI) Yāj. and Visnu among smrti writers were probably the first to clearly enunciate the rule that the wife was the foremost heir of a man dying without male issue. Br. makes the wife the first heir of a sonless man and supports his

1343. पुत्राभावे यः प्रत्यासन्नः सपिण्डः। आप. ध. सू. II. 6. 14 2, पिण्डगोत्रर्षि-सम्बन्धा रिक्थं भजेरन् स्त्री वानपत्यस्य। गौ 28. 19 on which हरदत्त say: 'स्त्री तु सर्व-सगोत्रादिभिः सहोच्यते। यदा सपिण्डादयो गृह्णन्ति तदा तैः सह पत्न्यप्येकमंशं हरेत्।.. पत्नीदायस्तु आचार्यस्य पक्षो न भवति।'. On आप. II. 6 14. 2 he gives the view of गौतम, 'गौतमस्तु पुत्राभावे पत्न्याः सपिण्डादिभिः समांशमाह। अयमप्येतमेव पक्षं रोचयामहे'.

1344 स्वर्यातस्य ह्यपुत्रस्य भ्रातृगामि द्रव्यं तदभावे पितरौ हरेयाता ज्येष्ठा वा पत्नी। शङ्ख (q. by मिता on या II 135 and अपरार्क p. 741) दायभाग XI. 1, 15 p 154 ascribes this text to शङ्खलिखित, पैठीनसि and यम and adds सगोत्रशिष्यसब्रह्मचारिण after पत्नी अपरार्क also ascribes it (p 744) to शङ्खलिखित and पैठीनसि. The Mit. explains that it applies to re-united brothers

opinion with reasons. He says:[1345] 'In the Veda and in the doctrines of the smṛtis and in popular usage the wife is declared to be half the body of the husband, equally sharing the consequences of good and evil acts. Of him whose wife is not dead half the body survives. How can another obtain the property, while half the body (of the deceased) lives? Although kinsmen, although his father, mother or his relatives may be alive, the wife of a man dying without issue succeeds to his share. A wife dying before her husband takes away his sacred fires (i. e. she is cremated with the sacred Vedic fires, if he be an Agnihotrin); but when the husband dies before the wife, she takes his property, if she be chaste'. Even when Yāj. proclaimed the paramount right of succession in the case of widows there were other smṛtis and some early commentators who did not subscribe to that view. Nār. (dāyabhāga, 25–26) provides that if among several brothers one who is childless dies or becomes an ascetic the others should divide the property excepting strīdhana, that they should make provision for his women till their death in case they remain faithful but if they are otherwise (i. e. unfaithful) they may cut off the allowance'. Nār. (dāyabhāga, 50–51) provides that on failure of sons, the daughter, *sakulyas*, *bandhus*, a man of the same caste, the king succeed in order and thus omits the wife altogether. Vyāsa[1346] (quoted by Haradatta on Gaut. 28·19 and by Sm. C. II. p. 281) holds that a wife may take the whole of the husband's property if it does not exceed 2000 panas in value. The Mit. tells us that Śrīkara espoused this position that the wife takes the whole if

1345. आम्नाये स्मृतितन्त्रे च लोकाचारे च सूरिभिः । शरीरार्धं स्मृता जाया पुण्यापुण्यफले समा ॥ यस्य नोपरता भार्या देहार्धं तस्य जीवति। जीवत्यर्धशरीरेयं कथमन्यः समाप्नुयात् ॥ सकुल्यैर्विद्यमानेषु पितृभ्रातृसनाभिभिः । असुतस्य मृतस्य पत्नी तद्धागहारिणी ॥ पूर्वं मृता त्वग्निहोत्रं मृते भर्तरि तद्धनम् । चिन्वीत पतिव्रता नारी धर्म एष सनातनः ॥ बृह. q. by अपरार्क pp. 740–41, दायभाग XI. 1 2 pp 149–150, कुल्लूक on मनु IX 187, स्मृतिच. II pp 290–91 (ascribes the last to प्रजापति). The मिता. reads the third verse as कुल्येषु विद्यमानेषु ·सनाभिषु. The तै सं. VI. 1. 8. 5 reads 'अर्धो वा एष आत्मनो यत्पत्नी'. Vide H. of Dh. vol. II p 428 n 1015 for passages from the Veda and Mahābhārata for the wife being deemed to be half of the body. pp pp 556–57 for husband and wife enjoying the fruits of their actions together, and p 558 for wife's cremation with the Vedic fires and the sacrificial utensils of the husband. Both वसिष्ठ 21. 15 and पराशर X 26 say 'पतत्यर्धं शरीरस्य यस्य भार्या सुरां पिबेत्। पतितार्धशरीरस्य निष्कृतिर्न विधीयते ॥'

1346 द्विसहस्रपणो दायः पत्न्यै देयो धनस्य तु। यच्च भर्त्रा धनं दत्तं सा यथाकाममाप्नुयात् ॥ व्यास q by हरदत्त on गौ 28 19, व्यव. नि. p 450, विवादचन्द्र p 72. The अनुशासन 47. 23 reads, त्रिसहस्रपदो दाय....भर्त्रा तच्च धनं दत्तं यथार्हं भोक्तुमर्हति ॥.

the property is small, but only maintenance if the property is large and refutes it by saying that it is opposed to the spirit of Yāj. who allows a share to the wife and the mother even along with sons when even joint family property is being partitioned and that the view is also liable to the fault of *vidhivaiṣamya* on the analogy of the Mīmāmsā rule stated above on p. 605.[1347] The same text of Yāj. will have to be held as laying down only maintenance when the husband left great wealth, and also laying down a share equal to that of a son when the husband leaves inconsiderable wealth.[1347a] Another view was maintained

---

1347 पिण्डगो ..... नपत्यस्य । बीजं वा लिप्सेत । गौ 28. 19-20 This is explained by धारेश्वर as 'स्त्री वा रिक्थं भजेत यदि बीजं लिप्सेत'. The मिता. says that this really means that there are two courses open to the widow, viz. she may remain chaste and succeed along with the sapindas or she may resort to niyoga.

1347a Jai. VII. 3 19-25 as understood by the Mit. may be briefly explained as follows: The Cāturmāsyas (seasonal sacrifices) are four, Vaiśvadeva, Varunapraghāsa, Sākamedha, Sunāsīriya (vide H of Dh vol II. pp 1091-1105 for description). In regard to these the following texts occur in the Veda and are cited by Sabara and others: द्वयोः प्रणयन्ति । तस्माद् द्वाभ्या यन्ति ऊरू वा एतौ यज्ञस्य यद्वरुणप्रघासश्च साकमेधश्च । तस्माद् द्वाभ्यां यन्ति । .. उपाञ्ज वपन्ति । न वैश्वदेवे उत्तरवेदिमुपकिरन्ति न शुनासीरीये । (They carry forward the fire in these two; therefore they march on two, indeed the Varunapraghāsa and Sākamedha are the two thighs of *yajña*; therefore they (are said to) march on two; they fill with earth (the *uttaravedi*) here, but not so in Vaiśvadeva nor in Sunāsīriya). Sabara reads 'उत्तरवेदिमुपवपन्ति' while Mit. reads as above. *Pranayana* means 'carrying towards the east fire from the Gārhapatya fire to the Āhavanīya' There is pranayana in the Darśapūrnamāsa which is simple (and without details) and there is also pranayana in Agnistoma which is full of details (and not simple). An *uttaravedi* (vide H of Dh vol. II pp. 1096-1097 for description) is not required in Darśapūrnamāsa, but it is required in a Soma sacrifice The cāturmāsyas are modifications (*vikṛti*) of the Darśapūrnamāsa, so that whatever is prescribed in the latter follows in the absence of express directions as a matter of course in the former. In the texts quoted above the words 'dvayoh pranayanti' lay down a *vidhi* and the words 'tasmād . sākamedhaśca' contain an *arthavāda* which forms a syntactical whole with the vidhi and which only eulogizes it. The *pūrvapakṣa* argues: As cāturmāsyas are modifications of Darśapūrnamāsa, it is unnecessary to lay down expressly a simple pranayana in them, therefore, the pranayana prescribed in 'dvayoh pranayanti' must be the pranayana as described in a Soma sacrifice Further the prohibition of an uttaravedi in Vaiśvadeva and Sunāsīriya indicates the same, since a prohibition implies that there was a fear that what is prohibited would have otherwise followed and since an

(*Continued on the next page*)

by the Smrtisaṅgraha and Dhāreśvara, viz. that the wife would

(*Continued from the last page*)

uttaravedi is required only in a Soma sacrifice. Therefore the pranayana prescribed in 'dvayoh pranayanti' is of the Somapranayana type. To this a partisan of the *siddhāntin* (siddhāntaikadeśin) replies as follows:—The real view is that in *dvayoh pranayanti* the pranayana is of the simple darśapūrnamāsa type and the prohibition about Vaiśvadeva and Śunāsīrīya is not to be explained as you do; in the words 'upātra vapanti' an *uttaravedi* is generally (without exception) prescribed for all cāturmāsyas, but in the following two sentences 'na vaiśvadeve &c.' the preparation of uttaravedi is forbidden in the case of Vaiśvadeva and Śunāsīrīya, therefore the partisan says that the idea is that, though the pranayana is of the simple darśapūrnamāsa type, yet an uttaravedi is prepared in the 2nd and 3rd but not in the first and fourth of the cāturmāsyas. The pūrvapaksin retorts that even on this construction *vidhivaisamya* would still be there as follows: as there is prescription of uttaravedi in all four and prohibition in two (viz the first and fourth of the four cāturmāsyas), there is an option of uttaravedi in these latter two (as the rule is 'tulyabala-virodhe vikalpah') and there is no option as to the other two and there will arise the fault of *vidhivaisamya*, the same sentence viz 'upātra vapanti' being taken as an unqualified and independent rule about the 2nd and 3rd of the cāturmāsyas and taken as an optional rule as to the 1st and 4th.

The proper siddhānta view is as follows: Though the words 'dvayoh pranayanti' are very general, they are to be narrowed down so as to refer to only two (viz. 2nd and 3rd of the cāturmāsyas) on account of the recommendatory passage that follows (speaking of Varunapraghāsa and Sākamedha as the thighs of cāturmāsya yajña) The vidhi and the following arthavāda form one syntactical whole (*ekavākya*), as laid down by Jai I. 2 7. The arthavāda passage means that just as a man marches on in strength if his thighs are strong, so the cāturmāsya sacrifice reaches a successful close by means of Varunapraghāsa and Sākamedha in which an uttarvedi is specially prepared and fire is laid thereon (being taken from the āhavanīya fire by the adhvaryu and pratiprasthātr) Therefore the meaning is that there is pranayana in the 2nd and 3rd out of the four cāturmāsyas and uttaravedi is prescribed in those two alone and the words 'there is no uttaravedi in Vaiśvadeva and Sunāsīrīya' are a mere *anuvāda* (repetition of what is already known) and not a prohibition, as in the words 'fire should be kindled on the earth and not in the sky nor in heaven'. On this interpretation there is no vidhivaisamya Sabara makes two *adhikaranas* of Jai VII. 3. 19–25, while Kumārila makes one adhikarana of these seven sūtras He further differs as to the siddhānta, which, according to him, is that in 'dvayoh pranayanti' there is a special (*apūrva*) kind of pranayana prescribed, *prākrta* (of darśapūrnamāsa type) and *saumika* pranayana being the two other views which he rejects. The Subodhinī on the Mit. very lucidly explains this discussion and concludes. यथा तत्रैकदेशिमते विधिवैषम्यं दोषस्तथा 'पत्न्यः कार्या समाशिकाः,' 'माताप्यंशं सम हरेत्' इत्यत्र च सकृदाम्नातौ अंशसमशब्दावपि भर्तृबहुधनत्वपक्षे 'भरण चास्य कुर्वीरन्' इत्यादिवाक्यपर्यालोचनया जीवनोपयुक्तधनपरौ स्वल्पधनत्वे तु वाक्यान्तरनैरपेक्ष्येण नित्यवस्तुत्रांशसमांशपराविति श्रीकराद्युक्तव्याख्यानेपि विधिवैषम्यदोषो दुर्वार इति। The Bālambhattī repeats the Subodhinī almost word for word This *nyāya* occurs in Dāyabhāga XI. 5. 16 also.

take the estate of her sonless deceased husband if she submitted to *niyoga* and procured a son for the husband. This view derived support from Gautama 28·19–20, Vas. 17 65 (who prohibits niyoga if resorted to through greed of wealth), and Manu IX. 146 and 190 (which call upon the surviving brother to procreate a son on the widow of his brother and to hand over the deceased's share to that son). This view is refuted by the Mit.,[1348] Sm. C. II p. 294, V. P. pp 495–497.

Even Medhātithi,[1349] generally a liberal writer, holds that the widow is prohibited from inheriting her husband's wealth.

The Mit. after an elaborate statement and refutation of the views of Śrīkara, Dhāreśvara and others due to the conflict among smṛti texts on the question of the widow's right of succession, establishes the proposition that the widow, if chaste, is entitled to the whole of her deceased sonless husband's wealth.[1350] Almost all writers since the time of the Mit. accept the widow's right to succeed to her husband's wealth Many writers note that the smṛti texts on the heirship of the widow are in conflict.[1351] They explain verses like those of Nār. (dāyabhāga 25–26) providing only maintenance for women either as

It may, however, be noted that in a small treatise called श्वश्रूस्तुवाधनसंवाद of which there are three Mss. in the Maharaja's Sarasvati Mahal Library at Tanjore (Nos. 19003–5 described in vol. XVIII of their new Descriptive Catalogue) an attempt is made to establish that, if a man dies leaving a widow and his mother, both take equal shares in the estate The mainstay of the argument is a verse of Kāt. quoted in the व्य मयूख 'भो स्नुषेति कलत्रार्थी श्वश्रूश्वशुरणे रता । न कुर्याद्यदि शुश्रूषां चैलं पिण्डं नियोजयेत्' from which the conclusion drawn is 'श्वश्रूश्वशुरादिगुरुशुश्रूषणे रतायास्तदनुमतायाः सयतायाः तदिदार्या च सत्यां पत्न्या धनहारित्वं नान्यथा'.

referring to exclusively kept concubines of the deceased or to the wives of re-united coparceners.

Patni means a woman who is married to the deceased, the word being formed from 'pati' with an affix in the sense of 'being fit to join with the husband in the performance of sacrifice' (Pānini IV. 1. 33). The Sm. C. II. p. 290 quotes a verse that a woman who is procured for sexual intercourse in exchange for money is only a *dāsī* and is not a *patnī* and therefore is not entitled to inherit to a sonless paramour.[1352] The Baud. Dh. S. I 11. 20 quotes a similar verse. Several texts require that the widow must be chaste before she can claim the inheritance of the deceased. A text attributed to Vrddha-Manu[1353] says, 'The wife alone, being sonless and keeping the bed of her lord unsullied and leading a life of religious observances, may offer pinda to her deceased husband and take his entire estate'. Kāt. (926) also declares that 'the wife who is chaste takes the wealth of her husband'. The widow must be chaste at the time the inheritance opens. The courts have held that once the husband's estate is vested in the widow, it will not be divested or forfeited by reason of *unchastity subsequent* to the death of the husband.[1354] If the widow remarries after inheriting, then, though the remarriage of a widow is legalized by the Hindu Widows' Remarriage Act (XV of 1856), she forfeits the estate of the husband taken by her or the estate which she took as a widowed mother of her deceased son and it passes to the other heirs of the husband or son as if she were then dead and this applies to widows of all castes according to almost all High Courts (even when remarriage

I. 11. 20 This is cited as Manu's in व्य नि p. 397, which quotes a similar verse of Yama on p 398 व्य म. 488 says 'अत्र च दासीत्वकथनमङ्गीकृतार्थकर्मसु सदाधिकारराभावाभिप्रायेण। न तु दासीवदम्यत्वाभिप्रायेण। विवाहितात्वेन परदारत्वबाधात्।'

1353. अपुत्रा शयनं भर्तुः पालयन्ती व्रते स्थिता। पत्न्येव दद्यात् तत्पिण्डं कृत्स्नमंशं लभेत च॥ वृद्धमनु q. by मिता. on या. II. 135, दायभाग XI. 1. 7, वि. र. p. 589; पत्नी भर्तुर्धनहरी या स्यादप्यभिचारिणी। कात्या q. by the मिता. on या. II 135.

1354 Vide *Moniram v. Kerry* L. R. 7 I. A 115; *Sellam v Chinnammal* 24 Mad. 441; *Nehalo v. Kishen* 2 All. 150 (F. B.)

is allowed by the custom of the caste to which the widow belongs).[1355]

According to the Dāyabhāga there being no *apratibandha dāya*, the widow of a sonless member even in a joint family succeeds to his share in the family property and there is no difference between joint family property and separate property.

In the case of śūdras, if the owner dies leaving a widow or a daughter or a daughter's son and an illegitimate son, it has been held by the courts following Yāj. II. 134, the Mit. and Dāyabhāga IX. 31 that the widow or daughter or daughter's son takes one half and the illegitimate son takes the other half.[1356]

The rights of the widow in property inherited by her from her husband are limited. Kaut. III. 2 was[1357] probably the first to propound clearly the characteristics of the Hindu widow's estate and the verse of Kāt quoted below is remarkably close to the words of Kaut. The Mahābhārata (Anuśāsana 47. 24) states that women have only the right to enjoy the estate of their husbands and that they should not waste or destroy the

---

1355. Vide *Vithu v. Govind* 22 Bom. 321 (F. B.) and *Murugayi v. Vsramakali* 1 Mad. 226; but *Bhola v. Kausilla* 55 All. 24 (F. B) holds that a woman belonging to a caste in which remarriage of widows is allowed by custom does not forfeit on remarriage the estate of the first husband which she took as his widow, the principal reasons being, that there is no express text about forfeiture on subsequent unchastity and that it would be absurd to hold that a widow, who, on the P C, ruling in 7 I. A , does not forfeit the estate taken as heir by subsequent unchastity, should be liable to forfeit it by remarriage (which presumes that she wants to live a decent life). Looking to the expressed object of the Hindu Widows' Remarriage Act, section 2 should not have been so interpreted as to apply to widows who could remarry according to caste custom before the Act.

husband's estate (by gift, sale &c.). Br.[1538] (S. B. E. vol. 33 pp. 377–78 verses 50–51 and 53) states: 'when the husband is separate his widow takes all his various kinds of property such as a pledge, except immovable property. After having received movable and immovable property, gold, inferior metals, grain, liquids and clothes the widow shall cause (her husband's) monthly, six-monthly and annual śrāddhas to be performed. Let her honour with funeral offerings and pious charity her husband's paternal uncle, *gurus* (elders), daughter's son, sister's son and maternal uncle as also aged or helpless persons, guests and women'. Mādhava (Par M. III. p. 536) explains that 'except immovable property' means that she is prohibited from making a sale of immovable property without the consent of the male kinsmen. The V. Mayūkha (p. 138) accepts this interpretation and modern courts have done the same. In *Damodardas v.' Purmanandas* 7 Bom. 155 it was held that a widow to whom movable property was bequeathed by the will of her husband takes it absolutely But here the movable property was not *inherited* by her and as it was a bequest by will it became her strīdhana according to Nār (q. by V. M. on p. 155). Besides, this was a case from Bombay Island and was governed by the law of V. Mayūkha. In some early cases in Bombay it had been held that a widow in Western India under the Mitāksarā had absolute power over the movable property inherited by her from her husband. In *Gadadhar v Chandrabhagabai* 17 Bom. 690 (F. B.) it was held that under the law of the Mitāksarā a widow has no power to bequeath moveable property inherited by her from her husband and that to that extent the decision in *Damodar v. Purmanandas* must be treated as of no authority if it be interpreted to have decided the point in that way. In *Sha Chamanlal v. Doshi Ganesh* 28 Bom. 453 it was decided that even under the Mayūkha a widow inheriting movable property from her husband has no

1358. यद्विभक्ते धनं किंचिदाध्यादि विविधं स्मृतम्। तज्जाया स्थावरं मुक्त्वा लभेत मृतभर्तृका॥ जङ्गमं स्थावरं हैम कुप्यं धान्यं रसाम्बरम्। आदाय दापयेच्छ्राद्धं मासषाण्मासिकान्वितम्। पितृष्वसृस्वसृदौहित्रान्भर्तुः स्वसीयमातुलान्। पूजयेत्कव्यपूर्ताभ्यां वृद्धानाथातिथीन् स्त्रियः॥ बृह. q. by स्मृतिच II p. 291, वि. र p. 590 (last two), मदनरत्न (folio 99b), परा. मा. III p 536, व्य. मयूख pp. 137–138. The स्मृतिच, मदनरत्न and व्य. मयूख ascribe the last two to प्रजापति The मदनरत्न says that the verse यद्विभक्ते was ascribed to बृह. by the स्मृतिचन्द्रिका, but it should be disregarded as it is opposed to the verse जङ्गमं स्थावरं quoted in the कल्पतरु and others as that of बृह.। 'स्थावरं मुक्त्वेत्यभिधानं दायादानुमतिमन्तरेण स्थावरविक्रयनिषेधपरमिति माधवीये विचारण्यश्रीचरणाः।' मदनरत्न (folio 99b).

power to dispose of it by will. Lastly in *Pandharinath v. Govind* 32 Bom. 59 it was held, after an elaborate examination of authorities, that a widow is not under the Mitākṣarā competent to make a gift of the movables inherited by her from her husband and it was said (on p. 75) that possibly with the spread of education amongst, and the general emancipation of, their women Hindus may be led to call in aid the relief of Legislature. In cases arising under the Mayūkha a widow may dispose of movable property inherited by her from her husband by gift *inter vivos* but not by will. Kāt.[1359] (921, 924-925) propounds the limitations of the widow's rights as follows: 'A sonless widow, preserving the bed of her husband (unsullied) and residing with her elders and being self-controlled, should enjoy (her husband's property) till her death; after her the (other) heirs (of the husband) would get it. A wife who preserves (the honour of) the family would get the share of her husband when he is dead till her death, but she has no power to make a gift, sale or mortgage. A widow engrossed in religious observances and fasts, fixed in the vow of celibacy, always intent on restraining her senses and making gifts goes to heaven even though sonless'.[1360] These verses show that the widow was to enjoy the income of her husband's property till her death; that she could not sell or mortgage or give away immovable property without the consent of the heirs that would come after her and that for religious and charitable purposes or those that conduce to the spiritual welfare of her husband a widow had large powers of disposition. These rules

1359. अपुत्रा शयनं भर्तुः पालयन्ती गुरौ स्थिता। भुञ्जीतामरणात्क्षान्ता दायादा ऊर्ध्वमाप्नुयुः॥ कात्या. q by दायभाग XI. 1. 56, स्मृतिच. III. p. 292, मृते भर्तरि भर्त्रंशं लभेत कुलपालिका। यावज्जीवं न हि स्वाम्यं दानाधमनविक्रये। व्रतोपवाससनिरता ब्रह्मचर्ये व्यवस्थिता। दमदानरता नित्यमपुत्रापि दिवं व्रजेत्॥ कात्या. q by स्मृतिच II. p 292, व्य. मयूख p 138. The D. B. adds, 'अतः पत्नी दुहितरश्चेत्याविना ये पूर्वपूर्वस्याभावे परभूताधिकारिणो निर्दिष्टास्ते यथा पत्न्यधिकारभागभावे गृह्णीयुस्तथा जाताधिकारायाः पत्न्या अधिकारमध्वंसेपि भोगावशिष्टं धन गृह्णीयु ।' दायभाग XI. 1. 59. The first verse is quoted in *Bhugwandeen v Myna Baee* 11 Moo I. A. 487 at p. 517, 8 Mad. 290, 292, 5 Patna 646, 678. These verses are quoted or referred to in 8 Mad. 290, 292, *Pandharinath v Govind* 32 Bom 59 (which holds that according to the Mit a Hindu widow cannot make a gift even of the movables inherited by her from her husband), 42 Bom. 136, 143.

1360. It was believed that one to whom no son was born did not go to heaven (vide Ait Br. 'nāputrasya lokosti' quoted above on p. 654 n. 2239). An exception was made in the case of those who observed perpetual studenthood (Āp Dh. S. I. 1. 4. 29) and Manu extends it to chaste widows (V. 159-160). Vide Viṣṇu Dh S. 25. 17.

have been accepted by modern decisions; vide *Collector of Masulipatam v. Cavaly Venkata* 8 Moo. I. A. 500 at p. 551 for an oftquoted passage about the widow's powers of disposal. There is a large volume of case law on the widow's powers of alienation, on what are religious and charitable purposes and about the consent of the kinsmen, which have to be passed over here. The heir or heirs expectant on the death of a widow are called reversioners or reversionary heirs in the decided cases. There is no exact Sanskrit word to convey the same idea except 'dāyāda' that occurs in Kāt quoted above and in D. B., which makes it clear that the reversioners take the estate after the widow's estate ends (by death, remarriage, surrender &c.). The doctrine of the surrender by the widow of her estate in favour of the next heirs (the reversioners) whose estate is said to be accelerated is based on meagre foundations viz. the words of Kāt. and the D. B. quoted in n. 1359. Judicial decisions, however, have raised a stupendous structure on these slight foundations; but they are passed over here.

If a man dies leaving several widows then they may partition the property equally among themselves, as stated by the Mit.[1361]

If after partitioning among themselves, one of the widows dies, the portion given to her comes to the other widow or widows i. e. there is survivorship among them and no one else can succeed to the husband's property as long as there is any widow alive and not remarried. Hindu Law does not favour the distribution of a deceased man's estate among his several relatives, as some other systems (like that of the Moslems) do. It gives the whole estate to one heir or one class of heirs to the exclusion of all others. It is greatly to the credit of the ancient Hindu Law that it boldly gave all the separate property of a deceased male to women, viz. to the widow and after her to the daughter in preference to the man's own father or brother or nephew. Attempts are now being made through the Legislature that even when there are sons, the widow and daughters of the deceased should be given shares. Though these efforts spring from the laudable motive of enlarging the rights of women, they do not deserve unqualified encouragement. They will produce friction, cause fragmenta-

1361. ताश्च बहुष्वेवंजातीया विजातीयाश्च तदा यथांशं विभज्य गृह्णन्ति । मिता. on या. II. 135.

tion of lands, make holdings uneconomic and it is extremely doubtful whether they are in the best interests of society or nation as a whole and whether the vast mass of Hindus want them. Prajāpati[1362] says that the king should punish as thieves those sapindas and relatives that oppose or obstruct a widow in succeeding to her husband's estate.

The words of the Tai S. quoted above (p. 606) about women being without strength and not entitled to dāya (adāyādīh) really occur in the ritual of Soma offerings and should mean that women are not allowed to share in the drinking of Soma. But the Baud. Dh. S. (S. B. E vol. 14 p 231) appears to have taken them as excluding women from inheritance. Manu IX. 18 also relies on it and declares that the *saṃskāras* on women (except marriage) are not to be performed with Vedic mantras, as the Veda declares them to be 'nirindriya' and 'anrta'. Later writers like Haradatta (on Gaut. 28. 19, Āp. Dh. S. II. 6. 14. 1) and V. P. pp. 517 and 554 base the exclusion of women from inheritance on this passage of the Veda. They say that, though the Vedic text is very sweeping and general, it is meant to exclude only women other than those expressly mentioned in the smṛtis as entitled to inherit. For example, the Dāyabhāga XI. 6. 11 quotes Baud. and remarks that the wife is entitled to inherit because of special texts (like those of Yāj and Viṣnu) in her favour. The Sm. C II. p. 294[1363] says that the Vedic passage is only an *arthavāda* (meant for praise) and not an absolute rule and it must be taken as not referring to those women that are expressly mentioned (lit. by being seized by the horn). The V. P. says the same. Aparārka (p. 743) holds that the Vedic passage is merely an *anuvāda* and excludes women only when there is a son. It should be noted that the Par. M. (III. p. 536) holds that the Tai S passage merely means that the wife of the sacrificer is not entitled to partake of Soma

taken in the Pātnīvata cup and that 'indriya' means Soma drink.[1364] But Mādhavācārya in his comment on the Tai. S. I 4. 27 quotes Tai. S. VI. 5. 8. 2 and explains it somewhat differently as meaning that women being without strength do not take the heritage when there are children. It is very remarkable that both the Mit. and the V. Mayūkha do not at all refer to the Tai. S. or Baud. Dh. S. in speaking of the rights of women to inheritance. It cannot be said that they were unaware of them, but probably they took the Tai. S. text in the sense in which the Par. M explains it. The result of the reliance on the Tai. S. and on Baud. by most medieval digests has been that in the whole of India except in the Madras and Bombay provinces only five females are recognized as heirs viz the widow, the daughter, the mother, the father's mother and paternal grand-father's mother, because they were expressly mentioned as heirs in the smrtis or early commentaries. This subject will be pursued further a little later on.

The right of the wife to maintenance during her husband's life time has already been dealt with in H. of Dh. II. pp 568–569. If the wife was guilty of unchastity but repented of her lapse, she was still entitled to be maintained by the husband (vide H. of Dh. II. pp. 571–573). As regards the rights of maintenance of the widows of deceased members of a joint Hindu family there is a good deal of case law which is passed over here. One or two points may be noted. The right of the widows in a joint Hindu family are conditional upon their leading a life of chastity. Male members are often unwilling to maintain widows who are often compelled to go to court. In the 'Selections from Peshwa Daftar', vol. 43, there is an order (letter No 142) of Rāmaśāstrī, the chief justice of the Peshwa's court, calling upon one Bapuji Tambavekar under threat of penalties to restore the ornaments of the widow of his elder brother (that had died only seven days after marriage) and to give her a yearly maintenance of Rs. 125.

Daughters.—Daughters do not inherit as long as any widow of the deceased owner is alive. The daughter also had to

1364. या च श्रुति.—तस्मात्स्त्रियो ... अद्वायादा —इति सा पात्नीवतग्रहे तत्पत्न्या अंशो नास्तीत्येवपरा। इन्द्रियशब्दस्य 'इन्द्रिय वै सोमपीथ.' इति सोमे प्रयोगदर्शनात्। परा. मा. III. p 536. This explanation of the परा. मा is noted by the व्य. प्र p. 517, which adds that the sentence is only meant to extol the importance of the Pātnīvata cup (of Soma). The व्यव नि. p. 459 has almost the same words as those of परा मा

struggle hard for recognition as heir just as the widow had. Gaut., Baud and Vas omit the daughter as an heir. Ap Dh. S. II. 6. 143 recognizes the daughter as an optional heir (probably with sapiṇḍas). When Manu IX. 130 declares, 'one's son is like one's self and one's daughter is equal to one's son; how can another person take the wealth (of the deceased) when she who is the very self (of the deceased) lives', it appears from the context (IX. 128–129) that it is the *putrikā* (the daughter appointed as a son) that is intended to be referred to therein. Medhātithi, Nārāyana and Kullūka interpret the word 'duhitā' in Manu IX. 130 as applicable to the putrikā only In the Nirukta,[1365] Yāska cites Ṛg. III. 31 1 as relied upon by those who support the claims of the daughter to inheritance and also derives the word 'duhitā' in various ways, but from his explanation of Ṛg. III. 31 1 it appears that he is referring to the putrikā's right of inheritance. As the usage of appointing a daughter as a son became gradually obsolete, the ordinary daughter came to be recognized by analogy as the heir of a sonless man after the widow. Yāj. and Viṣṇu both recognize the daughter as an heir after the widow. Nār. (dāyabhāga, 50) recognizes[1366] the daughter as an heir after the son on the ground that she continues the lineage (of the deceased father) just like a son. When Nār. (dāyahhāga, 27) speaks of the daughter being entitled to maintenance till marriage, the context shows (as remarked by the Sm. C II. p. 296) that he is referring to the daughter of a person who was re-united at the time of his death. Br. declares[1367] (S. B. E. 33 p. 378 verses 55–56), 'the wife is declared to be the inheritor of the husband's wealth and, in default of her, the daughter; the daughter, like a son, springs from the limbs of a man: how can another man inherit her father's property while she lives?'. Though the words of Yāj, Viṣnu and Br. were clear enough ancient com-

mentators were not prepared to accept them in their literal sense. Viśvarūpa holds that Yāj. means only the putrikā and employs the plural in order to convey that several daughters may be appointed as sons. The Sm C. II. p 295 informs us that the same opinion was held by Dhāreśvara, Devasvāmin and Devarāta.[1368] The Mit rightly refutes these views by saying that the word 'duhitarah' in Yāj. cannot refer to 'putrikā', since Yāj, has himself stated the putrikā as equal to the aurasa son (in II. 128), as the putrikā is included among the sons by Vas and as the widow and the daughters are declared by him as heirs in the absence of all the sons, principal and secondary Yāj, Viṣnu, Br. are silent as to whether any discrimination was made between daughters as heirs. Kāt. (926) gives[1369] a preference to the unmarried daughter and the Mit. and the subsequent digests follow Kāt. The Dāyabhāga[1370] (XI. 2. 4 p. 175) quotes a prose passage of Parāśara preferring an unmarried daughter as an heir to a married daughter. Among married daughters the Mit., pressing into service a text of Gaut. on succession to strīdhana, holds by analogy that among married daughters the indigent (or unprovided for) one is to be preferred to one who is well-placed.[1371] Herein the Mit. follows common sense and the natural inclination of a father to feel more concern for a poor daughter. The Dāyabhāga prefers the unmarried daughter to the married daughter as is done by the Mit., but among married daughters Jīmūtavāhana, following an author called Dīksita, prefers one who has had a

son or who is likely to have a son to a widowed or barren daughter or to one who has given birth only to daughters. This preference is due to the principle of the Dāyabhāga[1372] that spiritual benefit is the governing factor in succession The barren daughter or widowed daughter is unable to confer spiritual benefit on her father since she will have no son that will offer pindas to the deceased owner (who will be the maternal grand-father). The Mit on the other hand relies on nearness of blood (prattyāsatti) as the guiding principle But, as pointed out by the V. P. p. 519, the Dāyabhāga is inconsistent. There is no reason on its own principle why the unmarried daughter should be preferred to a married daughter who has a son. The latter is then and there capable of conferring spiritual benefit while it is problematical whether the unmarried daughter will confer spiritual benefit (since she may after all be blessed with no son after marriage). Aparārka (p. 721) and V. R (p. 517) give three meanings of the word 'apratisthitā' viz. 'childless, poor, widowed'. In deciding whether a particular married daughter is indigent as compared with another, the Courts refuse[1373] to go into nice or minute questions of the respective monetary positions of their husbands and prefer one to the other only if there is great disparity or marked difference between their positions.

According to all High Courts in India except that of Bombay a daughter's estate is similar to that of the widow. She takes only a limited interest, can only enjoy the usufruct of the property and cannot alienate it. On her death the estate passes not to her heirs, but to the next heir of her father In Bombay,[1374] however, the daughter takes an absolute interest

in her father's estate when she succeeds as heir and on her death the estate will go to her own heirs.

A daughter is entitled to succeed, according to the decided cases, to her father's estate even if she be unchaste at the time of his death (except in cases governed by the Dāyabhāga).[1375] The reason assigned is that Kāt. and other smrti writers do not expressly mention the requirement of chastity in the case of the daughter or mother as they do as regards the widow. According to the[1376] Dāyabhāga (XI. 2. 8) Br. declares: ' a daughter equal in caste to the father and married to a husband of the same caste as her own, who is virtuous and intent on serving her husband, inherits her father's property '. Therefore a daughter who is unchaste cannot inherit. Further a daughter succeeds not because she is the daughter, but because she satisfies all conditions laid down by Br. The Dāyabhāga (XI. 2. 31) further says that the word ' wife ' (in XI. 1. 56) is merely illustrative and whatever restrictions are imposed on the wife apply to all women as heirs. The illegitimate daughter, even of a śūdra, has no right of inheritance to her father.[1377]

By virtue of local or family custom daughters have in some cases been held to be excluded from inheritance.[1378]

It may be noted that in his Vaijayantī (on Visnu Dh. S. XVII. 5-6) Nandapandita appears to have preferred a daughter-in-law to a daughter; but he stands practically alone in this. Vide Jolly's T. L. L. p. 199 and p 286 for quotation which however is not found in the D. C. Ms. No. 69 of the Vaijayantī. The daughter-in-law is not an heir at all in the whole of India,

except in Bombay (where she inherits as the widow of a *gotraja sapiṇḍa*) The Bālambhaṭṭī criticizes Nandapandita without naming him and holds that a daughter-in-law inherits only as a gotraja and not before a daughter.

Raghunandana in his comment on the Dāyabhāga makes the position about unchaste daughters quite clear[1379]. The smṛtis give preference among daughters to an unmarried daughter i. e. to a daughter who is a virgin (*kumārī*) It has been held by the Indian High Courts that though chastity is not required in the case of daughters to entitle them to inherit, yet in a competition between a married daughter and a daughter who was never married, but became a concubine or prostitute, the latter would be postponed to the former as the latter is not a virgin though unmarried. Some smṛtis like Parāśara[1380] employ the word *kumārī* in speaking of daughters' succession, while others employ the word '*kanyā*', but both words are synonymous In *Govind v. Bhiku* 46 Bom. L. R. 699, where a man died leaving as heirs a married daughter and another daughter who never married, but was living as the permanent concubine of another man, it was held that the latter cannot inherit the property of her sonless father to the exclusion of or along with his married daughter. The old texts speak of only unmarried daughters and married daughters and prefer the former to the latter. Medhātithi on Manu IX 132 says that *kanyā* means a girl who has had no sexual intercourse with any man. The Mit. makes three classes of daughters succeed one after another viz (1) unmarried daughter, (2) indigent married daughter, (3) well-to-do married daughter. Judicial decisions have added a fourth variety viz unmarried daughter who has become a prostitute. This fourth class being a new one must be placed after the other three classes expressly mentioned by the texts and commentaries on the basis of the maxim (intruders or uninvited persons must be seated at the end of or after those

that are specially invited) noted by Śabara on Jai. V. 2. 19 and X. 5. 1 and by Śaṅkara on Vedāntasūtra IV. 3. 3 and employed by the V. Mayūkha (text p. 143) for settling the place of the paternal grandmother after the brother's son.

The daughter's son (*dauhitra*). On failure of daughters the daughter's son inherits. Gaut., Āp., Vas., are all silent about the daughter's son and so are Yāj. and Viṣnu. But it has been plausibly urged by Viśvarūpa that, since[1381] Yāj. himself has (in II. 134) stated that the illegitimate son of a śūdra takes the whole estate if there be no legitimate son provided there exists no heir up to the daughter's son, the latter must have been intended to be an heir by Yāj. taking after the daughters. The Madanapārijāta (p. 672) relies on the word 'ca' in Yāj. to bring in the daughter's son. Though the printed text of Viṣnu Dh. S. is silent about the daughter's son, the Mit., the Dāyabhāga and others quote a verse of Viṣnu,[1382] 'when there is no continuance of lineage through sons and son's son the daughter's sons take the wealth (of the deceased owner); in offering śrāddha to the ancestors, daughter's sons are regarded as son's sons'. The V. Mayūkha (p. 142) includes a sūtra about the dauhitra in Viṣnu Dh. S. Govindarāja, a commentator of Manu, is said by the Dāyabhāga, to have held, relying on this verse of Viṣnu, that the daughter's son inherited the estate even before a married daughter of the deceased. But the Dāyabhāga did not approve of this view. The Dāyabhāga (XI. 2. 27) notes that Bālaka held that as the daughter's son was not expressly named by Yāj he came in as an heir after all those that were expressly mentioned as heirs. Baud. Dh. S. II. 2. 17 distinguished[1383] between the putrikāputra and daughter but it is not clear whether Baud. intended to lay down that the dauhitra was an heir. In IX. 131-133 Manu expressly says that the *dauhitra*

1381. अभ्रातृकस्तु दुहितृतत्सुताभावे सर्वभाक् स्याद्राज्ञाज्ञया बृहस्पतिवचनादेव—अनन्वयिन. सर्वे राजा हरेत्सवृत्तज्ञया वावरोधज इत्येके-इति। अस्मादेव च दौहित्राभाववचनाद् द्विजातीनामपि पुत्राभावे दौहित्रा धनभाज इति। अत एव च मातामहश्राद्धनियमोपपत्तिः। विश्वरूप ०म पा. 'अभ्रातृको ... इते'.

1383. अस्पुपगम्य दुहितरि जातं पुत्रिकापुत्रमन्यं दौहित्रम्। गौ. ध. सू. II. 2 17. The दायभाग XI. 2. 21 p. 181 quotes this and remarks, किं च स्मृतिषु दौहित्रपदमपुत्रिकाजातपरं निगदितम्।

should inherit the entire wealth of a sonless man, that he should offer one pinda to his father and another to the maternal grandfather and that in religious matters there is no difference between a son's son and a daughter's son, since their father and mother (respectively) spring from the body of the deceased owner. The context and the wording of these verses show, as held by Kullūka and other commentators, that the daughter's son here referred to is the son of the appointed daughter. But Manu IX. 136 is somewhat clearer. It says, 'through a son born to a daughter from a husband of the same class, whether she be appointed (as a son) or not, the maternal grand-father becomes one having a son's son; that son should offer pinda and take the wealth of the maternal grandfather'. The Mit takes the word 'akrtā' in this verse as referring to the ordinary daughter, while Medhātithi and Kullūka hold that this verse also only refers to the son of the putrikā and that krtā means an appointed daughter with regard to whom an express agreement was made with her husband, while akrtā means one (who is intended mentally to be appointed as a son) about whom there is no such express agreement Br. (S. B. E. 33 p. 379 verse 58) provides: 'just as (the daughter) gets ownership in her father's property (as an heir), though there may be other relatives, so her son also becomes the owner of his mother's and maternal grand-father's property'.[1384]

The daughter's sons inherit *per capita* and not *per stirpes*. Suppose that A has two daughters B and C, that B has three sons and C has two sons, that then both B and C die in A's lifetime; on A's death his estate will be divided into five parts, each daughter's son taking one fifth.

A daughter's son is really a bandhu and a *bhinnagotra sapiṇḍa*, but owing to historical causes and the high religious efficacy of the śrāddha offered by him he has been given a very high place among heirs by express texts.

Parents (pitarau) Great divergence prevails among mediaval digests on the position of the father and the mother as heirs to their son. Yāj gives no clue as to which among the parents is to be preferred if both are alive when their son dies. The text of the

1384 यथा पितृधनं स्वाम्यं तस्याः सत्स्वपि बन्धुषु । तथैव तत्सुतोपीष्टे मातृमातामहे धने ॥ बृह. quoted by व्यवहारभाग XI. 2. 17. p 180, व्य म p. 521.

Visnu Dh.[1385] S. as read by most digests places the father before the mother Manu IX 217 states that when the son dies issueless the mother takes his wealth, while Manu IX. 185 provides that the father takes the wealth of a sonless man and the brothers also. So Manu is not definite about the preference among parents. Kāt. (927) observes,[1386] ' of a sonless man (the heirs) are declared to be the wife of good family, the daughters, the father on failure of them, the mother, the brother and (the brother's) sons '. Br. (S. B E. 33 p. 379 v 63) says,[1387] ' when a son dies without leaving his own wife or male issue, his mother is to be considered as her son's heir or a brother may succeed with the consent of the mother '. In this conflict it may be stated that the Mit , the Madanapārijāta, S. V (p. 416), the V. C., the V. P. prefer the mother to the father, while the Dāyabhāga, the Sm. C., the Madanaratna, the V. Mayūkha prefer the father to the mother. Śrīkara[1388] held that both parents, if alive, succeed together. But the Dāyabhāga, Sm. C

1385. The विष्णुधर्मसूत्र 17. 4-16 read अपुत्रधन पत्न्यभिगामि । तदभावे दुहितृगामि । तदभावे पितृगामि । तदभावे मातृगामि । तदभावे भ्रातृगामि । तदभावे भ्रातृपुत्रगामि । तदभावे बन्धुगामि । तदभावे सकुल्यगामि । तदभावे सहाध्यायिगामि । तदभावे ब्राह्मणधनवर्जं राजगामि । ब्राह्मणार्थो ब्राह्मणानाम् । वानप्रस्थधनमाचार्यो गृह्णीयाच्छिष्यो वा । These passages are cited as बृहद्विष्णु in the स्मृतिच., मदनरत्न (folio 100 b), व्य. प्र. and some other digests and as वृद्धविष्णु by the मिता, the परा मा, व्यवहारसार (p 252). Tho व्य. मयूख p 142 and मदनरत्न add तदभावे दौहित्रगामि after दुहितृगामि. The वि र p. 595 and वि चि p. 151 reverse the order and read तदभावे मातृगामि तदभावे पितृगामि But the व्य प्र p 524 notes that such an order is found in no other work and so must be taken to be a mistake. Even the printed मिता reads पितृगामि first. तस्मात्स्मृतिचन्द्रिका-मदनरत्नकार-कल्पतरु-रत्नाकर-पारिजातकारप्रभृतीना बहूना पितुरभावे मातु. पुत्रधनाधिकार इत्येव सिद्धान्तः । वाचस्पतिना तु तदभावे मातृगामि तदभावे पितृगामि—इति बृहद्विष्णुवचन पठित्वा यथामिताक्षरमेव सिद्धान्तितम् । तत्तु कुत्रापि तदतिरिक्तग्रन्थे तथा पाठस्यालिखनाद् भ्रान्तिविलसितमेव । व्य. प्र. p 524. It is, however, to be noted that in the printed वि र (p. 592) the father is placed after the mother (मातुरभावे पित्रादीनामधिकारस्य स्थितत्वात्). So it is probable that the text of the वि र. was tampered with after the time of मित्रमिश्र

1386 अपुत्रस्याथ कुलजा पत्नी दुहितरोपि वा । तदभावे पिता माता भ्राता पुत्राश्च कीर्तिताः ॥ कात्या. q by मिता on या II 135 (reads चार्यकुलजा), स्मृतिच. II p. 299, परा मा. III. p. 526, व्य. मयूख p 141.

1387. भार्यासुतविहीनस्य तमस्य सुतस्य तु । माता रिक्थहरी ज्ञेया भ्राता वा तदनुज्ञया ॥ बृह. q. by अपरार्क p. 744, स्मृतिच II. 299, दायभाग XI 3. 2 p 186.

1388. अत एव श्रीकरेण पित्रोर्विभज्य धनग्रहणमुक्तं तदप्ययुक्तम् । पिता हरेदपुत्रस्य रिक्थं, स्वर्यातस्य स्वपुत्रस्य माता दायमवाप्नुयात् इत्येताभ्यां श्रीहियवयोर्निरपेक्षसाधनत्वबलिरपेक्षस्वामित्वमतीते. । स्मृतिच. II. p. 297.

and others criticise this view. The reasons why the Mit. prefers the mother before the father are three, out of which two are based on grammar. The word 'pitarau' in Yāj. is what is called an '*ekaśesa*' *dvandva* compound and in dissolving it or in the full-fledged dvandva the mother comes first in order and hence she should be preferred. Another reason is.[1389] A father may have several wives and sons from them all, so that a mother is directly related to her own son only and not to the other sons of her husband. So (the Mit. says) the mother has greater nearness (prattyāsatti) to her son than the father has The Sm. C. (II p 297) refers to Jai V. 1 14 where the Vedic sentence 'sārasvatau bhavatah' is interpreted and it is stated that the first oblation is offered to Sarasvatī because the Yājyā and Anuvākyā verses as first set out are meant for Sarasvatī (and not on the ground of the method in which the *ekaśesa* is dissolved); therefore as to *pitarau* also no reliance should be placed on the dissolution of the compound Nīlakantha in the V. Mayūkha denies the assumptions based upon grammar, says that Pān does not direct that in dissolving the compound the word mātā must be employed first and there is no authority for doing so.[1390] But the V. P. says that though Pānini may

---

1389. पिता सपत्नीषुत्रेष्वपि साधारण. । माता तु न साधारणीति मत्यासत्त्यति-शयोस्तीति विमलम्भसदृशमिदं न हि जननीजनकयोर्जन्य मतिं सन्निकर्षतारतम्यमस्ति। स्मृतिच II p 297.

1390. The general rule is that several words that would be in the same case when separately used may be compounded together to form a *dvandva*, when they are employed to convey the sense of 'ca', as said in 'cārthe dvandvah' (Pān. II. 2 29). Such a compound is called dvandva and mātā-pitarau is an example of it Another sūtra (I 2 64) of Pānini states that when words denoting several individuals of the same kind are to be compounded together, only one of them may be retained and that is called an ekaśesa compound, which is of two kinds, *sarūpa* (e. g. hamsaśca hamsaśca hamsau) and *virūpa* (when the two words are of different genders) The latter kind of ekaśesa is of restricted use In such a compound when a male and female are associated together only the word in the masculine gender remains or the word 'pitr' when compounded with mātr (vide Pān. I. 2. 67 and I 2 70). There fore we have two forms to denote the idea of parents viz. *mātāpitarau* or *pitarau*. In dissolving this compound (*pitarau*) we employ the phraseology 'mātā ca pitā ca' and in the word 'mātāpitarau' the word for mother comes first. Therefore among parents as heirs mother should come first Vide pp. 242-244 of my notes to the V. Mayūkha (ed. of text) where both the Mit. passage and its criticism by the V. Mayūkha are explained at length. In *Balkrishna v. Lakshman* 14 Bom. 605 both the Mit. and Mayūkha's criticism thereof are set out (pp. 608-609).

contain no such direction, all grammatical works like the Kāśikā dissolve the compound as 'mātā ca pitā ca' and grammatical usage for centuries supports the argument that the word mātā comes first[1391]. The argument about the mother being nearer is quite specious Looked at from the son (whose inheritance is in question), the mother and father are both equally proximate. The V. P. holds that according to the maxim that even a slight ground of difference leads one to determine (priority) the mother should be preferred to the father (since we dissolve the compound as *mātā ca pitā ca*). The V. P. (p 525) further tries to get over the text of Visnu (putting the father before the mother) by explaining that if the mother is most worthy as a *pativratā* and the father an ordinary man she should be preferred but if the father is more worthy than the mother he should be preferred. Hardly any one supports V. P. and the courts have not followed this. Owing to the difference of opinion among the digests on the question of the preference between parents as heirs, queer results follow. For example, in the province of Bombay itself the father is preferred as an heir to the mother in Gujerat, the island of Bombay and in Northern Konkan (because in these regions the V. Mayūkha has been held to be of paramount authority), while in the rest of the Bombay Presidency the mother is preferred to the father as an heir. The mother takes a limited interest as an heir which is the same as the interest taken by a widow as heir to her husband. The father would take an absolute interest. The word mother includes an adoptive mother; that is, if an adopted son dies leaving no son, widow, daughter or daughter's son, the adoptive mother would succeed[1392] to him as an heir (and even in preference to the adoptive father in those provinces where the Mit. is the supreme authority). In the case of a dvyāmusyāyana adoption, if the son adopted in that form dies leaving only his adoptive mother and natural mother, it has been held that both the mothers take his estate

1391. विग्रहवाक्ये यद्यपि पूर्वनिपातनियमो नाद्यशासनसिद्धस्तथापि व्याख्यातृसम्प्रदायसिद्धोऽस्त्येव । न हि क्वापि पिता च माता च पितराविति विगृह्यन्त इष्यते । किं तु माता च पिता च पितरावित्येवेत्यणुरपि विशेषोऽध्यवसायकर इति न्यायेन तस्यापि विनिगमकता संभवतीत्यनेनाशयेन तथोक्तं. संभवः । व्य. म. 525.

1392 Vide *Ananda v Hari Suba* 33 Bom. 404 (where, in the case of a simple adopted son, the adoptive mother was preferred to the adoptive father).

as co-heiresses [1393] It has further been held that if, after succeeding as adoptive mother to a dvyāmusyāyana son, the adoptive mother again adopts a son, the latter does not deprive the natural mother of the half share taken by her as heir of the deceased dvyāmusyāyana son.

The word 'mother' in the Mit. does not include a step-mother. The latter is not recognised as an heir of her step-son at all in the whole of India (except in Bombay) on account of the rule of the exclusion of women from inheritance [1394] except where texts expressly mention them as heirs and the property would go to the crown instead of to the step-mother, if the latter alone were left, but she would be entitled to maintenance In Bombay the step-mother would inherit as the widow of a gotraja sapinda, but she is assigned a remote [1395] place among gotraja sapindas If a widow remarries and then her son by her first husband dies without leaving a child, a widow, a daughter or daughter's son his remarried mother is allowed to inherit to him by the [1396] Bombay High Court, though if she inherited first as a mother and then remarried, she is held by the same court to forfeit the inheritance taken (on account of section 2 of the Hindu Widows' Remarriage Act of 1856).

The mother succeeding to her son takes only a limited estate i. e. she cannot alienate it except for legal necessity If Vijñāneśvara's definition of strīdhana be literally interpreted even property inherited from a son would be strīdhana. There is a striking example in E. I. vol. XIV p. 83 (the Śrīrangam plates of Mummadi Nāyaka in śake 1280) where a mother inheriting a village granted to her son Parāśarabhatta made a gift of it to the god Ranganātha at Śrīrangam.

1393 *Basappa v. Gurlingawa* 57 Bom. 74 (which holds that the adoptive mother and natural mother inherit equally). Vide *Kantawa v. Sangangowda* I. L. R. (1942) Bom 303 for the effect of adoption by the adoptive mother on the estate taken by the natural mother from a dvyāmusyāyana son.

1394. Vide *Rama Nand v Surgiani* 16 All 221; *Tahaldai v. Gaya Pershad* 37 Cal 214; *Seethai v Nachiar* 37 Mad. 286, all holding that the step-mother does not inherit to her step-son

1395. Vide *Kesserbai v. Valab* 4 Bom. 188 at p. 208 (for holding that 'step-mother' is not included in the term 'mother' in the Mit., but that she would inherit as the widow of a gotraja sapinda and so as gotraja sapinda herself). In this case numerous authorities are examined at length.

1396. Vide *Basappa v. Rayava* 29 Bom. 91 (F. B) for remarried mother inheriting to her son (by the first husband) dying after her remarriage.

Brothers (bhrātarah) and *brother's sons*. Acc. to both Yāj. and Visnu, on failure of the parents the brothers succeed and on failure of brothers, brother's sons inherit. There were apparently conflicting texts, Śankha, Manu (IX. 185) and others giving the inheritance to the brothers even before the parents. All these are somehow reconciled and almost all digests from the Mit. downwards are agreed that brothers inherit after the parents But again a conflict of views ensues. The Mit says that among brothers, those of full blood inherit in preference to half brothers (i. e. sons of the same father but sprung from a different mother). It then says that on failure of both kinds of brothers, the inheritance goes to brother's sons; but even here the sons of full brothers are preferred to sons of half brothers This view of the Mit. is shared by the Dāyabhāga and almost all eminent writers of digests except the author of the V. Mayūkha. The Mit. prefers the full brother to the half brother on the ground that the full brother has particles of the bodies of both the father and the mother of the deceased, while the half brother has only the particles of the father's body (the mother being different) Therefore the full brother is nearer than the half brother. The Dāyabhāga argues[1397] that the full brother offers pindas to the same three paternal ancestors and the same three maternal ancestors to whom the deceased was bound to offer pindas and is to be preferred to the half brother who offers pindas to the three paternal ancestors of the deceased alone (but not to the maternal ancestors of the deceased). This view of spiritual benefit being the governing principle in preferring the full brother to the half brother is accepted by Aparārka (p. 745) [1398] The reasons of the V. Mayūkha for preferring even the full brother's son to the half brother are: the word 'brothers' principally stands for 'brothers of the whole blood' (*sodara*) and only secondarily for brothers of the half blood. The general rule of Mīmāmsā[1399] is that the same word is

1397. सापत्नस्य च सोदरान्मृतदेवर्षादपौरुषिकपिण्डदातुर्मृतभोग्यमात्रपित्रादिपिण्डप्रदातृतया जघन्यत्वात् । दायभाग XI. 5 12.

1399 मुख्य एव विनियोक्तव्यो मन्त्रो न गौण इति । कुतः उभयाशक्यत्वात् । शबर on जै. III. 2 1. Compare दायभाग III. 30 p 67 (quoted on p 606 n. 1145) and न ह्येकस्मिन्प्रकरणे एकस्मिंश्च वाक्ये एकः शब्दः सकृदुच्चरितो बहुभिः संबध्यमानः क्वचिन्मुख्य क्वचिद्गौण इत्यध्यवसातुं शक्यम् । वैरूप्यप्रसङ्गात् । शारीरकभाष्य on ब्रह्मसूत्र II 4 3. Vide 6 Cal 119, 126 (F. B.) quoted in 41 I. A 290, 303–4 for this maxim.

not to be understood in the same sentence or rule as used in the primary and also in the secondary sense. Just as the word 'mother' applies only to the natural mother (and not to the step-mother), so bhrātarah should not include both full and half brothers. The V. Mayūkha is however wrong. As pointed out by the Dāyabhāga, when Yāj wants to speak of the full brother he employs the words '*sodara*' (Yāj. II. 138) and when he wants to refer to the half brother he employs the word '*anyodarya*' or '*anyamātrja*' (Yāj. II. 139). Therefore the word 'bhrātarah' applies to both full and half brothers in the primary sense. There are other smrti texts such as that of the Smrti-sangraha stating that brothers are of two kinds viz. those of full blood and those of half blood.[1400]

The Sm.[1401] C. II. 300 refutes the view of some that the word 'bhrātarah' in Yāj. is an *ekaśesa dvandva* compound that it means 'brothers and sisters' according to Pān. I. 2 68' (*bhrātr-putrau svasr-duhitrbhyām*) and that on failure of brothers sisters inherit. The V. Mayūkha[1402] also does not accept this interpretation of 'bhrātarah' advanced by some, since there is no reason why 'bhrātarah' should be taken as an *ekaśesa* of the *vrūpa* kind (which is restricted only to rare cases) and not of the *sarūpa* kind. The Bālambhattī supports the wider interpretation of 'bhrātarah' and at one time the Bombay High Court was inclined to accept this

1400 सोदर्याः सन्त्यसोदर्या भ्रातरो द्विविधा यदि । विद्यमानेष्वसोदर्येषु सोदर्या एव भागिनः ॥ संग्रह q. by स्मृतिच II p 300, व्य प्र p. 527

1401. यद्यपि भ्रातृपुत्रौ स्वस्दुहितृभ्यामिति शाब्दस्मृत्या पुत्रेभ्य इत्यत्र विरूपैकशेषं कृत्वा दुहितृणामनुप्रवेशोऽत्र कर्तुं शक्यते तथापि दुर्मांसो दायादा न स्त्रिय.—तस्मात्स्त्रियो निरिन्द्रिया अदायादीः—इति श्रुतेरित्येतेनेदं निरस्तं यत्कैश्चिदुक्तम् । स्मृतिच II p. 300 पुत्रेभ्यः refers to Āp Dh. S. II. 6. 14. 1. Bhrātarah, if it means only brothers, would be an ekaśeṣa of the *sarūpa* kind, but if it means 'brothers and sisters', it will be an ekaśesa of the *vrūpa* kind. The latter is to be resorted to only where there is a special reason to do so, as in the sentence 'bring two kukkutas, we shall make a pair of sponses' (and then kukkutau means a cock and a hen, while ordinarily it would mean 'two cocks'). कारणान्तरादेव हि कुक्कुटावानय मिथुनीकरिष्याम इत्येवमादौ विरूपैकशेषावगतिः । स्मृतिच II. p. 300.

1402 केचित्तु भ्रातर इत्यत्र भ्रातृपुत्रौ स्वस्दुहितृभ्यामित्यनुशासनाद् भ्रातरश्च स्वसारश्च भ्रातर इति विरूपैकशेषेण भ्रात्रभावे भगिन्य इत्याहुस्तच्च । विरूपैकशेषे मानाभावात् । व्य. मयूख p. 142 ; भ्रातृपुत्रौ इत्येकशेषेण भ्रातृपक्षसिद्धान्तरीत्या पूर्वं भ्राता तदभावे स्वसा । बालम्भट्टी on व्यवहार p. 209.

interpretation.[1403] The above shows that some at least of the medieval and later Hindu jurists were more sympathetic and well disposed to the enlargement of the rights of women, though their views failed to secure general acceptance It has been held that brothers by the same father (though by different mothers) are preferred to brothers by the same mother (though by different fathers), it being pointed out that "there is no provision in the Mitāksarā or elsewhere for the sons born of the same mother after her remarriage being treated as brothers of the same womb for the purpose of inheritance so as to be included in the meaning of the word 'bhrātaraḥ' used in the texts."[1404] But Nandapandita expressly provides in his Vaijayantī the following order of succession among brothers and sisters of the whole and of the half blood · (1) brothers of the whole blood, (2) sisters of the whole blood, (3) brothers who are sons of the same father, (4) brothers who are sons of the same mother (vide Jolly T. L. L pp. 208 and 287). Because Manu IX. 217 says that the wealth of a childless man is taken by the mother and that if the mother be dead, the father's mother would take it, the Sm. C. II. p. 299 places the paternal grandmother before the brothers, but it stands almost alone in this and the Mit. observes[1405] that Manu does not lay down the order but only provides that the paternal grand-mother is an heir capable of inheriting. The V. P. (p. 527) expresses its dissatisfaction with this method of the Mit. whereby only Yāj. and Visnu are deemed to lay down the order in which heirs

1403 *Sakharam v. Sitabai* 3 Bom. 353 at p. 359–368 (where the Mayūkha, Nandapandita and Bālambhattī on the interpretation of 'brothers' in Yāj. are referred to), but vide *Mulji v. Cursandas* 24 Bom 563 and *Bhagwan v Warubai* 32 Bom 300 for the proposition that the interpretation of the Bālambhattī has not been accepted by the courts as authoritative so far as the districts governed by the Mit. are concerned

1404. Vide *Ekoba v. Kashiram* 46 Bom 716 at p 718. In *Narayan v. Laxman* 51 Bom. 784 it was held that the sister of a prostitute is entitled to succeed to the prostitute's property as a sapinda before the property goes to the Crown by escheat, relying (at p. 793) on the analogy afforded by a passage from the Vaijayantī of Nandapandita on the Visnudharmasūtra quoted in Dr. Jolly's T. L. L. on 'Partition &c.' pp 208 and 287. तत्र प्रथमं समानमातापितृका भ्रातरो गृह्णीयुः । ... तदभावे समानमातापितृका भगिन्यो गृह्णीयुः । तदभावे तु वेपि (भिन्नोदरा) गृह्णीयुः । ... तत्रापि प्रथमं समानपितृका. पश्चात्समानमातृका बीजस्य प्राधान्यात्पश्यास्तेश्च क्रमनियामकत्वात् । वैजयन्ती.

1405 पितुर्माता धनं हरेदित्यस्य वचनस्य धनग्रहणाधिकारमात्रपरत्वादुत्कर्षे तत्सुतानन्तरं पितामही गृह्णातीत्यविरोधः । मिता. on या. II, 135.

take, while Manu, Śankha and others are deemed to be only concerned with declaring the right of certain persons to inherit.

The V. Mayūkha proposes a special order of inheritance as follows:—(1) full brothers; (2) then full brother's sons, (3) the gotraja sapindas of whom the first is the paternal grandmother, (4) then the sister, (5) then the paternal grandfather and the half brother at the same time, (6) then the paternal great-grandfather, paternal uncle and the half brother's son together. It should be noted that this conjoint inheritance by heirs of different degrees of ascent and descent which is peculiar to the Mayūkha has been regarded by the Bombay High Court as unknown in practice and obsolete [1406] Therefore it is probable that even in districts governed by the Mayūkha the order of heirs after the paternal grandmother and full sister would be half brother, then half sister and then half brother's son and then it will be the same both according to the Mit and the Mayūkha.

The Mit. does not expressly mention the sister at all but the Bombay High Court has held her to be a very near heir even where the Mit. is paramount, placing her after the brothers (whether full or half), brother's sons (whether of the whole blood or half blood) and paternal grandmother, the difference from the Mayūkha being that under the latter the full sister comes only after the full brothers and full brother's sons and paternal grandmother and before half brothers and half brother's sons.

One passage of the Mayūkha, being wrongly translated by Borradaile, has led the courts (including the P. C.) to decide that full brothers succeed along with the sons of a deceased full brother wherever the Mayūkha is supreme. The passage of the Mayūkha as translated by Borradaile (vide Stokes H. L. Books p. 88, IV. 8. 17) runs "the sons of a brother also, if themselves fatherless, at the time of the paternal uncle's death, provided they are capable of understanding (the use of) property, will divide the father's share with their father's other brothers, after the example 'among grandsons by different fathers, the allotment of shares is according to the fathers'".

1406 Vide *Sakharam v. Sitabai* 3 Bom. 353 at p. 363; *Kesserbai v. Valab* 4 Bom. 188 at p 208.

The text of the Mayūkha is given in the note below. It is[1407] almost the same as a passage of the Mitāksarā, which has not been misunderstood. Both passages contemplate a case like this A dies leaving B, C, D, his brothers, as his nearest heirs, so that A's estate vests in interest in B, C, D. Before the estate of A is actually divided by metes and bounds, B dies leaving three sons E, F, G. The last three had no right to the property of A at their uncle A's death because their father B was living at the time (i. e. *pitrvyamaranakāle jivatpitrkatayā asañjāta-dhanasambandhāh*). Yet when the property is later on actually to be divided they (E, F, G) will take the share which their father B would have taken if the property of A had been divided at the moment of A's death. Here a distinction is drawn between vesting of property (*dhanasambandha*) and its actual partition. But, in order to entitle nephews to take by actual partition, their father should have survived the deceased. This is the real meaning.

The Privy[1408] Council, following a wrong translation, held that, under the law of the V. Mayūkha, brothers and the sons

1407. भ्रातृपुत्रा अपि पितृव्यमरणकाले जीवत्पितृकतयासञ्जातधनसम्बन्धाश्चेत्–अनेक-पितृकाणां तु पितृतो भागकल्पना—इति न्यायेन पित्र्यमंशं पितृव्यान्तरैः सह विभज्य गृह्णीयुः । व्य. मयूख p 142, it appears that Borradaile read °मरणकालेऽजीवत्पितृकतया and misunderstood असञ्जातधनसम्बन्धाः. Compare मिता. 'यदा त्वपुत्रे भ्रातरि स्वर्याते तद्भ्रातृणामविशेषेण धनसम्बन्धे जाते भ्रातृधनविभागात्प्रागेव यदि कश्चिद् भ्राता मृतस्तदा तद्पुत्राणां पितृतोधिकारे प्राप्ते तेषां भ्रातृणां च विभज्य धनग्रहणे पितृतो भागकल्पनेति युक्तम्।'. Vide व्य. प्र p 528 for a passage similar to the Mit. The मदनरत्न (folio 101 a) and मद्. पा. p 672 have also a similar passage

1408 Vide *Chandika v Muna* L. R. 29 I A. 70 where this rule was applied to Ahhan Thakurs that had migrated from Gujerat to the United Provinces of Agra and Oudh before the V. Mayūkha was composed, on the ground that the Mayūkha only embodied and defined pre-existing customs. There was thus a double error. The Mayūkha was misunderstood and further the Mayūkha had nothing to do with Gujerat usages as it was composed by a Mahārāstra brāhmana whose family had migrated to Benares. It may be true to some extent as a general proposition that commentators and digest writers embody pre-existing customs of the districts where they wrote. But often times this is not so and varying statements of the law are due to individual opinions For example, the Mayūkha provides for the simultaneous succession of the paternal great-grandfather, the paternal uncle and the half brother's son ; but the Bombay High Court has discarded this view of the Mayūkha. The Mayūkha places the father before the mother as an heir, but V. T. composed by Nilakantha's own first cousin

(*Continued on the next page*)

of a brother that died *before* the propositus (the brother inheritance to whom is in question) shared the estate of the latter. This erroneous decision has been persisted in to this day on the principle of *stare decisis* The view of the Vaijayantī about the sons of the same woman from different husbands being sapindas of each other has already been noted (p. 727). Govindarāja on Manu III. 11 says that it is wellknown that children of different fathers but of the same mother are spoken of as brother and sister. Kullūka on Manu III 11 refers to this view of Govindarāja.[1409]

A question arises whether the distinction between full blood and half blood made by the Mit in the case of brothers and nephews was to be carried beyond them Though a Full Bench[1410] of the Bombay High Court held that the distinction was not to be carried beyond brothers and nephews and that paternal uncles of the half blood inherited along with paternal uncles of the full blood, the Privy Council overruled this decision and held that the preference of the whole blood to the half blood extends to all sapindas of the same degree from the common ancestor (and therefore a paternal uncle of the whole blood excludes one of the half blood) The Madanapārijāta[1411] p. 674 expressly extends the preference of the whole blood to paternal uncles.

(*Continued from the last page*)

places the mother before the father (folios 139–140). Following this case it was held in *Haridas v Ranchoidas* 5 Bom L R 516 that the son of a predeceased brother inherited along with the brothers of the deceased. This rule is not to be carried beyond brothers and brothers' sons. In *Kesarlal v Jagubhai* 49 Bom 282 the differing translations of the Mayūkha were referred to (at p 286), it was held that the principle of *stare decisis* required that the Privy Council decision should be followed and the estate of a deceased brother was allowed to devolve on the sons of a brother that had died *before* the deceased along with the surviving brother.

1409 भिन्नपितृकयोरप्येकमातृकयोर्भ्रातृत्वमसिद्धं । गोविन्दराज on मनु III 11.

1411. पितुरभावे भ्रातृणामिव पितामहस्याभावे पितृव्यास्त्रापि सोदरभिन्नोदरत्वयोः पूर्ववदेव । साक्षात्पितामहीपुत्रा प्रथमं धनभाजस्तदभावे सापत्नपितामहीपुत्रा । मद. पा. p 674.

It is noteworthy that the Vīramitrodaya which generally follows the Mit invokes the principle of spiritual benefit in preferring the full brother's son to the half brother's son [1412]

The heirs from the wife to the brother's sons are spoken of as 'baddhakrama' (lit whose order is fixed) in the Mit., the V. Mayūkha (p. 143) and other works and as 'the compact series (of heirs)' in the case law For example, in rejecting the view of some that rely on Manu IX. 217 that the father's mother succeeds immediately after the mother, it is said that the heirs from the parents to the brother's son being mentioned in a fixed order (by Yāj.), no place can be found for the father's mother in the fixed series of heirs and that Manu IX. 187 indicates only this that the father's mother is an heir.[1413] The V. Mayūkha relies on the popular maxim that when certain persons are specially invited for a meeting or a dinner they are seated on seats definitely allotted to them but that those who come uninvited are assigned places at the end of the row of those who were specially invited [1414]

The question arises whether the brother's son's son inherits immediately after the brother's son and before any other heir. There is a conflict among Sanskrit writers on this point. The Sm. C. II p. 300,[1415] the Subodhinī, the Madanapārijāta (p. 673) say that the compact series ends with the brother's son, while Aparārka, Varadarāja (V. Nir. p. 453) and the Vaijayantī of Nandapaṇḍita hold that the brother's son's son comes immediate-

In *Mohandas v Krishnabai* 5 Bom. 597 this maxim is quoted and it is said that it applies only to the compact series of heirs and that it does not apply to the list of bandhus enumerated by Nilakantha (p 602) The maxim is also relied on in *Govind Bhaushet v Bhiku* 46 Bom L R. 699

1415 गोत्रजा इति धनभाज इति शेष। गोत्रजशब्दोऽत्र गोबलीवर्दन्यायात् पूर्वोक्तपितृभ्रातृतत्सुतव्यतिरिक्तपितामहसुतादिगोत्रजेषु वर्तते। Sm C II p 300, vide V. P. p. 528 for almost the same words.

ly after the brother's son. A Full Bench of the[1416] Bombay High Court holds, basing its decision on the usage of the province, that the compact series ends with the brother's son, while the Privy Council would seem to lend colour to the view that in the Benares school it ends with the brother's *son's* son. The Dāyabhāga (XI. 6. 6 p. 208) places the brother's son's son immediately after the brother's son on the ground of the superior efficacy of the pindas offered by him.

Gotrajas (lit. 'those born in the same gotra' or agnates). Yāj. says that on failure of the heirs up to brother's sons the gotrajas succeed. Though one's father, brothers and brother's sons also are really gotrajas, they are expressly assigned certain fixed places in the order of heirs and other persons born in the gotra are included in the term gotrajas on the analogy of such an example as 'let the cattle be brought and also the bulls' where the bulls, though really included under 'cattle' (*gāvah*), are separately mentioned in order to emphasize that special attention must be paid to them on account of their intractable nature. Vide p 526 note 966 above. Acc. to the Mit. gotrajas are the father's mother (as the first among them), then other sapiṇḍas and samānodakas. The V. Mayūkha (p 143) also says the same thing and places the father's mother as the first among gotraja sapindas. It may be remarked that Yāj. avoids the word sapiṇḍa and employs the word gotraja. The Mit. and Mayūkha state that sapindas succeed as heirs and that sapindas are of two kinds, viz. *gotrajas* (born in or having the same gotra as the *propositus*) and those that are born in (or are of) a different gotra. These latter (viz *bhinnagotra sapiṇḍas*) are designated as *bandhus* by Yāj. Therefore it comes to this that, though Yāj. does not employ the word sapinda, the inheritance goes after the brother's son to the nearest sapinda. Yāj. knew the word 'sapiṇḍa' (I. 52) and defines the limits of sapinda relationship for marriage (in I. 53), from which it follows that he does not use the word sapinda in the sense given to the word by Jīmūtavāhana In I 68 Yāj mentions both sapinda and sagotra (in the matter of *niyoga*) and thereby indicates two things viz. that the words were not synonymous and that sagotra had the same sense as gotraja

1416. Vide *Appaji v Mohanlal* 54 Bom 564 (F B), in which *Buddha Singh v. Lalta Singh* L. R 42 I. A. 208 was distinguished on the ground that it was not an express decision on the question whether the compact series of heirs ended with the brother's son.

Āp. Dh. S. II. 6. 14. 2 provides[1417] that 'on failure of sons the nearest sapiṇḍa' (inherits). Manu[1418] IX. 187 is the classical text on this point, which appears to mean literally, 'whoever is nearest from among the sapindas, to him the estate (of the deceased) shall belong'. This verse has been variously explained by the commentators and digests and variously translated by eminent Judges and writers on Hindu Law. The chief difficulty lies in the expression 'sapindādyaḥ' and the words 'tasya tasya'. Some take the first as equal to two words 'sapiṇḍāt yah' and others as one word 'sapindādyah' (sapiṇḍa and the like). Some take one 'tasya' (of him) as referring to the deceased and the other to the inheritor; while others take 'tasya tasya' as both referring to the inheritor alone, corresponding to 'yah' (one more 'yah' being suppressed for the sake of metre) Though the printed text and most of the commentaries read the half verse of Manu as in the note below there are several digests that read it differently. For example, the Sm. C II. p. 301 reads it as 'yo yo hyanantarah pindāt' and quotes Dhāreśvara's explanation that 'pindāt' means 'sapiṇḍāt'. Kullūka and the Dāyatattva p. 195 explain 'sapiṇḍāt' as 'sapindamadhyāt' (from among sapiṇḍas) and this appears to be the best explanation. Br.[1419] (S. B. E. 33 p. 379 verse 62)

1417. पुत्राभावे यः प्रत्यासन्नः सपिण्डः । आप ध सू II. 6. 14 2.

1418. अनन्तर. सपिण्डाद्यस्तस्य तस्य धनं भवेत् । Manu IX. 187. Vide Bühler's note on this in S. B. E. vol. 25 pp. 366-368 for the varying interpretations of commentators. Bühler is not right when he emphatically says· "On philological grounds it seems to me improbable that 'anantarah sapindāt' can mean anything else than 'nearest to the sapinda' and that this sapinda can be anybody else than the deceased". In the first place the singular 'sapindāt' can be easily interpreted as used in a generic sense (*jātāvekavacanam*) i. e. as meaning 'sapiṇḍebhyaḥ' (from among sapindas). In Āp, Br. and other works wherever inheritance is spoken of, it is the *inheritor* who is required to be the *sapinda* or *bāndhava* or *sakulya* and the deceased is hardly anywhere spoken of as the sapinda of the inheritor but rather as 'mṛta', 'svaryāta', 'dhanin' &c. The verse of Manu is variously read. अनन्तरः सपिण्डो यस्तस्य तस्य धनं भवेत् । व्यव नि. p 451, मदनरत्न (folio 100 a), यो यो ह्यनन्तरः पिण्डात्तस्य तस्य धनं भवेत् । . तदेतद् धारेश्वरो व्याचष्टे यो यो ह्यनन्तरः पिण्डादित्यत्र पिण्डात्सपिण्डादित्यर्थो द्रष्टव्य· । स्मृतिच II 301, व्यवहारसार p 254 reads as यो यो as in स्मृतिच 'अनन्तरः सपिण्डाद्य इत्यनेन यः सपिण्डात्सन्निहित· तस्य सपिण्डसन्निहितस्य धनं सपिण्डस्य सन्निहितस्य धनं भवेदिति विहितत्वात् । सुबोधिनी p. 71.

says, 'when there are several *agnates*, *sakulyas* and *bāndhavas* (cognates), whosoever of them is the nearest shall take the wealth of him that dies without issue'

The important question is what is the meaning of the word 'sapinda'. The Mitākṣarā and the Dāyabhāga propound two different meanings of the word that have been explained at length in II. of Dh vol. II, pp. 452–458 and 472–477 Therefore it is not necessary to repeat those explanations The word 'sapinda' is employed by Pāṇini (IV. 1 165) in connection with the technical definition of *gotra* (Pān. IV. 1. 162) given by him. It appears to have been used in the sense of blood relationship as stated by the Kāśikā. According to the Mit. the right to inheritance depends upon blood relationship (connection through particles of the same body, *ekaśarīrāvayavānvaya*) and the preference among those who are blood relations is determined by nearness or propinquity (*pratyāsatti*) According to the Dāyabhāga, sapinda relationships is based on religious efficacy i. e. on the capacity to offer the cake or ball of rice in śrāddha and it has evolved a peculiar method of determining preference which will be explained immediately below. That there appears to have been a close connection between taking the wealth of the deceased and offering srāddha to him may be admitted But the question is whether a person was deemed to be an heir and entitled to take the estate of the deceased because he offered śrāddha to that person or whether the heirship was originally determined on other grounds and whoever took the estate was saddled with the responsibility of performing śrāddhas for the benefit of the soul of the deceased. It is difficult to give a convincing answer to this. It appears, however, that ancient sūtras do not emphasize the religious efficacy of pindas as the determining principle in heirship. Āp., Manu, Br. (particularly the first and last) speak only of nearness (which more naturally means 'nearness of blood'). Yāj omits the word sapinda altogether in mentioning heirs Manu IX. 142 states that pinda follows the gotra and riktha (wealth) Viṣnu Dh. S. XV. 40 declares, 'whoever inherits the estate (of the deceased) has to offer pinda to him'. This rule is emphasized even by those works (like V. Mayūkha)[1420] that make blood relationship

1420 मृतस्य रिक्थग्राहिणा येन केनापि राजपर्यन्तेनोर्ध्वदेहिक दशाहान्त कार्यम् । तथा च विष्णु । यश्चार्थहर स पिण्डदायी स्मृत—इति । व्य. मयूख p. 145, यो धनमादत्ते स तस्मै श्राद्धं कुर्यात्पिण्ड च त्रिपुरुषं दद्यात् । स्मृति q by अपरार्क p 746, मेधा on मनु IX 132, वि र p 599 and बालम्भट्टी II p 207 (ascribes to वृद्धशातातप) त्रयाणा तुल्योपकारित्वं च पार्वणनिधिना पिण्डदानेन स्पष्टम् । व्य म. 504

the test of heirship by saying that whoever even including the king (who takes by escheat on failure of all heirs) that takes the estate of the deceased must perform or arrange for the performance of the funeral ceremonies of the deceased up to 10 days after death and the śrāddhas, as said by the Brahmapurāṇa 220 79 (tadabhāve ca nṛpatiḥ kārayettvakutumbināṃ tajjātiyair-naraiḥ samyak-dāhādyāḥ sakalāḥ kriyāḥ) The Mit. view is upheld by V. R, V. C., Par. M., Madanapārijāta, Saraswatīvilāsa, V. Mayūkha, Bālambhaṭṭī and many other works. The theory of the Dāyabhāga is propounded by only a few medieval works and writers like Aparārka (quoted above on p 725), Raghunandana, Nandapandita. The Vīramitrodaya generally follows the Mit. but in certain cases it relies on or refers to the principle of religious efficacy in preferring one heir to another, as for example, in preferring the full brother to the step-brother (compare note 1397 and V. P p 528) or in preferring three male descendants to the widow It is therefore that the Privy Council remark,[1421] 'now it is absolutely clear that under the Mitākṣarā while the right of inheritance arises from blood relationship or community of blood, in judging of the nearness of blood relationship or propinquity among the gotrajas the test to be applied to discover the preferential heir is the capacity to offer oblations'. Its position is peculiar.[1422] It says that the capacity to offer pindas is not the governing principle as to heirship, but it is only useful in finding out the preferential heir among gotrajas.

Viṣṇu quoted by the Mit (not found in the printed Dharmasūtra) prescribes: 'If there be no son or grandson left for continuing the line, the daughter's sons shall take the wealth, for in regard to the obsequies of ancestors daughter's sons are regarded as son's sons'. This is in line with Manu IX. 136 (cited above on p 720) which says that the daughter's son should offer the pinda and take the wealth. Therefore it appears that Manu, Viṣṇu and others relied upon the capacity for the offering of pinda as the reason for being entitled as heir, but that this idea was vague and not elaborated in any way. The idea that blood relationship settled the right to inheritance is implicit in the order of heirs in Yāj Yāj. (II. 127) in speaking of the ksetraja son says that he inherits the wealth of both (the

1421 Vide *Buddha Singh v. Lalta Singh* 42 I. A 208 at p 227.

1422 नहि पिण्डदानाधिकार एव दायग्रहणे प्रयोजकः, ज्येष्ठे सति कनीयसामनधिकारेपि दायग्रहणात्। गोत्रजादीना दायदराणामनेकेषा समवाये पिण्डदानाद्युपकारिस्व धनस्वामिनो यत्तद्नुपकारिण्यापत्तेऽपर न तु तदेव प्रयोजकम्। व्य. म p. 461.

begetter and the husband of the wife on whom he is begotten) *and* offers pinda to both. He *does not* state that because he offers pinda to both he inherits the wealth. So this verse also favours the view that offering of pinda was a duty laid upon him who took the wealth (except in the case of male issue). Hence it appears that the theory of the Mit. also has a very respectable antiquity and further it has been followed by most medieval writers throughout India (except in Bengal).

The argument of the Dāyabhāga (which was propounded before it by a writer probably named Udyota[1423]) that the taking of a deceased person's estate depends upon the spiritual benefit conferred on him is briefly as follows. It relies principally on Baud Dh. S and Manu. In the section on the partition of wealth (which begins from IX. 103) Manu (IX. 137) declares the super-eminent spiritual benefits conferred by the son, grandson and great-grandson; further (in IX. 106) Manu states that the son gets all wealth from his father because he frees the latter from *debt*, that (in IX. 139) the daughter's son also is spoken of as saving the grandfather in the next world and as therefore entitled to the grandfather's wealth, that the verse immediately preceding Manu IX. 187 (declaring that the nearest amongst sapindas inherits) speaks of the offering of pinda to three ancestors; and since it is reasonable to presume that the blind and the like are excluded from inheritance (Manu IX. 201) because they are incapable of performing religious rites, it follows that Manu and others regarded the taking of wealth as dependent on the conferring of spiritual benefit. This point of view the Dāyabhāga emphasizes at every step. It[1424] says: "There are two purposes for which wealth is acquired, viz. for worldly enjoyment and for the unseen or spiritual benefit derived from making gifts and the like; but when the acquirer is dead, he cannot have enjoyment of the wealth and the *only purpose that remains* is the unseen purpose or benefit. It is therefore that Br. says, 'from the wealth inherited, the inheritor should carefully set apart half for the benefit of the deceased for defraying the expenses of the

The verse of बृह is q. by वि. र. p. 595, व्यव. नि. p. 447, विवादचन्द्र p. 81.

monthly, six-monthly and annual śrāddhas". The subject of śrāddhas will be dealt with in another volume. But here it is necessary to say a few words for making the position of the Dāyabhāga clear. Among the several kinds of śrāddhas two deserve notice, viz. *Ekoddiṣṭa* and *Pārvana.*[1425] The first (*ekoddiṣṭa*) is performed for the benefit of a single deceased person. There are sixteen such śrāddhas performed for the benefit of the deceased during the course of one year after his death or on the 11th day of death And every year on the anniversary of death an ekoddista śrāddha may be performed for a deceased person. The pārvana śrāddha is performed on certain specified days, such as the *amāvāsyā* of a month, or particularly in the dark half or on the *amāvāsyā* of Bhādrapada or on a *saṅkrānti*. In this śrāddha the three deceased paternal ancestors of the performer are principally invoked and the three deceased paternal ancestors of his mother are also invoked but their invocation is secondary and is dependent on the principal invocation. There is one more word that must be explained here viz. *sapiṇḍana* or *sapiṇḍīkarana*. This is a śrāddha rite performed one year after the death of a person or on the 12th day from his death. By this śrāddha the person recently deceased ceases to be a *preta* (a departed spirit) and is elevated to the rank of *pitṛs* (Manes). The widow and daughter can perform only the ekoddista śrāddha, while sons, grandsons and great-grandsons can perform the pārvana śrāddha also. The Dāyabhāga refers (XI. 1. 34 p. 162) to the fact that the three male descendants, by performing the pārvana śrāddha, confer great spiritual benefit on the owner (compare note 1342 above). Elsewhere (XI. 7. 17 p. 211) it designates the pārvana as 'traipurusika' (i e. performed for the benefit of three ancestors). When speaking of the right of the widow to inherit it emphasizes (XI. 1. 43 p 165), by quoting verses from Vyāsa,[1426] that

1425. 'एक॰ उद्दिष्ट॰ यस्मिन् श्राद्धे तदेकोद्दिष्टमिति कर्मनामधेयम्' मिता. on या I 251, तत्र त्रिपुरुषोद्देशेन यत्क्रियते तत्पार्वणम्। एकपुरुषोद्देशेन क्रियमाणमेकोद्दिष्टम्। मिता on या I 217. पार्वण means 'performed on a *parvan* day' Acc. to the विष्णुपुराण III 11. 118 the parvan days are, अमावास्या, पौर्णमा, चतुर्दशी, अष्टमी and रविसंक्रान्ति भविष्यपुराण q in श्राद्धतत्त्व p 192 defines the पार्वणश्राद्ध as 'अमावास्यां यत्क्रियते तत्पार्वणमुदाहृतम्। क्रियते वा पर्वणि यत्तत्पार्वणमिति स्मृतिः'.

a widow by leading a chaste life, by offering water mixed with sesame every day to her deceased husband, by making gifts and observing fasts saves himself and her husband in the next world. It adds that if the widow misbehaves she makes her husband fall, as husband and wife share in the fruits of each other's good and evil deeds. Therefore the widow takes her husband's wealth for his benefit Brhan-Manu (q. by the Dāyabhāga XI. 1. 7 and by the Mit.) declares that a sonless chaste widow should offer pinda to her husband and take his entire estate Similarly Prajāpati (cited above on p 709 and quoted by even the V. Mayūkha and other works of the Mitāksarā school) requires the widow who inherits all the movable and immovable property of her deceased husband to perform the monthly, six-monthly and annual śrāddhas of her husband.[1427] Similarly the Dāyabhāga allows the unmarried daughter or a married daughter having a son (or who is likely to have a son) to inherit because her son will offer pinda to the owner who will be the maternal grand-father. It prefers the daughter's son[1428] as an heir even to the father because the former offers a pinda to the owner himself, while the father offers pindas to two of the three paternal ancestors to whom the owner would have been bound to offer pindas. The D. B. winds up by saying[1429] that the order of inheritors must be followed in such a way that the wealth of the deceased may be most beneficial to (the soul of) the deceased. In certain respects the D. B. does not strictly and logically follow its own theory but is compelled to twist it by reason of the places assigned by special

texts to certain heirs.[1430] For example, the order of heirs according to the D. B. is; son, grandson and great grandson; widow; daughter; daughter's son: father; mother; full brother; half brother; full brother's son; half brother's son. But the persons entitled to perform the śrāddha of the deceased in order are somewhat different. In fact the order of succession does not strictly follow in any school the order of those that are called *śrāddhādhikārins*. The order of those who are entitled to offer śrāddha to a deceased separated male (*śrāddhādhikārin*) given in most works is as follows; son (aurasa or adopted); grandson; great-grandson; widow; married daughter; unmarried daughter who has succeeded to the deceased's wealth; daughter's son who succeeds to the wealth; full brother; half brother (son of a different mother); full brother's son; half brother's son; father; mother; daughter-in-law; full sister; half sister; full sister's son; half sister's son; paternal uncle; paternal uncle's son; other gotraja sapiṇḍas; sodaka; any gotraja; cognates such as maternal grandfather, maternal uncle, maternal uncle's son (i. e. the bandhus of the three kinds in order); pupil; son-in-law; father-in-law; friend; any brāhmana who takes a brāhmana's wealth or king who takes by escheat. Vide Nirnayasindhu III uttarārdha pp. 382–386, Dharmasindhu III uttarārdha pp. 368–369, Śrāddhaviveka p 48. If the principle of the capacity to offer or of the offering of pindas regulating the right to succeed is to be strictly and logically followed, there is no reason why the mother or the paternal grandmother should succeed immediately after the father or the paternal grandfather respectively. Her recognition in the D. B. school is due to the fact she is expressly mentioned in Manu as an heir. Similarly in the rules about the succession to re-united coparceners, the school of D. B. gives preference to re-united co-parceners and does not apply the theory of spiritual benefit. Further the Dāyatattva says that all that is required is the capacity

1430. Vide *Akshaya Chandra* v. *Haridas* 35 Cal 721 at p. 726 and *Nalinaksha* v. *Rajanikanta* 58 Cal. 1392 for the propositions that the doctrine of spiritual benefit cannot be applied consistently in all cases such as the succession of females to males, the succession of samānodakas &c. and that in cases not contemplated by Jimūtavāhana or his followers in the Bengal school, the principle of propinquity and of natural love and affection should be followed The Dāyatattva p. 195 after quoting Br. cited above observes that both the superiority of pindas offered and nearness of line are to be considered in inheritance, 'पिण्डदानसम्बन्धतारतम्येन आसन्नजननतारतम्येन च धनेष्वधिकारी'.

to receive pinda or the capacity to participate in the pinda offered by others and not the actual offering of pindas. For example, if a man performs srāddha for his ancestors, then dies, but no one performs his sapindana and therefore he does not participate in the pindas given to his ancestors, still his wealth will be inherited on the principle of religious efficacy [1431] Owing to considerations of space it is not possible to go into great detail about the several propositions established in relation to the theory of religious benefit as the determining factor in matters of inheritance. But the following propositions may be set out in one place:

(1) Benefits are conferred on the deceased by means of the *ekoddista* or the *pārvana śrāddha*. The capacity to perform the pārvana śrāddha is not the sole ground on which rests the right to inheritance to a man. Therefore the widow, the daughter and the pupil were recognized as heirs though they perform only the ekoddista śrāddha. But those who are competent to perform the pārvana śrāddha have a preferable claim to those who are entitled to perform only the ekoddista srāddha Therefore the male issue of a deceased person are preferred to a widow or daughter.

(2) Spiritual benefit is conferred on a man by presenting pinda directly to him or by offering pinda to one or more of his paternal ancestors to whom he presents pindas during his own life time and with whom he participates in pindas offered after his death by others or by offering a pinda to one or more of his maternal ancestors (mother's father, mother's father's father and the latter's father) to whom he was bound to offer pindas during his life (but with whom he does not participate in the pinda offered to them [1432]).

(3) The pinda offered to a man himself directly is of greater efficacy than the pinda offered to a paternal ancestor in which he participates after his own death as one of the Manes. Therefore the son, grandson or great-grandson is preferred to every one else. The brother offers a pinda to the father and two more

---

1431 अथ यः खलु पिण्डान् दत्त्वैव मृत परतश्चामासपित्रभाव स कथं सपिण्ड इति पिण्डदातृत्वभोक्तृत्वलक्षणसम्बन्धाभावादिति चेत्तद्योग्यतयेति ब्रूम । योग्यतामपोज्झ्य च सामान्यशास्त्रविषयत्वम् । शुद्धितत्त्व p 397

1432. यश्च जीवन् यत्पिण्डदाता स मृत सपिण्डनात् तत्पिण्डभोक्ता । तद यः सति भव्यरिक्थतः पुरुष पूर्वेषां जीवन् पिण्डदाता स मृत मन् सपिण्डनात् तत्पिण्डभोक्ता च। दायभाग XI. 1. 38 p. 163, शुद्धितत्त्व p. 396.

paternal ancestors of the deceased in which he (the deceased owner) only participates after his death. Therefore the brother is postponed to the son or daughter's son (who offers a pinda directly to the deceased himself as his maternal grandfather).

(4) The pindas offered to paternal ancestors have greater efficacy than those offered to maternal ancestors (hence a brother's son is preferred to a sister's son because the former offers pindas to his own and the owner's paternal ancestors, while the latter offers pindas to his maternal ancestors who are the paternal ancestors of the owner).

(5) The pinda offered to the owner's father is of greater efficacy than that offered to the paternal grandfather or great-grandfather. Therefore a brother's son or grandson is preferred to a paternal uncle [1433] Hence it should follow that all agnatic and cognatic descendants of the father of the deceased would be preferred to any descendant of the paternal grandfather or great-grandfather.

(6) Where the number of pindas offered by two claimants is the same, he who offers a pinda to the nearer ancestor is to be preferred.

The Dāyabhāga, strarting with Baud. Dh. S. (I. 5. 113 ff), Manu (IX. 186–187) and the Matsyapurāna elaborates its own definition in the following[1434] way. A man's son and a daughter are both born in the family The daughter's son springs from the family of his maternal grandfather but he belongs to another gotra (viz his own father's gotra); similarly, a man's sister (i.e. father's daughter) is born in his family but her son, though mediately sprung from the deceased owner's family, belongs to another gotra (viz that of the sister's husband): the same is true of a father's sister's son and the paternal grandfather's sister's son. A sister's son offers a pinda to the father

1433. पितृष्वो हि धनिनः पितामहमपितामहयोः पिण्डदः भ्रातृ. पुत्रस्तु धनिन प्रधानं पितरमेवादाय पुरुषद्वयस्य पिण्डदातेति स एव बलवानिति पितृव्यात्पूर्वमधिक्रियते। अत एव भ्रातृजापि पितृव्यस्य बाधकः मृतधनिकस्य पितु प्रधानस्यैव पिण्डदातृत्वात्। दायभाग XI 6 5–6.

1434 तस्माद्यो यत्तत्कुलोत्पन्नोऽतद्गोत्रोऽपि स्वदौहित्रापितृदौहित्रादिरतत्कुलोत्पन्नो मातुलादिर्धनिनो मृतस्य पितृमातृकुलगतत्रैपुरुषिकपिण्डदातृतया एकपिण्डसम्बन्धेन सपिण्ड तस्य तस्माप्यधिकारार्थं त्रयाणामिति वचनं, आनन्तर्येण च विशेषार्थमनन्तर इति वचनं वर्णनीयम्। तेन मृतभोग्यमृतदेयपित्राद्येष्वपिण्डदातृ पितृदौहित्रादेरभावे मृतदेयमातामहादिपिण्डदातृणा मातुलादीनामानन्तर्यक्रमेणाधिकारो बौद्धव्यः। दायभाग XI 6 19–20 p. 212. त्रयाणामुदक कार्यं is Manu IX. 186 and अनन्तर सपिण्डाद्य. is Manu IX. 187.

of the deceased, as the owner's father is the former's maternal grandfather and therefore he is connected as sapiṇḍa with the owner. A father's sister's son offers a piṇḍa to the paternal grandfather of the owner, who (paternal grandfather) is the maternal grandfather of the father's sister's son. A maternal uncle is not sprung even mediately from the family of the owner, but he offers a piṇḍa to his own father who is the maternal grandfather of the deceased owner. Therefore the maternal uncle or his son or son's son being connected with a piṇḍa that is offered to the maternal grandfather or maternal great-grandfather respectively of the deceased owner is a sapiṇḍa of the deceased owner. A maternal aunt's son also offers a piṇḍa to his mother's father, who is also the owner's mother's father and so the maternal aunt's son is a sapiṇḍa of the owner. The piṇḍas offered to the maternal ancestors by him are inferior and secondary. Further, one's own mother, the father's mother, father's father's mother were associated with their respective husbands as to the piṇḍas offered to the male ancestors and the same holds good about the wives of the maternal ancestors also.[1435]

The result of this way of defining a sapiṇḍa is to obliterate the distinction between a *gotraja* and a *bandhu*. Yāj (II. 136) expressly says that a bandhu can succeed only on failure of all gotrajas and so according to him a bandhu is one who is not a gotraja. The Dāyabhāga brings in the sister's son immediately after the the brother's son's son and before the paternal grandfather (i. e. even before a near agnatic ancestor) who is literally a *gotraja*, while the sister's son is literally not a *gotraja*. When the Dāyabhāga designates one's sister's son as sprung from the *kula* of the owner though not of the same gotra, he does violence to popular usage prevalent throughout India. An ordinary person in India hardly ever says that his sister's son or father's sister's son is born in his own *kula* The Dāyabhāga only quibbles over the word 'gotraja' in Yāj which it reads in the singular (gotrajah) and not in the plural (gotrajāḥ) as the Mit. does. Under the Mit. the sister's son is only a bandhu and cannot succeed before a paternal uncle or his son or a paternal grand-uncle or any other gotraja. The Dāyabhāga thus gives the go-by to the text of Yāj and shuffles in several

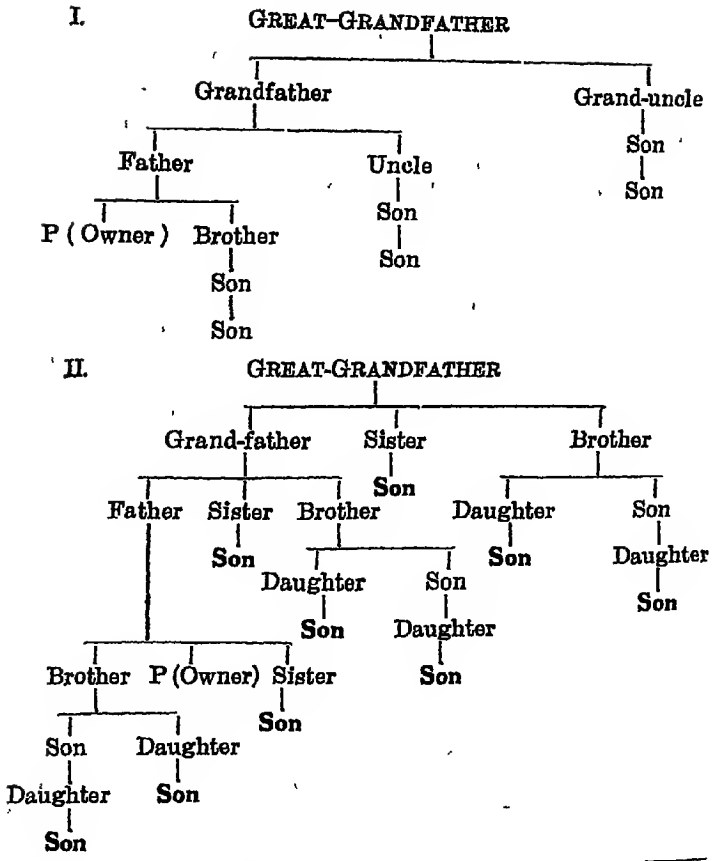
1435. मात्रादिशब्दाना स्वजननी-पितृजननी-पितामहजननीष्वेव मुख्यत्वात्तैरेव च पदैः श्राद्धेऽनुभवेशात्। यथा—स्वेन भर्त्रा सह श्राद्धं माता भुङ्क्ते स्वधामयम्। पितामही च स्वेनैव स्वेनैव प्रपितामही। सपत्नीमात्रादीना च पार्वणश्राद्धानुभवेशो निषिद्ध एव। दायभाग XI. 6. 3 p 207.

cognates as very near heirs The D. B. regards Manu IX. 186–187 as the crucial text and Yāj. II. 135–36 as only secondary.

The following diagrams will illustrate the working of the theory of religious efficacy. A person is a sapinda of those to whom he is bound to offer a pinḍa while he is alive, of those who on his death are bound to offer pinda to him (viz his three male descendants, his daughter's son, his son's daughter's son and his son's son's daughter's son) and of those who are bound to offer a pinda to the ancestors to whom he is bound to offer a pinda viz. to his three paternal ancestors and his three maternal ancestors and all of these are his sapindas The last of these three groups has four sub-groups :—sub-group No. 1 comprises those who offer pindas to their own paternal ancestors who are also the paternal ancestors of the owner. sub-group II contains those who offer pindas to their three maternal ancestors who are all or some of them the paternal ancestors of the owner, to whom he was bound to offer a pinda; sub-group III comprises those who offer pindas to their paternal ancestors all or some of whom are the maternal ancestors of the owner; sub-group IV exhibits those who offer pindas to their own maternal ancestors who are also the maternal ancestors of the owner. Each of these sub-groups contains 9 persons (as the minimum) who are all shown in thick type. If the owner has several brothers, sisters, uncles and aunts &c. the number of possible sapindas will be much larger. All heirs in the three sub-groups II–IV will be bandhus according to the Mitāksarā and will be postponed to gotrajas under the Mitāksarā. It should be noticed that Jīmūtavāhana brought in the father's daughter's son immediately after the father's great-grandson, the paternal grandfather's daughter's son after the paternal grandfather's great-grandson and the paternal great-grandfather's daughter's son immediately after that ancestor's great-grandson on the analogy of the rights of the owner's daughter's son and on the basis of Manu IX. 139 that the *dauhitra* (daughter's son) saves an ancestor in the next world just as a son's son does.[1436]

1436 किं तु पितुरपि प्रपौत्रपर्यन्ताभावे पितृदौहित्रस्याधिकारो बोद्धव्यो धनिदौहित्रस्येव । एव पितामहप्रपितामहसन्ततेरपि दौहित्रान्तायाः पिण्डप्रत्यासत्तिक्रमेणाधिकारो बोद्धव्यः । दौहित्रोऽपि स्वपुत्रैर्न सन्तारयति पौत्रवदिति हेतोरविशेषात् । स्वदौहित्रवत्पित्रादिदौहित्रस्यापि तद्भोग्यपिण्डदानेन सन्तारकत्वात् । दायभाग XI. 6. 8–9 pp. 208–209. In *Hurı Das v Bama Churn* 15 Cal. 780 at p. 796 these *placita* were considered and it was held that they are not to be extended to the brother's

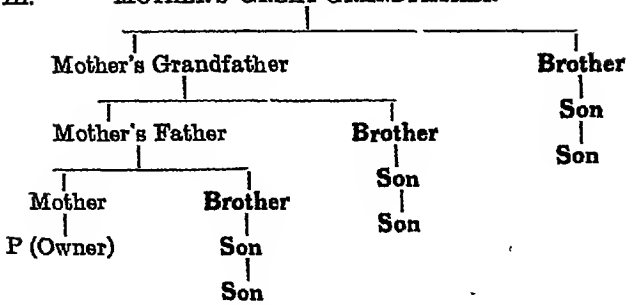
(*Continued on the next page*)



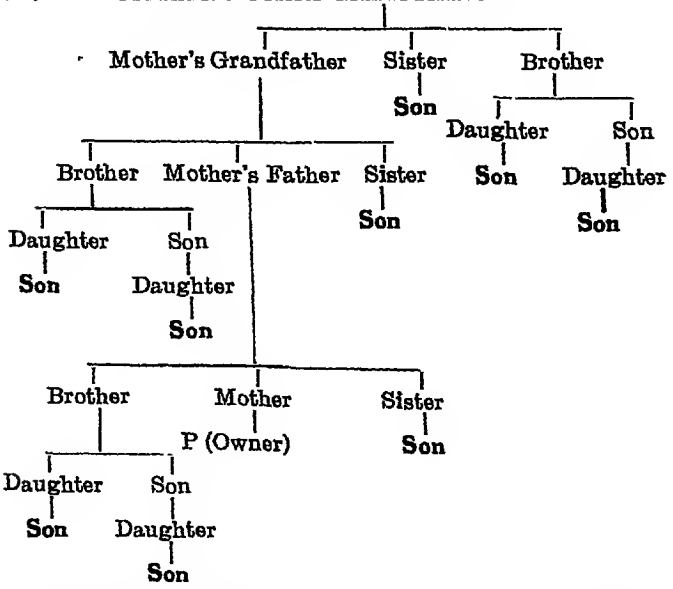
(Continued from the last page)

daughter's son and that the latter though a sapiṇḍa of the owner and an heir was not to be preferred to the great-grand son of the paternal grandfather of the propositus Sarvadhikari (T. L. L on Inheritance, 2nd ed. of 1922 pp. 701–702) criticizes this decision as wrong, but it does not appear that the Calcutta High Court is prepared to follow him A similar conflict arises as to several cognate heirs For example, the son's daughter's son and the son's daughter's son offer piṇḍas to the owner himself directly as a maternal ancestor (just as the daughter's son does) and therefore should be placed immediately after the daughter's son as heirs. But the Calcutta High Court would refuse to do so if the reasoning in 15 Cal. 780 be followed. Sarvadhikari (p. 709) however would place them immediately after the daughter's son.

III. MOTHER'S GREAT-GRANDFATHER



IV. MOTHER'S GREAT-GRANDFATHER



The D. B. says[1437] that the word 'gotrajah' (mas. singular) is employed by Yāj. for excluding all sapinda women (except

1437. याज्ञवल्क्येन च पित्रादिदौहित्रस्यापि तद्गोत्रजातस्य पिण्डदानानन्तर्यक्रमेणाधिकारमतिप्रथर्थं गोत्रजपदं कृतं सपिण्डस्त्रीणां च व्युदासार्थं तासामतद्गोत्रजातत्वात् । ..... मपितामहसन्तानस्य दौहित्रान्तस्य मृतभोग्यपिण्डदातुरभावे मृतदेयमातामहादिपिण्डदानेन पिण्डानन्तर्यात् मातुलादिग्रहणार्थं बन्धुपदं प्रयुक्तवान् याज्ञवल्क्यः । मनुना तु पिण्डदानानन्तर्यसूचनेनैव दर्शितम् । . . तस्मात् तद्भोग्यपिण्डदातुरभावे तद्देयपिण्डदातुर्मातुलादेरधिकारो ग्राह्य एव । दायभाग XI. 6. 10, 12, 13 दायतत्त्व p. 196 has a similar passage

those that are expressly named as heirs by special texts since they are not born or (even mediately) sprung from th family of the owner, as the sister's son or the father's sister' son that is held by it to be so sprung, that the word '*bandhu*' employed by Yāj to include a maternal uncle and the lik among heritable sapindas, since they are not sprung eve mediately from the *kula* of the owner and are also not of th same gotra, that the maternal uncle and the like come in onl after all descendants in the lines of the paternal ancestor inclusive of the great-grandfather up to the latter's daughter' son are exhausted,[1438] and that Manu had not to enter int these details as its two verses (IX 186–187) were quite enough to lead to all that has been elaborated by the D. B about th working of the theory of religious efficacy.

It will have been noticed that no female except the fiv expressly mentioned can inherit under the Dāyabhāga scheme and the result is that a man's own son's daughter or daughter' daughter does not take as heir, whereas a distant relative like th father's father's sister's son takes it. The same is also the case even under the Mitāksarā in the whole of India (except in Bombay and to some extent in Madras for which see a little later on)

A man offers only the leavings or remnants of the pindas that stick to his hand (when offering pindas to his three paternal ancestors) and that (leavings) are cast on kusa grass to three paternal ancestors above the paternal great-grandfather (Manu III. 216). So also the three male descendants beyond the great-grandson offer the leavings (called *pindalepa*) to the owner; these three remote paternal ancestors and the three remote male descendants (spoken of as 'vibhaktadāyāda in Baud. Dh. S. I. 5 114) are designated *sakulya* by Baud, and

1438. Vide *Kailasha Chandra v. Karuna Nath* 18 C W N, 477 where the above passages are considered at length and it is held that the paternal grand-uncle's daughter's son (though not expressly mentioned by the D B) is entitled to preference over the maternal uncle (who is expressly mentioned as an heir and a sapinda by D B), since the former offers a pinda to the paternal great-grandfather of the owner to whom the owner was bound to offer a pinda in which the owner participates after his own death, while the latter offers a pinda to the maternal grandfather of the owner to whom the owner was bound to offer a pinda in which, however, the owner did not participate after his death.

the D. B.[1439] (XI. 1. 38) According to D. B sakulyas succeed after all sapindas are exhausted Just as a man participates after his death in the pindas offered to his paternal ancestors so he would participate in the leavings also offered to his paternal ancestors from the 4th to 6th by their descendants (from 4th to 6th) The D B. remarks that this difference between sapindas and sakulyas is made only in the matter of inheritance But in the matter of the periods of mourning both the sapindas (strictly so called in the section on inheritance) and the sakulyas are designated sapindas by Manu (V. 60) and by the Mārkandeya-purāna (28. 4).[1440] According to Manu IX. 187 *sakulyas* succeed on failure of sapindas, while Visnu Dh S (XVII. 9–11) prescribes[1441] that on failure of bandhus, sakulyas succeed It appears that Visnu employs the word bandhu in the sense of sapinda Nār (dāyabhāga, 51) states that on failure of daughters and sakulyas, bāndhavas and persons of the same caste succeed Here it appears that sakulya and bāndhava are employed in the sense of gotraja and bāndhava as done in Yāj. The Bālambhatti says that *gotraja* and *sakulya* are synonymous. The Dāyabhāga appears to be somewhat inconsistent in its references to sakulyas. In XI. 6 15 and 23 it includes samānodakas among sakulyas, while in XI. 6 21–22 it defines sakulya as stated above. The Mit. on the other hand comprehends the sakulyas of the D. B. (as defined in XI 6. 21) under its gotraja sapindas

1441. तदभावे भ्रातृपुत्रगामि । तदभावे बन्धुगामि । तदभावे सकुल्यगामि । विष्णुधर्मसूत्र 17. 9–11 This is the reading of अपरार्क p 741, वि र. p. 595. The व्य प्र p. 530 says that in Visnu bandhu and sakolya stand for sapinda and sagotra Some works like दायतत्त्व (p. 189), दायभाग (XI. 1 5, p 151), व्य मयूख p 142 read 'तदभावे सकुल्यगामि तदभावे बन्धुगामि'. तत्र च पितृसन्तानाभावे पितामही पितामह पितृव्यास्ततपुत्राश्च क्रमेण धनभाज । पितामहसन्तानाभावे प्रपितामही प्रपितामहस्तत्पुत्रास्ततस्सूनवश्चैतत्पैतृमासप्तममात्समानगोत्राणा सपिण्डाना धनग्रहण वेदितव्यम्। मिता oo या. II 136

The Mit. states that the gotrajas are the paternal grandmother, the sapindas and samānodakas of the deceased. It then proceeds to say that the paternal grandmother is the first among *gotrajas*, then comes paternal grandfather. It paraphrases the word gotraja (born in the gotra) as *samānagotra* (having the same gotra) and then proceeds, 'on failure of the father's line (*santāna*) the heirs are the paternal grandmother, the paternal grandfather, the paternal uncles and their sons in order; on failure of the paternal grandfather's line the paternal great-grandmother, the paternal great-grandfather, his sons and son's sons inherit. In this manner must be understood the succession of sapindas belonging to the same gotra (as the deceased) up to the 7th degree'. According to the Mit. sapinda relationship extends up to the 7th degree (reckoned from and inclusive of the owner) Therefore the owner's sapindas for purposes of inheritance according to the Mit. are the owner's (1) 6 male descendants in the male line, (2) 6 male ascendants in the male line and the wives of the first three of them (that are expressly so declared, viz. mother, paternal grandmother and paternal great-grandmother) and probably the wives of the next three also, (3) the six male descendants of *each* of his six male ascendants in the collateral male lines. Besides, a man's wife and daughter are treated as his sapindas and the daughter's son, though a *bhinnagotra sapiṇḍa*, is placed high among the gotraja sapinda heirs

Even under the Mitāksarā in the whole of India (except in the Bombay and Madras schools), no women succeed as gotraja sapindas (except five expressly named and cited above on p. 713). In Bombay the sister (full or half) is brought in as a gotraja by the V Mayūkha (though the Mitāksarā is entirely silent) and placed by it immediately after the paternal grandmother. It relies on the general words of Manu IX. 187 and of Br. (quoted above on p 733) that to the nearest person in blood the inheritance goes and then proceeds.[1442] 'She is also a gotraja as being born in the gotra in which her brother (the deceased owner) was born. She is, however, not a *sagotra* (of the deceased brother), but being a sagotra is not mentioned here (in Yāj) as the condition that leads on to the taking of the wealth of the deceased'. Here the V Mayūkha plays upon the word *gotraja* and takes its literal meaning. But that is a specious argument. The

1442. तद्भावे भगिनी । . . तस्या अपि भ्रातृगोत्र उत्पत्तत्वेन गोत्रजत्वाविशेषाच्च सगोत्रता पर नास्ति । न च सात्र धनग्रहणप्रयोजकत्वेनोक्ता । व्य. मयूख p 143.

widow and mother are not gotrajas (in this sense of being born in the gotra) but on marriage they enter the gotra of their husbands and become sagotra Further, on the same reasoning, a son's daughter, brother's daughter, father's sister and other women born in the family of the deceased will become his gotrajas (though not sagotras because on marriage they pass into the gotra of their husbands). But these other women are not expressly recognised even by the V. Mayūkha as gotrajas. Even though she was not mentioned in the Mit the sister has been recognised as a gotraja sapinda by the Bombay High Court in parts of the Bombay Presidency where the Mit. is the paramount authority. The order of heirs under the Mit would be as follows:—Full brother, half brother, full brother's son, half brother's son, paternal grandmother, sister (full being preferred to half), paternal grandfather. According to the V. Mayūkha the order is slightly different, viz full brothers along with sons of full brothers that are dead, full brother's son, grandmother, full sister, halfbrother, halfsister, paternal grandfather. The unmarried sister had been recognized as entitled to a share when brothers came to a partition and they had to provide for her marriage expenses Vide above pp 619–620 and Nār [1443] (dāyabhāga, 13), Visnu Dh. S. 18. 35, Manu IX. 118, Yāj II. 124. In Madras the sister had been recognized as a bandhu The Legislature has intervened and laid down (Hindu Law of Inheritance Amendment Act II of 1929) that in territories governed by the law of the Mitāksarā and in respect of the property of males not held in coparcenary and not disposed by will, a son's daughter, daughter's daughter, sister and sister's son shall be entitled to rank as heirs in the order specified in the Act next after a father's father and before a father's brother The first three of these were before this Act not at all recognized as heirs in the whole of India except in Bombay (where the sister was recognised as a gotraja sapinda and the first two as bandhus) and except in Madras (where the first three were recognized only as bandhus). The sister's son was given a very high place as a sapinda under the Dāyabhāga and was treated as a bandhu elsewhere in India. This enactment does not affect the Dāyabhāga scheme and so the three females mentioned in the Act are not heirs even now under the Dāyabhāga The sister's place as settled by Bombay decisions is after the paternal

1443. ज्येष्ठायांशोऽधिको देय कनिष्ठायावर स्मृतः । समांशभाज शेषा स्युरमत्ता भगिनी तथा ॥ नारद (दायभाग 13)

grandmother and before the paternal grandfather, while the above Act places her after the paternal grandfather. In *Bai Mahalaxmi v The Deputy Nazir* 45 Bom. L. R. 434 it has for this reason been held that the Act does not apply to the Bombay Province. If it be held that the Act does apply to Bombay (except as to the sister), then the same Act will have to be deemed to be laying down two different orders of succession as to the same four heirs in different provinces, which, to say the least, is not a reasonable or desirable way of interpreting statutes (just as in the case of texts).

Some difficulty is caused by the use of the word *santāna* in the Mit. as regards the father's, grandfather's and great-grandfather's line. It has been seen above (p 731) that the compact series ends with the brother's son (father's son's son i. e after two descendants of the father) according to the Bombay High Court, while elsewhere in India it is supposed to end with the brother's son's son (i. e after three descendants of the father). The Mit expressly mentions only two descendants in the grandfather's and great-grandfather's line. The general rule is that sapinda relationship extends to six descendants of each line (excluding the man or ancestor from whom the counting is made) The further general rule gathered from the meagre words of the Mit. is that the nearer line excludes the more remote (e. g. the grandfather, his son and grandson are expressly mentioned by the Mit. as taking before the great-grandfather, his son and grandson). The question is whether the 3rd, 4th, 5th and 6th descendants of a nearer line would exclude even the 1st or 2nd descendant of a remoter line e g whether the great-grandson of the grandfather would take before the son or grandson of the great-grand-father or whether the 6th descendant of the grandfather would take before the son of the great-grandfather. There were three views[1444] on this point.

1444. Vide *Buddha Singh v. Lalta Singh* L. R. 42 I. A 208 pp 220-24 for the three views and their expounders. The P. C overruled the first view and held (p 227) that the descendants in each ascending line up to the fixed limit should be exhausted at any rate to the third degree before making the ascent to the next line in order of succession गोत्रजशब्देनैव भ्रातृतत्सुतयोर्निर्देशे गम्यमानेपि पृथक् तयोरभिधानस्य गोत्रजेषु पितामहादिषु तस्य तस्य सन्ततौ पितृसन्तताविव द्वयोरेव पुत्रपौत्रयोर्धनभागित्वज्ञापनार्थत्वात्। स्मृतिच II p 300 In Sm. C. II. p. 300 the passage as printed is somewhat corrupt. The Subodhini also says 'पितृसन्तानो भ्रातृतत्सुतपर्यन्तः' p. 74, vide मदः पा. p. 674 also for the same view.

The first view, relying upon certain words of the Smṛ C., held that after two descents in each line, one should ascend into a remoter line and after the two descendants of that line are exhausted, one should revert to the 3rd to 6th descendants of a nearer line. The 2nd view was that in each line three generations were to be first exhausted, because the word *putra* in several places in the Mit. includes the three male descendants. The 3rd view[1445] was that in each line *six* descendants were to be exhausted before ascending to the next remoter line (as sapiṇḍa relationship extended to six degrees).

Another question is whether the widows of agnatic relations (such as the son's widow, brother's widow, step-mother or paternal uncle's widow) are included in the term 'gotrajāḥ' for purposes of inheritance. Under the Dāyabhāga, as well as under the Mitākṣarā throughout India (except in the Bombay School), the widows of gotraja sapiṇḍas are not heirs at all, since according to almost all writers, women do not inherit except when expressly mentioned by texts. In the Bombay School the position is different. According to both the Mit. and the Mayūkha, wives enter by marriage the gotra of their husbands and become sapiṇḍas of their husbands. The Bālambhaṭṭī declared the son's widow to be an heir, even before the paternal grandmother and includes females also in the word *gotrajāḥ*. When *gotraja* was rendered as *samānagotra*, the term became wide enough not only to include those born in the gotra but even those who entered the gotra by marriage. Besides, it was argued that if the paternal grandmother or paternal great-grandmother succeeded as a gotraja there was no reason why other widows of other gotrajas should not succeed. From the earliest days of British rule the gotraja sapiṇḍas (such as the son's, brother's, paternal uncle's widows) have been recognized as heirs in the Bombay Presidency. They take only a limited estate like the owner's widow or mother or

---

1445 The third view was propounded by Telang J. in *Rachava v. Kalingappa* 16 Bom. 716, which is referred to by the P. C. in 42 I. A. 208, at pp. 220 and 226. The P. C. do not dissent from Telang J. but do not expressly approve of his views as it was not necessary to do so in that case, where the question was whether the great-grandson of the grandfather of the deceased was to be preferred to the grandson of the great-grandfather and it was held by the P. C. that he was to be preferred. The 2nd view appears to be supported by the words of Aparārka p. 745 'एव भ्राता तत्पुत्र-स्तत्पौत्र इति पितृमन्ततो त्रय प्रत्यासन्ना सपिण्डा । एव पितामहमन्ततो प्रपितामहमन्ततो च । एवमभावे पित्रादित्रयस्य ये प्रपौत्रास्तेषा पुत्रादित्रय सापिण्ड्यात्तन्नयाद्दकम् ।'

paternal grandmother. They are recognized rather on the ground of 'positive acceptance and usage' by the Privy Council than on the ground of any texts[1446]. They occupy the same place as their husbands, succeed after the compact series, the sister and half-sister and only after all the male gotraja sapindas (up to the 7th degree inclusive of the ancestor) properly belonging to the line to which their husbands belonged; e g the son's widow would succeed before the brother's son's[1447] son, the brother's widow or step-mother would succeed after all the six male descendants of the husband's father, but before the father's father, paternal uncle or his son &c These widows of gotraja sapindas succeed before any bandhu. Since Act XVIII of 1937 a man's own widow, his predeceased son's widow and the widow of a predeceased son's predeceased son succeed along with his son or sons throughout India.

Samānodakas According to the Mit gotrajas are either sapindas or samānodakas. The word 'samānodaka' has a technical meaning Acc. to Manu V.60, 'the sapinda relationship ceases with the seventh person, the relationship of samānodaka[1448] ends when birth (in the family) and name are no longer known'. This occurs in the chapter on impurity. The Mit declares that the samānodakas comprise males seven generations beyond the sapindas or all males (beyond sapindas) whose birth (in the same family as that of the deceased) and name are known. It quotes a text of Brhan-Manu, 'the sapinda relationship ceases with the seventh person; the relation of

---

1446 Vide *Lallubhai v. Mankuvarbai* 2 Bom 388, 447, which went up to the Privy Council as *Lallubhoy v Cassibai* L R 7 I A 212 at p 237. In *Gandhi Maganlal v Bai Jadab* 24 Bom 192 (P. B) at p 212 it was observed: 'The grandmother's claim was indeed found so strong that it served to help the widows of collateral sapindas to be also recognized as gotraja sapindas'.

1447 Vide *Appaji v Mohanlal* 54 Bom. 564 (P B) for the daughter in-law being preferred to a brother's grandson, *Kashibai v Moreshwar* 35 Bom 389 (where the paternal uncle's *grandson* was preferred to a paternal uncle's widow because he was a male gotraja sapinda of the same line within seven degrees, to which the widow's husband belonged), *Basangavda v. Basangavda* 39 Bom. 87 where the brother's widow was preferred to the paternal uncle's son (as she belonged to a nearer line)

1448 सपिण्डता तु पुरुषे सप्तमे विनिवर्तते । समानोदकभावस्तु जन्मनाम्नोरवेदने ॥ मनु V 60, यथाह बृहन्मनुः । सपिण्ड .. वर्तते । समानोदकभावस्तु निवर्तेता चतुर्दशात् । जन्मनाम्नोः स्मृतेरेके तत्पर गोत्रमुच्यते । मिता. on या II 136 These verses are attributed to बृहस्पति by स्म. नि. p. 454

samānodaka ceases after the 14th; according to some it extends as far as the memory of name and family (or birth) reach; the gotra is said to extend up to that'. The samānodakas comprise the 7 ascendants of a person after the great-grandfather's great-grandfather, the 13 descendants of these seven ascendants, the 7 descendants after the 6th descendant of his 6 male ancestors from his own father; and descendants of himself from the 7th to the 13th. The Privy Council have ruled[1449] in a recent case that, according to the Mitāksarā school, samānodaka relationship does not extend beyond the 14th degree (from and inclusive of the common ancestor of the claimant and the propositus).

The word 'samānodaka' literally means 'those who offer to or receive water from the same person'. The word is employed by Vas.[1450] 17. 79. But in the law of inheritance it has a technical meaning as stated above.

Bandhu (cognate).[1451] It has been seen above (on p. 742) how the Dāyabhāga shuffles cognates among the gotrajas

---

1449. Vide *Atmaram v. Bajirao* L. R. 62 I. A. p. 139 where it was said that in the event of a conflict between the ancient text writers and the commentators the opinion of the latter prevails in the provinces where their authority is recognized on the ground that the commentators only voiced the usage of the time and of the country in which they lived. The case of *Bai Devkore v. Amritram* 10 Bom. 372 where the word samānodaka was interpreted to include any agnate without any limit of degree was not overruled but was distinguished on the ground that it was governed by the law of the Vyavahāra-mayūkha which quotes only Manu V. 60 and does not quote Brhan-Manu.

1450. अत ऊर्ध्वं समानार्षजन्मपिण्डोदकगोत्राणा पूर्वः पूर्वो गरीयान्। वसिष्ठ 17 79.

1451. The word 'bandhu' is a very ancient one and has been used in various senses throughout the ages In Ṛg. 1 113. 2 Night and Dawn (*Usas*) are called *samānabandhū* (bound together or having a common relative). In Ṛg I. 154. 5 (*urukramasya sa hi bandhur-itthā*) the word appears to be used in the sense of 'friend'. In Rg I 164. 33 'nābhi' and 'bandhu' are employed one after another. The sage Vasistha tells Aśvins (Rg VII. 72. 2) that their mutual friendship is ancestral and their relation is common (*yuvorhi nah sakhyā pitryāni samāno bandhuruta tasya vittam*). Vide also Rg. V. 73 4, VIII. 21. 4, VIII 100. 6, IX 14. 2 In the Atharvaveda V 11. 11 Atharvan is said to be the bandhu of the gods and Varuna is said to be both the friend (*sakhā*) and *bandhu* (relative) of the sage. In Atharvaveda VI. 15. 2 and VI 54. 3 the same half verse occurs, 'whoever

(*Continued on the next page*)

literally so called. According to the Mit bandhus are sapindas of the deceased belonging to a different gotra. Bandhus succeed under the Mit., the V. Mayūkha and all other authorities except those of the Dāyabhāga school only on failure of samānodakas (or sodakas). It will have been noticed from the discussion above that gotrajas, whether sapindas and samānodakas, are all agnates (and in some cases their wives) i. e. persons related to the deceased by unbroken male descent. The bandhus are persons related to the deceased through one or more females The basic texts on the inheritance of *bandhus* are three verses attributed to Vrddha-Sātātapa

---

(*Continued from the last page*)

whether our relative or not attacks us' (*sabandhuścāsabandhuśca yosmānabhidāsati*) In the Vāj S IV. 22 (*asme ramasvāsme te bandhuh*)' the poet prays that the god may find delight in them and find in them his bandhu, Among sūtras Gaut. IV. 3 and Vārāhagrhya 9 speak of pitrbandhus and mātrbandhus (persons related through the father and mother) In Yāj. the word *bandhu* or *bāndhava* occurs many times and has at least three senses viz relative in general (in I 82, 108, 113, 116, 220; II. 144, 280; III 11, 239), agnate (II 294), cognate (II. 135, 149, 264). Manu IX. 158 and XII. 79 employ the word bandhu in the sense of relative in general. The Āp. Dh. S. I 7 21. 8 and II 5. 11. 16 and Gaut 14 18 employ the word '*yonisambandha*' for persons connected through a female On the other hand Pāṇini V. 3. 23 (rto vidyāyonisambandhebhyah) appears to employ the word in a general sense viz 'blood relation' (whether paternal or maternal) Another word frequently used from Vedic times is 'jñāti' which generally means 'agnate' or 'relative' Vide Rg X 66 14, X 117 9 In the Atharvaveda IV 5 6 a man desirous of a clandestine intercourse with a woman prays '*svapantvasyai jñātayah svaptvayam-abhito janah*'. In I. 1. 35 Pāṇini appears to use the word jñāti in the sense of agnates 'समज्ञातिधनाख्यायाम्'. In Gaut II. 43, Āp Dh S. I. 3 10 3 'jñāti' occurs and is explained by Haradatta as agnatic relations In Manu III 31 (*jnātibhyo dravinam dattvā*) jñāti appears to mean paternal relations. In Manu III. 264, IV 179, Yāj II. 149 jñāti is distinguished from bāndhava or bandhu and so means 'agnates' Two other words are 'sajāta' and 'sanābhi'. The first occurs in the Tai S I 6 2 1 and I 6 10. 1 (*ugrohaṁ sajātesu bhūyāsam*) and in the Atharvaveda I 9 3, III. 8. 2, VI 5. 2 and means 'agnates or kinsmen'. The word sanābhi occurs in Rg IX 89. 4 and means also the same thing as 'jñāti' in Āp. Gr. VII. 20. 18, Maou V. 72, Br (S B. E 33 p 310 verse 11), but in the Nirukta IV. 21 and in Kāt. (q. by Aparārka pp. 669–670) the word *sanābhi* is used in a wider sense (as including paternal and maternal relations). The Amarakośa gives sapinda as a synonym of sanābhi. नान्या सनद्धा गर्भा जायन्ते इत्याहुरेतस्मादेव ज्ञातीन् सनाभय इत्याचक्षते सबन्धव इति च। निरुक्त IV. 21. क्षीरस्वामी (on अमरकोश) explains समानो नाभिर्मूलमेषां ते सनाभयः and relies on पाणिनि VI. 3. 85.

or Baudhāyana. They may be translated as follows: 'The sons of one's father's sister, the sons of one's mother's sister and the sons of one's maternal uncle—these are to be known as *ātmabandhus* (one's own bandhus); the sons of one's father's father's sister, the sons of one's father's mother's sister, the son's of one's father's maternal uncle—these are to be known as one's *pitrbandhus* (father's bandhus), the sons of one's mother's father's sister, the sons of one's mother's mother's sister, the sons of one's mother's maternal uncle—these are to be known as the *mātrbandhus* (mother's bandhus).[1452] The Mit. states on this text that bandhus are of three kinds viz. ātmabandhus, pitrbandhus and mātrbandhus and that ātmabandhus succeed before pitrbandhus on account of their greater propinquity to the deceased and pitrbandhus succeed before the mātrbandhus[1453] The treatment of the rights of bandhus in the Mit and other commentaries and digests is very meagre. This has led in modern times to a bewildering mass of case law on the inheritance of bandhus.

The first question is whether the enumeration of *bandhus* in the verses quoted is exhaustive or only illustrative. The V. P. expressly[1454] states that if the enumeration be held to be exhaustive absurd results would follow. For example, a maternal uncle's son is expressly named as an *ātmabandhu* in the verses quoted above, but his father (the maternal uncle), being not mentioned, would on that hypothesis be excluded. Therefore it was held by the Privy Council in a very early case[1455] that the enumeration of bandhus is only illustrative, that the maternal uncle though not mentioned is a nearer

1455. Vide *Gridhari Lall v. The Bengal Government* 12 Moore's I A. 448.

bandhu and would succeed in preference to his own son wh is expressly mentioned. In *Balasubrahmanya v. Subbayya* 65 A. 93 it was held that under the Mitākṣarā the principle o proximity of blood relationship applies to the succession o bandhus, that in determining which of two ātmabandhus is entit led to succeed nearness of degree and not religious efficacy is the proper test to apply, that when the ātmabandhus are equal in degree the test of religious efficacy may be applied to determine preference and that the maternal uncle of the deceased is entitled to preference over the deceased's father's half sister's son. This was followed in *Virangauda v. Yellappa* I. L R (1943) Bom. 259 (F. B.) where the mother's brother of the deceased was preferred to the father's sister's son. So also the mother's father would be a bandhu. It is strange that the deceased's own descendants through a female or the deceased's father's descendants through a female such as the son's daughter's son, daughter's son's son, daughter's daughter's son, sister's son or sister's daughter's son, are not mentioned in any authoritative commentaries or digests as his *bandhus*. Further, the bandhus enumerated in the three verses do not go beyond the 4th degree from the common ancestor. But bandhu relationship extends up to five degrees at least. There is an ancient instance of the sister's daughter's son having succeeded to a Buddhist *bhikṣu* in Cambodia (in Śake 586). This would be so only according to the principles of the Mit. Vide 'Indian Cultural Influence in Cambodia' p 55 by Dr. Bijan Raj Chatterji (Cal. 1928). All the above (such as the son's daughter's son) have been recognized by the Indian Courts as ātmabandhus entitled to inherit. In *United Provinces v. Kanhaiya Lal* 16 Lucknow 551 it has been held that the father's father's daughter's son's son would be an ātmabandhu of the deceased. In an early case[1456] in British India two propositions were laid down, viz. (1) there must be mutuality of sapiṇḍa relation between the deceased and the claimant (i. e. each must be a sapiṇḍa of the other) and (2) that in order that a man may be an heritable bandhu of the deceased they must be related *directly* through themselves or

1456. Vide *Umaid Bahadur v. Udoi Chand* 6 Cal. 119 (F. B.), 128 where it was held that a man's sister's daughter's son is a heritable *bandhu* but a remark was made (which was an *obiter dictum*) that the sister's daughter's son's son would not be a bandhu of the propositus because the latter was not a descendant of the grandfather of the former, his father or mother.

through their mother or father. These propositions were accepted by the Privy Council,[1457] which further said that sapinda relationship extends in the case of bandhus only up to five degrees. The first proposition about mutuality has some support in the interpretation put on the famous verse of Manu IX. 187 by the Bālambhattī and the Subodhinī (vide above note 1418). But difficulty is created about mutuality by the unwarranted assumption that the common ancestor must be a member of one out of four families as stated by Sarvadhikari. The other propositions, however, are not supported by any texts or sound reasoning. Since the enumeration of bandhus is admitted to be not exhaustive, no sound inference can be drawn from the list of nine bandhus that a heritable bandhu must be connected with the deceased in any particular way All that can be required is that he must be a bandhu as defined by the Mit and connected with the deceased by having particles of the body of a common ancestor within the limits of sapiṇḍa relationship as laid down by the Mit. The limit of five degrees categorically laid down by the P. C is not, it is submitted with great respect, based on very sure or strong foundations. The Mit says that sapinda relationship extends to seven degrees when traced through the father, that wherever the word 'sapinda' is employed this meaning has to be understood and it extends up to five degrees when traced through the mother. Vide H. of Dh. Vol. II. pp. 454–455. What is material is

---

1457. Vide *Ramchandra* v. *Vinayak* L. R. 41 I. A 290 (= 42 Cal. 384 at pp. 418–421) for the propositions about mutuality, relationship through himself, father or mother and restriction to five degrees Dr. Sarvadhikari (T. L. L. p 630ff) is not right in inferring from the nine bandhus expressly mentioned in the verses quoted above that the propositus must be a descendant of a common ancestor who is a member of the following families, viz (1) claimant's agnate family, (2) claimant's mother's agnate family, (3) claimant's father's mother's agnate family, (4) claimant's mother's mother's agnate family. Following this opinion, it was held in *Lowji* v *Mithabai* 2 Bom L R 842 that the great-grandson of a sister is not an heir under Hindu Law But this decision is against the definition of sapinda given by the Mit and is wroog Vide *Chinna* v *Padmanabha* 44 Mad. 121 pp 128–130 for a reasoned and trenchant criticism of the requirement of mutuality laid down without any discussion or explanation in the case of 6 Cal 119 and the views of Sarvadhikari. It is to be regretted that owing to the ignorance of Sanskrit on the part of most judges that had to decide cases of Hindu Law, the opinions of individual learned authors like Mayne and Sarvadhikari were followed without personal examination by judges of the authorities on which the opinions of authors were based.

not whether a female intervenes somewhere, but whether the person about whose sapindaship a question is raised traces his descent to a common ancestor through his father or through his mother. In the P. C. case the claimant claimed sapindaship with the deceased through his mother, and it was rightly decided that he being 6th from the common ancestor was not a bandhu But to lay down as a universal rule that a bandhu in order to inherit under the Mit. should not be beyond five degrees from the common ancestor is against the definition of sapinda given by the Mit. itself and unduly narrows the express words of the Mit The words of the P. C. 'the sapinda relationship, on which the heritable right of collaterals is founded, ceases in the case of the bhinna-gotra sapinda with the fifth degree from the common ancestor' (L. R 41 I. A. 290 at p. 312) are very generally expressed and are susceptible of the interpretation that they lay down the rule of five degrees even when the claimant claims[1458] relationship with the deceased through his own father Some support for the Privy Council rule that sapinda relationship ceases with the 5th

---

1458 Vide *Brij Mohan v Kishun Lal* (1938) A L J 670 where the Allahabad High Court held that, even when the claimant traced sapinda relationship through his father, heritable bandhu relation ceases after the fifth degree But in *Kesar Singh v. Secretary of State for India* 49 Mad 652 at p. 690 it is said that, though in the P. C. decision there are some observations which at first sight imply that sapinda relationship of bandhus for inheritance ceases with the 5th degree in all cases, there is nothing to suggest that the Privy Council intended to do away with the well-known distinction between bhinnagotra sapindas that claim relationship through their father and those that trace it through their mother There is great diversity of view yet about what the P. C meant in 41 I A. 290. In *Seelam Nagamma v Reddam* I L R. (1943) Mad 759 (F B) it was held that Dr Sarvadhikari is wrong in his restrictions of heritable bandhus to the lines he propounds, that 54 All. 698 is wrongly decided and that 49 Mad 652 lays down the correct law On the other hand, in *Hanmant v. Vasudev* I. L. R. (1943) Bom 465 it has been held that the P. C means that heritable bandhus whether claiming through the father or the mother must be within five degrees from the common ancestor. Vide *Debi Das v. Mukat Behari* I. L. R (1943) All p 131 which lays down several rules deducible from an examination of numerous cases As an illustration of how the law of the succession of bandhus is in a bewildering state, the following two cases may be read. In *Sakharam v Raikrishna* 49 Bom. 739 (F B) it was held that a father's sister's son is to be preferred under the V. Mayūkha to the maternal uncle, but the P C decided in *Balsubramanya v. Subbayya* L. R. 65 I. A 93 that the maternal uncle is entitled to preference over the father's sister's son.

degree from the common ancestor in the case of bhinnagotra sapindas may be found in the words of Mitramiśra in his commentary on Yāj I. 52, in the implication of the words of Kullūka[1459] on Manu V. 60 and in the remarks of the Bālambhattī (p 191). But this view is opposed to other weighty authorities such as the Nirnayasindhu and the Dharmasindhu

The whole law about the succession of bandhus is in a confused state owing to conflicting decisions, but the P. C. has laid down certain propositions which may be set down here: (1) ātmabandhus succeed before pitrbandhus and pitrbandhus before mātrbandhus; (2) the nearer in degree in each class of bandhus is preferable to the more remote; (3) as between bandhus of the same class, the conferring of spiritual benefit would be a ground of preference, as the Viramitrodaya invokes that principle in several cases (and so the father's half sister's son would be preferred to the mother's sister's son, though both are ātmabandhus and of equal degree); (4) if the above three rules fail, bandhus *ex parte paterna* (on the father's side) succeed before bandhus *ex parte materna* (on the mother's side); (5) the bandhu between whom and the propositus a lesser number of females intervenes is to be preferred. As a corollary of the 2nd rule it should follow that the descendants of the propositus would be preferred to ascendants and collaterals and that bandhus of the same class that are descendants of a nearer line would succeed in preference to descendants of a remoter line though of the same class. But this last proposition has not yet been settled by the Privy Council. It has been, however, held in *Debi Das v Mukat Behari* I. L. R (1943) All. 131 that a sister's son's son should be preferred to the deceased's cousin's daughter's son, since the former belongs to a nearer line.

For the purposes of this work it is irrelevant and unnecessary to wade through the mass of case-law on the succession of

---

1459. कुल्लूक after quoting the मत्स्यपुराण on the question of sapindaship based on the offerings of pindas remarks, 'सगोत्रत्वे चेय सपिण्डता। अत एव शङ्ख-लिखितौ—सपिण्डता तु सर्वेषां गोत्रतः सप्तपौरुषी' मित्रमिश्र on या I. 52 quotes the smrti text, 'सगोत्रे खलु सापिण्ड्यं विज्ञेयं सप्तपौरुषम्। विगोत्रे तत्तु सर्वत्र विज्ञेयं पञ्च-पौरुषम्॥' and remarks 'तेन मातृमातामहादिपक्षेऽपि विवाह्यत्व धर्मसमत न विरुध्येत। माता च स्वारम्भयोजकत्वशोणिता योन्या। तेन पितृमातामहपुत्र्यादेर्न्युदास.। एवं च पितृमातामहाद्यधिकसमन्धः परिणयाचारोपि सङ्गच्छते।'

bandhus. One or two matters, however, call for remark. If the theory of spiritual benefit be *strictly* applied, many of those who would inherit as bandhus under the Mit. system would be barred from inheritance. For example, the daughter's son's son[1459a] or daughter's daughter's son would be a heritable bandhu under the Mitāksarā, but under the Dāyabhāga he would not be so, as he offers no pinda to the deceased or to any of the latter's ancestors. It is probably to obviate this unnatural and unjust consequence that the Dāyatattva refers to the text of Br. (quoted above in *n* 1419) in which the word 'bāndhavāḥ' occurs, remarks that the relatives of the father and mother of (the deceased) inherit in the order of their nearness to the latter and quotes the three verses about the three classes of bandhus, indicating thereby that spiritual benefit is not the sole test, but that where it fails the test of blood relationship may be applied.[1460]

Very elaborate rules have been evolved by Sarvadhikari in his Tagore Law Lectures on the Hindu Law of inheritance (2nd ed. of 1922, pp. 571–640). The author devoted great industry, labour and ingenuity in evolving those rules. But one regrets to say that he raised a stupendous structure on very slippery and meagre foundations And the pity of it is that many Judges have more or less followed his lead, though emphatic disapproval of his views, whereby the list of bandhus capable of inheriting has been very much restricted, has not been wanting.[1461] It is not possible to examine here in detail his reasonings and results. But the futility of much that he has evolved can and must be briefly shown. The only solid foundations that we have in the Mit. are: (1) the definition of sapinda given by it on Yāj I. 53; (2) the remark that bandhus are bhinnagotra sapindas (as contrasted with gotrajas); (3) that the bandhus of a man may be described under three classes; (4) that those that may be called ātmabandhus succeed before those called pitrbandhus and these latter inherit before mātrbandhus. It is agreed on all hands that

the nine bandhus enumerated in the verses of Śātātapa or Baudhāyana are only illustrative. Therefore, the nine bandhus expressly mentiond should not have been used to *exclude* any one as not a heritable bandhu, as we have not got anywhere an exhaustive enumeration Any one who satisfied the first two requirements stated above was a bandhu. Of the nine bandhus enumerated in the verses quoted above, none is connected by direct descent with the propositus, his father or mother; but one is a descendant of his paternal grandfather, one of his paternal great-grandfather, two of his maternal grandfather, two of his father's maternal grandfather, one of his mother's paternal grandfather, two of his mother's maternal grandfather. Sarvadhikari makes a different classification of these (p. 627) viz. 'two are connected through the father, three through the mother, two through the paternal grandmother and two through the maternal grandmother'. The whole trouble has been caused by this latter grouping. Instead of emphasizing lines of direct descent, he catches hold of females who are never spoken of in ancient works in connection with tracing descent (except in the case of the mother of the man concerned). If, because the illustrations given happen to be connected only with four lines of families, persons connected with the propositus through other lines are to be excluded, there is no reason why a man's own daughter's son's son, son's daughter's son, sister's son, or sister's son's son should be held to be bandhus. They bear no close analogy to the ātmabandhus enumerated by Śātātapa. But it is admitted by Sarvadhikari that they are ātmabandhus. The terms ātmabandhu, pitrbandhu and mātrbandhu are mere labels or devices to show nearness and preference among bandhus. Acc. to the V. Mayūkha[1462] the words pitrbandhu and mātrbandhu are to be dissolved as *sasthī-tatpurusa* compounds (pituḥ bāndhavāh

1462 नन्तु पत्न्यादीनां सर्वेषां सूतनिरूपितानामेव धनभाक्त्वं बान्धवानामपि तथैवास्तु। अत कथं पितृमातृश्च बान्धवाना धनसम्बन्ध । पितु· पितृष्वसुः पुत्राः इत्यादि तु संज्ञासंज्ञिसम्बन्धमात्रार्थं न धनसम्बन्धार्थमिति चेदुच्यते। विनाप्येतद्वचनं पितृमातुलपितृपितृष्वादिष्विव पितृमातृबान्धवेष्वपि योगेनैव तत्प्रवृत्तिसम्भवे संज्ञासंज्ञिसम्बन्धबोधनानर्थक्यापत्तिः। तेन बन्धूनुद्दिश्य धनसम्बन्धविधौ पितृमातृबन्धुभापणेनैव पञ्चीर्थवत्ता। बन्धूद्देशेनाशौचादिविधावप्येवमेवेति दिक्। व्य मयूख p. 144 In *Gajadhar Prasad v Gauri Shankar* 54 All 698 (F, B) Mukerji J. (at pp. 725-26) prefers to dissolve the word पितृबन्धु or मातृबन्धु as either पञ्चमीतत्पुरुष or तृतीयातत्पुरुष (पितु· बन्धुः, पित्रा बन्धु) rather than as षष्ठीतत्पुरुष No Sanskrit authority is quoted for doing this and this view of his is opposed to the view of the व्य. मयूख, the सरस्वतीविलास and some other works.

or mātuh bāndhavāh) i. e. according to it pitṛbandhus or mātṛbandhus are bandhus of the father or mother and must also be bandhus of the propositus if they are to inherit It is not known in what context the three verses quoted in the Mit. and other digests from Śātātapa or Baudhāyana occurred. In Manu V. 81 it is laid down that one should observe mourning on the death of a pupil, sacrificial priest and *bāndhavas* for the duration of *paksmi*. It is possible that the three verses only illustrate what is meant by bāndhavas in such a connection.

The Bālambhaṭṭī (vyavahāra p. 214) here also explains that females are included in the word 'bandhu', although the verses quoted speak of 'putrah' only and the Bombay and Madras High Courts have allowed female bandhus to inherit, though in Madras the position assigned to female bandhus is very much lower than in Bombay.

Strangers as Heirs—In default of even bandhus, the Mit states[1463] that the teacher (of the veda) is the heir of the deceased, in default of the teacher the pupil (and relies on Āp. Dh. S II. 6. 14. 3) and that in default of pupil a *sabrahmacārin* (fellow student whose *upanayana* was performed by the same teacher as that of the deceased and who studied the veda under the same teacher)[1464] inherits. In the absence of even a fellow student the wealth of a brāhmana was to be given to some *śrotriya* (a brāhmana learned in the Veda) as laid down by Gaut (28. 39) and in default of a śrotriya in the same village, as said by the Dāyabhāga XI. 6. 27, to any brāhmana, since Manu (IX. 188-189) says, 'in the absence of all (heirs), brāhmanas that have studied the three vedas, that are pure and restrained, take the wealth ; in this way dharma does not suffer : the rule is that the wealth of a brāhmana should never be taken by the king'. Nār.[1465] (dāyabhāga, 51-52) is to the same effect To the same

1463. बन्धूनामभावे आचार्य: । तदभावे शिष्य: । पुत्राभावे य: प्रत्यासन्न: सपिण्डस्तद्भावे आचार्य: । आचार्याभावे अन्तेवासीत्यापस्तम्बस्मरणात् । मिता

1464. शिष्याभावे सब्रह्मचारी धनभाक् । येन सहैकस्मादाचार्यादुपनयनाः पठनवृद्धज्ञानमासिः स सब्रह्मचारी । मिता. The word सब्रह्मचारिन् is derived by Pāṇini VI. 3. 86 as 'चरणे ब्रह्मचारिणि'. The सि कौ explains 'ब्रह्मचारिण्युत्तरपदे समानस्य स. स्याच्चरणे समानत्वेन गम्यमाने'.

1465. ततः सजाति सर्वेषामभावे राजगामि तत् ॥ अन्यत्र ब्राह्मणेभ्य. स्यादाजा धर्मपरायणः । नारद (दायभाग, 51-52). The मिता. has a different verse 'नारदेनाप्युक्तम्—ब्राह्मणार्थस्य तज्ज्ञाने दायादश्चेन्न कश्चन । ब्राह्मणायैव दातव्यमेतन्नी रक्षतः षोऽधवा । इति ।'

effect are Viṣṇu[1466] Dh. S. 17. 13–14, Baud. Dh. S. I. 5. 120–122 and Śaṅkha-Likhita, Devala (q. by V. R. p. 597 and V. C. p. 155). This direction of so many ancient sages has not been respected in modern times.[1467] Manu (IX. 189) and Br.[1468] (S. B. E. vol. 33, p. 380 verse 67) say that the wealth of kṣatriyas, vaiśyas and śūdras escheats to the king in default of heirs up to a fellow student. When the king takes by escheat heirless property he has to set apart a portion of the wealth of the deceased for the maintenance of his concubines and servants and for the performance of his funeral rites and śrāddhas as stated by Kāt[1469] 931. Kaut III. 5, Nār. (dāyabhāga, 52) provide that the king (when he takes heirless property) should provide maintenance for his women and both the Mit. and the V. Mayūkha explain that the word 'women' stands for *avaruddhastrī* (exclusively kept concubine) and not for his wives (who would succeed as heirs and then there would be no escheat), because the word '*patnī*' is not employed in the verse. These verses of Nār. and Kāt. are the foundation of the right to maintenance of a concubine against the heirs of the deceased paramour in modern times.[1470]

1470. Vide 2 Bom. 573, 607, 12 Bom 26 (in both Kāt. is quoted), 26 Bom. 163, L. R. 53 I. A at p 163 for the concubine's right. In 48 Bom. 203 a woman whose husband was alive was not treated as a concubine entitled to maintenance from the heirs of her deceased paramour, but this decision has been recently overruled by a Full Bench in 47 Bom. L. R. p. 5 (F. B.).

Yāj. (II. 137) states a special rule[1471] which is an exception to the general rule of inheritance laid down in II. 135-136 viz. '(the heirs) who take the wealth of a forest hermit, a *yati* (ascetic), a (perpetual) vedic student are in order the (vedic) teacher, a virtuous pupil, one who is looked upon as a brother and belongs to the same order'. According to the Mit. the heirs mentioned are to be taken in the reverse order of the words of the text i. e. the ācārya (who is mentioned first among the three heirs) is to be taken as the heir of the last of the three mentioned in the first half of the verse, so that the teacher, good pupil and the person looked upon as brother are respectively the heirs of the perpetual student, the ascetic and the forest hermit. According to the Dāyabhāga also the reverse order has to be taken, but it says that the wealth of the forest hermit, yati and perpetual student is taken respectively by one looked upon as brother, a worthy pupil and teacher, but that in the absence of these, any one who is in the same āśrama as the deceased may take it. According to the Madanaratna[1472] the order of heirs is the direct one, that is, the teacher, good pupil and accepted brother take the wealth of the forest hermit, ascetic and perpetual student, since the Viṣṇu Dh. S. (17. 15-16) expressly says so. The Mit. adds that a brahmacārin is of two kinds viz. perpetual (*naiṣṭhika*), and *upakurvāṇa* (who intends to remain as a student for some time and then marry in order to confer the benefit of male progeny on his ancestors), that

1471. वानप्रस्थयतिब्रह्मचारिणां रिक्थभागिनः । क्रमेणाचार्यसच्छिष्यधर्मभ्रात्रेकतीर्थिनः ॥ या. II. 137; क्रमेण प्रतिलोमक्रमेण ब्रह्मचारी नैष्ठिकः उपकुर्वाणश्च तद्वद्धर्मं मात्राद्य एव गृह्णन्ति । .. सच्छिष्यः पुनरध्यात्मशास्त्रश्रवणधारणतदर्थाद्यनुष्ठानक्षमः । दुर्बुद्धेस्त्याचार्यादेरपि भागानर्हत्वात् । धर्मभ्राता प्रतिपन्नो भ्राता एकतीर्थी एकाश्रमी धर्मभ्राता चासौ एकतीर्थी च धर्मभ्रात्रेकतीर्थी । मिता.; प्रतिलोमक्रमेण यथासम्भव धनं ग्रहीतव्यम् । ब्रह्मचारी च नैष्ठिकौपनिषत पित्रादिपरित्यागेन यावज्जीवमाचार्यकुलनिवासपरिचर्यानिष्ठायाः तेन कृतत्वात् । व्यवहार XI 6 36. शिष्यस्य सम्यक्त्वसुपलक्षणम् । अत आचार्यधर्मभ्रात्रेकतीर्थिनावपि सुकृत्तावेव धनग्राहिणावित्याह । .. ... अनेनैवाभिप्रायेण याज्ञवल्क्योपि आचार्यसच्छिष्यधर्मभ्रात्रेकतीर्थिन इत्युभयत्र सम्बन्धं द्योतयिष्यं सच्छिष्य इति मध्ये परिणयामास । सुबोधिनी मदनरत्न explains धर्मभ्राता as समानाचार्यक and दीपकलिका explains एकतीर्थी as समानगुरु 'The word उपकुर्वाण occurs in वैखानसस्मार्तसूत्र II. 12 and in हारीत q by अपरार्क p 71. नैष्ठिक is derived from निष्ठा 'end', विष्णुध. सू 28. 46 and वैखा II. 12 employ the word नैष्ठिक लघुविष्णु I. 24 defines. निष्ठां तत्रैव यो गच्छेन्नैष्ठिकः स उदाहृतः and मेधा on मनु III. 1 explains निष्ठां समाप्तिं गच्छति नैष्ठिकः.

1472. एवं क्रमशब्दस्य प्रतिलोमक्रमपरत्वमाश्रित्य नैष्ठिकब्रह्मचार्यादिधनमाचार्यादयो गृह्णन्तीत्युक्तं विज्ञानेश्वराचार्यैः । अस्माकं तु वानप्रस्थधनमाचार्यो गृह्णीयाच्छिष्यो वेति विष्णुवाक्यदर्शनात् क्रमशब्दोऽनुलोमक्रमपर इति प्रतिभाति । मदनरत्न folio 101 b This view of the Madanaratna is referred to by the स्मृ. मयूख p. 145.

Yājñavalkya's words apply only to the former, that if the latter (upakurvāna) leaves any wealth of his own it is taken by his mother, father and the other heirs. The Mit. further says that a worthy pupil is one who is capable of studying the philosophical parts of the Veda, of understanding them and of acting up to them, that a badly behaved pupil will not succeed, so also a badly conducted teacher shall not succeed. The Mit explains that Yāj III 47 allowed a forest hermit to accumulate materials that will be enough to meet his needs for a day, a month or six months or a year and so he may on his death leave some wealth Similarly, though an ascetic was required by Gautama (III. 10) to make no accumulation of wealth, yet even an ascetic requires clothes to cover his body, he has his sandals and books on Yoga and the like; and so also the perpetual student requires these.

The heirs enumerated above succeed to persons in those religious orders in priority of their kindred. It has been held that members of the three twice-born classes alone can be ascetics with the result that their pupils inherit and not the kindred and that in the case[1473] of śūdra ascetics their kindred succeed unless some usage to the effect that a pupil inherits is proved. For the foundation and administration of *mathas* and properties attached to them, the selection of the heads of mathas and their powers and duties and about ascetics and their pupils, vide H. of Dh. vol. II. pp. 906–914 and pp. 944–952.

Reunion.—A reunion properly so called can take place only between those who were parties to the original partition. Reunion, therefore, postulates three stages, viz. (1) joint family, (2) partition between members of a joint family, (3) an intention and an agreement, express or implied, to reunite in estate among members who were parties to the partition. If persons who had separated in interest merely stay together, that is not

---

1473. Vide *Dharmapuram v. Viraṇandiyam* 22 Mad 302 (holds that the ordinary law of succession applies to a śūdra ascetic); *Ramdas v. Baldevadasji* 39 Bom. 168; *Somasundaram v. Vaithilinga* 40 Mad 846, at p 869, *Haris Chandra v Atir* 40 Cal. 545; but see *Sambasivam v. Secretary of State* 44 Mad. 704 (holding that the disciple of a śūdra ascetic who dies without leaving any blood relations is an heir under the Hindu Law, but that strict proof would be required of the claimant's spiritual relationship)

reunion in law, as said by the Sm. C. II. p. 302 and Vivādacandra[1474] p. 82. The Vivādacandra quoting Viṣṇupurāṇa says that reunion may be implied from a course of conduct, even though an express agreement cannot be proved. There is a divergence of views as to who can reunite. The Mit., the Dāyabhāga[1475], the Sm. C. hold, literally construing a verse of Br. (S. B. E. 33 p. 381 verse 72), that a member of a joint family when once divided can reunite only with his father, brother or paternal uncle, but not with any other relation (such as a paternal uncle's son or paternal grand-father), while the V. C. (p. 157), the V. Mayūkha (p. 146), the V. P. (p. 533) hold that the members expressly mentioned by Br. are only illustrative and that a person may reunite with *any* member who was a party to the original partition. A reunited person is called *samsṛsta* or *saṃsṛstin*[1476] (who has reunited wealth). The subject of reunion has a comparatively ancient history. Gaut. 28. 26 states the general rule that on the death of a reunited co-parcener the surviving reunited member succeeds to the share of the deceased Kaut. (III. 5 p. 160) states[1477] that those, who live together though they may have no ancestral estate or do so after dividing their ancestral estate, may divide their reunited estate again in equal shares. Manu IX. 210 (=Viṣnu Dh. S 18. 41) is similar to it.

The verses of Yāj. (II. 138–139)[1478] on succession to a deceased reunited person are understood by the Mit. to be an exception to the rules contained in Yāj II. 135–136 laying down that the wife and others inherit the property of a person dying sonless. Therefore it follows that where a person reunites with his brother and then dies leaving a son not reunited with him, it is the son who will inherit and not the brother, though reunited But if A separates from two sons B and C of whom B reunites with him and C does not and then A dies, then the reunited son B succeeds to A's interest and C takes nothing. This is expressly stated by the Vivādacandra p. 85 that relies on the Smṛtisāra[1479]. The two verses of Yāj (II. 138–139) are variously read and interpreted by the Mit. and other commentators and it is not possible nor quite necessary to set out all these readings and explanations. Acc. to the Mit the two verses mean: 'in the case of a deceased reunited person, the (surviving) reunited member should give (to the posthumous son of the former) the share of the deceased but may take it himself if there is no son (but only a wife); but from among the reunited brothers, the full brother, if reunited, should similarly give to the posthumous son of the deceased the latter's share and (if there be no son) he should take it himself to the exclusion of reunited half brothers; a reunited half brother takes the wealth of the deceased reunited member (dying sonless) and not another half brother who is not reunited; a full brother, though not reunited, may take the wealth along with a half brother who is reunited but the latter will not alone be entitled'. In this interpretation the word 'asamsṛsṭi' in the latter half of II. 139 has to be taken in two connections, once with 'anyodaryah' in the first half and then again with 'samsṛstah' (in the 2nd half). This last word is to be understood in two senses, viz.

1478. संसृष्टिनस्तु संसृष्टी सोदरस्य तु सोदर । दद्यादपहरेच्चांश जातस्य च मृतस्य च ॥ अन्योदर्यस्तु ससृष्टी नान्योदर्यो धनं हरेत् । असंसृष्टयपि दद्यात्संसृष्टो नान्यमातृज· ॥ या. II. 138–139. The first is विष्णुधर्मसूत्र 17 17 also अपरार्क (p 747) reads 'नान्योदर्यधनं हरेत्' and आदद्यात्सोदर्यो नान्यमातृक. विश्वरूप, जितेन्द्रिय and विवादचन्द्र p 84 read 'चादद्यात्सोदरो नान्यमातृजः'

1479 Vide *Fakirappa v. Yellappa* 22 Bom. 101, 104 for the proposition that a reunited son has a preferential right of inheritance to a grandson who remains separate. Vide विवादचन्द्र p 85 'यस्तु पिता पुत्रेणैव केनचित्सस्रष्टस्तस्यांश संसृष्ट एव गृह्णीयात्रासंसृष्टी संसृष्टिनस्तु संसृष्ट इति वचनात्। . . अत एव स्मृतिसारे यदा पितैव केनचित्पुत्रेणैव संसृष्टस्तदा तद्धनं तद्धनं संसृष्टिपुत्रो गृह्णीयान्नासंसृष्टी विभक्तपुत्रः संसृष्टिनस्तु संसृष्टीत्यविशेषेणाभिधानादित्युक्तम्।.

(1) full brother (with the preceding word asamsṛsti) and (2) 'reunited' (with the word 'anyamātrjah'). Further, acc. to the Mit. we have to understand 'eva' after 'anyamātrjah'. Aparārka (p. 748) reads differently and he, Viśvarūpa and Śrīkaramiśra (Dāyabhāga XI. 5-16) explain that a full brother though not reunited takes the whole estate and not the half brother though reunited with the deceased. The V. Mayūkha differs from the Mit. when it says that the word *aputrasya* (of one dying sonless) is not to be understood with Yāj (II 138). It derives two propositions from the first half of Yāj II. 138, viz (1) the wealth of one dying reunited is taken by the surviving reunited member or members; (2) in a competition between reunited full brother and reunited half-brother, the former takes the whole. The latter half of II. 138 is an independent sentence (and not joined with the preceding half as the Mit. understands) and applies where a reunited member dies leaving a wife who is pregnant but that fact being unknown the other reunited members divide the estate. In such a case if a son is born the surviving members should hand over to the son the share of the deceased reunited member. But if no such son is born then the survivors may take the estate. In II. 139 the Mayūkha holds that the words 'anyodarya' and 'anyamātrja' are not restricted to brothers only, but apply to a paternal uncle or his sons or other persons who were reunited, because their mother is also different from the mother of the deceased The Dāyabhāga discusses Yāj II. 138-139 under the topic of *succession* to the separate property of a sonless man and its treatment of succession to reunited property is very meagre (*vide* XII)[1480] The V. P. p. 533 notices this and levels against Jīmūtavāhana the criticism that he got confused. Aparārka (pp. 748-749) seems to be of the same opinion as the Dāyabhāga. The V. P. follows the Mit. and criticizes the explanation given by Śrīkara, Sm. C. and others (pp. 535-538). It says that the texts of Śankha, Nārada and others conflict with the text of Yāj. II 135 and that the order of heirs as to a reunited co-parcener is based on express texts and not on Yāj, II. 135[1481] or logical reasoning. According to the V. P. the order of succession to a deceased reunited

1480. एतेन पत्न्याद्यपुत्रधनग्रहणाधिकारिगणे भ्रात्रधिकारावसरे वचनमिदं प्रवर्तते इति व्याचक्षाणो जीमूतवाहनो भ्रान्त एवेत्यवसेयम्। व्य. प्र p 533.

1481 ततश्च पत्नीदुहित्रादिक्रमविरोधादविरोधायैतत् संसृष्टभागविषयमिति कल्प्यते। विभक्तोक्तनैयायिकपत्नीदुहित्रादिक्रमोऽत्र वाचनिककक्षेण वाध्यते। अस्मिन् क्रमे कस्यचिन्न्यायस्याभावाद्वाचनिक एवायं क्रमः। व्य. प्र p. 539.

person seems to be: (1–3) son, grandson, great-grandson; (4) reunited full brother; (5) reunited half brother and separated full brother; (6) reunited mother; (7) reunited father; (8) any other reunited member; (9) half brother not reunited; (10) mother not reunited; (11) father not reunited; (12) widow; (13) daughter; (14) daughter's son; (15) sister. The V. Mayūkha gives the order as follows: (1) son if reunited, (2) son not reunited, though there may be reunited members (other than a son); (3) the parents if reunited in preference to other reunited persons (other than a son); (4) full brother if reunited; (5) full brother not reunited and half brother reunited; (6) half brothers and uncles, if reunited; (7) other male members reunited (in preferenoe to wife though she be reunited); (8) wife if she be reunited; (9) full sister (or daughter according to another reading);[1482] (10) any other sapinda who is nearest. It is to be noted that Manu IX. 212 prescribes a peculiar rule of succession for reunited co-parceners viz. that full brothers (not reunited) and full sisters of the deceased reunited co-parcener equally inherit along with half brothers that are reunited the wealth of the deceased. This verse of Manu has been variously explained by Kullūka, Aparārka p. 749, Sm. C. (II pp 304–305), Nīlakantha, Vivādacandra (p. 83) and others.

It may be stated here that cases of reunion come very rarely before the courts.

CHAPTER XXX

STRIDHANA

Stridhana (woman's property). This subject abounds with differing views on several topics that fall under it, as will be seen below

The germs of the topic of stridhana can be traced to the Vedic Literature. As Sir Gooroodas Bannerjee remarks (in 'Marriage and Stridhana' p 370), 'nowhere were proprietary rights of women recognized so early as in India; and in very few ancient systems of law have these rights been so largely conceded as in our own'. The wedding hymn in the Ṛgveda (X. 85) contains two verses[1483] (13 and 38) which indicate that gifts were sent to the bridegroom's house with the bride. They are .' the bridal gifts of Sūryā that Savitr sent off have gone forth; in the Aghās (Maghā constellation) are struck the kine and in the Arjunis (Phalgunī constellation) is carried (the bridal gift); for thee in the beginning they carried about Sūryā together with the bridal gifts &c.'. Sāyana explains 'vahatu' as 'cows and other objects given for pleasing the girl to be married', while Lanman (Harvard O series vol. VIII p. 753) renders it as 'bridal car'. Sāyana's interpretation suits the context much better. In the Tai. S VI. 2. 1 1 we read,[1484] 'the wife (of the sacrificer) holds on (to the cart), for the wife is the mistress of the household gear'. Manu IX. 11 uses the word 'pārinahya' (household gear) and states that the wife should be entrusted among other matters with the supervision over it. Jaimini[1485], according to Śabara, refers to

---

1483. सूर्यायां वहतुः प्रागात्सविता यमवासृजत् । अघासु हन्यन्ते गावोऽर्जुन्योः पर्युह्यते ॥ तुभ्यमग्ने पर्यवहन् सूर्यां वहतुना सह । पुनः पतिभ्यो जायां दा अग्ने प्रजया सह ॥ ऋ X. 85, 13 and 38 These are almost the same as अथर्ववेद 14 1 13 and 14 2 1.

1484. पत्न्यन्वारभते पत्नी हि पारीणाह्यस्येशे । तै. स VI 2. 1. 1 (in connection with अतिथ्येष्टि).

1485. स्ववत्तामपि दर्शयति । जै. VI 1. 16, पत्नी वै पारिणह्यस्येष्टे पत्न्यैव गतमनुमतं क्रियते । शबर The printed text differs from the Tai S. text पारिणह्य would mean 'nuptial gifts'. The वि र p 517 explains पारिणाह्यं (in Vas. 17 46) as पारिणाह्य परिच्छद आदर्शकङ्कणादि (paraphernalia, mirrors and bracelets). वि चि p. 142 reads °कङ्कतिकादि (combs &c) वि. त (*folio 160*) says: पारिणाह्यानुपस्करः । आदर्शकङ्कणताम्बूलकरण्डकादिरिति कल्पतरु । परिणेयमिति पाठान्यौतकमित्यन्ये

this passage of the Tai. S. for establishing that women do own certain property. Medhātithi[1486] on Manu VIII 416 (cited above on p 452) quotes this passage of the Tai S. and argues that if Manu VIII 416 (saying that whatever a wife earns is her husband's) were literally understood passages like the one in Tai. S would have no scope and that therefore Manu simply means that though women may be owners they cannot dispose of the property independently It appears from these ancient passages that the properties, which in early days were held to be owned by women, were presents made at the time of marriage (such as ornaments and costly dresses) and household articles that are generally under the control of women and that the later smrti rules about the devolution of strīdhana in the female line arose from the peculiar nature of the articles over which dominion was conceded to women This early state of things is indicated by some of the early sūtras. Āp Dh[1487] S (II 6. 14. 9) states the view of some predecessors (which Āp himself does not approve) that the ornaments belong to the wife and also such wealth as came to her from her agnates (father, brother &c). Baud. Dh S. II 2. 49 says that daughters get the ornaments of their mother and whatever else it is customary for them to get. Vas 17. 46 prescribes that women (daughters) should divide the nuptial presents given to their mother. Śankha (q by Sam. Pr. p. 851) prescribes that in all forms of marriage ornaments and strīdhana should be given to the girl It may be that Manu VIII 416 only gives expression to an ancient opinion, that the literal meaning of that verse was given up long before and that all that Manu meant was that during coverture a woman was subject to the control of the husband as regards her strīdhana.

Three principal topics have to be discussed under strīdhana viz what constitutes strīdhana, woman's dominion over her

1487 अलङ्कारो भार्यायां ज्ञातिधनं चैके। आप ध सू. II. 6 14 9. मातुरलङ्कार दुहितर सामदायिकं लभेरन्यद्वा। बौ ध सू II 2 49. मातु पारिणेय स्त्रियो विभजेरन्। वसिष्ठ 17. 46 The वि र p 521 explains आप as 'ज्ञातिधन चेति विवाहे यद्धनं यौतकाख्य लब्ध तदपि भार्याया एव' The मिता. on याज्ञ II 117 seems to have read this as a supplement to the preceding sūtra about the special share of the eldest son. The दायभाग IV 2 15 p 82 and विवादचन्द्र p 75 read पारिणाख्य in Vas and explain as परिणयनलब्ध धन or विवाहकालीनं respectively

strīdhana and inheritance to strīdhana. On each one of these topics great diversity of views prevails and the subject has become very complicated, as the Dāyabhāga remarks[1488].

Gautama contains three sūtras about the devolution of strīdhana, but he does not define or describe it.[1488a] Kaut (III 2. p. 152) defines[1489]: 'means of subsistence and what could be tied on the body (i e ornaments and jewellery) constitute strīdhana. The means of subsistence should be fixed at 2000 (panas) as the maximum, while there is no limit to (what may be given) as *ābadhya* (ornaments &c.)'. This may be compared with a verse of Kāt. (902) and a similar[1490] verse of Vyāsa viz. 'the father, the mother, the husband, brother and kinsmen should give strīdhana to a woman according to their means up to two thousand (panas) except immovable property' The Sm. C. and V. Mayūkha explain that this limit of 2000 applies to gifts made every year, but that if a gift is to be made once for all, then more may be given and even immovable property may be given.

The term strīdhana literally means 'woman's property'. But in the ancient smṛti works the word was restricted to certain special kinds of property given to a woman on certain occasions or at different stages of her life. Gradually such kinds of property went on increasing in extent and value. We have to follow this evolution of the meaning and content of the word strīdhana. One characteristic feature of strīdhana from the times of Gautama downwards has been that it devolved on females in the first instance The oldest extant definition of it

II p 281, अपरार्क p 752, दायभाग IV. 1. 10, बालम्भट्टी, व्य. मयूख p. 154 The परा. मा III p. 548 quotes बृहस्पति 'यथाऽधन च पर्याप्तं क्षेत्रांशं वा यदिच्छति।'

in Dharmaśāstra works is that of Manu[1491] IX. 194· 'what (was given) before the nuptial fire, what was given on the bridal procession, what was given in token of love, what was received from her brother, mother or father, that is called the sixfold woman's property'. The Mit. on Yāj II 143 explains that the number six is intended to exclude a smaller number of the kinds of strīdhana and does not exclude a larger number. In IX. 195 Manu appears to mention one more kind viz. '*anvādheya*' (gift subsequent)' Nār. (dāyabhāga, 8) has the same six kinds as Manu IX. 194, but reads 'bhartrdāya' (the husband's gift) for Manu's 'what is given in token of affection', the latter being thus wider than Nārada's words Yāj. (II. 143–44) enumerates[1492] the several kinds of strīdhana as follows: 'what was given (to a woman) by the father, mother, husband or brother or was received by her before the nuptial fire, or what was presented on her husband's marrying another wife (*ādhivedanika*) and the like—these are denominated strīdhana; so also what is given by the cognate relations (of the woman), the *śulka* (fee), and gifts subsequent to marriage'. The Mit. and most of its followers read 'ādhivedanikādyam ca', while Aparārka and the Dāyabhāga read 'ādhivedanikam caiva', the difference being that if one reads as the Mit. does, several other kinds not expressly enumerated can be easily included under strīdhana. But it should be noted that even without reading —'kādyam', Aparārka explains the verse in the same way as the Mit. does. Visnu[1493] Dh S. 17. 18 enumerates almost the same kinds of strīdhana as Yāj, but omits the word 'ādya'.

Among smrti writers Kātyāyana gives the most elaborate treatment of strīdhana in about twenty-seven verses. He

1491 अध्यग्न्यध्यावहनिकं दत्तं च प्रीतिकर्मणि । भ्रातृमातृपितृमात्तं षड्विधं स्त्रीधनं स्मृतम् ॥ मनु IX 194 काश्या. (894) acc to दायभाग (IV. 1 4 p. 72), वि र. 522 and वि चि. p 138 had practically the same verse (reading *प्रीतितः स्त्रियै*) The मिता says, 'यत्पुनर्मनुनोक्तं . .. स्त्रीधनस्य षड्विधत्वं तन्न्यूनसंख्याव्यवच्छेदार्थं नाधिकसंख्याव्यवच्छेदाय '।; अध्यग्न्यध्यावहनिकं भर्तृदायस्तथैव च । भ्रातृमातृपितृमात्तं षड्विधं स्त्रीधनं स्मृतम् ॥ नारद (दायभाग, 8).

1492. पितृमातृपतिभ्रातृदत्तमध्यग्न्युपागतम् । आधिवेदनिकाद्यं च स्त्रीधन परिकीर्तितम् ॥ बन्धुदत्तं तथा शुल्कमन्वाधेयकमेव च । या. II. 143–144 On आधिवेदनिकं चैव, अपरार्क p 751 says चशब्दः आद्यर्थः । तेन च स्त्रीधनान्तरपरिग्रहः । तद्यथा—कार्यापत्यः समाशिका, मातापित्रंशं समं हरेत् । स्वसमादंशाच्चतुर्भागं, मातुः परिणाह्यं स्त्रियो विभजेरन्, अन्यदपि यत्स्त्रीस्वामिकं तत्स्त्रीधनमिति मन्वादिभिः परिकीर्तितम् । Against the reading चैव the बालम्भट्टी remarks 'अत्र *आधिवेदनिकं चैवेति* माध्यधृतपाठो न युक्तः, चशब्दस्य वैयर्थ्यात्, न्यूनतापत्तेः, पञ्चसान्तरविरोधापत्तेश्च ।'

1493 पितृमातृसुतभ्रातृदत्तमध्यग्न्युपागतमाधिवेदानिकं बन्धुदत्तं शुल्कमन्वाधेयकमिति स्त्रीधनम् । विष्णुधर्मसूत्र 17, 18.

defines several kinds of strīdhana enumerated by Manu, Yāj., Nār., and Viṣṇu (in all six) as follows[1494]: what is given to women at the time of marriage before the nuptial fire is declared by the wise to be *adhyagni*[1495] strīdhana. That again which a woman obtains when she is being taken (in a procession) from her father's house (to the bridegroom's) is declared to be *adhyāvahanika* strīdhana. Whatever is given to a woman through affection by the father-in-law or mother-in law and what is received by her at the time of doing obeisance at the feet (of elders) is said to be *prītidatta* (gift through affection) strīdhana. That is declared to be *śulka* (bride's fee) which is obtained as the price of household utensils, of beasts of burden, of milch cattle, ornaments and slaves. Whatever is obtained by a woman after marriage from the family of her husband as also from the family of her (father's) kinsmen is said to be *anvādheya* (gift subsequent). According to Bhṛgu whatever is obtained by a woman after marriage through affection from her husband or from her parents is *anvādheya*'. It may be noted that Kātyāyana's definitions of adhyagni and adhyāvahanika are wide

---

1494. विवाहकाले यल्लब्धं दीयते ह्यग्निसंनिधौ। तदध्यग्निकृतं सद्भिः स्त्रीधनं परिकीर्तितम्॥ यद्भुनर्लभते नारी नीयमाना पितृगृहात्। अध्यावहनिकं चैव स्त्रीधनं तदुदाहृतम्॥ प्रीत्या दत्तं तु यत्किंचित् श्वश्रूया वा श्वशुरेण वा। पादवन्दनिकं चैव प्रीतिदत्तं तदुच्यते॥ गृहोपस्करवाह्यानां दोह्याभरणकर्मणाम्। मूल्यं लब्धं तु यत्किंचिच्छुल्कं तत् परिकीर्तितम्॥ विवाहात्परतो यत्तु लब्धं भर्तृकुलात् स्त्रिया। अन्वाधेयं तदुक्तं तु लब्धं बन्धुकुलात् तथा॥ ऊर्ध्वं लब्धं तु यत्किंचित् संस्कारात् प्रीतितः स्त्रिया। भर्तुः पितुश्च सकाशाद्वा अन्वाधेयं तु तद् भृगुः॥ऊढया कन्यया वापि भर्तुः पितृगृहेऽपि वा। भ्रातुः सकाशात् पितुर्वा लब्धं सौदायिकं स्मृतम्॥ कात्या 895–901. The Mitā quotes all except two (viz 898 and 900), the दायभाग (IV) quotes all except 897. वि र, (pp 510, 524–525) reads all, दीपकलिका, दायभाग IV 1 5 p 73, कुल्लूक on मनु 9 194, वि चि p. 138 read नीयमाना हि (or तु) पैतृकात् in 896, अपरार्क p. 751, व्यव नि p 465, विवादचन्द्र p 77, वि. चि p 138 read तल्लावण्यार्जितमुच्यते for प्रीतिदत्तं तदुच्यते; दीपकलिका, व्यवहारसार p 237, व्य प्र p 543 read दोह्याभरणकर्मणाम्; वि चि p 139 and व्य. मयूख p 153 read यल्लब्धं स्वकुलात्तथा; मिता, स चि p 380 read यल्लब्धं पितृकुलात्तथा. दायभाग reads भर्तुः सकाशात् पित्रोर्वा

1495. Some of the words deserve explanation. अध्यग्नि is formed as an अव्ययीभाव from अधि + अग्नि acc to पा II. 1. 6 'अव्ययं विभक्तिसमीप०' and means अग्नौ अधिकृत्य अग्निसन्निधौ इत्यर्थः (बालम्भट्टी); आधिवेदनिक अधिवेदन धर्मपत्न्या सत्या रागत एव विवाहान्तरकरणे तत् निमित्त अस्मीति। सुबोधिनी and बालम्भट्टी (which relies on पा. V. 1, 38). Some read अध्यावहनिक, others read अध्यावाहनिक. आवहन or आवाहन means पितृकुलाद् भर्तृकुलप्राप्तिः (नन्दन on मनु IX 194) तत्समयोपलब्धमध्यावहनिकं; अन्वाधेय means अनु (विवाहानन्तर) आधीयते इति (नन्दन). Instead of प्रीतिदत्त some read लावण्यार्जित (obtained by her loveliness) which is explained by the वि चि (138) as लावण्य शीलनैपुण्यादि। तथा च पादमूलतापै शीलादिमत्यै वा स्त्रियै श्वशुरादिना दत्त तृतीयं स्त्रीधनमित्यर्थः।

enough to include gifts made even by strangers on those occasions

These definitions given by Kātyāyana have been accepted by all digests including even the Dāyabhāga.

"That is known as *saudāyika* which is obtained by a married woman or by a maiden in her husband's or father's house from her brother or from her parents" (Kāt.). Some of the divergences in readings and in interpretation deserve to be noted Acc. to the reading adopted by the Mit *adhyāvahanika* includes all gifts made *by any one* when the newly married girl is taken from her father's house in a procession, while the reading adopted by the Dāyabhāga[1496] and some others (*paitṛkāt*) restricts the adhyāvahanika to gifts made by the father's or mother's family only. The V. R (p. 523) includes under adhyāvāhanika also the gifts made by the father-in-law and others when the girl is taken back to her father's house and the V C. (p 138) says that it is what is obtained at the time of '*punāgamana*'. The Dāyabhāga[1497] (IV. 3. 19–20 p. 93) explains 'dohyābharana-karminām' differently as 'the gratification paid by house-builders or goldsmiths to induce her to press her husband to engage them' or as Vyāsa says 'what is given to a woman to induce her (cheerfully) to go to her husband's house'. The Sm. C. and V. P. explain śulka as the price of the articles which the bridegroom was in the habit of presenting to the bride at the time of marriage or when he started a house.[1498] The V.

1496 पैतृकादित्येकशेषेण पितृमातृकुलाद् यल्लभते धनं भर्तृगृह नीयमाना तदध्यावाहनिकम्। दायभाग IV 1 6 p 73. 'भर्तृगृहाद्यदा पितृकुलं याह्यते तदा श्वशुरादिभिर्दत्तमध्यावाहनिकामिति मेधातिथिः तदपि ग्राह्य न्यायसाम्यात्।' वि र. pp. 522–523; द्विरागमनकाले यत्कुतोऽप्यवाप्त तदध्यावाहनिकमित्यर्थः। वि. चि p 138. The printed editions do not contain the comment of मेधातिथि on मनु IX. 194 and the following verses

1497 गृहादिकर्मभिः शिल्पिभिस्तत्कर्मकरणाय भर्त्रादिप्रेरणार्थं स्त्रियै यद्वरकोचदान तच्चुल्क तदेव मूल्य प्रवृत्त्यर्थत्वात्। व्यासोक्तं वा यथा। यदा नेतुं भर्तृगृहे शुल्कं तत् परिकीर्तितम्। भर्तृगृहगमनार्थमुत्कोचादि यद्दत्त तच्च ब्राह्मादिष्वनिन्दितम्। दायभाग IV. 3. 20–21 p. 93

1498 The change in the meaning of *śulka* is interesting One meaning of śulka is 'tax or toll on merchandise'. Vide Visnu Dh S III 29, Yāj II 173, 261, Vas 19. 37 Pāṇini V 1. 47 uses that word in that sense (तदस्मिन्वृद्ध्यायलाभशुल्कोपदा दीयते) and the Kāśikā explains it as रक्षानिवेशो राजभागः शुल्क Another sense is 'the fee paid to the bride or her parents by the bridegroom in consideration of marriage'. The word occurs in

(*Continued on the next page*)

Nir. (p. 468) states that śulka has two senses; (1) what is given as the price of the girl to the guardians of the girl which goes to the mother and brother (on her death); (2) what is given (by the bridegroom) as the price of the ornaments for the girl and of the household gear.[1499] Another verse of Kāt. (904) has been quoted by many writers, which restricts the literal sense of the word stridhana, 'over that wealth that is obtained by a woman by mechanical arts (such as spinning) or from a stranger through affection, the husband has ownership

---

(*Continued from the last page*)

Gaut. 28 23 and in Sankha (*svayam śulkam vodhā*) q by V. R. p 521 In very ancient days there appears to have been a practice to offer in some cases considerable wealth to the father of the bride to induce him to give her in marriage. *Rg* I *109. 2* refers to this. 'O Indra and Agni! I have heard that you are more liberal than even an unsuitable (or deficient) son-in-law or even a brother-in-law'. Yāska (VI. *9*) in explaining this verse remarks that the southern people speak of the husband of the bride that i purchased as '*vijāmātr*' (*विजामाता इति शश्वद् दाक्षिणात्याः क्रीतायतिमाचक्षते अहुसमास इव वरोभिमेतः*) But this verse also shows that the bride's brother (*śyāla*) had to give wealth to his sister's husband. Vide H. of Dh. Vol. II. pp *503–506* for passages about the sale and purchase of girls in marriage from ancient times right down to *1800* A. D. Though sometimes girls were purchased for marriage, popular feeling gradually asserted itself against this In the Vanaparva (115. 23) Gādhi claims as the custom of his family one thousand horses of the best kind *from* Rcika when the latter preferred his suit for the hand of Gādhi's daughter (*उचितं नः कुले किंचिद् वृणीष्वैतत्समर्पितम्। एकतः श्यामकर्णानां पाण्डुराणां तरस्विनाम्। सहस्रं वाजिनां शुल्कमिति विद्धि द्विजोत्तम॥*) Vide Anuśāsana 4 12 (for a similar statement) and 2 31. Manu III. *51* forbids the taking of even a small gratuity through *greed* by the father when giving away his daughter in marriage and says that if he does so he would be guilty of the sale of his child and in III. *54* (almost the same as Anuśāsana 46. 1–2) Manu says that when agnates do not appropriate to themselves the gratuity paid (*by* the bridegroom) for the bride but hand it over to the bride then it is not sale, but it is honour shown to the girl and is merely kindness to her. The Mit defines śulka as the gratuity after getting which the girl is given The V. C p. *139* defines it as what is obtained from the husband *on* condition of furnishing household gear &c. '*गृहोपस्करादिकरणोपाधिना स्त्रिया गृहपतितो यद्धनं तच्छुल्कमित्यर्थः*'

1499. *तत्र शुल्कं द्विविधं कन्याविक्रयमूल्यादेन कन्यावद्भ्यो दत्तमेकम्। तस्मादृतादि भ्रातृभ्यो वा। कन्याभूषणगृहोपकरणमूल्यत्वेन दत्तमपरं शुल्कम्। तद्भ्रातृभिरादेयम्।* स्मृ. चं. p. 468.

the rest is declared to be stridhana'.[1500] The prima facie view (*pūrvapakṣa*) in Jai. VI. 1. 12 urges that what a woman gets by serving cooked food or by cutting clothes does not belong to her. The gifts from strangers here referred to are other than those made by a stranger before the nuptial fire or at the time of the bridal procession. This definition makes it clear that what is obtained even from a stranger by a maiden or by a woman who is a widow at the time of the gift is pure stridhana. Devala says, 'maintenance (what was given for maintenance), ornaments, śulka (bride's gratuity), the profits of money-lending are a woman's stridhana. She alone is entitled to enjoy it and the husband is not entitled to enjoy it except in the case of distress'.[1501] Manu IX. 200 states, 'the heirs of the husband should not divide (among themselves) the ornaments worn by women during the lifetime of their husband; if they divide them they incur sin'. In the printed editions of Manu there is no comment of Medhātithi on this verse, but the V. R (p. 509), V. C. p. 139, Dāyatattva p. 184 all say that acc. to Medhātithi even ornaments, though not donated expressly, become stridhana, if worn with the husband's consent.[1502] According to the Vaijayantī such ornaments should be assigned to the share of the woman's husband so that she alone might put them on and that it is not meant that such ornaments are not to be taken into account at all at the time of partition.

1500. मासं शिल्पैस्तु यद्वित्तं प्रीत्या चैव यदन्यतः । भर्तुः स्वाम्यं तदा तत्र शेषं तु स्त्रीधनं स्मृतम् ॥ कात्या. q. by दायभाग IV. 1. 19–20 p 76, स्मृतिच II p 281, परा मा III 550, व्य. मयूख p. 154. दायभाग explains: अन्यत इति पितृमातृभर्तृकुलव्यतिरिक्तात् यल्लब्धं शिल्पेन वा यदर्जितं तत्र भर्तुः स्वाम्य स्वातन्त्र्यम्, अनापद्यपि भर्ता ग्रहीतुमर्हति तेन स्त्रिया अपि धनं न स्त्रीधनमस्वातन्त्र्यात्. 1502. पत्यौ जीवति यः स्त्रीभिरलङ्कारो धृतो भवेत् । न तं भजेरन् दायादा भजमानाः पतन्ति ते ॥ मनु IX. 200, which is almost same as विष्णुधर्मसूत्र 17. 22 पत्युरज्ञातेमा(ज्ञानेना ?)प्यदत्तोप्यलङ्कारो यो मण्डनार्थं धृतः सोपि दायादैर्न हर्तव्य इति मेधातिथेरिति प्रकाश. । वि. र. p 509; पत्युरदत्तोपि तदज्ञया परिहितोप्यलङ्कारस्तावदेव भार्यायाः स्त्रीयो भवतीति मेधातिथिः । वि चि. p 139 and दायतत्त्व p 184.

Saudāyika is not a special kind of stridhana. It is rather a comprehensive term for several kinds of stridhana as the definition given by Kāt shows and as the V. C. (p. 139) expressly states[1503]. It is almost synonymous with stridhana in the technical sense. Acc. to most writers, it is wealth received by a woman, whether as a maiden or as a married woman, in her father's or husband's house from her parents or relatives of the father and mother. The Sm C. II. p. 282 and V. R p. 511 hold that saudāyika is all wealth obtained by a woman whether as a maiden or as a married woman from her mother, father or paternal relatives only, while the Dāyabhāga IV. 1. 23 pp 76-77 and V. C. hold that *saudāyika* includes also all property donated by the husband except immovable property, which latter she cannot alienate even after her husband's death. There is a verse of Vyāsa[1504] that defines saudāyika similarly, 'whatever is obtained by a woman as a maiden at the time of marriage and after marriage from the house of her father or husband, is termed saudāyika' The word 'saudāyika' is derived from 'sudāya' and means, according to the Dāyabhāga IV. 1. 22 p. 76, 'received from affectionate kindred'. The Amarakośa says that 'sudāya' means 'gifts of yautaka and the like' and that saudāyaka is merely a derivative without change of meaning[1505]

Another word requiring explanation is '*yautaka*'. It occurs in Manu IX. 131, 'whatever is the yautaka of the mother goes to the maiden daughter' (and not to the married daughter or son). So yautaka seems to be a synonym for stridhana in

1503. एवं स्त्रीधनानि भवन्ति। एतदेव स्त्रीणां सौदायिकं तथा च कात्यायन । ऊढया ... भवेत्। पत्युरित्यत्रापि गृहे इति सम्बन्धः। . . भ्रातुरित्युपलक्षणम्। तेन कन्यया वा ऊढया वा पितृतो वा तत्कुलतो वा पतिकुलतो वा यल्लब्धं तत्सर्वं तस्याः सौदायिकमित्यर्थः । वक्ष्यमाणवृत्त्यादिकमप्येतत्प्रपञ्चः। वि चि. p. 139, दायभाग IV. 1. 21 reads भर्तुः सकाशात् पित्रोर्वा, 'भर्तुः सकाशादिति कल्पतर्वादौ पाठः' व्य प्र. p 543.

1504. यत्कन्यया विवाहे च विवाहात्परतश्च यत् । पितृभर्तृगृहात्प्राप्तं धनं सौदायिकं स्मृतम् ॥ व्यास. q. by स्मृतिच Il p 282, स. वि. p 378.

1505. सुदायसम्बन्धिभ्यो लब्धं सौदायिकम्। दायभाग IV. 1. 22, यौतकादि तु यद्देयं सुदायो हरणं च तत्। अमरकोशः, नन्नु 'सौदायिकं तु यद्देयं सुदायो भरण च तत्' इति निघण्टुपाठात् कथ सौदायिकशब्दोऽत्र प्रयुक्त । स्वार्थे तद्धितान्ततयेत्यनवद्यम्। स्मृतिच II p 282 The quotation from Amara seems to be corrupt as printed by Mr. Gharpure, the Mysore edition correctly reads यौतकादि तु यद्देय सुदाय इति निघण्टुपाठात् (vol III. 2. p. 655) 'सुदाय एव सौदायिक स्वार्थिकष्टच्। स्वदायतो लब्धमिति वा । स्वदाय(सुदाय?)सम्बन्धिभ्यो लब्धमिति तु माध.' बालम्भट्टी on या. II. 143

the technical sense The Sm [1506] C II p. 285, Madanaratna (folio 105 b) and V. Mayūkha remark 'yautaka is that wealth that is received as a gift from anybody by a woman while she is seated together with her husband at the time of marriage and the like'. It is derived from *yuta* (joined). It should, however, be noted that Yāj II. 149 employs the word *yautaka* as an adjective in the sense of 'separated' and that Medhātithi on Manu IX 131 explains 'yautaka'-as the separate property of a woman, her strīdhana The Sm C II. p 285 remarks that Devasvāmī derived 'yautaka' from 'yu' (to separate) and held it to mean 'wealth obtained from the family of the woman's father which is separate in its characteristics'. The V. C. p 142 and Vivādacandra p. 74 read 'yautuka' and the former explains it as gifts from the father and the like at the time of marriage The Dāyatattva (p 186) states that both forms 'yautaka' and 'yautuka' are in vogue and relies on Vācaspati and Rāyamukuta in support

Kaut (III. 2. p 153) names śulka, anvādheya, ādhivedanika and bandhudatta as kinds of strīdhana.

The above are the principal smṛti texts on the question of what constitutes strīdhana. It will be seen that the smṛtis only enumerate and describe certain kinds of property as strīdhana, which word is not used by them in the etymological sense of 'all kinds of property possessed by a woman'. They do not attempt a comprehensive definition of strīdhana. From the texts of the smṛtis it follows that strīdhana was a technical term, which at first included only six kinds of property, then nine and ultimately by the time of Kātyāyana it included all property (whether movable or immovable) obtained by a woman, either as a maiden or at marriage or after marriage,

II p 285. Vide व्य. म. p 548 for most of these being brought together. व्यव नि. p. 463 explains यौतकं as मातृकुललब्धम्. 'यौतकशब्दः पृथग्भावेन च क्रीधने। तत्र हि तस्या एव केवलायाः स्वाम्यम्। अन्ये तु सौदायकमेव तत्सम्बन्धक्रीधनं तत्र हि तस्याः स्वातन्त्र्यम्। मेधा on मनु IX 131: वाचस्पतिमिश्रराजमुकुटभूताद् यौतुकं यौतकमपि साधु। परिणयनकालः परिणयनपूर्वापरीभूतकाल स च वृद्धिश्राद्धारम्भपरत्वमभिधातुन्नान्तो विवाहतत्रे विवृतः। वाचस्पति p. 186.

from her parents or the family or relatives of the parents or from the husband and his family (except immovable property given by the husband) and that what was obtained by a woman *after her marriage* by her own labour or from strangers did not become stridhana. Most smrtis employ the word 'datta' (donated), but Kāt. and Vyāsa sometimes use the word 'obtained' (*prāpta* or *labdha*), which is ordinarily wider than 'datta'. But it is clear that the commentators do not expressly say that 'obtained' includes 'inherited', though from their general remarks to be quoted below it is arguable that they probably included inherited property under property obtained.

This is stridhana in a technical sense.

It is now necessary to find how stridhana was defined by the several commentaries and digests that are held authoritative in the several schools. This is a most important matter for practical purposes, since the courts have to follow the opinions of commentators[1507] that are authoritative in each school and are not at liberty to put their own construction upon ancient smrti texts, if such construction would run counter to the express opinions of the authoritative commentators. First then comes the Mitāksarā. Its gloss on Yāj. II. 143 may be translated as follows[1508]: 'whatever is given by the father, mother, husband and brother; what was presented by the maternal uncle and the like at the time of marriage before the nuptial fire; and *ādhivedanika*, that is, gift made (by the husband) at the time of marrying a second wife as will be described subsequently in the words 'he should give to the wife that is superseded' (Yāj. II. 148); by the word 'ādya' (meaning 'and the like') is indicated property that is obtained by succession, purchase, partition, seizure or finding—all this is declared by Manu and others to be stridhana. The word stridhana is employed here in its etymological sense and not in a technical sense, since, when the etymological sense is possible, it is improper to resort to the technical sense' The Mitāksarā expanded the

1508 पित्रा मात्रा पत्या भ्राता च यद्दत्तं यच्च विवाहकालेऽग्नावधिकृत्य मातुलादिभिर्दत्तं, आधिवेदनिक अधिवेदननिमित्तं अधिविक्तायै दत्तादिति पदमाणम् । आद्यशब्देन रिक्थक्रयसंविभागपरिग्रहः धिगमप्रभृतम् एतत्स्त्रीधन मन्वादिभिरुक्तम् । स्त्रीधनशब्दश्च यौगिको न पारिभाषिक । योगसम्भवे परिभाषाया अयुक्तत्वात् । मिता on याज्ञ II. 143 As against the last sentence of the Mit may be compared the maxim (*nyāya*) 'रूढियोगमपहरति' (relied upon in पराश. मा I. 1. p. 300)

definition of strīdhana so as to include under it the five kinds of property of which a man becomes owner in various ways according to Gautama X. 39. The result is that, according to the Mit, property of any description belonging to a woman becomes strīdhana even if it be inherited by her from a male as a widow or as a mother or even if it be obtained at a partition by a wife or mother (acc. to Yāj. II 115 or 123 respectively). The same interpretation of the word 'ādya' has been accepted by several works, such as the Madanapārijāta (p 671), the S. V. (p. 379), V. P. (p 542), the Bālambhattī. Aparārka without reading 'ādya' gave the same explanation of 'ca' as stated above (on p. 773). On the other hand, the Dāyabhāga gave a restricted meaning to the word. Jīmūtavāhana reads Yāj II. 143 as '*ādhivedanikam cāpa*', quotes the verse of Devala (in note 1501), remarks that strīdhana is not restricted to the six kinds of Manu (IX. 194) but includes other kinds mentioned by other smṛtis and finally[1509] observes: 'that alone is strīdhana which a woman has authority to donate, sell or enjoy independently of her husband's control'. The Dāyabhāga does not expressly state the kinds of property that a woman can dispose of independently of her husband, but immediately after defining strīdhana it quotes the texts of Kāt. (about earnings from mechanical arts and gifts from strangers) and Nār. (IV. 28), 'what has been given to a wife by her loving husband, she may spend or give away as she likes even after his death excepting immovables'. From this it follows that, according to the Dāyabhāga, all gifts from relations except a gift of immovable property made by the husband and gifts from even strangers made before the nuptial fire or on the bridal procession constitute strīdhana, but property inherited by a woman or obtained on partition, gifts from strangers (other than the two kinds noted above) and property acquired by her by mechanical arts or by her labour are not strīdhana. The Dāyatattva closely follows the Dāyabhāga.

The Sm. C. does not give a defintion of strīdhana, but it does not adopt the interpretation of the word 'ādya' given by

---

1509. तदेवमन्यव्यतिरिक्तसंख्यस्त्रीधनकीर्तनात् यद्संख्या विवक्षिता किं तु स्त्रीधनकीर्तनमात्रपराणि वचनानि। तदेव च स्त्रीधनं यद् भर्तृत स्वातन्त्र्येण दानविक्रयभोगान्कर्तुमधिकरोति। ... स्थावरेऽपि भर्तृदत्तमात्रे स्त्रिया दानाद्यनधिकारः। तदाह नारदः। भर्त्रा प्रीतेन यद्दत्तं स्त्रियै तस्मिन्मृतेऽपि तत्। सा यथाकाममश्नीयाद् दद्याद्वा स्थावरादृते। भर्तृदत्तविशेषणाद् भर्तृदत्तस्थावरादृते अन्यत् स्थावरं देयमेव भवति। दायभाग IV 1. 18 and 23. श्रीकृष्ण says 'स्त्रीणां स्वातन्त्र्येण विनियोज्यं स्त्रीधनमित्यर्थः।'

the Mit. Therefore it may be said that it is in line with the Dāyabhāga. The Par. M. III, p. 547[1510] (another Madras authority) appears to follow the *Mit.*, since it says: "'ādya' includes 'ādhivedanika' and what is acquired by inheritance, sale and the like." The Vivādacintāmani (the leading authority in Mithilā) does not define strīdhana in general, but enumerates the several kinds of strīdhana described by Manu, Yāj., Viṣnu, Kāt, and Devala and so is on a par with the Dāyabhāga. The V. Mayūkha divides strīdhana into two kinds, *pāribhāsika* (technical) and *apāribhāsika* (non-technical). The former comprises properties expressly stated to be strīdhana by the sages, while the latter includes all other property belonging to a woman (except what is called technical) and acquired by her by partition or cutting (sewing or other mechanical arts).[1511] This division is peculiar to the V. Mayūkha. The Vīramitrodaya (the paramount authority in the Benares school) agrees with Mit. as stated above.

It is beyond the scope of this work to go deeply into modern caselaw. But it is necessary to show how the Indian Courts have in modern times dealt with strīdhana as defined by the commentators. It may be said at once that the inclusion by the Mit. of property inherited by a woman or obtained at a partition under strīdhana has been totally discarded by the Privy Council for all provinces in India except Bombay[1512]. A woman may inherit property from a male, such as from her husband, father or son or she may inherit property from a female, that is, from her mother, daughter &c. Both these kinds of property

1512. Vide *Sheo Shankar v. Debi Sahai* L R. 30 I A. 202 (a case from Allahabad) for the proposition that according to the law of the Benares school even property inherited by a woman from a female is not her stridhana and does not pass to her heirs. The principal grounds for the decision were that as regards property inherited by a female from males the rule deducible from the gloss of Vijñāneśvara had already been discarded and that even as to property inherited from a female the same rule had been applied in most High Courts (p. 208). Vide also *Balwantrao v Baji Rao* L. R. 47 I. A. 213, 223 where the Privy Council approve of the Bombay High Court's decision in *Bhau v. Raghunath* 30 Bom 229 that a daughter succeeding to her father takes the property absolutely as stridhana in the Bombay Presidency.

are stridhana according to the Mit, but the Privy Council has held as to both these kinds that they are not stridhana; e g if a daughter inherits property from her father or inherits the stridhana property of her mother, it does not become her stridhana, that on the death of the daughter, the property does not pass to *her* heirs, but to the next heir of the person from whom she inherited it The Bombay school makes a distinction. If a woman enters a family by marriage and then inherits to a male of that family (as e g a widow succeeding to her husband, a mother to her son or a predeceased son's widow to her father-in-law), the property she inherits is not her stridhana, she takes only a limited estate in it and on her death it passes to the next heir of the male from whom she inherited But if a woman inherits from a male belonging to the family in which she was born (e. g a daughter succeeding to her father, a sister to her brother) or if a woman inherits property from a female, the property so inherited becomes her stridhana (in Bombay). As to property acquired by a wife or mother on partition[1513], it has been held by the Privy Council that it is not stridhana even in provinces governed by the Mitāksarā (including Bombay).

Kāt (903) declares.[1514] 'whatever was given to a woman for wearing only on some occasion (or on condition) or with fraudulent intent by the father, brother or husband is not held to be stridhana.' The idea is that if the father or husband gives some ornament to his daughter or wife for wearing on some special occasion (*upādhi*) or if a father or husband in fraud of his co-parceners gives some family property to his daughter or wife it cannot become stridhana.

Dominion over stridhana.—What is stridhana and what dominion a woman has over stridhana depend on three things, viz the source of acquiring the property, her status at the time of acquisition (i e whether she was a maiden or a married woman whose husband was living or a widow), the school of law by which she is governed Certain verses of Kāt and Nār are the principal texts on this subject Kāt (905-907, 911)

1513 Vide *Deb. Mangal Prasad* v. *Mahadeo Prasad* I L R 39 I A 151, 131-132 (about the share of immovable property on partition not being stridhana and not passing on her death to her stridhana heirs)

1514 यत्तु उत्सवादावेव धार्यमित्येवमनुपाधिना अलङ्कारादि दत्तं यत्र क्वचादौ दिवसमात्रार्थं दत्तं तत्स्त्रीधनं न भवतीत्यत्र कात्यायन । यत्तु संग्रामिकं दत्तं यत्तु योगक्षेमं च । पित्रा भ्रात्राथवा दत्तं न तत्स्त्रीधनमिष्यते ॥स्मृतिच II p 281 The verse is quoted by परा मा. III p 519, व्य मयूख p 151 (reads तत्र सांग्रामिकं यत्तत्)

says:[1515] 'on obtaining wealth of the *saudāyika* kind it is declared (lit. desired) that women have independent power over it, since it was given by them (the kindred) as support (or maintenance) in order that they (women) may not be reduced to a terrible (or wretched) condition. It has been declared that women always have independence in *saudāyika* property as regards sale or gift at their pleasure and even in immovables (if saudāyika). A woman, when her husband is dead, may deal with the gift (of movables) given by the husband as she pleases, but she should preserve it as long as he is alive or she may spend it on his family. Neither the husband *nor the son*, nor the father nor the brothers have power to use or alienate the stridhana of a woman'. The verse of Kāt about property acquired by labour or about the gift from strangers through affection and that of Nārada about the gift of immovable property made by the husband have already been quoted From these texts it follows that a Hindu woman during her maidenhood[1516] could dispose of her stridhana property of every description at her pleasure, that during her widowhood she could dispose of every kind of stridhana including movable property given by the husband but not immovable property given by him and that a married woman whose husband was living could dispose of at her pleasure only that kind of property called *saudāyika* (i e. gifts from relations except those made by the husband). Under modern decisions the distinction between saudāyika and

---

1515. सौदायिकं धन प्राप्य स्त्रीणा स्वातन्त्र्यमिष्यते । यस्मात्तदाहृतं दत्तमुपजीवनम् ॥ सौदायिके सदा स्त्रीणा स्वातन्त्र्यं परिकीर्तितम् । विक्रये चैव दाने च यथेष्टं स्थाव रेष्वपि ॥ भर्तृदाय मृते पत्यौ विन्यसेत् स्त्री यथेष्टतः । विद्यमाने तु सरक्षेत् क्षयमेत्तत्कुलेऽन्यथा ॥ न भर्ता नैव च सुता न पिता भ्रातरो न च । अदाने वा विसर्गे वा स्त्रीधने प्रभविष्णव ॥ कात्या q. अपरार्क p 752 (except भर्तृदायं &c), स्मृतिच II p 282, दायभाग IV 1 22 and 24 and व्य. मयूख p. 155 (except भर्तृदाय &c.), वि. र pp 510-11, 514 (all), वि. चि. pp. 139-140. On आहृतस्यार्थं वि र says, 'आहृतस्यमदारुणता तेन यस्मादियं वित्ताभावाद्दारुणा न भवत्येतदर्थम्' (p 511), 'आहृतस्यार्थं अनुकल्पार्थं' (अपिहृण्य) On सदा the स्मृतिच says 'पत्यौ विद्यमानेपि स्वातन्त्र्यमुक्तं सदेत्यभिधानात्.' On भर्तृदाय the स्मृतिच says 'भर्तृदायो भर्तृदत्तम् । तन्मध्ये तु तदनन्तरोक्तपादत्रयेणाविद्य-माने पत्यौ स्वातन्त्र्यमुक्तम् । विद्यमाने तु सरक्षेदित्यभिधानात् । सरक्षेद्भर्तृदत्त भर्त्रनुज्ञया विना न विन्यसेदित्यर्थः'. वि र p. 511 and वि चि. p. 140 take भर्तृदाय to mean husband's own property and the former says that हलायुध and पारिजात explained it as स्त्रीधन given by the husband

1516 So long as a Hindu maiden is a minor she cannot alienate her property or dispose of it by will, only her guardian can alienate it for purposes laid down in Hunooman Persbad's case, vide 6 Moo I. A 393 (cited above on p 449).

non-saudāyika is retained,[1517] but the distinction between saudāyika given by the relations and that given by the husband is not kept.[1518] Now the woman's power to dispose off as she likes depends on the question whether the gift was meant to pass an absolute estate or a limited estate even if the husband was the donor. During marriage when the husband is living her dominion depends under modern law upon the character of the strīdhana. If it is of the kind called saudāyika she can dispose of it by sale, gift or will as she likes without her husband's consent; but as to other kinds of strīdhana property (such as gifts from strangers, property acquired by mechanical arts or property inherited) she cannot dispose of it without her husband's consent. If she disposes of it without such consent the alienation is void According to the D B IV. 1. 20 property acquired by a married woman by mechanical arts or by gift from a stranger is subject to the husband's dominion during his life and may be taken by him even when there is no distress No one else (except the husband) has got control over even such strīdhana After the husband's death, she can dispose of even non-saudāyika strīdhana as she likes But even as regards saudāyika the texts concede certain rights to the husband in certain circumstances Yāj II. 147 says: 'the husband is not liable to return to the wife her strīdhana taken (i e used) by him in a famine, for (indispensable) religious acts, in disease, or when imprisoned (by the creditor or by the king or an enemy)[1519]

1517. Vide *Bhau v Raghunath* 30 Bom 229 (where it was held that property inherited by a woman from her father could not be bequeathed by her without the consent of the husband who survived her) Bequests to a woman are on the same footing as a gift for the purposes of strīdhana Vide *Damodar v. Purmanandas* 7 Bom 155

Kāt. (914)[1520] has a similar verse which says that he may return stridhana wealth if he chooses to do so when it is used by him in a disease or in calamities or when harassed by creditors. Kaut. (III. 2 p. 152) is closely similar to Yāj. and adds that the woman can spend it without blame for the maintenance of herself, her son and daughter-in-law or when the husband has gone abroad without making provision for the maintenance of these. Kaut (III. 2. p. 152) further provides[1521] that there should be no complaint (by the wife) as regards the expenditure of stridhana made more than three years before by joint action of the husband and wife when they have given birth to two children (or to twins) and when the marriage has been in the most approved forms (*brāhma* and the other three), that when stridhana has been expended by (the husband and wife) that are married in the *gāndharva* or *āsura* form both should be made to restore it with interest and that what is expended when the marriage is in the *rākṣasa* or *paiśāca* form the expenditure of stridhana should be dealt with as theft. The meaning of 'mithunam prajātayoh' and 'triversopabhuktam' in Kaut is not quite clear. It is probable that Kautilya lays down a rule of limitation. If more than three years are allowed to pass without complaint, then no complaint made later (than three years after the expenditure) would be entertained. So also if there be no children of the marriage and the husband expends stridhana without objection by the wife then also no complaint would be entertained as the restraint on alienation of stridhana by the husband and wife was meant for the benefit and advancement of the children None of the later smrtis like those of Yāj, Nār. or Kāt. makes these distinctions and so Kaut probably represents an early stage in the evolution of the husband's dominion over stridhana. These later smrtis hold that the husband and wife may be entirely separate as regards their properties and as a general rule the husband's debts are not binding on the wife's properties nor are the wife's separate debts binding on the husband or his properties (Yāj. II. 46,

Visnu Dh. S. VI. 31-32). But the same smṛtis make it clear that under certain distressing circumstances the wife's separate property was liable for the maintenanoe or debts of the husband. The Mit. expressly states[1521a] that if the husband uses his wife's stridhana under any other circumstances (than those specified by Yāj. II. 147 and Kāt) then he has to return it, that no relation except the husband has any right to use a woman's stridhana during her lifetime even in distress or disease &o. and relies on Manu VIII. 29 whioh requires the righteous king to award the punishment for theft against such relatives as appropriate the wealth of women. The Sm. C. and V. Mayūkha follow the Mit., but the V. R. and V. C. hold that Kātyāyana's verse applies not only to the husband, but also to the son, father and brothers of the woman. Kāt. (912-913) provides[1521a] that if any one of the four persons (q. in n. 1515 above) forcibly consumes stridhana he should be made to return it with interest and should be also liable to fine (or punishment) and that if any one of these oonsumes stridhana amioably after securing her consent then he would be liable to return only the prinoipal amount, when he becomes well-off (i. e. able to pay). Devala[1522] also states, 'if the husband makes a gift of stridhana without cause or enjoys it, he must pay it baok with interest, but he may use the stridhana of his wife for relieving the distress of a son (and also of the family, aco. to V. Mayūkha). Kāt. (908)[1523] adds a speoial rule, 'if the husband has two wives and he does not reside with one of them (i. e neglects her), he should be forcibly made to return (the stridhana of his neglected wife) by the king even though she bestowed it upon him through affection.' The texts of Kāt., Devala and Nār. quoted above about the dominion of the woman over her stridhana and about the husband's power over it are

1521a. यदि ह्येकतरो ह्येषां स्त्रीधनं भक्षयेद् बलात्। सद्वृद्धिकं स दाप्यः स्याद् वृद्धं चैव समाप्नुयात्। तदेव यद्यनुज्ञाप्य भक्षयेत्तमीतिपूर्वकम्। मूलमेव प्रदाप्यः स्याद्यदासौ धनवान् भवेत्॥ कात्या. q by अपरार्क p 755, वीरमित्र. IV. 1. 24 p. 78, स्मृतिच. II. p 282.

1522. वृथा मोक्षे च भोगे च क्रिये दद्यात्सवृद्धिकम्। पुत्रार्तिहरणे वापि स्त्रीधनं भोक्तुमर्हति॥ देवल q by स्मृतिच. II. p 283 (पुत्रग्रहणं कुटुम्बोपलक्षणार्थम्), अपरार्क p 755, व्य. मयूख p. 156.

1523. अथ चेत्स द्विभार्यः स्याज्ज्यायसीं तां भजते पुनः। प्रीत्या निसृष्टमपि चेत्प्रतिदाप्यः स तद् बलात्॥ कात्या q. by अपरार्क p. 755, वीरमित्र IV. 1. 24 p. 78, स्मृतिच. II, p. 283. The व्य म p 156 ascribes this verse to देवल.

authoritative in all schools even now. Manu IX. 199[1524] provides: 'wives should not spend (for their own benefit) from the property of their families which is common to many, nor from their own property without the husband's permission.' The V. Mayūkha interprets this as meaning that she has no independent power even over ādhivedanika and the like, but this would be opposed to the express texts of Kāt, Vyāsa and Devala. Therefore the words must be taken as only recommendatory.

Kāt. (916) delivers a special rule viz 'strīdhana[1525] which was promised (to a woman) by her husband should be paid to her as a debt by the sons (i e by her own sons or stepsons) provided she resides in the husband's family, she should not reside with her paternal family.' The Sm. C. and V P. (p 546) explain that even grandsons and great-grandsons are liable to pay just as sons are. According to Kāt. as understood by the Sm. C and others a wife who is full of evil acts, is immodest, wastes property and is given up to adultery, does not deserve (to dispose of) strīdhana and V. P. and V. C. explain that it may be taken away from her in such a case[1526] In modern times this rule of forfeiture of rights would not be enforced by the courts as regards strīdhana Some explain this verse as referring to the widow as heir and separate the words as 'strī dhanam.'[1527] Vide *Ganga v. Ghasita* 1 All 46 (F. B), 48–49.

Succession to Strīdhana.—The several schools of Hindu Law differ from each other perhaps more widely on this subject than

on any other. But one thing is generally common to all schools viz. that as regards succession to strīdhana daughters are preferred to sons, though in later days sons were introduced by some writers as heirs along with daughters or even as preferable to daughters for certain kinds of strīdhana. This was probably due to the fact that the value of strīdhana property became considerable in later times and society which held to the doctrine of the dependence and inferior position of women could not tolerate the idea that large estates should go to women alone. The causes of the variance among writers on the devolution of strīdhana are historical. The text-writers wrote at different times and in different countries and probably reflect the popular sentiments of their own countries and times tinged now and then by personal predilections also. The digests sometimes expressly say that their interpretation follows the usage of their times (vide V Mayūkha in note 1529 below).

The succession to strīdhana varies according as the woman is unmarried or married, according as the marriage was in an approved or an unapproved form, and also according to the species of strīdhana and the school of law to which she is subject.

First, the important texts of the smṛtis on succession to strīdhana may be brought together. The oldest extant text is that of Gaut 28.22 which provides,[1528] 'strīdhana devolves (first) on daughters; (in a competition among daughters) it goes to those that are unmarried (*apratta*, lit. not given away in marriage) and (in a competition among married daughters) to those that are not well provided for (i. e. that are indigent).' Manu (IX 192–193) provides: 'when the mother dies all the full brothers and full sisters should equally divide the mother's estate. Even to the daughters of those daughters some thing should be given (that is) as much as would be seemly out of the estate of their grandmother on the ground of affection'. In Manu IX. 195 it is said that the six kinds of strīdhana, as also anvādheya strīdhana and gifts made by the husband through affection, should go to her progeny if she dies in her husband's lifetime. The verses of Manu (IX. 192–3) are variously explained by the commentators, Sarvajña-Nārāyana holding that mother's estate means estate other than technical strīdhana. Most of them rely on a text of Br. and

1528. स्त्रीधनं दुहितॄणामप्रत्तानाममनिर्ह्रियाणा च । गौ. 28 22.

hold that full brothers and unmarried sisters succeed together and married sisters (i. e. daughters of the woman whose heirs are to be found) get some trifle (¼ of each brother acc. to Kullūka). Manu IX. 196–197 further provide that when a woman was married in one of the five forms of marriage viz. Brāhma, Daiva, Ārsa, Prājāpatya and Gāndharva and died without issue her strīdhana goes to her husband and if she was married in the Āsura and the other two forms it went, if she died issueless, to her mother and father. Yāj. II.[1529] 117 provides that daughters take the strīdhana estate of their mother and on failure of them the (male) issue. In II.[1530] 144 Yāj again says that strīdhana goes to daughters, but that if the woman dies without issue then it goes to the husband if she was married in one of the four forms (brāhma, daiva, ārsa, prājāpatya) but to her parents if she was married in the other four forms. Viṣnu Dh. S. (17. 19–21) and Nār. (dāyabhāga, 9) contain the same rules as Yāj. II. 144–145, while Nār. (dāyabhāga 2) states that the mother's wealth should be divided among the daughters and in the absence of daughters the latter's issue takes it. Śaṅkha-Likhita[1531] declare that the mother's estate is taken in equal shares by the full brothers (sons of the deceased mother) and their unmarried sisters. Br.[1532] (S. B. E.

1529. मातुर्दुहितरः शेषमूणान्तास्य ऋतेऽन्वयः । या. II. 117 on which the मिता. says, 'दुहितृणामभावे अन्वयः पुत्रादिर्गृह्णीयात् ।'; some construe the word अन्वय as meaning the issue of the daughters (i. e. daughter's daughters and daughter's sons). Vide व्य. न. p 159, "यत्तु याज्ञवल्क्य 'मातुर्दुहि ... न्वयः' इति तत्राप्यन्वयपदं कन्यासन्ततिपरमिति केचित् । परे तु दुहित्रभावे पुत्रा एव गृह्णीयु, नारदीये तद्वत् मातुरेव परामर्शादित्याहुः । आचारसंवादी चार्य पक्षः ।" नारद (दायभाग, 2) as मातुर्दुहितरोऽभावे दुहितृणां तदन्वयः ।, about which the मिता. on याज्ञ. II. 145 remarks 'तच्छब्देन संनिहितदुहितृपरामर्शात्'. The मद. पा (p. 667) explains नारद as मातुर्धन दुहितर आप्त्वपुत्रतद्भावे दुहितृणां दौहित्रीणां तदभावे तदन्वये ये जाता दौहित्रास्तेषामित्यर्थः ।; the विवादचन्द्र p. 75 says 'दुहितृणामभावे तदन्वयस्तत्पुत्रादिर्विभजेदित्यर्थः' मातुरन्वय इति बालरूप. ।'

1530. अतीतायामप्रजसि बान्धवास्तद्धनाप्नुयुः । अप्रज.स्त्रीधनं भर्तुर्ब्राह्मादिषु चतुर्ष्वपि । दुहितृणां मृतवा चेच्छेरेषु पितृगामि तत् ॥ या. 1532. स्त्रीधनं स्यादपत्यानां दुहिता च तदंशिनी । अमत्ता चेत्समूढा तु लभते मानमात्रकम् । बृह. q. by स्मृतिच. II p. 285, हरदत्त on गौ 28. 22, दायभाग IV 2, 3 p. 79 (अपत्यपद पुत्रपरं तेषामप्रजाभिर्दुहितृभि. सह मातृधनविभाग), परा. मा III. p. 552 (reads सा न मातृकम्), विवादचन्द्र p. 75.

33 p. 383 verse 87) declares, 'stridhana goes to her progeny, but the unmarried daughter is preferred, while the married one gets only some trifle as a token of regard'. Parāśara holds that the unmarried daughters take all the stridhana, but in a competition between married daughters alone and sons they all take equal shares. Devala[1533] states, 'on the death of a woman her stridhana is taken in equal shares by her sons and daughters; if she leaves no issue it would be taken by her husband, mother, brother or father'. Pāraskara[1534] (q by Par. M. III. 552) states that stridhana devolves on the unmarried daughter, that the son does not get it, but that he shares equally with a married daughter. Kaut[1535] (III. 2 p. 153) prescribes that if a woman dies during her husband's lifetime her sons and daughters divide her stridhana; if she has no son then daughters divide it, on failure (of both sons and daughters) the husband takes it and that the śulka, anvādheya or any other kind of stridhana given by her relatives is taken by her relatives. Kātyāyana[1536] (917–920) whose treatment of stridhana is the most detailed of all smrti writers has the following verses on succession to stridhana: 'Sisters whose husbands are living should share with their brothers the stridhana (of their mother); this is the rule of law about stridhana and partition (among brothers and sisters) is prescribed. On failure of daughters the (stridhana) wealth devolves on sons (of the deceased woman); the wealth given to a woman by her kinsmen (paternal or maternal) goes in the absence of the kinsmen (that gave it) to the husband.

Whatever immovable property was given by the parents to their daughter always goes to her brother if she dies without issue. Whatever wealth was obtained by a woman from her parents in the forms of marriage beginning with āsura is declared as going to her parents on failure of her progeny.'[1537] The first two verses are apparently in conflict and must be read with Gaut 28 22 So probably the following propositions were laid down by Kāt. viz (1) unmarried daughters are preferred; (2) married daughters whose husbands are living share along with their brothers, if there be no unmarried daughter; (3) widowed daughters take only if there are no daughters whose husbands are living or if there are no sons; (4) wealth given by paternal and maternal kinsmen goes to them and on failure of these, to the husband; (5) immovable property given by parents goes to the brother of the woman on failure of issue; (6) wealth given in the āsura, rāksasa and paiśāca forms goes to parents on failure of issue Yama has a verse very similar to Kātyāyana's about a woman married in the āsura and the following forms The commentaries and digests make valiant efforts to reconcile the conflicts among the smrti texts quoted above It is not quite necessary to go into that question here in detail for fear of encumbering this work too much.

How the devolution of stridhana was dealt with by the commentators has now to be seen. They all prefer daughters to sons for certain kinds of stridhana. Why the devolution of stridhana property should be different from that of the property of a male is not clearly explained anywhere. The Mit on Yāj[1538] II. 117 gives the reason that woman's property goes to the daughter because in her more particles of the mother's body inhere than in the son Probably the daughters were preferred as heirs to stridhana as a sort of equity, when sons were allowed to exclude daughters in the inheritance to the father's wealth.

According to the Mit. there are two lines of succession to stridhana, one for śulka and the other for all other kinds of stridhana Śulka, acc. to the Mit. that quotes Gaut, devolves first

1537. आसुरादिषु यद् द्रव्यं विवाहेषु मदीयते । अप्रजायामतीतायां पितैव तु धनं हरेत् ॥ यम q by स्मृतिच. II. p 286, दायभाग IV 2. 28 p 88

1538. मातृकृतेभ्यः पुत्रैरेवापाकरणीय न दुहितृभिः । ऋणावशिष्ट तु धनं दुहितरो गृह्णीयुरिति । शुक्र चैतत् । पुमान् पुंसोधिके शुक्रे स्त्री भवत्यधिके स्त्रिया—इति स्त्र्यवयवाना दुहितृषु बाहुल्यात् स्त्रीधनं दुहितृगामि । पितृधन पुत्रगामि पित्रवयवाना पुत्रेषु बाहुल्यात् । मिता. on या. II. 117. पुमान्पुंसो &c. is मनु III. 49.

on the full brothers, then on the mother.[1539] Some like the Subodhinī, the Dīpakalikā, Haradatta on Gaut. 28. 23 hold that it devolves on the mother first and then on the full brothers; but many works such as the Dāyabhāga IV. 3. 28 (p. 95), Sm. C., Par. M, V. P., V. C. follow the Mit. It is somewhat strange that the Madanapārijāta p. 668 (which was really composed by the author of the Subodhinī in the name of his patron Madanapāla, holds that the śulka is first taken by the brothers and then by the mother. This raises a doubt whether the printed Subodhinī is correct or whether the author changed his opinion.

As regards succession to the property of a maiden there is no difference at all between the Mit. and other works. The Mit. quotes a text of Baudhāyana[1540] that the wealth of a deceased maiden first devolves on her full brothers, then on the mother and then on the father. The V. P. adds that on failure of the father the maiden's wealth goes to the parents' nearest sapinda.[1541] Yāj. II. 146 provides that if a girl who had been promised in marriage dies before marriage, the intending bridegroom was entitled to take back the śulka or other gifts

1540. रिक्थं सूतायाः कन्याया गृह्णीयुः सोदरास्तदभावे मातुस्तदभावे पितुरिति बौधायनस्मरणात्। मिता. on या. II. 146; the वीरमित्रोदय makes of this a verse as रिक्थं... सोदराः स्वयम्। तदभावे भवेन्मातुस्तदभावे भवेत्पितुः॥'. The मदनरत्न (folio 106a) reads it as रिक्थं ... समम्। ... तदभावे पितुर्भवेत्॥; मातापित्रोरभावे तत्सपत्नसङ्गामि। व्य म. p 552 The above passage of the Mit is referred to in *Gandhi Maganlal* v. *Bai Jadab* 24 Bom 192 (F. B.) at p 211 (where it was held that a paternal grandmother in Gujarat inherited the wealth left by her maiden granddaughter in the absence of nearer heirs, that she took an absolute interest and that on her death the property goes to *her* heir and not to that of the grand-daughter.

1541 Vide also *Janglubai v Jetha Appaji* 32 Bom. 409, 412 and *Vithal* v. *Balu* 60 Bom 671, 677 for instances of sapindas of the parents inheriting to the stridhana of a woman dying respectively as a maiden or as a woman married in an approved form of marriage.

made by him after deducting his own expenses and those of her family.

The Mitākṣarā order of succession for all kinds of strīdhana, other than śulka and maiden's property, is as follows: (1) unmarried daughter; (2) married daughter who is indigent; (3) married daughter who is well provided for; (4) daughter's daughters; (5) daughter's son; (6) sons; (7) son's sons (here also the rule of *per stirpes* applies); (8) husband (if the woman was married in one of the four approved forms); (9) sapiṇḍas of the husband in the order of propinquity; on failure of any sapiṇḍa of the husband, her mother, then her father and then the sapiṇḍas of the father (before it goes to the Crown). But if the woman was married in one of the unapproved forms, then on failure of her descendants her strīdhana went to her mother, then to her father and then to the father's sapiṇḍas in the order of propinquity. On failure of the sapiṇḍas of the father it would (by analogy) go to her husband and then to his sapiṇḍas (before going to the Crown). When grand-daughters directly inherit the strīdhana of their grandmother they take *per stirpes* (acc to the Mit which quotes Gaut. 28 15), if they are the daughters of several daughters.[1542] The Mit (on Yāj. II. 145), Aparārka (p. 721) and several others provide (following Manu IX. 198 = Anuśāsana 47.35) that if a woman of a lower caste dies issueless leaving strīdhana, then the daughter of her co-wife of a higher class inherits that strīdhana and on failure of such step-daughter, the son of the latter inherits. It may be noted that as regards succession to strīdhana, the rule of representation which holds good in relation to succession to males does not apply. When a male dies leaving separate property and a son and a grandson (son of a predeceased son) both succeed together, the grandson representing his deceased father. But if a woman possessed of strīdhana dies having only a son and a predeceased son's son, the son will take the whole of the strīdhana excluding the son's son. Vide *Bai Raman v Jagnvandas* 41 Bom 618.

It is not possible nor necessary to deal exhaustively with the devolution of strīdhana according to the various schools of Hindu Law. But a few indications from the important text

---

1542. तासां भिन्नमातृकाणां विषमाणां समवाये मातृद्वारेण भागकल्पना। प्रतिमातृतो वा स्वर्गे भागविशेषः—इति गौतमस्मरणात्। मिता. on याज्ञ. II. 145.

books having authority in the different provinces will be offered. According to the Sm. C. (which is the leading authority in Madras after the Mit.) strīdhana includes only those kinds of property that are so described in the smrtis (i. e. only technical strīdhana) and the lines of devolution are as follows : (1) śulka devolves in the same way as laid down by the Mit. cited above (Sm. C. II. p. 287); (2) Yautaka devolves on unmarried daughters first (Sm. C. II. p. 285); (3) Anvādheyaka and Bhartrdatta pass to sons and married daughters whose husbands are living, all inheriting together in equal shares (Sm. C. II. p. 284); (4) other kinds of technical strīdhana such as adhyagni &c pass first to the maiden daughters and married daughters who are *aprāptsthita*,[1543] then to married daughters that are provided for ; then to daughter's daughters, then to daughter's sons, then to sons, then to son's sons &c., then to the husband or father (according to the form of marriage). The Madras High Court follows the Mit. (in preference to the Sm. C.) as to the devolution of Anvādheyaka and Bhartrdatta and holds that certain kinds of non-technical strīdhana (such as gifts by strangers during coverture) devolve acc. to the rules of the Mit. Vide *Salemma v. Lutchmana* 21 Mad. 100.

The Vivādacintāmani, the leading authority in Mithilā, restricts strīdhana to the technical strīdhana recognized by the smrtis and lays down the devolution of it as follows : (1) Śulka[1544] (defined as property received by a woman at the time of her marriage, if in an unapproved form) passes as under the Mit. cited above ; (2) Yautaka passes first to unmarried daughters, then in the way laid down by the Mit. for all strīdhana ; (3) all technical strīdhana other than the two preceding varieties passes to sons and unmarried daughters together, then to sons and married daughters jointly, then to daughter's daughters, then to daughter's sons and then as under the Mit system (for strīdhana in general.)

The Vyavahāramayūkha which is held to be of paramount authority in Gujarat, Bombay Island and Northern

---

1543 The word अप्रतिष्ठिता is explained by the Sm. C as follows, 'अप्रतिष्ठिता अनपत्या निर्धना दुर्भगा विधवा वा। एवमपरार्कोद्धृतात् गौतमवचनं व्याख्यातम्। अस्य विज्ञानेश्वरकृता व्याख्या हेया स्वबुद्धिमात्रेणाध्याहारादिकरणात्।' स्मृतिच. II. p. 285 वि. चि. p. 147 also says 'अप्रतिष्ठिता अनपत्या निर्धनभर्तृका दुर्भगा चेति रत्नाकरादयः।'

1544 गौतमः। भगिनीशुल्कं सोदर्याणामूर्ध्वं मातुः। पूर्वे चेत्येके। आसुरादिविवाहेषूत्पन्नस्त्रीधनविषयमेतत्। वि चि. p. 143.

Konkan[1545] proposes various lines of succession to stridhana. Its treatment is based on the Sm. C. and the Madanaratna. It first divides stridhana as stated above into technical (pāribhāsika) and non-technical (apāribhāsika). The first is subdivided into four classes for the purpose of inheritance; (I) śulka which passes as stated above under the Mitāksarā; (II) yautaka goes to unmarried daughters, (if there be no unmarried daughters)

1545. For the territory in which the V Mayūkha is supreme, vide *Lallubhai v. Mankuvarbai* 2 Bom. 388 (F B) at p 418, *Jankibai v. Sundra* 14 Bom 612 at pp 623–24, *Vyas Chimanlal v Vyas Ramchandra* 24 Bom 367 (F B.) at p 373. How the Vyavahāramayūkha composed by a Mahārāstra brāhmana whose family had settled at Benares came to be regarded as a work of high authority in Gujarat is explained in *Lallubhai v. Mankuvarbai* 2 Bom. 388 at pp 418–419 and in *Bhagirthibai v. Kahnujirav* 11 Bom 285 (F B) at pp. 294–95 As there is divergence between the views of the Mit and the Mayūkha in the rules of succession, it becomes a matter of great practical importance to settle with precision the exact limits in Northern Konkan up to which the Mayūkha must be regarded as a work of paramount authority. It has been judicially decided that Karanja, an island opposite the Bombay harbour, is governed by the Mayūkha (in *Sakharam v. Sitabai* 3 Bom. 353), that Mahad, the southernmost Taluka of the Kolaba District, is not so governed and that the predominance of the Mayūkha cannot be taken further south than Cheul and Nagothna in the Kolaba District (vide *Narhar v Bhau* 40 Bom 621) Similarly difficult questions arise whether Kathiawar which is quite contiguous to Gujarat and some territory bordering on Gujerat towards the north or east is governed by the views of the Mayūkha in preference to those of the Mit. Some parts of Kathiawar which were (and even now are) under the domination of the Gaikwad of Baroda may, on the analogy of the grounds on which the Mayūkha is held to be of paramount authority in Gujarat, be deemed to be governed by the Mayūkha It appears to me that the tendency of courts should be to restrict the extent of the territory in which the Mayūkha is supreme and to hold that everywhere the Mitāksarā is supreme, except in those territories where the Mayūkha has been expressly recognized as supreme by the feudatory States contiguous to Gujarat or by judicial decisions The Mit is the paramount authority in the whole of India except in Bengal, therefore on the analogy of the maxim that a general rule is applicable and is supreme in all cases except where an exception clearly covers the matter (अपवादविषय-परिहारेण उत्सर्गस्य व्यवस्थितिः) districts outside modern Gujarat but bordering on it should not be held to be governed by the Mayūkha.

then probably to the married daughters; (III) anvādheya[1545a] and bhatrpriti-datta (husband's gift of affection) are inherited by sons and unmarried daughters together in accordance with Manu (IX. 192 and 195), (if there be no unmarried daughters) by sons and married daughters, then daughter's issue, then son's sons; (IV) other[1546] kinds of technical stridhana devolves as under the Mit; (V) non-technical[1547] stridhana is inherited in the following order; sons, son's sons, sons' sons' sons, daughters, daughters' sons, daughter's daughters. When there is no issue of the woman the succession depends in all cases as under the Mit on the question whether the woman was married in an approved or an un-approved form. The V. Mayūkha employs language somewhat different from that of the Mit. in speaking of the inheritance to stridhana when a woman dies without

---

1545a Vide *Sitabai v. Vasantrao* 3 Bom L. R. 201 (where a long passage from the V. Mayūkha is quoted in translation and it is held that *anvādheya* includes gifts or bequests from parents after marriage as well as from the husband and that sons and daughters succeed equally to *anvādheya*), *Dayaldas v Savitribai* 34 Bom 385 (F B), where it was held that a passage of the Mayūkha wherein the view of the Mit was first stated and then the view of others really meant that the latter was the view of the Mayūkha, that sons and daughters inherited anvādheya together and that if there were both married and unmarried daughters, the unmarried daughters and the sons inherited together मृतायाः स्त्रिया धनं पुत्रैर्दुहितृभिश्च साम्येन ग्राह्यम्। तथा च मनुः—जनन्यां ... सनाभयः॥ एतच्चान्वाधेयभर्तृप्रीतिदत्तविषयम्। एतद्विविधधनविषयेऽपरिणीतपरिणीतपुत्रीसमवाये विशेषमाह बृहस्पतिः। स्त्रीधनं स्यादपत्यानां ...। अप्रजानामभावे प्रजाभिरविधवाभिर्भ्रातृभिः सह विभज्य ग्राह्यमित्याह कात्यायनः। मदनरत्न (folio 105 b) Vide व्य म text pp. 157-58 for the two views. It will be noticed that the Mit construes the verse of Manu distributively i e sons take equally when they succeed and daughters do so when they succeed and that Manu does not mean that sons and daughters inherit simultaneously.

1546. अन्वाधेयभर्तृप्रीतिदत्ताप्राप्तपूर्वदृष्टपूर्वादिस्त्रीधनं दुहितर एव गृह्णीयुः। सासु च प्रजासत्सत्समवाये सत्यप्रजा एव गृह्णीयु। मदनरत्न (folio 105 b): अन्वाधेयभर्तृप्रीतिदत्तभिन्ने पूर्वोक्ते पारिभाषिके स्त्रीधने तु विशेषमाह गौतमः—स्त्रीधनं ... अप्रतिष्ठितानां च—इति। व्य. मयूख p. 159

1547. Vide *Mamlat Rewadat v Bai Rewa* 17 Bom. 758 (as to inheritance of non-technical stridhana) where it was held that as regards stridhana under the Mayūkha the woman is recognized as a fresh source of devolution, that the words 'sons and the rest' mean no more than sons, grandsons and great-grandsons, that as regards property which does not class as pāribhāṣika stridhana, the sons and the rest take precedence over the 'daughters and the rest (i e their issue)', that failing sons and daughters the heirs to pāribhāsika stridhana and apāribhāsika stridhana are the same, save that as between male and female offspring the latter have a preferential right as to pāribhāsika, while the former have a similar right as to apāribhāsika. पारिभाषिकातिरिक्ते मातृधने दुहितृसहिते पुत्रावृत्य एव लभेरन्। व्य. मयूख p. 160.

issue But it has now been judicially held that both mean the same thing[1548].

In the Dāyabhāga school the devolution of various kinds of *stridhana* according to the Dāyabhāga and D K. S, is as follows: (I) *śulka* devolves[1549] in the following order: (1) full brother, (2) mother, (3) father, (4) husband; (II) Yautaka devolves[1550] in the following order: (1) unmarried and unbetrothed daughters, (2) betrothed daughters, (3) married daughters, who have or are likely to have *sons*, (4) barren married daughters and childless widowed daughters taking together in equal shares, (5) sons, (6) daughter's sons, (7) sons' sons, (8) son's son's sons, (9) step-son, (10 and 11) stepson's son, stepson's grandson Then if the marriage was in an approved form, yautaka passed in the absence of any of the above in order to husband, brother, mother and father. If the marriage of the woman was celebrated in an unapproved form then her stridhana passed in order to mother, father, brother, husband. (III) Anvādheya *gifts*[1551] (*gifts* or bequests) made subsequent to marriage by the father

---

1548. Vide *Tukaram v Narayan 36 Bom 339 (F. B)*, where there is an elaborate discussion about the following passages of the Mit. and the Mayūkha. तदप्रजःस्त्रीधन पितृगामि। माता च पिता च पितरौ तौ गच्छतीति पितृगामि। तदभावे तत्प्रत्यासन्नानां धनग्रहणम् । मिता. on या. 1550. ततश्च परिणयनलब्धस्त्रीधनं दुहितृरेव न पुत्राणां तत्रैव च क्रमार्थ गौतमवचन स्त्रीधनं दुहितृणा . ष्टितानां च । ब्राह्मादिषु विवाहेषु यल्लब्धमध्यग्निधनं स्त्रियाः ततस्तासां मृतायां प्रथमं दुहितृणामेव तत्रापि प्रथमं कन्यायास्तदभावे प्रत्तायास्तदभावे परिणीतायाः । सर्वदुहित्रभावे च पुत्रस्याधिकार · । अप्रजःस्त्रीधने भर्तुराधिकारात् । Dāyabhāga IV 2 22 and 25, pp 85-86. It will be noticed that the D B. distinguishes between un-betrothed, betrothed and married daughters. Vide Bannerjee's 'Marriage and Stridhana' pp 477, 489-491 for order of inheritance to Yautaka

1551. यत्पुन· परिणयनानन्तर पितृमातृभर्तृकुलात् स्त्रिया लब्धं धन तद् भ्रातृणामेव। तदाह याज्ञवल्क्यः। बन्धुदत्तं.. प्लुयुः ॥ (या २ १४५)...अतः प्रथम सोदराणां तदभावे मातुर्मातृरभावे पितुः । एषां पुनरभावे तद्धनं भर्तुः । यथा कात्यायनः । बन्धुदत्त तु बन्धुनामभावे भर्तृगामि तत् । Dāyabhāga IV. 3. 10 and 29 Vide *Prosanno v Sarat 36 Cal. 86* (son being held the preferential heir to a married daughter to stridhana given to a woman after marriage by her father), *Ram Gopal v Naram* 33 Cal. 315 (mother held entitled to preference over the husband of a childless woman who died leaving property gifted to her by her father after marriage) In both these cases there is an elaborate examination of passages of the Dāyabhāga and it is shown how Śrīkrsna and even *modern writers* have created confusion by offering varying explanations.

(Dāyabhāga IV. 2.12–16 pp 92–93) devolve in the same order as for Yautaka except in a few respects, viz. the son takes before married daughters and in case the woman dies without issue the brother, mother, father and husband succeed in that order IV. As regards Ayautaka (i. e all technical strīdhana other than the above three) there is a conflict of authority between the Dāyabhāga (IV. 2. 1–12 pp 79–81) on the one hand and Raghunandana and Śrīkrsna on the other. Acc to the former the order[1552] is: son and *kumārī* daughter (or to either on failure of the other), (on failure of both) married daughters that have sons or are likely to have sons; son's sons; daughter's sons; barren and widowed daughters. But Raghunandana and Śrīkrsna interpolate son's son, son's son's son, stepson, stepson's son, stepson's grandson between daughter's sons and barren and widowed daughters. In the decided cases the latter order has generally been followed.

If there be none of the above both Yautaka and Ayautaka strīdhana pass in order (acc to Dāyabhāga IV. 3. 37 p. 98) to six heirs[1553] viz. the husband's younger brother, husband's

1552 तत्र मनु· । जनन्या .. सनाभयः । . बृहस्पतिरपि .. स्त्रीधनं तदपत्यानां । अपत्यपद पुत्रपरम् । तेऽसमप्तास्तभिर्दुहितृभिः सह मातृधनविभागः । .. किं तूक्तादेव हेतोः पुत्रकुमारीदुहित्रोस्तुल्यवदधिकार· । एतयोश्चान्यतराभावेऽन्यतरस्य तद्धन द्वयोरप्येतयोरभावे तु ऊढाया दुहितुः पुत्रवत्या· सम्भावितपुत्राया श्च तुल्याधिकारः स्वपुत्रद्वारेण पार्वणपिण्डदानसम्भवात् । .. पौत्रदौहित्रयोस्तु सद्भावे पौत्रस्यैवाधिकार ... उक्ताना तु सर्वेषां दौहित्रपर्यन्तानामभावे वन्ध्याविधवयोरपि मातृधनाधिकारिता । तयोरपि तत्यजात्वात् मजाभावे चान्येषामधिकारात् । दायभाग IV 2 1–2, 9, 11–12. Dayabhāga employs the word *aprattā* elsewhere in the sense of 'unbetrothed' and so betrothed daughters cannot take along with sons. The last passage in the quotation shows that the doctrine of spiritual benefit was not to be rigidly employed in succession to strīdhana, acc to the Dāyabhāga श्रीकृष्ण remarks (in his comment on दायभाग), दौहित्रपर्यन्तानामिति प्रपौत्रपर्यन्तोपलक्षणम् ।

1553 यदाह बृहस्पति· । मातु·स्वसा मातुलानी पितृष्यस्त्री पितृष्वसा । श्वश्रूः पूर्वजपत्नी च मातृतुल्याः प्रकीर्तिताः । यदासामौरसो न स्यात्सुतो दौहित्र एव वा । तत्सुतो वा धन तासा स्वस्त्रीयाद्या समाप्नुयु· ॥ तदेषा पुत्रादीना भ्रात्रादिभर्तृपर्यन्तानां चाभावे सत्स्वपि श्वशुरभ्रातृश्वशुरादिषु सपिण्डेषु भगिनीपुत्रादीनामधिकारिता अनन्यगतेर्वचनात्, स्त्रीणां मातृतुल्यत्वप्रतिपादनेनामीषा पुत्रतुल्यत्वज्ञापनेन पिण्डदातृत्वसूचनस्य दायभागप्रकरणे धनाधिकारज्ञापनैकप्रयोजनकत्वात् । . मातुलो भागिनेयस्य स्वस्त्रीयो मातुलस्य च । श्वशुरस्य गुरोश्चैव सव्यमुर्मातामहस्य च । एतेषा चैव भार्याश्च. स्वसमोंह पितस्तथा । श्राद्धदान तु कर्तव्यमिति वेदविदा स्थिति. । इति बृहच्छातातपवचनात् अमीषां पिण्डदातृत्वप्रतिपादनात् अयं पिण्डदानविशेषादधिकारक्रम । तत्र प्रथमं देवर· ततोपिण्डतदूर्ध्वपिण्डतदूर्ध्वदेषपूर्वपुरुषत्रय-पिण्डदातृत्वात्सपिण्डत्वाच्च तद्धनेधिक्रियते । . तस्याप्यभावे श्वशुरयो. पिण्डदानात् जामाता श्वश्रूधनेऽधिकारीति । अयं क्रमो ज्ञात्र । स्वस्त्रीयाद्या इति तु न क्रमार्थं किं त्वधिकारिमात्रज्ञाप-

(*Continued on the next page*)

brother's son, sister's son, husband's sister's son, brother's son, daughter's husband. Br. says that the mother's sister, maternal uncle's wife, paternal uncle's wife, father's sister, mother-in-law, elder brother's wife are declared to be like one's mother, that when these women have no *aurasa* child or a son of their co-wife or a daughter's son or a son's son or stepson's son, then the sister's son and the rest may take their wealth. This text, acc. to the Dāyabhāga, simply declares that a sister's son and the others may be heirs to the strīdhana of the maternal aunt and the rest but the priority is determined among the six heirs mentioned above in Brhaspati's text by the principle of religious benefit. Though the sister's son is the first in Brhaspati's text, it is the husband's younger brother who stands really the first among the six if regard is had to the principle of religious benefit. The Vir. (V. P. p. 554) states that in the absence of heirs up to the stepson and stepson's sons, the sister's son and the rest (mentioned in Br.) are the heirs to a woman's strīdhana even when sapindas like her father-in-law are alive, since mere sapinda relationship would not count when in conflict with a special text It does not appear that the V. P. holds that the six take in the order stated in the text of Br ;[1554] it rather states that among these six the choice of the preferential heir

---

(Continued from the last page)

नार्थपरम् । दायभाग IV 3 31, 35, 36-38 pp 96-98 Vide also pp 187-188 The verses of Br. occur in Sm C II p 287, V. Nir p 472, Par M III p 555, V Mayūkha p 161, V. P pp 553-554. The above verses of Br mean that males who are a woman's sister's son or her husband's sister's son or her husband's brother's son or her own brother's son or her daughter's husband or her husband's younger brother are like her son and inherit her strīdhana in certain circumstances

1554 In *Bai Kesserbai v. Hunsraj* L. R 33 I A 176 the above text of Bṛhaspati was discussed in a Bombay case at great length (pp 190-197) and it was held that under the Mayūkha a co-widow was entitled to succeed to the strīdhana of a widow in preference to her husband's brother or brother's son, that the text of Br. must be taken distributively, that is, when the marriage is in an approved form the husband's sister's son will succeed and that when the marriage is in an unapproved form the brother's son or sister's son will succeed, that the text does not indicate the order of succession which is governed by the principle of propinquity under the Mit or the Mayūkha. It may be noted that the V Nir p 472 expressly gives the distributive order Acc. to the Sm C the six heirs referred to in the text of Br. take in the order stated therein The Dāyabhāga does not hold this view.

would be determined by greater or less propinquity[1555]. On failure of these six the husband's sapiṇḍas, sakulyas and samānodakas take and then the father's kinsmen.

The question of an unchaste daughter's succession to strīdhana would be decided in the same way as her succession to her father's property. Under the Dāyabhāga an unchaste daughter will not succeed. But under the Mitāksarā as interpreted by modern courts an unchaste daughter who is a kept mistress or a prostitute may succeed but only after virgin daughters or married daughters as the case[1556] may be. The Mit. on Yāj. II 290 relies upon the Skandapurāna for the proposition that prostitutes are a fifth caste descended from certain *apsarases*.[1557]

It has been held by the courts that though prostitution entailed degradation according to ancient Hindu Law, it did not sever the tie of blood. So the strīdhana of a *naikin* (a dancing girl) or of a married woman who becomes a prostitute may be inherited by her brother or sister or her husband or her husband's relations.[1558]

It may not be out of place here to suggest how strīdhana should be dealt with when Hindu Law comes to be codified as it is likely to be in the near future. It may be urged that all distinctions on the ground of sex should be altogether done away with and whenever a woman succeeds to any property whether of a male or of a female she should take an absolute estate. But if this change is opposed by a large volume of opinion as it is quite possible, then it should at least be provided

---

1555. तदेवामभावे सत्त्वपि श्वश्वादिषु सपिण्डेष्वनन्यगतिकैतद्वचनबलाद्भगिनीपुत्रादीनामेव मातृष्वस्रादिधने प्रत्यासत्तितारतम्येनाधिकारः । स्नुषादीनां तु ग्रासाच्छादनमात्रभाक्त्वम् । वचनविरोधे सपिण्डवत्प्रत्यासत्तेरप्रयोजकत्वात् । व्य. म. p 554.

1556. Vide *Tara* v. *Krishna* 31 Bom. 495 and *Govind* v. *Bhiku* 46 Bom. L. R. 699.

1557 स्मर्यते हि स्कन्दपुराणे पञ्चचूडा नाम काश्चनाप्सरसस्ततस्सन्ततिर्वेश्यारूपा पञ्चमी जातिरिति । मिता on या. II 290.

1558 *Hiralal* v *Tripura* 40 Cal. 650, F. B (holds that brother's son inherited the strīdhana of a woman who had become a prostitute), *Narayan* v. *Laxman* 51 Bom. 784 (sister of a prostitute was held to be her heir), *Narain Das* v *Tirlok* 29 All 4 (husband held entitled to property acquired by a woman after she deserted him). *Subbaraya* v *Ramasami* 23 Mad. 171 (stepson was held entitled to succeed to a woman's property though she had deserted her husband and led a life of unchastity).

that all property which a woman inherits from a female should be her absolute property. Then as regards inheritance to strīdhana one simple and straightforward rule should be laid down that the woman's sons and daughters should succeed together taking equal shares. A third suggestion would be that when there are no descendants of the woman herself, then the husband should be the next heir. When the strīdhana is that of a maiden, the heirs in order should be her brothers and sisters, then her mother, then her father and after the father the latter's nearest heir. It is not quite necessary at this stage to specify what further rules of devolution should be prescribed.

CHAPTER XXXI

MAINTENANCE AND OTHER TOPICS

The subject of maintenance occupies an important place in modern Hindu Law. A brief statement of the law of the smrtis and the digests on this subject must be made here.

The liability to provide maintenance for certain persons arises under the ancient Hindu Law in either of two ways viz. (1) on account of bare relationship between the parties or (2) on the ground of the possession of property. A verse[1559] quoted by Medhātithi on Manu III. 72 and IV. 251, by the Mit. on Yāj. I. 224 and II. 175 and occurring in some mss. of the Manusmrti after XI 10 provides, 'Manu declares that one must maintain one's aged parents, a virtuous wife and a minor son by doing even a hundred bad acts.' From this verse it follows that irrespective of the possession of property there is a personal legal obligation on the father to maintain his minor son, on the husband to maintain his wife and on the son to maintain his aged parents. Baud. Dh. S (II. 2. 48) goes further and provides[1560] that a son is bound to maintain a mother even if she be *patita*. To the same effect are Āp Dh. S I. 10. 28. 9 and Vas. 13. 47.

1559. वृद्धौ च मातापितरौ साध्वी भार्या सुत· शिशु· । अप्यकार्यशतं कृत्वा भर्तव्या मनुरब्रवीत् ॥ मेधा on मनु IV. 251 quotes part of it as स्मृत्यन्तर, while the मिता on या. II 175 ascribes it to Mann. This verse is cited in *Savitribai v Luxmibai* 2 Bom. 573 (F. B) at p. 597 (which holds that a Hindu widow voluntarily living apart from her husband's relatives is not entitled to a money allowance as maintenance from them if they were separated from him at the time of his death and that she is not entitled to such maintenance from them whether they were separated or unseparated from him at the time of his death if they have no ancestral estate belonging to him in their hands). The texts of Mann, Yāj I 76 and Nār. are held on p. 598 of that report to impose a personal obligation enforceable by the State Vide *Raja Rama Rao v. Raja of Pittapur* 45 I. A. 148 at p. 154 where it is stated that the grandson is not included under the word 'son' and a grandfather is under no personal obligation to maintain a grandson if there is no ancestral property in his hands

1560 पतितामपि तु मातरं बिभृयादनभिभाष्यमाणः । बौ. ध. सू. II. 2. 48 ; पतितः पिता परित्याज्यो माता तु पुत्रे न पतति । वसिष्ठ 13. 47 ; अत्याज्या माता तथा पिता सपिण्डा गुणवन्त सर्वे वात्याज्याः । यस्त्यजेत्कामादपतित मन् स दण्डं प्राप्नुयाद् द्विगुणं शतम् । दाक्षलिखित q. by अपरार्क p 823 on या. II 237.

Manu VIII. 389 prescribes that the man who abandons and does not maintain his parents, wife and son, when they are not *patita*, should be fined 600 *panas* by the king. Nār. also (S. B. E. 33 p. 184 verse 95) provides punishment for such a husband. Yāj. I. 76 states that if a man abandoned a wife who was obedient, diligent, the mother of a son and agreeable in speech he was to be made to give one third of his property to the wife and to maintain her, if he had no property. Viṣṇu Dh. S. V. 163 made the husband punishable like a thief if he abandoned his blameless wife. Kaut. II. 1 prescribes[1561] that if a man being able fails to maintain his child or wife, parents, minor brothers and sisters, unmarried daughters, widowed daughters, when these are not *patita*, should be fined twelve panas. These dicta have been followed even by modern courts in India. In *'Subbarayana v. Subbakka*[1562] it has been held that a son is bound to maintain his aged mother whether he has inherited property from his father or not

The manager of a joint Hindu family is under a legal obligation to maintain all male members of the family, their wives and children Nārada states[1563] that if any one among several (undivided) brothers dies without issue or becomes an ascetic the rest should take the estate and give maintenance to his wives till their death, provided they keep the bed of their husband unsullied but that they may cut off the maintenance if they (wives) behave otherwise. This is because the surviving brothers succeed to the estate in which the deceased had an interest during his lifetime. This is made quite clear[1564]

1561. अपत्यदारं मातापितरौ भ्रातृनभाप्तव्यवहारान् भगिनीः कन्या विधवाश्चाबिभ्रतः शक्तिमतो द्वादशपणो दण्डोऽन्यत्र पतितेभ्योऽन्यत्र मातुः । कौ. II. 1. p. 48.

1564. तथा च नारदः । या. पत्न्यो विधवाः साध्व्यो ज्येष्ठेन श्वशुरेण वा । गोत्रजेनापि कार्येण भर्तव्याश्छादनाशनैः ॥ धनग्राहिणेति सर्वत्र ज्येष्ठादौ शेषो द्रष्टव्यः । धनग्रहणनिमित्तत्वाद् भरणस्य । अत्र विशेषमाह कात्यायनः । स्वर्याते स्वामिनि स्त्री तु ग्रासाच्छादनभागिनी । अविभक्तधनांशे तु यावज्जीवमित्यर्थः । धनांशं यावता धनेन वत्सजीवनं धनसाध्यं तु नित्यनैमित्तिककर्म कार्यं व्रतादिकं सिध्यति तावद्धनमित्यर्थः । तु शब्दो वा शब्दार्थे । .. एतावद्धनसम्पादकक्षेत्रांशं वा यावज्जीवमित्यर्थः । स्मृतिच्च II. p. 292 and व्य. म. p. 516. (The passage of नारद in Mr. Gharpure's edition is rather corrupt) The व्य मयूख p. 139 quotes कात्यायन; this verse of Kātyāyana is quoted in *Lakshman v. Satyabhamabai* 2 Bom. 494 at p. 511.

in the Sm. C. explaining a verse of Nār. viz. 'widows that are virtuous must be maintained with food and raiment by the eldest brother (of the deceased) or by the father-in-law or by any other gotraja' on which it remarks: "The words 'by him who takes the estate' must be understood before all the words such as 'the eldest brother'". Kāt. (922) states, 'when the husband goes to heaven the wife is entitled only to food and raiment if he was unseparated or she may get a share in (ancestral) property till her death'. The Sm. C. remarks that as maintenance depends upon taking wealth, Kāt. provides two alternatives. In cases too numerous to cite this has been followed by all High Courts. Similarly an heir is bound to maintain out of the estate taken by him those persons whom the deceased was legally or morally bound to maintain. Those persons who are excluded from inheritance or partition are entitled to maintenance and their virtuous wives and unmarried daughters also are entitled to be maintained (Yāj. II. 140–142 Manu IX. 202, Vas 17. 54). The Baud. Dh. S. (II. 2. 43–46)[1565] provides that those who are past undertaking transactions (i e. are very old) should be given food and raiment and also those who are blind, idiotic, impotent, immersed in vice and suffering from (incurable) diseases, and those that engage in prohibited acts, except the *patita* and his issue. Devala (quoted in the V Mayūkha p. 165) has a similar passage, 'when the father is dead (or even when being alive he makes a partition) the impotent, the leper, the lunatic, the idiot, the blind, an outcast and his offspring, a person wearing a heretical sect mark—these are not entitled to a share of the heritage; to these except the *patita* food and raiment are to be given'. These persons suffer from a personal disqualification and maintenance is given to them in lieu of a share not because their status is denied but because they are incapable of management and enjoyment of property. Vide *Raja Ram Rao v. Raja of Pittapur*.[1566]

The general principle is that an heir is legally bound to provide out of the estate taken by him as heir maintenance for those persons, male or female, whom the late owner was morally or legally bound to maintain. For example, if there is no ancestral property the father-in-law who possesses only self-

---

1565 Vide note 1151 above for बौ. ध सू. II. 2. 43–46 This and the text of Devala are quoted in *Murarji v. Parvatibai* 1 Bom. 177 at p. 183.

1566 45 I. A 148 at p 154.

acquired property is not legally bound to maintain his daughter-in-law (widow of a predeceased son); but on the death of the father-in-law, his heir *i.* e. son, widow, or daughter would be legally bound to maintain a widowed daughter-in-law.[1566a] The Bombay High Court, however, adds the condition that the predeceased son must have been in union with his father when he died ; vide 23 Bom. 608.

By Act XVIII of 1937 it has been provided that in a family governed by the Mitākṣarā the widows of deceased coparceners such as the daughter-*in*-law and the grand-daughter-in-law are entitled to their husband's interest. The Act does not expressly state that their rights to maintenance are taken away. In many cases such widows may prefer to take a share instead of being allotted only maintenance and so far the law of maintenance will tend to become obsolete.

Another important question is what is the effect of unchastity on the right to maintenance ? As regards the wife's right to maintenance and the effect of unchastity thereon during the husband's lifetime, vide H. of Dh. vol. II pp. 571–73 above. Manu XI. 176 says that a wife guilty of adultery should be confined by the husband in the same house and should be made to undergo the same penance as a man guilty of adultery has to undergo ; Yāj I. 70 also says that a wife guilty of adultery should be deprived of her status as a wife as to wealth and religious observances, should be given bare maintenance and should be confined to a part of the house. Unchastity on the part of a Hindu widow disentitles her to maintenance under certain circumstances Vas 21. 10 provides that four classes of wives must be abandoned viz. one who yields herself to her husband's pupil or to his *guru* and especially one who attempts the life of her husband or who commits adultery with a man of a degraded caste and in 21. 12 Vasiṣṭha states that the wives of brāhmaṇas, kṣatriyas and vaiśyas, who commit adultery with a śūdra, may be purified by penance if no child is born (of the adulterous intercourse) but not otherwise'. It is provided by Yāj. I. 72 that if a woman (of the three higher castes) conceives through adultery with a śūdra or kills her foetus or attempts the death of her husband or is guilty of grave sins (such as brāhmaṇa-murder) she shall be abandoned

1566a Vide *Rajani Kanta v. Sajani Sundari* 61 I. A 29; *Yamunabai v. Manubai* 23 B m. 608.

Manu IX. 188 provides that when women become *patita*, the rite called *ghatasphoṭa* (the procedure of which may be seen at p. 388 of the H. of Dh. vol. II and in note 1168 in the Appendix to this volume) may be performed, but they must be given food and raiment and they must be provided with a hut near the family house. Yāj. III. 296 has a similar provision. The result is that there is no text which provides that a widow who is once unchaste must be deemed unchaste for ever and must for ever forfeit her claim even to a starving maintenance even if she repents, reforms her ways and gives up an immoral life. On the contrary the texts say that widows guilty of adultery are purified by penance and may be restored to all their social privileges. For example, Manu[1567] XI. 189 says generally about all persons that after they perform the appropriate *prāyaścitta*, they should not be rebuked or avoided (but should be restored to all social intercourse). The Mit. on Yāj. I. 72 expressly says that the abandonment of even such women as are referred to in that verse consists in not associating with them conjugally and in religious matters, but does not mean that they are to be driven out of the house.[1568]

On Yāj. III. 297 (which states that in the case of women there are three peculiarly grave sins viz. adultery with a low-caste man, killing the foetus and attempt to murder the husband) the Mit sums up the whole position as follows: (1) total abandonment of women for the four grave sins laid down in Vas. 21. 10 takes place when they do not perform penance; (2) women guilty of adultery not of the aggravated kind mentioned in Vas 21. 10 are to be given starving maintenance that would keep body and soul together and are to be lodged in a hut near the house and to be afforded protection (Yāj. I. 70 and III. 296), even if they do not perform the requisite penance. But the Mit. is silent as to the claim to maintenance of widows that at first led a life of incontinence (but not of the aggravated kind) and subsequently reformed their ways. But from Manu XI. 189 it may be inferred that widows not guilty of

1567. एतस्विभिरनिर्णिक्तैर्नार्थं किञ्चित्सहाचरेत्। कृतनिर्णेजनांश्चैव न जुगुप्सेत कर्हिचित्॥ मनु XI 189 = विष्णुधर्मसूत्र 54 31. अपरार्क p 98 says on या. I. 70, कृतमायश्चित्ता तु संप्रवहार्या भवति-कृतनिर्णे ... कर्हिचित्-इति मनुवचनात्।

1568. त्यागश्चोपभोगधर्मकार्ययोर्न तु निष्कासन गृहान्तरणा। निरुन्ध्यादेकवेश्मनि—इति नियमात्। मिता. on या I. 72. निरुन्ध्यादेकवेश्मनि is मनु XI 176 This passage of the Mit is quoted in *Bhikubai v Harsha* 27 Bom L. R. 13 at p 20 (=49 Bom 459 at p 467).

aggravated adultery that have undergone the proper *prāyaścitta* and that return to decent life would have been entitled to ordinary maintenance from the period they turned over a new leaf.[1569]

A brief reference to the modern case law on this point may be made here. In *Bhikubai v. Hariba*[1570] Sir Lallubhai Shah (after an elaborate examination of ancient and medieval authorities and decided cases) held that a widow who had been unchaste, but who is proved to have given up the life of unchastity is entitled to bare maintenance. In *Lakhmichand v. Anandi* the Privy Council make the general observation.[1571] 'It is true that the right of a Hindu widow to maintenance is conditional upon her leading a life of chastity and that she loses that right if she becomes unchaste'. In *Kisanji v. Lakshmi*[1572] it was held that subsequent unchastity disentitled a widow from recovering maintenance, even though it is claimable under an agreement made with the deceased husband's father and brother. In *Musammat Ganga v. Ghasita* 1 All. 46 (F. B.) it has been held that unchastity does not incapacitate a daughter from inheriting stridhana. In *Angammal v. Venkata* 26 Mad 509 the same rule was laid down.

The illegitimate son born of a śūdra concubine to a man of the three higher castes appears to have been held entitled to maintenance from very early times. Gaut. 28. 37 provides, 'the son from a śūdra woman of a man (of the three higher varnas) who is without issue receives maintenance (lit source of maintenance), if he is obedient, in the same way as a pupil might receive'. And Gautama (28 43) extends the same rule to the offspring of *pratiloma* unions. Vide p. 601 above and note 1135 for the text of Gaut and Br. on the point. Manu IX.

1569. Vide *Sathyabhama v Kesavacharya* 39 Mad *658* at p *660* where it is said, 'But in none of these texts is there any provision for a woman who has repented and was subsequently leading an honest life. It is not to be presumed from the omission to provide for such a contingency that the resumption once made is to be irrevocable and that the fallen woman who had reformed is to be denied even a starving allowance'. Vide also *Bhikubai v Hariba* 27 Bom L R 13 at pp 23 and 26 and *Ramkumar v Bhagawanta* 56 All 392, 394.

1570. 27 Bom L R. 13 = 49 Bom 459.

1571. 62 I. A 250 at p. 255

1572. 33 Bom L R. 510 But this case seems to be in conflict with the decision in *Shivlal v. Bai Sankli* 23 Bom L. R. 490.

155 also provides that the son of a man of the three higher castes from a śūdra woman (not married to him) is not entitled to share in the ancestral estate. Br. (S B.E. 33 p. 374 v. 31) states[1573] that an obedient and meritorious son born from a woman of the śūdra caste to a man who has no other child should get maintenance and that the sapindas should divide the rest of the wealth of the deceased. Both the Mit and the V. Mayūkha, while explaining Yāj. II. 133–134 about the rights of the illegitimate son of a śūdra from a śūdra woman, remark that one who is begotten on a *dāsī*[1574] by a member of the regenerate classes is not entitled to a share even at the father's choice nor to a half share after his father's death but that he is only entitled to maintenance.[1575]

There is a good deal of case law on this subject, but much of it is irrelevant in this treatise. The right of maintenance attaches in the first instance to the separate property of the putative father and if the latter leaves no such property but was a member of a joint family it attaches to the property of the joint family of which the putative father was a member.[1576] It has further been held that it does not matter if the woman was not a dāsī (a slave) or a permanent concubine in the exclusive keeping of a man or that the intercourse was adulterous.[1577] It has been also held that the illegitimate son's right to maintenance is a personal right and cannot be transmitted to his son[1578] and that maintenance has to be provided for him till his death[1579] (and not merely up to his attaining majority),

except in Bengal.[1580] The fact that the texts employ the word "śūdrāputra" (in the masculine gender) has been interpreted by the decided cases as involving that an illegitimate daughter is not entitled under Hindu Law to maintenance. Vide *Parvati v. Ganpatrao*[1581] and *Vellaiyappa v. Natarajan.*[1582]

Another frequent subject of litigation in modern times has been a concubine's right of maintenance under the Hindu Law. It has been held that a concubine has no legal right to claim maintenance from her paramour during the latter's lifetime, as he can discard her at any time and as she cannot compel him to keep her.[1583] So also a Hindu is not entitled to transfer joint family property to a concubine for her maintenance during his lifetime.[1584] But on the death of the paramour a great difference is made in the rights of a concubine that was in his *exclusive keeping till his death.* Such a concubine has been held to possess a legal right to maintenance payable out of the estate, ancestral or self-acquired as the case may be, in the hands of those who take it after the death of the paramour The rights of women, who are not wives, to maintenance are based mainly on two texts, viz. of Nārada and Kātyāyana, that are explained in the Mit, the V. Mayūkha and other medieval works. Nārada says:[1585] 'A king devoted to dharma should give maintenance to the women (*strī*) of a deceased person (when the king succeeds as heir by escheat), except when the deceased person is a brāhmana'; while Kāt. (931) states,[1586] 'heirless property goes to the king after keeping aside (wealth sufficient to provide) for the women (*yosit*), the dependents (or servants) and the funeral rites and śrāddhas (of the deceased)'

1586. अदायिक राजगामि यौविद्भृत्यौर्ध्वदैहिकम्। अपास्य श्रोत्रियद्रव्यं श्रोत्रियेभ्यस्तदर्पयेत्॥ कात्या. q. by मिता. on या II 114, परा. मा. III. p 535, स्म. च. p. 139. This verse is quoted in *Savitribai v. Laxmibai* 2 Bom. 573 at p. 608, *Yashvantrao v. Kashibai* 12 Bom. 26.

Kaut. also similarly prescribes (III.[1587] 5. p. 161), 'the king takes heirless property except that of *śrotriyas*, setting apart (wealth) for the maintenance of women (of the deceased), for funeral rites and for poor or wretched (dependents of the deceased)'. The Mit., the V. Mayūkha, the Par. M. and others state that the verses of Nār. and Kāt refer to *avaruddha-strī* alone, since the word *patnī* (duly wedded wife) does not occur therein, but only the words '*yosit*' and '*strī*'.[1588] There has been a great divergence of views in the decided cases about the significance of *avaruddha strī*. It is generally rendered as a concubine or mistress in the exclusive keeping of a person till the latter's death'. Several conditions are necessary to constitute a woman an *avaruddha strī* capable of claiming maintenance from the estate of her deceased paramour in the hands of his sons or other heirs. In the first place, she must have been continuously and exclusively in his keeping till his death. How long she should have been thus in his keeping cannot be fixed by any hard and fast rules. She must have been so long in his keeping continuously till his death that it can be said that the connection had become permanent. In *Bai Nagubai v Bai Monghubai* a period of five years was deemed to be sufficient In the second place the concubine[1589] must observe sexual fidelity to her deceased paramour after his death in order to be able to claim maintenance from the estate in the hands of his heirs or successors. In *Bai Monghubai v. Bai Nagubai*[1590] a third condition was laid down viz. that the connection of the concubine with the deceased paramour should be perfectly open and recognized and she must have been kept practically as a member of the family. But in *Bai Nagubai v Bai Monghubai*[1591] the Privy Council overruled the above decision and held that in order to entitle a mistress to maintenance it is not necessary that she should have resided in the same

house with the deceased together with his wife and the ordinary members of his family. And in *Dayavati v Kesarbai*[1592] it was further held that the concubine need not prove that she was recognized by the family of the deceased or that his relationship with her was known to the family. A further restriction was imposed by the case of *Anandilal v Chandrabai*[1593] that the intercourse with the paramour should not have been adulterous. But this case has been overruled by a recent Full Bench decision in *Akku v Ganesh*[1594] which holds that a permanently kept concubine is entitled to be maintained out of the estate of her deceased paramour, although she has a husband living (who was examined in the case as a witness), provided she observes sexual fidelity to the deceased paramour after his death. It becomes, therefore, necessary to examine the Sanskrit medieval commentaries and digests in order to arrive at a correct interpretation of the expression '*avaruddha strī*'. Strangely enough, the Mit. does not define the word in the section on dāyabhāga, but only under 'strī-sangrahaṇa'. Yāj II 290 provides, 'a man should be awarded a fine of fifty *paṇas*, if he has intercourse with dāsīs that are *avaruddhā* or that are *bhujiṣyā* and also (other women such as prostitutes and *svairinīs*), even though ordinarily they (i e dāsīs and others) are approachable (without incurring the consequence of punishment)' The Mit explains that the word 'ca' placed after 'bhujisyāsu' in Yāj. II. 290 is meant to include *veśyas* and *svairinīs* along with bhujisyās. Acc. to the Mit. the verse prescribes the same fine for intercourse with three kinds of women, viz. dāsīs that are avaruddhā, dāsīs that are bhujisyā and other women such as *veśyās* (who are ordinarily approachable by all males of their own or higher castes) and *svairinīs* (who abandon their husbands and resort at their desire to some other male of their own caste, as defined by Yāj. I. 67) A woman though originally a *veśyā* or a *svairiṇī* may be known to be kept by a man In that case if another man approaches her, Yāj II 290 declares that he would be liable to be fined in the same amount as if he approached an avaruddhā dāsī or bhujisyā, because being in the keeping of another at the time she would be like a wife (as the other two classes do) so far as punishment for approaching a kept woman is concerned. This verse is not concerned with the maintenance

1592. 36 Bom. L. R. 61.

of women at all. The Mit. here defines 'avaruddhā dāsī' as "a slave woman who is prohibited by her master from intercourse with other men with an order to stay in the master's house alone in order that there may be no loss of attendance (on the master)." The Mit. defines a *bhujisyā dāsī* as 'one who is restricted (as to enjoyment) to certain definite males' (*puruṣaniyata-parigrahā bhujisyāḥ*)[1595] It is worthy of note that the Mit. employs different phraseology in defining the two words. In defining a bhujisyā it employs the word '*niyata*', which generally means 'fixed or definite', while in defining 'avaruddhā' it employs the word 'niruddhāh' meaning 'prevented or prohibited'. If the two words were intended to convey the same meaning, there is no reason why the Mit. should not have employed the same word (*niruddhā*) in defining a bhujisyā. The difference between an avaruddhā dāsī and a bhujisyā is that the former is ordered to stay in the master's house, while the bhujisyā is not so ordered and secondly the avaruddhā is forbidden to have sexual intercourse with any one except the master, while the bhujisyā is not so forbidden, but she is to restrict herself to enjoyment by certain specified males (friends or men of the master's family) and not necessarily by the master alone. This is the meaning assigned to those words by Mitramiśra in his commentary[1596] (not his digest) on Yāj II. 290. The Mit. itself indicates the meaning of 'niyata' by saying elsewhere that ownership springs from certain fixed sources (*nyatopāyakaṁ svatvam* on Yāj II 114). It is respectfully submitted that the Privy Council gave a wrong interpretation of the word 'avaruddhā' in *Bai Naqubai v. Bai Monghibai*[1597]. Though slavery is now abolished in India there is no reason why the two characteristics of avaruddhā (viz staying in the master's house and being

exclusively kept by the master) stated by the Mit. should not have been strictly adhered to by the Privy Council, particularly when they were holding heirs liable for the maintenance of kept mistresses, which is hardly ever allowed in any other system of law. With the greatest respect to the Full Bench, it must be said they went wrong in holding that *bhujisyā* means 'a mistress who is restrained from intercourse with other persons (other than the master)' and in holding that the only distinction between an avaruddhā and a bhujisyā is that the former is required to stay in the house of the paramour, while the latter is not (47 Bom. L. R. at pp. 13 and 22). The learned judges have not correctly interpreted the word 'niyata' and also the explanation of 'bhujisyā' given by the Bālambhatti[1598]. The meaning of the Bālambhatti was misunderstood on account of the wrong meaning attached to the word 'niyata'. What the Bālambhatti means in explaining the definition of bhujisyā is 'one who is to be enjoyed by certain definite males only other than the master' (i. e. by the master and also certain defined males) and it does not mean 'who is forbidden to be enjoyed by males other than the master'.

The F. B. further rely upon a passage of the Mit. in support of their conclusion (47 Bom. L. R. at pp. 14 and 22) On the question of what properties are impartible, the Mit. on Yāj. II. 119 quotes Manu IX. 219 viz 'clothes, conveyances, ornaments, cooked food, water (wells &c.), women, *yogakṣema* and pastures (or ways)—these they declare are impartible 'The Mit explanation[1599] of the word 'striyah' may be translated as follows: 'striyah' here means 'female slaves; if they are uneven in number they should not be divided by taking their price into consideration, but they are to be made to work in turns (for the separated members of the family), but as regards women kept by the father such as svairinīs and the rest, they are not to be divided by the sons even though they be even in number". It is difficult to see how this passage supports the Full Bench decision. That

1599. स्त्रियश्च दास्यो विषमा न मूल्यद्वारेण विभाज्याः पर्यायेण कर्म कारयितव्या'। अवरुद्धास्तु पित्रा स्वैरिण्याद्या समा अपि पुत्रैर्न विभाज्याः। क्रीतु च संयुक्तास्वविभाग—इति गौतमस्मरणात्। मिता. on yā. II. 119; the सुबोधिनी remarks, 'पित्रवरुद्धस्वैरिण्यादीनां समानामप्यविभाज्यत्वे गौतमवचनं दर्शयति क्रीतु च संयुक्तास्विति। संयुक्तासु उपभुक्तासु अवरुद्धास्विति यावत्।'. अरक्षिता गृहे रुद्धाः पुरुषैराकारिभिः—इति तेनैवोक्तत्वात्। एव च रुद्धामित्यत्र गृहेऽवरुद्धामित्यध्याहर्तव्यम्। स्मृतिच. II. p. 321.

passage can be explained in two or three different ways. In the first place, the Mit. having itself clearly distinguished and defined three classes, viz avaruddhā, bhujisyā and svairiṇīs (together with veśyas also) it cannot be lightly supposed that elsewhere it gives up that distinction. Therefore it would be difficult to say that here (on Yāj II. 119) the Mit. means that svairiṇīs are also the same as avaruddhās. Hence the interpretation should be that women who are avaruddhā (kept exclusively by the father) and even other women also like svairiṇīs (who had sexual connection with the father though not as avaruddhā) should not be divided i. e. a 'ca' should be understood after 'svairiṇyādyāh'. Or it is possible to hold that the word 'avaruddhā' in that passage is not employed in the strict technical sense (as defined by the Mit. on Yāj. II. 290), but in its etymological sense meaning 'women who are svairiṇīs and the like that are taken into his harem (or under his protection) by the father should not be divided'. This interpretation derives support from the explanation offered by the Subodhinī (which is repeated almost verbatim by the Bālambhattī) about the text of Gautama quoted by the Mit. that 'samyukta' in Gaut. means 'enjoyed' or 'confined' (in the house). This shows that the words 'ruddhā' and 'avaruddhā' were used in the etymological sense by distinguished writers. The Sm. C. II p. 321 while explaining the word 'ruddhā' in Manu IX. 12 applied to a wife guilty of adultery explains it as meaning 'confined in a part of the house' (gṛhe avaruddhām). When the Mit. states (p. 811) that the verses of Nār. and Kāt. refer to avaruddhā strī it follows that these verses do not refer to bhujisyā, who would therefore be deemed not entitled to maintenance at all.

There is a large body of caselaw about the right of a widow in a joint Hindu family to reside in the family house, about the right of a daughter-in-law against her deceased husband's father who has no ancestral property in his hands and against the heirs of the father-in-law, about the amount of maintenance to be allowed to a widow and about the rate at which arrears of maintenance are to be allowed, about the period for which arrears may be awarded, about making the maintenance a charge on the estate in the hands of the heirs, about varying the rate of maintenance fixed by a decree or an agreement &c. These are not quite germane to the present volume, particularly because most of the decisions on these

matters are not based on the words of the smṛtis or of the medieval digests, but are based on logic and principles of justice and equity. But there is one matter which deserves a passing reference. Ancient Hindu Law attached the highest spiritual importance to the payment of debts (vide pp. 414–417 above). Therefore debts contracted by a Hindu are held by the Courts to take precedence over the right of maintenance of a man's wife, his infant child or his widow after his death.[1600] Similarly debts contracted by the manager of the joint family of which the widow's husband was a member would take precedence over the widow's right of maintenance, provided the debts were for the benefit of the family or were for legal necessity.

The last *vyavahārapada* is *prakīrnaka*, which is defined by Visnu Dh. S. 42 · 1 as ' miscellaneous ' (yadanuktam tat prakīrnakam) or by Nār. as matters that were to be set in motion by the king himself (vide note 331). These have been dealt with above and do not require any further treatment here.

At the end of this section on Vyavahāra it would not be out of place to say a few words about wills. Owing to the joint family system and the custom of adoption testamentary dispositions did not come into vogue in ancient India. Among the many kinds of documents (*lekhya*) mentioned by Kaut., Br, Kāt and others cited above there is no term for a document which can convey the idea of a modern will. But it need not be supposed that the idea had not at all dawned upon the minds of people before the advent of the British[1601]. Wills were known among Mahomedans and contact with them would naturally suggest the idea of a will. Oral or written instructions by a man expecting death to his heirs intended to affect the disposal of his property must have been given occasionally and should not

1600 Vide *Lakshman v. Satyabhamabai* 2 Bom. 494 at pp 499, 505, *Radhabai v. Gopal* 45 Bom. L. R. 980 at p. 991.

1601. In *Nagalutchmee Ummal v. Gopoo Nadaraja* 6 Moo I A. p 309 the P. C. said (at p. 344): 'It must be allowed that in the ancient Hindu Law, as it was understood through the whole of Hindustan, testamentary instruments in the sense affixed by English lawyers to that expression were unknown; and it is stated by a writer of authority (Sir Thomas Strange) that the Hindoo language has no terms to express what we mean by a will. But it does not necessarily follow that what in effect though not in form are testamentary instruments which are only to come into operation and affect property after the death of the maker of the instrument were equally unknown.

be supposed to have been entirely unknown. Verses 341–359 of the Rājataraṅginī IV. appear to embody the political testament of king Lalitāditya of Kashmir in the first half of the 8th century. Kāt. (566) makes a very near approach to the modern conception of a will[1602]. He says, 'if a gift was promised by a man for a religious purpose whether when in good health or when afflicted with disease, the son should be made to pay it, if the father dies without giving it over.' Here the mere declaration of the intention of a person was made enforceable after his death against the son or other heir. Brhaspati's verse saying that a promise or direction to take effect after the death of the promisor was not ordinarily enforceable has already been quoted above (n. 823). In the quarterly of the Bhārata-itihāsa-saṁśodhaka Maṇḍala of Poona, vol. XX p. 210 (for May 1940) there is a letter (dated 1775 A. D.) written by one Naro Babaji, who, after referring to his illness, provides on a generous scale for his funeral and śrāddha expenses and makes dispositions in favour of his daughter-in-law, of another widow, and for the marriage of his kinsman's sons and distribution of the balance of his assets[1603].

(*Continued on the next page*)

One of the earliest wills to come before the British Indian Courts was that of the notorious Umichand[1604] (who died in 1758 A. D.). Bengal Regulation XI of 1793 recognized by section VI the power of a Hindu proprietor to make a will or declaration giving, prior or subsequent to 1st July 1794, his entire landed estate to his eldest son or next heir or other son or heir or to any person or persons. In a Bombay case the will of a Hindu made in 1789 is referred to[1605]. A Pundit of the Recorder's court of Bombay gave it as his opinion in 1812 A.D., 'there is no mention of wills in our *Shaster*; therefore they ought not to be made' (vide Strange's Hindu Law, vol. II p. 449). In I. L. R. (1940) 1 Cal. 415 at p. 424 the Privy Council observe that the Hindu will in its present form is a development since the middle of the 18th century.

It is beyond the scope of this work to dilate on the modern Acts dealing with Testamentary dispositions such as the Indian Succession Act (Act 39 of 1925).

Now that the foregoing lengthy presentation of the ancient and medieval Hindu judicial procedure and substantive law has been brought to a close a few general observations may be indulged in here. The Hindu Law of pleading and evidence compares favourably with similar laws of many other countries and has extorted the admiration and encomiums of such

1604. The will is set out in an English translation in W A. Montriou's 'The Hindu Will in Bengal' (Calcutta, 1870) pp. 9ff.

1605. Vide *Jugmohandas v. Sir Mangaldas* 10 Bom. 528.

eminent Jurists and Judges as Sir William Jones, Sir Thomas Strange and others. For example, Sir Thomas Strange in 'Hindu Law' (1830) vol. I observes (at p. 311), "sufficient be it to observe that Hindu pleading was noticed with commendation by Sir William Jones and that, with some trifling exceptions, the Hindu doctrine of evidence is, for the most part, distinguished nearly as much as our own, by the excellent sense that determines the competency and designates the choice of witnesses with the manner of examining and the credit to be given them; as well as by the solemn earnestness with which the obligation of truth is urged and inculcated; insomuch that less cannot be said of this part of their law than that it will be read by every English lawyer with a mixture of admiration and delight, as it may be studied by him to advantage. Even the *pious perjury* which it has been supposed to sanction[1605a] being resolvable after all into no greater liberty than what our juries (not indeed with perfect approbation) have long been allowed to take, where the life of a prisoner on trial before them is at stake; credit is to be given to the pregnant brevity of the Hindu oath viz. 'what you know ..declare at large and with truth' (Manu VIII. 80); as also to the noble warning, with which the subject as detailed by Manu is ushered in, that 'either the court must not be entered by judges, parties and witnesses or law and truth must be openly declared' (Manu VIII. 13)." The medieval digests made a very near approach to the modern ideal of equality of all men before the law. How even in the 20th century the much vaunted equality before the law of all people in England is far from being achieved and how it often proves quite illusory where the poor or the labouring classes are concerned is well brought out in a book entitled 'Justice in England' by a Barrister published by Victor Gollancz in 1938, especially in chapters I and VI. The Hindu jurists evolved tolerably clear and sound ideas about contracts, debts, deposits and pledges, sales, mortgages and gifts of immovable properties, developed a system of joint family rights and liabilities and laid down a peculiar law of inheritance and succession to males and females. The Hindu system of inheritance and succession

1605a This is a reference to the texts of Gaut. 23 29, the Mahābhārata, Manu, Yājñavalkya and others cited on p 353 above Sir William Jones remarks (in Works, vol. VIII p. 445, ed. of 1807): 'In the great system of contracts and the common intercourse between man and man, the *Pootee* (*Pothi*?) of the Indians and the Digest of the Romans are by no means dissimilar'.

pursues a middle course. It does not distribute the estate of a deceased person simultaneously among several heirs as under the Mahomedan Law (where the widow, the father, mother, sons and daughters of a man take the estate together if they are all alive at the time). Nor did the Hindu system confine the descent to a single person among a group of heirs of the same degree and sex as in the English system before 1926 (where the eldest son succeeded to the real estate of an intestate person).

It has further been seen how the ancient and medieval Hindu rules as to debts, adoption, partition and inheritance have been moulded for over a century by Legislation and by decisions of the Privy Council and the Courts in India Many persons feel that the time has now arrived for the codification of Hindu Law. A Committee presided over by Sir B N. Rau has prepared a draft code which attempts to codify certain branches of Hindu Law From several quarters there has been vehement opposition to this draft code The objections raised are many. It is not possible to deal here with the several objections in detail. But some of them which raise questions of fundamental importance will have to be briefly stated and answered. The first objection is that in view of Queen Victoria's proclamation of 1858 the Indian Legislature should not interfere with the customs and usages of the people that are part and parcel of the Hindu religious system But this objection is hollow and unsubstantial and conveniently ignores what has happened during the last hundred years or so. All that the Queen proclaimed was · 'Firmly relying ourselves on the truth of Christianity and acknowledging with gratitude the solace of religion we disclaim alike the right and the desire to impose our convictions on any of our subjects. We desire it to be our royal will and pleasure that none be in any wise favoured, none molested or disquieted by reason of their religious faith or observances; but that all shall alike enjoy the equal and impartial protection of the law; and we do strictly charge and enjoin all those who may be in authority under us that they abstain from all *interference with the religious belief or worship of any of our* subjects on pain of our highest displeasure.' Notwithstanding the noble sentiments expressed here, the Indian Legislature both before and after the proclamation passed numerous laws that more or less impinged upon or affected the religious theories, sentiments and practices of millions of Hindus! The following is a list of some of the important laws of this character which will convince any one of the fact that

people have always submitted to laws passed by the Governor-General or the Legislature that prevented them from carrying out their cherished ideas and practices: Regulation XVII of 1829 which declared the practice of *Satī* illegal and a crime punishable by the courts; the Caste Disabilities Removal Act (XXI of 1850); Hindu Widows' Remarriage Act (XV of 1856, which legalises the marriages of Hindu widows notwithstanding any custom or interpretation of the Hindu Law to the contrary); the Indian Penal Code (XLV of 1860, which makes sexual intercourse by a man with his own wife that is under thirteen years of age punishable as rape); the Child Marriage Restraint Act (XIX of 1929), which makes the marriage of a male below 18 and of a female below 14 punishable as a crime; the Hindu Inheritance (Removal of Disabilities) Act (XII of 1928) which sets aside the Mitāksarā rules about exclusion from partition and inheritance except in the case of those that have been lunatics or idiots from birth; the Hindu Law of Inheritance Amendment Act (II of 1929, which enables the son's daughter, daughter's daughter, sister and sister's son to succeed under the Mitāksarā in that order after the paternal grandfather and before a father's brother); the Hindu Gains of Learning Act (XXX of 1930); the Hindu Women's Rights to Property Act (XVIII of 1937, which enables the widow of a deceased member of a joint Hindu family to succeed to the interest of her husband in the joint family property and to succeed to her deceased husband's separate property for the same share as that of a son). The Privy Council claimed more than 70 years ago that 'the British Government by virtue of its sovereign power asserted, as the former rulers of the country had done, the right to visit endowments of this kind (viz temples) and to prevent and redress abuses in their management' (*Rajah Muttu Ramalinga v. Perianayagum* 1 I. A. 209 at p. 232). Non-Hindu Judges of the Privy Council and the High Courts have been interpreting and laying down the Hindu Law for over a hundred years and on many points the law declared by them has thoroughly changed the law of the smrtis and digests If all this has been allowed to happen without hardly a demur, there is apparently no satisfactory or convincing reason why an elected Indian Legislature the majority of whose members are likely to be Hindus should not pass an Act dealing with Hindu Law.

Another objection raised even by some retired judges of the High Court is that the present system of laying down the

Hindu Law by means of judicial decisions is quite satisfactory and there is no need of a code of Hindu Law. This objection merely shows that change is rather a painful process for most men. The present method may be a veritable El Dorado or paradise for lawyers and busy bodies fomenting longdrawn litigations One must stand appalled at the colossal expenditure of time, labour and money which must have been involved during the last hundred years or more in fighting out doubtful points of Hindu Law from the lowest court to the Privy Council. It not unfrequently happens that after a point had been settled by a Full Bench decision of a High Court and after common people and lawyers had followed the law thus settled for fifty years the Privy Council upsets the decision on an appeal by an enterprising litigant. For example, the Bombay High Court decided in 1879 in *Ramji v. Ghamau* (6 Bom. 498) that the adoption by the widow of a deceased co-parcener, who had not her husband's express authority to adopt, was invalid, if made without the consent of the surviving co-parceners. But in 1932 the Privy Council held that *Ramji v. Ghamau* was wrongly decided and that a widow can adopt without her husband's express authority and even in the teeth of the opposition of the surviving members of her husband's family. And when an appeal was made to the principle of '*stare decisis*' the Privy Council was pleased to observe, 'It was pressed on their Lordships that *Ramji v. Ghamau* had been accepted and acted upon in the Presidency of Bombay since 1879 and that the decision should not be disturbed. But this is a belated appeal. It should have been made when *Yadav v Namdeo* was before the Board' To ordinary minds this dictum, speaking with the utmost respect, appears strange. If for some reason or other a certain line of argument is not placed before the Privy Council by the counsel of a private party and a wrong decision is given, is it to be supposed that all litigants are to be precluded from trying to set the wrong decision right for all time to come? The Privy Council has not seldom set right a wrong decision given by the Board in a prior appeal In *Sahu Ram v. Bhup Singh* 44 I. A. 126 the Privy Council held that the pious duty of the son to discharge his father's or grandfather's debts does not attach while the father or grandfather is alive; but in *Brij Narain v. Mangla Prasad* 51 I. A. 129 the Privy Council held (at p. 134) that the pious duty is always there irrespective of the question whether the father or grandfather is alive or dead.

Others opine that one Code for the whole of India is not and cannot be a practicable proposition. In support of their objection they rely on the existence of the several schools of law now prevalent in the whole of India. If India desires to be a self-governing political unity in the future, there is a compelling reason why it should be governed by a single Code of Hindu Law, as it has been gov erned and will be governed in other substantial provinces of law by codes applicable to all alike. That will help in the direction of solidarity and will be of some use in doing away with fissiparous tendencies. There are really only two schools of Hindu Law. And the unification of Hindu Law will be helped by the abolition of the right by birth which is the cornerstone of the Mitāksarā school and which the draft Hindu Code seeks to abolish. Many people are vehemently opposed to the change But they forget that, what with the rule that any member of a joint Hindu family may alienate his interest for value, what with the Gains of Learning Act, the Hindu Women's Rights to Property Act and other enactments, the real core of the ancient Hindu family system has been removed and only the outer moribund shell remains (vide p. 604 above) Some are opposed to giving along with sons a share to daughters, particularly to married daughters. But here a compromise may be effected by allowing a share to unmarried daughters alone (as Yāj II. 124 and the Mitāksarā thereon expressly provide).

Another provision in the draft Hindu Code which has come in for severe animadversion is the provision that a woman even when taking by inheritance an estate from a male or by partition should be held to become absolute owner thereof. In the first place, if a man's agnate of the 13th degree or a male cognate up to the 5th degree takes an estate absolutely and may squander it away as he pleases, one fails to see why his own widow should not have a like power in the 20th century, whatever may have been the view of ancient works. In the second place, this objection can be met by means of a compromise, viz. that a widow inheriting her husband's estate will take only a limited estate if at the time of her husband's death any one of the compact series of heirs or any direct lineal descendant of her husband (such as a son's daughter or daughter's daughter) be alive, but she will take an absolute estate if none of these exists. Such a compromise should allay all fears about the widow unfairly disposing of the estate against near relations

like the daughter or daughter's son or husband's brother &c. There are numerous other objections, but they are in matters of detail and if once it is agreed that there should be a Code of Hindu Law passed by the Indian Legislature these matters of detail may be adjusted to the satisfaction of most people.

Similarly serious objections are raised to the provisions of the Code as regards marriages and divorce. The draft code proposes to do away with the prohibitions based on sameness of gotra and pravara. This is a desirable change and being optional should not be opposed Some reasons for this change have been advanced in H. of Dh. vol II. p 498. Besides, this provision will affect only a small percentage of the Hindu population Similarly the insistence on monogamy is opposed by many. In this case some compromise may be arrived at as regards classes to whom two wives are an economic advantage The provisions about divorce have been overdue. Among the higher castes no divorce has been allowed on any ground whatever. Many hard cases occur where there is no redress and the draft code proposes to give relief in such cases.

On the most contentious subject of adoption the draft code, it is satisfactory to note, has made certain provisions which are in line with the suggestions put forth by me in note 1338a above.

Compelling reasons exist why Hindu Law should be codified as early as possible Men naturally desire that they should have easy access to the laws by which they are to be governed in all their actions, dealings and relations It is hardly a commendable or desirable state of things that people should be forced to consult lawyers or bulky textbooks every now and then and even in small and simple matters. The general outlines and provisions of Hindu Law must be within easy reach of every intelligent or inquiring Hindu. This can only happen if there is a code for all Hindus or, if that is deemed impracticable for the present, at least for a large province or for a number of provinces.

CHAPTER XXXII

SADĀCĀRA

CUSTOMS AND MODERN CUSTOMARY LAW[1606]

From Gautama[1606a] downwards many writers dilate upon the sources of *dharma*. Gautama I. 1–2 states: 'the Veda is the source (*mūla*) of dharma and also the tradition (or smrtis) and practice of those who know the Veda'. Similarly Āp. Dh. S. (I. 1. 1. 1–2) says: 'we shall propound the acts (that produce merit) which are evolved from conventions and practices; the authority (for finding out the *dharmas*) are the conventions of those who know the dharma and the Vedas'. Vas. I. 4–7 provides: 'dharma is declared by the Vedas and Smrtis; on failure of these two the practice of the śistas is the authority (for finding out what dharma is); a śista however is one whose heart is free from (worldly) desires and (only) such acts of śiṣṭas are (to be held as) dharma for which no (worldly

I. 1. 1. 1–3, श्रुतिस्मृतिविहितो धर्मः। तदलाभे शिष्टाचार. प्रमाणम्। शिष्टः पुनरकामात्मा। अगृह्यमाणकारणो धर्म। वसिष्ठ I 4–7; श्रुति. स्मृति· सदाचार. स्वस्य च प्रियमात्मनः। सम्यक्सङ्कल्पज. कामः धर्ममूलमिदं स्मृतम्॥ या. I. 7; वेदोऽखिलो धर्ममूलं स्मृतिशीले च तद्विदाम्। आचारश्चैव साधूनामात्मनस्तुष्टिरेव च॥ मनु I. 6. हरदत्त explains mūla in Gaut. as pramāna and सामयाचारिकान् as 'पौरुषेयी व्यवस्था समय. स च त्रिविधः विधिर्नियम प्रतिषेध इति। समयमूला आचाराः समयाचाराः तेषु भवा सामयाचारिकाः एवंभूतान्धर्मानिति। कर्मजन्योऽनुदयनि·श्रेयसहेतुरपूर्वाख्य आत्मगुणो धर्मः'. According to him सामयाचारिकान् means relating to practices based upon agreements or conventions Manu distinguishes between śīla and ācāra The first means, acc. to Kullūka and others, such moral qualities as 'devotion to learning, to gods and to parents' &c mentioned in Hārīta (quoted by Kullūka) All commentators connect 'svasya' in Manu II 12 and Yāj I. 7 with 'priyam'. but Pandit Gattulal connects it with 'sadācāra' which means according to him 'sampradāya' (in Satsiddhāntamārtanda I. 5 p. 49, Nir. ed. 1942).

or secular) cause (or motive) can be assigned'.[1607] Manu II. and Yāj. I. 7 declare that Veda (or śruti), smṛti and the practices of the good are the principal *sources* of dharma The words employed in these works are *śīla*, *samaya*, *ācāra* or *sadācār* or *śiṣṭācāra*[1607] (the latter three meaning the same thing) Āp. employs both words viz. *samaya* and *ācāra*, the first of which probably means 'agreement or convention or usage', while the latter means 'custom'. The word 'custom' now conveys the idea of some antiquity,[1608] while usage or convention does not necessarily convey that idea. A usage may be recent or it may be established by agreement among a certain class of persons (such as traders or craftsmen) We have to see what is meant when it is said that *ācāra* or *śiṣṭācāra* or *sadācāra* is the source (mūla) of dharma. An indication of the meaning is furnished by the word *pramāna* employed by Āp. and Vas. The meaning is that just as the revealed books (Veda) and the smṛtis authoritatively lay down what dharma is, so also in our quest to find out what dharma is in the varying circumstances of life the practices of those who may be called śistas furnish us with the necessary criterion or norm i e. śistācāra is the touchstone for judging whether an act is in consonance with what the śāstras require us to do. The theory of the ancient writers was that the smṛtis were based on parts of Veda (that consists of *mantras* and Brāhmana texts) which though formerly existent are not now extant or available, that similarly the practices of those who were learned in the Vedas and were deemed to be śistas must be inferred to have been based on portions of Veda not now available. This theory was advanced by such ancient

1607. As to the qualifications of śistas, vide H. of Dh. vol. II. pp. 971–72 where references are given to Baud Dh S, Manu, the Matsyapurāna and a few other works. The Tai. Up. I. 11 contains perhaps the oldest extant indication as to who should be regarded as śistas, though that word itself is not used. अथ यदि ते कर्मविचिकित्सा वा वृत्तविचिकित्सा वा स्यात् । ये तत्र ब्राह्मणा· संमर्शिनः युक्ता आयुक्ता अलूक्षा धर्मकामा. स्युः यथा ते तत्र वर्तेरन् तथा तत्र वर्तेथा । अथाभ्याख्यातेषु । ये तत्र ब्राह्मणाः . . धर्मकामाः स्यु· यथा ते तेषु वर्तेरन् तथा तेषु वर्तेथा· ।.

1608. Vide *Dalglish v. Guzuffer* 23 Cal. 427, 429 and *Sarratullah v. Pran Nath* 26 Cal. 184, 187 for the meaning of usage in modern enactments as distinguished from 'custom'. In *Juggomohun Ghose v Manickchund* 7 Moo I A. 264 at p 282 (mercantile) usage is sharply distinguished from custom in that the former need not possess the characteristics of antiquity, uniformity and notoriety that the latter must possess.

writers as Āp.[1609] and was taken up by many subsequent works. Manu II. 7 also states that whatever dharma has been ordained for any person by Manu, all that has been entirely declared in the Veda for the Veda is full of all knowledge. But it does not follow from this nor is it ever meant that all practices of śiṣṭas are authoritative in matters of dharma. The qualification was added that where the practices of śiṣṭas are clearly referable to or are prompted by a seen motive or by the desire to secure pleasure, there they are not authoritative. Manu (II. 18) restricted the word sadācāra to the customs handed down from generation to generation among the four varnas and the mixed castes in the country called by him Brahmāvarta (II. 17). But many other writers did not so restrict it in this way.

We have to distinguish between what are called the sources (*mūla* or *pramāna*) of dharma and the *sthānas* of dharma (Yāj I. 3 and 7).[1610] The former indicate to the inquiring spirit what dharma is (i e. they are what are called *jñāpaka hetu*), while the latter must be studied as aids by the expounders of dharma in order to correctly grasp what dharma is, i. e. the different lores (other than Veda and smṛti) are not directly the sources of dharma, but are only mediately so. This distinction is an ancient one as even Gautama XI. 19 provides that the king is helped in his administration of justice by the Veda, the dharmaśāstras, the auxiliary lores (angas), the Upavedas and the Purāna [1611]

The position of the Pūrvamīmāṃsā in relation to the authoritativeness of smṛtis and customs requires careful and

detailed consideration. In I. 3. 1–2[1612] Jaimini considers the question whether such smṛti injunctions as 'one should perform the Aṣṭakā śrāddhas',[1613] or 'one should construct a tank or set up a *prapā* (place for free distribution of water to thirsty travellers'), or 'tufts of hair should be kept on the head' (at *caula* according to the gotra) are authoritative and establishes the conclusion that they are authoritative, since such smṛti injunctions equally with Vedic ones are addressed to the same persons (viz. the followers of the Veda) who have to act according to them The idea is that those who perform the acts expressly enjoined by the Veda are also seen to perform the acts enjoined by such smṛtis as that of Manu and therefore the principal reason why these smṛtis are authoritative is the fact that those who know the Veda accept these smṛtis as authoritative and hold fast by them, as Medhātithi on Manu II. 6 says citing some verses from his own work called Smṛtiviveka.[1614] Śabara endeavours to show that there are indications (*liṅga*) in the Vedic texts pointing to the existence of what is prescribed in the smṛtis, e. g he cites the Vedic verse 'yām janāh' as indicative

1612. धर्मस्य शब्दमूलत्वाद्शब्दमनपेक्ष स्यात् । अपि वा कर्तृसामान्यात्प्रमाणमनुमानं स्यात् । जै I 3 1–2 The word अनुमान is here used in the sense of स्मृति 'अपि वा पक्षो व्यावर्त्यते । प्रमाण हि स्मृतिः । . ग्रन्थस्त्वनुमीयेत कर्तृसामान्यास्स्मृतिवैदिकपदार्थयो' । तेनोपपन्नो वेदसयोगश्चैवाणिकानाम् ।' शबर, about अष्टका he says 'अष्टकालिङ्गाश्च मन्त्रा वेदे श्रूयन्ते यां जना प्रतिनन्दन्तीत्येवमादय' ।'. That verse is, यां जना· प्रतिनन्दन्ति रात्रिं धेनुमिवायतीम् । सवत्सस्य या पत्नी सा नो अस्तु सुमङ्गली । This occurs in आप म पा II 10 27, in पारस्करगृह्य III 2 and in अथर्ववेद III 10 2 where we have या देवा etc Acc to प्रभाकर the topic of Jai I 3 1–2 is not such smṛti texts as those on Aṣṭakā, but the Vedic verse या जना itself The न्यायसुधा p 126 adds 'अष्टाकायै सुराधसे स्वाहेति तस्याष्टकादेवतारात्रिप्रकाशकत्वादेषा वै सवत्सरस्य पत्नी यदष्टकेति संवत्सरपत्नीत्वसस्तुताष्टकाप्रकाशकत्वाच्चाष्टकालिङ्गत्व स्पष्टमेवेति' The word कर्तृसामान्यात् in the sūtra is explained in the मयूखमालिका as 'अग्निहोत्रादीनां वैदिकपदार्थानां ये कर्तारस्त एव अष्टकादिस्मृतीनामिति कर्तृसामान्यात्प्रामाण्यसूक्तम्' (on जै I 3 4 p 27), while the न्यायसुधा (p 125) proposes also another explanation 'यद्वा स्मृतिकर्तृणा मन्वादीना वैदिकपदार्थकर्तृणां तदानींतनानां शिष्टाना त्रैवर्णिकत्वेन समानत्वात् इदानींतनधर्मन्वादीनामप्युपपन्नो वेदसंयोग इत्यर्थः'.

1613 Vide Āśv. Gr. II. 4. 1 ff, Sān. Gr. III. 12–14, Pār. Gr. III. 3 for Aṣṭakā śrāddhas. Passages of the smṛtis about tanks and prapās are set out in H of Dh vol II pp 889–890 For tufts of hair kept in *caula* vide H of Dh. vol II pp. 261 and 264,

1614. वैदिकै स्मर्यमाणत्वात्तत्परिग्रहदार्ढ्यत. । संभाव्यवेदमूलत्वास्स्मृतीनां वेदमूलता ॥ quoted in the शास्त्रदीपिका on जै. I 3 2; 'स्मार्तवैदिकयोर्नित्य व्यतिषङ्गात्परस्परम् । कर्तृतः कर्मतो वापि वियुज्येते न जातु तौ । .. प्रामाण्यकारणं हुड्यं वेदाविद्धि. परिग्रहः । तदुक्त कर्तृसामान्यादनुमानं श्रुतौ. प्रति ॥ q. from स्मृतिविवेक by मेधा. on मनु. II. 6

of aṣṭakās, Ṛg X. 4. 1 of prapās, Ṛg. VI. 75. 17 of tufts of hair The objection may be stated as follows:—The smṛtis are composed by human authors (i. e. they are *pauruseya*) and so have no independent authority in matters of dharma, as a man may say what is either false or mistaken. If it be said that the smṛtis really propound what is stated by the Veda, then they are practically superfluous and useless. and not being Veda they should be discarded (anapeksa) To this the reply is that smṛtis are generally authoritative, as they must be held to be based on Veda because they are composed by men (like Manu) who were followers of the Veda, because what the smṛtis lay down has been consistently followed from generation to generation by the śistas and because it is possible to regard the Veda as their source. To the question why the Vedic passages on which the smṛti rules are postulated to have been based are not seen or found by us several answers were proposed by different writers One view was that just as Vedic indications about locks of hair lead to the inference of śruti texts enjoining the keeping of tufts on the head, so the fact of the existence of such rules leads to the inference that śruti must have contained injunctions corresponding to all smṛti prescriptions Kumārila raises objections to this view. Inference is based on perception (*pratyakṣa*) and invariable concomitance (*vyāpti*). There is no vyāpti between the smṛtis and śruti texts that are never found pronounced by any one, so no inference is possible and it would be like one blind man following another.[1615] Manu must have composed his smṛti on finding that ācāryas preceding him performed certain acts as based on Veda These last must have believed that their predecessors also acted on the same belief. Hence there is what is called an 'andha-paramparā' on this hypothesis And further this hypothesis of the inference of Śruti in all cases is opposed to perception, since as a matter of fact hundreds of Śruti passages are known that can be the basis of corresponding smṛti texts Another view is (and Kumārila holds that it is somewhat better than the preceding view) that one should infer that the Vedic passages that were the basis of smṛtis are lost (utsanna or pralīna) Some support is lent to this by such Vedic texts as 'anantā vai vedāh' (Tai. Br. III 10.

1615. तत्रयुक्तमन्धपरम्परान्यायादेव। या हि चोदना न कदाचिदुच्चार्यते तस्या सर्वपुरुषप्रत्यक्षादिमसराभावाद् दुर्लभतरमस्तित्वम्। ... लिङ्गादीनां तु नित्यत्वाश्रितयमनुच्चरितस्य पनुमानकारणत्वमविरुद्धम्। तेन यदे मूलीनश्रुत्यनुमानमेव। तन्त्रवार्तिक p 164 on जै. I. 3. 2.

11) and by Āp. Dh. S I. 4 12. 10. Even this view is not acceptable to the Tantravārtika and most of the Mīmāmsakas The objection against the 2nd view is raised as follows. Even Bauddhas and other heretical sects[1616] would advance the argument that their works also are based on śruti texts that are now lost, and any one may regard anything as authoritative by pretending that the basic vedic texts are lost. Further the Mīmāmsā view that the Veda is eternal (*nitya*) would be refuted if it were admitted that some portion of the Veda is lost. There is not much difference between the first view and the second view. Therefore Kumārila propounds the third view viz. that smrtis are to be inferred as based on Vedic texts that are already in existence[1617]. If an objection is raised against this hypothesis that it must be explained why such Vedic texts (the bases of smrtis) are not seen or found, the Tantravārtika replies in a famous *kārikā* that as the Vedic *śākhās* (the several branches of the Veda) are scattered about (in various countries), as men (followers of the Veda) are negligent and unmindful (i. e they do not visit all the countries and so are unable to have a complete knowledge of all Vedic texts) and as several rules are declared in different contexts even when occurring in the same śākhā (and not at one place) it is not always possible to point out the Vedic sources of smrti texts. If an objector were to ask: 'why were not the Vedic passages themselves (that are the sources of smrti rules) embodied bodily into the smrtis,' Kumārila replies that this was not done from the fear of the loss of the correct arrangement of the Vedic texts as traditionally handed down. The Veda is principally concerned

with sacrifices, though now and then there are rules addressed to men for regulating conduct only. People would only study the Vedic sentences contained in the smṛtis (that are concerned principally with conduct) where they would be arranged in a different order according to subjects and there would thus be loss of the arrangement of the Veda as originally delivered. Viśvarūpa[1618] (on Yāj. I. 7) quotes the above verse of Kumārila and states that there are thousands of smṛti rules that have their source in the Veda; he and Kumārila instance the rules against talking with (or coming in contact with) a woman in her monthly illness or the rule against assaulting a brāhmaṇa, or the rule about the sin of killing an ātreyī woman &c. Medhātithi on Manu II. 6 has an elaborate discussion on this very topic and quotes several verses from his own work called Smṛtiviveka[1619]. He does not approve of the first two views and follows Kumārila's view. Mīmāṃsā writers and commentators like Medhātithi say that Manu and other authors of smṛtis brought together for easy comprehension matters that are scattered about in the various Vedic texts, that are either not known to the students of the several śākhās or that cannot be brought together by men of ordinary or weak intellect.[1619a]

The general proposition that smṛtis are authoritative being established, a further question arises. What is to happen if a smṛti rule conflicts with the rule of the Veda? Jaimini deals

with this question in I. 3. 3–4,[1620] which form a topic that states an exception to the general rule contained in Jai. I.3.1–2. Śabara gives three instances where there is apparently a conflict between the prescriptions of the śruti and those of smrtis. The Veda says, 'the priest should chant (the *stotra*) after touching the *audumbarī* post', while smrti says 'the whole of the audumbarī post should be covered with cloth'. 'The Veda says 'one to whom a son has been born and whose hair is still dark (and has not turned grey) should consecrate the Vedic fires', while smrti says 'a man should observe Vedic studenthood for 48 years'[1621]; the Veda says 'when the Agnisomīya rite is finished then one may eat (the food prepared) in the house of the sacrificer', while smrti says 'the food of one who has undergone dikṣā for a sacrifice may be eaten after he purchases the soma plant'. In these cases the proposition enunciated by Jaimini is that 'in case of conflict (between an express śruti rule and a smrti rule) the smrti rule should be discarded, for when there is no conflict (with an express śruti) inference may be made (that a smrti rule is based upon some Vedic text).' The examples may be explained as follows: The 'audumbarī' is a post of udumbara planted in the *sadas* in the performance of the Agnistoma; the stotras (other than Bahispavamāna) are chanted near the audumbarī post in the sadas. Vide H. of Dh. vol. II. p 1135 for the fixing of the audumbara post in the *sadas* and p. 1185 for the chanting of stotras near the *audumbarī*. If the whole of the post be covered with cloth, it would not be possible to touch the post, but only the cloth would be touched. So there is contradiction. If a man is to consecrate Vedic fires when he has a son and his hair is dark, he must be between about 20 and 40 (i. e a young man), but if a man were to observe brahmacarya for

1620. विरोधे त्वनपेक्षं स्यादसति ह्यनुमानम् । हेतुदर्शनाच्च । जै I 3 3–4, अथ यत्र श्रुतिविरोधस्तत्र कथम् । यथौदुम्बर्यां सर्ववेष्टनं 'औदुम्बरीं स्पृष्ट्वोद्गायेत्' इति श्रुत्या विरुद्धम्। अष्टाचत्वारिंशद्वर्षाणि वेदब्रह्मचर्यचरणं 'जातपुत्रः कृष्णकेशोऽग्निमादधीत' इत्येन विरुद्धम्। क्रीतराजकोऽभोज्याक्न इति 'तस्माद्दक्षिणोमीये सन्धिते यजमानस्य गृहेऽशितव्यम्' इत्यनेन विरुद्धम्। तत्प्रमाणं कर्तृसामान्यात्। इत्येवं प्राप्ते ब्रूमः। अशक्यत्वाद्ध्यामीह इत्यवगम्यते। ... तस्माद्युक्तं श्रुतिविरुद्धा स्मृतिरप्रमाणमिति। अतश्च सर्ववेष्टनादि नादरणीयम्। शाबर.

1621. For अष्टाचत्वारिं &c vide गौ ध सू. I. 2 1–5 अष्टाचत्वारिंशद्वर्षाणि पौराणं वेदब्रह्मचर्यम्। चतुर्विंशतिं द्वादश वा प्रतिवेदम् .. । ग्रहणान्तं वा जीवितस्थास्थिरत्वात्। कृष्णकेशोऽग्निमादधीतेति श्रुतेः । For क्रीतराजको &c. vide आप ध. सू. I. 6 18 16 and 23 'सङ्क्रामभोज्यम्। दीक्षितोऽक्रीतराजकः'. It may be noted that आप. mentions also several other views such as 'अग्नीषोमीयसंस्थायामेव। हुतायां वपायां दीक्षितस्य भोक्तव्यम्' (I. 6. 18. 24–25).

48 years, he would be about 52 to 56 years of age before he married (as the upanayana of a brāhmaṇa was to be performed generally in the 8th year or from the 5th year onwards at the most). Only a married man could consecrate Vedic fires. But a man's hair when he is fiftytwo years of age or more can hardly be all dark. Therefore there is contradiction between the rule derived from the Veda and that derived from smṛti. In the Jyotiṣṭoma (which generally occupied five days), the dīkṣā (purification and initiation of the sacrificer) takes place on the first day in the afternoon (vide H. of Dh. vol. II. pp. 1134-1136). Soma is purchased on the 2nd day of the Jyotiṣṭoma (*ibid.* 1140-4) and the animal is sacrificed for Agni and Soma on the 4th day (*ibid.* pp. 1158-59). According to śruti therefore the food prepared in the house of a dīkṣita may be eaten only after the 4th day, while smṛti says that it may be eaten after the purchase of *soma* on the 2nd day. In this way there is contradiction. Kumārila[1622] does not agree with Śabara as regards these examples in particular and as regards the general attitude towards smṛtis that are accepted by Vedic followers. He makes great efforts to explain how there is no real conflict in the cases cited by Śabara. As regards the cloth covering the *audumbarī* he says that it may cover the bottom and the upper portion of the post and leave a space of two or three finger-breadths in the middle uncovered (so that the audumbarī post can be touched in that particular portion), that (p. 188) there is a passage in the Śāṭyāyani

---

1622. The sūtra (Jai. I. 3 3) is read as अनपेक्ष or अनपेक्ष्यं and with both readings it has been explained in different ways from ancient times. The तन्त्रवार्तिक says 'औतस्मार्तविज्ञानविरोधे यद्यनपेक्षमपेक्षाबीजितं यस्य चाऽपेक्षणीयमन्यन्नास्तीति एवं पाठद्वयेपि पूर्वसूत्रात्प्रमाणशब्दमनुषङ्गेण सम्बध्य यदनपेक्षं तत्तावत् प्रमाणं स्यादिति' (p. 193), 'श्रुतिविरोधे यन्मानान्तरानपेक्षं श्रुतिवाक्यं तदेव प्रमाणं स्याच्च तु स्मृतिवाक्यं यस्मात्सत्येव विरोधे स्मृतेः श्रुत्यनुमापकत्वम्' मयूखमालिका On this interpretation the sūtra means 'in case of conflict between śruti and smṛti, the former which is independent is authoritative, for only when there is no conflict does an inference arise that smṛti is based on śruti'. The तन्त्रवार्तिक when it explains Jai. I. 3 3-4 as referring to Bauddhas and the like takes 'anapekṣya' to mean 'deserving to be discarded'; 'तस्माद्धर्मे मिते त्रयीवाह्यमेवंजातीयकं प्रामाण्येनानपेक्ष्यं स्यादिति सिद्धम्' p 196. शङ्कर in his भाष्य on वेदान्तसूत्र II 1. 1 appears to adopt Kumārila's 2nd interpretation of Jai. 1. 3. 3. 'विप्रतिपत्तौ च स्मृतीनामवश्यकर्तव्येऽन्यतरपरिग्रहेऽन्यतरपरित्यागे च श्रुत्यनुसारिण्यः स्मृतय· प्रमाणमनपेक्ष्या इतराः। तदुक्तं प्रमाणलक्षणे विरोधे त्वनपेक्षं स्यादसति ह्यनुमानमिति।' कुल्लूक on मनु II. 14 quotes जै I 3. 3 and explains 'श्रुतिविरोधे स्मृतिवाक्यमनपेक्ष्यममाणमनादरणीयम्। असति विरोधे मूलवेदानुमानमित्यर्थः'.

Brāhmana which refers to the cloth covering the audumbari (and so there may at most be an option), that as regards the taking of food in the house of a dīksita after the purchase of *soma* there is a śruti passage in the Atharvaveda (pp. 181 and 189) similar to the smrti passage (and thus there is no conflict between sruti and smrti, but between śruti and śruti, which would lead to an option) and further the smrti rule may apply in the case of a man in distress (*āpad-dharma*), that smrti does not prescribe an absolute period of 48 years for the study of Veda, but Baud. Dh. S. itself allows several alternative or optional periods and so no question of conflict with śruti arises. Kumārila's own position is this: In the case of apparent conflicts between śruti and smrti, various methods of interpretation and reconciliation are possible. Each of the two may be given its proper scope as referring to different subject matters (which is called *viṣaya-vyavasthā*); it is also possible to hold that smrti is based on some sruti texts already existing but not found at the time of discussion, but which may ultimately be found, in which case there will be an option, though the latter is to be avoided as far as possible as it is liable to eight faults (vide Tantravārtika pp. 174–175); or the two may be reconciled even when referring to the same subject matter e. g. a man may have dark hair even when he is 52 or more and the smrti may be taken as meant to refer to such a man, while the śruti states the general rule about the age when consecration of Vedic fires was to be made Therefore Kumārila holds that all that is meant by Jaimini and even by Śabara is that there is a great distinction between śruti and smrti in that the former is *apauruseya* and an independent authority, while the latter has a human author (liable to err), is either actually based on the Veda or is inferred to be so based, that the two therefore can never be said to be quite alike each other as regards their authoritativeness and that lastly smrti is not in itself to be regarded as unauthoritative[1623]. Kumārila therefore suggests that the proper subject of discussion in Jai. I. 3 3–4 is the works of Bauddhas, Sānkhya, Yoga, Pañcarātra, Pāśupata and other heretical sects and the practices of *mlecchas*. These works contain some matters such as the emphasis on *ahimsā*, truthfulness, restraint of senses, charity and compassion, which are also emphasized in the Veda, but these works are not

1623. अतश्चैवं श्रुतिस्मृत्योर्विशेषोनेन दृश्यते । नात्यन्तमेव चाश्चर्यं न चाप्यत्यन्त-तुल्यता । तन्त्रवार्तिक p. 194.

generally accepted by the followers of the Veda, are based on specious and false reasoning only (they are *haitukas* in the words of Manu), that they deny the authority of the Veda. Therefore Jaimini means that these works of heretic sects are not authoritative in matters of dharma as they are opposed to the Veda and should be discarded. For want of space it is not possible to set out in detail the interesting discussion in the Tantravārtika. The Jaiminīya-nyāya-mālāvistāra also gives another explanation of Jai. I. 3. 3.

Śabara (on Jai. I. 3. 4) explains that the three smrti passages stated above are not authoritative since it is possible to point out how they originated in a visible worldly motive such as greed. When a visible motive can be pointed out for any smrti text, it is not proper to infer that it is based on the Veda and has an unseen spiritual motive. Śabara[1624] postulates the reasons in the way of a modern man finding fault with priests. Some priests covered the whole of the Audumbarī post with cloth, because they coveted the cloth as part of the fee; others who desired a free meal when hungry took food at the house of a dīksita even after he had purchased the Soma plant; certain others in order to conceal their absence of virility went in for Veda study for 48 years. The Tantravārtika tries to show that in all these cases there is really no visible motive such as covetousness (pp. 188–189)

Śabara gives an alternative explanation of this sūtra (Jai. I. 3.4) and makes a separate topic (*adhikaraṇa*) of it. The reasons[1625] for giving an alternative explanation of a *sūtra* or *adhikarana* are two, viz. dissatisfaction with the explanation already given or the wide scope of the subject under discussion. In I. 3. 3 passages from smrtis were cited which were apparently in conflict with śruti. If they were really in conflict, that one reason alone is more than sufficient to render the smrtis invalid. Therefore to say further that those smrti passages originate in worldly motives like greed does not add any very substantial reason for the abandonment of smrtis as authoritative. Therefore Śabara makes another adhikarana of sūtra 4 of Jai. I. 3.

1624. हेतुदर्शनाच्च । जै I. 3. 4: लोभाद्वास आदित्समाना औदुम्बरीं कुरुत्तां वेष्टितवन्तः केचित् । तत्सूतेर्बीजम् । बुभुक्षमाणाः केचित् क्रीतराजकस्य भोजनमाचरितवन्तः । अपुंस्त्वं प्रच्छादयन्तश्चाष्टाचत्वारिंशद्वर्षाणि वेदब्रह्मचर्यं चरितवन्तः । तत एवा स्मृतिरवगम्यते । शाबर.

1625. सर्वस्याश्रयादिकल्पानां द्वयमेव प्रयोजनम् । पूर्वत्रापरितोषो वा विषयस्यातिरेव वा ॥ तन्त्रवार्तिक p. 186.

He cites smrti passages which are not opposed to Veda at all and says that such passages have seen a worldly motive such as covetousness and it is not proper to suppose that they are based on Veda and are therefore authoritative, when a visible purpose or motive can be ascribed to them. The result of the explanations of I. 3. 3–4 given by Śabara would be that smrti rules that are opposed to śruti rules and smrti prescriptions that can be shown to have a clear worldly motive are not authoritative or absolutely binding, while the rest of smrti texts are authoritative.[1626]

Śabara cites on Jai. I. 3. 4 (when taken as a separate topic)[1626a] two examples; (1) the adhvaryu priest takes (as his fee) the cloth used in the Vaisarjana *homa*; (2) they perform the gift of the elephant (i. e. the cloth covering) of the sacrificial post. Śabara says that these passages are not opposed to any śruti text but instead of inferring a Vedic text as their basis it is far better to hold that there is a manifest worldly motive for these rules (viz. covetousness of the adhvaryu) and so these smrti passages need not be looked upon as authoritative.[1627]

This discussion raises an important doctrine which frequently figures in dharmaśāstra works. The doctrine is expressed

---

1626. न दृष्टे हेतौ हेत्वन्तरानुमानं क्रमते । दृष्टश्चात्र लोभ एव हेतुरिति । अतः श्रुतिविरुद्धं दृष्टकारणं च स्मरणमप्रमाणं ततोऽन्यत्प्रमाणमिति । शाबरदीपिका on जै I 3. 4

1626a. अधिकरणान्तरं वा । वैसर्जनहोमीयं वासोऽध्वर्युर्गृह्णाति-इति, यूपहस्तिनो दानमाचरन्ति-इति । तत्कर्तृसामान्यात्प्रमाणमिति भाते । अप्रमाणं स्मृति । अश्रान्यन्मूलम् । लोभादाचरितवन्तः केचित्तत एवा स्मृति । उपपन्नतरं चैतत् वैदिकवचनकल्पनात् । शबर on जै. I. 3. 4 प्रभाकर in his बृहती refers to this example (on Jai. I 1 13 p. 285) 'दृष्टश्चायमर्थो यत्प्राज्ञैः ऋजव उपजीव्यन्त इति । यथा च सिद्धमागमवादिनामपि हेतुदर्शनात् प्रामाण्यं यूपहस्तिनो दानमाचरन्तीत्येवमादिषु '.

1627. For the Vaisarjana *homa*, vide H of Dh II p 1158 In this a piece of fresh cloth is spread over the sacrificer (who touches the adhvaryu), the sacrificer's wife (who touches the yajamāna), the brother and sons of the sacrificer (who touch the wife) In the Vājapeya, the sacrificial post was 17 *aratnis* in height and 17 pieces of cloth were employed to prepare the appearance of a turban on the tip when enveloping the *yūpa* with a girdle. The figure presented by the cloth covering the yūpa was called यूपहस्तिन् (probably because it looked like the head and trunk of an elephant). 'वाजपेयादौ यूपपरिव्याणशाटकं यूपहस्तिशब्दवाच्यं' मयूखमालिका. 'यूपवेष्टनं सप्तदशभिर्वस्त्रैर्ध्रुवग्रथनं वा परिव्ययणकाले' कात्या. श्रौ. 14. 1. 20 and the com. on Kāt. Sr. says 'दक्षिणापरिव्ययणकाले सप्तदशभिर्वस्त्रैर्यूपस्य वेष्टनं कर्तव्यम् । अथवा ध्रुवग्रथनं विधिमूर्ध्नं ग्रथनं कर्तव्यं न तु वेष्टनमात्रम्'.

in this form viz. when a visible motive or purpose is obvious in the case of a rule or prescription it is not proper to ascribe an unseen or spiritual purpose or reason for it. This doctrine is older than even Āp. Dh. S. I. 4. 12 11 which says, 'where men act because they find pleasure in so doing, there śāstra has no scope'. Śabara also says,[1628] 'those rules (in the smṛti) that have a seen purpose derive their authority from that fact, while those that have no visible purpose may be inferred to be based upon the Veda (and derive their authority from that).' These words of Śabara are quoted by Kullūka on Manu III. 7 where Manu states that a girl should not be selected as a bride from a family that neglects the *saṃskāras*, in which no male children are born, in which there is no Veda study, the members of which have on their bodies long and thick hair, that suffers from such diseases as piles, dyspepsia, epilepsy, black and white leprosy. Kullūka remarks that the works on medicine hold that such diseases are inherited and so if such a girl be married the progeny might suffer from these diseases, and thus this prohibition is based on a visible motive. From this a very important conclusion is drawn by dharmaśāstra writers viz. if one while performing a rite or when engaged in any matter acts contrary to a rule that has a seen purpose, the rite or matter does not become invalid or void, while where a rule is based on an unseen or spiritual purpose and it is infringed, the act itself becomes void or invalid. Yāj I. 52 and 53[1629] prescribe among other things that the bride to be chosen by a man must be free from (incurable) diseases, must have a brother living, must not be a *sapiṇḍa* of the bridegroom or must not have the same *gotra* or *pravara* as that of the bridegroom. On this the Mit. remarks that if a man marries a girl who is suffering from an incurable disease, the marriage is valid, only he does an act which runs counter to seen results (i. e. he may suffer the consequence that

I. 3. 4 p 158 says, 'दृष्टे संभवत्यदृष्टकल्पनमयुक्तमिति न्यायस्य'; यत्र तु भीत्युपलब्धितः प्रवृत्तिर्न तत्र शास्त्रमस्ति । आप ध सू. I. 4. 12 11.

1629. अविप्लुतब्रह्मचर्यो लक्षण्यां स्त्रियमुद्वहेत् । अनन्यपूर्विकां कान्तामसपिण्डां यवीयसीम् । अरोगिणीं भ्रातृमतीमसमानार्षगोत्रजाम् ॥ या. I. 52-53, सपिण्डासमानगोत्रासमानप्रवराह भार्यात्वमेव नोत्पद्यते । रोगिण्यादिषु तु भार्यात्वे उत्पन्नेपि दृष्टविरोध एव । मिताक्षरा

his children may be diseased), but if he goes through a ceremony of marriage with a girl who is a sapiṇḍa or of the same gotra or pravara there is no valid marriage and the girl is not his legal wife. No clear visible purpose can be associated with the prohibition against marrying a sapiṇḍa or sagotra girl; hence there must be a spiritual purpose in that prohibition and so if one infringes it the act itself (viz. marriage) becomes void.[1630]

The Tantravārtika of Kumārila has as usual a very long note on this discussion. He does not see eye to eye with Śabara. He says[1631] that the Mīmāṃsā is concerned with the investigation of dharma, that śruti is the prime authority in matters of dharma, that Mīmāṃsā has concern with smṛtis only so far as their authoritativeness in matters of dharma goes, that just as agriculture and the like are not discussed in Mīmāṃsā works because they have a purely secular purpose, so all acts that men do for a visible worldly purpose have no bearing on the investigation of dharma and that therefore the bhāṣyakāra (Śabara) was not quite right in saying that such practices as rising to receive an old man or a teacher have a visible purpose and are authoritative on that ground. He further remarks that visible and invisible or spiritual purposes are often inextricably mixed up. When the Veda prescribes 'he pounds the grains of paddy' or enjoins a sacrifice like the Kārīrī for bringing down rain, there is a visible purpose therein (e.g. the rice grains have to be freed from husk before boiled rice for oblations can be prepared). So even when an act has a seen purpose it may still have Veda as the basis; so also an act such as rising to show respect to a teacher may have a seen result (such as the teacher being pleased teaches the pupils with enthusiasm) as well as an unseen result (viz. completion of Veda study without obstacles). Therefore he argues that all

---

1630. In a very recent case (*Madhavrao v. Raghavendrarao* 48 Bom L. R. 196) the Bombay High Court has expressed doubts about the logic or reasonableness of this doctrine of the Pūrvamīmāṃsā in relation to marriages of sagotra parties

1631 दृष्टार्थत्वादेव प्रामाण्यमिति। एतदयुक्तम्। धर्मं प्रति यतोऽयं प्रामाण्य मस्मृत स्मृतेः। तस्मात्कुण्यादिवत्तेषामुपन्यासो न युज्यते॥ न हि यावत्किञ्चिदाचरण तस्य सर्वस्य मूलमिह प्रमाणीक्रियते। धर्मजिज्ञासाधिकारात्। यदि च गुर्वनुगमनादीनां केवलं दृष्टार्थत्वमेव स्यात्ततः कुण्यादिवद्धर्मं प्रत्यप्रामाण्यमेवेति नोपन्यसितव्यः।.. न चावश्यतादीनां वृष्टिकाम-यागादीनां च दृष्टार्थानामवैदिकत्वम्। तन्त्रवार्तिक pp. 165-166.

smṛtis[1632] are authoritative according to the purpose they serve, that whatever portion of the smṛtis is concerned with *dharma* and *mokṣa* (final release from saṁsāra) has its origin in the Veda and whatever is concerned with wealth and the satisfaction of desires (*artha* and *kāma*) is based on worldly practices. In this way are to be explained the didactic portions of the Mahābhārata and the Purāṇas, the episodes in these being useful as *arthavādas* (eulogies of what are prescribed as religious duties), the description of the several divisions of the earth being useful for indicating what countries are suitable for the performance of dharma and the enjoyment of its rewards and being based partly on Veda and partly on direct experience. Similarly the auxiliary lores (*aṅgas*) of the Veda (such as phonetics, grammar, metrics &c.) are partly based on the Veda and partly on worldly experience. Mīmāṁsā and Nyāya (logic) are necessary for the correct interpretation and understanding of the Veda (as stated by Manu in XII. 105–106) He is even prepared to concede that systems[1633] like the Sāṅkhya (which postulates a prime cause of the world called *Pradhāna*), or Vedānta (which postulates Puruṣa as the cause of the world), the theory of atoms (propounded by Kaṇāda) serve the purpose of explaining the creation and dissolution of the world, lead one to understand how the performance of sacrifices gives rise to the subtle *apūrva* which leads on to heaven and also exemplify how human effort and fate have their own spheres of operation (i. e without human effort the world is produced and in spite of human effort it may be dissolved). Kumārila goes a step further and states that even the Buddhist philosophies of *vijñāna* (cognitions being the only reality), of the non-existence of the soul or of eternal flux arise from the arthavāda

passages of the Upanisads and serve the purpose of inducing men to give up extreme attachment to sensual pleasures and therefore may be useful in their own way. He winds up by saying that in the case of all knowledge or works wherever the result (or reward) of the course laid down in them is to take place in the future and there is no possibility of experiencing its happening in the present such work may be deemed to be based on the Veda; but where, as in the science of medicine, the result can be seen taking place in other people, that knowledge is authoritative only because of the visible result.

This discussion about smrtis based on the Veda or on perceptible purposes or motives is taken up in the digests on dharmaśāstra For example, Aparārka[1634] (pp. 626–627) quotes long passages from the Bhavisyapurāna dividing the contents of smrtis into five categories and exemplifying that division, viz. (1) those based on a visible purpose or motive, (2) those based on unseen or spiritual motives or purposes, (3) those based on both visible purposes and unseen or spiritual purposes, (4) those based on reasoning, (5) those that merely re-iterate what is already well-known or determined. All these except the first variety are based according to the Bhavisyapurāna on the Veda. The examples of the five kinds given by the same Purāna are respectively as follows: (1) the smrti (viz. Arthaśāstra or Dandanīti) in which there is a discussion about six gunas (*sandhi* &c), the four upāyas (*sāma, dāna* &c), the various superintendents of state departments (*adhyaksa*) and of *kantakas*, (2) the prescription that one should perform the *sandhyā* worship or that one should not partake of dog's flesh; (3) a *brahmacārin*

1634. तथा च भविष्यपुराणम् । दृष्टार्था च स्मृतिः काचिदृष्टादृष्टार्था तथा परा। दृष्टाद्दष्टार्थरूपाऽन्या न्यायमूला तथापरा। अनुवादस्मृतिस्त्वन्या शिष्टैर्दृष्टा तु पञ्चमी। सर्वा एता वेदमूला दृष्टार्थी(र्थाः?) परिहृत्य तु ॥ षाड्गुण्यस्य यथायोगं प्रयोगात्कार्यगौरवात्। (प्रयोगः कार्य-?) । सामादीनामुपायानां योगो व्यासमतासत ॥ अध्यक्षाणां च निक्षेपः कण्टकानां निरूपणम् । दृष्टार्थेयं स्मृतिः. भोक्ता ऋविभिर्गरुडाग्रज ॥ सन्ध्योपासनं सदा कार्यं शुनो मांस न भक्षयेत् । अदृष्टार्था स्मृतिः. भोक्ता ऋविभिर्ज्ञानकोविदैः । पालाशं धारयेद्दण्ड-मुभयार्थं विदुर्बुधाः । विरोधे तु विकल्पः स्याज्जपहोमश्रुतौ यथा ॥ श्रुतौ दृष्टं यथा कार्यं स्मृतौ न सदृशं यदि । अनूक्तबादिनी सा तु पारिव्राज्यं यथा गृहात् ॥ अपरार्क pp 626-627, मित्रमिश्र in his comment on या I. 3 quotes the first two verses and in his परिभाषाप्रकाश p 19 quotes all कुल्लूक on मनु III. 7 quotes from the भविष्य० the half verse 'सर्वा ... दृष्टार्थाः परिहृत्य तु'. The स्मृतिच्च II. p 24 quotes from भविष्य० the two verses षाड्गुण्यस्य ... गरुडाग्रज and remarks 'दृष्टार्थाया स्मृतेरुदाहरणमेतत् । एवं च सन्धिविग्रहादि दृष्टार्थविषया स्मृतिरर्थशास्त्रमित्यर्थः ।'; should we not read 'स्मृतौ च सदृशं'?

should carry a staff of *palāśa* (the staff serves for one's protection, which is a seen purpose, but that it should be of palāśa and of no other tree is based on an unseen motive); (4) when one text declares that *homa* should be performed after sunrise and another declares that it should be performed before sunrise, reasoning requires that there should be an option (vide Manu II 15), (5) when Manu declares (in VI 38) that a brāhmana should leave home to become a wandering ascetic he simply re-iterates what is laid down in such Vedic passages as Br Up. III 5 1 (vyutthāyātha bhiksācaryam caranti) or Jābāla Up 4.

In I. 3. 5–7 Jaimini as interpreted by Śabara[1635] deals with the topic of the authoritativeness of certain usages laid down in the smṛtis in relation to Vedic rites. Śabara states: *śiṣṭa*s say that religious rites should be performed after sipping water (i. e. after *ācamana*), one should wear the sacred thread in the *upavīta* way in the worship of gods, one should do with the right hand all religious acts The question is whether these acts should be done if not opposed to the śruti or should not be performed if opposed to what is taught in the Veda. The *pūrva-pakṣa* view is that these acts should not be done because they run counter to the sequence of the acts laid down in the Veda. For example, the Veda says, 'after getting ready a bundle (or handful) of kusa grass called *veda* one should prepare the *vedi* (altar)' Here the preparation of the vedi is declared to follow immediately after the getting ready of a handful of kuśas. If after the handful is got ready a man has a sneeze he has according to Manu V 145 and Vas III 38 to sip water before going on with the preparation of the *vedi*. This would be against the sequence (*krama*) of acts laid down in the Veda. Strangely enough Mr. K L Sarkar in T.L.L (on Mimāmsā rules) translates the words 'vedam krtvā vedim karoti' as 'make the vedi and

1635 शिष्टाकोपेऽविरुद्धमिति चेत् । न शास्त्रपरिमाणत्वात् । अपि वा कारणग्रहणे प्रयुक्तानि प्रतीयेरन् । जै I. 3 5–7 . आचान्तेन कर्तव्यं यज्ञोपवीतिना कर्तव्य दक्षिणाचरेण कर्तव्यमित्येवंलक्षणानि उदाहरणानि । किमेतानि श्रुतिविरुद्धानि न कर्तव्यानि उताविरुद्धानि कार्याणि चेत्पश्यासे तैरप्यनुष्ठीयमानैर्वेदिर्क किंचिन्न कुप्यति तस्मादविरुद्धानीति । नैतदेवम् । शास्त्रपरिच्छिन्नं हि क्रम बाधेरन् । कथम् वेदं कृत्वा वेदिं कुर्वीतेतीमा श्रुतिमुपरुन्ध्यादन्तरा वेदं वेदिं चानुष्ठीयमानमाचमनादि । शबर ; तेष्वदर्शनाद्विरोधस्येति वा समाप्ते । . अपि वा कारण हृद्द यस्मादेषु न गृह्यते । तस्मान्नाचमनादीनां क्रतुश्रुतिविरुद्धता ॥ तन्त्र p 198 कुमारिल says that the 7th sūtra should end with the words 'तेष्वदर्शनाद्विरोधस्य,' which may also be taken as part of the 8th sūtra and relies on the maxim of the crow's eye The words प्रयुक्तानि प्रतीयेरन् mean 'शिष्टैरनुष्ठितानाचमनादीनाद्रियेरन् '.

then recite the vedas' (p. 241), thereby committing two mistakes He misunderstands the word 'veda' which in this passage only means a 'handful of kuśas' and inverts the sequence of the acts denoted by the gerundial termination 'tvā'. On account of these two mistakes the discussion on pp 240–242 is misleading and obscure If a man were to do the things required in a vedic rite with both hands, he would be able to do them quickly The smrti rule that every religious act should be done with the right hand alone interferes with the quick performance of religious acts The established conclusion is that these religious acts (such as ācamana) are performed by the śistas, are prompted by no visible motive (such as covetousness) and are therefore to be looked upon as authoritative, being not opposed to sruti. Kumārila does not like this way of explaining the sūtras, since the instances given by Śabara really do not deserve to be put forth as even *prima facie* opposed to Śruti. The Tantravārtika (p. 201) sets out śruti passages wherein the wearing of the sacred thread in the *upavīta* form[1636] (Tai. S. II. 5. 11. 1 and Tai. Ār. II. 1), ācamana (Tai. Ā. II. 11), are enjoined Therefore it explains the sūtras in a different way. It splits up Jai I. 3. 5-7 into two adhikaranas. The first two constitute one topic. The pūrvapaksa[1637] is those precepts of Buddha and other founders of sects, such as the construction of monasteries and parks, the insistence on desirelessness, the practice of meditation, *ahimsā*, truthfulness, restraint of senses, charity and kindness, are such that they are also laid down by the Veda, are not opposed to the ideas of śistas or do not run counter to nor rouse those who know the Veda to anger and therefore they must be held to be authoritative. This is denied by saying that the Bauddha doctrines even on the abovesaid matters are not to

1637. सूत्राणि तु पूर्वाधिकरणाक्षेपपरिहारसूत्रत्वेनैव व्याख्यातव्यानि । यत्तर्हि वेदविहितं न बाधते शिष्टान् वा वेदविदो न कोपयति विहारारामभण्डलकरणवैराग्य-ध्यानाभ्यासाहिंसा-सत्यवचन-दम-दान-दयादि तद्दुरुद्धादिभावितं प्रमाणेनाविरुद्धमिति चेत् । न । शास्त्रपरिमाणत्वात् । परिमितान्येव हि चतुर्दशाष्टादश वा विद्यास्थानानि धर्मप्रमाणत्वेन शिष्टैः परिगृहीतानि वेदोपवेदाङ्गोपाङ्गाष्टादशधर्मसंहिता पुराणशास्त्रशिक्षादण्डनीतिसंज्ञकानि, न च तेषां मध्ये बौद्धार्हतादिग्रन्थाः स्मृता गृहीता वा । . . तेन ... सन्मूलमध्यहिंसादि श्वदृतिनिक्षिप्तक्षीरवद्दुष्टपर्यायविभ्रम्भणीय च तन्मात्रोपलब्ध भवतीत्यवश्यं यावत्परिगणितधर्मशास्त्रेभ्यो नोपलभ्यते तावदग्राह्यं भवति । तन्त्र० pp. 201–203, vide n. 1620 above.

be accepted as authoritative since only a limited[1638] number (14 or 18) of vidyās (the four vedas, the upavedas, the angas of the veda, the 18 smrtis, purānas, Dandanīti) have been accepted by the vedic sistas as authoritative on matters of dharma and the works of the Bauddhas and Jainas are not included therein Just as milk though originally pure becomes useless and unreliable when put into a bag of dog-skin, so the doctrines of Bauddhas such as ahimsā, though based on truth, are useless and are not authoritative in themselves for the followers of the Veda.

The Tantravārtika holds that Jai. I. 3. 7 is an adhikarana by itself and is concerned with the authoritativeness of *sadācāra* (the customs and usages of śistas). Its position is that those usages are authoritative that are not opposed to express Vedic texts, that are practised by Vedic śistas under the belief that they are right conduct (dharma) and for which no visible motive (such as pleasure or the satisfaction of desires or the acquisition of wealth) can be predicated. Śistas are those who perform the religious acts expressly enjoined by the Veda They are not so called because they practise what is said to be sadācāra; otherwise there will be an argument in a circle (in the form 'sadācāra means what is practised by śistas and śistas are those who practise sadācāra'). The practices traditionally handed down from generation to generation which are observed by sistas (as stated above) with the idea that they constitute a part of dharma must be regarded as dharma and as leading to heaven[1639] Practices do not become authoritative by the mere fact that no such motive or purpose can be postulated for them, but they become so only when they are observed by sistas as

---

1638. Vide Yāj I 3 for the 14 Vidyāsthānas For the four upavedas which raise the number to 18 vide n 17 p 10 above Acc. to the Nyāyasudhā (p 183) Āyurveda, Dhanurveda, Gāndharvaveda and Arthaśāstra are four Upavedas, Mimāmsā and Nyāya (logic) are two upāngas, śiksā (not the Vedānga on phonetics) is separately mentioned because there are works on phonetics like that of Kātyāyana laying down special rules for distinct śākhās Dandanīti is the same as Arthaśāstra

1639. दृष्टकारणहीनानि यानि कर्माणि साधुभिः । प्रयुक्तानि प्रतीयेरन् धर्मत्वेनेह तान्यपि ॥ शारीरश्रमतो यानि सुखार्थं वा प्रयुञ्जते । अर्थार्थं वा न तेष्वस्ति शिष्टानामेव धर्मधीः ॥ धर्मत्वेन प्रयुक्तानि शिष्टैर्यानि तु कानिचित् । वैदिकैः कर्तृसामान्यात्तेषां धर्मत्वमिष्यते ॥ ... नैव लेषा सदाचारनिमित्ता शिष्टता मता । साक्षाद्धितकारित्वाच्छिष्टत्वे सति तद्वच. ॥ न पक्षवेदविहितधर्मक्रियया हि लब्धशिष्टत्वसम्पदेशा यत्परम्पराप्राप्तमन्यदपि धर्मबुद्ध्या कुर्वन्ति तदपि रागप्रत्याद्धर्मसम्पदमेव । तन्त्रवार्तिक pp 205-6

part of dharma. The Tantravārtika (p. 205) gives certain illustrations of such practices viz gifts, *japa*, mātryajña (offerings to the mother Goddesses), the festival of Indra's banner, fairs held at temples, fasts by maidens on the 4th day of a month, gifts of lamps on the first day of Kārtika, the spring[1640] festival on the first day of the dark half of Phālguna &c The Tantravārtika is careful to point out that many activities such as agriculture, menial service or trade that are the means of securing wealth and pleasures and that give rise to several fixed and varying acts and also such actions as eating sumptuous food, drinking, sleeping on soft beds, possessing a charming house and garden, engaging in painting, singing and dancing, enjoying the fragrance of sandalwood and flowers, all of which are common to *mlecchas* and *Āryas*, are not deemed by any one to be part of dharma and that it does not follow that, because a few actions (of sistas) are accepted as dharma, all their actions are to be looked upon as dharma[1641] In ordinary life certain practices only are deemed to be śistācāra, while there are certain other acts that are common to all human beings (including sistas), but are not so regarded Certain practices such as worship of gods and honouring brāhmanas are seen to be common among all people and yet do constitute dharma, because that is deemed to be so by the śistas. Those practices alone are dharma that are observed by śistas only as obligatory on them and not other practices that are common to all beings The Trantravārtika then refers to the Dharma-

---

1640. For the festival called Indramaha, vide H of Dh. vol II pp 825–826 The spring festival was one in which on the first day of the dark half of Phālguna people went about drenching each other in ordinary or coloured water discharged from syringes and the like 'फाल्गुनकृष्णप्रतिपदि क्रियमाणः परस्परजलसेकः वसन्तोत्सवः' मयूखमालिका on शाबरदीपिका on जै. I. 3. 7 Modern practice combines this with the lighting of bonfires on the Full moon of Phālguna The mythical origin of होलिका of modern days on the Full moon day of Phālguna is described in भविष्यपुराण (उत्तरपर्व chap 132)

1641 यानि तु म्लेच्छादिसमानानि नियतानियतक्रियान्तराण्यर्थसुखसाधनकृषिसेवा-वाणिज्यादीनि सुष्टाक्षपानमृदुशयनासनरमणीयगृहोद्यानालेख्यगीतचूर्ण्यगन्धपुष्पादिकर्माणि प्रसिद्धानि तेषु नैव कस्यचिद्धर्मत्वाशङ्कास्तीति न तत्सामान्यतो दृष्टेनेतरनिराकियोपपत्तिः केषाञ्चिद्धा धर्मत्वाभ्युपगमात् सर्वेषामेव तत्प्रसङ्गः । किं तु-देवब्राह्मणपूजादि यत्तेषामपि किञ्चन । तच्चेष्टमेव धर्मत्व शिष्टाचारमत हि तत् ॥ लोके हि कश्चिदाचार शिष्टत्वेन विशिष्यते । कश्चिच्तु प्राणिसामान्यमासस्तैरपि सङ्गतः ॥ तत्र य कार्यरूपेण शिष्टानेवानुवर्तते । स एव केवलो धर्मो नेतरः प्राणिमात्रगः ॥ तन्त्र p 206, यो हि सदाचार पुण्यबुद्ध्या क्रियते स धर्मादर्शत्वं प्रतिपद्यते । यस्तु कामक्रोधलोभमोहशोकादिहेतुत्वेनोपलभ्यते स यथाविधिमति-क्रेयं वर्तिष्यते । तन्त्रवार्तिक p 208

sūtra[1642] of Gaut. (I. 3) and Āp. Dh. S. (II. 6. 13. 7–8) which say that ancient (or great) men in several instances were guilty of transgressions of dharma and of committing desperate acts, that on account of their spiritual merit they did not incur sin, but if a man of later days were to follow them in the same acts he would sink into hell It then gives twelve instances of lapses from good conduct (attributed even to *avatārs*) that were transgressions and either explains them away or says that they were due to wrath, hatred or other passions, were not intended by the authors (of those acts) themselves to be dharma and are not to be looked upon as śistācāra by modern men. The instances are: (1) Prajāpati who is said to have approached Usas, his daughter (Śat. Br. I. 7 4. 1 or Ait Br. 13 9); (2) Indra, who is described as the paramour of Ahalyā (in the Subrahmanyā litany); (3) Nahusa, who occupied the position of Indra, made approaches to Śacī, the wife of Indra (Udyoga, chap. 13 ff) and was transformed into an *ajagara* (Boa Constrictor) ; (4) Vasistha, who when his 100 sons were devoured by a demon, was so struck with grief that he threw himself bound into the Vipāsā river(Nirukta IX.26, Ādiparva chap 177 1–6 = cr. ed. 167. 1–6, Vanaparva 130. 8–9, Anusāsana 3 12–13); (5) Purūravas who thought of dying by hanging or by being devoured by wolves (Ṛg. X. 95. 14, Śat Br. XI. 5. 1–8) when separated from Urvaśī; (6) Viśvāmitra, who officiated as priest at the sacrifice of Triśanku that had become a cāndāla through a curse (Ādiparva 71. 31–33); (7) Yudhisthira who took Draupadī as wife although she had been won by his younger brother Arjuna by his skill in archery and who prevaricated in order to bring about the death of his brāhmana teacher Drona (Dronaparva 190 55); (8) Krsna Dvaipāyana (Vyāsa), who thought himself a perpetual student, procreated by *niyoga* at the request of his mother Satyavatī two sons on the widows of his brother Vicitravīrya; (9) Bhīsma who lived on without belonging to any (of the four) āśramas and who is said to have performed several Asvamedhas though he had no wife; (10)

1642 दृष्टो धर्मव्यतिक्रम साहस च महताम् । अवरदौर्बल्यात् । गौ. I 3–4 ; दृष्टो · साहसं च पूर्वेषाम् । तेषा तेजोविशेषेण प्रत्यवायो न विद्यते । तदन्वीक्ष्य प्रयुञ्जानः सीदत्यवरः । आप ध सू. II 6 13 7–9. भागवतपुराण X (पूर्वार्ध 33. 30) has a verse to the same effect.

Rāma who performed Aśvamedha accompanied by a golden image of Sītā ; (11) Dhrtarāstra, though blind, *performed sacrifices*; (12) Vāsudeva and Arjuna are described as being drunk and as having married Rukminī and Subhadrā respectively who were their maternal uncle's daughters (such marriages being forbidden). Kumārila, like a modern comparative mythologist, explains (Tantravārtika p. 208) that Prajāpati means 'the Sun' who approaches (i e. rises after) the Dawn. This explanation is as old as the Ait Br. 13. 9 where it is said that there are two views viz. it is either 'Heaven' or 'Usas' that is meant by the word 'daughter.' Similarly Indra and Ahalyā respectively mean the Sun and the Night and *jāra* means literally 'one who makes to disappear or wither away' (*and not paramour*) in that passage. Vide H. of Dh. vol. II. p. 1145 note 2550 for the epithet 'Ahalyāyai jāra' in the Veda and quotation from Tantravārtika The story of Ahalyā and Indra varies in its details in the epics. Vide Rāmāyana I. 48, Udyoga 12. 6 These two are instances of transgression of dharma (dharma-vyatikrama) and the next case of Vasistha is an example of *sāhasa* (through sorrow) Kumārila says that Viśvāmitra was prompted by his hatred of Vasistha and his pride, that the sin accruing from his act would be neutralized by his great austerities. So his actions cannot serve as a model for imitation by others. Vyāsa, who was a son of Satyavatī *from* Parāśara when she was a maiden, had Vicitravīrya as (his uterine) brother after Satyavatī married Śantanu. In the case of a brahmacārin, sexual intercourse is most reprehensible (vide H of Dh. vol. II. p 374)[r] But Vyāsa agreed to *niyoga* because of his regard for his mother, as allowed by Gaut 18 4–5. Kumārila adds that Vyāsa could do so on account of his great past and future austerities, that another person with similar qualifications may do so even in spite of all prohibitions, since the Mahābhārata (Āsramavāsika 30. 24) says 'sarvam balavatām pathyam' (to the strong everything is wholesome or allowable) He gives an apt illustration. An elephant can devour branches of trees without harm, but others doing so would meet death. Daksa V.10 prescribes 'anāśramī na tistheta ksanamekamapi dvijah' (a twice-born person should not stay even for a moment unattached to some āśrama). Bhīsma remained unmarried out of filial devotion to his father and Rāma could not think of another wife as he was so much attached to Sītā. Kumārila boldly asserts that Bhīsma had a wife only for the purpose of the sacrifices he performed (though this is mentioned in no Itihāsa or Purāna) and *relies upon the*

mode of proof called *arthāpatti* for this[1643]. His words are given below. This and some other explanations offered by Kumārila shed a very interesting light on the theological apologetics of Mīmāmsakas. Vide H. of Dh. vol. II. pp. 558 and 684 for Rāma and the golden image of Sītā As to Yudhisthira's bringing about the death of his brāhmana teacher the explanation is that the former performed Aśvamedha after the end of the war by way of prāyaścitta (vide H. of Dh. vol. II p. 147 n 333 and pp. 1236-37 notes 2674-75 for Aśvamedha as the re mover of all sins). As to Draupadī being the wife of five brothers Kumārila quotes Ādiparva 198. 14 (=or ed. 190 14) and offers several explanations (p 209), the most astounding being that there were five wives of the five brothers who were so similar that they were all referred to as one. As the Nyāyasudhā (p. 194) remarks, these various explanations were offered to show off great resourcefulness of interpretation (parihāra-vaibhavārtham), the proper one being that the practice of the Pāndavas was an evil one and was not to be imitated. A blind man could not perform sacrifices and was exoluded from inheritance. Vide H. of Dh. vol. II. p. 157 n. 369 and vol. III. p 609 n 1154. But Kumārila says that as Dhrtarāstra was blessed with sight for a while and saw his deceased sons through the miraculous power of Vyāsa (Āsramavāsiparva chap. 32-37) he might have been endowed with sight at the time of the sacrifices or what is meant is that he made gifts which are spoken of as sacrifices. As regards Subhadrā, Kumārila asserts that in spite of the fact that Subhadrā was said in the Ādiparva (219. 18 = cr. ed 211. 18) to have been the *daughter* of Vasudeva and *sister* of Krsna, she was really the daughter of Krsna's step-mother's sister or the daughter's daughter of the sister of his step-mother's father (a female cousin being often called a sister among the Lātas). Vide H. of Dh. vol. II. pp. 459-460 and notes to my edition of the text of V. Mayūkha (pp. 200-202). Krsna's marriage with Rukminī is to be similarly explained. It is somewhat surpris-

1643 लोभाद्यभिभवात्सम्भिदितानर्थादर्शनेनाधर्माचरण धर्मव्यतिक्रमः । दृष्टस्याप्यनर्थस्य बलवर्पणानादराद्धर्माचरणं साहसम् । न्यायसुधा p 185, भ्रातृणामेक .. मनुरब्रवीत् (मनु ९, १८२) — इत्येव विच्चिद्वर्षक्षेत्रजपुत्रलब्धपित्रृणत्व केवलयज्ञार्थपत्नीसम्बन्ध आसीदित्यर्थापत्त्यानुक्तमपि गम्यते । यो वा पिण्ड पितु. पाणौ विज्ञातेपि न दत्तवान् । ज्ञात्वार्थातिक्रमाद्भीतो यजेतैकाक्रयसौ कथम् ॥ तन्त्र. p 208, अथवा बहूरय एव ता. सदृशरूपा द्रौपद्य एकस्वेनोपचरिता इति व्यवहारार्थापत्त्या गम्यते । तन्त्र p 209. एवमर्जुनस्य मातुलकन्याया: सुभद्राया. परिणयेपि सुभद्राया वसुदेवकन्यात्वस्य साक्षात् क्वचिदप्यश्रवणात् । मीमांसाकौ. p 48; but in the Ādiparva 219 18 Subhadrā is expressly stated to be the *daughter* of Vasudeva ' दुहिता वसुदेवस्य वासुदेवस्य च स्वसा '.

ing that Khandadeva states that it is nowhere found that Subhadrā was the daughter of Vasudeva Probably he had a corrupt reading of the Mahābhārata passage before him As to the charge of drinking spirituous liquor (*ubhau madhūśāvakṣībau* in Udyogaparva 59. 5) against both Vāsudeva and Arjuna, they were both ksatriyas and only brāhmanas were prohibited from drinking any kind of intoxicating drink (Gaut II. 25), while to ksatriyas and vaiśyas two kinds of wine called madhu (liquor from honey or madhuka flowers) and sidhu (rum) were allowed and only paistī (spirituous liquor distilled from flour) was forbidden (by Gaut. II. 25, Manu XI. 93-94).

Kumārila offers some other explanations of Jai[1644] I 3 5-7 which need not be set out here.

Kumārila mentions certain practices of his times and conoludes that they are to be condemned and not to be followed or regarded as authoritative. He says:[1645] even in these days brāhmana women of Ahicchatra and Mathurā drink wine; northerners (northern brāhmanas)' engage in such transactions as the gift and sale of horses and mules that have a mane, asses,

---

1644. जै I. 3. 7. will have to be read as 'अपि वा कारणाग्रहणे प्रयुक्तानि प्रतीयेरन् तेष्वदर्शनाद्विरोधस्य' acc. to Kumārila, Khandadeva and others if Sabara's interpretation of the sūtra is to be accepted. 'तेषु आचमनादिषु क्रमादिविरोधस्यादर्शनादवैदिकमणीतत्वरूपामाण्यकारणस्याग्रहणे शिष्टे प्रयुक्तानि आचमनादीनि प्रमाणत्वेन प्रतीयेरन्निति सूत्रार्थः । एवं भाष्यकारेणाधिकरणार्थ उपपर्णित ।' मीमांसाकौस्तुभ on I. 3 7 p. 36 Kumārila implies a pūrvapaksa and holds that I. 3. 7 is the sūtra giving the final conclusion only and as an independent adhikarana by itself.

1645. अद्यत्वेप्यहिच्छत्रमथुरानिवासिब्राह्मणीना सुरापानम् । केसर्यश्वाश्वतरखरोष्ट्रेभयदहानप्रतिग्रहविक्रयव्यवहारभार्यापत्यमित्रसहभोजनाद्युदीच्यानाम् । मातुलदुहितृग्रहणसन्दीस्थभोजनादीनि दाक्षिणात्यानाम् । मित्रस्वजनोच्छिष्टसृष्टभोजनं सर्ववर्णपरस्परगृहता म्लादनतद्वसानानाचमन—निर्णेजकधौतवर्दभारूढवस्त्रपरिधान-ब्रह्मण्यपातिरिक्तमहापातककार्यपरिहरणादीन्युभयेषाम् । अतिस्थूलानि प्रतिपुरुषजातिकुलावस्थितसूक्ष्मसदृशधर्म्यणि क्रमणानि त्वनन्तभेदानि सर्वविज्ञानहेतुदर्शनानि च प्रायेणैव संभवन्तीति नवंजातीयकमिश्रसदाचारधर्मत्वाद्व्यवसानसम्भव । तन्त्र. p 204. अहिच्छत्र is modern Ramnagar in Rohilkhand Vide JRAS for 1903 p. 292. The form अहिच्छत्रा occurs in a Pabhosa Inscription (E I. vol. II. at p 243) For the different views about मातुलसुतापरिणयन vide H. of Dh. vol. II pp 458-463 Kullūka on Manu XI 95 notes that certain commentators held that the prohibition against drinking in the case of brāhmanas did not apply to brāhmana women. Vide H. of Dh. vol. II. p. 765 for सहभोजन with wife and children and pp. 181 and 839 about gift and sale of horses and animals with two rows of teeth, where Tai S. II. 2. 6. 3 and II. 3. 12. 1. and Jai. III 4. 28-31 are cited.

camels and animals with two rows of teeth and eat from the same plate with their wives, children and friends; brāhmanas of the south enter into matrimony with the maternal uncle's daughter and take their meals while seated on a couch (of wicker work); both (brāhmanas of the north and south) take cooked food (kept in pots) that remains after their friends or relatives have partaken of it or that has been touched by them (at the time of eating); they chew betelnut leaves that have been touched by persons of all varnas, do not perform sipping of water (*ācamana*) at the end of the chewing of betelnut, wear clothes washed by washermen and brought on the back of asses; they do not avoid contact even with persons guilty of grave sins (except of brāhmana murder). There are everywhere an infinite number of very obvious transgressions of the subtle dictates of dharma laid down for each man, caste or family, that (transgressions) are contrary to śruti, smrti and each other and that have a visible purpose behind them. It is not possible to regard such practices as authoritative' Similarly Varadarāja, (1600–1660 A. D.) a pupil of Bhattoji Dīksita, in his work styled the Girvānapadamañjarī in a dialogue between a Kānyakubja brāhmana and a *sannyāsin* hailing from Vijayanagara makes the brāhmana host say that each country has certain practices which are *durācāras* such as marrying a maternal uncle's daughter in the south, marriage of girls among southerners even before they are four years old, sitting down to a meal without bathing in Karnātaka, in Mahārāstra the marriage of a younger brother before an elder one, in the hilly country the practice of *niyoga* (*vide* Mr. P. K. Gode's interesting paper in 'Bhāratiyā-vidyā' vol VI pp 27–30).

According to Śabara, Jaimini in I. 3. 8–9 deals with certain words like *yava, varāha* and *vetasa*, that have different significances among Āryas and Mlecchas (and therefore these sūtras constitute what is called yavavarāhādhikarana). But Kumārila does not like this view of Śabara and proposes another topic for these two sūtras, viz. the relative strength of smrti and sadācāra where they are in conflict. Here there are three[1646] possible

1646. तेनाचारबलीयस्त्व समत्वं वेह युज्यते। स्मृतीनां वा बलीयस्त्वं शास्त्रस्था वेति वर्ण्यते ॥ उभयो श्रुतिमूलत्वं न स्मृत्याचारयोः समम्। सप्रत्ययप्रणीता हि स्मृतिः सोपजिबन्धना ॥ तथा सुदृष्टमानं हि निर्विघ्नमुपजायते। आचाराच्च स्मृतिं ज्ञात्वा श्रुतिर्विज्ञायते ततः ॥ तेन दुरन्तरितं तस्य मामाप्यं विभक्ष्यते। ... .. तेनाचारः स्मृतिं यावदनुमातुं प्रवर्तते। स्मृतिर्लब्धश्रुतिस्तावद्भमेनेवावधारयेत् ॥ तस्मादाचारेभ्यः स्मृतिर्बलीयसी सन्निबन्धनेति। तन्त्र pp 220–221.

views, viz. that both are equally strong and so there is an option in case of conflict, that ācāra is stronger, that smrti is the stronger of the two The prima facie view is that both are equally strong, since smrti and sadācāra are both inferred to be based upon Veda. Kumārila's own final conclusion is that smrti is of greater force than ācāra, that is, where they come in direct conflict smrti should prevail. His position is that, though both smrti and ācāra are to be deemed to be based on Veda, there is a difference between the two. People have full faith in such smrtis as that of Manu and Manu and others are believed to have been inspired sages and are the propounders of the rules of dharma scattered about in various Vedic śākhās, while the same cannot be said about modern men and their practices cannot claim or possess the same weight and allegiance that the practices laid down by Manu and other sages can. From the practice of śistas one may infer a smrti as the root thereof and then further one may infer a śruti as the root of the smrti. Therefore ācāra is removed by two stages from the Veda, while smrti is removed only by one stage from the Veda. Hence Kumārila says that in case of conflict smrti should prevail over ācāra. The practices that are discussed here (acc. to Kumārila, Pārthasārathi and others) are such as the marriage with a maternal uncle's daughter or with a paternal aunt's daughter and the like that are in vogue among certain people and that are yet opposed to smrtis (such as Manu XI. 171–72) and for which a visible motive can easily be found (*kāmādihetvantaram spastameva dṛśyate*, as the Śāstradīpikā says).

Kumārila gives another (and so a third) explanation of Jai. I 3. 8–9 [1647] which need not detain us here.

1647. समा विप्रतिपत्ति. स्यात् । शास्त्रस्था वा तन्निमित्तत्वात् । जै I. 3. 8–9 Acc to कुमारिल here शास्त्र means स्मृति, while acc. to Sabara's gloss शास्त्रस्था means क्षिप्ताः. Sir G. Jha in 'Pūrvamīmāmsā in its sources' p. 226 translates 'giving and accepting in gift and buying and selling lions, horses'. केसरिन means 'a lion' also, but it is hardly possible to believe that gifts of lions were made to brāhmanas or that they accepted them. केसरि must be taken as an adjective of 'aśva' here. The शास्त्रदीपिका on III 4 34 remarks, तेन यत्र दोषस्तत्रेष्टिः । लौकिके चाश्वदाने न केसरिणो दृक्षतीति प्रतिषेधाद् दोषोस्ति वैदिके तु कर्माङ्गदाने 'विशेषविधानात्तत्प्रतिषेधाप्रवृत्तेर्नास्ति दोष'. This shows that the prohibition against the gift of 'kesarin' refers to the gift of horses. Śabara on Jai VI. 7 4 makes this quite clear when he says that in the Viśvajit where the sacrificer had to make a gift of all his wealth, horses

(*Continued on the next page*)

Jai I. 3. 15–23 constitute what is called Holākādhikarana, or Sāmānyaśrutikalpanādhikarana. The first two and the last two sūtras are the most important. Certain practices[1648] like the Holākā (spring) festival are observed by the easterners, certain others like Āhnīnaibuka (worship of growing Karañja or Arka or other trees as handed down in one's family) by the southerners, and the Udvrsabhayajña (honouring oxen on the Full Moon of Jyestha and making them run a race) by the northerners. The question is whether, in making an inference about these practices being based on Veda, one was to suppose that the inferred Vedic text also should be restricted to the easterners and the like[1649]. The pūrvapaksa view is that the śruti to be inferred as the basis of the respective practices must be deemed to be restricted to certain persons only (such as the easterners i. e. *prācyas* &c.). The established conclusion is that

---

(*Continued from the last page*)

should not be gifted on account of the prohibition contained in 'he does not give *kesarin*'. एष हि विशेषोऽश्वानामन्येभ्यो द्रव्येभ्यो यदेषां दानं प्रतिषिध्यते न केसरिणो ददाति नोभयतोदत प्रतिगृह्णातीति विश्वजित्येव समाम्नायते. The मीमांसाकौ. (pp 60–61) explains the सूत्रः 'अथवाचार एव बलवान् ... तदनङ्गीकरणे तु परं समा विप्रतिपत्तिः भवेत् न तु स्मृतिप्रामाण्यमिति सूत्रार्थ. । सिद्धान्तस्तु स्मृतिशास्त्रस्थैव प्रतिपत्तिर्बलीयसी ।'; on तन्निमित्तत्वात् the न्यायसुधा observes 'तन्निमित्तत्वादिति शास्त्रत्वसामान्येन प्रकृतत्वाद् वेदाख्य शास्त्रं तच्छब्देन परामृश्य श्रुतिमूलत्वं हेतुरुच्यते तच्चोभयोः स्मृत्यधिकरणे प्राप्तं विरोधे पुनरुच्यमानमाचाराणा श्रुतिमूलत्वपरिस्फुरणार्थम्' (p 212)

1648 अनुमानव्यवस्थानात्तत्संयुक्तं प्रमाणं स्यात् । अपि वा सर्वधर्मः स्यात्तन्न्यायत्वाद्विधानस्य । . . कर्मधर्मो वा प्रवणवत् । तुल्यं तु कर्तृधर्मेण । जै. I. 3. 15–23; अनुमानात् स्मृतेराचाराणां च प्रामाण्यमिष्यते । येनैव हेतुना ते प्रमाणं तेनैव व्यवस्थिताः प्रामाण्यमर्हन्ति । तस्माद् होलाकादयः प्राच्यैरेव कर्तव्याः, आह्नीनैवुकादयो दाक्षिणात्यैरेव, उद्वृषभयज्ञादय उदीच्यैरेव । ... अपि वेति पक्षव्यावृत्तिः । एवंजातीयकः सर्वधर्मः स्यात् । कुतः तन्न्यायत्वात् विधानस्य । विधीयतेनेनेति विधानं शब्दः । सोऽनुमीयते स्मृत्या । - तस्मात्सर्वधर्मता विधेर्न्याय्या । शबर; the word अनुमान means लिङ्ग or अनुमापक or कल्पक. The first two सूत्रs may be briefly but closely paraphrased as 'अनुमानस्य कल्पकस्य व्यवस्थितत्वात्प्रमाणमूलभूता श्रुतिः व्यवस्थापकोपपदसंयुक्ता स्यात् । न व्यवस्थितमूलत्वं भवितुमर्हति, अपि तु सर्वधर्मः स्यात् । मूलभूते विधायके वाक्ये सर्वधर्मत्वोपपादकस्य न्यायस्य सत्त्वात्।' मीमांसाकौ pp 100–101. This अधिकरण is called होलाका because the first example to शबरभाष्य refers to the practice of होलाका मेधा. on मनु VIII. 46 refers to उद्वृषभयज्ञ as a practice of the northerners The जै. न्या मा explains. 'वसन्तोत्सवो होलाका । स्वस्वकुलागतं करलार्कादिरथावरदेवतापूजादिकमाह्नीनैवुकशब्देनोच्यते । ज्येष्ठमासस्य पौर्णमास्यां बलीवर्दानभ्यर्च्य धावयन्ति सोयमुद्वृषभयज्ञ ।'

1649. Vide the following remark about the demand for the divine origin of laws and usages from Berolzheimer. "historically political power, legal regulation and customs were popularly conceived as expressions of the Divine Will" (Author's Preface, p. XLIV, in 'the World's Legal Philosophies').

such practices must be deemed to be meant for all, since the general rule about vedic injunctions is that they are applicable to all. The performer specially meant by each Vedic injunction is known in either of three ways,[1650] viz. by capability, by non-prohibition and by the employment of a special epithet or attribute. When it is said '*svargakāmo yajeta*' then only the three twice-born classes are meant, for, they alone are capable of tending the sacred fires and of possessing Vedic learning and a śūdra is not a fit person to whom that injunction can apply. Those who are guilty of grave sins (*patita*) and the impotent are prohibited from performing Vedic rites. When the Veda says '*rājā rājasūyena yajeta*' there is a special attribute of the performer (viz. being a ksatriya) prescribed by the śruti and so no one else can perform Rājasūya. When none of these three exists a Vedic *vidhi* is in general meant for all (*sarvadharma*). The practices of Holākā, Vrsabhayajña and the like should not be held to be restricted to certain countries or people only, but should be inferred to be applicable to all. When a man leaves the east and goes to the south, he may still perform the Holākā festival; while a man from the eastern country itself may not perform it at all. Further the words 'southern, eastern and northern' are relative. A country that is called southern may be to the north of another. Therefore Holākā and other practices are not invariably concomitant with particular countries or peoples. Nor can it be said that those practices require those particular countries for their performance in the way in which śruti expressly requires the Vaiśvadeva rite (one of the four cāturmāsyas) to be performed on a spot that slopes towards the east. The Tantravārtika[1651] points out that persons receive appellations from names of countries on various grounds as being born in a country or as residing therein or as coming from that country or as going to that country. Medhātithi on Manu VIII. 46 says the same.

1650. त्रिधैव ज्ञायते कर्ता विशेषेण प्रतिक्रियम् । योग्यत्वाप्रतिषिद्धत्वविशेषोपपदान्वयैः ॥ तन्त्र. p. 245, यस्माच्छक्तमात्रं पुरुष विधायकवाक्यमधिकरोति नातिरिक्तं विशेषणमपेक्षते तस्मात्तस्य सर्वविषयविधित्वं न्याय्यमित्यर्थः । न्यायसुधा p 246 (explaining तन्त्रयात्वाद् विधानस्य).

1651. सम्बन्धैर्बहुभिर्देशसमाख्या हि प्रवर्तते । निवास-भव-जातत्व-तद्गमनहेतुभिः ॥ तन्त्र. p. 251. The last half refers to Pāṇini IV, 3 89, IV. 3 53, IV. 3. 25, IV. 3. 74 respectively; प्राच्यादिसमाख्यापि व्यभिचारिणी तद्देशगतानामपि केषांचिदनाचरणात् । चिरंविनिर्गतपुत्रपौत्रादीना चासत्यामपि समाख्यायामाचरणात् । तस्मादसति विशेषणे सर्वधर्मत्वमाचाराणा स्मृतीनाम चेति सिद्धम् । शास्त्रदीपिका (at end of Jai. I.3, 23).

The Tantravārtika explains that the first two sūtras are meant to refer to another question also, viz. whether the rules of the grhyasūtras[1652] and of such dharmasūtra works as the sūtra of Gautama are authoritative only as to certain groups or are meant to be authoritative for all He begins by saying that the Purānas, the Manusmrti and Itihāsa (i. e the Mahābhārata) are equally authoritative for all people and then points out that the Gobhila-grhya and Gautama-dharmasūtra are traditionally accepted by the students of the Sāmaveda, that the dharmasūtra of Vasistha is accepted by the students of the Rgveda, the sūtra of Śankha-Likhita by the followers of the white Yajurveda and the sūtras of Āpastamba and Baudhāyana by the followers of the Taittirīya Śākhā. The Śāstradīpikā explains that an author who was a student of the Sāmaveda taught his own work to his pupils who also learned the Sāmaveda under him, that these pupils in their turn taught that work to others and in that way there arose a tradition among the students of the Sāmaveda to study the sūtra of Gautama. Therefore, to say even as to grhya works that they are restricted to particular groups of persons is not correct Similarly in the case of practices there is no epithet or attribute that is common to all those who practise them or which distinguishes those who do not observe them from those that observe them and therefore it is not possible to restrict such practices as Holākā to particular countries or groups of people.

The requisites of valid customs as laid down by the eminent writers of the Pūrva-mīmāmsā school may now be summarised Such customs must be ancient, must not be opposed to the express texts of the Veda or of smrti, must be such as to be regarded as obligatory by the sistas and must be observed

by them with the consciousness that they are so, they must not have a seen or visible purpose, and they must not be immoral[1653]. It has to be remembered that the pūrvamīmāmsā writers did not lay down anything about the binding character of usages that were peculiarly secular but restricted their remarks to customs and usages that had more or less an unseen or spiritual purpose Khandadeva emphasizes this by stating 'only those customs can be deemed to be based on the Veda that are not opposed to the Veda and smrtis and that are observed by respectable people under the belief that thereby they are carrying what dharma dictates'[1654]. Medhātithi on Manu[1655] II 18 makes this position quite clear after quoting a verse of Kumārila 'a smrti that is opposed to the Veda or is self-contradictory, or has a visible secular purpose or expressly states a motive (for observing its precepts) cannot be deemed to be based on the Veda'. The Mīmāmsā-kaustubha (p. 51 on Jai. I 3. 7) quotes a verse to the effects that 'only those whose ancestors also observed certain usages handed down from generation to generation would not incur blame by observing them (if they are opposed to śruti or smrti), but not others (who

1654. श्रुतिस्मृत्यविरुद्धानां शिष्टैर्धर्मबुद्ध्याऽनुष्ठीयमानानामाचाराणां वेदमूलकत्वम्। अत एव स्मृतौ 'श्रुतिस्मृत्यविरुद्धो यः स सदाचार उच्यते' इत्युक्तम्। वार्तिके तु आर्यावर्तनिवासिशिष्टप्रयोज्यत्वमेव सदाचारत्वोपलक्षणम्। अतश्च तत्रैव श्रुतिकल्पनमित्युक्तम्। वस्तुतस्तु आर्यावर्तगतानामप्याचाराणां श्रुतिस्मृतिविरोधेऽग्राह्यत्वात्तस्यैव सदाचारोपलक्षणत्वं न युक्तम्। अतश्चाचाराणामपि श्रुतिमूलकत्वात्प्रामाण्योपपत्तिः। मीमांसाकौस्तुभ pp. 43–44 (on जै. I. 3. 7).

1655. न च दृष्टकारणयोः स्मृत्याचारयोः प्रामाण्यम्। उक्तं च भट्टपादैः। विरुद्धा च विगीता च दृष्टार्थादिष्टकारणे। स्मृतिर्न श्रुतिमूला स्याद्या चैषा सम्भवश्रुति. ॥ मेधा. on मनु II. 18 This verse refers to *five classes of smrti texts that cannot be based on* श्रुति दृष्टार्थं च आदिष्टकारणा च दृष्टार्थादिष्टकारणे (स्मृती); या च एषा सम्भवश्रुति is the fifth class, but the meaning is not clear Sir Ganganath Jha in his translation of Medhātithi does not say whence this verse is taken, nor does he correctly render the words विगीता and दृष्टार्थादिष्टकारणे and he omits altogether the fourth pāda. The words या चैषा सम्भवश्रुति appear to mean 'that smrti which declares its promulgation (by a sage) is not to be deemed to be based on Veda (since otherwise Veda will be held to be not *nitya*).

cannot rely on such a state of things)'. In a learned discussion on *bādha* Kumārila in his Tantravārtika (on Jai. III. 3. 14 pp. 859–860) brings together many *bādhas* out of which those that are relevant to this discussion are given in the note below[1656]. It says that inference is set aside by direct perception, smrti by śruti, a smrti not composed by an authoritative person and that is self-contradictory is set aside by a smrti that is authoritative and not self-contradictory, a smrti that has a visible worldly purpose by one that has an unseen spiritual purpose, a smrti based on inference drawn from a śruti or based upon a commendatory vedic passage is set aside by a smrti based upon (a direct) śruti text, a usage is set aside by a smrti and one usage is set aside by another usage that is accepted by more respectable people &c.

CHAPTER XXXIII

CUSTOMS AND DHARMAŚĀSTRA WORKS

It is now necessary to see how Dharmaśāstra works have dealt with the authority and binding force of customs and usages. *Sadācāra* is defined by Hārīta as follows[1657]:— the word 'sat' means 'good' and the good are those who are free from (moral) taint; the practices of such people are called *sadācāra*. Vide Manu II. 18, which also defines sadācāra. Even the most ancient sūtras testify to the fact that numerous customs and usages had arisen in different countries and villages. The Āśv. gr. (I. 7. 1–2) says,[1658] 'various indeed are the observances of (different) countries and villages; one should follow those in marriages; what, however, is common (to all or most) shall be declared by us'. The Āp. gr. (II. 15) declares, 'people should understand from women what procedure is to be observed (according to custom)' and the Āp Dh S. provides (I. 7. 20. 8 = II. 11. 29 14) that one[1659] should regulate one's course of action (in difficult or doubtful matters) according to the conduct which is unanimously approved of in all countries by the Āryas (men of the three higher castes), who have been properly disciplined, who are aged, who have restrained their senses and who are neither covetous nor hypocritical and concludes with the aphorism (II. 11. 29. 15) 'some teachers hold that the rest of the dharmas (not set out in this work) may be understood from women and from men of all castes'. Baud. Dh. S.[1660] (I. 5. 13) states (on the subject of śrāddha) 'the usages of people should be followed as to other rites to be performed'. Several grhyasūtras (like Pāraskara II. 17, Mānava

1657. साधवः क्षीणदोषाः स्युः सच्छब्दः साधुवाचकः। तेषामाचरणं यत्तु स सदाचार उच्यते॥ हारीत q by परा. मा. I. part 1 p. 144. This is विष्णुपुराण III. 11, 3 quoted by the दीपकलिका on या. I. 7 as from that पुराण.

1658. अथ खलूक्तावचा जनपदधर्मा ग्रामधर्माश्च तान् विवाहे प्रतीयात्। यत्तु समानं तद्दृश्यामः। आश्व गृ. I. 7 1–2, vide H of Dh. vol. II. p. 441 n. 1049 for remarks of हरदत्त and नारायण on these sūtras.

1659 सर्वजनपदेष्वेकान्तसमाहितमार्याणां वृत्तं सम्यग्विनीतानां वृद्धानामात्मवतामलोलुपानामवृश्चिकानां वृत्तसादृश्यं भजेत। एवमुभौ लोकावभिजयति। क्षीणः सर्ववर्ण्यश्च धर्मदेशान्यतीयादित्येके। आप. ध. सू. II. 11. 29. 14–15 The first sūtra is the same as आप. ध सू. I. 7. 20. 8.

1660. शेषक्रियाणां लोकोऽनुरोद्धव्यः। बौ. ध सू. I. 5. 13.

gr. I. 4. 6) refer to the practices of people that should be followed in such matters as commencing agricultural operations, holidays &c. It is needless to set out these in detail here. Manu[1661] IV. 178 pronounces the general prescription for all men, 'one should walk in the path of good men which their fathers and grandfathers trod; by so doing one will come to no harm' For ordinary men this procedure is easy to understand and to follow This dictum sets a premium on the attitude of no change in any matter for fear that change may lead to some unexpected harm and has been throughout the ages up to the present the motto of most people in India. As ācāra or sadācāra is tangible and requires no effort to decide between conflicting views, we find eulogies of it in the earliest smrtis and purānas. Vide Manu IV. 155–158, Vas. VI. 6–8 (the first and last of which are the same as Manu IV. 157–158), Anuśāsanaparva 104. 6–9, Visnu Dh. S 71. 90–92 (which are almost the same as Manu IV. 155, 156, 158), Mārkandeya chap 34, Brahmapurāna 121. 6–9, Vismupurāna III. chapters 11–12, Kūrmapurāna (uttarārdha, chap 15).

The general rule about the binding character of customs is set out as follows Gaut (XI. 20) observes,[1662] 'the dharmas (customs) of countries, castes and families, which are not opposed to the Vedic scriptures, are authoritative and binding' Gaut provides in the next two sūtras that cultivators, traders, herdsmen, money-lenders and artisans can lay down conventions or usages that would be binding on the respective classes, that when a dispute arises as to these usages the king should learn affairs from those who wield authority over those classes and decide the dispute accordingly Vas I. 17 states, 'Manu has declared that the (peculiar) customs of countries, castes and families may be followed in the absence of rules propounded by the Veda', and in XIX. 7 prescribes that the king should

1661 येनास्य पितरो याता येन याता पितामहाः। तेन यायात्सतां मार्गं तेन गच्छन्न रिष्यति॥ मनु IV. 178 The तन्त्रवार्तिक p 211 (on Jai I 3. 7) quotes this reads दुष्यति for रिष्यति and remarks 'येषां तु य पित्रादिभिरेवार्थो नाचरित· स्मृत्यन्तरप्रतिषिद्धश्च ते तं परिहरन्त्येव.' मेधा very appositely explains, अविदुषां मूलमजानानामुपदेशोयमिति। . . यदि पितृपितामहादिभि कैश्चित्कथचिदधर्म आचरितपूर्व स न आश्रयणीय इति सता मार्गमित्याह। Vide also मिता on या I 254 where मनु IV. 178 is quoted and H of Dh vol II p 460 *n* 1086 where मेधा. on मनु II. 18 is quoted

1662 देशजातिकुलधर्माश्चान्नायैरविरुद्धाः प्रमाणम्। कर्षकवणिक्पशुपालकुसीदिकारव इमे स्वे स्वे वर्गे। तेभ्यश्च यथाधिकारमर्थान्नत्यव्यहत्य धर्मव्यवस्था। गौ XI 20–22, देशधर्मजातिधर्मकुलधर्मान् श्रुत्यभावादवीन्मनु। वसिष्ठ I 17

enforce these among the four varnas Āp. Dh. S. II. 6. 15. 1 appears to lay down that the customs of countries and families (if not opposed to Veda) are authoritative and are to be followed in the respective countries or families. But this view seems to be unacceptable to Baudh Dh. S (I. 1. 19-26) which says,[1663] 'there is difference of opinion regarding five (practices) in the South as well as in the North We shall explain those peculiar to the south. They are· to eat in the company of (in the same plate with) one whose upanayana is not performed, to eat in the company of one's wife, to partake of stale food, to marry the daughter of a maternal uncle or of a paternal aunt. Now (the customs peculiar) to the north are: to sell wool, to drink rum, to deal in the sale of animals with an upper and a lower row of teeth, to follow the profession of arms and to travel by sea He who follows (these practices) in any other country than where they are generally in vogue commits sin. For, in respect of these customs the authoritativeness must be restricted to the respective countries Gautama declares that this is false. And one should not approve of (accept) either (of the two sets of practices), because they are opposed to the tradition of sistas (or opposed to the smrtis and the views of śiṣṭas)'. The Tantravārtika[1664] (p 211) mentions the argument of some concerning these passages of Āp and Baud viz. that Āpastamba's very general statement that practices of countries and families are authoritative in the respective countries cannot be accepted

The स्मृतिच I, p 10 explains. इतरो दाक्षिणात्यः इतरस्मिन् देशे उदीच्यदेशे अश्नुपनीतभोजन कुर्वन् दुष्यतीति न स्वदेशे। कुत देशप्रामाण्यात् तद्देशानिबन्धनत्वात्प्रामाण्यस्येत्यर्थ। Compare स्मृतिरत्न q by स्मृतिमु (वर्णाश्रम p 130) 'अब्रह्मचारिदाराद्यै सार्ध भोजनकर्म च। मातुलादिसुतायां च विवाह· शिष्टसमतः। इत्येते दाक्षिणात्यानामपि गीता (अविगीता?) उदाहृता। समुद्रयानं मासस्य भक्षणं शस्त्रजीविका। शीधुपानमुदीच्यानामविगीतानि धर्मत॥' Taking food in the same plate with one's wife is forbidden by Manu IV 43 and Yāj I 131. Vide H. of Dh vol. II p 765 n 1835

1664 सर्वेषामेवमादीना प्रतिदेश व्यवस्थया। आपस्तम्बेन संहृत्य दुष्टादुष्टत्वमाश्रितम्॥ येषां परम्पराप्राप्ताः पूर्वजैरप्यनुष्ठिता· । त एव तैर्न दुष्येयुराचारैर्नेतरे जनाः। ततश्च मन्वादिवाक्यप्रतिषिद्धाचाराणा प्रामाण्यमशक्यमभ्युपगन्तुम्। आपस्तम्बवचन तु चौधायनेन स्मृतिविरुद्धदुष्टाचारोदाहरणान्येव प्रयच्छता निराकृतम्। स्पष्टकामादिहेत्वन्तरदर्शनाच्च विरुद्धाचाराणामापस्तम्बवचनस्य वा श्रुतिमूलत्वंवापत्तिः। तत्र p 211. The व्य. म p. 22 quotes the verse येषां परम्परा० and remarks 'न दुष्येयु. अव्यवहार्या राजदण्डार्हाश्च न भवेयुरित्यर्थः'.

as valid, as it is opposed to the views of Gaut. (XI. 20), as Baud. expressly states that certain practices though prevalent in certain localities cannot be accepted as valid and binding even in those localities because they are opposed to the express words of such authoritative and highly venerated smrtis (as those of Manu) Manu in several places provides for the enforceability of customs and usages. In Manu VII. 203 it is said, 'the conqueror should hold as authoritative and binding the lawful customs of the conquered country, just as they are stated to be' and in Manu VIII. 41 and 46[1665] it is provided, 'A king who knows dharma (sacred law) should carefully inquire into the customs of castes, of countries, of guilds and of families and settle (or enforce) the customs peculiar to each Whatever may have been practised by the good and by twice-born men devoted to dharma, that shall be established (by the king) as the law, provided it be not opposed to the (customs of) countries, families and castes'. Medhātithi adds that the king has to see whether the customs of countries, families, castes and guilds are directly in conflict with the Veda or are harmful to others or utterly immoral (such as marrying one's mother) and only those that are found not to be so are to be enforced by the king and he[1666] adds on Manu II 6 that the practices of sistas (persons who are well conducted, free from greed and learned in the Veda) on matters on which the Veda and smrti are silent and which they observe with the consciousness that they (practices) are right (dharma) should be deemed to be based on Veda. He offers certain illustrations of such practices and also

1665 जातिजानपदान्धर्मान् श्रेणीधर्मांश्च धर्मवित्। समीक्ष्य कुलधर्मांश्च स्वधर्मं प्रनिपादयेत् ॥ मनु. VIII 41, on which मेधा. remarks 'समीक्ष्य विचार्य किमाम्नायैर्विरुद्धा अथ न तथा पीडाकराः कस्यचिदुत न एवं विचार्य येऽविरुद्धास्तान् प्रतिपादयेत् अनुष्ठापयेदित्यर्थः। . मातृविवाहादि. सार्वभौमेन निवारणीय । . . एककार्यापेक्षा वणिक्कारुकुसीदचातुर्विद्यादय. तेषा धर्मा श्रेणीधर्माः'. It should be noted that in other works also the Pārasikas were credited with the highly immoral practice of marrying one's own mother Vide यशस्तिलकचम्पू 'श्रूयते हि बह्वीमण्डले नृपतिदोषान्मूर्देष्वास्तोपयोग पारसीकेषु च स्वमविवीमंयोग सिंहलेषु वि-भामित्रसृष्टिप्रयोग इति ।' (4th आश्वास p 95). The स्मृतिच (I p 10) and स्मृतिसु (वर्णाश्रम p 130) quote several verses from an anonymous smrti one of which is तथा मातृविवाहोगि पारसीकेषु दृश्यते

1666 आचारश्चैव साधूनां चशब्देन वेदविद्यामिति सम्बध्यते । पदद्वयेन शिष्टत्वं लक्ष्यते। शिष्टानां य आचार. सोपि धर्मे मूलम् । आचारो व्यवहार अनुष्ठानं यत्र श्रुतिस्मृतिधर्म्यादि न सन्ति शिष्टाश्च धर्मबुद्ध्यानुतिष्ठन्ति तदपि वेदिकमेव पूर्ववन्मन्तिपत्तव्यम् । यथा विवाहादौ कन्यादानधनादि माङ्गलिकत्वेन यत् क्रियते या च कन्यायास्तदहर्विवाहयिष्यमाणाया: प्रत्यातृसम्बन्धचतुष्पथादिपूजा देशभेदेन तथा वृत्तासंख्या देशभेदश्च(दाच?) या चातिस्यादीनां इदानीनामनुवृत्ति मिषद्वितन्त्रनामिवादनाभ्युत्थानादिरूपा । मेधा. on मनु II. 6.

relies[1667] upon the words of the Mahābhārata (Vanaparva 313. 117), 'what is true dharma is concealed as in a dark cave; the (only) path is to follow great men'. In I. 118 Mann declares that the ancient (or long enduring) laws (or customs) of countries, castes, families and the rules among heretics and companies (of traders and the like) have been dealt with by him in the śāstra (Institutes). Yāj. I. 343 provides that when a conqueror reduces a country to subjection he should preserve intact whatever customs, laws and judicial procedure, and family usages are handed down from generation to generation therein (provided they are not opposed to śāstras and, as the Mit. says, he should not cause confusion by imposing the usages of his own country on the conquered country). Yāj. II. 192 (like Manu and Gaut.) provides that the varying usages and conventions of śrenis (guilds of artisans), naigamas (traders), heretics and associations (of soldiers and the like) should be respected by the king in the same way as he honours the usages of learned brāhmanas. About the latter Yāj. II. 186 says that the king should sedulously enforce the conventions of learned brāhmanas which are not opposed to the dictates of the Veda and smrti (such as about pastures, water-courses and wells and the preservation of temples) and he should also enforce his edicts that are not opposed to Veda and smrti (such as making provision for travellers and prohibiting the sale of horses to an enemy &c.). Kautilya prescribes[1668] that the king should follow as regards inheritance and partition the customs that are in vogue in a country, a caste, a *sangha* (company or guild) or a village. Devala[1669] and Brhatparāśara (X. p. 281) have a verse very similar to Yāj I. 343. The Mahābhārata remarks that there is no custom or practice that can be said to be beneficial

1667. अथाप्ययं न्यायो महाजनो येन गतः स पन्था इति... । विद्वांसो ह्यत्र निष्कामाः प्रवृत्तिपूर्वा अनिन्द्याश्च लोके । अथाप्यागमिकी प्रवृत्तिः सापि वेदप्रामाण्यात्सिद्धेवेति । मेधा. on मनु II. 1. The whole verse is: तर्कोऽप्रतिष्ठः श्रुतयो विभिन्ना नैको ऋषिर्यस्य मतं प्रमाणम् । धर्मस्य तत्त्वं निहितं गुहायां महाजनो येन गतः स पन्थाः ॥ वनपर्व 313. 117; the words 'धर्मस्य तत्त्वं निहितं गुहायां' are quoted by विश्वरूप on या. I. 9.

1668. देशस्य जात्या सङ्घस्य धर्मो ग्रामस्य वापि यः । उचितस्तस्य तेनैव व्यवहारं प्रकल्पयेत् ॥ अर्थशास्त्र III. 7. p. 165, अक्षपटलमध्यक्षः ... निबन्धपुस्तकरणानं कारयेत् । तत्राधिकरणानां संख्यां... देशग्रामजातिकुलसङ्घानां धर्मव्यवहारचरित्रसंस्थानं... निबन्धपुस्तकस्थं कारयेत् । अर्थशास्त्र II. 7 p. 62.

1669. यस्मिन्देशे पुरे ग्रामे त्रैविद्ये नगरेऽपि वा । यो यत्र विहितो धर्मस्तं धर्मं न विचारयेत् ॥ देवल in स्मृतिच. I. p. 10.

to all alike[1670]. From this it follows that variations in practices were to be tolerated by the king. Bṛhaspati[1671] advises the king to keep intact the customs of countries, castes and families that have been long in vogue in them and states that otherwise the subjects become irritated and disaffected and there is loss of wealth and army. He gives certain striking illustrations of peculiar practices: 'members of the twice-born classes in the southern countries take in marriage their maternal uncle's daughter; in the middle country (the country between the Himālaya and the Vindhya lying to the west of Prayāga and to the east of Vinaśana where the Sarasvatī disappears, as said by Manu II. 21) artisans and menial workers eat the flesh of a cow; in the eastern countries people (all including brāhmanas) eat fish and women are given to adultery; in the north women drink liquor and contact with them even in their monthly illness is allowed; the people of the *Khaśa* country take as wives the widows of their own brothers; these several people are not liable to undergo punishment or penance because of their doing these things in the respective countries'. Medieval writers differed about the meaning of the last half verse. The Madanaratna said (acc. to V. P. p 22) that there is neither punishment nor prāyaścitta when the above practices which are opposed to smṛti texts are indulged in by the inhabitants of the countries specified, while the V. P. p. 22 holds that there is only absence of punishment at the king's hands for these people in those countries, but they are still liable to undergo prāyaścitta and that if these practices are followed in other countries both punishment and prāyascitta have to be undergone

II. 10. 27. 3 (Bühler's ed.).

Kāt.[1672] defines what is meant by the customs of countries and families and states how and when they are to be enforced: 'That is said to be the custom of a country, which is in vogue in a country, is of long standing and is not opposed to the Veda and Smṛti That is called family custom which has come down hereditarily in a family as right conduct (dharma) to be observed (by members of that family); the king should preserve it as it is.' In disputes between the residents of the same country or capital, hamlet of cowherds, town or village the decision should be based on their own conventional usages, but in disputes between inhabitants of these and others the decision must be in accordance with the sacred texts Therefore the king should decide the causes of people according to the rules of śāstra: but in the absence of texts he should carry out (the administration of justice) according to the usage of the country Whatever conventions are settled in accordance with the consent of (the people of a) country should always be preserved in writing sealed with the royal seal. Such conventions should be sedulously upheld as if they were the dictates of śāstra and the king should decide (disputes) after carefully considering them' Here Kāt is principally concerned with the decision of legal disputes on the basis of the customs of countries and families, but his rules also have a general application. He also states that in the case of the conflict of laws by which the parties are governed śāstra prevails Pitāmaha[1673] has a similar verse about the usages of towns, villages and guilds and mentions that Br held the same view. Manu also (VIII. 3) requires the king to decide the disputes of people according to principles drawn from local customs (*deśadṛṣṭa hetu*) and from the Institutes of law (*śāstradṛṣṭa*). Medhātithi (on Manu VIII. 3) gives some interesting illustrations of local customs; viz in certain southern localities a sonless widow

1672. यस्य देशस्य यो धर्मः प्रवृत्तः सार्वकालिकः । श्रुतिस्मृत्यविरोधेन देशदृष्ट स उच्यते ॥ गोव्रस्थितिस्तु या तेषां क्रमादायाति धर्मतः । कुलधर्म तु तं प्राहुः पालयेत्तं तथैव तु ॥ देशापत्तनगोष्ठेषु पुरग्रामेषु वासिनाम् । तेषां स्वसमयैर्धर्मशास्त्रतोऽन्येषु तैः सह ॥ तस्माच्छास्त्रानुसारेण राजा कार्याणि साधयेत् । वाक्याभावे तु सर्वेषां देशदृष्टेन संनयेत् ॥ देशग्रामकुलानामेव व्यवस्था या निरूपिता । लिखिता तु सदा धार्या मुद्रिता राजमुद्रया । शास्त्रबाधाततो रक्षा नो निरीक्ष्य विनिर्णयेत् । कात्या. q. by स्मृतिच. II p 26 (all except the verse गोव्रस्थितिस्तु), परा मा. III 41 (has first, 3rd and 4th), अपरार्क p. 599 (has the fourth), व्य म. pp. 21–22 (has 2nd and 4th), व्य. नि. pp. 15–16 (has the first two).

1673. ग्रामगोष्ठपुरश्रेणिसार्थसेनानिवासिनाम् । व्यवहारश्चरित्रेण निर्णेतव्यो हि धर्मतः । पितामह q. by स्मृतिच. II. p. 26.

cupies a square low table in the hall of justice, when she is ruck with dice by the judicial officers and then she gets her sband's property (this is a reminiscence of Nirukta III. 5)laining Rg. I. 25. 7), in the north there is a custom that ıen certain persons come on behalf of a bridegroom seeking : a virgin in marriage and they are fed at the house of the 1's father then it is implied that there is a promise to give at girl in marriage to that particular bridegroom. These two ıstoms are not opposed to any śruti or smrti (and even the . P. p. 10 refers to the second as prevalent in the north and adhyadeśa). But Medhātithi mentions other local usages ıat are opposed to smrti e g grain is lent in spring and in the ıtumn of the same year double of it is taken. This is opposed) the rules of smrti laying down rates of interest.

Very difficult questions arise in regard to the relative force f śruti, smrti and sadācāra and numerous rules have been laid own in cases of apparent and real conflicts among them. As anu II. 6, Vas I. 4-5 and Yāj I. 7 mention the sources of harma to be śruti, smrti and sadācāra in that order, the Mitāk-arā remarks[1674] that 'in case of conflict, each preceding one of ıose three has more force (or binding character) than each ucceeding one.' Śruti or Veda is recognised by all smrti writers s the highest or supreme authority for those who desire to know vhat dharma[1675] is (vide Manu II. 13 and Yāj. I. 40). If two 'edic texts of equal authority are in conflict, then Gaut[1676] I 5, Manu II. 14 and Jābāli declare that there is an option. For xample, there are two Vedic texts 'he takes the soḍaśin cup in he Atirātra sacrifice' and 'he does not take the soḍaśin cup in he Atirātra'. In this case there is an option Similarly Vedic exts say that the daily Vedic agnihotra may be performed after sunrise, or before sunrise or when neither the sun nor stars are visible. Therefore there is an option, viz. the daily agni-hotra offering may be made at any one of the three times speci-fied (Manu II. 15). But a vedic text which is in apparent con-flict with another is not always of equal force with that other. In such a case there is no option, and various rules are laid

1674. एवेदा विरोधे पूर्वपूर्वस्य बलीयस्त्वम्। मिता. on या. I. 7.

1675. धर्मे जिज्ञासमानानां प्रमाणं परमं श्रुतिः। मनु II 13, धर्मे .. प्रथमं श्रुतिः। द्वितीयं तु स्मृत्याख्यं तृतीय लोकसंग्रहः॥ वृद्धगौतम XIV. p 599, vide या. I 40.

1676. तुल्यबलविरोधे विकल्पः। गौ I 5; श्रुतिद्वैधं तु यत्र स्यात्तत्र धर्मावुभौ स्मृतौ॥ स्मृतिद्वैधे तु विषय कल्पनीया पृथक् पृथक्॥ जाबालि q by स्मृतिच्च II p 496. The first half of Jābāli's verse is the same as Manu II. 14

down in the Pūrvamīmāmsā some important ones among which will be discussed at length in the section on Pūrvamīmāmsā. Such texts may be explained by holding that one lays down a general rule (sāmānya), while the other lays down a special rule (viśesa) or an exception, or that one is a *vidhi* and the other merely an *arthavāda* or that the two texts have different scopes or refer to different ages &c. All these rules about the interpretation of Vedic texts have been held to apply to smṛti passages For example, Manu VIII. 381 is a general rule absolutely prohibiting the killing of a brāhmaṇa While Manu VIII. 350 allowing the killing of a brāhmana in self-defence is a special rule or may be regarded as a mere arthavāda (viz. even a guru who is really not to be killed on any account may be killed when he is an ātatāyin, what of others, as the Mit. on Yāj II. 21 explains). Similarly Manu VIII. 351 saying that there is no fault (*i.e.* no sin, no punishment and no prāyascitta) in slaying an ātatāyin has restricted scope as applying only to an ātatāyin who is not a brāhmana. A few more examples will be given immediately below.

In cases of conflict between sruti and smṛti, the rules laid down by the Pūrvamīmāmsā have already been explained (pp 832–34) Jaimini VI. 1. 13–14 and Śabara furnish an example If, relying on Manu VIII. 416, the pūrvapaksa were to argue that women own no wealth and so should not engage in a vedic sacrifice then as that smrti so interpreted is opposed to the Veda it may be discarded by women[1677]. Smṛtis also lay down certain general rules on that point Laugāksi[1678] and Jābāla lay down that in case of contradiction between śruti and smrti, the former has greater force and that if there is no contradiction then what is laid down in the smrti should be observed as if it were laid down by the Veda The Mit on Yāj III. 46 admits that a proposition of the Veda cannot be set aside (*bādhita*) by even a special proposition in a smṛti text. But in spite of the general proposition commentators like Viśvarūpa, Medhātithi and Vijñāneśvara

1677 फलोत्साहाविशेषात् । जै VI 1 13 ; यदि स्मृतिमनुरूप्यमाना परेषां निर्धना च स्यात्, यजेतेत्युक्ते सति न यजेत । तत्र स्मृत्या श्रुतिर्बाध्येत । न चैतन्न्याय्यम् । तस्मात्फलार्थिनी सती स्मृतिममाणीकृत्य द्रव्यं परिगृह्णीयाद्यजेत चेति । शबर

1678 श्रुतिस्मृतिविरोधे तु श्रुतिरेव गरीयसी । अविरोधे सदा कार्यं स्मार्तं वैदिकवत्सदा ॥ लौगाक्षि q by हरदत्त on गौ I 5 and स्मृतिश्च I. p 7. भाट्टरत्न p 191, मित्रमिश्र in his commentary on या II 21 reads (without naming the writer) श्रुति . गरीयसी । परस्परविरोधे तु योगयुक्तं (v. l. स्वायत्तुक्तं) प्रमाणवत् ॥ The ... of ... परस्पर ... स्वायत्तुक्तं प्रमाणवत्

had to admit that what was laid down by śruti texts was set aside or contradicted or abandoned by smrti texts or by popular sentiment. After the Udayanīyā (concluding *iṣṭi*) in the Agnistoma sacrifice was finished, a rite was prescribed by Vedic texts in which a barren cow (called Anūbandhyā) was sacrificed for Mitra and Varuna But later on this was oondemned and in lieu of a cow āmiksā (mixture of heated milk and ourds) was substituted. Vide H. D II pp 1200-1201 for the anūbandhyā cow and p. 628 n 1198 above for the verse quoted by the Mit. on Yāj. II. 117 condemning cow sacrifice in Kaliyuga. Yāj. III. 234 puts *govadha* (slaughter of a cow) at the head of upapātakas. Medhātithi on Manu IV. 176 after stating that even such acts as donating all one's property in the Viśvajit sacrifice or killing a cow should not be done (though sanctioned by the Veda) remarks that he gives that explanation following his predecessors' views but that to him it appears that an express śruti text cannot be set aside by a smrti passage[1679]. Viśvarūpa also (on pp. 25-26) after adverting to the fact that Yāj III. 234 places *govadha* at the head of *Upapātakas* remarks that this may apply to the killing of cows spoken of in smrtis such as at the time of samāvartana (vide Manu III. 3) and that the rule must be upheld that a smrti that is in conflict with an express text of the Veda is to be set aside. Sometimes even a smrti text though theoretically weaker than śruti was allowed to prevail over a śruti. For example, the Veda prescribes the filling of the cups of wine in Sautrāmani isti, but this is one of the matters prohibited in Kali[1680] (vide chapter on Kalivarjyas below).

The general rule is that when a custom or usage is opposed to the text of the Veda the latter must prevail. So early a writer as Āpastamba states this rule emphatically in several places. In Āp. Dh. S. I. 1. 4. 8 it is stated[1681]: 'For, an explicit śruti text has greater force than ācāra (usage) from which a śruti text (on which it may be supposed to be based)

1679 न हि प्रत्यक्षश्रुतिविहितस्य स्मृत्या बाधो न्याय्यः। मेधा on मनु IV. 176; तेन वेदविरुद्धाया स्मृतेर्बाध इति स्थितिः। विश्वरूप p. 26 on या I. 7.

1681 श्रुतिर्हि बलीयस्त्वमनिकादाचारात्। आप. ध. सू. I 1. 4 8, विप्रतिषेधे श्रुतिलक्षणं बलीयः। आप I 11. 30. 9, त्रैविद्यवृद्धानां तु वेदाः प्रमाणमिति निष्ठा। तत्र यानि श्रूयन्ते द्वीपिचषपदराज्यषप कपालपत्नीसम्बन्धान्युच्चैर्नीचै कार्यमिति तैर्विरुद्ध आचारोऽप्रमाणमिति मन्यन्ते। आप ध सू. II. 9. 23. 9.

may be inferred.' In I. 11. 30. 8-9 Āp Dh. S. says, 'during the morning and evening twilights a snātaka should be seated outside the village and should restrain his speech (should not speak about worldly matters); but (an agnihotrin must not go out for) what is enjoined by śruti is of more force in case of conflict of duties'. Similarly in Āp. II 9. 23. 8-9, 'It is the settled view of those who are deeply learned in the three Vedas that they are (highest) authority. They consider that the rites which are there prescribed for performance with rice, *yava*, animals, clarified butter, milk, potsherds (in conjunction) with the wife and accompanied by loudly or inaudibly recited (mantras) must be performed and that a usage opposed to these rites is without authority'. In spite of this and the doctrine of the Pūrvamīmāmsā stated above (p. 843) usages sprang up that were opposed to or gave the go-by to the prescriptions of the Veda as will appear a little below and particularly in the section on Kalivarjya

The conflict of smrtis among themselves presents much greater difficulties. From very ancient times authors of smrtis differed greatly among themselves. A few striking examples may be cited. Āp. Dh S. (I. 6. 19 2-12) cites the views of ten predecessors on the question of the persons whose food may be partaken of by a brāhmana (*ka āśyānnah*). The difference between Gautama and Baudhāyana on the one hand and Āp. on the other on the question of the validity of certain usages in certain localities has already been referred to (p 858). In III 16 Manu mentions three views (and four sages) on the question of the position of a brāhmana who marries a śūdra wife or has a son or a child from her. Baud. Dh. S. I. 8 2, Manu III. 13, Visnu Dh. S. 24. 1-4, Pār Gr. I. 4, Vas. I. 25 show that brāhmānas were allowed to have śūdra women as wives But Yāj. I 56 emphatically dissents from this by stating 'this is not my view'. In this state of affairs the medieval digests and commentators were hard put to it to evolve rules of interpretation One rule early evolved was that when two smrti texts were in conflict, 'reasoning based on the practices of elders (śistas) was of greater force' (Yāj. II. 21)[1682]. The Mit explains that ratiocina-

1682 स्मृत्योर्विरोधे न्यायस्तु बलवान् व्यवहारतः । या. II 21, on which the vy. m. p. 13 remarks 'न्यायानुपपन्नस्मृत्यपेक्षया न्यायोपपन्ना स्मृतिर्बलवतीति न्यायानुपपन्नस्मृतेस्तात्पर्यान्तरकल्पना- कार्येति । तस्य चोत्सर्गापवाद—विषयव्यवस्था—विकल्पादिरूपस्य

(*Continued on the next page*)

tion may take the form of holding that one text lays down a general rule and the other lays down a special rule (which prevails over a general rule), or the text may be held to relate to different sets of circumstances or in the last resort it may be held that there is an option, but in arriving at these conclusions the practice of the old or of śistas who follow the rule in one text and discard or avoid the rule in the other text is the guide[1683]. Br.[1684] gives the following warning to those who do not take reasoning into consideration: 'The decision (in a cause) should not be given by merely relying on śāstras, for in the case of a decision devoid of reasoning loss of dharma results'. Nār. (I. 40) provides in a strain similar to the Mit, 'when there is conflict between two texts of dharmaśāstra, it is declared that the method to adopt is to resort to reasoning, for the practices (of śistas) are of great force and the strict letter of the law is overruled by them (or properly understood through them)'. These provisions remind us of the working of the principle of *æquitas* applied by the prætors in Rome to the rigid older legislation or the influence of Equity in English Law. When

(*Continued from the last page*)

न्यायस्य प्रत्यायक हेतुमाह व्यवहारत इति । वृद्धव्यवहारादन्वयव्यतिरेकादिरूपादनादिव्युत्पत्त्यपरपर्यायान्न्यायः प्रत्येतव्य इत्यर्थः । विश्वरूप reads स्मृतेर्विरोधे and gives three interpretations of this One is the same as that of the Mit, The other two are, (2) when there is a conflict between smṛti and reasoning, smṛti is stronger (he approves of this), (3) in case of conflict nyāya is stronger than smṛti. मित्रमिश्र in his commentary on या. II 21 explains व्यवहारतः differently as 'व्यवहारत. व्यवहारे विषये'.

1683. In *Bhau v Sundrabai* P. J. for 1874 p. 250, where the question was whether daughters were excluded from inheritance as regards the Utpat family of priests at the temple of Vithoba at Pandharpur), Yāj. II 21 was translated (at p 252) as follows. 'if two texts be opposed *usage* is of force for their construction'. In *Chunilal v Surajram* 33 Bom. 433 at p. 439 Yāj II 21 is rendered as 'where there is a conflict between two or more smṛtis that one should be accepted, which is conformable to equity'. The former rendering is rather obscure and the latter does not translate Yāj closely The exact meaning of 'equity' in this translation is not clear It certainly does not mean 'equity' in the strict sense of English Law

1684. न्यायमनालोचयतो दोषमाह बृहस्पतिः । केवल शास्त्रमाश्रित्य न कर्तव्यो हि निर्णय । युक्तिहीने विचारे तु धर्महानिः प्रजायते ॥ व्य. मयूख p. 7 The verse is q by परा मा. III p 39, व्य. मा. p 282, स्मृतिच. II p 24, व्य. प्र. p 13, धर्मशास्त्रविरोधे तु युक्तियुक्तो विधि स्मृतः । व्यवहारे हि बलवान् धर्मस्तेनावहीयते ॥ नारद I 40 युक्ति means लोकव्यवहार acc. to व्य मा. p. 282 The व्यवहारतत्त्व (p 199) says, धर्मशास्त्रयोस्तु विरोधे लोकव्यवहार एवादरणीयः । . . अवहीयते अवगम्यते हि गतावित्यस्माद्धातोः . .

old rules become too narrow or are deemed to be not in harmony with the views of a changing or progressive society, it was thought to be the privilege of the king or the judge to adopt his practice to the existing state of society and not to decide a case by a too strict adherence to ancient dicta.

Another rule that was laid down was that in case of conflict between dharmaśāstra and arthaśāstra, the former is of more weight or authority or that one should discard the rule in the arthaśāstra[1685] (Āp. Dh. S. I. 9 24. 23; Yāj. II. 21; Nār. I, 39; Kāt. 20) Vide pp. 8–9 above for an explanation of this rule The rule of the arthasāstra has the accomplishment of a visible or worldly purpose as the goal, while the dharmaśāstra rule has as its purpose the securing of unseen or spiritual results. Therefore the latter from a spiritual or ethical point of view is superior to the former.

Several other methods of resolving conflicts between smrtis may be mentioned here. Br.[1686] states: 'Manusmrti occupies a pre-eminent position because it puts together the purport of the Vedas; that smrti which is in conflict with the purport of Manu is not commended'. Angiras also states that to follow the words (of another smrti) disregarding the unrivalled dharmaśāstra of Manu would not be beneficial to a person. The Mit. on Yāj III. 300 speaks of the Manusmrti and others as the great smrtis (mahā-smrti). Some writers[1687] quote the Vedic text 'whatever Manu said is indeed medicine' in this connection, thereby identifying the author of the Manusmrti with the Manu named in the Vedas. But this does not afford much help. Another principle evolved was that certain rules of conduct and certain smrtis were of special authority in certain cycles of time. Manu (I. 85–86 = Śānti 232. 27–28 = Parāśara I. 22–23

1685. यत्र विप्रतिपत्तिः स्याद्धर्मशास्त्रार्थशास्त्रयोः । अर्थशास्त्रोक्तमुत्सृज्य धर्मशास्त्रोक्तमाचरेत् ॥ नारद I 39, मेधा. on मनु. VII, 1 says 'तथा च कात्यायनः । अर्थशास्त्रोक्त ... शास्त्रोक्तमाचरेत् ।'.

= Brhat-Parāśara I. p. 55) himself says that the dharmas differ according to which of the four yugas is current, viz. *tapas* is the highest dharma in the Krta age, knowledge in Tretā, *yajña* in Dvāpara and only *dāna* in Kali. This verse only means that in a particular yuga the predominant or easily performed dharma is the one indicated but the verse does not mean that a dharma predominant in one yuga was prohibited in another. Parāśara I. 24[1688] (= Brhat-Parāśara I. p. 55) declares that in the Krta age the dharmas (to be observed) were those promulgated by Manu, in Tretā those of Gautama, in Dvāpara those of Śankha-Likhita and in Kali those of Parāśara. This also did not solve all difficulties, since the medieval digests and commentaries found that even what was allowed by Parāśara came to be disapproved of or condemned by the people. Many prescriptions of the smrtis were therefore included under *Kalivarjya* (acts forbidden in the Kali age) on the ground that action, though at one time prescribed or sanctioned by the śāstra, should not be resorted to, if it has become hateful to the people, since it would not lead to heaven[1689] (if persisted in). This was the dictum of Yāj. I. 156 (= Brhan-Nāradīya-purāna 24. 12), Manu IV. 176, Visnu Dh. S. (71. 84–85), the Visnupurāna (III. 11. 7), Śukra III. 64, Bārhaspatya-sūtra (on Arthaśāstra) V. 16. Vide p. 630 and n. 1202 above. These texts were relied upon for prohibiting certain acts (though done in former times) by the Mit. (on Yāj. II. 117, III. 18), V. P. (p. 442) and others. But these devices of interpretation also proved futile in certain cases. On the question of the periods of mourning due to death for ksatriyas and others the texts are so various and so conflicting that even the great Vijñāneśvara declares (on Yāj. III. 22) that he is not going to furnish any orderly presentation of the smrti texts assigning to each its proper province, since it would be useless to do so in view of the fact that the usage of śistas did not agree with most of them[1690]. Viśvarūpa also (on Yāj. III. 30) is in the same predicament. The commentators (such as

1688 कृते तु मानवो धर्मस्त्रेतायां गौतमः स्मृतः। द्वापरे शाङ्खलिखितः कलौ पाराशरः स्मृतः॥ पराशर I 24 q. by स्मृतिच. I. p 11. This is ascribed to बृह. in the आचाररत्न p 12 quoting from the परा मा.

1689 परित्यजेदर्थकामौ धर्मपीडाकरौ नृप। धर्ममप्यसुखोदर्कं लोकविद्विष्टमेव च॥ विष्णुपुराण III. 11. 7; धर्ममपि लोकविकुष्टं न कुर्यात् लोकविरुद्धं नाचरेत्। बार्हस्पत्य-सूत्र V 16.

1690. इत्येवमनेकोक्तावचाशौचकल्पा दर्शिताः। तेषां लोके समाचाराभावान्नातीव व्यवस्थामदर्शनमुपयोगीति नात्र व्यवस्था प्रदर्श्यते। मिता. on या III, 22.

Mādhava in Par. M. on I. 1. p. 84) were aware that peopl e would not go in for religious practices that called for great effort and would seek for such rules as would be easy of observance [1691]

In some cases it was provided that where there is a conflict among smrtis the view of the majority should prevail Gobhila-smrti (III 148–149) provides[1692] that where there is a conflict among passages (of smrtis), authoritativeness rests with that view which is supported by a majority of the texts, but where two passages are of equal authority then reasoning has to be employed. The assumption or axiom was, according to Medhātithi[1693] (on Manu II. 29 and XI. 216), Mit (on III. 325), Sm C. (I. p. 5), Aparārka p. 1053, Madanapārijāta (pp. 11, 91) and others that all smrtis form one śāstra, that if some smrti texts on the same subject are in conflict there is an option and when there is no conflict all rules from all smrtis should be held applicable to the subject matter; this was based on the analogy of the maxim called 'sarva-śākhāpratyayanyāya' or 'śākhān-tarādhikarana' (vide Jai. II. 4. 9 and Śabara thereon)

It is further provided that works of heretical sects were to be left out of consideration. Manu calls them smrtis, but they are outside the pale of Vedic orthodoxy. Manu (XII. 95) declared,[1694] 'the smrtis that are outside the (pale of) Veda and all false or fallacious doctrines are of no avail after death, because they are all based on ignorance'. In the Vedāntasūtra (II. 1 1) also the word smrti is applied to the works on the

1693. यथा सर्वशाखाप्रत्ययमेक कर्म एव सर्वस्मृतिप्रत्ययमपि । यत्तु बहुत्वादूहशब्द-तीनां काश्रीयतामित्यनध्यवसाय । सर्वासा प्रामाण्याविशेषादेकार्थानां विकल्प भिन्नार्थाना समुच्चय । मेधा. on मनु II 29, एकशास्त्रत्वात्सर्वस्मृतीनामसति विरोधे समग्र योज्य विरोधे तु विकल्प । मेधा on मनु XI 216, एवमन्येष्वपि विरोधिपदार्थेषु विकल्प आश्रयणीय । अविरोधिषु समुच्चय । शाखान्तराधिकरणन्यायेन सर्वस्मृतिप्रत्ययत्वात्कर्मण । मिता on या III 325

1694 या वेदबाह्याः स्मृतयो याश्च काश्च कुदृष्टय । सर्वास्ता निष्फला प्रेत्य तमो-निष्ठा हि ता स्मृताः ॥ मनु XII 95. This is quoted by the तन्त्रवार्तिक on जै 1. 3 5 p. 196 with the remark 'एतदीया ग्रन्था यद्य च मन्वादिभि परिहार्यत्वेनोक्ता । या वेदबाह्याः...तमोनिष्ठा हि ता स्मृता इति । तस्माद्धर्मं प्रति त्रयीबाह्यमेवंजातीयकं प्रामाण्येना-नपेक्ष्य स्यादिति सिद्धम् ।'

Sānkhya philosophy. The Tantravārtika (p. 195) says that the Bauddhas and other heretical sects do not admit that their doctrines are based on the Veda, like a bad son hating his parents; the prescriptions contained in their works are opposed to all the 14 *vidyās* except in the case of a few sentences laying down restraint of senses, charity and the like; they were promulgated by persons like the Buddha who had given up the path of the Veda and did acts contrary to the Veda and they were propounded to persons that were beyond the pale of the three Vedas and that mostly were śūdras and persons outside the system of the four varnas and āśramas. Medhātithi on Manu II. 6 adopts this and remarks[1695] that the Śākyas, Bhojakas and Ksapanakas do not admit the Veda as authoritative, they openly declare the Veda to be unauthoritative and they teach doctrines directly opposed to the Veda. The Caturvimśatimata[1696] states that the words of Arhat (Jina), of Cārvāka and of Bauddhas, should be abandoned as they lead to delusion.

Then comes the question of the conflict between smrtis and purānas. It has been shown in the H. of Dh., vol. I. pp. 160–167, how the Purānas are rich in Dharmaśāstra material. The sūtras and early smrtis do not look upon the Purānas as a source of dharma, though Gaut. XI. 19 and Yāj. I. 3 mention Purāna as one of the classes of works on which the king or any one else may draw for knowledge of dharma and though the Āp. Dh. S. quotes from a Purāna in I. 6. 19. 13, I. 10 29. 8 and II. 9. 23 3 and names a Bhavisyatpurāna in II. 9. 24 6. It is to be noted that the views quoted by Āp. from the Purānas in the first three passages are opposed to the views of the Kalivarjya section alleged to be taken from the Ādityapurāna in medieval digests. The passage of the Tantravārtika stating that Purānas, Manusmrti and Itihāsa are universally accepted throughout India has been already quoted (on p. 853). When Manu states that smrti is a source of dharma he does not obviously comprehend Purānas under smrti as Manu II. 10 clearly shows (*dharmaśāstram tu vai smrtih*). Manu III. 232 and Yāj. III. 189 employ the plural 'Purānāni' and so those smrtis obviously

knew several Purānas and Medhātithi notes that they were composed by Vyāsa and described the creation of the world &c. The Strīparva (13. 2) also employs the plural and the Svargārohanikaparva (5. 46–47) speaks of Krsna Dvaipāyana as the author of 18 Purānas. The Ādiparva[1697] (1. 293–94) prescribes that one should strengthen the Veda by (the study of) the Itihāsa and Purāna and that the Veda fears the man whose knowledge is insignificant 'this man will harm me' According to the Bhāgavata-purāna I 4. 25 the purpose[1698] of the composition of the Mahābhārata was this that as the Veda cannot be learnt by women, śūdras and brāhmanas who are so only by birth (and do not study) the sage Vyāsa took compassion on them and composed the Mahābhārata for their benefit. The same must be deemed to be the purpose of the composition of the purānas. The Daksasmrti II. 69 prescribes[1699] the recitation of itihāsa and purāna in the 6th and 7th parts of the day (divided into 8 parts). The Aušanasa smrti (III. p. 515, Jivananda) prescribes the study of the Veda in the bright half of the months from Māgha after *utsarjana* and the study of the Vedāngas and of Purāna in the dark half. It appears that some at least of the extant Purānas were composed in the first centuries of the Christian era and that from early times they contained dharmaśāstra material. In another section the *paurānadharma* will be separately dealt with hereafter. Gradually the Purānas became very popular in the course of centuries, some of the original rites prescribed by the Veda and the early smrtis went out of vogue and new modes of worship and rites provided by the Purānas came into general observance. The Vedavyāsa smrti[1700] (I. 4) and the Sangraha state that in case of conflict between smrti and purāna smrti is to be

preferred. Aparārka (p. 9) quotes[1701] a smṛti text, 'that is highest dharma which is understood from the Veda, that is to be known as inferior dharma that is declared in the Purāṇas and the like'. Aparārka (p. 15) further tells us that[1702] according to the Bhaviṣyatpurāṇa the purāṇas are of authority in declaring dharma that is *vyāmiśra* (i. e. mixed up and not purely Vedic). Medieval writers were often divided as to the authoritativeness of purāṇas. Mitramiśra (in his commentary[1703] on Yāj. II. 21) asserts that dharmaśāstra (viz. smṛti) is not more authoritative than purāṇa and that in case of conflict between a smṛti text and a purāṇa text recourse must be had to reasoning as in the case of conflict between two smṛtis. On the other hand, the V. Mayūkha,[1704] after quoting Manu IX. 126 and Devala about the first born among twins being regarded as the oldest and after referring to a half verse from the Bhāgavatapurāṇa (rather from the commentary of Śrīdhara thereon) which holds that among twins the one born later is to be deemed as the elder, remarks that the Purāṇa passage is to be set aside in favour of the smṛti passages and that in the purāṇas usages opposed to the smṛtis are very frequently met with. It further says that this view is preferable to that of some others according to whom in this matter the custom of the country should be followed. The Nirnayasindhu (III. p. 251) also says the same. The respect for the purāṇas carried away late medieval writers so far that relying on some prophetic passages in the purāṇas about the disappearance of four varnas in the Kali age and the subsistence of only brāhmaṇas and sūdras therein, they denied the existence of kṣatriyas and vaiśyas in the Kali age, in spite of the fact that all smṛtis (like Manu, Yāj, Parāśara) and many commentaries (including the Mitākṣarā) hold that the four varnas exist in the Kali age

Vide H. of Dh. vol. II pp. 380–382 about the existence of ksatriyas in the Kali age.

The case of conflict between smrti and customs has now to be considered. The general rule deduced from Vas. I. 5, Yāj. I. 7 and supported by the Mit. (on Yāj I. 7 and II. 117), the Sm. C. (II. p. 266), Kullūka (on Manu. II 10) and several others is that smtri is of superior authority to the usages of the śistas. But from early times there have been dissenting voices. Viśvarūpa on Yāj. III. 250 states that that purport of the smrtis is to be followed which is in accordance with the settled practice of the śistas resident in Āryāvarta[1705]. On Manu IV. 176 Medhātithi points out that *niyoga* is permitted by such smṛtis[1706] as Gaut. 18. 4–14, Yāj. I. 68–69, Vas 17. 56–65, but being condemned by the people it is not practised. Therefore the principle that may be deduced from these is that the prescriptions of smrtis (and even of śruti) need not be observed and should not be observed when they are vehemently condemned by the people. The chapter on Kalivarjya will make this clear. Commentators like Medhātithi (on Manu II. 10) went so far as to say that Dharmaśāstra is that which prescribes what is to be done for attaining dharma, that is smrti from which dharma which one performs as a duty is understood and therefore śistācāra[1707] also is smrti. The smrtis themselves embodied the practices of the people current in their days, as Manu I. 107 declares, 'in this work dharma has been fully stated as well as the good and evil qualities of (human) actions and the ancient customs and usages of the four varnas.'[1708] Manu adds (I. 108), 'ācāra (customs and usages) are transcendental law, and so are the practices declared in the Veda and the smrti; therefore a twice-born person desirous of his own welfare should always

1708. अस्मिन्धर्मोऽखिलेनोक्तो गुणदोषौ च कर्मणाम् । चतुर्णामपि वर्णानामाचारश्चैव शाश्वतः ॥ मनु I 107, on which मेधा. says 'शाश्वतो वृद्धपरम्परया नेदानीन्तनैः प्रवर्तितः'.

make efforts to follow it'.[1709] This has been the basic text in modern decisions that recognize the binding nature of customs. It is therefore necessary to understand the exact meaning of this verse. Two constructions are possible; (1) that the word ācāra is qualified by the words 'śrutyukta' and 'smārta' and that the first half declares that usages declared in the Veda or smṛti are transcendental law (this is the meaning given by most commentators of Manu); (2) that ācāra by itself and other rules of conduct declared in the śruti or smṛti are transcendental (i. e. here in the first half of the verse there is a reference to three kinds of ācāras, as Govindarāja and Nandana explain). If we look to the preceding verse and the following verses (that eulogise ācāra) the 2nd construction looks more natural and has been accepted by the decided cases when[1710] they lay down that 'immemorial usage is transcendental law' (Sir William Jones' translation of Manu I. 108) and that "under the Hindu system of law clear proof of usage will outweigh the written text of the law". The Anuśāsana (141. 65) and Śānti 354. 6 expressly state that dharma is threefold viz. that declared in the Veda, that declared in the smṛtis and the third is what is practised by śiṣṭas. Sumantu[1711] emphatically declares that family usage should be preferred to the prescriptions of śāstra. The Kūrmapurāna[1712] (Uttarārdha 15. 19) appears to support the 2nd interpretation when it says, 'one should observe that ācāra which is declared by the śruti and smṛti and which is rightly followed by the good'. The exact import of the word ācāra (or sadācāra) has been shifting from age to age and among commentators. In the earliest days, as shown by the Tai. Up., Gaut. (28. 48, 51), Baud Dh. S. I. 1. 4–9, Manu XII. 108–109,

1711. तस्मिन् कुलक्रमागतमाचारं स्वाचरेद् बुध । स गरीयान् महाबाहो सर्वशास्त्रो-दितादपि । सुमन्तु q by स्मृतिमु (वर्णाश्रम) p. 7.

1712. श्रुतिस्मृत्युदित. सम्यक् साधुभिर्यश्च सेवित । समाचारं निषेवेत नेहेतान्यत्र कादिचित् ॥ (कूर्म, उत्तरार्ध 15. 19).

Vas. I. 6, the ācāra to be followed was that observed or declared by learned brāhmaṇas who were highly moral and selfless (the śiṣṭas) Medhātithi on Manu II. 6 states that binding ācāra is that of śiṣṭas learned in the Vedas Gradually every usage that had no visible secular purpose came to be looked upon as binding and lastly the usages of śūdras, of *pratiloma* castes and even of heterodox sects became, as will be shown in the sequel, enforceable by the king. As observed in 39 Mad. 298, 301 the commentaries indicate an attempt to reconcile the text law with the actual usages of the people.

The requisites of valid customs, according to the smṛtis and commentaries and digests, are similar to those laid down by the writers on Pūrvamīmāṃsā *i. e.* they must be ancient, must not be opposed to śruti and smṛti, must be such that they are regarded by respectable people as obligatory on them and such as are observed with that consciousness by the śiṣṭas, they must be strictly construed and cannot be availed of by others not within their purview and must not be immoral or severely condemned by popular sentiment Customs once in vogue may be abandoned by the people as the chapter on Kalivarjya will show.

From Gaut., Manu, Br., Kāt and other writers quoted above it follows that the customs and usages of which account has to be taken are those of districts (deśa or janapada), towns and villages, castes, families, guilds or corporations or groups (gaṇa, śreṇi, saṅgha, naigama, varga). A few words on each of these and on usages of *gotras* and *śākhās* will be said later on and a few illustrations of each will be given. But first of all certain preliminary observations have to be made about customs in general. The medieval writers on Dharmaśāstra make it clear that customs that depart from the generally received smṛti prescriptions must be strictly construed and that they cannot be extended on the ground of analogy to other matters outside the specific acknowledged customs For example, both the Sm C (I. 71) and the Smṛtimuktāphala[1713] (on Varṇāśrama p 31) say that, though one's maternal uncle's daughter can be married (by custom) yet one's mother's sister or mother's sister's daughter

---

1713 अतो ब्राह्मादिविवाहेषु निवृत्तसपिण्डभावाया मातृस्वसपिण्डत्वान्मातुलसुता परिणेया। एवं पैतृष्वस्रेय्यपि। न च तथाविधा मातृष्वसा तद्दुहिता च किमिति न परिणेयेति वाच्यम्। शास्त्राविरोधेपि लोकविरुद्धत्वाद्धर्म्यमपि लोकविद्विष्टं तन्नाद्रुहेयम्। तदुक्तं मद्वना 'अस्वर्ग्यः ... चरेच्च तु इति। स्मृतिषु (वर्णाश्रम p 131). Vide H. Dh. vol II. p. 467 *n.* 1096 for the passage of the Sm. C. almost in the same words

cannot be married, because popular sentiment is opposed to the latter kind of marriages and popular sentiment has to be respected as Manu declares (in IV. 176). Similarly the Saṁskāra-kaustubha[1714] and the Dharmasindhu provide that where there is a local or family usage for narrowing down the limits of sapinda relationship in marriage, only those who belong to that locality or family can avail themselves of such narrowing down, but if a person in a different locality or belonging to a different family were to follow the practice of narrowing down the sapiṇḍa relationship, he would incur blame. Owing to the vastness of Bharatavarsa it was recognised that what was sadācāra in one country would not be so in another, as is noted by the Par. M. (I. 2. p. 65) in relation to marriage with one's maternal uncle's daughter.[1715]

A few words may now be said about customs of countries. That usages about details of ritual varied a great deal even in the Vedic times is quite clear. The Śat Br. (I. 1. 4 13) notes that in former times it was the wife of the sacrificer that rose at the Haviskrt call, but that in its own day the wife or a priest (the Āgnidhra) rises in answer to the call. Vide H. of Dh. vol. II. p. 1027 and n. 2311 on the Haviskrt call. For similar differences in practices vide the same Brāhmana XII. 3. 5. 1 and XII. 6 1. 41. The Ait. Br. frequently refers to one view and refutes it by saying that one should not do so (*tat tathā na kuryāt*) or one should discard it (*tat tat nādṛiyam*) e. g. vide chap. 12 7, 17. 1, 18. 8, 28 1, 29. 5. Vide also Tai. Br. I. 1. 8, I. 3. 1, III. 8 8 for similar words. That different districts had different customs about marriages and other matters even before the times of the grhyasūtras and dharmasūtras has been

---

1714 Vide H of Dh vol. II p 465 *n.* 1093d for the quotation from the Dharmasindhu. The सं. कौ p 613 remarks 'यस्तु देशाद्युल्लेखेन कुलमार्गेण चोद्वहेत्। नित्यं स व्यवहार्यः स्याद्वेदाच्चैतन्मतीयते ॥ इति चतुर्विंशतिमताच्च। तृतीयां मातृतः कन्यां तृतीयां पितृतस्तथा। विवाहयेन्मनु प्राह पाराशर्योऽङ्गिरा यमः॥ इति चन्द्रिका-पारिजातोदाहृतषट्त्रिंशन्मताच्च'। and adds (p 620) अतः सिद्धमेतत्। कलावपि येषां कुले देशेऽनुकल्पत्वेन सापिण्ड्यसङ्कोचः परम्परया समागतः तेषां तादृशसङ्कोचेन न दोषः अस्ति च भार्यात्वोत्पत्तिः। अन्येषां तै. सह व्यवहारे नैव दोषः। स्वयं तु कुलदेशाविरुद्धसापिण्ड्यसंकोचेन विवाहे भवत्येव दोषः। The two verses यस्तु देशा० and तृतीयां are quoted by the वैजयन्ती on विष्णुधर्मसूत्र 24. 10.

1715 यद्यपि मातुलसुतापरिणयनमुदीच्यशिष्टगर्हितं तथापि दाक्षिणात्यशिष्टैराचरितत्वेन नाविगीतोयमुदीच्यानामाचारः। न च दाक्षिणात्यानां रागमूलत्वं शङ्कनीयं विधिनिषेध-परीक्षकैरेव तद्विवाहकरणात्। मातृष्वसृसुतावियादस्तु अविगीतेन शिष्टाचारेण गर्हितः। परा मा I. part 2 p 65.

noted above (pp. 856–857) Baudhāyana made a distinction about the customs of the northern and southern people (countries). That customs of the northern and southern countries differed is emphasized by many commentators and writers of digests. For example, the Mit. on Yāj. I 256 refers to the differing views of dākṣinātyas and udīcyas on Ekoddiṣṭa-śrāddha. Śaṅkara-bhaṭṭa in the introductory verses of the Dvaitanirṇaya (or Dharma-dvaita-) expressly states that he will furnish solutions of knotty points in Dharmaśāstra after abiding by the views of southern writers.[1716] The Nirnayasindhu in its section *on* sāpiṇḍya speaks of Śūlapāṇi, Vācaspati and Śuddhiviveka as Gaudas and Maithilas, and points out that Śūlapāṇi in the Sambandha-viveka and the Sambandhatattva (a Gauḍa work) allow marriage with a girl separated by three gotras from the bride-groom, while the southern writers (dākṣinātyas) do not accept the view. But in those days there were no rigid territorial boundaries for certain practices or doctrines. For example, Vijñāneśvara, Madana-ratna, Pārijāta, Vācaspati and Śūlapāṇi accepted the view that sāpiṇḍya arises from community of the particles of the body, while Aparārka, Smṛticandrikā and Mādhava (though they were southern writers like Vijñāneśvara) held that sāpiṇḍya was based on the offering of piṇḍa in śrāddhas. The fashion of dividing Hindu works into schools and assigning them definite territorial limits started with Colebrooke and has been perpetuated by decisions of the Privy Council and of the Indian High courts Vide *Collector of Madura v. Mootoo* 12 Mad. I.A. 397 at p 432 (for reference to Colebrooke), p 435 (as to how schools arose), pp. 436–437 (as to different schools) Strange results have flowed from this. The Vyavahāra-mayūkha, written by Nīlakaṇṭha, whose family belonged to Paithan in Mahārāstra and migrated to Benares and who himself wrote under the patronage of a Bundella chief, came to be regarded as a work of the highest authority in Gujerat and North Konkan (even superseding the Mitāksarā), while in Mahārāstra proper its authority is subordinate to that of the Mitāksarā. The Mit (on Yāj. II. 119) avers that in the section on the partition of heritage the texts generally repeat what is

---

1716. मीमांसाद्वैतसाम्राज्यनीतिज्ञो भट्टशङ्करः । .. गुरोश्च त्रिस्थलीसेतुकर्तुर्ज्ञात्वा मतानि तु । दाक्षिणात्यमते स्थित्वा धर्मद्वैतेषु निर्णयम् । तनुते सोऽविगाह्यैव नावनान्य कथंचन ॥ धर्मद्वैतनिर्णय *Intro.* verses 5–8.

already current among the people[1717] and that if Yāj. II. 118–119 were interpreted to mean that the words 'what is acquired at the cost of paternal estate by a person himself' stand by themselves and do not qualify the other clauses, then what is acquired through friendship even at the cost of the paternal estate would not be liable to partition, which would be opposed to the practice among people. The Vyavahāra-mayūkha also[1718] says on Manu IX. 210 (about reunion) that the law and administration of justice are generally based as is the case with grammar on people's usages. The Vīramitrodaya also states that all writers of digests are agreed that smrtis on Vyavāhara generally re-iterate recognized popular usages.

Customs of countries and families have been specially recognized from very ancient times in the sphere of marriage. The Āsv. gr. (I. 7. 1–2) has been already cited above (p. 856). The commentators on Āśv. gr., Haradatta and Nārāyana, both mention that in certain countries sexual intercourse is commenced immediately after marriage, that this practice is opposed to the rule in Āśv. gr. I 1. 10 that the married couple should be celibate after marriage for at least three nights (if not for a longer period) and that one should follow the rule laid down in the grhyaśūtra and not the usage of the country. The Āp. gr. (II. 15) remarks,[1719] 'people should understand from women (and others) what procedure is (to be followed according to the custom of the country)' and the commentator Sudarsanācārya notes that certain rites like the worship of planets, *aṅkurāropana* and the tying of *pratisara* (a string or ribbon tied round the wrist) are usual and are performed with Vedic Mantras The Kāthakagrhya (25. 7) allows the usages of countries and families to be observed in marriage and the

commentators mention some usages, viz. Devapāla refers to stating the purpose of the visit, announcing the name of the maiden, worship of family deity, striking with flowers and creepers. The com. Brāhmaṇabala states that in Kashmir at the time of marriage the mother-in-law or some other woman whose husband is alive ties an auspicious wreath on the heads of the bride and the bridegroom, that the mother-in-law places flowers on the feet, knees, shoulders and head of the bridegroom and on the same seven places of the bride's body flowers are placed but in the reverse order (i. e. first on the left limb and then on the right).

Haradatta on Gaut. XI. 20 (cited above in n 1662) mentions the following usages: in the Cola country while the sun is in the zodiacal sign of Aries maidens draw with powders of various colours on the ground an orb of the sun together with attendants and offer worship in the morning and evening; on the full moon day of Mārgaśīrsa maidens putting on ornaments walk about in the village and offer to a temple idol whatever they get in their wanderings; when the sun is in the sign of the Crab, maidens worship the goddess Umā while the moon is in the constellation of the Pūrvā Phalgunīs and offer to the gods *mudga* beans that have put forth sprouts and salt; when the sun is in the sign of Pisces, house-holders worship the Goddess of wealth while the moon is in the constellation of Uttarā Phalgunī. Āp. Dh. S. II. 6. 13. 7 notes that in certain countries the special portions of the eldest son in paternal wealth are gold, dark-coloured cattle and black-coloured produce of the soil (i. e. black grain). Vide Br. and Tantravārtika quoted above (as to customs of certain countries).

Several such illustrations may be furnished from other writers, but considerations of space make it necessary to omit reference to them.

The Pār. gr. S. I. 8 states[1720] that the usages of villages may be followed, since a text says 'one should enter a village (i. e. follow the opinion of village elders) in case of marriage and funeral rites' and since the Veda says that 'the village is the authority in these two.'

1720. ग्रामधर्मान् च कुर्युर्विवाहश्मशानयोर्ग्रामं प्रविशतादिति वचनात्तस्मात्तयोर्ग्रामः प्रमाणमिति श्रुतेः । पार. गृ. सू. I. 8

Numerous caste customs have been recognized from ancient times to these days. Gaut. XI. 20, Vas I. 17, Manu I. 118, VIII. 41 and 46, Kaut. III. 7, Śukra IV. 5. 47 emphasize the validity of caste customs and call upon the king to enforce them. Yāj. I. 361 advises the king to punish those who swerve from the usages of their family, caste, guild, or group. Kātyāyana (40) enjoins[1721] that the king should not disregard the fixed usages even of *pratiloma* castes and of the inhabitants of inaccessible places (mountain forts or habitations), even if they be opposed (to the rules of smṛtis). In the Paribhāṣāprakāśa Mitramiśra holds[1722] that the usages of good śūdras free from moral defects are binding on their sons and others even though they do not know the Veda.

Compared to Western Christian countries very great religious tolerance prevailed in ancient India Vide H. of Dh. vol. II. pp 388 (n. 928 a), 723–724 for some remarks on this. Aśoka in his Pillar Edict VII (E I. vol. II. p. 272) says that he looked after sanghas, brāhmaṇas, Ājīvakas and all other sects (pāsaṇḍa). The Bhagavadgītā (IX. 23–25) proclaims that the devotees that worship other gods do worship Krsna himself though in an irregular way and that those who offer worship to the Manes or to the elements reach the goals they desire. The Mānasollāsa enjoins[1723] that one should give up condemnation of or hatred towards other gods, that one should show reverence on seeing an image or a temple and should not pass it over (in contempt). People of different countries no doubt twitted each other on the customs and usages peculiar to each; but it rarely went beyond the bandying of words. For example, even such a

philosophical work as the Jīvanmuktiviveka remarks[1724] that brāhmanas of the south condemn even the learned brāhmanas of the north as flesheaters and brāhmanas of the north condemn southern brāhmanas because they marry their maternal uncle's daughters and because they carry earthen vessels in fairs or on pilgrimages. It was on account of the general attitude of religious tolerance that the smrtis and digests prescribe that even the usages of heretical sects should be enforced by the king. Yāj. II. 192 prescribes[1725] that the king should guard against breach of the distinctive usages and conventions of guilds (of artisans), of traders, of heretical sects and bands (of soldiers). Nārada (samayasyānapākarma 1-3) states[1726] that the king should uphold the conventions of heretical sects, of traders, guilds and other groups and that whatever traditional usages, activities, mode of attendance and means of maintenance were peculiar to them should be permitted to them by the king without introducing any change. Among the matters of which the king was to take cognizance *suo motu* and included under prakīrnaka by Nārada (verse 2) was the transgression of the usages of heretics, traders, guilds and ganas. Brhaspati provides[1727] that in disputes among husbandmen, artisans, wrestlers, moneylenders, guilds, dancers, heretics, thieves, a decision is to be given in accordance with their conventions. It is no doubt true that certain smrtis present a sterner treatment of heretics and

the like Gaut. IX. 17 provides[1728] that a snātaka should not talk with *mlecchas*, impure persons and sinners. Manu IX. 225 prescribes that the king should banish from his capital gamblers, dancers, heretics, vintners &c. Manu IV. 30 holds that one should not honour as guests even by words persons who are heretics, rogues &c. and recommends that one should not reside in a country which is overrun by groups of heretics. Yāj II. 70 and Nār. (rnādāna 180) say that a heretic (pākhandi) or an atheist is not a proper witness These passages may be explained in various ways. Probably the prescriptions of Gautama and Manu refer to an age when the schism caused by Buddhists and Jainas was not very old and feelings between the followers of the Veda and the heretics ran high. But most of these prescriptions are addressed to the followers of the Veda as individuals. They do not negative the requirements laid down by Nār., Br. and others that the king (though of a different persuasion) was to enforce among heretics their own usages. It can be said without any fear of contradiction that at least from the 4th century A. D. onwards the policy of the State in India was 'to *protect* all religions, but to interfere with none'.[1729]

Customs of families will be briefly referred to later on in connection with modern law cases Among family customs the customs about the year when *caula* was performed and the locks of hair kept on the head in the caula ceremony are frequently mentioned in the grhya sūtras and other works Vide H of Dh. vol. II pp. 260 and 265

The digests contain numerous examples about the customs and usages that were adhered to among the followers of the several Vedic branches (śākhās) and the grhya sūtras in performing several religious rites A few examples may be set out here by way of illustration. According to Yāj. I. 242 the offering of *piṇḍas* to the *pitrs* in a śrāddha takes place after the brāhmanas invited at the srāddha are fed, while Manu III. 261 shows that they were offered also before the brāhmanas were fed. The Sm C (on srāddha p. 471) says that one should follow the practice of one's own Vedic sākhā Among the five daily sacrifices (*mahāyajñas*) one is pitryajña, which acc. to some (such as Kātyāyana) means tarpana, while according to Manu

1728 न म्लेच्छाश्चोपधार्मिकैः सह सम्भाषेत। गौ IX 17.

1729 Vide *Vasudev v Vamnaji* 5 Bom 80 at p 82 where Melvill J states that this is the policy of the British Courts in modern India

III. 81 it means śrāddha and the Sm. C. (I. p 208) provides that one should follow one's śākhā. The same remark applies to the number of handfuls of water offered in *tarpana* (Sm. C. I. p. 191 and Madanapārijāta p. 286). About the month of pregnancy in which the ceremony of simantonnayana was to be performed each person was to follow his own grhyasūtra (Sm. C I. p. 17, and Par. M. I. part 2 p. 22). The same holds good as to the day of nāmakarana (Sm. C. I. p. 21, Par. M. I. part 2 p 25). It is not necessary to multiply examples. According to Gaut. XI. 21–22 and others already cited above, the king has to enforce the usages of guilds (śreni) and corporations. Several such usages have been cited above (pp. 487-488)

CHAPTER XXXIV

KALIVARJYA

(ACTIONS FORBIDDEN IN THE KALI AGE.)

It has been stated above (pp. 865–866) that one of the several ways in which the conflict between several smrti texts was got over was to hold some of them as legislating for a bygone age (yugāntara). For example, when Hārīta allowed upanayana to women, both the Sm. C. (I. 24) and Par. M. (I. 2. p. 83) hold that the text refers to another *kalpa* (aeon). In H of Dh. vol. II. (on pp. 151, 162, 424, 451, 603, 612, 620, 750, 790, 796, 928, 929, 934, 953, 1005 n, 1201 n) reference has been made to several matters forbidden in the Kali age. It is remarkable in this connection to note that, though the Parāśarasmrti (in I. 24) claims *par excellence* to lay down the dharmas for the Kali age, several important provisions contained in it, viz. the remarriage of a married woman[1730] (Parāsara IV. 30), the variation in the period of impurity due to births and deaths depending on the learning and character of a brāhmana (Parāśara III. 5–6), permission for a brāhmana to partake of the food of five classes among śūdras (XI. 21) are included among Kalivarjyas by the Ādityapurāna (as quoted by writers of the 12th and later centuries). It is necessary, therefore, to investigate into the origin and development of the Yuga theory and of the topic of Kalivarjya.

From the Mahābhārata (Śānti 59), Manu (I. 81), Nārada (I. 1–2), Brhaspati and the Purānas it is clear that they all believed in the existence of an ideally perfect community in the dim past followed by gradual degeneracy and decline in morals, health and length of life. But they also believed that a cycle of decline would be followed in the far distant future

---

1730 Some of the printed editions of Parāśara (IV. 30) read नष्टे मृते ... पतितस्यो न विद्यते But the Par. M. on it (vol. II part 1 p 53) makes it clear that this reading was fabricated by orthodox people and that Mādhava at least read it as पतितस्यो विधीयते, as he remarks 'अयं च पुनर्वाहो युगान्तरविषय.'.

by another of moral perfection. The only pity is that all works that are extant think that they are in the midst of a very sinful age and there is not a single work which thinks that the era of perfection may dawn in the very near future

The germ of the theory of progressive deterioration in morals is found even in the Ṛgveda. In the famous dialogue of Yama and Yamī the former exclaims in one place[1731] (Ṛg X. 10. 10) 'those later ages are yet to come when sisters would do what is not sister-like'. The word 'yuga' occurs at least 33 times in the Ṛg., but the exact meaning is somewhat doubtful. In a few places it means 'yoke' (Ṛg X 60 8, X 101. 3 and 4). In several places it appears to stand for a very brief period of time (e. g. Ṛg. III. 26. 3) Generally it means 'a generation' (as in Ṛg. I 92 11, I. 103. 4, I 124 2, II 2 2, III. 33 8, V. 52 4) In Ṛg. I 158. 6, 'dīrghatamā māmateyo jujurvān daśame yuge' *yuga* probably means 'a period of four or five years', while in Ṛg. VI 15. 8, VI. 8 5, X 72 2, X. 94 12, X 97. 1 it should mean[1732] 'a long period of time'. In the Atharvaveda VIII. 2. 21 yuga appears to mean a period of several thousand years, two yugas being indicated as longer than 10000 years (*śatam teSyutam hāyanān dve yuge trīṇi catvāri kṛnmaḥ*). Here there is a clear reference to four yugas and to the fact that yuga meant a very long period of time. Whatever be the meaning of the word in each passage, the Ṛgveda does not contain the names of all the four well-known yugas viz. Kṛta, Tretā, Dvāpara and Kali. The word 'Kṛta' when used in the Ṛgveda appears to mean 'the best throw of dice or of the seeds of vibhītaka in gambling' (X. 34. 6, X. 43 5). In the Atharvaveda VII. 52. 2, 5, 6 kṛta has the same meaning Kali is the name of the author of Ṛg. VIII. 66 and in verse 15

1731. आ घा ता गच्छानुत्तरा युगानि यत्र जामय कृणवन्नजामि। ऋ. X 10. 10. The Nirukta (IV. 20) understood this verse in the sense given above 'आगमिष्यन्ति तानि उत्तराणि युगानि यत्र जामय. करिष्यन्ति अजामिकर्माणि' Ṛg I. 113. 13 and III 33. 8 make it clear that उत्तर must mean' future'. शश्वत्पुरोषा व्युवास देव्यथो अद्येद् व्यावो मघोनी। अथो व्युच्छादुत्तरां अनुद्यूनजरामृता चरति स्वधाभि॥ ऋ I 113 13. Here the occurrence and sequence of पुरा, अद्य and उत्तरान leave no donbt about the meaning of the last word.

1732. या औषधी. पूर्वा जाता देवेभ्यस्त्रियुगं पुरा। ऋ. X 97 1. Here what is meant by त्रियुग is doubtful The निरुक्त IX 28 explains देवेभ्यस्त्रीणि युगानि पुरा, while सायण says कृतात्रियुगत्रयम्. In the शतपथ VII 2. 4 26 त्रियुगं means 'three seasons of spring, rains and autumn' (S. B. E. vol. 41 pp. 339-340).

of that hymn we read 'kalayo mā bibhītana' (O descendants of Kali! do not be afraid). In Rg. X. 39. 8 the Aśvins are said to have rejuvenated Kali who had become old. Vide also Rg. I. 112. 15 (where Kali is said to have got a wife from Aśvins). But Kali as a throw of dice does not occur in the Rgveda In the Atharvaveda VII 114 1 Kali[1733] means a throw of dice. The words *krta*, *tretā*, *dvāpara* and *āskanda* occur in the Tai S. IV. 3. 3, Vāj S. 30. 18[1734] and in the Śat. Br. XIII. 6. 2. 9-10 (S. B. E. vol. 44 p. 416). In later literature Kali is also called Tisya (as in Bhīsmaparva 10. 3). In the Tai Br. III. 4. 16 the word Kali is used[1735] in place of Āskanda. In all the above places Krta and the other three words denote throws in gambling, Krta being the most lucky and Kali being the most unlucky. In another passage of the Tai[1736] Br. (I. 5. 11) we read 'the four stomas (Trivrt, Pañcadaśa, Saptadaśa and Ekavimśa) are Krta and the five are Kali; therefore the *catustoma* (should be performed in the Jyotistoma)'. This shows that Krta meant a throw of four or any multiple of four and Kali a throw which when divided by four left one as remainder. The Aitareya Br. employs the words Krta[1737] and the other three in a metaphorical sense as representing progressively more desirable states of human activity, 'one lying down becomes Kali, when about to leave the bed he becomes Dvāpara, when rising he becomes Tretā, and when he moves about he

The meanings of these technical expressions in gambling are extremely uncertain

1736 ये वै चत्वार स्तोमाः कृतं तत्। अथ पञ्च कलिं स.। तस्माच्चतुष्टोम। तै. ब्रा I 5 11.

1737 कलि. शयानो भवति सञ्जिहानस्तु द्वापर। उत्तिष्ठंस्त्रेता भवति कृतं सम्पद्यते चरन्। ऐ ब्रा 33 3 The शाङ्खायनश्रौत (15 19) reads कलि शयान पुरुष· and उत्तिष्ठत्त्रेता भवति. मनु IX. 301-302 seem to be reminiscent of this verse of the ऐ. ब्रा.

becomes Kṛta'. The Śat. Br. V. 4. 4. 6 speaks of Kali[1738] as '*abhibhū*' (the vanquisher) and suggests that Kali is a throw of five that vanquishes all others. In the Chān. Up. IV. 1. 4 it is said 'as (in a game[1739] of dice) all the lower throws are included in the Krta throw which becomes victorious, so to him (to Raikva) comes (the merit of) all the good acts that people do'. Here Śaṅkara explains that Krta is a throw of dice having four marks, while other throws that have three, two or one mark are called Tretā, Dvāpara and Kali respectively. The Mundaka Up. I. 2. 1 refers to Tretā[1740]. 'This is the truth; the sacrificial rites which the sages saw in the *mantras* (i. e. as prescribed in the hymns of the Ṛgveda and other vedas) have been performed in many ways in the Tretā'. This last word is explained by Śaṅkarācārya in two ways, first as referring to the threefold priestly duties (of hotr, adhvaryu and udgātr) which are based on the three Vedas and alternatively as referring to the Tretā age. From this resume it appears that even up to the times of the latest period of Vedic literature (i. e. Upanisads) the words Krta, Tretā, Dvāpara and Kali were used in the sense of throws of dice in gambling and that it is very doubtful whether they were used in the sense of different ages of the world. Even in the Mahābhārata Krta[1741] and Dvāpara are used also in the sense of throws of dice (vide Virāta 50. 24). In the Gopatha Brāhmana (I. 28) there is a reference to the beginning of the Dvāpara age.

Even in the Vedānga Jyotisa[1742] (of Ṛg.) the word *yuga* is used in the sense of a period of five years (pañcasamvatsaramayam

yugādhyakṣaṁ prajāpatim). The ancient Pitāmahasiddhānta which is not now extant, stated, according to the Pañcasiddhāntikā of Varāhamihira (XII. 1), that *yuga* means five years of the Sun and the Moon (raviśaśinoḥ pañca yugam varṣāni Pitāmahopadiṣṭāni). This sense of the word is still found in the Sabhāparva 11. 38.

The Nirukta (I. 20) distinguishes between ancient sages and those of later days in the words,[1743] 'the (ancient) sages had an intuitive perception of *dharma* and they imparted the Vedic mantras by instruction to later (sages) who had no intuitive perception of dharma'. But it does not mention or refer to any theory of four yugas. Both Gaut. I. 3–4 and Āp. Dh. S. II. 6. 13. 7–9 give expression to the view that among sages of old transgressions of dharma and violent actions are observed, but that on account of their distinguished spiritual greatness they incurred no sin, while a person of later days, being weak in spiritual merit, should not imitate them, otherwise he would come to grief. Here a distinction is drawn between very ancient sages and later sages as regards the endowment of spiritual merit, but nothing is said about the names or the theory of the four yugas. Āp. Dh. S. I. 2. 5. 4 further says[1744] that sages are not born among men of later days (*avareṣu*) on account of the transgressions of religious ordinances (prevalent in later ages). Therefore, it would not be quite wrong to assume that the theory had not been fully developed even in the times of the early dharmasūtras of Gaut. and Āp. even though both held that they were living in an age of decline and that sages coming after the authors of the *mantras* were inferior.

Here epigraphic evidence affords some help in fixing the lower limit of the period when the theory of yugas must have been developed.

In the Rock Edicts of Aśoka No. 4 and No 5 we have at Kalsi and two other places the words 'āva kapam' (yāvat kalpam) and at Girnar the words 'āva saṁvaṭa kapa' which mean 'up to the end of the kalpa' or 'up to the end of the kalpa when the clouds or fires of destruction called saṁvarta

1743. साक्षात्कृतधर्माण ऋषयो बभूवुस्तेऽसाक्षात्कृतधर्मभ्य उपदेशेन मन्त्रान्सम्प्रादुः। निरुक्त I. 20. Almost the same words occur in वनपर्व 183. 67

will arise'[1745]. Vide C. I. I. vol I. pp. 8, 10, 30–33. This indicates that the idea of a *kalpa* (a vast period of time at the end of which the universe would be dissolved) which is part of the theory of the yugas had been developed in the 3rd century B. C. The Junāgadh Inscription of Rudradāman[1746] (150 A. D.) refers to 'wind the velocity of which was as terrible as that at the end of the yuga'. In certain very early inscriptions of Pallava[1747] kings (of about the 3rd or 4th century A. D.) they are described as 'always ready to extricate dharma that had sunk deep owing to the evil effects of the Kali age'. In one of the Gupta Inscriptions dated in the 96th year of the Gupta era (415–16 A. D) Dhruvasarman is praised as following the path of righteous conduct which prevailed in Krtayuga,[1748] while the Chammak copperplate of the Vākāṭaka emperor Pravarasena II also speaks of Krtayuga (Gupta Inscriptions No. 55 p. 237 at p. 240) The Talgunda inscription of the early Kadamba king Kakusthavarman refers to Kaliyuga (E. I. vol. VIII p. 34) It is not necessary to adduce passages from inscriptions of a later date. From the above it may be said that the theory of yugas and kalpas had begun to take shape at least in the 4th or 3rd century B. C. and that in the first centuries of the Christian era it had been fully developed. It must have gone through several stages in the course of its development. For example, Brahmagupta (Brāhmasphuta-siddhānta XI. 10) states that the theory of yugas, Manus and kalpas set out by Āryabhata was not like that of the smṛtis.

The same conclusion is arrived at from a consideration of the classical Sanskrit literature. The theory of *yugas* and *manvantaras* as detailed in the Mahābhārata (Vanaparva chapters 149, 188, Śānti chapters 69, 231–232), Manu chap. I, Visnudharma-sūtra XX. 1–21, the Purānas (such as Visnu I. 3, VI. 3, Mārkandeya 46, Brahma 229–230, Matsya 142–144) and astronomical writers from Brahmagupta is briefly as follows: Krta, Tretā, Dvāpara and Kali comprise together with the period

called *sandhyā* (that precedes each yuga) and the period called *sandhyāṁśa* (that follows each yuga) 12000 years, i e. Krta, Tretā, Dvāpara and Kali extend respectively over 4000, 3000, 2000, 1000 years and sandhyā and sandhyāṁśa of these four extend over 400, 300, 200 and 100 years each (i. e the sandhyā of Krta is 400 years and the sandhyāṁśa of Krta is 400 years and so on). But these are divine years. Each divine year is equal to 360 human years. Therefore we have to multiply 12000 by 360 to arrive at the number of human years in the four yugas (i. e. the figure is 4320000). The Krtayuga with its sandhyā and sandhyāmsa comes to 1728000 human years, Tretā to 1296000, Dvāpara to 864000 and Kali to 432000 These four yugas are together called sometimes caturyuga (Manu I 71) or simply yuga also (Vanaparva 188. 27, Śānti 232. 29); 1000 of these four yugas constitute a day of Brahmā, which is called Kalpa. The night of Brahmā is of the same duration. At the end of a kalpa the universe is resolved into Brahmā (and this is called *pralaya*) and at the end of Brahmā's night the world is created again In one day of Brahmā there are 14 Manus and therefore each Manvantara is equal to about 71 caturyugas (1000 divided by 14) The life of Brahmā is 100, out of which half is gone and therefore the present is said to be the 2nd or latter half (*dvitīya parārdha*) of the life of Brahmā and at present the kalpa that is running is called Vārāha From the above it will be seen that, according to the Purānas, the universe has been created and dissolved many times and there have been numerous Manvantaras also (vide Manu I. 80) The four yugas in various ways differ in their characteristics. Krta is so called because it is an age in which everything is fulfilled by every one and nothing is left to be done [1749] The symbolic colours of the four yugas are respectively white, yellow, red and dark (Vanaparva 189. 32) In Krta, Dharma prevails in all its perfection and it stands with all its four feet (dharma being figuratively spoken of as vrsa,[1750] a bull, in Manu VIII. 16 and Vanaparva 190. 9) and it declines or deteriorates by a quarter in each of the following yugas (Manu I. 81–82 =Śānti 232. 23–24), so that in Kali only one quarter (or one foot) of dharma remains and adharma occupies three quarters. In Krta people are entirely free from diseases, secure all that

1749 कृतमेव न कर्तव्यं तस्मिन् काले युगोत्तमे। वनपर्व 149 11.

1750. कृते चतुष्पात्सकलो निर्व्याजोपाधिवर्जित । वृष प्रतिष्ठितो धर्मो मनुष्ये भरतर्षभ ॥ वनपर्व 190. 9.

they desire and the length of human life is four hundred years, all of which decline by one quarter successively in the following three yugas (Manu I. 83=Śānti 232 25). The dharmas in each of the four yugas are different; *tapas* was the highest in Kṛta, philosophic knowledge in Tretā, sacrifice in Dvāpara and charity alone in Kali (Manu I. 85-86=Parāsara I. 22-23 =Śānti 232. 27-28). Manu I. 85, Śānti 232 27 and 261. 8, Parāśara I. 22 all have the same verse stating that the dharmas prescribed for men in each yuga differ.

In Kṛta, Tretā, Dvāpara and Kali the dharmas (that should be observed) are respectively declared by Manu, Gautama, Śaṅkha-Likhita and Parāśara (Parāśara I. 24) In Kṛta there was a single varna but at the end of Kali almost all will be śūdras (Brahma 229. 52, Matsya 144. 78) Parāśara (I. 25-28) points out other characteristics of the four yugas, which need not be detailed here. Manu IX. 301 and 302, however, indicate that the yugas are not watertight parts of Time. It is the king who can by his conduct introduce the characteristics of one yuga into another. Medhātithi on Manu IX. 301 explains that the king should not be misled into thinking that Kali is a historical part of Time and that he (the king) cannot therefore be Kali or Kṛta, but that it is the king's way of conducting himself that will produce the conditions of the several yugas among his people.

In Vanaparva 149. 11-38, Vāyu 32 and 57-58, Liṅga 39, Matsya 142-144, Garuda 223, Nāradapurāna (pūrvārdha 41) and in several other purāṇas there are descriptions of the nature of the four yugas, which are passed over here But it is important to see how the Great Epic and the Purāṇas describe the nature of Kaliyuga. Vanaparva chap. 188 and 190, the Yugapurāṇa chapter of the Gargasaṁhitā (published in the J. B O R S. vol. 14 pp. 400 ff. by K. P. Jayaswal), Harivaṁśa (Bhavisya chap. 3.5 ff), the Brahmapurāṇa 229-230, Vāyu 58 and 99. 391-428, Matsya 144. 32-47, Kūrma I. 30, Visnu VI. 1-2, Bhāgavata XII. 2, Brahmānda II. 31, Nāradīya (Pūrvārdha 41, verses 21-88), Liṅga 40, Nrsiṁha 54. 11-49 and several others present, often in identical verses, a very pessimistic, dismal and harrowing account of what will happen in the Kali age. One extract[1751] taken from the Vanaparva (188) is added at the end by way of sample, of which a summary is given below. All men will generally be liars; in

1751. Vide Appendix.

the Kali age substitutes will be invented for *yajñas*, gifts and *vratas*; brāhmanas will do actions prescribed as peculiar to śūdras and śūdras will be acquiring wealth (which is the peculiar privilege of vaiśyas) or they will maintain themselves by following the profession of arms; brāhmanas giving up the study of the Veda and the performance of sacrifices and devoid of the staff and deer skin will eat anything (i. e. will not observe rules about *bhakṣyābhakṣya*); brāhmanas will not engage in *japa* (muttering of Vedic mantras), while śūdras will be intent on *japa*; when the world will be turned topsy-turvy, it will be the first indication of coming destruction; many *mleccha* kings will rule over the earth, who will be sinful, will issue false edicts and will be engaged in fruitless wrangling; there will be Āndhras, Śakas, Pulindas, Yavanas, Kāmbojas, Bāhlikas (from Balkh) and valiant Ābhīras (as rulers); no brāhmana will maintain himself by pursuing his own dharma; ksatriyas and vaiśyas will indulge in prohibited or bad activities; people will be short-lived, have little strength, their valour and prowess will be insignificant, their spirits will be low and their bodies diminutive and they will speak words that have very little truth; countries will be mostly untenanted and the spaces will be occupied by beasts and snakes; people will be engaged in dry discussions about *brahma* (they will have no realisation or experience of brahma), śūdras will employ the word 'bhoh' (in addressing others[1752] of higher classes) and brāhmanas will employ the word *ārya* (in addressing peoples other than brāhmanas); swarms of insects will abound; all perfumes will not smell as fragrant as before and fluids will lose their sweet taste; women will have numerous progeny, will be of short stature, devoid of character and good conduct and engage in sexual intercourse against the order of nature; countries will suffer pangs of hunger[1753], squares where four

---

1752. This would be against the rules of dharmaśūtras and smrtis about abhivādana Vide H. of Dh vol II. pp 336-339.

1753. Nilakantha notes that the verse अहशूला जनपदा. &c was variously explained before him, अह meant either 'food' or 'śulka': शूल means विक्रय, शिव means Veda, चतुष्पथ means ब्राह्मण or the square where four roads meet, केश means भग. नील० himself explains differently. According to him the explanation is. अहमन्नं तदेव शूलं दुःखद् येषा ते शुद्रप्याधिग्रस्ता, शिवा· सर्वपुरुषमार्थनीयतया कल्याणवत्यः शूलाः पण्यस्त्रियो येषु ते शिवशूला विटवाराङ्गनापूर्णा, स्त्रियो पाणिग्रहणवत्योपि केशोपलक्षितं सौभाग्यं लज्जामूलं शीलं शूलमिव दु खद त्याज्यं च यासां ता· केशशूलाः भर्तृद्वेषिण्यस्त्यक्तलज्जा· The शूद्रकमलाकर p 244 quotes the verse अहशूला and then remarks 'अस्यार्थमाह परशुराम· । 'अहमन्नं शिवो वेद शूलं विक्रय एव च । केशश्च भगमित्याहुर्वेदतत्त्वार्थदर्शिन ॥. '

roads meet will be full of *nautch* girls, and women will give up their chastity; cows will yield little milk; trees will produce few flowers and fruits and will abound in crows, brāhmanas will receive gifts from kings that are guilty of brāhmana murder and that falsely accuse others of grave sins, people in the various spaces will be dunned for alms by brāhmanas steeped in greed and ignorance, who falsely make a pretence of their being religious; householders afraid of the burden of taxation, guilty of thieving and subsisting on trade, will remain concealed under the false garb of ascetics; brāhmanas pretending to be brahmacārins will, through greed of wealth, fraudulently allow their nails and hair to grow; persons in the various stages of life, that observe false rules of conduct but are drunkards and indulge in incest, will desire mundane objects and the increase of flesh and blood, the āśramas (forest dwellings) will be full of various heretical opinions and will extol the merits of food provided by others (out of charity), Indra will not send down rain at the proper season and all seeds will not put forth proper growth; people will take delight in killing and will be impure and abundant will be the fruit of adharma; whoever will then be acting according to his dharma may be regarded as having a short time to live, since there will be no dharma whatever (in Kaliyuga); people will sell goods mostly with false weights and measures and traders will be full of many tricks; the righteous will wither away, the sinful will prosper; dharma will lose its strength and adharma will be powerful; those who follow dharma will have short lives and will be poor, while those who give up dharma will have long lives and will be prosperous, in the sporting grounds of cities people will be sinful (or adulterous) and people will enter into transactions by sinful means; people, that have saved a little, will be puffed up with the pride of the rich; people with whom wealth was deposited privately through trust will mostly be ready to deny the deposit, shamelessly saying 'it was never so deposited;' the sporting grounds of towns and temples belonging to towns will be infested by beasts and birds that prey upon human beings; girls of seven or eight years will become pregnant and males of ten or twelve years old will have sons born to them; people will be bald-headed in the 16th year and there will be quick decline in the length of the lives of men; young men whose lives will be short will act like old people and old people will have the habits of the young; women acting contrary to their duty

will deceive worthy husbands, will be of bad character and will have intercourse with slaves and even beasts; wives of heroes will resort to other men and will be guilty of adultery even while their husbands are alive.[1754]

The dates of the composition of the Purānas not being beyond controversy, it would be difficult to point to a particular period as the time when the full-fledged theory of the yugas was developed. But this much can be stated with certainty that by the 4th century A. D. at the latest the theory had been completely developed. Āryabhata[1755] (in Kālakriyāpāda 10) states that when three *pādas* of the yuga (i. e. Kṛta, Tretā and Dvāpara) and 3600 years more had elapsed, he was 23 years old i. e (accepting the calculations current at present) in 499 A. D. Āryabhata was 23 years old and so was born in 476 A. D In his Pañcasiddhāntikā Varāhamihira[1756] (505 to 587 A. D) summarises the data of several astronomical

---

1754. It would be interesting to compare the descriptions of Kali given in the Mahābhārata and the several Purānas. Some verses are common to several of them and the ideas are almost the same throughout. The principal counts in the indictment are that there will be śūdra and Mleccha kings, that heretical sects will predominate, that the ordered duties and privileges of the several castes will be turned topsyturvy and there will be great physical and moral decline. After Vanaparva chap. 188 there is an additional description in chap 190 of what will happen in the Kali age, which appears, from the express words of Vanaparva 191. 16, to have been taken from the Vāyupurāna. So this chapter is a later interpolation The verse अट्टशूला &c. occurs again in Vanaparva 190 52 and also in Harivaṁśa (Bhaviṣyaparva 3. 12), Brahmapurāna 230. 11, Matsya 47 258. Two characteristic verses are: शुक्लदन्ता जिताक्षाश्च मुण्डा. कापायवासस । शूद्रा धर्मं वदिष्यन्ति शाक्यबुद्धोपजीविन. ॥ (ब्रह्मपुराण 230. 13, वायु 58 59, ब्रह्माण्ड II 31 59–60, Harivaṁśa, Bhavisyaparva 3. 15) and देवस्थानेषु चैत्येषु नागानानालयेषु च । एडूकचिह्ना पृथिवी न देवगृहभूषिता ॥ वनपर्व 190 67. The first says that śūdras with white teeth and (professiog to have) curbed their senses, with the head shaved and wearing ochre-colonred robes and maintaining themselves on false doctrines will proponnd dharma. This is a direct attack on Buddhist monks taken from the class of śūdras. The 2nd says that the earth will be covered with edifices enshrining bones (of Buddha) and not with temples of gods. The idea about girls of 5, 6 and 7 being mothers occurs in Visnnpurāna VI 1 41–42, Brahma 229. 41–42, Nāradīya Pūrvārdha 41. 64 and elsewhere.

1755 षष्ट्यब्दानां षष्टिर्यदा व्यतीता त्रयश्च युगपादाः । व्यधिका विंशतिरब्दास्तदेह मम जन्मनोतीता ॥ कालक्रियापाद 10. This does not necessarily mean that he composed this work when he was only 23.

1756. Vide J. A. S. B for 1912 pp. 275–278 for the date of Varāhamihira.

Siddhāntas of which Romaka is one, about which Brahmagupta remarks that the Romaka siddhānta is outside the pale of smṛtis because[1757] it omits all mention of yugas, manvantaras and kalpas that have been regarded by the smṛtis as useful in measuring time. Kālidāsa[1758] in Raghuvaṁśa 15. 96 speaks of dharma as having only three feet (in Tretā) when Rāma made up his mind to depart from this world. No scholar will assign to Kālidāsa a date later than the middle of the 5th century A. D. Therefore the theory of yugas must be deemed to have been perfected long before 400 A. D. K. P. Jayaswal holds that the Yugapurāna chapter of the Garga-samhitā was composed about 50 B. C. (J. B. O. R. S. vol. 14 p. 399) and he is probably right.

At present it is the practice to hold Kali 5046 (expired) as equal to 1945 A. D. or *śake* 1867 or *saṁvat* 2001-2. But it appears that there were several views about the date of the beginning of the Kaliyuga. The exact starting point on the above computation was Friday, 18th February 3102 B. C. One view was that Kaliyuga was about to begin when the great Mahābhārata war was fought out.[1759] This view is expressed in the Aihole Inscription which appears to equate the beginning of Kali with the Bhārata war and states that 3735years (expired) from the Bhārata war are equal to 556 years of the *śaka* era.[1760] Āryabhata knew this computation, since he says that he was 23 years old when three parts of the (great) yuga and 3600 had elapsed (Kāla-kriyāpāda, verse 10). Another view set forth in the Purānas is that Kaliyuga began when Krsna finished his *avatāra* and went to heaven.[1761] This would put the beginning

1761. यस्मिन्कृष्णो दिवं यातस्तस्मिन्नेव तदा दिने । प्रतिपन्नः कलियुगस्तस्य संज्ञां निबोधत ॥ वायु 99. 428-429, ब्रह्माण्ड III. 74. 241 The भागवत XII. 2 33 reads प्रतिपन्न कलियुगमिति प्राहु. पुराविद. मत्स्य 273. 49-50, विष्णु IV. 24 40 respectuvely read प्रतिपर्क कलियुग प्रमाणं तस्य मे शृणु and प्रतिपन्न...तस्य सख्या निबोध मे ॥. ब्रह्मपुराण 212. 8 has the same idea in different words.

of Kaliyuga several years after the date arrived at on the first view.[1762] Vide Mausalaparva chap. 1. 13 and 2. 20 for reference to the lapse of 36 years before Krsna's passing away. The Yugapurāna appears to make Kaliyuga start on the day Draupadī died (vide J. B O. R. S vol. 14 p. 400). Another view is that of Varāhamihira who says that the constellation of the Great Bear was in Maghā when Yudhisthira was on the throne and that that time is arrived at by adding 2526 years to the śaka year.[1763] This would place Yudhisthira in 653 of the Kali age (as calculated at present) and not at the end of Dvāpara and the beginning of Kali. The Rājataraṅginī I. 56 quotes the Brhat-saṁhitā and holds that Kurus and Pāṇḍavas flourished in 653 of the Kali yuga (I. 51). Great efforts have

---

1762. Vide J R. A S for 1911 pp 479ff and 675ff about the Kaliyuga and its era; 'Five thousand years ago, the Mahābhārata war' a paper by Dr. D. S. Triveda in Festschrift Kane pp 515–525 in which after setting out many divergent views and criticizing them, it is held that the Mahābhārata war was fought out in 3137 B C., 'Purānic date of Mahābhārata', a paper by Mr. M. Raja Rao in the Bulletin of the Ganganath Jha Research Society, vol II pp. 125–143, which mentions numerous dates suggested by various scholars I am not at all convinced of the correctness of Dr. Triveda's conclusions, in spite of the great learning that he brings to bear on the problem. Vide also his paper in 'Bhāratīya Vidyā', vol. VI (1945) pp. 117–120.

1763. आसन् मघासु मुनय. शासति पृथ्वीं युधिष्ठिरे नृपतौ। षड्द्विकपञ्चद्वियुत शक-कालस्तस्य राज्ञश्च ॥ बृहत्संहिता 13 3 This is not a verse of Garga as some scholars assert. In 13 2 Varāhamihira promises that he will dilate on the movements of the seven sages (*muricāra*) according to the *opinion* of Vrddhagarga. It appears that 13 3 is his *own* verse. Garga held the opinion that the Great Bear remained in one constellation for one hundred years That is all Utpala quotes the verse of Garga, but it is in the Anustubh metre It was believed by the authors of the Purānas and even by such astronomers as Varāhamihira that the constellation of the Great Bear remained in each *nakṣatra* for a hundred years. Vide Br. Sam. 13 4, Bhāgavata XII 2 27–28, Matsya 273. 40–44, Vāyu 99. 421–422, Viṣnu IV 24 33 Mr Velandi Gopal Aiyer in 'Chronology of Ancient India' (p 75) holds that 'ṣad-dvika-pañca dvi' means 26 times 25 i e 650 years and that we should read 'śakyakāla' or 'śākyakāla' (p. 73) instead of 'śakakāla' in Br. Sam. 13 3 in order to correct the error of one mātrā in the 4th quarter of the verse In this last he is in error; he forgets that, according to works on chandas-śāstra, a short syllable at the end of a pāda is deemed to be prosodially long (and therefore the last syllable in Br. Sam 13. 3 is long) Besides, he is not able to cite a single example to show why the usual rule of अङ्गानां वामतो गतिः should not be followed here also or that Varāhamihira elsewhere employs a similar method in a compound word.

been made by several scholars to meet this discrepancy by explaining the word 'sad-dvika-pañca-dviyutah' (in the Brhat-samhitā) in various fanciful ways, which are far from satisfactory. There is no reason why *dvika* should not straightforwardly be taken in the sense of 'two',[1764] as the Līlāvatī and Br. Sam. 71. 5 itself do.

It is difficult to believe that the Śakakāla referred to in that verse is different from the Śakendrakāla or Śakbhūpakāla, which the Pañcasiddhāntikā (I 8) and the Brhat-samhitā (8. 20–21) make use of in several places At least Varāhamihira gives no such indication. Mr. C. V. Vaidya in his 'Mahābhārata, a critiicism' pp. 80–81 holds that the Śakakāla referred to in the verse 'āsan maghāsu &c.' is the era of Buddha's Nirvāna. There is hardly any warrant for this assumption. His interpretation of 'sad–dvika-pañca-dviyutah' as meaning 2566 (and not 2526) is not bad and does not seriously affect the argument about the date of Yudhisthira. On that interpretation Yudhisthira would be placed in 2488 B. C. (instead of in 2448 B. C.). But there is no reason why the usual values of *sat* (six), *dvika* (two) and other words should not be understood to be meant here.

The data contained in the Nidhanpur plates of Bhāskaravarman (E. I. vol. XII p. 65), when properly scrutinized, appear to favour the position of Varāhamihira. Those plates in setting out the genealogy of Bhāskaravarman start with Naraka, whose son Bhagadatta fought on the side of the Kauravas in the Mahābhārata war and was killed by Arjuna (vide Dronaparva chap 29) Bhagadatta's son is said to have been Vajradatta. After Vajradatta his descendants ruled over Kāmarūpa for 3000 years and then Pusyavarman, a scion of the Bhagadatta family, became king of Kāmarūpa. King Bhāskaravarman was 12th from Pusyavarman and was a contemporary of Emperor Harsa (first half of the 7th century A. D.). Taking an average of 20 years for the reign of each ruler, Pusyavarman should be taken as having flourished about the beginning of the 5th century A D. Adding 3000 years which are alleged by the plates to have intervened between Pusyavarman and Vajradatta, we arrive at about 2500 B. C. as the time of Vajradatta and therefore approximately of the Mahābhārata war. This

1764. The लीलावती (अङ्कपाशप्रकरण verse 262, Ānand ed) reads द्विकाष्टकाभ्या त्रिभवाष्टकैर्वा, where the com. says द्वाभ्यां द्विकाभ्यां..

corresponds rather very closely with the statement of Varāhamihira who puts Yudhiṣthira's reign at 653 Kaliyuga (i. e. 2448 B. C.). On the other hand, if we assume that the Mahābhārata war was fought in or that Kaliyuga started in 3101 B. C, then Pusyavarman who flourished 3000 years after the Mahābhārata war would have to be placed about 101 B. C. and there will be an interval of about 700 or 750 years between Pusyavarman and Bhāskaravarman. A period of 700 or 750 years for 12 rulers would work at about 60 years for each ruler, which is a very improbable average Therefore the Nidhanpur plates do not support the hypothesis that the Mahābhārata war was fought about 3101 B. C, but rather support the statement of Varāhamihira that it was fought about 2500 B. C.

Another epoch for the Mahābhārata war and the beginning of Kaliyuga is indicated by some passages of historic importance found in some of the Purānas The Vāyupurāna (99. 4–15) and the Matsyapurāna (273. 36) say that from the birth of Parīksit to the coronation of Mahāpadma (Nanda) a period of 1050 years elapsed, while the Bhāgavata XII. 2. 26 assigns 1015 years for the same. There is some mistake in the Purāna texts here. The Matsya (in chap. 271. 17–30) enumerates the kings of the Bārhadratha dynasty of Magadha descended from Sahadeva, son of Jarāsandha, and states that the dynasty will rule (i. e ruled) for a thousand years. Then chap. 272 (verses 1–5) speaks of five kings, who will be followed by the Śiśunāka dynasty, that together reigned for 360 years and the last king in which was Mahānandi (verses 6–13) whose son from a śūdra wife was Mahāpadma (272. 18). So if the years of these three dynasties are added we get the period of about 1500 years. This is supported by the Bhāgavatapurāna (IX. 22. 48 and XII. 1–2) and Vāyupurāna (99. 308–321), which latter says that 32 kings of the Bārhadratha dynasty will rule for 1000, then five Vītihotra kings for 138 years (Pradyota and others) and then the Saiśunāka (Śiśunāga in the Bhāgavata and in the Brahmāndapurāna III. 74. 134–135) dynasty for 362 (in all exactly 1500 years). The same periods are given by the Visnupurāna (IV. 23 and 24) and by the Brahmāndapurāna III. 74. 121–135, Śrīdhara in his comment on Bhāgavata XII. 2. 26 states that the interval between Parīksit and Nanda is 1498 as the Bhāgavata holds that the Śaiśunāga dynasty ruled for 360 years (XII. 1. 4–6). Therefore the proper reading in the Vāyupurāna or Matsyapurāna or the Bhāgavata should be 'pañcaśatottaram'

instead of 'pañcāśaduttaram' or 'pañcadasottaram.' Taking the interval between Parīksit and Nanda to be 1500 years and holding as most modern scholars do that the Nandas flourished in the 4th century B. C., Parīksit, the grandson of Arjuna, the Mahābhārata war and the beginning of Kaliyuga would have to be placed in the 19th century B C Therefore there are so far three main different epochs for the Mahābhārata war viz. 3101 B. C, 2448 B. C. and about 1900 B. C. All the three are well attested by evidence dating at least from about the 5th century A. D. One cannot dogmatically say that a certain tradition alone out of these three is the only correct one. All that one can say is that one prefers a particular tradition to the other two. Since the epoch of 1900 B. C. is supported by the Purānas in great detail by citing the names of the several kings and their regnal years I personally regard the epoch of 1900 B. C. for the Mahābhārata war as more probable than the other two It is best to acknowledge one's inability to assign a certain date to the Mahābhārata war rather than twist plain words or ignore al together inconvenient passages or put on them fanciful or far-fetched interpretations. The first desideratum is to prepare critical editions of the important purānas from the best mss material. Even then it is doubtful whether unanimity among scholars can be secured. A scholarly beginning was made by Pargiter in his book 'The Purāna texts of the dynasties of the Kali Age' (1913). He compares the material available in the printed editions of several Purānas and Mss on the subject of royal dynasties. One cannot or may not agree with many of the assumptions and inferences that he makes or draws, yet one cannot withhold admiration for his industry and method. For example, I cannot agree with him when he takes 'bhavisye kathitān' of the Matsyapurāna or 'bhavisye pathitān' of Vāyu (99. 267) as referring to the Bhavisyapurāna In many passages of the Purānas we have references to 'bhavisyajña' (Brahmānda III. 74 105), which simply means 'those who are conversant with sections on the future' contained in ancient works like the Mahābhārata

It is not possible owing to limitations of space to enter into detailed examination of the theories of several scholars about the date of the Mahābhārata war But one or two important matters will have to be referred to here

Mr. Velandi Gopala Aiyer in 'The chronology of Ancient India' in chap. II. (pp. 51–104) examines the astronomical data

furnished by the Mahābhārata and relying on the far-fetched and wrong interpretation put by him on the words of the Brhat-samhitā (quoted above) and on the fact that the Kollam era in Malabar appears to take 1177 B. C as the starting point for Kaliyuga arrives at the conclusion that the Mahābhārata war took place in the latter part of 1194 B. C. This theory goes against all the three other starting points which are supported by comparatively ancient and authoritative evidence.

The information derived from the fragments of the work of Megasthenes on India are supposed to shed some light on this vexed problem In one fragment (p. 115 of 'Ancient India as described by Megasthenes &c.') occurs the passage: 'From him (i. e. Bacchus) to Alexander the Great 6451 years are reckoned with three months additional, the calculation being made by counting the kings that reigned in the intermediate period to the number of 153'. An extract from Pliny makes out the number of kings to be 154. As against this we have the statement in the 'Indika' of Arrian (2nd century A. D., translated by McCrindle, p. 203): 'From the time of Dionysos to Sandrakottus, the Indians counted 153 kings and a period of 6042 years, but among these a republic was thrice established .... .. another to 300 years and another to 120 years. The Indians also tell us that Dionysos was earlier than Heracles by fifteen generations and that except him no one made a hostile invasion of India'. This passage is of very great importance for one reason, viz that it proves that in the 4th century B C there was a persistent Indian tradition which carried back Indian civilization and ordered government to 6000 years before the 4th century B. C But there is great doubt as to what Megasthenes actually wrote and there is some divergence as to the number of years and kings also. Besides, this has no direct bearing on the date of the Mahābhārata war or the beginning of Kaliyuga, unless Heracles is taken to be Hari-Krsna, as some scholars[1765] do. The account of Heracles (pp 201-203 of McCrindle's work) agrees in some respects with the legends about Krsna viz. that he was honoured by the Sourasenoi (Śūrasenas), an Indian tribe who possess two large

1765 Vide Mr. C V. Vaidya's 'Mahābhārata, a criticism' pp. 75-76, where ignoring the figures of total years (viz 6042 or 6451) he comes to the conclusion that Krsna flourished about 3101 B. C. since 138 Kings between Heracles and Sandrakottus (i. e Candragupta) may have ruled in all about 2760 years, taking 20 years as the average for each reign

cities Methora (*Mathurā*) and Cleisobora and that Heracles had many wives; but then there are other anecdotes about Heracles which do not at all agree viz his having a daughter Pandaia with whom when she was only seven Heracles had intercourse for raising a mighty race. Here there is some confusion with the Pāṇḍavas and Kuntī or with the Pandyan kingdom in the South. Moreover, 6000 years for 153 or 154 kings is rather a very long period. It cannot be said that a king is only a unit of time in these computations (40 years on an average), since such Purānas as the Vāyu and the Matsya expressly mention the number of years that each dynasty held sway, the number of kings belonging to each dynastly and the lengths of the reigns of several kings It is no doubt true that the details of the names of the several kings, the number of kings and the duration of their reigns do not always tally. It appears that the Purānas that contain historical material were recast at different times, e. g. the Vāyupurāna (99. 383) refers to the Guptas while the Matsyapurāna is silent about them. The extant Purānas cannot be supposed to have given imaginary details about historical dynasties, but they must have had before them older records or traditions. The Purānas do not appear to have invented names of new kings or given imaginary lengths of reigns. The authors surely knew that the total of the several dynasties between Parīksit and Nanda did not square with the total of the lengths of the reigns of the several individual kings. But they gave both these without trying to solve the discrepancies as they wanted to record all the traditions they had got before them. The Purānas have a claim on our attention, but in the present state of our knowledge they cannot unfortunately form the basis of any certain or connected history and chronology of ancient times.

A few words may here be said about the attempts made to deduce the age of the Mahābhārata war from the astronomical references in the Epic.

The number of works and papers in which the dates of the Bhārata war and of Kaliyuga are discussed is very large. A few of them only are noted here. The late Shankar Balkrishna Dikshit in his exhaustive volume on 'the History of Indian Astronomy' (in Marathi, 2nd ed. of 1931) deals with this subject at pp. 107–127. Mr. C.V. Vaidya in 'Mahābhārata, a criticism, 1904 'devotes one chapter (pp. 55–78) and appendix note V (pp. 180–190) to the date of the Mahābhārata war. He holds fast to the traditional

view that the Mahābhārata war was fought in 3101 B. C Mr. N. Jagannatha Rao writes a book on 'the Age of the Mahābhārata war' (Bezwada, 1931), in which he disputes the identity of Candragupta Maurya with Sandracottus mentioned by Megasthenes, holds that Sandracottus is the Gupta Emperor Candragupta, that the date of Candragupta Maurya would be about 1535 B C., that the word 'Śakakāla' in the Brhatsamhitā refers really to the era of the Persian Emperor Cyrus about 550 B. C. and that the Great War was fought in 3139 B. C. The work does not go deeply into anything and is rather superficial. There is a lengthy and interesting article by Mr. K. G. Sankar on 'some problems of Indian Chronology' in Annals of the B. O. R. Institute, Poona, vol. XII pp. 301–361 in which he seems to favour 1198 B. C. as the date of the Mahābhārata war. Mr. J. S. Karandikar, editor of the 'Kesari' (Poona), contributed certain articles (in Marathi) which are now issued as a booklet (1939), in which he examines many of the astronomical references in the Mahābhārata and the Paurānic lists about the dynasties of ancient Indian kings and arrives at the conclusion that the Mahābhārata war was fought in 1931 B. C. Though I differ from him in important details, I think that the date arrived at by him appears to be one of the two probable or best authenticated dates among the several dates proposed by various scholars Prof. P. C. Sen-Gupta contributed a paper to the Journal of the Bengal Asiatic Society in 1937, vol. III pp 101–119, in which he discusses the date of the Mahābhārata war and arrives at the conclusion that the Bhārata war was fought about 2449 B C. This also is a very probable date and has the authority of the tradition mentioned in the Brhatsamhitā that the śaka era is 2526 years after the era of Yuddhiṣṭhira. In J. A. S. B. for 1938, vol. IV pp 393–413 Prof. Sen-Gupta again examines 'Bhārata battle traditions' and confirms the date 2449 B. C. already arrived at by him. Dr. K. L. Daftari delivered some lectures in the University of Nagpur on 'the astronomical method and its application to the chronology of Ancient India' which are published in book form (Nagpur, 1942) This work exhaustively deals with almost all the passages of astronomical importance contained in the Mahābhārata and is characterized by great industry, patient calculations and ingenious explanations of conflicting passages His conclusion is that the Bhārata war was fought in 1197 B. C. Although one feels nothing but admiration for the author's great learning and acumen, it is not possible to agree with the date arrived at by him or with

the method and theories adopted by him. Apart from details one cannot accede to the following theories propounded by him viz. his division of the astronomical references into two groups, his assumption that a passage in the Dronaparva (chap 184) about the rising of the moon at about 2 A. M is an interpolation (because it does not square with his explanations of the other passages), his bold expedient of changing 'citrām' to 'caitām' in Bhisma 3 12 and his transposition of Śravana and Pusya in Śalyaparva 34. 6, his taking 'angaraka' to mean Venus (and not Mars). Dr. Daftari's work was reviewed by Prof Sen-Gupta in JASB for 1943, vol. IX pp. 221–228 and after submitting it to a searching analysis and calculations, the learned Professor arrives at the conclusion that he cannot accept Dr. Daftari's *method, which is useless for all practical purposes.* Prof K. V. Abhyankar contributes an article to the Annals of B. O. R. I. for 1944, vol. XXV. pp. 116–136 on 'the date and time of the Bhārata war', in which he takes into account only the material available in the Epic itself and bases his conclusions on the principle of following the voice of the majority. He furnishes a useful table in an appendix that shows at a glance some of the important astronomical passages of the Mahābhārata with their interpretations given by the commentators Arjunamisra and Nīlakantha and by Mr. Karandikar and himself and finally gives his opinion that the traditional view of the date (3101 B. C.) is approximately correct. It appears that he had not, when he wrote the article, the work of Dr Daftari before him nor Prof. Sen-Gupta's devastating criticism of it. It will be apparent from the above that the attempts to settle the exact date of the Mahābhārata war on the strength of the astronomical materials contained therein are dismal failures Hardly any two scholars agree on the exact dates so arrived at, which range from 1193 B C to 3101 B C. and even beyond. There are many reasons for this disappointing result In the first place, several of the criteria mentioned in the epic are hopelessly inconsistent, as will be made clear a little below by a few examples. Further, several scholars assume that the epic was composed within a short time (about three years according to Adiparva, 62, 52, cr. ed. chap 56. 32) after the war Many (including my humble self) cannot subscribe to this view. Besides, we are totally in the dark about the details of the system of the calendar generally adopted at the period of the war Many suppose that it largely resembled the rules contained in the Vedānga Jyotisa (of the Rgveda). There is no unanimity on the question whether the months

ended with *amāvāsyā* (i. e whether they were *amānta*) or whether they ended with Full Moon (i. e. whether they were *pūrṇumānta*).[1766] That a pūrṇimānta month was in vogue in Vedic times is beyond dispute. For example, Tai. S states that Pūrvā Phalgunī is the last night of the year and Uttarā Phalgunī is the mouth (i. e. beginning) Similarly Tai S VII. 4. 8. 2 declares that the citrāpūrnamāsa is the mouth of the year; while Śān Br. IV. 4 declares that the Phālgunī Paurnamāsī is the *mukha* of the year. The author or authors of the Mahābhārata, in describing the evil portents of an impending tragic or catastrophic event, often assemble together (as in Udyoga 143.5–29, Bhīsma 2 16–33) all of them irrespective of the fact whether some of them are possible in the very order of nature For example, it is stated that Arundhatī went before Vasistha (Bhīṣma 2. 31), that a mare gave birth to a cow calf and that a bitch gave birth to a jackal (Bhīsma 3. 6) and that images of gods trembled, laughed and vomited blood (Bhīsma 2. 26, which may be compared with Brhatsamhitā 45. 8 and the verses of Garga quoted by Utpala thereon); it is several times said that the Moon and the Sun are seized (i. e. eclipsed) at an unusual season (*parvaṇ*) or simultaneously by Rāhu (vide

---

1766 That the months in North-west India were pūrnimānta in the Kharoṣthī records drawn np in Kaniska's era is shown in E I. vol. 18 p 266 and E. I. vol. 19 at p. 10 Aparārka (p. 423) quotes a verse from ब्रह्मपुराण 'अश्वयुक्कृष्णपक्षे तु श्राद्धं कार्यं दिने दिने' and remarks that Bhādrapada dark half is in that verse said to be the dark half of Āśvina. In the Bhavisyapurāṇa (Uttara-parva, chap. 132 17) the Full Moon of Phālguna is said to be the end of the month' (किमर्थं फाल्गुनस्यान्ते पौर्णमास्यां जनार्दन । उत्सवो जायते लोके ग्रामे ग्रामे पुरे पुरे ॥) In the Matsyapnrāna (159 4–6) it is said that Skanda and Viśākha were born on the 15th of the dark half of Caitra, that in the bright half of Caitra itself on the 5th Indra made one boy out of the two and on the 6th crowned him as Lord This shows that in the Matsya Caitra was purnimānta and not amānta. When the month is pūrnimānta, the first fortnight ending with amāvāsyā is assigned to a month which is one month in advance of the *amānta* reckoning i e what is Kartika dark half with amānta reckoning becomes Mārgaśirsa dark half with the pūrnimānta reckoning On Jai VI. 5. 31 Sabara quotes a Vedic passage about गवामयन 'द्वादशात्पौर्णमास्यामाश्वतुरहे दीक्षेरन् । ऋतुमुखं वैषा पौर्णमासी संवत्सरस्य या चैत्री पौर्णमासी', which seems to indicate that the year began with the Full Moon of Caitra and that the pūrnimānta reckoning was not unknown.

Bhīsmaparva 3. 28 and 32-33 and Aśvamedhikaparva 77. 15).[1767] Further, these very verses state that the eclipses of the Sun and the Moon took place on the *same day* and on the 13th and in the same month. Dr. Daftari interprets 'ekāhnā' as meaning on the same week-day and 'on the 13th tithi' (pp. 5-6 of his work) calculated according to the wrong method of those days. It is extremely doubtful whether week-days had been known or named at the time of the Bhārata war or even at the time of the composition of the Epic. It is too much to assume that the astronomers of the Mahābhārata war days, while they could predict eclipses and state accurately the position of the planets, were so clumsy as to allow a mistake of two *tithis* to occur in their calendar with respect to the occurrence of a solar eclipse. The words in Bhīsmaparva 3. 28 and 32-33 appear to be a mere exaggerated statement of portents. If real observed eclipses are meant they would have to be taken in the order of the words in the text, viz. first an eclipse of the Moon (on Kārtika paurnimā) and then an eclipse of the Sun (on Kārtika amāvāsyā) and further it must be assumed that the dark half of Kārtika contained only 13 days. Dr. Daftari (pp. 44-46 of his work) holds that first there was a solar eclipse on Āśvina amāvāsyā, then a lunar eclipse and then again a solar eclipse. In that case we should expect the order to be 'sūrya-candrau' and not 'candrasūryau'. Besides, hardly any other scholar holds that there were three eclipses one after another. Therefore, it is hardly possible to say with certainty that the author accurately states astronomical facts observed by him or even traditionally handed down as definite facts and does not draw on his own imagination about the portents or does not exaggerate

---

1767. चन्द्रसूर्यावुभौ ग्रस्तौ एकाह्ना हि त्रयोदशीम्। अपर्वणि ग्रहं यातौ प्रजासंक्षयमिच्छतः ॥ चन्द्रसूर्यावुभौ ग्रस्तौ एकमासीं त्रयोदशीम्। अपर्वणि ग्रहेणैतौ प्रजाः संक्षपयिष्यतः ॥ भीष्मपर्व 3. 28, 32. The cr. edition of the Mahābhārata gives only the first of these two verses. Utpala in his com. on Brhatsamhitā 5. 26 reads एकमासे त्रयोदशे. The words प्रजाः संक्षपयिष्यत. make it quite clear that eclipses and the fortnight of thirteen tithis are taken as very evil omens. Similar words occur in Bhīsma 3. 12 and 13 quoted below in note 1779. In Brhatsamhitā 3. 6 it is said that a *graha* called Tvastr makes the orb of the Sun look dark even when there is no parva (amāvāsyā). Utpala quotes on the same a verse of Parāśara 'अपर्वणि शशाङ्कार्कौ ग्रस्ता नाम महाग्रहः। आवृणोति तमःश्यामः सर्वलोकविपत्तये ॥. There is no doubt whatever that the writer of Bhīsma 2 and 3 is more concerned with chronicling evil omens than with setting out accurate astronomical and other data observed by him personally seen by others.

as a rhetorical device. In Brhatsamhitā 5. 26, 97-98 Varāhamihira states the evil consequences if a moon eclipse precedes or follows a sun eclipse in the period of one fortnight.

Most of the important astronomical details will now be set out from the time when Lord Krsna is said to have started as a peace-maker to the Kauravas. In Udyogaparva 83. 6-7[1768] it is said that Kṛsna started in the month of Kārtika (Kaumude māsi) *at the end of the śarad season* and about the advent of winter, when the moon was in Revatī naksatra and on *maitra muhūrta*. Āśvina and Kārtika are at present said to form the season of *śarad*, and Mārgaśīrsa and Pausa form *hemanta*. This verse itself presents a difficulty On the Full Moon day of Kārtika, the moon is in Krttikā naksatra and the moon would be in Revatī three days before i. e. on or about the 12th of the bright half of Kārtika. If we take this along with the words 'at the end of śarad' it follows that the month was *pūrnimānta*; otherwise (i. e. if the month were *amānta*) it would be highly improper to say that the 12th of the bright half of Kārtika was at the end of Śarad After Krsna failed in his mission he returned to the Pāṇḍavas (for all of which we must allow a few days after the 12th of Kārtika *śukla*) and reported what Duryodhana and he himself said. Two of the statements reported by him are very material Duryodhana said to his allies: 'March towards Kuruksetra (for battle); to-day the moon is (in) Pusya naksatra'.[1769] If Krsna started on his mission when the moon was in Revatī (on the 12th of the bright half of Kārtika), then these above words must have been uttered in his presence on or about the 5th of the dark half of Kārtika (or of Mārgaśīrsa if the month was pūrnimānta). Another important statement is that Krsna in his conversation with Karna (whom he had tried to win over) stated to him: 'this is a mild month in

---

1768 मैत्रे मुहूर्ते संप्राप्ते मृद्वार्चिषि दिवाकरे। कौमुदे मासि रेवत्या शरदन्ते हिमागमे॥ उद्योगपर्व 83 6-7. 15 muhūrtas of the day and 15 of the night are referred to even in the शतपथब्राह्मण X 4 2. 18, 25, 27 and the तैत्तिरीयब्राह्मण (III 10 11) mentions the names of the 15 muhūrtas of the day (such as Citra, Ketu &c). In the Kumārasambhava VII. 6 the *maitra* muhūrta is mentioned in connection with ceremonies preceding marriage. The commentators explain maitra as the 3rd muhūrta after sunrise. In the Atharva Jyotisa fifteen muhūrtas of the day are enumerated of which the first three are Raudra, Śveta and Maitra

1769 आज्ञापयच्च राजस्तान् पार्थिवान्दुष्टचेतसः। प्रयाहि वै कुरुक्षेत्रं पुण्योचोति पुनः पुनः॥ उद्योग 150. 3.

which fodder and fuel can be easily had, which is neither too hot nor too cold; on the 7th day (from today) there will be amāvāsyā; battle may be joined on that day; they regard it as having Indra for its (guardian)[1770] deity'. Therefore this must have been said on or about the 8th of the dark half of the month But what was the name of the month? If the reckoning was pūrnimānta, the month must be Mārgasīrsa, but if the reckoning was amānta, the month must be Kārtika. The words 'this month' taken along with Udyoga 83 6-7 would indicate that the month meant was Kārtika Further, Indra was the deity of Jyesthā naksatra and the amāvāsyā (as stated in Udyoga 142. 16-18) had Jyesthā naksatra. In modern times this is possible on Kārtika Amāvāsya, while there cannot be Jyesthā naksatra in modern times on Mārgaśīrsa amāvāsyā, but only on or about the 13th of the dark half of it. But this passage itself (Udyoga 142. 16-18) is in conflict with Śalya 35. 10 where Krsna says: 'the Kauravas do not act up to my words, being driven to do so by the Time Spirit; O! descendants of Pāndu, go out (for battle) together with me when the moon is in Pusya'. If the moon was in Jyesthā on amāvāsyā when Krsna had proposed to Karna that the war should be begun, this passage of Śalyaparva would put the beginning of the war 16 or 17 days after Kārtika amāvāsyā, which is not warranted by any other passage and which no scholar puts forward. In Udyoga 143 11 it is stated,[1771] 'the spot on the moon has turned away (disappeared) and Rāhu approaches the Sun' The exact meaning of the first quarter is not quite clear. Some interpret it to mean that 'an eclipse of the Moon has already taken place'. The moon looks beautiful with the spot thereon (compare Śākuntala I '*madhuramapi himāmśor lakṣma lakṣmīm tanoti*) The disappearance of the spot might have been looked upon as an evil portent Even supposing that the first quarter refers to an eclipse of the moon, it does not matter much The second quarter states that an eclipse of the Sun was expected when Karna addressed these words to Krsna, the envoy of the

1770 सौम्योय वर्तते मास सुगोपयवसेन्धन । . निष्पङ्को रसवत्तोयो नात्युष्ण-शिशिर सुख. ॥ सप्तमाच्चापि दिवसादमावास्या भविष्यति । सग्रामो युज्यता तत्रया तामाहु शक्रदेवताम् ॥ उद्योग 142. 16-18 नीलकण्ठ explains 'सग्राम· सग्रामसाधनकलाप युज्यतामेकीभूयावतिष्ठताम्। संग्रामारम्भस्तु दिनान्तर एवेति वदन्ति ।'. न कुर्वन्ति यदा सग्राम कुरव कालनोदिता । निर्गच्छध्व पाण्डवेया युष्येण सहिता मया ॥ शल्य 35 10

1771. सोमस्य लक्ष्म व्यावृत्तं राहुरर्कमुपैति च । *दिवश्चोल्का पतन्त्येता* मनिर्घाता मकम्पना ॥ उद्योग 143 11. Almost these very words occur in भीष्म 2 32 (व्यावृत्तं लक्ष्म सोमस्य भविष्यति महद्भयम्) and in भीष्म 3 11 (अर्कं राहुरुपैति च)

Pāndavas. Later on in Bhīsma 2 23 it is stated[1772] that the Moon had become devoid of brightness, was without its spot on the Full moon day of Kārtika and assumed the colour of fire while the sky retained its original hue; so that if there was an eclipse of the moon it was on *Kārtika Paurnmā* and an eclipse of the sun was yet to take place. On the whole, therefore, one may assume, though not without hesitation, that the months were *amānta*, that possibly there was an eclipse of the moon on Kārtika Full Moon when Krsna had gone as a peace-maker and that there was a solar eclipse on the amāvāsyā of Kārtika just about the time the war began. In Śalyaparva 56. 10 we again meet with the words (at the beginning of the mace duel) 'Rāhu swallowed the Sun at an unusual season'. This passage and Āśvamedhika 77. 15 (Rāhur-agrasadādityam yugapat soma-meva ca) rather suggest that the eclipse of the sun at an unusual time had become a stock example of an evil portent without the actual occurrence thereof. The words in Śalyaparva refer to the last day of the war before the mace duel between Duryodhana and Bhīma and the passage says that Rāhu seized the sun and there was an earth-quake also Hardly any one (except Dr. Daftari) holds that there was another eclipse on the last day of the war, when just before the war there already had been an eclipse on Kārtika amāvāsyā.

As to the exact *tithi* and *naksatra* on which the Great War began, there are many conflicting statements. In the Bhārata-sāvitrī it is stated that the Bhārata war started in the first month (i e Mārgasīrsa) of Hemanta on the 13th of the bright half when the moon was in the naksatra presided over by Yama (i e Bharani)[1773]. The Bhārata-sāvitrī is no part of the

1772 अलक्ष्य· प्रभया हीनः पौर्णमास्यां च कार्तिकीम् । चन्द्रोभूदग्निवर्णश्च समवर्णे (v l पद्मवर्ण-) नभस्तले ॥ भीष्म 2. 23.

1773 The following verses of the भारतसावित्री are material for the days of the important events of the war: 'हेमन्ते प्रथमे मासे शुक्लपक्षे त्रयोदशी । प्रवृत्त भारतं युद्ध नक्षत्र यमदैवतम् ॥ फाल्गुन्या निहतो भीष्म कृष्णपक्षे च सप्तमी । अष्टम्यां चैव सौभद्रो नवम्या च जयद्रथ । दशम्यां भगदत्तस्तु महायुद्धे निपातित. । एकादश्यामर्धरात्रौ हतो गीरो घटोत्कच. । तत· प्रभातसमये विराटद्रुपदौ हतौ । द्वादश्या चैव मध्याह्ने द्रोणाचार्यो रणे हत. ॥ त्रयोदश्यां तु मध्याह्ने वृषसेनो निपातित· । चतुर्दश्यां तु पूर्वाह्णे रणे दु.शासनो हत· । अमायां धर्मपुत्रेण शल्यो मद्राधिपो हत । . . अमायामर्धरात्रे तु राजा दुर्योधनो हत । . . अमायामेव यामिन्यां द्रौणिना निहतास्तदा । धृष्टद्युम्न शिखण्डी च द्रौपद्या· पञ्च चात्मजा. । (set out at the end of हरिवंश in the Citrasālā edition). There are some statements here that are opposed to the text of the Mahābhārata Abhimanyu

(*Continued on the next page*)

Mahābhārata, yet it has some traditional value, being probably earlier than all the commentators of the Mahābhārata and later than the text of Sauti. In conflict with this passage of the Bhāratasāvitrī we have the words of Udyoga 142. 18 (quoted above) where Krsna says to Karna that battle may be joined on amāvāsyā when the moon is in Jyesthā. The Mahābhārata itself states that after the disposition of the vast armies were made and commanders were appointed, Duryodhana called Ulūka and sent him to the Pāndavas to inflame their feelings with the words[1774] (Udyoga 160. 93) 'the worship of steel (weapons) has been performed, the site of Kuruksetra is dried up (has no mud), your horses are well fed, warriors are hired by you; fight tomorrow'. This Lohābhihāra (or-sāra) is the same as the rite of *nīrājanā* (according to the Amarakośa) or is performed immediately after nīrājanā (for which see pp. 230-231 above). Kautilya (II. 30 p. 135) prescribes a nīrājanā rite at the start of an invasion and when two seasons meet. So a nīrājanā rite on Kārtika amāvāsyā would be most appropriate (both because a battle was to be begun and because at the end of Kārtika the season of Śarad ended). The Brhatsamhitā (43. 1-2) prescribes a nīrājanā rite for horses, elephants and men on the 8th or 12th of Kārtika bright half or on the 15th of Kārtika (Full Moon or *amāvāsyā*). It is extremely doubtful

---

(*Continued from the last page*)

was killed on the third day after Drona became commander-in-chief. It may be noted that Nīlakantha explains यमदैवतम् differently as meaning Mrgaśīrsa which has a double deity as its presiding deity It may be noted that this text of the भारतसावित्री as printed is not quite reliable, since नीलकण्ठ in his commentary on भीष्म 17. 2, reads 'अर्जुनेन हतो भीष्मो माघमासेऽसिताष्टमी' for फाल्गुन्यां . . सप्तमी and 'त्रयोदश्यां तु मध्याह्ने भारद्वाजो निपातित' for 'द्वादश्या . . रणे हतः' If these readings be accepted it follows that the Bhāratasāvitrī impliedly recognizes the existence of a *tithikṣaya*, since Drona is there said to have been killed on the 13th tithi of dark half when the epic itself says that he died on the 15th day after the battle began As the war commenced on the 13th of bright half, there would be 16 days on 13th of dark half.

1774 लोहाभिहारो निर्वृत्तः कुरुक्षेत्रमकर्दमम् । पुष्टास्तेऽश्वा भृता योधाः श्वो युध्यस्व सकेशवः ॥ उद्योग 160. 93. About this, अमरकोश says 'लोहाभिहारोऽस्त्रभृता राज्ञां नीराजनो विधिः (v. 1 नीराजनाह्विधिः).' The तिथितत्त्व of रघुनन्दन quotes (Jivananda p 35) a passage from the Devīpurāna that on the 6th of Caitra Skanda is to be worshipped and it is called स्कन्दषष्ठी. The निर्णयसिन्धु II (on मार्गशीर्षकृत्य) says 'मार्गशीर्षशुक्लषष्ठी चम्पाषष्ठीति महाराष्ट्रेषु प्रसिद्धा । . . . . इयमेव स्कन्दषष्ठी.'

whether Mr. Karandikar is right in saying that Lohābhihāra (or-sāra) refers to Skandasasthī. In the first place, the worship of weapons can be done at any time, particularly when a battle is to be commenced. In the second place, it is not necessary to postulate the lapse of six days and more for the sending of Ulūka and his return from the time when Krsna said that battle may be begun on amāvāsyā. The armies had taken up opposite positions on the field of Kuruksetra and Ulūka could have come and gone in a day or two. Further, we have no evidence that Skanda-sasthī was performed in northern India in Mārgaśīrsa, though very late works composed by *dākṣṇātyas* like the Nirnayasindhu say that Skandasasthī is the same as Campāsasthī in Mahārāstra and is observed on the 6th of Mārgaśīrsa. Raghunandana quoting Devīpurāna places Skandasasthī on Caitra 6th of the bright half and is supported by the Matsyapurāna quoted above in n.1766. There is no reason why the actual fight should commence so late as the 13th day of Mārgaśīrsa (or even 11th as Mr. Karandikar suggests) when Krsna said that it should be joined on amāvāsyā. It is quite possible that the war began on or about Kārtika amāvāsyā. The observance of 'lohābhihāra' does not lead to the certain inference that the war was not begun till several days after the 6th of the bright half of Mārgaśīrsa. Similarly, Mr. Karandikar says that the moon is ordinarily in Bharanī on the 11th or 12th of the bright half of Mārgaśīrsa. It may be so. But it is possible to have the moon in Bharanī even on the 13th. I am inclined to hold that the Bhāratasāvitrī dates of the beginning of the war embody a different tradition altogether from the one contained in the Mahābhārata itself. The Bhāratasāvitrī is silent about naksatras on which the principal events of the war took place except at the commencement of the war. It mentions no *tithuksaya* or *tithuvṛddhi*. Krsna sends a message with Ulūka to Duryodhana (Udyoga 162. 57) 'tomorrow you will be seen' (in your true colours) and Arjuna does the same (Udyoga 163. 14).

The Mahābhārata nowhere states quite explicitly the *tithi* or *naksatra* on which the battle actually commenced We have to rely upon various indications to arrive at the *tithi* or *naksatra*. Balarāma could not bear to see the fight between Duryodhana and Bhīma, both of whom were his pupils in mace-duel and went on a pilgrimage (Udyoga 157. 33-35 and 158 39). Balarāma returned on the 18th day of the war and (in Śalyaparva 34. 6)

he remarks, 'it is 42 days since I left (on a pilgrimage); I started when the moon was in Pusya and I have come here again on Śravana '[1775]. In Śalya 35. 13-14 it is stated that Balarāma went to the river Sarasvatī on pilgrimage on 'maitra-naksatra-yoga' (i. e. when the moon was in Anurādhā). This conflict may be resolved by holding, as Nīlakantha does, that Balarāma left the Pāndavas on Pusya, reached the Sarasvatī on Anurādhā and returned on Śravana. If we follow Śalya 34.6 the war commenced when the moon was in or near Mrgaśīrsa (18 naksatras before Śravana). This would be in direct conflict with a passage in Bhīsmaparva 17.2 that[1776] 'on the day of battle the moon was in the province of Maghā' and also other passages that will be indicated later on. This last passage should ordinarily mean that the moon was near Maghā. Mr. Karandikar looks upon Śalya 34.6 as an interpolation and takes Bhīsma 17 2 to mean that the moon was in an inauspicious naksatra of the category of Maghā. This would suit Bharanī but not Rohini or Mrgaśīrsa. His meaning is far-fetched and he does not explain why Bharanī was not directly mentioned in the Epic, when in several other places the epic does mention directly the naksatra concerned. His explanation gives the go-by to the 13th *tithi*. Dr. Daftari boldly asserts that we must transpose the naksatras (in Salya 34. 6) and read 'śravane samprayātosmi pusyena punarāgatah'. If we once resort to these methods followed by these two learned writers, there is no knowing where one should stop. There are scholars who might with equal or greater plausibility claim that most of these astronomical references are either of very late date or are interpolations (vide Vaidya's 'Mahābhārata' p. 71). Similarly, if we once concede that we are at liberty to change readings to suit our theories even in the total absence of all manuscript evidence, then there is no sure foundation on which we can build. The Mahābhārata passages have a tradition of centuries behind them. We must, in the absence of good mss. evidence to the contrary, either accept *them all* and try to explain them or we must give up the job of reconciling them as a hopeless tangle and rely on other evidence to arrive at the date of the

1775. चत्वारिंशदहान्यद्य द्वे च मे निसृतस्य वै । पुष्येण संप्रयातोस्मि श्रवणे पुनरागतः । शल्य 34. 6.

1776. मघाविषयगः सोमस्तद्दिनं प्रत्यपद्यत । द्रीप्यमानाश्च संपेतुर्दिवि सप्त महाग्रहाः ॥ भीष्म .17. 2. नीलकण्ठ explains. मघा पित्र्यं नक्षत्रं तस्य विषयो देशः पितृलोकस्तद्गतः सोमः ।

Bhārata war as best as we can. We saw above that Jyesthā was the naksatra on Kārtika amāvāsyā and, if the war began then, the naksatra on the 18th day from then would be Pusya. Nīlakantha, following the Mīmāmsā rules of interpretation, holds that the concluding passage (*upasamhāravākya*) is superior in strength to passages that occur at the beginning of a work, that the passage in Salya 34 6 is the dominant one and other conflicting passages must be either brushed aside or explained away in conformity with Śalya 34. 6 and gives an explanation of 'Maghāvisayagah somah' which is quite unsatisfactory. Dr Daftari also holds, relying on Atharva Jyotisa, that the passage means 'the moon was in Mūla' (p. 27 para 62–65 of his work 'Astronomical method' &c.) The explanation is ingenious but one fails to see why this round-about way was resorted to and why the text did not simply say 'mūlanaksatragah somah', which violates no metrical requirements. In Anuśāsana parva (167 26–28) Bhīsma, while on the bed of darts, states.[1777] 'the sun has turned (towards the north); 58 days have passed by since I laid myself down on this (arrow bed) This is the mild month of Māgha that is now current, three parts of it remain and this fortnight should be *śukla*'. Bhīsma was struck down on the 10th day of the war; so 67 nights had passed from the day when the war began to the day in Māgha on which this was uttered The difficulty is how to connect 'tribhāgaśesah', whether as an adjective of 'māsa' or of 'paksa'. If we take it in the first way, these words were uttered on 8th of Māgha sukla: if we take it as an adjective of 'paksa', then they will have to be taken as uttered on the 4th of the bright half or on the 4th of the dark half which may be regarded in its astrological effects as equal to *śuklapaksa* (though the tithi itself is in the dark half) If the words were uttered on the 8th of Māgha śukla, the Bhārata war began on Kārtika amāvāsyā (which will be in consonance with Udyoga 142. 18 quoted in n 1770). The passage in Anuśāsana (167. 26–28) is supported by two other passages. After the war was over, Yudhisthira went to the capital and stayed there for 50 nights and when he found that the Sun had started on its apparent northward path (*uttarāyana*) he came to Bhīsma (Anusāsana 167 5) In Śāntiparva 51. 14 Krsna says to Bhīsma: 'You have yet to live 56 days' Nīlakantha, who takes Salya 34 6 as the dominant passage, puts a

---

1777 अद्यपञ्चाशतं राज्ञ शयानस्याद्य मे गता. । . माघोय समनुप्राप्तो मास. सौम्यो युधिष्ठिर । त्रिभागशेष पक्षोय शुक्लो भवितुमर्हति ॥ अनुशासन 167. 26–28.

most far-fetched construction on the word 'astapañcāśatam', which he takes to mean 'one hundred minus 58'. i. e. 42 nights and explains 'pañcāśatam sat ca' as equal to 30 This shows to what straits commentators are reduced when conflicting passages have got to be explained away. One more indication about the *tithi* on which the war commenced is afforded by Droṇaparva chap. 184, where it is stated that a grim fight went on till midnight when Ghatotkaca was killed, that the fatigued armies then snatched some sleep, that then the moon rose at about 2 A. M. (verse 46) and that the fight was then resumed[1778] (chap. 186. 1 'tribhāgamātraśesāyām rātryām yuddham-avartata) This description of moonrise shows that Ghaṭotkaca was killed on or about the 11th of the dark half. We know from the Mahābhārata itself that Ghatotkaca was killed on the night of the 4th day of Drona's command or on the 14th day after the war began. This would establish that the war began on the 12th or 13th of the bright half and ended on the 14th of the dark half or on amāvāsyā of Mārgaśirsa. Dr. Daftari holds that this description is an interpolation.

If we try to find out the *naksatra* on which the war began, we have one sure criterion in Śalya 34, 6 viz. that the war ended on Śravana naksatra when Balarāma returned from pilgrimage. Now the moon cannot be in Śravana at all in Mārgaśīrṣa dark half, but may be in it on the first or 2nd of the bright half of Pausa. So between the tithi and naksatra as disclosed by the Mahābhārata itself there is a slight discrepancy of a day or two. There is another way of looking at the data. Bhīsma was waiting for uttarāyana to begin and we know that he passed away on the 59th day after he was mortally wounded on the 10th day of the war. Therefore, a period of 67 days (58 nights of his lying on arrow-bed plus 9 nights of the battle when he slept on his usual bed) elapsed between the beginning of the war and the beginning of Uttarāyana, which undoubtedly occurred in Māgha in that year (as Anuśāsana 167. 28 expressly states) The real difficulty is to find out the *tithi* of the commencement of Uttarāyana. But if we accept the approximate tithi and naksatra (as stated above) of the end of

1778. त्रिभागमात्रशेषायां रात्र्यां युद्धमवर्तत। कुरूणां पाण्डवानां च समृष्टानां विशांपते॥ द्रोण 186.1. नीलकण्ठ explains 'मुहूर्तत्रयावशिष्टायाम्, तत्र सूर्योदयोत्तरं त्रयोदश्यां द्रोणस्य नाशः।'. He supposed that घटोत्कच was killed on the 12th of the dark half.

the war (i.e. Mārgaśīrsa amāvāsyā or 1st of Pausa and Śravana naksatra), uttarāyana began 49 days thereafter i. e on or about the 4th of the dark half of Māgha. According to the Vedāngajyotisa, 4th of the dark half of Māgha is one of the tithis on which uttarāyana may begin (vide Dikshit's work pp 75, 91). How scholars accept one of the data and reject others is well illustrated here. Acc. to Śalya 34 6 the war ended on Śravana (and so should have begun when the moon was in Mrgaśīrsa). Acc to the Bhāratasāvitrī the war began on Bharanī and on the 13th of the bright half of Mārgaśīrsa and ended on Amāvāsyā (and therefore the naksatra was Mūla or Pūrvāsādhā). Arjunamisra gives up the nakṣatras and sticks to the tithis. Mr. Karandikar gives up the express verse about Śravana (and regards that whole chapter as an interpolation), he gives up the 13th tithi of the beginning of the war as given in the Bhāratasāvitrī, holds that the war began on 11th instead and sticks fast to the Bharanī naksatra given in the Bhāratasāvitrī. Dr. Daftari altogether changes the reading of Śalya 34 6 by transposing the naksatras mentioned

The difference between the day of Uttarāyana in Māgha stated in the Mahābhārata and the day thereof at present is utilised by scholars for arriving at the date of the Mahābhārata war.

There are other data in the Mahābhārata from which also the date of the Mahābhārata war is sought to be deduced. Before entering into details, some matters that are accepted by most scholars may be stated here. It is generally held that there were two eclipses, first, one of the moon immediately followed by a solar eclipse, that there was a fortnight of 13 days which was looked upon as very unusual and a very evil omen. Vide Bhīsma 3 28 quoted in n 1767. In Bhīsmaparva 3 31–32 Vyāsa is reported as saying, 'I have known amāvāsyā occurring on the 14th, 15th or 16th day (of a paksa), but I do not know an amāvāsyā occurring on the 13th day (of a paksa); both the moon and the sun were eclipsed in the same month on the 13th day'. In the Mausala-parva[1779] 2 18–19, when Krsna, 36 years after the war, beheld certain portents it is said, "on observing those portents on the amāvāsyā occurring on the 13th day he declared 'Rāhu had made this (13th day) appear as the 14th and 15th (when usually there is amāvāsyā) when the Bhārata

1779 एव पश्यन् हृषीकेश संप्राप्त कालपर्ययम् । त्रयोदश्याममावास्या तान् दृष्ट्वा भाव्यगीदिदम् ॥ चतुर्दशी पञ्चदशी कृतेय राहुणा पुनः । प्राप्ते वै भारते युद्धे प्राप्ता चाद्य क्षयाय न ॥ मौसलपर्व 2, 18–19.

war took place; to-day it has again occurred for our destruction'. From these words it is clear that the occurrence of an āvāsyā at the end of a *pakṣa* of 13 days was looked upon as a very evil omen. Then many scholars hold that a comet had also appeared at the time of the great war. Bhīṣma 3 13[1780] states, 'a very frightful comet stands in the sky covering the constellation of Puṣya'. There are grave doubts whether the statement is made from actual observation. The appearance of a comet has always been associated in ancient times with great calamities. Compare Kumārasambhava II 32 'upaplavāya lokānām dhūmaketurivotthitah'. As indicated above, the Mahābhārata gathers together several possible and impossible things to emphasize their significance as to impending calamities. Therefore the inclusion of a comet among portents does not establish that a comet had actually appeared at the time of the Bhārata war. Supposing for argument that a comet had appeared, that circumstance is of no help at all in settling the date. A large number of comets is included in the sun's retinue. The number of comets of long periods that approach the sun in a century is said to be 300. There is nothing to show what particular comet appeared at the time of the war and no one has data to connect the Mahābhārata comet with Halley's comet or any other comet well-known in modern times. Therefore the *datum* about a comet is entirely worthless for purposes of chronology. According to Brhatsamhitā 11. 5 and Utpala thereon the ancient writer Parāsara held the view that there were 101 *ketus* and Garga said that there were a thousand. The description in Bhīṣma 3 13 states that the *perihelion* of the comet was in Puṣya. In Udyogaparva 143 10 it is said 'since a *graha* specially afflicts Citrā, a great calamity is indeed approaching the Kauravas'. This may probably refer to a comet. Two other verses appear to have some bearing on this. Bhīṣma 3. 12 states[1781] that the white *graha* stands traversing

1780. श्वेतो ग्रहस्तथा चित्रां समतिक्रम्य तिष्ठति । अभाव हि विशेषेण कुरूणा तत्र पश्यति ॥ धूमकेतुर्महाघोरः पुष्य चाक्रम्य तिष्ठति । सेनयोरुभयोर्घोर करिष्यति महाभय ॥ 'श्वेतो ग्रहः प्रज्वलित सधूम इव पावक । ऐन्द्र तेजस्वि नक्षत्र ज्येष्टामाक्रम्य तिष्ठति ॥ भीष्म 3 12, 13, 16. The Madras edition reads इयामो ग्रह. in भीष्म 3 16 and Dr Daftari proposes to read चैता for चित्राम् (p 64 para 130).

1781. ध्रुवं प्रज्वलितो घोरमपसव्य प्रवर्तते । रोहिणीं पीडयत्येवमुभौ च शशिभास्करौ ॥ चित्रास्वात्यन्तरे चैव विष्ठितः परुषग्रह । भीष्म 3 17, compare बृहत्संहिता 11 39 'श्वेत इति जटाकारो रूक्ष. इयावो वियद्भिभागगत । विनिवर्ततेऽपसव्य त्रिभागक्षोभा प्रजा कुरुते ॥'. उत्पल explains 'रूक्ष परुष इयाव कृष्णवर्ण'. It is remarkable that बृहत्सं 11. 57 in चित्रासु कुरुक्षेत्राधिपस्य मरण समादिशेत्तज्ज्ञ. ', thus agreeing very closely with भीष्म 3 12

citrā (i e it is about to enter into *svāti*) and verse 16 says, 'the white *graha* is fiery like fire emitting smoke and stands occupying Jyesthā which is a bright star presided over by Indra'. What is meant by 'white graha'? The words 'sveto grahah' should ordinarily denote Venus Nīlakantha takes them to mean Ketu (node) in Bhīsma 3 12 and another comet in 3 16. If this latter explanation be accepted there were two comets seen at the time. Even if we hold that Bhīsma 3. 16 describes the tail of the comet mentioned in 3 13, that is of very little help All that would be meant would be that the tail of the comet was a very long one Bhīsma 3. 17 has been taken to refer to Rāhu by Nīlakantha, while some modern scholars hold that it refers to a comet It means, 'a cruel comet standing between Citrā and Svāti, afflicts Rohinī and also the sun and the moon' The description of the Ketu called Śveta in Brhatsamhitā 11 39 agrees very closely with the description in the Bhīsmaparva and Parāsara quoted by Utpala thereon states that the Ketu called 'Śveta' becomes visible after 115 years and portends the destruction of two-thirds of the population

Then there are several passages which state the positions of several planets just before the battle or on the day the battle began. Here again at least two different positions are assigned to each planet except Mercury. It is first to be noted that at the beginning of the war all the seven planets excluding Rāhu and Ketu are declared to have been near each other (Bhīsma 17 2, q in note 1776 above). We know from the Mahābhārata itself that the Sun and the Moon on Kārtika amāvāsyā were in Jyesthā It the war began on amāvāsyā or a day later, the planets must be near Jyesthā If the Bhāratasāvitrī be followed then the war began on Mārgasīrsa bright 13 and on Bharanī. If that were so, the sun and the moon cannot be together. Mr Karandikar takes 11th of the bright half of Mārgaśīrsa to be the tithi of the beginning of the war and holds that the Sun was in naksatra Jyesthā and that the moon was in Bharanī (following the Bhāratasāvitrī as to this last) I should hold that we are not at liberty to take one datum from one group of statements and another from another group and then say that it is proved that the war was fought at a particular time. It is further noted in Karnaparva 37. 4 that on Karna's death (i. e. 17 days after the war began), the seven planets were seen going away from the Sun [1782] The positions of the planets at the beginning of the war were as follows:—

1782 ते सप्तलो व्यदृश्यन्त सूर्यास्तं महाग्रहाः ॥ कर्ण 37. 4..

SUN— Udyoga 143. 11 (Rāhu approaches the Sun)
Bhīsma 3. 11 (" ")
Bhīsma 3. 28, 32 (q. above in n. 1767)
The Sun was either in Jyesthā or near Mrgaśīrsa.

MOON— Bhīsma 3 17 (*parusa graha* i e Rāhu afflicted both the Sun and the Moon) and Rohinī
Bhīsma 3. 28, 32 (q above in n. 1767)
Bhīsma 17. 2 (the Moon was in the province of Maghā q. above in n. 1776).

MERCURY— Karnaparva 94. 49 says that on Karna's death the son of the Moon (i. e. Mercury), the white luminary, rose slantingly resembling in hue fire and the Sun The Śalyaparva 11. 18 states that Mars, Venus and Mercury were in conjunction [1783] If Mars was in Maghā as stated in Bhīsma 3 14 and Mars and Mercury were in conjunction Mercury would be in Maghā, which forebodes destruction of people by war, as stated in Brhatsamhitā 7 3

MARS— Udyoga 143. 9 states, 'Mars having made a retrograde motion in Jyesthā seeks (to reach or afflict ?) Anurādhā, the naksatra presided over by Mitra, as if bringing death (to friends)'
Bhīsma 3 14 states: 'Mars is retrograde in Maghā ' What is the meaning of this ? Literally it means that Mars was in Maghā and was retrograde in motion Mr Karandikar holds that Mars had only *drsti* on Maghā and was in Pusya Supposing this is correct, Mars was not near the Sun but far away

Bhīsma 3 18 declares: 'Mars, having changed its motion after being retrograde and with the lustre of fire, stands covering Sravana, the mansion of Brhaspati '.[1784]

1783. ग्रहश्च तिर्यग् ज्वलनार्कवर्णः सोमस्य पुत्रोऽभ्युदियाय तिर्यक् ॥ कर्णपर्व 94 49, भूयश्चतुर्धराशुत्रौ शशिजेन समन्वितौ । चरम पाण्डुपुत्राणा पुरस्तात्सर्वभूतजाम् ॥ शल्य 11. 18.

1784 कृत्वा चाङ्गारको वक्र ज्येष्ठाया मधुसूदन । अनुराधा प्रार्थयते मैत्र सगमयञ्चिर ॥ उद्योग 143. 9, मघास्वङ्गारको वक्र श्रवणे च बृहस्पति । भग नक्षत्रमाक्रम्य सूर्यपुत्रेण

(*Continued on the next page*)

We find that the Mahābhārate employs two classes of expressions When it uses words like ' tisthati ' (stands), ' ākramya ' (having traversed), ' samvrtya or samparivārya ' (having covered or concealed) it means that the planet was in or very near that naksatra When words meaning ' afflicts (pīḍayati) are employed, the meaning is probably that the planet has only drsti on the naksatra It is impossible to say whether the rules and theories about drsti or pūrna drsti and partial drsti had been evolved at the time of the Mahābhārata War. If the war was fought about 3101 B C or even 1931 B C there is nothing to establish that the theories about drsti contained even in the Atharvajyotisa (which is certainly later than the Vedāngajyotisa of the Rgveda i e much later than about 1200 B. C) were known then Vide under Venus for further difficulties

JUPITER— Bhīsma 3 14 states that Jupiter was retrograde in Śravana ; Bhīsma 3 27 states,[1785] ' Both Jupiter and Saturn that had stayed together for a year are near Viśākhā and are both fiery '.

Jupiter cannot stay for one year in one naksatra ; it traverses 2½ naksatras in a year. If at the time of the war Jupiter was near Viśākhā it could not have been near it for a year. Eleven months before that it would have been very near Citrā. If it was near Visākhā at the time of the war and the Sun was in Jyesthā, it can hardly be correct to say that seven planets had come together in the sky (there being a distance of about two naksatras or about 26

(*Continued from the last page*)

पीड्यते ॥ भीष्म 3. 14 , वक्रानुवक्रं कृत्वा च अवर्णं पावकप्रभ । ब्रह्मराशिं समावृत्य लोहिताङ्गो व्यवस्थित ॥ भीष्म 3 18 उत्पल on बृहत्संहिता 1. 10. explains, अनुवक्र स्पष्टगतित्वम् । वक्रां गतिं त्यक्त्वा पुन. स्पष्टां गतिमाश्रितो अनुवक्रित इत्युच्यते. In these verses there is probably some reference to the verses of Parāśara and Garga quoted by Utpala on Brhatsamhitā 6 1–13 गर्ग quoted on 6. 13 says that the naksatras from Pūrvāṣādhā to Aśvinī are to be of *dakṣina-mārga* and the movements of Mars in them cause danger.

1785. संवत्सरस्थायिनौ च ग्रहौ प्रज्वलितावुभौ । विशाखायां समीपस्थौ बृहस्पतिशनैश्चरौ ॥ भीष्म 3. 27 , बृहस्पतिं संपरिवार्य रोहिणीं बभूव चन्द्रार्कसमो विशांपते ॥ कर्ण 94. 51.

degrees between the two) Even if we hold the meaning to be that Jupiter and Saturn had remained near Viśākhā for one year and are (now at the time of the war) fiery, that does not solve the difficulty In the first place, it is not a natural construction This meaning would leave the exact position of the two planets at the time of the war unspecified But Jupiter and Saturn must be supposed to be in or near Jyesthā if the Sun was in Jyesthā at the beginning of the war If Saturn was in Jyesthā at the time of the war it could have been one year in Viśākhā about two years before the war. What is the propriety of mentioning Saturn's position two years before the war? The relevant point is to state that position at the time of the war Therefore it must be held that Bhīsma 3 27 states their position at the time of the war and adds one more circumstance that they were there for one year.

Karnaparva 94. 51 says: 'Brhaspati having entirely covered Rohinī has become like the Sun and the Moon'. If at the beginning of the war Brhaspati was retrograde and was near Viśākhā, it passes one's understanding how in a fortnight it came to Rohinī Mr. Karandikar suggests that Rohinī here is the name of Jyesthā as in the Tai S IV 4 10 1-3. Again in this explanation there are several difficulties There is nothing to show that at the time of the Bhārata war or of the epic Jyesthā was called Rohinī The Tai S does not employ the name Jyesthā in its list It speaks of Rohinī once as having Prajāpati for its presiding deity and then as having Indra as the presiding deity Jyesthā is well-known to the Mahābhārata and the word is employed by it in other passages Further, if Brhaspati had covered Jyesthā it can hardly be correct or even useful (for the purposes of chronology) to say that Jupiter was near Viśākhā.

VENUS— Bhīsma 3 15 states that Venus[1786] having ascended (i. e. occupied) the Pūrvābhādrapadā naksatra shines charmingly and it looks up to Uttarābhādrapadā together with (?) The meaning of ' parikramya sahitah ' is not at all clear. However the first half is as clear as possible. Venus was in Pūrvā Prosthapadā. If the Sun was in Jyesthā on Kārtika amāvāsyā, it is impossible that Venus could have been in the 8th naksatra from Jyesthā. Venus is never more than four naksatras from the Sun in the sky. This would completely knock on the head the principal statement that seven planets were near each other Mr. Karandikar in desperation suggests that we should understand Pūrvāsādhā for ' Prosthapade Pūrve ' and also that the word ' Prosthapade ' was an interpolation inserted by some busy body later on. As I have frequently said above, this is a most unjustifiable way of dealing with the so-called astronomical data in the Mahābhārata. ' Prosthapade Pūrve ' can never mean ' Pūrvāsādhā '. In the Tai. S. IV. 4. 10. 1-3, and the Tai. Br. I. 5. 1 and III. 1. 1 the word Prosthapadā is expressly employed for Pūrvā Bhādrapadā. Why should one word in a verse be held to be interpolated? Is it because it does not agree with one's hypothesis? In Śalya 11. 18 Venus and Mars are said to be in conjunction with the Moon. If the war started on Bharanī as the Bhāratasāvitrī says, then at the time of the mace-duel the moon might be in Jyesthā and therefore both Mars and Venus will have to be in Jyesthā. But this is opposed to two of the passages cited above referring to the position of Mars. If the war began on Jyesthā and Kārtika amāvāsyā, then on the 18th day the moon will be in Pusya or Āślesā and both Venus and Mars would have to be in one of these two. In any case, if Venus was in Pūrvā-bhādrapadā at the beginning of the

1786 शुक्र. मोहयदे पूर्वं समारुह्य विरोचते। उत्तरे तु परिक्रम्य सहितः सप्तदीक्षते॥ भीष्म 3. 15.

war, on the 18th day it can neither be in Jyesthā, nor in Pusya nor in Āslesā. Besides, it is debatable whether Bhīsma 3. 16 (where 'śveto grahah' is mentioned) refers to Venus or not Venus is often called 'Sita' in ancient astronomical works (e. g in Brhatsamhitā 9. 42, 45).

SATURN— We have four statements about Saturn. In Udyoga 143 8 we read,[1787] 'A refulgent and malignant planet, Saturn, afflicts the naksatra presided over by Prajāpati (i. e Rohinī)', Bhīsma 2 32 states, 'Saturn afflicts Rohinī': Bhīsma 3. 14 says, 'the naksatra presided over by Bhaga is covered and afflicted by Saturn', Jupiter and Saturn are near Viśākhā (Bhīsma 3.27 considered above). In the first three passages the root 'pīd' occurs and therefore it is possible to argue that some kind of aspect (*drsti* or *vedha*) of the naksatra mentioned in the text is meant. But in the third passage both 'ākramya' and 'pīdyatu' are used about the same naksatra. This makes that passage inexplicable in the usual way The 'prājāpatya naksatra' must be Rohinī as in the 2nd passage Rohinī is expressly named All authorities agree that Prajāpati is the deity of Rohinī 'Prājāpatya naksatra' cannot be taken to mean Mūla, since the presiding deity of Mūla is 'pitarah' in Tai. S. IV. 4. 10 1-3 and Nirrti (in the Tai. Br. I 5. 1 and in the Vedānga-jyotisa) and Prajāpati only in some later works Bhaga is the presiding deity of Uttarā Phalgunī in the Tai S IV 4 10. 1-3 and Tai Br. I 5 1, and III. 1 1, while in the Vedāngajyotisa (Rgveda, verse 25), Visnu Dh. S. (78 16), Śān. Gr (I. 26 9, SBE vol 29 p 53) Bhaga is the deity of Pūrvā Phalgunī. The 4th passage about Saturn being near Viśākhā has been already dealt with under Jupiter

1787 प्राजापत्यं हि नक्षत्रं ग्रहस्तीक्ष्णो मदाद्गति. । शनैश्चर. पीडयति पीडयन् प्राणिनोऽधिकम् ॥ उद्योग 143. 8, रोहिणीं पीडयन्नेष स्थितो राजन् शनैश्चर. । भीष्म 2, 32. भगं नक्षत्रमाक्रम्य सूर्यपुत्रेण पीड्यते । भीष्म 3. 14.

The above detailed statement about the astronomical passages of the Mahābhārata will induce any unbiassed reader who has no axe to grind that they are hopelessly inconsistent and that no certain chronological conclusion can be drawn therefrom In the above discussion I have generally not cited the various explanations indulged in by several scholars, as that would have involved me in a very lengthy discourse without any adequate benefit To me it appears probable that the final redactor of the Mahābhārata had two or more sets of astronomical data about the war before him and without trying to examine and sift them he included them all in his work. The Bhārata-sāvitrī probably represents one (and a later) tradition about the positions of the planets at the time of the war. As I hold that either the Mahābhārata passages on the positions of the planets were interpolated at a very late stage or are hopelessly inconsistent I deem it unnecessary to enter upon an examination of the mathematical calculations made by several scholars to find out the date of the Bhārata war from the shifting of the solstices and the position of the planets.

Since only 5046 years have elapsed (in 1945 A. D) from the beginning of the Kali age and as Kaliyuga extends to 432000 years according to Paurānic computations we are just on the threshold of the Kaliyuga and it is beyond one's comprehension to visualize what will happen towards the end of the vast period of about 427000 years that are still to pass before Kaliyuga ends It is very small consolation to read in the Purānas in a prophetic strain that at the end of that colossal period Visnu will be incarnated as Kalkin in a village Śambhala, will destroy all Mlechhas, sūdra kings and heretics and will establish dharma, so that the Krta age will then be ushered in. Here again as in almost all matters there are differences in the legend. The Vāyu (58 75-90) and the Matsya (144. 50-64) state that it will be Pramati Bhārgava who will be the *avatāra* of Visnu and uproot the Mlechhas, heretics and śūdra kings, while Vāyu 98. 104-110 and 99 396-7, Vanaparva 190 93-97, Bhāgavata XII 2 16-23 state that Kalkin will conquer the Mlecchas, will become a universal emperor (*cakravartin*) of the *dharmavijayin* type and will start the Krta age. In some passages he is called Kalki (nom. of Kalkin) as in Vanaparva 190 93, Brahma 213. 164, Vāyu 99 396, Matsya 47. 248, Nrsimha 54 3; while in others as Kalkih (nom. of Kalki) as in Vāyu 98. 104, Kalki 2 28, Bhāgavata XII. 2 16, Matsya 47. 251. In

some passages he is said to be the son of a brāhmana Visnuyaśas who will be the head[1788] of the village called Śambhala (Bhāgavata XII. 2. 16, Visnupurāna IV. 24. 26, Agni 16. 8, Nrsimha 54. 3, Kalkipurāna 2. 34), while in other passages he is himself styled Visnuyaśas (Vāyu 98, 104, Vanaparva 190. 93, Brahma 213. 164, Visnudharmottara I. 74. 40)[1788a] In some places

1788 शम्भलग्राममुख्यस्य ब्राह्मणस्य महात्मनः । भवने विष्णुयशसः कल्किः प्रादुर्भविष्यति ॥ अश्वमाशुगमारुह्य देवदत्तं जगत्पतिः । असिना साधुदमनमष्टैश्वर्यगुणान्वितः । .. यदावतीर्णो भगवान्कल्किर्धर्मपतिर्हरिः । कृत भविष्यति तदा प्रजासूतिश्च सात्त्विकी ॥ भागवत XII. 2 16–23

1788a Various efforts have been made about finding germs of history in the legend of Kalkin In I A vol 48 pp. 123–128 Prof. H B. Bhide tries to show how Jain authorities about Kalkin are conflicting Mr K. P. Jayaswal in I. A. vol 46 (for 1917) p. 145 holds that Kalkin must be identified with the great hero Yaśodharman who ruled over India from the Brahmaputrā to the Western Ocean and from the Himālaya to Mahendra and who conquered the Hun Mihirakula and made him pay homage to his feet as stated in the Mandasor Inscription (vide Gupta Ins. p. 149). Prof Pathak on the other hand relying upon certain Jaina sources identifies Kalkin with Mihirakula himself (I A for 1918 at p. 19). Otto Schrader in Brahmavidyā vol I pp 17–27 discusses how the names Kalkin or Kalki came to be given to the saviour of India from Mlecchas, heretics and the like. Kalka means 'sin' or 'sediment' and Karka means 'a white horse'. Therefore he thinks that Kalkin is a form of *karkin* (one riding a white horse). Vide also N I A vol. IV pp 337–343 (on Kalki from the Kalkipurāna). It is probable that the dismal accounts of Kalıyuga were put forth in the first centuries of the Christian era when the ancient varnāśrama-dharma had suffered a great set-back owing to the ascendancy of Buddhism and Jainism and the invasions of foreigners like the Śakas and Hūnas, that when Yaśodharman defeated the great Hun invader Mihirakula, people believed that the dark ages were at an end and that an era of perfect dharma was at hand That Mihirakula was a most ruthless and bloodthirsty invader who in his long career of 70 years slaughtered myriads of men and women is stated by the Rājatarangini I 310 (which speaks of him as *trikotihan*) and 322 (which narrates that he slaughtered three crores of women of respectable birth together with their husbands, brothers and sons) Hiouen Chwang (Beal's B. R W W pp. 171–172) narrates that Mihirakula either slaughtered or made slaves of nine lakhs of people in Gandhāra Passages in a prophetic vein were added about the time of Yaśodharman to those already existing about the decline of dharma in Kaliyuga This will of course necessitate that all passages about Kalkin in any work whatever were put in later than about 530 A D There are two theories as to who defeated Mihirakula Hiouen Chwang's account gives the name of the victor as Bālāditya of Magadha (vide Beal's B R. W. W. part I. pp. 167–171). On the other hand there are three inscriptions, the

(*Continued on the next page*)

he is said to have already flourished (Vāyu 98. 111, Matsya 47. 255), in other places the texts employ the future (Vāyu 99. 396, Bhāgavata XII 2. 16). This last discrepancy is probably due to the fact that the writers sometimes forget their role of prophets. Further, it has to be remembered that according to the Purānas the four yugas (and therefore the Kalki *avatāra*) have been repeated again and again. The Kalki-purāna (I. 2. 33 and I. 3 32-33) states that Kalki was a contemporary of Viśākhayūpa king of Māhismati, while the Vāyu (99. 312-314), Matsya (272. 4) and Visnu (IV. 24) state that Viśākhayūpa was the 3rd of the Pradyota dynasty that preceded the Śiśunāga dynasty. Though the Kalki-purāna several times uses the past tense about Kalki, yet at the very beginning it says (I. 10) that what is narrated is an ākhyāna (story) of the future It is interesting to note that in the Parnālaparvata-grahan-ākhyāna[1788b] of Jayarāma composed about 1673 A.D. Bahlolkhan,

---

(*Continued from the last page*)

Gwalior stone Inscription of Mihiraknla (Gupta Ins. No. 37 p. 161), the Mandasor stone Pillar Inscription of Yaśodharman (Gupta Ins. No. 33 p 142), and the Mandasor Stone Inscription of Yaśodharman Vișnuvardhana (Gupta Ins No 35 p 150) in none of which is Bālāditya referred to. But in the Sarnath Stone of Prakatāditya, son of Bālāditya, another Bālāditya is referred to (Gupta Ins. No 79 p. 284) In the Mandasor Stone Pillar Inscription (Gupta Ins p. 147) occur these words relating to Mihirakula 'नीचैस्तेनापि यस्य प्रणतिभुजबलावर्जनाक्लिष्टमूर्ध्ना चूडारत्नोपहारै-र्मिहिरकुलनृपेणाचितं पादयुग्मम्'. In the Mandasor Stone Ins (Gupta Ins. No 35 at p 153) lines 4 and 5 read अथ जयति नरेन्द्रः श्रीयशोधर्मनामा । आजौ जिती विजयते जगतीं पुनश्च श्रीविष्णुवर्धननराधिपतिः स एव ॥. Dr. Fleet held that Yaśodharman and Visnuvardhana were different, but the reasons he assigns are unconvincing and Jayaswal appears to be right in holding that Vișnuvardhana is the same as Yaśodharman (in 'Imperial History' pp. 39-41) and that Vișnuvardhana was the overlord of Bālāditya. It appears likely that the compilers of the extant Purānas combined the two principal parts of the two names Vișnuvardhana and Yaśodharman and that the conqueror of the Mlecchas was said to be Vișnuyaśas Vide I H Q. vol. XII p 531 and vol XV pp 302-306 for Yaśodharman, Vișnuvardhana and Mihiraknla and Dr R. G Basak in 'History of North-East India' (1934) pp 97-101 (who holds that Yaśodharman and Vișnuvardhana were two different Kings). Pargiter's 'Ancient Indian tradition' and 'Dynasties of the Kali age' and Dr Pradhan's 'Chronology of Ancient India' may be read with advantage in connection with the historic material in the Purānas.

1788b. श्रूयते किल हिन्दूनां शास्त्रे कौश्चिदुदाहृतम् । कल्की विष्णवताराणां दशमः सम्भविष्यति ॥ छेत्स्यते तेन सर्वत्र व्याप्तं यावनमण्डलम् । तस्यैव कल्किनस्तावदसावग्रे समागतः । दूतो वै मतिभाव्यस्मान्यतोऽस्मिन्विधनोद्यतः ॥ पर्णालपर्वतग्रहणाख्यान V 6-8, published by भारत-इतिहास-सशोधक-मण्डल at Poona, 1923.

commander-in-chief of the Bijapur army, is made to say to Khawaskhan, the Vazir, as follows, 'In the Hindu sāstras some say that Kalkin, the 10th avatāra of Visnu will be born and he will destroy the hordes of Yavanas. Shivaji appears to be the first harbinger of that Kalkin'.

Even though the Purānas are carried away by their over-zeal in condemning the moral and physical decline of the Kali age, almost all of them exhibit no verses about matters forbidden in the Kali age. We have to see when the topic of *Kalivarjya* attained prominence and what the matters are that were once practised by people without objection and that later on came to be prohibited or condemned.

The Āp. Dh S (II 6. 14. 6-10) condemns the practice of giving all or most of the ancestral property to the eldest son as opposed to śāstras. The Āp. Dh. S (II 10 27. 2-6), after referring to the view of some that a woman when being married is given to the whole family of the bridegroom, condemns the practice of *niyoga*.[1789] Both these practices (of *uddhāra ambhāga* and of *niyoga*) are among those included in the texts on Kalivarjya. Among the earliest references in the smrtis to practices once current, but forbidden in the Kali age is a passage of Brhaspati quoted by Aparārka p 97, where *niyoga* and the numerous secondary sons are said to be impossible owing to the decadence[1790] of spiritual power among men of the Dvāpara and Kali ages. Aparārka p 739 and the D M quote a passage of Śaunaka to the effect that sons other than the aurasa or dattaka are not allowed in the Kali age[1791] Prajāpati (verse 151) refers[1792] to the ancient practice of offering meat and wine in srāddhas, but prescribes that these should be eschewed in the Kali age Vyāsa[1793] quoted in the Nirnayasindhu and other works forbids

the setting of the three vedic fires and of resorting to sannyāsa after 4400 years of Kali. The Laghu-Āśvalāyana[1794] smṛti (21 14-15) states that the two kinds of sons called Kunda and Golaka were permitted in former ages and had the saṃskāras performed on them, but are condemned in the Kali age. Viśvarūpa and Medhātithi, it is worth noting, do not quote a single verse about Kalivarjya. On Yāj. III. 30 Viśvarūpa tries to reconcile Parāśara III. 5 (saying that a brāhmana who is learned in the Veda and keeps the sacred Vedic fires becomes free from impurity in a day) with Parāśara III 8 (that for ten days on impurity due to birth or death the food of that family becomes unpartakable for others). He does not accept the idea that the period of impurity is only one day for a learned man, but explains that Parāśara III. 5 is only an *arthavāda* meant for glorifying the study of Veda and the keeping of sacred fires. Among later commentators it is stated that the narrowing down of the periods of impurity on the ground of Veda study is forbidden in the Kali age. As this explanation is not offered by Viśvarūpa it is not unreasonable to infer that Viśvarūpa was not aware of the passage on this point quoted from the Ādityapurāna. Medhātithi[1795] also (on Manu IX. 112) refers to the opinion of some that the smṛti passages about niyoga and uddhāra-vibhāga were applicable only in bygone ages, since smṛtis are restricted to certain ages (vide Manu I. 85); but he refutes that view and explains Manu I. 85 by saying that the meaning is that the dharmas (i e qualities or natures of things) change from age to age as they do from season to season From this it is clear that he did not accept that certain practices current in one age were forbidden in others Vijñāneśvara[1796] quotes a single verse which condemns the practice of niyoga, the giving of a special share to the eldest son and the killing of a cow in a sacrifice as not allowable in the Kali age. That

verse is said by the Sm. C II p 266 to have occurred in the Sangraha (i e the work called Smrtisangraha) The Sm. C quotes a verse of Kratu which forbids four acts in Kali, viz niyoga, remarriage of a married girl, killing a cow in sacrifices and the taking of a jar.[1797] The Nāradīya-mahāpurāna contains four verses about Kalivarjya stating that certain practices which were once allowed are forbidden in the Kali age, viz. sea voyage, the carrying of a jar of water, marrying a girl of a class lower than one's own, *niyoga*, killing of an animal in Madhuparka, offering of flesh in śrāddhas, the stage of a forest hermit, remarriage of a married girl when the marriage was not consummated, perpetual student-hood, human sacrifice, horse sacrifice, starting on the great journey, the sacrifice of a cow[1798]. Aparārka (pp. 15, 63) quotes one verse and a half from the Brahmapurāna about certain Kalivarjyas viz. perpetual student-hood, the carrying of a *kamandalu*, marriage with a sagotra or sapinda girl, the killing of a cow, human sacrifice, horse sacrifice, drinking intoxicating liquors[1799]. This could not be traced to the Brahmapurāna, but the Prāyaścitta-tattva (p 520) ex-

1797 क्रतुरपि । देवराच्च सुतोत्पत्तिः दत्ता कन्या न दीयते । न यज्ञे गोवध कार्यः कलौ च न कमण्डलुः ॥ q in स्मृतिच. I p. 12, भट्टोजि's टीका on चतुर्विंशतिमत p 49 कलिवर्ज्यानि folio 1, समयप्रकाश p. 261

1798. सप्तद्रयात्रास्वीकार कमण्डलुविधारणम् । द्विजानामसवर्णासु कन्योद्वहनमस्तथा ॥ देवराच्च सुतोत्पत्तिर्मधुपर्के पशोर्वध । मांसादान तथा श्राद्धे वानप्रस्थाश्रमस्तथा ॥ दत्ताक्षतायाः कन्यायाः पुनर्दान वरस्य च । नैष्ठिक ब्रह्मचर्य च नरमेधाश्वमेधकौ ॥ महाप्रस्थानगमनं गोमेधश्च तथा मख । एतान् धर्मान् कलियुगे वर्ज्यानाहुर्मनीषिण. ॥ नारदीयपुराण, पूर्वार्ध, 24 13-16. These are quoted as from the बृहन्नारदीयपुराण in the उद्वाहतत्त्व p 112, the निर्णयसिन्धु p 367 (reads सप्तद्रयात्रा· स्वीकारः), कालिवर्ज्यानि. folio 2 (reads मांसदान and सप्तद्रयात्रास्वीकारः). the स्मृत्यर्थसार p 2 contains the half verses सप्तद्रयात्रा · धारणम्, दत्ता परस्य च, and महाप्रस्थानगमनं गोपशुश्च सुराग्रह· (but without name) The मद् पा p. 16 has the first half (without name) and also the half दीर्घकालं ब्रह्मचर्य नरमेधाश्वमेधकौ

1799. दीर्घकाल ब्रह्मचर्य धारण च कमण्डलो· । सगोत्राद्वा सपिण्डाद्वा विवाहो गोवधस्तथा । नराश्वमेधौ मद्य च कलौ वर्ज्यं द्विजातिभि· ॥ इत्यादिना मत्स्यादेर्ब्रह्मपुराणादौ सामान्यतो वर्ज्यत्वेनाभिहितत्वात् । अपरार्क p 15, स्मृतिच. I. p, 12, परा मा I. part 1 p 133. The स्मृतिच., हेमाद्रि III 2 (p. 666), मदनरत्न and निर्णयसिन्धु (p 367) read गोत्रान्मातुः सपिण्डाच्च विवाह· which means 'marriage with a daughter of the paternal aunt or with a girl who is a sapinda of one's mother i. e maternal uncle's daughter' The स्मृतिच attributes these verses to आदित्यपुराण while निर्णयसिन्धु p 286 ascribes them to आदिपुराण The कलिवर्ज्यनिर्णय reads गोत्रान्मातृसपिण्डात्, notices also the reading गोत्रान्मातुः सपिण्डात् and has a long note on this, citing and refuting various views. According to the मांसतत्त्वविवेक of विश्वनाथ p. 27 even the कल्पतरु quoted this ब्रह्मपुराण passage (reading गोत्रान्मातृसपिण्डाद्वा)

pressly states that these were cited from the Brahmapurāṇa in the works of Halāyudha, Śūlapāṇi and in the Gṛhastharatnākara (i. e. from about the 12th century onwards). Aparārka (p. 98) quotes another passage from the Brahmapurāṇa[1800], which condemns remarriage of women, niyoga, independence of women, on the ground that men in the Kali age are sinners. Aparārka (p. 233) quotes two verses from a smṛti (without name) the first of which prohibits six acts, viz. killing a cow in sacrifice, niyoga (of husband's brother), the performance of *sattras*, taking a water jar, use of wine (in sautrāmani), being an ascetic (of the *paramahamsa* type) and the second prohibits five, viz. human sacrifice, cow sacrifice, the taking of a kamaṇḍalu, niyoga, and the remarriage of a girl whose marriage has not been consummated. Aparārka (p. 233) quotes a passage from the Mārkaṇḍeya recommending the offering of a golden vessel in place of the cow in Madhuparka and stating that Bhṛgu laid down that no animal was to be sacrificed in Kali. The Sm. C. (I. p. 12) quotes a Purāṇa passage that 'the remarriage of a married woman, special share to the eldest son, the killing of a cow, niyoga and the taking of a kamaṇḍalu—these five are to be avoided in Kali[1801]. Hemādri and the Sahyādri-khaṇḍa state, 'Agnihotra, the killing of a cow, *sannyāsa*, offering of meat in śraddha and raising of a son by the husband's brother—these five were[1802] to be avoided in Kali. Hemādri in Dānakhaṇḍa quotes a passage from the Garuḍapurāṇa in which seven matters are mentioned as forbidden in Kali, viz. Aśvamedha, Gosava, human sacrifice, Rājasūya, remarriage even of a girl whose first marriage was not consummated, the carrying of a kamaṇḍalu and procreation of a son on a widow by her husband's brother. The Smṛtyarthasāra (p. 2) mentions twenty-six Kalivarjyas without expressly citing the name of any work. In the Sm. C., the Caturvargacintāmaṇi of Hemādri (III. part 2 p. 666), the Par. M. I. part 1 pp. 131–137, the Madanapārijāta (pp. 15–16),

1800. क्षीणा पुनर्विवाहस्तु देवरात्पुत्रसन्ततिः। स्वातन्त्र्यं च कलियुगे कर्तव्यं न कदाचन। यत पातकिनो लोके नरा. सन्ति कलौ युगे। ब्रह्मपुराण q by अपरार्क p, 98

1801. पुराणेपि। ऊढाया. पुनरुद्वाहं ज्येष्ठांशं गोवधं तथा। कलौ पञ्च न कुर्वीत भ्रातुर्जायां कमण्डलुम्। स्मृतिच. I p. 12 This is quoted from the आदिपुराण in the मदनरत्न. Vide *n*, 1700 above and कलिवर्ज्यवि.; स्मृतिमु. (वर्णाश्रम) p. 13 quotes it as from पराशर.

1802. अग्निहोत्रं गवालम्भं संन्यासं पलपैतृकम्। देवराच्च सुतोत्पत्तिं कलौ पञ्च विवर्जयेत्॥ स्मृतिमु. (वर्णाश्रम p 176), यतिधर्मसंग्रह p 2, सह्याद्रिखण्ड (उत्तरभाग chap. V. 64–65) The first two read अग्न्याधेयम्. The निर्णयसिन्धु p. 370 *quotes* the verse as a निगम

Madanaratna (samayoddyota), the Udvāha-tattva (p 112), the Samaya-mayūkha, the Samayaprakāsa of Mitramiśra (pp. 261–263), the Nirnayasindhu (III, pūrvārdha at end), Bhattoji on Caturvimśati-mata, the Smrtimuktāphala (varnāśrama p. 13), the Smrtikaustubha, the Dharma-sindhu (pp. 357–358) and some other works quote long passages from a purāna (which in some of them is specified as the Ādityapurāna) that mentions about 50 Kalivarjyas[1803]. There is a work called Kalivarjyavinirnaya or Kalivarjyanirnaya composed by Dāmodara elder brother of Nīlakantha (first half of 17th century A. D.), who in his Samaya-mayūkha refers to it. It quotes the Ādityapurana, Brahma-purana and other texts that are quoted here from Hemādri and other older digests[1804].

In the passage quoted the several Kalivarjyas are not arranged on any systematic basis. Here, first of all a few Kalivarjyas that have a bearing on law will be mentioned and then the rest will be taken up one after another in the order in which they appear in the extract and lastly those that do not appear in that extract will also be dealt with. The first verse states that certain actions were discarded by the wise though this was unauthorized (by śruti or smrti) after arriving at a convention among themselves through fear of the loss of dharma (if they were persisted in), because in the Kali age there is absence of good men. The last verse and a half again state that at the beginning of the Kali great men arrived at certain conventions and discarded certain actions in order to guard the people (against harm and sin) and (it is well known) that the conventions of good men are authoritative like Veda[1805].

1. Giving a larger share of ancestral property or the whole of it to the eldest son (this is called *jyesthāmśa* or *uddhāra* or *uddhāravibhāga*). Vide pp. 624–631 above for this.[1806]

1803. Vide Appendix for the passage.

1804. A ms. of this work existing in the Central Library at Baroda was very kindly lent to me through the Bhandarkar Oriental Institute at Poona. There are eleven folios with ten lines on each side and about 40 letters in each line.

1805. Compare Āp Dh. S. I. 1. 1. 2-3 'धर्मज्ञसमयः प्रमाणम् । वेदाश्च' and Vas. I 4–5.

1806. The earliest reference in English to Kalivarjya matters is found in a translation of the passage of the Samayoddyota section of the Madanaratna contained in Sir William Jones' Works vol. VIII (ed of 1807), General Note, vide also Strange's Hindu Law, vol. II pp 164–174 for reference in a modern work on Hindu Law to several topics of Kalivarjya.

2. Appointing the husband's brother (or a sagotra &c.) to raise issue on the wife of a sonless man. This is called *niyoga* and has been dealt with at length in H. of Dh. vol. II. pp. 599–607. It may be added here that in the K. V. N. there is a long discussion on the question whether an elder brother of the deceased could have been appointed to raise issue on his younger brother's widow and gives it as the opinion of some that he could not be so appointed, but that only a younger brother could be appointed to raise issue on his elder brother's widow. They rely on the Mit. on Yāj. I. 68 where 'devara' is paraphrased as 'kanīyān bhrātā'. The K. V. N. (folio 5 b and 6 a) relying on Manu IX. 62 and the words of the Mit on Yāj. II. 127 (where Manu IX. 69–70 are cited and explained as 'devaras-tasya jyesthah kanistho vā) holds that any brother whether elder or younger than the husband could be appointed.

3. The admission of several kinds of secondary sons other than the aurasa and the dattaka. For this vide above pp. 647–653.

4. Remarriage of widows. This subject has been dealt with in H. of Dh. vol. II. pp. 608 ff. Some texts such as Vas. 17. 74 make a distinction between the remarriage of a woman whose marriage was not consummated and of a woman whose marriage was consummated, remarriage being allowed in the first case but not in the 2nd. The Kalivarjya texts forbid remarriage in both cases.[1807]

5. Intercaste marriages. This subject has been treated of in H. of Dh. vol. II. pp 447–451. It has been shown by me above (pp. 599–600) that the decisions in 46 Bom. 871 and 55 Bom. 1 are based upon a misunderstanding about the real views of Nīlakantha.

6. Marriage with sagotra girls or with girls that are sapindas of the mother (such as the maternal uncle's daughter). Vide H. of Dh. vol. II. pp. 452–478 for prohibition on the ground

---

1807. पाणिग्राहे मृते बाला केवलं मन्त्रसंस्कृता। सा चेदक्षतयोनिः स्यात्पुनः संस्कारमर्हति ॥ वसिष्ठ 17. 74. The half verse बालिकाक्षतयोन्योस्तु वरेणान्येन संस्कृतिः refers to both kinds of widows viz बालिका (whose marriage is not consummated) and क्षतयोनि (whose marriage is consummated). The reading of हेमाद्रि and कलिवर्ज्यनि. (folio 1) 'बालिकाक्षतयोन्यास्तु (or—न्याश्च) is to be understood as referring only to the first kind (बालिका चासौ अक्षतयोनिश्च). The निर्णयसिन्धु (p 368) reads बालायाः क्षतयोन्यास्तु

of sapinda relationship, pp. 497 ff. for prohibition on the ground of gotra and pp. 458–463 for marriage with maternal uncle's daughter. The custom of marrying the maternal uncle's daughter has persisted to this day in many castes in spite of the inclusion of it among Kalivarjyas. An inscription at Nāgārjunikonda (3rd century A. D.) shows that Vīrapurusa-datta, son of Śāntamūla, married three daughters of his paternal aunts (E. I. vol XX p. 1).

7. Slaying a brāhmana who comes as an ātatāyin in a properly conducted fight Vide H. of Dh. vol. II. pp. 148–151 and p. 517 above for this subject.

8. Awarding of fines against witnesses who depose in disputes between father and son [1808] It has already been seen (p 299) how ordinarily suits between husband and wife, father and son were not encouraged in ancient India. But when such a dispute came to the king's notice he could take action *suo motu*, as Nār. includes 'pitāputra-vivāda' among the miscellaneous matters (prakīrnaka verse 3) which the king was to set in motion. Even in ancient times this rule must not have been strictly enforced. As time went on and separation of father and son became frequent the rule must have appeared to be unreasonable. Vide Mit. on Yāj. II. 32 referred to above in n. 418. Yāj. II. 239 (= Matsya 227. 198) prescribed a fine of 3 panas for those who (instead of composing the quarrel between father and son and being able to do so) undertake to be witnesses. Viśvarūpa read 'a fine of two hundred panas'. Viṣṇu Dh. S V. 120 prescribes a fine of ten panas. This shows that at the time of the Matsyapurāna this act was probably not included among Kalivarjyas.

9. Taking (or stealing) of corn even from one whose actions are lowly (i. e. even from a śūdra), when a brāhmana has been without food for six times (i. e three days). Gaut. 18. 28–29, Manu XI. 16 and Yāj. III. 43 provide that when a brāhmana cannot earn his maintenance in a season of distress even in any one of the ways indicated in Yāj. III. 42 and has been hungry for three days he may steal or take away one day's food even from a low person such as a sūdra It should be noted that this Kalivarjya text pointedly repeats the very

1808. पितापुत्रयोर्विरोधे साक्षी न तिष्ठेत्। यस्तिष्ठेत्स दण्ड्यश्चीन् कार्षापणान्यथान्तरे तिष्ठेत्सोऽप्यष्टशतं दाप्यः। शङ्खलिखितौ q. by अपरार्क p. 824.

words of Manu XI. 16 'bhaktāni sad-anaśnatā .. hartavyam hīnakarmanaḥ). In ancient times theft of such a minor nature was permitted when the brāhmana was famished. But later times took a stricter view of the matter.

10. 'The admission to intercourse of a brāhmana who undertakes a sea voyage, even though he may have performed the penance prescribed for the same' (*l.* 7 in the appendix) Here the word used is 'dvijasya'. It may mean either any person of the three higher castes or a brāhmana. If a man who has made a sea voyage took prāyaścitta he expiated only the sin, but did not become fit, according to this dictum, to be associated with by others. Whether the Vedic Aryans knew the sea has been doubted. Vide 'Vedic Index' on 'samudra', vol. II. pp. 431–433. The Nirukta II. 10 refers to the fact that a doubt arises whether the word 'samudra' in a particular vedic verse refers to the sea or to the sky. In some verses as in Ṛg X. 98. 5 'he discharged divine rain waters from the higher to the lower samudra' both the meanings of 'samudra' (viz. sea, sky) are pointedly brought out. Vide also Ṛg. VII. 6. 7 (ā samudrād-avarād-ā parasmāt). In Ṛg. VII. 95. 2 Sarasvatī is mentioned as going from the mountains to the sea In Ṛg. X. 136. 5 the two seas, Eastern and Western, are mentioned (ubhau samudrāvā kseti yaśca pūrva utāparah). In Ṛg. VIII. 6. 4 it is said, 'all people bend down to him, as the sindhus (rivers) flow to the Ocean.' Ṛg. I. 116. 4–5, X. 39. 4 and X. 143. 5 refer to the story that Aśvins saved Bhujyu from the waters of the sea.[1809] The Atharvaveda XI. 2. 25 refers to eastern sea and northern sea. There is no doubt that in the Brāhmanas the sea was well-known. The Tai Br. II. 2. 5. 6 remarks, 'there is no end to desire and also to samudra' (neva hi kāmasyāntosti na samudrasya). The Ait. Br (40. 2) remarks 'just as the sea stands surrounding the earth' (tābhī rājānam parigrhya tisthati samudra iva bhūmim). It has already been seen that among the five practices peculiar to the north the Baud. Dh. S. (I. 1. 22) enumerates sea voyage (samudra-samyāna) as the last and condemns it. Baud. (II. 1. 51) places sea voyage at the head of grave sins (*patanīyāni*) along with misappropriating a brāhmana's wealth kept as a deposit. The Mit.

1809 Vide 'Vedic Hymns' by Max Muller (S B E vol 32 pp. 57–62) for a note on the question whether the Indians of 'the Vedic age' knew the surging sea (terrestrial).

on Yāj. III. 288 quotes the sūtra of Baud. Manu (III. 158 and 166–167) provides that a brāhmana who had been on a sea voyage was sinful and was not to be invited at a śrāddha. But it is clear that Manu does not say that such a brāhmana altogether loses caste or that he becomes altogether unfit to be associated with; all that Manu provides is that such a brāhmana became unfit for invitation at a śrāddha. The Auśanasasmrti (IV. pp. 525–526) declares that those who sell the Veda, who marry a widow, who undertake a sea voyage are *patita* and are not to be invited at a śrāddha. These passages show that the prohibition against sea voyage affected only brāhmanas and even then they did not apparently become altogether unfit to be associated with. That brāhmanas crossed the ocean and went to such distant countries as Siam, Cambodia, Java, Sumatra and Borneo can be easily proved[1810]. E. I. vol. 17 p. 314 gives references to inscriptions from Borneo to show that brāhmanas from India migrated to that country about 400 A. D. That kings and merchants undertook sea voyages is also clear from several considerations. The Bāveru Jātaka (vol. III No 339, Fausboll) tells us that merchants from Benares went to Babylon in order to sell Indian goods. The 'Questions of Milinda' S. B. E. vol. 36 p. 269 refers to a ship-owner voyaging by sea to distant countries[1811]. The Rājatarangini refers to the sea voyage of an envoy of king Jayāpida of Kashmir to Ceylon (IV 503–506). Manu VIII. 157 prescribes that the king should allow that rate of interest which those who are adepts in sea voyages and land journeys and who understand what is required to be the interest at certain times and in certain

---

1810. Vide Dr. R. C. Majumdar's 'Champa' (1927) and 'Suvarnadvipa' (1937 and 1938): 'Indian influence in the Literature of Java and Bali' by Himansu Bhusana Sarkar, 'India and Java' by Dr. Bijan Raj Chatterjee (1933). G Gorer's 'Bali and Angkor'; 'Sankrit texts from Bali' edited by M. Sylvain Levi in G. O. S. Annual Bibliography of Indian Archaeology, vol. IX. pp. 39–50. The standard writings of Brandes, Bergaigne, Kern, Krom, Parmentier and other scholars on Java, Champa and other countries of the Eastern Archipelago are not mentioned here, as they are not in English. They are referred to by Dr. Majumdar and others.

1811. The whole passage is interesting and may be set out here· 'Just as a shipowner, who has become wealthy by constantly levying freight in some seaport town, will be able to traverse the high seas and go to Vanga or Takkola or China or Sovira, Surat or Alexandria or Coromandel coast or Further India or any other place where ships do congregate' &c (S. B. E vol. 36 p. 269).

places determine to be the proper one. Yāj. II. 38 provides for very high interest (20 per cent per month) from those who engage in trade by sea. Nār. IV. 179 says that a trader (samudra-vanik) who makes sea voyages is not a proper witness. The Vāyu (45. 78–80) and other purānas state that Bharatavarsa[1812] has nine divisions called *dvīpas*, all of which are separated from each other by the sea and are not (easily accessible, that Jambudvīpa (India proper) is the 9th dvīpa and the other eight are Indra, Kaseru, Tāmraparnī, Gabhastimat, Nāga, Saumya (Siam?), Gandharva, Vāruna (Borneo?). Therefore Bharatavarsa according to Paurānic Geography included modern India and also Greater India. None of the ancient works at least says anything against śūdras undertaking sea voyages; but now even śūdras, probably in their desire to emulate the brāhmaṇa and rise higher in social esteem, think that sea voyage is forbidden to them also.

When during the latter half of the 19th century some brāhmanas went to England on a political mission or for study and returned to India, the question whether after taking the appropriate *prāyaścitta* those brāhmanas could be associated with fully as before was referred to many orthodox and learned *Pandits* (such as the late Tārānātha Tarkavācaspati) and it is creditable to the Pandits and gratifying to note that many of them came to the conclusion that they could be associated with by others. The two principal texts referred to were those of the Brhan-Nāradapurāna (note 1798 above) and the one from the Ādityapurāna translated at the head of this particular Kalivarjya. Very interesting and hairsplitting arguments and explanations were advanced by the learned Pandits in 1872. Some of them may be noted here. As regards the Nāradīya passage, it is argued that only that seavoyage is forbidden in the Kali, which was a righteous act (dharma) in former times. In Parāśara-smṛti XII. 58 the following prāyaścitta[1813] is prescribed for brāhmana murder: 'the sinner should

1812. भारतस्यास्य वर्षस्य नवभेदा· प्रकीर्तिताः । समुद्रान्तरिता ज्ञेयास्ते त्वगम्याः परस्परम् ॥ इन्द्रद्वीपः कसेरुश्च ताम्रपर्णी गभस्तिमान् । नागद्वीपस्तथा सौम्यो गन्धर्वस्त्वथ वारुणः । अयं तु नवमस्तेषां द्वीप· सागरसंवृत । वायु 45. 78–80. The same verses (except the half verse समुद्रान्तरिता &c) occur in मत्स्य 114. 7–9 and Brahmapurāna 19. 6–7.

1813. एतेषु स्यापयत्नेन. पुण्यं गत्वा तु सागरम् । दृशयोजनविस्तीर्णं शतयोजनमायतम् ॥ रामचन्द्रसमादिष्टं नलसञ्चयसञ्ज्ञितम् । सेतु दृष्ट्वा समुद्रस्य ब्रह्महत्या व्यपोहति ॥ पराशर· स्मृति XII. 69–71.

be directed to perform the penance of going to the *setu* on the ocean; he should beg for alms on the road to the setu from men of the four classes that are free from improper acts, should walk barefooted and without umbrella, should declare his sin in all towns, villages and hamlets of cowherds on the way while resting there or in forests, sacred places and rivers and after reaching the sea and on seeing the setu, 100 yojanas long and 10 yojanas broad, constructed with heaps of stones at the bidding of Rāma by Nala he will get rid of the sin of brāhmana murder'. Here brāhmana murder being a most heinous offence it cannot be supposed that a mere sight of the *setu* from land would absolve the sinner and the words about the length and breadth of the setu would be otherwise meaningless. Therefore what is meant is that he must undertake a sea-voyage and go along the whole length and breadth of the setu in a vessel. Such a voyage was religious conduct in former ages, but in Kali this is forbidden. The word 'holding a kamandalu' (which also was prescribed as dharma in former ages) conveys that a similar or analogous practice is referred to in the immediately preceding words. The words 'dvijasyābdhau &c.' are to be interpreted as follows: 'nauyātuh' is the genitive singular of 'nauyātr'. The affix 'tṛ' is not the ordinary 'tr' but it is 'trn' used in the sense of 'one who habitually does a thing', according to Pānini III. 2. 134–135.[1814] Therefore the words of the Ādityapurāna apply only to a dvija who habitually engages in a sea voyage either as a trader or as a helmsman or sailor. When Nārada (Dāyabhāga 21) states that even an aurasa son who is hostile to his father or who is patita (guilty of one of the five great sins) or is impotent or is 'apayātrita' he does not get a share of ancestral wealth, the Vyavahāramayūkha explains the last word as 'one who goes to another continent (other than Jambudvīpa) through mid ocean by means of a vessel for purposes of trade' and relies on this passage (dvijasyābdhau &c.) for support. So according to the author of the V. Mayūkha only that dvija who constantly undertakes sea voyages for trade is here declared to be unfit for social intercourse though he may have taken a prāyaścitta, and not one who casually or once in a life undertakes a sea voyage. No text prescribes a prāyaścitta merely for going in a vessel on the sea. If that were intended in this passage the text would have read differently viz. 'samudre naugamanābhāve &c.' Even śistas have been

1814. आक्रेस्तच्छीलतद्धर्मतत्साधुकारिषु । तृन् । पाणिनि III. 2. 134–135.

crossing the sea to Ceylon for purposes of trade. In dramas like the Ratnāvali (where the *kañcukan* Bābhravya undertakes a sea voyage and a merchant from Kauśāmbī is said to have gone to Ceylon) and in romances like the Daśakumāracarita frequent references are made to sea voyages to Ceylon and other countries. What is aimed to be hit when prāyaścitta for sea voyage is prescribed is the fact that on such voyages a man may give up for long such daily duties as the performance of *sandhyā* and may have come in very close contact with *mlecchas* as regards food etc. If he has done these two, then only he is not fit for intercourse even though he may have undergone a prāyaścitta. If he performs his daily duties wherever he may dwell and does not come in too close a contact with mlecchas he may have to perform no prāyaścitta, much less would he become unfit for social intercourse. The view of Medhātithi on Manu II. 23 that any country by itself is not unfit for the residence of an ārya, that if mlecchas overrun a country in India and permanently reside there it may become a mlecchadesa, that even a mlecchа country, if it be conquered by an Indian king and if the system of the four varnas be introduced therein, would be a fit one for the performance of Vedic sacrifices, has already been noted (in H. of Dh vol. II p 16). It has to be remembered that the Ādiparva (85. 34) states that *mlecchas* and *yavanas* sprang from Anu and Turvasu, sons of Yayāti. The Sabhāparva notes that Bhīma made mlecchas dwelling beyond the seas and in Anūpa bring tribute (30. 25–27) and that mlecchas came to see the Rājasūya sacrifice along with Bhagadatta of Prāgjyotisa (Sabhā 34. 9–10). The following propositions follow from the above discussion: (1) As the word 'dvija' is used a śūdra or a person of the mixed castes (*saṅkīrna-jāti*) does not become unfit for social intercourse even by habitually undertaking a sea voyage, but he may have to undergo a prāyaścitta, (2) a dvija who casually undertakes a sea voyage to a place outside India either at the king's bidding or for any other purpose has to undergo a prāyaścitta, but if he does so he becomes fit for social intercourse; (3) a dvija habitually undertaking a sea voyage for trade or as a sailor would become unfit for intercourse even after undergoing prāyaścitta. Manu IX. 314, when enlarging upon the devastating power of brāhmanas, mentions that the sea was made undrinkable by brāhmanas, which, according to Medhātithi and other commentators, has in view the story in Śānti 343 60–61. It is difficult to say whether this story had any influence in leading to the prohibition against sea voyage.

The Smrtikaustubha explains that 'samudrayātrā' means 'tīrthayātrā' i e. pilgrimage to holy places beyond the sea and that is forbidden here. But this seems to be wrong, as stated by Krsnabhatta on the Nir. S. The latter says that expiation is to be undergone only where a sea voyage is undertaken from worldly motives, but where a sea voyage has to be undertaken for reaching a holy place like the Śankhoddhāra-tīrtha, it is an inseparable part of the pilgrimage and therefore there is no necessity to undergo a prāyaścitta.[1815]

11. 'The initiation for a *sattra*' (1. 8) Sattras were sacrificial sessions the duration of which varied from 12 days to a year, 12 years or even more. Only brāhmanas could perform them (Jai. VI. 6 16-23). Acc. to Śabara on Jai. VI. 2. 1 persons who engaged in them must not be less than 17 nor more than 24 All of them were both sacrificers (yajamāna) as well as priests. Vide H. of Dh. vol. II pp. 1239-1246 for sattras. The prohibition against engaging in sattras is a clear indication that people had become tired of the ancient Vedic sacrifices, of the great demands they made on time and wealth and had begun to prefer other and easier modes of worship.

12. 'Carrying a jar of water' (1. 8). The Baud. Dh. S I 4 devotes numerous[1816] sūtras (1-27) to the subject of carrying an earthen or wooden jar full of water. Every *snātaka* was always to carry a jar of water from which he was to take water for *śauca* He was to wash it with water and rub it with his hand. This was declared to be equal to *paryagnikarana* (encircling with fire for purification, vide H. Dh. vol. II p. 1120 n. 2501). He was not to go to another's house or to the village boundary or on a journey without the jar. Vas. 12. 14-17, Manu IV. 36, Yāj I. 133 contain similar provisions Viśvarūpa explains that the snātaka himself need not carry it and that it may be carried for him by another. It was an encumbrance, gave rise to unhygienic and unclean habits and so gradually it came to be dispensed with. This practice was regularised by declaring that in the Kali age a water jar was

1815 एतच्च प्रायश्चित्तं रागप्राप्ते समुद्रयान एव। शङ्खोद्धारादिवत्तीर्थे यात्राविधिनान्तरीयकं समुद्रयानमतो दोषाभावाच्च प्रायश्चित्तमित्यन्यत्र विस्तरः। कृष्णभट्ट on नि. सि p 1288.

1816. अथ कमण्डलुचर्याम्नुपदिशन्ति । ... तस्माच्छौचं कृत्वा पाणिना परिमृजीत पर्याग्निकरणं हि तत् । ... अथाप्युदाहरन्ति । कमण्डलुर्द्विजातीनां शौचार्थे विहित पुरा। ब्रह्मणा मुनिमुख्यैश्च तस्मात्तं धारयेत्सदा॥ तत. शौचं ततः पान सन्ध्योपासनमेव च। निर्विशङ्केन कर्तव्यं यदीच्छेच्छ्रेय आत्मनः। ... पितृदेवार्चिकार्येषु तस्मात्तं परिवर्जयेत्। तस्माद् विना कमण्डलुना नाध्वानं व्रजेत्न सीमान्तं न गृहाद् गृहम्। बौ. ध. सू. I. 4. 1. 3. 18-19, 24, 25.

not to be carried at all. The Madanapārijāta (p. 16) explained that 'kamandaluvidhārana' refers to perpetual studenthood, but this explanation cannot be accepted, because in the Nāradīyapurāna (note 1798 above) both are mentioned separately. The K. V. N. (folio 3 a) notes that some explained 'kamandaluvidhāranam' as standing for 'dīrghakālam brahmacaryam' (studenthood for long periods).

13. 'Starting on the Great Journey' (l. 9). The Bṛhan-Nāradīya-purāna (pūrvārdha 24. 16) also forbids this. According to Manu VI. 31 and Yāj. III. 55 a forest hermit, when he suffered from an incurable disease and could not perform the duties of his order, was allowed to start towards the north-east on the Great Journey (mahāprasthāna) till the body fell down to rise no more. Similarly, a man guilty of brāhmana murder was allowed to meet death at the hands of archers or to throw himself head foremost into fire. Vide H. of Dh. vol. II. pp. 924-928 for Mahāprasthānagamana. Aparārka[1817] (p. 877-879) quotes long passages from the Ādipurāna to the effect that if a man suffering from an incurable disease starts on the Great Journey in the Himālaya or commits suicide by entering fire or water or by falling from a precipice, not only does he not incur sin, but on the contrary he goes to heaven. It is rather inconsistent that the Ādipurāna (or Ādityapurāna) should in one place extol the starting on the Great Journey and in another place should forbid it in the Kali age. The K. V. N. cites the instance of the Pāṇḍavas that are said to have started on the Great Journey. This makes one suspicious about the authenticity of the passages on Kalivarjya quoted from the Ādityapurāna by some and from Ādipurāna by others.

14. 'The killing of a cow in the sacrifice called Gosava' (l. 9).

There were various occasions on which in ancient times a cow was sacrificed. The Anūbandhyā cow killed at the end of the Udayanīyā iṣṭi in Agniṣṭoma has been referred to above (on p. 627 n. 1196). In the Madhuparka which was offered

1817. तथा चादित्यपुराणम्। दुश्चिकित्स्यैर्महारोगैः पीडितस्तु पुमान्यदि। प्रविशेज्ज्वलनं दीप्तं करोत्यनशनं तथा॥ अगाधतोयराशिं वा भृगुप्रपतनं तथा। गच्छेन्महापथं वापि तुषारगिरिमादरात्॥ अयागवदशाखायां देहत्यागं करोति वा। स्वर्गं देहविनाशस्य काले प्राप्ते महामतिः। उत्तमान्यायुषाद्योक्तान्नात्मघाती भवेत्क्वचित्। q. by अपरार्क p. 877 and by परा. मा. I. 2. 228 (as from आदित्यपुराण) अपरार्क (p. 879) further quotes 'महाप्रस्थानयात्रा च कर्तव्या तूहिनोपरि। आस्थितेन सदा धैर्यं च सदा. स्वर्गमवाप्नुयात्॥'

to an honoured guest a cow was either killed or let loose at the desire of the guest. Vide H of Dh. vol. II pp. 543-545. A cow was killed in one of the three or four *astakā* śrāddhas (vide Khādira gr. III. 4 1, Gobhila gr. III. 10. 16). Āp Dh. S. II. 7. 16. 25 states that if cow's flesh is offered in śrāddha for the *pitṛs*, the latter are gratified for one year. There was a sacrifice called Gosava or Gomedha, that was an Ukthya in which the fees were ten thousand cows and which according to some could be performed only by a vaiśya (Kāt. Śr. 22. 11.[1818] 3-8). A bull was killed as an offering in the rite called śūlagava (vide H. of Dh. vol. II pp. 831-832). As flesh-eating came to be looked down upon, cow sacrifice became most abhorrent and Kalivarjya texts only register a prohibition which had been acted upon centuries before.

15. 'The employment of cups of wine in the Sautrāmaṇī' (I. 10).

The Sautrāmaṇī is not a soma sacrifice but it is a combination of an *iṣṭi* with an animal sacrifice. It was so called from 'sutrāman' (an epithet of Indra). Its peculiar characteristic was the offering of *surā* in cups. In modern times milk is offered in its place and Āp Śr. allowed it even in ancient times[1819]. It was included among the seven *haviryajñas* by Gaut. (VIII. 20). At the end of the Rājasūya it was performed or in Agnicayana or for one who suffered vomiting or purging from the excessive drinking of soma. For sautrāmaṇī and the preparation of surā in it, vide H. of Dh. vol. II pp. 1225-1228. Bhattoji (in com. on Caturvimśati-mata p. 53) and the Nirnayasindhu construe this to mean 'having social intercourse with one who employs surā in Sautrāmaṇī' but this is not satisfactory. The Dharmasindhu explains as above (III. pūrvārdha p. 357)[1820].

1818. ऋषभगोसवौ । . . उक्थ्यो गोसवो अयुतदक्षिणः । वैश्ययज्ञ इत्येके । सराजानो विशो यं पुरस्कुर्वीरन् । कात्या श्रौ 22. 11 3, 6-8.

1819. चात्वाले मार्जयित्वापरस्मिन् स्रुवे सुराग्रहान् गृह्णन्ति । ... पयोग्रहा वा स्युः । आप. श्रौ. 19. 2. 7. 13.

1820 सुराग्रहणस्य सुराग्रहणकर्तुः सग्रह. व्यवहारः । भट्टोजि on चतुर्विंशतिमत p 53 , सौत्रामण्यादियज्ञेपि सुरापात्रग्रहस्तथा । धर्मसिन्धु III p 357 The कलिवर्ज्यवि (follo 6b) remarks, 'सुराग्रहणस्य सग्रहः प्रयोगविधिनानुष्ठापनम् । यत्तु सग्रहपदस्वारस्यानुसारेण सुराग्रहणस्येत्यनेन सुराग्रहणकर्तार विवक्षित्वा तस्य संग्रहे व्यवहार इति व्याख्यात तत्र । अस्मदुक्तमार्गेण गतिसम्भवे लक्षणाश्रयस्य जघन्यत्वात् । किं चैव सति सौत्रामण्या सुराग्रहस्य निषेधो न स्यात्तत्कर्तु परे व्यवहारनिषेधः स्यात् । तच्च समाचारविरुद्धम् ।'.

16. 'The licking of the Agnihotrahavanī and the use of it even after it was licked' (l. 11) In the Agnihotra the *sruva* ladle is held in the right hand and the *sruc* called agnihotrahavanī is held in the left and the milk is poured into the latter from the milk pot with sruva. After the Agnihotra homa is offered the agnihotrahavanī is licked twice in order to take out the remnants of the milk and after wiping it with darbha blades it is used again. Ordinarily a vessel when it is once licked by a man cannot be used again in a religious rite unless proper purification is resorted to. But this did not apply to the Agnihotrahavanī and *camasas* of soma. Vide H. of Dh. vol. II p. 1002, n. 2663 for agnihotrahavanī, p. 1005 for its licking and p. 1177 (n. 2598) for the drinking of soma from the same *camasa* by the several priests. The licking of the agnihotrahavanī and its use constitute really the subject of the prohibition.[1821]

17. 'Entering on the stage of forest hermit as laid down in the texts about it' (l. 12). Gaut. III. 25–34, Āp. Dh. S (II. 9. 21. 18 to II. 9. 23. 2), Manu VI. 1–32, Vas IX 1–11, Yāj. III. 45–55 lay down elaborate rules for the stage of forest hermits. Vide H. of Dh vol II pp. 917–929 for a description and remarks on *sannyāsa* to be made later on.

18. 'The narrowing down or curtailment of the periods of impurity depending upon the Vedic learning and the mode of life of a person' (l. 13). 'Agha' means 'āśauca'; 'vrtta' (mode of life) refers to tending sacred fires or maintaining oneself in the way described by Manu IV. 7–10. The general rule about the period of impurity for a brāhmana on the death of a sapinda was stated by Gaut. 14. 1, Manu V. 59 and 83 to be that it was ten days and Angiras quoted by the Mit. on Yāj III. 22 prescribes impurity for ten days for all varnas, but Manu V. 59 also spoke of the period being four days, three days or one day, which, acc to the Mit. on Yāj. III. 28–29, refers respectively to kumbhidhānya, one who has collected food for three days or one who collects nothing for the morrow. Daksa VI. 6 and Parā-

1821. प्राग्दण्डयोर्दण्डया वा स्रुचा द्विराचामति द्विश्च निर्लेढि। सरया श्रौ III 7 19. लीढाया उच्छिष्टदोषशुद्ध्युपाय विना परिग्रहो यस्मिन् विहितत्वेन निर्दोषत्वाविश्याशय.। ततश्च न पृथक्निषेध· परिग्रहस्य। स्मृतिकौस्तुभ p 471, अग्निहोत्रं हूयते यया स्रुचा सा चैकस्रुती अग्निहोत्रहवणी तस्याश्च होमानन्तर हुतावशिष्टमतिपत्तिधूतप्राशनार्थं लेहो जिह्वया-स्वादनं कथंचिल्लीढायास्तस्याः पुन. परिग्रहो विनान्तरे होमसाधनता। कलिवर्ज्यवि. folio 7a.

śara[1822] III. 5 both state that a brāhmaṇa who keeps the Vedic fires and has studied the Veda becomes free from impurity in a day, one who has only studied the Veda (but does not tend sacred fires) becomes free in three days, while one devoid of both becomes free after ten days. Aparārka (p. 894) and Haradatta on Gaut. 14. 1 quote Bṛhaspati to the same effect. The Mit. remarks[1823] (on Yāj III. 28–29) that the curtailment of the period of impurity is not absolute but is restricted only to certain special matters viz. the receiving of gifts, the performance of Agnihotra, the study of the Veda and such matters in which distress would be caused if the period were not curtailed. This explanation clearly proves that Vijñāneśvara (end of 11th century) was not aware of the prohibition of the curtailment of the periods of impurity or treated it with scant respect. The curtailment of the period of impurity was laid down probably because curtailment led to confusion, since a person may claim to be learned, while his neighbours may not concede that claim.

19. 'Prescribing death as the penance for brāhmaṇas'. (I. 14)

Manu XI. 89 provides that if a person intentionally murders a brāhmaṇa there is no expiation for it. Manu XI 90 prescribes death by drinking boiling wine for the sin of drinking *surā*, while Manu XI. 146 provides[1824] that if a man knowingly drinks wine there is no expiation for it, but only death. The Viṣṇu-dharmasūtra (chap. 34) states that incest with the mother, daughter or daughter-in-law is *atipātaka*, such sinners have to

1823. अथ चाशौचसङ्कोचो येनैव प्रतिग्रहादिना विनार्तिस्तद्विषयो न सर्वत्रेत्यवगन्तव्यम् । ... अतः क्वाचित्कमेवेदृमाशौचसङ्कोचविधान न पुनः सर्वसंध्यवहारादिगोचरमित्यलमतिप्रपञ्चेन । मिता. on या III. 28–29

1824 मतिपूर्वमनिर्देश्यं प्राणान्तिकमिति स्थिति । मनु XI 146 Most of the commentators of Manu explain this half differently as meaning 'a penance destructive of life should not be prescribed'. But this explanation is opposed to Gaut 21. 7 (त्रीणि प्रथमान्यनिर्देश्यानि मनु.) and to Medhātithi Vide कल्पिवर्ज्यवि folio 7a ' यत्तु कैश्चिद् व्याख्यात मतिपूर्वं .. स्थितेरिति मनुराज्याद्यरोधात् सर्व्यैर्विप्रेभ्यो मरणान्तिकं नोपदेष्टव्यं तैस्तु रहस्यप्रायश्चित्तवद्यथाकथंचित्तदनुष्ठेयमिति तन्मन्दं मनुस्मृतेरेतद्गुणविधयत्वे प्रमाणाभावाद् । '.

enter fire and there is no other penance for this sin. Vide Gaut. 21. 7 also. Some smrtis held that there was no-prāyaścitta for certain grave sins except falling from a precipice or into fire. As a brāhmana's person became more and more sacred with the march of time, death ceased to be a penance for a brāhmana sinner, however grave the sin might be But this did not apply to a ksatriya or any one else (other than a brāhmaṇa).

20. 'Pollution through contact with a sinner' (1. 15). Manu XI. 180 (= Śānti 165. 37 = Baud. Dh. S. II. 1. 88),[1825] Visnu Dh. S. 35. 2–5 provide that if a person continues for one year in close association (*samsarga*) with one guilty of the grave sins (enumerated in Manu XI. 54), in respect of occupying the same conveyance or seat with him or dining in the same row with him he becomes patita; but he becomes patita immediately if he officiates as a priest for such a sinner or performs his upanayana for teaching him the sacred Gāyatrī and the Veda or if he enters into a matrimonial alliance with him. Parāsara (I. 25–26) states that in the Krta age a person became patita by speaking with a patita, in Tretā by seeing him, in Dvāpara by partaking of food prepared in his house, but in Kali by actually committing a (sinful) deed and that when a grave sin was committed by a man, in the Krta age the whole district in which he lived was to be abandoned, in Tretā the village, in Dvāpara his family alone and in Kali only the perpetrator.[1826] Parāśara (XII. 79) no doubt[1827] says that 'sins (i. e pollutions are caused) are transferred, as a drop of oil (spreads) on water, by sitting or sleeping together or by using the same conveyance, by speaking with or by dining in the same row with a sinner'; but this only means that to associate with a sinner is bad, but it does not mean that to associate with a *patita* immediately makes the associator himself a patita. The Mit. on Yāj III. 261 quotes Devala[1828] and Vrddha-Brhaspati to the effect

---

1825. संवत्सरेण पतति पतितेन सहाचरन् । याजनाध्यापनाद्योनात्र तु यानासनाशनात् । मनु XI 180, बौ ध. सू. II. 1. 88.

1826 त्यजेद्देशं कृतयुगे त्रेतायां ग्राममुत्सृजेत् । द्वापरे कुलमेकं तु कर्तारं च कलौ युगे ॥ कृते सम्भाषणात्पाप त्रेतायां चैव दर्शनात् । द्वापरे चान्नमादाय कलौ पतति कर्मणा ॥ पराशर I. 25-26.

1827. आसनाच्छयनाद्यानात्सम्भाषात् सहभोजनात् । संक्रामन्ति हि पापानि तैलबिन्दुरिवाम्भसि ॥ पराशर XII, 79, which is the same as कण्व q by परा मा II. 1 p 28 (where सलापात् is read for सम्भाषात्).

1828 संलापस्पर्शनि.श्वाससहयानासनाशनात् । याजनाध्यापनाद्योनात्पापं संक्रमते नृणाम् ॥ देवल p. by मिता on या. III. 261, अपरार्क p. 1087

that *saṃsarga* arises in nine ways viz. by talk, by touch, by breathing the same air (i. e. by being in the same room), by being in the same conveyance or on the same seat or bed, by dining in the same row, by being a sinner's priest or vedic teacher or entering into matrimonial alliance with him. The Par M. says that Parāśara held the view that there was no *pātitya* by the various kinds of contact in Kali and so provided no prāyaścitta for *saṃsarga*. The Nirnayasindhu[1829] and Bhattoji make similar remarks. The Udvāhatattva says that Parāśara I. 25 is to be interpreted in this way that merely speaking or touching a *patita* or receiving money from him does not make another liable to any prāyaścitta, but that if the association with a patita goes quite beyond these, then sin may be incurred by association. So almost all the digests are agreed that the rigour of the very strict rules about saṃsarga in Manu and Baud. was modified by declaring that speech with or sight of a sinner involved no sin in Kali.[1830]

21. 'Undergoing (secret) expiation for the grave sins (mahāpātakas) except theft' (I. 15). Hārīta (q by Par. M. II[1831] part 2, p 153) prescribes secret expiation for a brāhmana who has studied dharmaśāstra and committed a sin without anyone knowing it. Gaut. (chap. 24) prescribes certain expiations to be undergone secretly (without any third person knowing of such performance) for even mahāpātakas such as brāhmana murder, drinking surā, incest and theft of gold. Vas. (chap. 25) also does the same and states (25. 2) that only those who have kept the sacred vedic fires, who are disciplined and old or learned are entitled to secret expiations for sins and not other people The Viṣnu Dh. S. 55 deals with secret expiations. Parāśara IX. 61 (last verse) laid down[1832] the general rule that one should openly

---

1829 आचार्यस्तु कलियुगे संसर्गदोषाभावमभिप्रेत्य संसर्गप्रायश्चित्त नाम्नधात् अत एव स्मृत्यन्तरे कलौ वर्ज्यानामनुक्रमणे संसर्गदोषः पापेषु इत्युक्तम्। परा मा II part 2 p 90, it may be noted that the धर्मट्टीकानिर्णय (p 132) *quotes this passage and criticizes it*; कलौ कर्तैव लिप्यते—इति व्यासोक्तेः पतितसंसर्गे दोषसत्त्वेपि पातित्यं नेत्यर्थः। निर्णयसिन्धु III. p 368.

declare one's sin. The Kalivarjya text provides that secret expiation is allowed as regards only theft among the mahāpātakas in the Kali age, though in earlier ages it was allowed as to other mahāpātakas also The Nirnayasindhu says that secret expiation is allowed only to brāhmanas According to the Dharmasindhu, in the Kali age if a man is guilty of the murder of a brāhmana or of other mahāpātakas he does not avoid the consequences of falling into Hell when he undergoes an expiation but he becomes only fit for social intercourse, while as regards theft of gold (a mahāpātaka) by undergoing prāyaścitta he avoids the fall into hell and also becomes fit for social intercourse. The Kalivarjyavinirnaya appears to hold that all secret expiations are forbidden in Kali.[1833]

22. 'The act of offering an animal with the recital of Vedic *mantras* to the bridegroom, to a guest and in honour of pitrs' (1 16)[1834] Madhuparka was offered in ancient times on several occasions and to several persons such as to *rtvijs* at sacrifices, to the king, to a *snātaka*, to one's ācārya, father-in-law, paternal or maternal uncle and to a bridegroom. Vide H. of Dh. vol. II. pp 542–546 for details about Madhuparka. Originally a cow or a bull was killed for an honoured guest, later on when the cow came to be extremely sacred the flesh of some other animal was offered; when flesh-eating itself came to be looked down upon then only *pāyasa* and other vegetarian eatables came to be prescribed Vide H of Dh vol. II pp. 777–782 on flesh-eating. This half line forbids the offering of flesh to a bridegroom or to an honoured guest (in madhuparka) and the feeding of

1833. The कलिवर्ज्यानि (folio 8a) notes, 'अत एव बृहन्नारदीयविष्णुपुराणादिषु-च्यादयन्ति प्रयत्नेन स्वदोषं पापकर्मिणः । रहस्यमेव कुर्वन्ति प्रायश्चित्तक्रियां कलौ॥ मनःशुद्धिविहीनानां निष्कृतिर्न ततो भवेत्—इत्यादि तत्र तत्र निन्दाप्रकर्षे रहस्यव्रतमेव निन्दितम् ।' It should be noticed that the Nirnayasindhu and a few others read ससर्गदोषस्तेयान्यमहापातकनिष्कृति as one word meaning 'secret expiation for mahāpātakas other than theft and other than association with those guilty of grave sins' The स्मृत्यर्थसार (p 2), मद (p. 16 and उद्वाहतत्त्व (p. 112) read this half line as ससर्गदोषः पापेषु मधुपर्के पशोर्वधः. 'ब्रह्महत्यादिमहापातकेषु प्रायश्चित्तेन नरकनिवृत्तिर्न भवति किं त्विह लोके व्यवहार्यतामात्रं कलौ भवति । स्वर्णस्तेयादिषु तु प्रायश्चित्तेन नरकनिवृत्तिर्व्यवहार्यता च । धर्मसिन्ध III, पूर्वार्ध p. 358.

1834. उपाकरण has a technical sense It means 'touching the animal to be sacrificed with several mantras' Manu V 7 employs the word in that sense and Kullūka comments, 'पशुयागादौ मन्त्रबहुत्वेन पशोः स्पर्शनमुपाकरणम्'. The कलिवर्ज्यानि. (9a) quotes देवतामादिशेदमुकं त्वा जुष्टमुपाकरोमि With reference to śrāddha the word upākarana is used in a secondary sense and not in the literal sense For the upākarana *mantra* अमुकं करोमि, vide आश्व गृ. I 11. 2

brāhmanas with flesh at śrāddhas. Comparatively so late a writer as Yāj (I. 258–259) extols the high gratification that the *Manes* feel when flesh of various animals is offered in śrāddhas. This one prohibition includes in itself several prohibitions that are separately mentioned in other texts such as 'govadha' (in notes 1797 and 1799), the killing of an animal in a Madhuparka (in n. 1798), 'gavālambha' and 'palapaitrka' (in note 1802). It is noteworthy that even so late as the first half of the 17th century Viśvanātha, a great logician, takes up the cudgels on behalf of flesh-eating by brāhmanas in sacrifices, śrāddha, madhuparka, in danger to life and when ordered by a brāhmana and charges those who totally forbid flesh-eating with being the followers of the doctrines of Bauddhas, while the latter at the same time prescribe expiations for even murderers of brāhmanas through greed of money and marry their maternal uncle's daughters or other sapindas of their mother, though both of these latter are forbidden by the Kalivarjya texts.[1835]

23. 'Association with those that are guilty of intercourse with women who are not of the same varna, even though the former may have undergone proper expiation for the lapse' (1. 18). There was great divergence of views as regards the prāyaścitta for adultery by a male with a female of the same class, of a higher class or of a lower class Further the ancient sūtras were rather hard on the guilty parties, the harsh rules being relaxed by later smrti writers. For example, Gaut 23 14–15 and Vas. 21. 1–3 prescribe for a male of a lower caste having intercourse with a woman of a higher caste death in various ways. If a brāhmana had sexual intercourse with a cāndāla or śvapāka woman Parāśara (X. 5–7) prescribes that he has to undergo a fast for three days, tonsure of the head together with the top knot, three Prājāpatyas, Brahmakūrca, feeding brāhmanas, constant recital of the Gāyatrī, gift of two pairs of cows and then he becomes pure, while a śūdra doing the same had to undergo the expiation of one Prājāpatya and had to make a

1835 तस्माद्यज्ञे श्राद्धे मधुपर्के माणारभ्ये ब्राह्मणाज्ञायां च भोरूभ्यं तद्व्यतिरेकेणापि भृत्यभरणावश्यिष्टं देवपित्रर्चनावशिष्टं च चतुर्णामपि वर्णानामविशेषेण भक्ष्यमेव। मांसतत्त्वविवेक of विश्वनाथ (Sarasvatibhavana series, Benares, 1927), ये तु कलिवर्ज्यतया मांसश्राद्धे विवदन्ते तेषामन्यमहापातकनिष्कृतिरिति कलिवर्ज्यतयोक्तमपि ब्रह्महत्यातरसंसर्गमायश्चित्तं धनलोभाद्वर्षादिशन्ति मातृसपिण्डानयने (सपिण्डापरिणयने?) च न विवदन्ते रागरोवदूषितचेतसो देवानां प्रियास्ते केन शिक्षणीया इत्यलं मासाविद्विषाग्नेः सौगतमतानुसारिभिः सह श्रमेणेति। *ibid.* pp. 28–29.

gift of two cows. If a person of a low caste has intercourse with a woman of a higher caste (e g. a śūdra has intercourse with a brāhmana woman) Samvarta (verses 166–167) prescribes the expiation of subsisting for a month on cow's urine and *yāvaka* (barley gruel) for him If a brāhmana commits adultery with a śūdra or cāndāla woman Samvarta (verses 169–170) prescribes the expiation of cāndrāyana, while Parāśara (X. 17-20) prescribes a far more severe expiation The present text prescribes that, even after undergoing expiation, men guilty of intercourse with women of castes other than their own cannot be allowed to have social intercourse with their castemen. The Dharmasindhu[1836] says that śūdras that have intercourse with brāhmana or other women of a higher caste are hereby declared to be unfit for social intercourse even after they undergo expiation. This no doubt made for strictness in morale, but it also led to the preservation of caste exclusiveness.

24. 'Abandonment of a mother (or other woman who is to be honoured owing to relationship) because she has had sexual intercourse with one of low class' (1. 19).

The provisions of the sūtras and smrtis on the subject of expiation for adultery by women varied from time to time. Gaut 23. 14 and Manu VIII. 371 prescribe that a woman who has intercourse with a man of low caste is to be punished by the king with being devoured by dogs. But other smrtis and Manu himself (XI. 177) are not so harsh, but are rather humane in their treatment of adulteresses. Manu XI. 176 says that the husband should keep confined to one apartment his corrupt wife and compel her to perform the expiation which is prescribed for males in cases of adultery. Manu XI. 59 and Yāj III. 235 regard adultery by a male (pāradārya) as an upapātaka and Manu XI. 117 and Yāj. III. 265 prescribe cāndrāyana as an expiation for all upapātakas. Vas. XXI. 12 prescribes that the wives of men of the three higher castes who are guilty of adultery with a sūdra may be purified by an expiation if no child is born of the intercourse but not otherwise Yāj I. 72 provides that a woman becomes free from the taint of adultery when she has her monthly illness after the adultery but if she conceives in adulterous intercourse she may be abandoned. The Mit. on Yāj. I. 72 states that both Yāj. and Vas. are to be

1836. विप्रादिस्त्रीसम्भोगेन भ्रष्टानां शूद्रादीनां प्रायश्चित्तेपि संसर्गो निषिद्धः । धर्मसिन्धु III. पूर्वार्ध p. 358.

understood in the same sense and abandonment does not mean driving out of the house but only not allowing her to participate in religious acts and not having sexual intercourse with her. Vas. XXI. 10 states that only four kinds of women are to be abandoned, viz. one who has intercourse with the husband's pupil or with the husband's *guru*, one who attempts to kill her husband or one who commits adultery with a man of a degraded caste. Yāj. (III. 296–7) provides that to women that are patita the same rules apply as to men, but they should be given food, raiment and protection and that intercourse with a man of low caste is one of the three gravest sins for women. Vide Mit. on Yāj. III. 297. The present text states that a woman (such as a mother) who is entitled to honour from a person because of her relationship (as mother, elder sister etc.) is not to be abandoned and cast on the street by him, although she may be guilty of adultery with a degraded or low caste man, in spite of Vas. XXI. 10 and other texts (such as Br.).[1837] That is, this text was more humane to such women than ancient texts. Krsnabhatta explains that 'gurustriyāh' means 'of a brāhmana woman'. Vide H. of Dh. vol. II pp. 571–573 for further remarks on adulterous women. Āp. Dh. S. I. 10. 28. 9 requires the son always to serve and wait upon the mother even though she may be *patita*. Atri[1838] (195–196) and Devala (50–51) contain two verses (almost in the same words) which are lax as compared with other ancient texts. They say: 'If a woman conceives through intercourse with a male who is not of her caste, she becomes impure till her delivery. When she is delivered or she has her monthly illness after the intercourse she becomes like pure gold'. Atri (197–198) further provides that whether a woman willingly has sexual intercourse or is deceived or is enjoyed against her will or in secret, she should not be abandoned; one should wait till the monthly illness and she becomes purified by that illness'. This comparative laxity of

1837. अनिच्छन्ती तु या भुक्ता गुप्तां तां वासयेद् गृहे। मलिनाङ्गीमधःशय्यां पिण्डमात्रोपजीविनीम्। कारयेच्छुद्धिं कृच्छ्रं पराकं वा सने गताम्। हीनवर्णापभुक्ता या त्याज्या वध्यापि वा भवेत्। बृहस्पति q. by विवादरत्नाकर p. 400 and by प्रायश्चित्तविवेक p. 360 (last half).

1838. असवर्णैस्तु यो गर्भो स्त्रीणां योनौ निषिच्यते। अशुद्धा सा भवेन्नारी यावद्गर्भं न मुञ्चति॥ विसृष्टे तु ततः शल्ये रजश्चापि प्रदृश्यते। तदा सा शुध्यते नारी विमलं काञ्चनं यथा॥ स्वयं विप्रतिपन्ना वा यदि वा विप्रतारिता। बलात्कारी प्रभुक्ता वा चौरभुक्ता तथापि वा॥ न त्याज्या दूषिता नारी न कामोऽस्या विधीयते। ऋतुकाल उपासीत पुष्पकालेन शुध्यति॥ अत्रि १९५–१९८.

the later smrtis of Devala and Atri is remedied by this Kalivarjya text which forbids abandonment of only such women as the mother, but allows the abandonment of others when guilty of intercourse with a male of low caste. Devala prescribes expiation by *sāntapana* in the case of those women that are raped by *mlecchas* and conceive (verses 47–49) Vide also Atri 201–202 The Sm Kau restricts this half verse to the mother alone. Parāśara (X 24–25) prescribes that if a woman be raped once she becomes free from pollution by undergoing Prājāpatya after she has her monthly illness and in other cases of rape she has to undergo Sāntapana.

25. 'Sacrificing one's life for the sake of another' (I. 20). The Visnu Dh. S III. 45 states [1839] that those who are killed in saving the life of a cow, a brāhmana, the king, a friend, one's wealth and one's wife go to heaven and XVI. 18 provides that even those (untouchables) who are outside (the pale of the four varnas) and sacrifice their life for brāhmanas, for cows and for women and children attain heaven The Ādityapurāna quoted in Rājadharmakānda (p. 91) has a similar verse. The Samayamayūkha and Bhattoji quote a smrti, 'one should at once sacrifice one's life for cows and brāhmanas'.[1840] This text forbids self-sacrifice of one's life simply for the promised reward of heaven in the cases specified. The K. V. N. (folio 9b) offers two more (rather far-fetched) explanations of this phrase, one of which is 'offering one's services as a serf to another'. This is prohibited to members of the three twice-born classes in Kali, but not to the śūdras, acc to K. V. N.

26. 'Offering (of food) to another that remains after one has partaken of it' (I 20). In the Madhuparka the honoured guest used to partake of a part of the offering of honey, milk

1839. गोब्राह्मणनृपतिमित्रधनदारजीवितरक्षणाद्ये हतास्ते स्वर्गभाजः । विष्णुधर्मसूत्र III 45; ब्राह्मणार्थे गवार्थे वा देहत्यागोऽनुपाकृतः । स्त्रीबालाभ्युपपत्तौ च बाह्यानां सिद्धिकारणम् ॥ *ibid* XVI 18, आदित्यपुराणे– .ब्राह्मणाना गवा चैव रक्षार्थं हन्यते यदि । स शूरो जीवितं हित्वा इन्दुलोकं प्रपद्यते ॥ राजधर्मकाण्ड p 91.

1840. परेषां गोब्राह्मणनृपादीनामुद्देशेन तदापद्विमोक्षार्थं प्राणत्याग 'गवार्थे ब्राह्मणार्थे वा सद्य: प्राणान् परित्यजेत्'–इत्यादिनोक्त: । भट्टोजि on चतुर्विंशतिमत p. 54 Almost the same words 'परेषा ... मुद्देशेन निमित्तेन तदा . . मोक्षार्थं बुद्धिपूर्वं . इत्याद्युक्त ' occur in कलिवर्ज्यवि. folio 9a We find in the पञ्चतन्त्र (I, verse 205) this verse quoted, 'गवार्थे ब्राह्मणार्थे स्वाम्यर्थे स्त्रीकृते तथा । स्थानार्थे यस्त्यजेत्प्राणास्तस्य लोका. सनातना' ॥ ' and I 420 is 'गवार्थे ब्राह्मणार्थे च प्राणत्यागं करोति य । सूर्यस्य मण्डल भित्त्वा स याति परमां गतिम् ॥. '

and curds and was to give the remainder to a brāhmana (or a son or a younger brother) This is prohibited by this Kalivarjya text Vide H. of Dh. vol. II. p. 544 for this practice. Ap Dh. S. (I 1. 4. 1-6) provides that the pupil may partake of the leavings of his teacher's food, but the teacher should not give him honey or meat or other food which will be opposed to the observances of a vedic student The Nirnayasindhu reads 'uddistasyāpi varjanam'[1841], which means 'not accepting what has been donated.' Yāj. I. 213 says that if a person worthy of accepting a gift does not keep it for himself (but passes it on to others), he secures the highest worlds obtained by those who make generous gifts Bhattoji gives another explanation. Vas (14. 21) forbids a man to eat the remnants of his own food or to eat food that comes in contact with the leavings of food. This Kalivarjya text sets aside for the Kali age the prohibition contained in Vas. 14. 21 (acc to Bhattoji) The K. V N. (folio 10 a) states that this is the explanation given by some, but does not approve of it. The Sm Kau. gives yet another but extremely far-fetched explanation.[1842] These several explanations of the same half verse indicate how some of the Kalivarjya texts are comparatively recent and have no settled meaning even according to comparatively late writers of digests.

27. 'The resolve to offer worship (throughout life) with various details to a certain idol (I. 21)

It is not easy to see why such a resolve should have been prohibited. Therefore this explanation given by Bhattoji, K. V. N. (folio 10 a), the Samayamayūkha and others is not satisfactory. It is better to accept the explanation of the Nir S. that this forbids the undertaking of the worship of a particular image for wages Aparārka (pp. 450 and 923) quotes a smrti text defining a *devalaka* as a brāhmana who performs the worship of an image for wages for three years and who thereby becomes unfit

---

1841. उच्छिष्टस्यापि वर्जनमिति । स्वमुच्छिष्टमुच्छिष्टोपहृत चेत्यादिवसिष्ठोक्तम् । भट्टोजि on चतुर्वि p 54, उद्दिष्टस्य त्यक्तस्य वर्जन प्रतिग्रहसमर्थोपीत्युक्तम् । निर्णयसिन्धु III. p 368

1842. वस्तुतस्तु उद्दिश्यव्ययेनोत्कृष्टेन पित्रादिनोद्दिष्ट निर्दिष्ट शिष्टमित्येक एवार्थः । तादृशस्याप (पि?) वर्जन प्रायपाठाद्विहितव्रतान्तर्गतत्वम् । अपेति पाठेपि तादृशस्य वस्तुन. परस्मै समर्पण तन्निषिध्यते । . तथा च कलौ गुरोर्वचनाद्गुरोधेन व्रतविच्छेदाचरणे न केवल व्रतहानिदोषाभाव प्रत्युत तद्वचनोल्लङ्घने दोषाधिक्यमपि । तथा च ब्रह्मवैवर्ते कलिब्रह्मसंवादे गुरुभजनमीश्वरभजनादप्यादरणीयमुक्तम् । स्मृतिकौ. p. 477.

to officiate at śrāddhas.[1843] Manu III. 152 declares the devalaka to be unfit for being invited for śrāddhas or rites in honour of gods and Kullūka quotes Devala to the effect that one who maintains himself on the treasury of a shrine is called devalaka. It is remarkable that Vrddha-Hārīta (VIII. 77–80) says that only the worshippers of Śiva for wages are called devalaka and those of Visnu are not. Acc. to the Sm. Kau. what is forbidden is the resolve to worship an image for securing a direct vision of the Deity.[1844] This is rather pedantic and far-fetched.

28. 'Touching the bodies of those (who are impure on the death of a relative) after the collection of the bones' (1 22). The day on which the bones were to be collected after the body was cremated differed greatly according to various writers. The Mit. on Yāj. III. 17 notes that according to Samvarta[1845] (verse 38) the bones may be collected on the first, third, seventh or 9th day, that the Visnu Dh. S (19. 10–11) prescribes the 4th day for it and recommends the casting of them into the Ganges, that some did it on the 2nd day and that therefore everyone should follow his own Grhyasūtra. The Mit. on Yāj. III. 18 quotes Devala to the effect that, after the lapse of one-third of the period of impurity prescribed for members of the four varnas (as in Yāj. III. 22), persons who lost relatives become touchable, that members of the four varnas become touchable in three, four, five and ten days respectively. Samvarta (verses 39–40) states that, after the collection of bones, touching those who are under pollution due to death is allowed on the 4th, 6th, 8th and 10th day respectively in the case of brāhmanas, ksatriyas, vaisyas and śūdras. The present Kalivarjya text forbids this and becomes stricter as to the rules about impurity.

29. 'The performance by a brāhmana of the duties of the killer of the victim in a sacrifice' (1. 23).

1843. स्मृत्यन्तरम्। स्पृष्ट्वा देवलकं चैव सवासा जलमाविशेत्। देवार्चनपरो विप्रो वित्तार्थी वत्सरत्रयम्। असौ देवलको नाम हव्यकव्येषु गर्हितः। अपरार्क p. 923; देवकोशोपजीवी च नाम्ना देवलको भवेत्। अपाङ्क्तेय. स विज्ञेयः सर्वकर्मसु सर्वदा॥ देवल q. by अपरार्क p 450 and कुल्लूक on मनु III. 152 (first half).

1845. प्रथमेह्नि तृतीये च सप्तमे नवमे तथा। चतुर्थेऽह्नि कर्तव्यमस्थिसञ्चयनं द्विजै॥ ततः सञ्चयनादूर्ध्वमङ्गस्पर्शो विधीयते। चतुर्थेऽहनि विप्रस्य षष्ठे वै क्षत्रियस्य च॥ अष्टमे दशमे चैव स्पर्शः स्याद्वैश्यशूद्रयोः। संवर्त 38–40.

The animal in a srauta sacrifice was to be killed by choking it and strangling it. The person who did so was called *samitr* Different views were entertained as to who was to be the samitr Acc. to Jai. III. 7. 28–29[1845] the adhvaryu himself was to be the samitr; the usual opinion was that he was to be some one other than the *rtvijs*. The Asv. Śr. (XII. 9. 12–13) shows that he may be a brāhmana or a non-brāhmana. For further details vide H. of Dh. vol. II. pp 1121–22, n. 2504. As animal sacrifices themselves came to be looked down upon or even forbidden, this text forbids a brahmana from being a samitr.

30. 'The sale of the soma plant by brahmanas' (1. 23).

Soma beverage was to be drunk only by brāhmanas. The soma plant had to be purchased and there was a symbolic haggling for it. The vendor of soma in ancient[1847] times was, acc. to Kāt. Śr. VII. 6. 2–4 and Āp Śr. X 20.12, either a brāhmana of Kutsa gotra or any brāhmana or a sūdra.[1847] In later times, though Manu XI. 7 (= Śānti.165. 7) and Nār. (dattāpradānika 7)[1848] allow a brāhmana who has wealth sufficient for the maintenance of himself and his dependents for three years or more to perform a soma sacrifice, yet Manu III. 158, Yāj I. 165 and Vas 14. 3 hold that a brāhmana who sells the soma plant is unfit to be invited at a śrāddha and that one should not partake of food at his house. Manu X. 88 forbids a brāhmana to sell water, arms, poison, soma &c Vide H. of Dh. vol. II. pp 1141–1143 for purchase of soma and the dramatic haggling for it.

31. 'Allowing a brāhmana householder to eat food at the houses of four classes of people among śūdras viz his slave, his cowherd, a hereditary family friend and one who cultivates his fields on the basis of paying a half or other portion of the produce to him' (1. 25–26).

Gaut. 17. 6, Manu IV. 253 (=Visnu Dh. S.[1849] 57 16), Yāj I. 166 and Parāśara XI. 19 say that a brāhmana may eat the
